MARTYR (*μάρτυς*). This word means properly *a witness*, and is applied in the New Testament—1. To judicial witnesses (Matt. xviii. 16; xxvi. 65; Mark xiv. 63; Acts vi. 13; vii. 58; 2 Cor. xiii. 1; 1 Tim. v. 19; Heb. x. 28). The Septuagint also uses it for the Hebrew עֵד *ed*, in Deut. xvii. 16; Prov. xxiv. 28.—2. To one who has testified, or can testify to the truth of what he has seen, heard, or known. This is a frequent sense in the New Testament: as in Luke xxiv. 48; Acts i. 8, 22; Rom. i. 9; 2 Cor. i. 23; 1 Thes. ii. 5, 10; 1 Tim. vi. 12; 2 Tim. ii. 2; 1 Pet. v. 1; Rev. i. 5; iii. 14; xi. 3, and elsewhere.—3. The meaning of the word which has now become the most usual, is that in which it occurs most rarely in the Scripture, *i. e.*, one who by his death bears witness to the truth. In this sense we only find it in Acts xxii. 20; Rev. ii. 13; xvii. 6. This now exclusive sense of the word was brought into general use by the early ecclesiastical writers, who applied it to every one who suffered death in the Christian cause (see Suicer, *Thesaurus Eccles.* sub voc.). Stephen was in this sense the first martyr [Stephen]; and the spiritual honours of his death tended in no small degree to raise to the most extravagant estimation, in the early church, the value of the testimony of blood. Eventually a martyr's death was supposed, on the alleged authority of the under-named texts, to cancel all the sins of the past life (Luke xii. 50; Mark x. 39); to supply the place of baptism (Matt. x. 39); and at once to secure admittance to the presence of the Lord in Paradise (Matt. v. 10-12). In imitation of the family custom of annually commemorating at the grave the death of deceased members, the churches celebrated the deaths of their martyrs by prayer at their graves, and by love-feasts. From this high estimation of the martyrs, Christians were sometimes led to deliver themselves up voluntarily to the public authorities—thus justifying the charge of fanaticism brought against them by the heathen. For the most part, however, this practice was discountenanced, the words of Christ himself being brought against it (Matt. x. 23; see Gieseler, *Eccles. Hist.* i. 109, 110).

1. MARY (Μαρία or Μαρίαμ; Heb. מִרְיָם *Miriam*), 'the Mother of Jesus' (Acts i. 14), and 'Mary his Mother' (Matt. ii. 11), are the appellations of one who has in later times been generally called the 'Virgin Mary,' but who is never so designated in Scripture.

Little is known of this 'highly favoured' individual, in whom was fulfilled the first prophecy made to man, that 'the seed of the *woman* should bruise the serpent's head' (Gen. iii. 15). As her history was of no consequence to Christianity, it is not given at large. Her genealogy is recorded by St. Luke (ch. iii.), in order to prove the truth of the predictions which had foretold the descent of the Messiah from Adam through Abraham and David, with the design evidently of showing that Christ was of that royal house and lineage (comp. Davidson's *Sacred Hermeneutics*, p. 589, ff.).

Eusebius, the early ecclesiastical historian, although unusually lengthy upon 'the name Jesus,' and the genealogies in Matthew and Luke's Gospels, throws no new light upon Mary's birth and parentage. The legends respecting Anne, who is said to have been her mother, are pure fables without the slightest evidence.

The earliest event in her history, of which we have any notice, was the annunciation to her by the angel Gabriel that she was destined, whilst yet a pure virgin, to become the mother of the Messiah—an event which was a literal fulfilment of the prophecy given centuries before by Isaiah, that 'a *virgin* should conceive, and bear a son, and should call his name Immanuel,' which being interpreted, is 'God with us' (Isa. vii. 14; Matt. i. 23). On this occasion she was explicitly informed that she should conceive by the miraculous power of God, and that her child should be 'Holy,' and be called 'the Son of God.' As a confirmation of her faith in this announcement she was also told by the angel that her cousin Elizabeth, who was the wife of one of the chief priests, and who was now far advanced in years, had conceived a son, and that the time was not far off when her reproach among women should cease (Luke i. 36).

Almost immediately on receiving this announcement Mary hastened from Nazareth, where she was when the angel visited her, to the house of her cousin, who was then residing in the hilly district in 'a city of Judah.' This 'city' some have supposed to be Hebron; whilst others, reading Ἰούττα for Ἰούδα, translate the clause 'the city Juttah,' and identify the place of Elizabeth's residence with the town of that name mentioned in Josh. xv. 55; xxi. 16 (Kuinoel, *in loc.*; Olshausen, *Bib. Comment. in loc.*; Reland, *Palaestina*, p. 870). The meeting of these two pious females, on whom such unexpected privileges had

been conferred, was one of mutual congratulations, and united thanksgiving to the author of their blessings. It was on this occasion that Mary uttered the *Magnificat*—that splendid burst of grateful adoration which Christians of all parties have from the earliest times delighted to adopt as expressive of the best feelings of the pious heart towards God (Luke i. 39-56). After spending three months with her relative, Mary returned to Nazareth, where a severe trial awaited her, arising out of the condition in which it had now become apparent she was. Betrothed (perhaps in early life) to a person of the name of Joseph, an artificer of some sort (τέκτων, Matt. xiii. 55, probably, as our translators suppose, a carpenter), the Jewish law held her exposed to the same penalties which awaited the married wife who should be found unfaithful to the spousal vow. Joseph, however, being a right-hearted man (δίκαιος = one who feels and acts as a man ought to do in the circumstances in which he is placed), was unwilling to subject her to the evils of a public exposure of what he deemed her infidelity; and accordingly was turning in his mind how he might privately dissolve his connection with her, when an angel was sent to him also to inform him in a dream of the true state of the case, and enjoin upon him to complete his engagement with her by taking her as his wife. This injunction he obeyed, and hence came to be regarded by the Jews as the father of Jesus (Matt. i. 18-25).

Summoned by an edict of Augustus, which commanded that a census (ἀπογραφή) of the population of the whole Roman empire should be taken, and that each person should be enrolled in the chief city of his family or tribe, Mary and her husband went up to Bethlehem, the city of the Davidic family; and whilst there the child Jesus was born. After this event the only circumstances in her history mentioned by the sacred historians are her appearance and offerings in the temple according to the law of Moses (Luke i. 22, ff.); her return with her husband to Nazareth (Luke ii. 39); their habit of annually visiting Jerusalem at the Feast of the Passover (ver. 41); the appearance of the Magi, which seems to have occurred at one of these periodic visits (Matt. ii. 1-12); the flight of the holy family into Egypt, and their return, after the death of Herod, to Nazareth (ver. 13-23); the scene which occurred on another of those periodic visits, when, after having proceeded two days' journey on her way homeward, she discovered that her son was not in the company, and, on returning to Jerusalem, found him sitting in the temple with the doctors of the law, 'both hearing them and asking them questions' (Luke ii. 42-52); her appearance and conduct at the marriage-feast in Cana of Galilee (John ii. 1, ff.); her attempt in the synagogue at Capernaum to induce Jesus to desist from teaching (Matt. xii. 46, ff.); her accompanying of her son when he went up to Jerusalem immediately before his crucifixion; her following him to Calvary; her being consigned by him while hanging on the cross to the care of his beloved apostle John, who from that time took her to reside in his house (John xix. 25, ff.); and her associating with the disciples at Jerusalem after his ascension (Acts i. 14).

The traditions respecting the death of Mary differ materially from each other. There is a letter of the General Council of Ephesus in the fifth century, which states that she lived at Ephesus with St. John, and there died and was buried. Another epistle of the same age says she died at Jerusalem, and was buried in Gethsemane. The legend tells that three days after her interment, when the grave was opened (that Thomas the Apostle might pay reverence to her remains), her body was not to be found, 'but only an exceeding fragrance,' whereupon it was concluded that it had been taken up to heaven. The translations of Enoch and Elijah, and the ascension of the Lord Jesus Christ, took place while they were *alive*, and the facts are recorded by the inspiration of God; but when the *dead* body of Mary was conveyed through the earth, and removed thence, there were *no witnesses*, and no revelation was ever made of the extraordinary and novel incident, which certainly has no parallel in Scripture. This miraculous event is appropriately called 'the Assumption.'

It is said that Mary died in A.D. 63. The Canon of Scripture was closed in A.D. 96, thirty-three years after her decease; which, however, is never alluded to by any of the apostles in their writings, nor by St. John, to whose care she was entrusted.

In the Romish Church many facts are believed and doctrines asserted concerning the Virgin Mary, which not only are without any authority from Scripture, but many of which are diametrically opposed to its declarations. Such, besides that just mentioned, viz. the Assumption, are the following:—

1. 'The immaculate conception of the Blessed Virgin.' The Council of Trent, treating upon 'Original Sin,' decreed that 'the blessed and immaculate Mary, the Mother of God,' is 'exempt from all sin, actual and original' (Sess. 5). This dogma is utterly destitute of any Scriptural evidence, and is plainly contradictory to the unqualified and repeated assertions of the sacred writers respecting the universal depravity of mankind (comp. especially Rom. iii. 10, 23; Gal. iii. 22). St. Paul, the inspired author of these passages, lived after the death of Mary, and must have known the singular fact of her immaculate and sinless nature, if such had been the case; but he makes no exception in her favour, and never alludes to her in any way. St. John could not have been ignorant of her alleged perfection, and yet he, writing about A.D. 90, declares, 'If we say that we have *not sinned*, we make him a liar, and his word is not in us' (1 John i. 10).

2. 'The perpetual virginity' of Mary. As to this point we possess no direct testimony from Scripture on either side; but from the very precise language and phraseology of the Bible on primogeniture, and from the application of this language in the case of Mary, there are grounds for concluding that she had *several* children *after* the birth of Christ.

Matthew (i. 25) and Luke (ii. 7) both state that 'she brought forth her *first-born* son.' The term 'first-born' signifies the eldest of a family, or first in order of nativity: in all tongues and countries the epithet is used in this sense, and in no other; and never, in any instance, signifies an *only child*. This analogy holds in all

cases. 'First-fruits' (Lev. xxiii. 10) relate to the maturity and beginning of a series of similar productions, and not to one solitary thing. 'The first-fruits of every creature' (Col. i. 15) cannot imply one detached unsucceeded person. The 'first-born from the dead' (Col. i. 18) does not mean that Christ alone should rise from the dead, for it is written, 'all shall rise in him.'

The Lord Jesus Christ is repeatedly called 'the only-begotten Son of God' (John iii. 16, 18), but never the only son of Mary. The evangelists say he was the 'first-born son'—an expression which necessarily involves the inference that there was at least a *second*. Neither Samson, nor the son of the Shunamite, who were only children, is ever styled '*first-born*;' yet, when there are but two children in a family, the order of their birth is always regularly noted as a thing of much importance. Esau, in claiming his superior right, says, 'I am thy first-born' (Gen. xxvii. 32). Joseph says of Manasseh, 'This is the first-born' (Gen. xlviii. 18). Very peculiar stress is laid upon this point, which is always carefully observed in Scripture; but nowhere can it be seen that the words 'first-born' are ever attached to an only child. We abstain, however, from pressing into the argument the repeated mention of 'the *brethren* of the Lord,' and 'James, the Lord's *brother*,' on account of the latitude of interpretation which the word 'brother' admits in Scripture, as explained in other articles [BROTHER; JAMES; JOSES; JUDE].

As the Gospels were not written till after the death of Christ, there could be no mistake upon the subject.

No Christian discredits or disbelieves the fact of Christ having been born, according to the prophecy, of a pure virgin; but the perpetual virginity of Mary is merely traditional, unsupported by any evidence, and opposed by the whole tenor of Jewish and Scriptural language.

3. 'The worship of the Virgin.' At the annunciation the angel said to Mary, 'Blessed art thou among women' (Luke i. 28). In the Scriptures this is a usual mode of salutation. In the Song of Deborah (Judg. v. 24) it is said, 'Jael is blessed above women.' Such was the Hebrew form of expressing great joy or congratulation; and although Mary was 'highly favoured' in being the mother of Jesus, yet as Jael receives a similar acknowledgment of her superior station and happiness, for having slain with her own hand the enemy of her country, the phrase must certainly be taken in both cases with some limitation; for in neither of them could it mean, that the party was to be reverenced with any species of worship. In the Old and New Testaments there are many persons who are both individually and collectively blessed. God said to Abraham (Gen. xii. 3), 'I will bless them that bless thee, and curse him that curseth thee; and in thee shall all the families of the earth be blessed.' Again, our Lord Jesus Christ extends his blessing to an indefinite number, saying, '*Blessed* are they that mourn—the meek—the merciful,' 'for they shall see God'—'theirs is the kingdom of heaven' (Matt. v.). The words of *Christ* are much stronger, and contain greater promises to his faithful followers, than those of the *angel* to Mary. There is no instance of peculiar honour, or of any kind of worship, having been paid to Mary earlier than the fifth century, and it was not until the sixth that her festivals (under the patronage of Augustine) began to be generally observed.

4. 'The *mediation* and *intercession* of Mary.' This is not supported by a single passage of Holy Writ. The Lord seems to have had little or no communication with her after he entered upon his public ministry. Mary and Martha, Mary Magdalene, and 'other women,' are frequently mentioned as being in his company, but on one occasion we read that 'while Christ talked to the people his mother stood without, desiring to speak with him; and one said, Thy mother stands *without*, desiring to speak to thee. But he answered and said, who is my mother? And he stretched forth his hand towards his disciples, and said, *Behold my mother* and *my brethren*, for *whosoever* shall do the will of my Father which is in heaven, *the same is my brother, and sister, and mother*' (Matt. xii. 46 to 50). Nothing can be more conclusive than this passage in showing that those who were his kindred according to the flesh were of no importance to him merely on *that* account, but that the righteous were alone regarded by him in the nearest degrees of relationship.

At the marriage in Cana of Galilee (John ii.), Mary, after desiring the servants to do whatever he commanded, 'saith unto him, they have no wine. Jesus saith unto her, Woman, what have I to do with thee?' If Jesus declined receiving any information from her upon a point of no consequence in worldly matters, it is impossible to believe that 'He who doeth all things after *his own* good pleasure' has permitted her to obtain any pre-eminence, or allows any interference by her in heaven. We have besides the explicit assurance that 'there is one God, and *one* Mediator between God and man, the man Christ Jesus' (1 Tim. ii. 5). 'We have an advocate with the Father, Jesus Christ' (1 John ii. 1).

It does not appear that Mary ever saw Christ after the resurrection; for she was not one of the 'chosen witnesses' specified in Scripture, as Mary Magdalene was.—S. P.

2. MARY MAGDALENE (Μαρία ἡ Μαγδαληνή) was probably so called from Magdala in Galilee, the town where she may have dwelt. According to the Talmudists, Magdalene signifies 'a plaiter of hair.'

Much wrong has been done to this individual from imagining that she was the person spoken of by St. Luke in ch. vii. 39; but there is no evidence to support this opinion. There were two occasions on which Christ was anointed. The first is thus recorded in John xii. 1, 3:—'Six days before the Passover Jesus came to Bethany, where Lazarus was which had been dead, whom he raised from the dead. There they made him a supper; and Martha served. Then took Mary a pound of ointment of spikenard, very costly, and anointed the feet of Jesus, and wiped His feet with her hair.' This Mary was certainly the sister of Martha. The second instance occurred in the house of Simon. 'And, behold, a woman in the city, which was a sinner, when she knew that Jesus sat at meat in the Pharisee's house, brought an alabaster box of ointment, and stood at his feet behind him weeping, and began to wash his feet with tears, and did wipe them with

the hairs of her head, and kissed his feet, and anointed them with the ointment' (Luke vii. 37). How Mary Magdalene came to be identified with the person here mentioned, it is difficult to say; but such is the case: and accordingly she is generally regarded as having been a woman of depraved character. For such an inference, however, there appears to be no just ground whatever.

The earliest notice of Mary Magdalene is in St. Luke's Gospel (viii. 2), where it is recorded that out of her 'had gone seven devils,' and that she was 'with Joanna, the wife of Herod's steward, and Susanna, and many others, which ministered unto Christ of their substance.'

This is sufficient to prove that she had not been known as a person of bad character; and it also implies that she was not poor, or amongst the lower classes, when she was the companion of one whose husband held an important office in the king's household.

It is as unjust to say that she who had been so physically wretched as to be possessed by seven devils, was dissolute, as to affirm that an insane person is necessarily depraved; and as there is no evidence to prove that Mary Magdalene was 'the sinner' referred to in the passage quoted above, the ignominy which has been attached to her name ought to be removed.

In the Saviour's last hours, and at his death and resurrection, Mary Magdalene was a chief and important witness. There had followed him from Galilee many women (Matt. xxvii. 55, 56), and there stood by the cross several, of whom Mary Magdalene was one; and, after his death, she 'and Mary the mother of Joses beheld where the body was laid' (Mark xv. 47; Luke xxiii. 55, 56); 'and they returned and prepared spices and ointments.' 'The first day of the week cometh Mary Magdalene early, when it was yet dark, unto the sepulchre, and seeth the stone taken away from the sepulchre' (John xx. 1).

Then she returned to tell Peter and John that the stone was removed. Peter immediately ran to the place with the other disciple, when *they* saw only the napkin and linen clothes lying; and 'the disciples went away again unto their own homes' (John xx. 2-11). But she 'who was last at the cross and first at the tomb' '*stood* at the sepulchre weeping,' and saw two angels, who said to her, 'Woman, why weepest thou? She saith, because they have taken away my Lord, and I know not where they have laid him.' Her patient waiting was rewarded, for she had scarcely ceased speaking when Jesus himself asked her the same question, and as soon as he said 'Mary,' she turned herself, and then, seeing who it was, said unto him, 'Rabboni,' and at once acknowledged his risen person; when he not only assured her of his resurrection, but also announced his intended ascension (John xx. 17). Mary Magdalene then returned and told these things to the Apostles (Luke xxiv. 10, 11), 'and her words seemed to them as idle tales,' 'and they, when *they* had heard that He was alive, and had been seen of her, believed her not' (Mark xvi. 10). On every occasion Christ selected the most fit and proper persons, and on *this*, his *first* appearance from the dead, he chose Mary Magdalene to be the only witness of his resurrection; and to other women had been also vouchsafed the vision of angels (Luke xxiv. 10). These persons, with the acute perception of their sex, receiving distinct evidence without captious disbelief, at once saw, believed, and 'worshipped' their risen Lord (Matt. xxviii. 9): whilst the *men* who had been his daily companions during the whole time of his public ministry, and had heard 'the gracious words which fell from his lips,' entirely refused the testimony of eye-witnesses, to whom, 'by infallible proofs, He had shown himself alive,' and remained unconvinced until 'Jesus stood in the midst of them,' and 'showed them his hands and his feet' (Luke xxiv. 36, 40); and even then 'they believed not for joy.'

But the faith of Mary Magdalene is 'in everlasting remembrance,' inasmuch as, when others were 'fools and slow of heart to believe,' she, with less evidence than they possessed, at once acknowledged that 'Christ is risen from the dead, and is become the first-fruits of them that slept,' and to her was granted the honour of being the *first* witness of that great event, the Resurrection, without which Christ would have died in vain (1 Cor. xv.).—S. P.

3. MARY, wife of Cleophas or Alphæus, and sister of the Lord's mother (Matt. xxvii. 56; Mark xv. 40; John xix. 25). This Mary was one of those holy women who followed Christ, and was present at the crucifixion; and she is that 'other Mary' who, with Mary Magdalene, attended the body of Christ to the sepulchre when taken down from the cross (Matt. xxvii. 61; Mark xv. 47; Luke xxiii. 55). She was also among those who went on the morning of the first day of the week to the sepulchre to anoint the body, and who became the first witnesses of the resurrection (Matt. xxviii. 1; Mark xvi. 1; Luke xxiv. 1). James, Joses, Jude, and Simon, who are called the Lord's brethren [see the names; also ALPHÆUS; BROTHER], are very generally supposed to have been the sons of this Mary, and therefore *cousins* of Jesus, the term brother having been used with great latitude among the Hebrews. This is the usual alternative of those who deny that these persons were sons of our Lord's mother by her husband Joseph; although some imagine that they may have been sons of Joseph by a former wife. The fact seems to be this: Christ had four 'brethren' called James, Joses, Simon, and Jude; he had also three apostles called James, Simon, and Jude, who were his cousins, being sons of Alphæus and this Mary: and it is certainly very difficult to resist the conclusion that the three cousins and apostles are to be regarded as the same with those three of the four 'brethren' who bore the same names.

4. MARY, sister of Lazarus and Martha. The friendship of our Lord for this family has been explained in other articles [LAZARUS; MARTHA]. The points of interest in connection with Mary individually arise from the contrast of character between her and her sister Martha, and from the incidents by which that contrast was evinced. As these points of contrast have already been produced under MARTHA, it is not necessary to go over the same ground in the present article. Apart from this view, the most signal incident in the history of Mary is her conduct at the supper which was given to Jesus in Bethany, when he came thither after having raised Lazarus from the dead. The intense love which distinguished

her character then glowed with the highest fervour, manifesting the depth of her emotion and gratitude for the deliverance from the cold terrors of the grave of that brother who now sat alive and cheerful with the guests at table. She took the station she best loved, at the feet of Jesus. Among the ancients it was usual to wash the feet of guests before an entertainment, and with this the anointing of the feet was frequently connected [ANOINTING]. Mary possessed a large quantity of very costly ointment; and in order to testify her gratitude she sacrificed it all by anointing with it the feet of Jesus. We are told that the disciples murmured at the extravagance of this act, deeming that it would have been much wiser, if she had sold the ointment and given the money to the poor. But Jesus, looking beyond the mere external act to the disposition which gave birth to it—a disposition which marked the intensity of her gratitude—vindicated her deed. Always meditating upon his departure, and more especially at that moment, when it was so near at hand, he attributed to this act a still higher sense —as having reference to his approaching death. The dead were embalmed: and so, he said, have I received, by anticipation, the consecration of death (John xii. 1-8; Matt. xxvi. 6-13; Mark xiv. 3-9).

MASCHIL, a title of some of the Psalms [PSALMS].

MASSA, an encampment of the Israelites [WANDERING].

MATTHEW (*Ματθαῖος*). 1. THE PERSON OF MATTHEW.—According to Mark ii. 14, Matthew was a son of Alphæus. It is generally supposed that Jacobus, or James, the son of Alphæus, was a son of Mary, the wife of Cleophas, who was a sister of the mother of Jesus (John xix. 25). If this opinion is correct, Matthew was one of the relatives of Jesus. Matthew was a *portitor*, or inferior collector of customs at Capernaum, on the Sea of Galilee. He was not a *publicanus*, or general farmer of customs. We may suppose either that he held his appointment at the port of Capernaum, or that he collected the customs on the high road to Damascus, which went through what is now called Khan Minyeh, which place, as Robinson has shown, is the ancient Capernaum (*Bibl. Res. in Palestine*, vol. iii. pp. 288-295). Thus we see that Matthew belonged to the lower class of people.

In Mark ii. 14, and Luke v. 27, he is called Levi. We hence conclude that he had two names. This circumstance is not mentioned in the list of the apostles (Matt. x. and Luke vi.); but the omission does not prove the contrary, as we may infer from the fact that Lebbæus is also called Judas in Luke vi. 16, in which verse the name Lebbæus is omitted. In Matt. ix. 9 is related how Matthew was called to be an apostle. We must, however, suppose that he was previously acquainted with Jesus, since we read in Luke vi. 13, that when Jesus, before delivering the Sermon on the Mount, selected twelve disciples, who were to form the circle of his more intimate associates, Matthew was one of them. After this Matthew returned to his usual occupation; from which Jesus, on leaving Capernaum, called him away. On this occasion Matthew gave a parting entertainment to his friends. After this event he is mentioned only in Acts i. 13.

According to a statement in Clemens Alexandrinus (*Pædagog.* ii. 1), Matthew abstained from animal food. Hence some writers have rather hastily concluded that he belonged to the sect of the Essenes. It is true that the Essenes practised abstinence in a high degree; but it is not true that they rejected animal food altogether. Admitting the account in Clemens Alexandrinus to be correct, it proves only a certain ascetic strictness, of which there occur vestiges in the habits of other Jews (comp. Joseph. *Vita*, cap. ii. & iii.). Some interpreters find also in Rom. xiv. an allusion to Jews of ascetic principles.

According to another account, which is as old as the first century, and which occurs in the *Κήρυγμα Πέτρου* in Clemens Alex. (*Strom.* vi. 15), Matthew, after the death of Jesus, remained about fifteen years in Jerusalem. This agrees with the statement in Eusebius (*Hist. Eccles.* iii. 24), that Matthew preached to his own nation before he went to foreign countries. Rufinus (*Hist. Eccles.* x. 9) and Socrates (*Hist. Eccles.* i. 19) state that he afterwards went into Ethiopia; and other authors mention other countries. There also he probably preached specially to the Jews. According to Heracleon (about A.D. 150) and Clemens Alex. (*Strom.* iv. 9), Matthew was one of those apostles who did not suffer martyrdom.

2. THE GOSPEL OF ST. MATTHEW.—The genuineness of this Gospel has been more strongly attacked than that of any of the three others, as well by EXTERNAL as by INTERNAL arguments.

We will first consider the EXTERNAL arguments. The most ancient testimony concerning Matthew's Gospel is that of Papias, who, according to Eusebius (*Hist. Eccles.* iii. 39), wrote as follows: *Ματθαῖος μὲν οὖν Ἑβραΐδι διαλέκτῳ τὰ λόγια συνεγράψατο. Ἡρμήνευσε δ' αὐτὰ ὡς ἐδύνατο ἕκαστος* (var. lect. *ὡς ἦν δύνατος ἕκαστος*).—'Matthew wrote the sayings in the Hebrew tongue, but every body interpreted them according to his ability.' Doubts of three different kinds have been raised whether this testimony could refer to our Greek Gospel of St. Matthew.

1st. Papias, the most ancient witness, who was a disciple of John, speaks only about the *λόγια* of Christ, which were apparently a collection of the remarkable sayings of our Lord.

2dly. He speaks about a work written in the Hebrew, which here means probably the Aramæan or Chaldee tongue.

3dly. His statement seems to imply that there was no translation of this work.

These doubts were particularly brought forward by Schleiermacher in the *Studien und Kritiken*, 1832, Heft 4. The opinion of Schleiermacher was adopted by Schneckenburger, Lachmann, and many others. According to these critics, the apostle wrote only a collection of the remarkable sayings of Jesus; which collection was put into an historical form by a Greek translator. Papias is said to intend by *ἡρμήνευσε*, the explanation of the sayings of Christ by means of the addition of the historical facts. Most critics, however, have either never adopted, or have subsequently rejected, the above interpretation of the words *λόγια* and *ἡρμήνευσε*. It was first objected by Dr. Lücke, that Papias, in his report, followed the statements of Johannes Presbyter, who said that Peter furnished a *συντάξις τῶν κυριακῶν λογίων*, 'a collection of the sayings of our Lord,' and that

Mark stated what he had heard from Peter, and that Papias nevertheless adds that Mark wrote τὰ ὑπὸ τοῦ Χριστοῦ ἢ λέχθεντα ἢ πράχθεντα, 'as well the sayings as the doings of Christ.' Hence it follows, according to Dr. Lücke, that λόγια is a term a *parte potiori*, which comprehends the history also. In addition to this, Dr. Lücke observes, that Papias himself wrote a work under the title of 'Λογίων κυριακῶν ἐξήγησις,' and that the extracts from this work which Eusebius has furnished prove that its contents were partly historical. According to this view, the testimony of Papias may be considered as referring to our Gospel of St. Matthew; but the force of the two other objections remains still unimpared.

It has been observed by those who deny the genuineness of this Gospel, that in none of the Fathers before Jerome do we find any statement from which we could infer that they had seen the Hebrew Gospel of St. Matthew; and that consequently we may consider as a mere conjecture the opinion of the Fathers, that our Gospel is a Greek translation of a Hebrew original.

Jerome, in his *Catalogus de viris illustribus* (cap. iii.), reports that the Hebrew gospel of St. Matthew was preserved in the library at Cæsarea, and that he took a copy of it. In his commentary on Matt. xii. 13, he says that he translated this Hebrew Gospel into Greek. In the same passage, and in his book *Contra Pelagianos* (iii. 2), Jerome states that this Hebrew copy was considered 'by most people' (a plerisque) to be the original text of St. Matthew. The cautions expression 'a plerisque' is considered by many critics as an indication that Jerome's statement cannot be depended upon. Indeed it appears that the Hebrew copy of St. Matthew was not the mere original of our Gospel, for what motive, in that case, could Jerome have had to translate it into Greek?

The whole difficulty is cleared up if, like most modern critics, we suppose that the *Evangelium secundum Hebræos*, about which Jerome speaks, was the Gospel of St. Matthew corrupted by apocryphal additions. This conjecture is confirmed by the fragments of it which have been preserved.

Hence many critics are led to suppose that the strictly Judaizing Christians made a translation of St. Matthew, which they endeavoured to bring into harmony with their own opinions and legends. As a proof that this *Evangelium secundum Hebræos* was not an original work, but merely a translation, it has been urged that the name Βαραββᾶς was not rendered בר אבא, but בר רבהון, *filius magistri eorum*.

Nevertheless Jerome's statement respecting the *Evangelium secundum Hebræos* may be taken as a confirmation of the account of Papias, that Matthew wrote his Gospel in Hebrew. If this be the fact, the question must arise whether our Greek Matthew is a correct translation of the Hebrew. The words of Papias seem to imply that in his days there was no Greek translation in existence. This has induced many critics to question his account, and to suppose that the original text was Greek. Such is the opinion of Erasmus, Œcolampadius, Calvin, Beza, Lardner, Guerike, Harless, and others.

The authority of Papias has been deemed to be overthrown by the character given of him by Eusebius, according to whose statement he was σφόδρα σμικρὸς τὸν νοῦν, 'of a very little mind.' Guerike considers also as rather incredible the addition, that everybody interpreted that gospel according to his ability, ἡρμήνευσε δ'αὐτὰ ὡς ἦν δυνατὸς ἕκαστος.

Papias, indeed, proves himself very credulous, by reporting, according to Eusebius, πολλὰ μυθικώτερα, 'many rather fabulous things;' but this does not authorize us to reject his testimony in a mere matter of fact, for the perception of which no extraordinary abilities were required, especially as his account of this fact agrees with the statements of Jerome.

It is by no means improbable, that after several inaccurate and imperfect translations of the Aramæan original came into circulation, Matthew himself was prompted by this circumstance to publish a Greek translation, or to have his Gospel translated under his own supervision. It is very likely that this Greek translation did not soon come into general circulation, so that Papias may have remained ignorant of its existence. It may also be, and nothing prevents us from supposing, that Papias, being acquainted with our Greek Gospel, spoke, in the passage referred to, of those events only which came to pass soon after the publication of the Aramæan original. We, at least, rather prefer to confess ourselves unable to solve the objection, than to question the direct testimony of Papias; especially since that testimony is supported by other ancient authorities:

1st. By Origen (Euseb. *Hist. Eccles.* vi. 25). 2dly. By the Alexandrian Catechist Pantænus, who, according to Eusebius (*Hist. Eccles.* v. 10), having, in the latter half of the second century, gone on a missionary expedition to India, found there some Christians who possessed the Gospel of St. Matthew in Hebrew. 3dly. By Irenæus (*Adv. Hær.* iii. 1) and Eusebius (*Hist. Eccles.* v. 8).

To this it has been objected, that Origen and Irenæus probably only repeated the statement of Papias; but it is unlikely that a man of so much learning as Origen should have had no other authority for his account; and the statement of Pantænus, at least, is quite independent of that of Papias. It ought also to be considered that Matthew was not so much known in ecclesiastical antiquity, that any partizanship could have prompted writers to forge books in his name.

On summing up what we have stated, it appears that the external testimonies clearly prove the genuineness of the Gospel of St. Matthew. The authenticity indeed of this Gospel is as well supported as that of any work of classical antiquity. It can also be proved that it was early in use among Christians, and that the apostolical Fathers, at the end of the first century, ascribed to it a canonical authority (see Polycarp, *Epist.* c. ii. 7; Ignatius, *Ad Smyrn.* c. vi.; *Ad Rom.* c. vi.; Clemens Romanus, *Epist.* i. c. xlvi.; Barnabas, *Epist.* c. iv.

But the EXTERNAL arguments against the authenticity of this Gospel are less important than the doubts which have been started from a consideration of its INTERNAL qualities.

1st. The representations of Matthew (it is said) have not that vivid clearness which characterizes the narration of an eye-witness, and which we find, for instance, in the Gospel of John. Even Mark and Luke surpass Matthew in this respect.

Compare, for example, Matt. iv. 18 with Luke v. 1, sq.; Matt. viii. 5 sq. with Luke vii. 1, sq. This is most striking in the history of his own call, where we should expect a clearer representation.

2nd. He omits some facts which every apostle certainly knew. For instance, he mentions only one journey of Christ to the passover at Jerusalem, namely, the last; and seems to be acquainted only with one sphere of Christ's activity, namely, Galilee. He even relates the instances of Christ's appearing after his resurrection in such a manner, that it might be understood as if he showed himself only to the women in Jerusalem, and to his disciples nowhere but in Galilee (Matt. xxvi. 32 and xxviii. 7).

3rd. He relates unchronologically, and transposes events to times in which they did not happen; for instance, the event mentioned in Luke iv. 14-30 must have happened at the commencement of Christ's public career, but Matthew relates it as late as ch. xiii. 53, sq.

4th. He embodies in one discourse several sayings of Christ which, according to Luke, were pronounced at different times (comp. Matt. v.-vii., and xxiii.).

5th. He falls, it is asserted, into positive errors. In ch. i. and ii. he seems not to know that the real dwelling-place of the parents of Jesus was at Nazareth, and that their abode at Bethlehem was only temporary (comp. Matt. ii. 1, 22, 23, with Luke ii. 4, 39). According to Mark xi. 20, 21, the fig-tree withered on the day after it was cursed, but according to Matt. xxi. 19, it withered immediately. According to Matt. xxi. 12, Christ purified the Temple immediately after his entrance into Jerusalem; but according to Mark he on that day went out to Bethany, and purified the Temple on the day following (Mark xi. 11-15). Matthew says (xxi. 7) that Christ rode on a she-ass and on a colt, which is impossible. The other Gospels speak only of a she-ass.

These circumstances have led Strauss and others to consider the Gospel of St. Matthew as an unapostolical composition, originating perhaps at the conclusion of the first century; while some consider it a reproduction of the Aramæan Matthew, augmented by some additions; others call it an historical commentary of a later period, made to illustrate the collection of the sayings of Christ which Matthew had furnished (comp. Sieffert, *Ueber die Aechtheit und den Ursprung des ersten Evangelii*, 1832; Schneckenburger, *Ueber den Ursprung des ersten Evangelii*, 1834; Schott, *Ueber die Authenticität des Ev. Matth.* 1837.

To these objections we may reply as follows:—

1st. The gift of narrating luminously is a personal qualification of which even an apostle might be destitute, and which is rarely found among the lower orders of people: this argument therefore has recently been given up altogether. In the history of his call to be an apostle, Matthew has this advantage over Mark and Luke, that he relates the discourse of Christ (ix. 13) with greater completeness than these evangelists. Luke relates that Matthew prepared a great banquet in his house, while Matthew simply mentions that an entertainment took place, because the apostle could not well write that he himself prepared a great banquet.

2nd. An *argumentum a silentio* must not be urged against the evangelists. The raising of Lazarus is narrated only by John; and the raising of the youth at Nain only by Luke; the appearance of five hundred brethren after the resurrection, which, according to the testimony of Paul (1 Cor. xv. 6), was a fact generally known, is not recorded by any of the evangelists. The apparent restriction of Christ's sphere of activity to Galilee, we find also in Mark and Luke. This peculiarity arose perhaps from the circumstance that the apostles first taught in Jerusalem, where it was unnecessary to relate what had happened there, but where the events which had taken place in Galilee were unknown, and required to be narrated: thus the sphere of narration may have gradually become fixed. At least it is generally granted that hitherto no satisfactory explanation of this fact has been discovered. The expressions in Matt. xxvi. 32, and xxviii. 7, perhaps only indicate that the Lord appeared more frequently, and for a longer period, in Galilee than elsewhere. In Matt. xxviii. 16, we are told that the disciples in Galilee went up to a mountain, whither Christ had appointed them to come; and since it is not previously mentioned that any such appointment had been made, the narrative of Matthew himself here leads us to conclude that Christ appeared to his disciples in Jerusalem after his resurrection.

3rd. There is no reason to suppose that the evangelists intended to write a chronological biography. On the contrary, we learn from Luke i. 4, and John xx. 31, that their object was of a more practical and apologetical tendency. With the exception of John, the evangelists have grouped their communications more according to the subjects than according to chronological succession. This fact is now generally admitted. The principal groups of facts recorded by St. Matthew are:—1. The preparation of Jesus, narrated in ch. i.—iv. 16. 2. The public ministry of Jesus, narrated in ch. iv. 17—xvi. 20. 3. The conclusion of the life of Jesus, narrated in ch. xvi. 21—xxviii.

The second of these groups is subdivided into minor groups. If we consider that Matthew, for the benefit of the Jews, describes Christ as being the promised Messiah of the old covenant, it must appear perfectly appropriate in him to narrate the Sermon on the Mount before the calling of his disciples. The Sermon on the Mount shows the relation in which the Redeemer stood to the old covenant. In ch. viii. and ix. are given examples of the power which Jesus possessed of performing miracles; after which, in ch. ix. 36, is stated the need of 'labourers' to instruct the people. Then naturally follows, in ch. x., the admonition delivered to the apostles before they are sent out on their mission. In ch. xii. is recorded how Jesus entered into conflict with the dominant party, &c. (comp. Kern's *Abhandlung über den Ursprung des Evangelii Matthæi*, p. 51, sq.; Köster, *Ueber die Composition des Ev. Matth.* in Pelt's *Mitarbeiten*, Heft i.; Kuhn, *Leben Jesu*, t. i., *Beilage*.

But our adversaries further assert, that the evangelist not only groups together events belonging to different times, but that some of his dates are incorrect: for instance, the date in Matt. xiii. 53 cannot be correct if Luke, ch. iv., has placed the event rightly. If, however, we carefully

consider the matter, we shall find that Matthew has placed this fact more chronologically than Luke. It is true that the question in Matt. xiii. 54, and the annunciation in Luke iv. 18-21, seem to synchronize best with the first public appearance of Jesus. But even Schleiermacher, who, in his work on Luke, generally gives the preference to the arrangement of that evangelist, nevertheless observes (p. 63) that Luke iv. 23 leads us to suppose that Jesus abode for a longer period in Capernaum (comp. the words κατὰ τὸ εἰωθὸς αὐτῷ in ver. 16).

4th. If the Evangelist arranges his statements according to subjects, and not chronologically, we must not be surprised that he connects similar sayings of Christ, inserting them in the longer discourses after analogous topics had been mentioned. These discourses are not compiled by the Evangelist, but always form the fundamental framework to which sometimes analogous subjects are attached. But even this is not the case in the Sermon on the Mount; and in ch. xiii. it may be doubted whether the parables were spoken at different times. In the discourses recorded in ch. x. and xxiii., it can be proved that several sayings are more correctly placed by Matthew than by Luke (comp. especially Matt. xxiii, 37-39 with Luke xiii. 34, 35).

5th. It depends entirely upon the mode of interpretation, whether such positive errors as are alleged to exist are really chargeable on the evangelist. The difference, for instance, between the narrative of the birth of Christ, as severally recorded by Matthew and Luke, may easily be solved without questioning the correctness of either, if we suppose that each of them narrates what he knows from his individual sources of information. The history of Christ's childhood given in Luke, leads us to conclude that it was derived from the acquaintances of Mary, while the statements in Matthew seem to be derived from the friends of Joseph. As to the transaction recorded in Matt. xxi. 18-22, and Mark xi. 11, 15, 20, 21, it appears that Mark describes what occurred most accurately; and we must grant that we should scarcely have expected from an eye-witness the inaccuracy which is observable in Matthew. But we find that there are characters of such individuality that, being bent exclusively upon their main object, they seem to have no perception for dates and localities.

If these arguments should still appear unsatisfactory, they may be supported by adding the positive internal proofs which exist in favour of the apostolical origin of this Gospel. 1. The nature of the book agrees entirely with the statements of the Fathers of the church, from whom we learn that it was written for Jewish readers. None of the other Evangelists quotes the Old Testament so often as Matthew, who, moreover, does not explain the Jewish rites and expressions, which are explained by Mark and John. 2. If there is want of precision in the narration of facts, there is, on the other hand, a peculiar accuracy and richness in the reports given of the discourses of Jesus; so that we may easily conceive why Papias, *a parte potiori*, styled the Gospel of Matthew Λόγια τοῦ κυρίου, *the sayings of the Lord*. Some of the most beautiful and most important sayings of our Lord, the historical credibility of which no sceptic can attack, have been preserved by Matthew alone (Matt. xi. 28-30; xvi. 16-19; xxviii. 20; comp. also xi. 2-21; xii. 3-6, 25-29; xvii. 12, 25, 26; xxvi. 13). Above all, the Sermon on the Mount must here be considered. Even negative criticism grants that Luke's account is defective as compared with Matthew's; and that Luke gives as isolated sentences what in Matthew appears in beautiful connection. In short, the Sermon on the Mount, according to Matthew, forms the most beautiful and the best arranged whole of all the evangelical discourses. It may also be proved that in many particulars the reports of several discourses in Matthew are more exact than in the other evangelists; as may be seen by comparing Matt. xxiii. with the various parallel passages in Luke. Under these circumstances it is surprising that the genuineness of this gospel has not yet met with more distinguished advocates. The most important work in defence of the genuineness of Matthew is that of Kern, *Ueber den Ursprung des Evangelii Matthæi*, Tübingen, 1834. Next in value are Olshausen's *Drei Programme*, 1835, and the two *Lucubrationes* of Harless, 1840 and 1843. Even De Wette, in the fourth edition of his *Introduction*, p. 170, has ascribed only a qualified value to the doubts on this head.

With regard to the DATE of this gospel, Clemens Alexandrinus and Origen state that it was written before the others. Irenæus (*Adv. Hær.* iii. 1) agrees with them, but places its origin rather late—namely, at the time when Peter and Paul were at Rome. Even De Wette grants (*Einleitung*, § 97) that it was written before the destruction of Jerusalem. In proof of this we may also quote ch. xxvii. 8.

Among all the German commentaries on the first three Gospels, the best spirit pervades that of Olshausen, 3rd edit. 1837. The commentary on St. Matthew by De Wette, 2nd edit. 1838, is pervaded by the scepticism of Strauss.—A. T.

MATTHIAS (Ματθίας, equivalent to Ματθαῖος, *Matthæus*), one of the seventy disciples who was chosen by lot, in preference to Joseph Barsabas, into the number of the apostles, to supply the deficiency caused by the treachery and suicide of Judas (Acts i. 23-26). Nothing is known of his subsequent career.

MAZZAROTH (Job xxxviii. 32). [ASTRONOMY.]

MEASURES. [WEIGHTS AND MEASURES.]

MEDAD and ELDAD, two of the seventy elders who were nominated to assist Moses in the government of the people, but who remained in the camp, probably as modestly deeming themselves unfit for the office, when the others presented themselves at the Tabernacle. The Divine spirit, however, rested on *them* even there, "and they prophesied in the camp" (Num. xi. 24-29). The Targum of Jonathan alleges that these two men were brothers of Moses and Aaron by the mother's side.

MEDAN or MADAN (מָדָן; Μαδάν), son of Abraham, by Keturah (Gen. xxv. 2). He and his brother Midian are supposed to have peopled the country of Midian, east of the Dead Sea.

MEDEBA (מֵידְבָא; Sept. Μαδαβά), a town east of the Jordan, in the tribe of Reuben (Josh. xiii. 9, 16), before which was fought the great

battle in which Joab defeated the Ammonites and their allies (1 Chron. xix. 7). It originally belonged to the Moabites (Num. xxi. 30); and after the captivity of the tribes beyond the Jordan, they again took possession of it (Isa. xv. 2). The *Onomasticon* places it near Heshbon; and it was once the seat of one of the thirty-five bishoprics of Arabia (Reland, *Palæstina*, pp. 217, 223, 226). Medeba, now in ruins, still retains its ancient name, and is situated upon a round hill seven miles south of Heshbon. The ruins are about a mile and a half in circuit, but not a single edifice remains perfect (Seetzen, in Zach's *Monat. Corresp.*, xviii. 431; Burckhardt, *Syria*, p. 625; Legh, p. 245).

MEDES, the inhabitants in ancient times of one of the most fruitful and populous countries of Asia, called Media, the precise boundaries of which it is not easy, if indeed it is now possible, to ascertain. Winer, in his *Realwörterb.*, defines it as the country which lies westward and southward from the Caspian Sea, between 35° and 40° of N. lat. Nature has divided Media into three great divisions. On the north is a flat, moist, and insalubrious district, stretching along the Caspian Sea, which is made a separate portion by a chain of hills connected with Anti-Taurus. In this plain and on these mountains there live uncultivated and independent tribes. The country is now known under the names of Masanderan and Gilan (see Knight's *Illuminated Atlas*, last Map). South of this mountain range lies the country which the ancients denominated Atropatene (Ἀτροπατηνή), being separated on the west from Armenia by Mount Caspius, which springs from Ararat; and on the south and south-east by the Orontes range of hills, which runs through Media. South and south-east of the Orontes is a third district, formerly termed Great Media, which Mount Zagros separates from Assyria on the west, and from Persia on the south: on the east it is bordered by deserts, and connected on the north-east with Parthia and Hyrcania by means of Mount Caspius, being now called Irak-Ajemi. This for the most part is a high hilly country, yet not without rich and fruitful valleys, and even plains. The sky is clear and bright, and the climate healthy (Winer, *ut supra;* Ker Porter, i. 216). Media Atropatene, which corresponds pretty nearly with the modern Azerbijan, contains fruitful and well-peopled valleys and plains. The northern mountainous region is cold and unfruitful. In Great Media lay the metropolis of the country, Ecbatana (Plin. *Hist. Nat.* vi. 17), as well as the province of Rhagiana and the city Rhagæ, with the plain of Nisæum, celebrated in the time of the Persian empire for its horses and horse-races (Herod., iii. 106; Arrian, vii. 13; Heeren, *Ideen*, i. 1. 305). This plain was near the city Nisæa, around which were fine pasture lands producing excellent clover (*Herba Medica*). The horses were entirely white, and of extraordinary height and beauty, as well as speed. They constituted a part of the luxury of the great, and a tribute in kind was paid from them to the monarch, who, like all Eastern sovereigns, used to delight in equestrian display. Some idea of the opulence of the country may be had when it is known that, independently of imposts rendered in money, Media paid a yearly tribute of not less than 3000 horses, 4000 mules, and nearly 100,000 sheep. The races, once celebrated through the world, appear to exist no more; but Ker Porter saw the Shah ride on festival occasions a splendid horse of pure white. Cattle abounded, as did the richest fruits, as pines, citrons, oranges, all of peculiar excellence, growing as in their native land. Here also was found the Silphium (probably assafœtida), which formed a considerable article in the commerce of the ancients, and was accounted worth its weight in gold. The Median dress was proverbially splendid; the dress, that is, of the highest class, which seems to have gained a sort of classical authority, and to have been at a later period worn at the Persian court, probably in part from its antiquity. This dress the Persian monarchs used to present to those whom they wished to honour, and no others were permitted to wear it. It consisted of a long white loose robe, or gown, flowing down to the feet, and enclosing the entire body, specimens of which, as now used in those countries, may be seen in plates given in Perkin's *Residence in Persia*, New York, 1843. The nature and the celebrity of this dress combine with the natural richness of the country to assure us that the ancient Medians had made no mean progress in the arts; indeed, the colours of the Persian textures are known to have been accounted second only to those of India. If these regal dresses were of silk, then was there an early commerce between Media and India; if not, weaving, as well as dyeing, must have been practised and carried to a high degree of perfection in the former country (Ammian. Marcell. xxiv. 6, p. 353, ed. Bip.; Xenoph. *Cyrop.* i. 3. 2; Athen. xii. pp. 512, 514, sq.; Heeren, *Ideen*, i. 205, 307; Herod. vi. 112; Strabo, xi. p. 525; Dan. iii. 21).

The religion of the Medes consisted in the worship of the heavenly bodies, more particularly the sun and moon, and the planets Jupiter, Venus, Saturn, Mercury, and Mars (Strabo, xv. p. 732; Rhode, *Heil. Sage de Baktr. Meder und Perser*, p. 820; *Abbildungen aus der Mythol. der Alten Welt; Pers. Med.*, tafel 10, 11; where also may be seen the famous Median dress, comprising the mitre, as well as the flowing robe). The priestly caste were denominated magi; they were a separate tribe, and had the charge not only of religion, but of all the higher culture.

The language of the ancient Medes was not connected with the Shemitic, but the Indian; and divided itself into two chief branches, the Zend, spoken in North Media, and the Pehlvi, spoken in Lower Media and Parthia; which last was the dominant tongue among the Parthians (Adelung, *Mithridates*, i. 256, sq.; Eichhorn, *Gesch. der Lit.*, v. 1, 294, sq.).

The Medes originally consisted of six tribes, of which the Magi (Μάγοι) were one (Herod., i. 101). Being overcome by Ninus, they formed a part of the great Assyrian empire, which, however, lost in course of time the primitive simplicity of manners to which its dominion was owing, and fell into luxury and consequent weakness; when Arbaces, who governed the country as a satrap for Sardanapalus, taking advantage of the effeminacy of that monarch, threw off his yoke, destroyed his capital, Nineveh, and became himself sovereign of the Medes, in the ninth century before the Christian era (Diod. Sic., ii. 1, 2, 24, 32). According to Diodorus, this empire ex-

tended through nine monarchs, enduring 310 years, until Astyages, son of Cyaxares, was dethroned by Cyrus in the year of the world 3495, when Media became a part of the Persian empire, sinking from the same inevitable causes as those which enabled it to gain over the Assyrian power the dominion of Asia. The account given by Herodotus varies from that now set forth. We do not propose to subject the diversities to a critical investigation, believing that little, if any, good could result, at least within our narrow space. Dates, names, and dynasties may be more or less uncertain, but the facts we have given are unimpeached. The magnitude of the Median empire is another important fact equally well ascertained. Being in their time the most valorous, as well as the most powerful nation of Asia, the Medes extended their power towards the east and the west beyond any strictly definable limits, though, like dominion generally in Oriental countries, it was of a vague, variable, and unstable kind. That they regarded the Tigris as their western boundary appears from the fact that they erected on its banks strongholds, such as Mespila and Larissa (Xenoph., *Anab.* iii. 4. 10); but that they carried their victorious arms still farther westward, appears from both Herodotus (i. 134) and Isaiah (xiii. 17, 18). The eastern limits of the empire seem to have been different at different periods. Heeren inclines to the opinion that it may have reached as far as the Oxus, and even the Indus (*Ideen*, i. 142). Many, however, were the nations and tribes which were under the sway of its sovereigns. The government was a succession of satrapies, over all of which the Medes were paramount; but the different nations exerted a secondary dominion over each other, diminishing with the increase of distance from the centre of royal power (Herod., i. 134), to which ultimately the tribute paid by each dependent to his superior eventually and securely came. Not only were the Medes a powerful, but also a wealthy and cultivated people; indeed, before they sank, in consequence of their degeneracy, into the Persian empire, they were during their time the foremost people of Asia, owing their celebrity not only to their valour, but also to the position of their country, which was the great commercial highway of Asia. The sovereigns exerted absolute and unlimited dominion, exacted a rigid court-ceremonial, and displayed a great love of pomp (Heeren, *Ideen*, 143). Under the Persian monarchs Media formed a province, or satrapy, by itself, whose limits did not correspond with independent Media, but cannot be accurately defined. To Media belonged another country, namely, Aria, which, Heeren says, took its name from the river Arius (now Heri), but which appears to contain the elements of the name in the Zend language, which was common to the two, if not to other Eastern nations, who were denominated Indians by Alexander the Great, as dwellers in or near the Indus, which he also misnamed, but who were known in their own tongue as Arians (Arii, Aria, Ariana, also the name of Persia, Iran; see Ritter, *Erdkunde*, v. 458; Mann, 22; x. 45; Herod., vii. 62, who declares that the Medes were of old universally called Arii, Ἄριοι). Subsequently, however, from whatever cause, the Arians were separated from the Medes, forming a distinct satrapy in the Persian empire. Thus the name of a clan, or gens, became the name of a nation, and then of an individual tribe (Strabo, quoted by Heeren, *Ideen*, i. 190). It may be added that Schlosser (*Alten Welt*, i. 243) holds it as a fundamental fact, that the Medes and Persians formed in reality one kingdom, only that now one, now another, of the two elements gained predominance: whence he thinks himself enabled to explain the discrepancies which the ancients present as to the names and succession of monarchs. Supported by Tychsen (*Observ. Hist. Crit. de Zoroast.*, in the first part of the *Gottingen Comment. Societ. Reg.*), Schlosser supposes that, under the influence of the Magian religion, there was a setting up of the Median kingdom by Cyaxares, whence Zoroaster is referred to this period; and a renewal of the old Median rule, accompanied by reforms, under Darius Hystaspis, whence also other authorities place Zoroaster in the days of that monarch.

The Medes are not mentioned in sacred Scripture till the days of Hoshea, king of Israel, about 740 B.C., when Shalmaneser, king of Assyria, brought that monarch under his yoke, and in the ninth year of his reign took Samaria, and carried Israel away into Assyria, placing them in Halah and in Habor, by the river of Gozan, and in the cities of the Medes. Here the Medes appear as a part of the Assyrian empire; but at a later period Scripture exhibits them as an independent and sovereign people (Isa. xiii. 17; Jer. xxv. 25; li. 11, 28). In the last passage their kings are expressly named: 'The Lord hath raised up the kings of the Medes; for his device is against Babylon to destroy it.' 'Prepare against her (Babylon) the kings of the Medes, the captains thereof, and all the rulers thereof.' It has been conjectured that soon after the time of Arbaces they again fell under the dominion of the Assyrians; but availing themselves of the opportunity afforded by the distant expeditions which Sennacherib undertook, they gained their freedom, and founded a new line of kings under Dejoces (Winer, *Realwort.*). Indeed, so sudden and rapid are the changes of government, even to the present day, in Oriental monarchies, that we need not be surprised at any difficulties which may occur in arranging the dynasties or the succession of kings, scarcely in any ancient history, certainly least of all in the fragmentary notices preserved regarding the kings of Media and other neighbouring empires. According, however, to other historical testimony, we find the Medes and Persians united as one people in holy writ (Dan. v. 28; vi. 15; viii. 20; Esth. i. 3, 18; x. 2), in the days of Cyrus, who destroyed the separate sovereignty of the former. To the united kingdom Babylon was added as a province. After the lapse of about 200 years, Media, in junction with the entire Persian monarchy, fell under the yoke of Alexander the Great (B.C. 330); but after the death of Alexander it became, under Seleucus Nicator, the Macedonian governor of Media and Babylonia, a portion of the new Syrian kingdom (1 Macc. vi. 56), and, after many vicissitudes of warlike fortune, passed over to the Parthian monarchy (1 Macc. xiv. 2; Strabo, xvi. p. 745).

The ancient Medes were a warlike people, and much feared for their skill in archery (Herod., vii.

61; Strabo, xi. p. 525). They appear armed with the bow in the army of the Persians, who borrowed the use of that weapon from them (Herod., *ut supra*). Those who remained in the more mountainous districts did not lose their valour; but the inhabitants of the cities and towns which covered the plains, in becoming commercial lost their former hardy habits, together with their bravery, and, giving way to luxury, became in process of time an easy prey to new aspirants to martial fame and civil dominion.—J. R. B.

MEDIATOR. 1. Μεσίτης, 'mediator,' is a word peculiar to the Scriptures (see Beza, *Annot. in Gr. Test.*), and is used, in an accommodated sense, by many of the ancient Fathers, to denote one who intervenes between two dispensations. Hence it is applied to John the Baptist, because he came, as it were, between the Mosaic and Christian dispensations. Thus Greg. Nazianzenus (*Orat.* xxxix. p. 633) calls him ὁ παλαιᾶς καὶ νέας μεσίτης. Theophylact, commenting on Matt. iii., gives him the same denomination.

2. Again, it signifies, in its more proper sense, an internuncius, or ambassador, one who stands as the channel of communication between two contracting parties. Some commentators think that the Apostle Paul, in Gal. iii. 19, calls Moses *mediator*, because he conveyed the expression of God's will to the people, and reported to God their wants, wishes, and determinations. In reference to this passage of Scripture, Basil (*De Spiritu Sancto*, cap. xiv.) says, 'Mosen figuram representâsse quando inter Deum et populum intermedius extiterit.' Many ancient and modern divines, however, are of opinion that Christ himself, and not Moses, is here meant by the inspired Apostle, and this view would seem to be confirmed by comparing Deut. xxxiii. 2 with Acts vii. 38-52. Christ it was who, surrounded by angelic spirits, communicated with Moses on Mount Sinai. On this point, the words of the learned and pious Chrysostom, on Gal. iii. are very express: 'Here,' says he, 'Paul calls Christ Mediator, declaring thereby that He existed before the law, and that by Him the law was revealed.' This application of the passage will be the more evident if we consider the scope of the Apostle's argument, which evidently is, to point out the dignity of the law. How could he present a clearer demonstration of this than by showing that it was the second person of the ever-blessed Trinity who stood forth on the mount to communicate between God the Father and his creature man! Moreover, to contradistinguish Christ's mediation from that of Moses, the former is emphatically styled μεσίτης κρείττονος διαθήκης (Heb. viii. 6).

3. Christ is called Mediator by virtue of the reconciliation He has effected between a justly offended God and his rebellious creature man (see Grotius, *De Satisfactione Christi*, cap. viii.). In this sense of the term Moses was, on many occasions, an eminent type of Christ. The latter, however, was not *Mediator*, merely by reason of his coming between God and his creatures, as certain heretics would affirm (see Cyril Alex. *Dial. I. de Sancta Trinitate*, p. 410); but because he appeased his wrath, and made reconciliation for iniquity. 'Christ is the mediator,' observes Theophylact, commenting on Gal. iii., 'of two, *i. e.* of God and man. He exercises this office between both by making peace, and putting a stop to that spiritual war which man wages against God. To accomplish this He assumed our nature, joining in a marvellous manner the human, by reason of sin unfriendly, to the divine nature.' 'Hence,' he adds, 'he made reconciliation.' Oecumenius expresses similar sentiments on the same passage of Scripture. Again, Cyril, in his work before quoted, remarks: 'He is esteemed mediator because the divine and human nature being disjointed by sin, he has shown them united in his own person; and in this manner he reunites us to God the Father.'

If, in addition to the above general remarks, confirmed by many of the most ancient and orthodox fathers of the church, we consider the *three great offices* which holy Scripture assigns to Christ as Saviour of the world, viz., those of *prophet*, *priest*, and *king*, a further and more ample illustration will be afforded of his Mediatorship.

One of the first and most palpable predictions which we have of the prophetic character of Christ, is that of Moses (Deut. xviii. 15): 'The Lord thy God will raise up unto thee a prophet from the midst of thee, of thy brethren, like unto me; unto him ye shall hearken.' That this refers to Christ we are assured by the inspired apostle Peter (Acts iii. 22).

Again, in Isaiah lxi. 1, 3, Christ's consecration to the prophetic office, together with its sacred and gracious functions, is emphatically set forth: (see Luke iv. 16-21, where Christ applies this passage to himself). In order, then, to sustain this part of his mediatorial office, and thus work out the redemption of the world, we may see the necessity there was that Messiah should be both *God* and *man*. It belongs to a prophet to expound the law, declare the will of God, and foretell things to come: all this was done, and that in a singular and eminent manner, by Christ, our prophet (Matt. v. 21, &c.; John i. 8). All light comes from this prophet. The Apostle shows that all ministers are but stars which shine by a borrowed light (2 Cor. iii. 6, 7). All the prophets of the Old, and all the prophets and teachers of the New Testament, lighted their tapers at this torch! (Luke xxi. 15.) It was Christ who preached by Noah (1 Pet. iii. 19), taught the Israelites in the wilderness (Acts vii. 37), and still teaches by his ministers (Eph. iv. 11, 12). On this subject Bishop Butler (*Analogy*, part ii. ch. v.) says: 'He was, by way of eminence, *the prophet*, "the prophet that should come into the world" (John vi. 14) to declare the divine will. He published anew the law of nature, which men had corrupted, and the very knowledge of which, to some degree, was lost amongst them. He taught mankind, taught us authoritatively, to live soberly, righteously, and godly in this present world, in expectation of the future judgment of God. He confirmed the truth of this moral system of nature, and gave us additional evidence of it, the evidence of testimony. He distinctly revealed the manner in which God would be worshipped, the efficacy of repentance, and the rewards and punishments of a future life. Thus he was a prophet in a sense in which no other ever was.' Hence the force of the term ὁ λόγος, by which St. John designates Christ.

But, on the other hand, had the second person of the Trinity come to us in all the majesty of his divine nature, we could not have approached

him as our instructor. The Israelites, terrified at the exhibitions of Deity, cried out that the Lord might not so treat with them again; it was then that He, in gracious condescension to their feelings, promised to communicate with them in future through a prophet like unto Moses. The son of God, in assuming the form of an humble man, became accessible to *all*. Thus we perceive the connection of Christ's prophetic office—he being both God and man—with the salvation of man. On this subject Chrysostom (*Homil.* cxxxiv. tom. v. p. 860) remarks: 'A mediator, unless he has a union and communion with the parties for whom he mediates, possesses not the essential qualities of a mediator. When Christ, therefore, became mediator between God and man (1 Tim. ii. &c.), it was indispensable that he should be both God and man.'

Macarius also (*Homil.* vi. 97), on this question more pointedly observes: 'The Lord came and took his body from the virgin; for if he had appeared among us in his naked divinity, who could bear the sight? But he spoke as man to us men.'

Again, the Redeemer was not only to propound, explain, and enforce God's law, but it was needful that he should give a practical proof of obedience to it in his own person. Now, if he had not been *man*, he could not have been subject to the law; hence it is said, Gal. iv. 4, 'When the fulness of the time was come, God sent forth his son, made of a woman, made under the law;' and if he had not been God, he could not, by keeping the law, have *merited* forgiveness for us, for he had done but what was required of him. It was the fact of his being *very God and very man* which constituted the *merit* of Christ's obedience.

Moreover, in working out the mighty scheme of redemption the mediator must assume the office of *priest*.

To this office he was solemnly appointed by God (Ps. cx. 4; Heb. v. 10), qualified for it by his incarnation (Heb. x. 6, 7), and accomplished all the ends thereof by his sacrificial death (Heb. ix. 11, 12); as in sustaining his *prophetic* character, *so in this*, his Deity and humanity will be seen. According to the exhibition of type and declaration of prophecy, the mediator must die, and thus rescue us sinners from death by destroying him who had the power of death. 'But we see Jesus,' says the Apostle (Heb. ii. 9), 'who was made a little lower than the angels for the suffering of death, crowned with glory and honour, that he by the grace of God should taste death for every man. Forasmuch, then, as the children are partakers of flesh and blood, he also himself likewise took part of the same, that through death he might destroy him who had the power of death, that is, the Devil.' On the other hand, had he not been *God* he could not have raised himself from the dead. 'I lay down my life (saith he, John x. 17, 18), and take it up again.' He had not had a life to lay down if he had not been man, for the Godhead could not die; and if he had not been God, he could not have acquired *merit* by laying it down: it must be his own, and not in the power of another, else his voluntarily surrendering himself unto death—as he did on the charge that he, being only man, made himself equal with God—was an act of *suicide*, and consequently an act of blasphemy against God! It was, then, the mysterious union of both natures in the one person of Christ, which constituted the *essential glory* of his vicarious obedience and death.

Nor are the two natures of Christ more apparent in his *death* than they are in the *intercession* which he ever liveth to make in behalf of all who come unto God by him (Heb. vii. 25). The author of the epistle to the Hebrews teaches us (chaps. vii., ix.) how the high-priest, under the Levitical dispensation, typified Christ in his intercessory character: as the high-priest entered *alone* within the holiest place of the tabernacle once a-year with the blood of the sacrifice in his hands, and the names of the twelve tribes upon his heart, so Christ, having offered up himself as a lamb without spot unto God, has gone into glory bearing on his *heart* the names of his redeemed. We may, then, ask, with the Apostle (Rom. viii. 33), 'Who shall lay anything to the charge of God's elect? It is God that justifieth, who is he that condemneth? It is Christ that died, yea rather, that is risen again, who is even at the right hand of God, who also maketh *intercession* for us.' In this part of his mediatorial work God's *incommunicable* attributes of *omniscience*, *omnipresence*, and *omnipotence* are seen. He must therefore have been God, and on the ground of his being able, from personal experience, to sympathise with the suffering members of his mystical body, he must have been man; being perfect God and perfect man, he is, then, a perfect *intercessor*.

We come, lastly, to notice Christ's mediatorial character *as king*. The limits of this article will not admit of our even alluding to the varied and multiplied passages of Scripture which delineate Christ as 'Head over all things to the church' (see Ps. ii. 6; lxx.; Isaiah xxxii. 1; Dan. ix. 25; Col. i. 17, 18, &c.). Suffice it here to say that Christ could not, without the concurrence of his *divine* nature, gather and govern the church, protect and defend it against all assailants open and secret, and impart to it his Holy Spirit, to enlighten and renew the minds and hearts of men and subdue Satan—all these are acts of his kingly office.

Such, then, is the work of Christ's mediatorship—salvation revealed by him as prophet, procured by him as priest, and applied by him as king—the work of the whole person wherein both natures are engaged. Hence it is that some of the ancients speaking of it, designate it θεανδρικὴ ἐνεργεία 'a divine-human operation' (see Dionys. Areopag. *Epist. IV. ad Caium. Damascenus*, iii. 19). For a more ample view of this important subject see Flavel, *Panstratia of Shavior*, vol. iii. fol. Genev. vii. 1, in which the views of the Romish church are ably controverted. See also Brinsley (John), *Christ's Mediation*, 8vo. Lond. 1637.—

J. W. D.

MEGIDDO (מְגִדּוֹ; in Zech. xii. 11 מְגִדּוֹן; Sept. Μαγεδδώ, Μαγεδδών), a town belonging to Manasseh, although within the boundaries of Issachar (Josh. xvii. 11). It had been originally one of the royal cities of the Canaanites (Josh. xii. 21), and was one of those of which the Israelites were unable for a long time to gain actual possession. Megiddo was rebuilt and fortified by Solomon (1 Kings ix. 15), and further Ahaziah king of Judah died when wounded by Jehu, and

died there (2 Kings ix. 27). It was in the battle near this place that Josiah was slain by Pharaoh-Necho (2 Kings xxiii. 29, 30; 2 Chron. xxxv. 20-25). From the great mourning held for his loss, it became proverbial to compare any grievous mourning as being 'like the mourning of Hadad-rimmon in the valley of Megiddon' (Zech. xii. 11). 'The waters of Megiddo' (מי מגדו) are mentioned in Judges v. 19; and are probably those formed by the river Kishon. Eusebius and Jerome do not attempt to mark the situation of the place, and it appears that the name Megiddo was in their time already lost. They often mention a town called Legio, which must in their day have been an important and well-known place, as they assume it as a central point from which to mark the position of several other places in this quarter. This has been identified with the village now called Lejjun, which is situated upon the western border of the great plain of Esdraelon, where it begins to rise gently towards the low range of wooded hills that connect Carmel with the mountains of Samaria. This place was visited by Maundrell, who speaks of it as an old village near a brook, with a khan then in good repair (*Journey*, March 22). This khan was for the accommodation of the caravan on the route between Egypt and Damascus, which passes here. Having already identified the present village of Taannuk with the ancient Taanach, the vicinity of this to Lejjun induced Dr. Robinson to conceive that the latter might be the ancient Megiddo, seeing that Taanach and Megiddo are constantly named together in Scripture; and to this a writer in a German review adds the further consideration that the name of Legio was latterly applied to the plain, or low valley along the Kishon, as that of Megiddo had been in more ancient times. If this explanation be accepted, and it is certainly probable, though not certain, it only remains to conclude that the ancient Legio was not founded by the Romans, but that this was a new name imposed upon a still older place, which, like the names Neapolis (now Nabulus) and Sebaste (now Sebûstieh), has maintained itself in the mouths of the native population, while the earlier name has perished.

MELCHIZEDEK (מַלְכִּי צֶדֶק, *king of righteousness*; Sept. Μελχισέδεκ), 'priest of the most high God,' and king of Salem, who went forth to meet Abraham on his return from the pursuit of Chedorlaomer and his allies, who had carried Lot away captive. He brought refreshment, described in the general terms of 'bread and wine,' for the fatigued warriors, and bestowed his blessing upon their leader, who, in return, gave to the royal priest a tenth of all the spoil which had been acquired in his expedition (Gen. xiv. 18, 20).

This statement seems sufficiently plain, and to offer nothing very extraordinary; yet it has formed the basis of much speculation and controversy. In particular, the fact that Abraham gave a tithe to Melchizedek attracted much attention among the later Jews. In one of the Messianic Psalms (cx. 4), it is foretold that the Messiah should be 'a priest after the order of Melchizedek;' which the author of the Epistle to the Hebrews (vi. 20) cites as showing that Melchizedek was a type of Christ, and the Jews themselves, certainly, on the authority of this passage of the Psalms, regarded Melchizedek as a type of the regal-priesthood, higher than that of Aaron, to which the Messiah should belong. The bread and wine which were set forth on the table of shew-bread, was also supposed to be represented by the bread and wine which the king of Salem brought forth to Abraham (Schöttgen, *Hor. Heb.* ii. 645). A mysterious supremacy came also to be assigned to Melchizedek, by reason of his having received tithes from the Hebrew patriarch; and on this point the Epistle to the Hebrews (vii. 1-10) expatiates strongly, as showing the inferiority of the priesthood represented, to that of Melchizedek, to which the Messiah belonged. 'Consider how great this man was, unto whom even the patriarch Abraham gave a tenth of the spoils;' and he goes on to argue that the Aaronic priesthood, who themselves received tithes of the Jews, actually paid tithes to Melchizedek in the person of their great ancestor. This superiority is, as we take it, inherent in his typical rather than his personal character. But the Jews, in admitting this official or personal superiority of Melchizedek to Abraham, sought to account for it by alleging that the royal priest was no other than Shem, the most pious of Noah's sons, who, according to the shorter chronology, might have lived to the time of Abraham (Bochart, *Phaleg*, ii. 1). Christian writers have not failed to enter into the same unprofitable researches, and would make Melchizedek to have been either Shem, or Mizraim or Canaan, the sons of Ham, or Ham himself, or even Enoch (Deyling, *Observat. Sacr.* ii. 71, sqq.; Clayton, *Chronolog. of the Heb. Bible*, p. 100). The last-named conjectures seem to require no notice; but the one which holds Melchizedek to have been Shem, and which we find in the Jerusalem Targum, and also that of Jonathan, requires an explanation of how his name came to be changed, how he is found reigning in a country inhabited by the descendants of Ham, how he came forth to congratulate Abraham on the defeat of one of his own descendants, as was Chedorlaomer, and how he could be said to have been without recorded parentage (Heb. vii. 3), since the pedigree of Shem must have been notorious. In that case also the difference of the priesthoods of Melchizedek and Levi would not be so distinct as to bear the argument which the Epistle to the Hebrews founds upon it. Rejecting on such grounds this opinion, others, in their anxiety to vindicate the dignity of Abraham from marks of spiritual submission to any mortal man, have held that Melchizedek was no other than the Son of God himself. But in this case it would hardly have been said that he was made '*like* unto the Son of God' (Heb. vii. 3), or that Christ was constituted 'a priest' after the order of Melchizedek (Heb. vi. 20), or, in other words, was a type of himself. Some who do not go so far as this, take him to have been an angel; and this was one of the wild notions of Origen and several of his school. The best founded opinion seems to be that of Carpzov (*Apparat. Antiq. Sacr. Cod.* c. iv. p. 52) and most judicious moderns, who, after Josephus (*De Bell. Jud.* vi. 10), allege that he was a principal person among the Canaanites and posterity of Noah, and eminent for holiness and justice, and therefore discharged the priestly as well as regal functions among

the people: and we may conclude that his two-fold capacity of king and priest (characters very commonly united in the remote ages) afforded Abraham an opportunity of testifying his thankfulness to God in the manner usual in those times, by offering a tenth of all the spoil. This combination of characters happens for the first time in Scripture to be exhibited in his person, which, with the abrupt manner in which he is introduced, and the natute of the intercourse between him and Abraham, render him in various respects an appropriate and obvious type of the Messiah in his united regal and priestly character.

Salem, of which Melchizedek was king, is usually supposed to have been the original of Jeru*salem* (Joseph. *Antiq.* i. 10. 2; Jerome, *Quæst. in Genes.*). But in another place (*ad Evagrium*, iii. fol. 13) Jerome mentions a town near Scythopolis, which in his time bore the name of Salem, and where was shown the palace of Melchizedek, which from the extent of the ruins must have been very magnificent. This he takes to have been the Shalem of Gen. xxxiii. 18; and the Salim, near to which John was baptizing (John iii. 23). The fact stated by Jerome shows that the place was in his time regarded as the Salem of Melchizedek; but the rabbinical tradition involved in this intimation is too late to be of much value; and as Jerusalem is called Salem in Ps. lxxvi. 2, the site of the Salem in question must be determined by the intimations of the context, which are more in agreement with Jerusalem than with any site near Bethshan. Besides the cited authorities, see Heidegger, *Hist. Patriarch.* ii. n. 2; Borger, *Hist. Crit. Melchisedeci;* Fabrici, *Cod. Pseudepigr.* i. 311; Hottinger, *Enneas Dissertatt.* p. 159, sqq.; Ursini, *Analect. Sacr.* i. 349.

MELITA (Μελίτη), an island in the Mediterranean, on which the ship which was conveying St. Paul as a prisoner to Rome was wrecked, and which was the scene of the interesting circumstances recorded in Acts xxvii. 28.

398. [Malta.]

Melita was the ancient name of Malta, and also of a small island in the Adriatic, now called Meleda, and each of these has found warm advocates for its identification with the Melita of Scripture. The received and long-established opinion is undoubtedly in favour of Malta; and those who uphold the claims of Meleda are to be regarded as dissenting from the general conclusion. This dissent proceeds chiefly upon the ground that the ship of St. Paul was 'driven about in (the sea of) Adria,' when wrecked on Melita. The conclusions deducible from this strong position are vigorously stated by P. Abate D. Ignazio Giorgi, in his *Inspezione Anticritiche*, published at Venice in 1730, and which then attracted considerable attention. There is a curious account of the controversy to which this gave rise in Ciantar's edit. of Abela's *Malta Illustrata*, i. 609, sqq. The view thus advocated was in this country taken up by the learned Bryant, and more lately by Dr. Falconer, in his clever *Dissertation on St. Paul's Voyage*, 1817. These writers do not, however, seem to be aware of the very solid answers to this notion, and the arguments in support of the received conclusions, which were produced at the time. There was nothing to answer but this one objection; for if that could be obviated, the historical and other probabilities in favour of Malta remained in their former force, although they could have no countervailing weight if the limitation of the name Adria to the gulf of Venice could be established. The course taken was, therefore, to show from ancient writers that the name Adria was *not*, in its ancient acceptation, limited to the present Adriatic Sea, but comprehended the seas of Greece and Sicily, and extended even to Africa. This seems to have been established beyond dispute, and every one ac-

quainted with the mass of evidence brought to bear on this point, must regard the only strong argument in favour of Meleda as having been entirely overthrown. Those who have any curiosity or doubt in the matter may find this evidence copiously produced in Ciantar's edition of Abela's work, and also in Wetstein. Abela, after disposing of this part of his subject, very properly calls attention to the ample memorials of St. Paul's visit which exist in Malta, and the utter absence of any such in Meleda:—'Finalmente in Meleda non vi fu ma vestigio, o memoria di S. Paolo, non che Tempio ad onor di lui edificato; ma sibbene nella nostra isola vene sono molte memorie: anzi non v' è luogo, in cui non si celebri il glorioso nome dell' Appostolo (*Malta Illustrata*, i. 608). He goes on to enumerate particulars, which we will spare the reader, although the present writer's personal acquaintance with the island would enable him greatly to extend Abela's list of the Pauline associations which it contains. There is, perhaps, no piece of land of the same extent in the world which is made to contain reference so diversified and so numerous to any one person, as the island of Malta to St. Paul, who is, in fact, the tutelary saint of the island. These appropriations of Pauline memorials may in detail be open to dispute, or may possibly all be erroneous; but they serve in the mass to indicate a current of opinion which may be traced back to a remote source in ancient times.

The name of St. Paul's Bay has been given to the place where the shipwreck is supposed to have taken place. This, the sacred historian says, was at 'a certain creek with a shore,' *i. e.* a seemingly practicable shore, on which they purposed, if possible, to strand the vessel, as their only apparent chance to escape being broken on the rocks. In attempting this the ship seems to have struck and gone to pieces on the rocky headland at the entrance of the creek. This agrees very well with St. Paul's Bay, more so than with any other creek of the island. This bay is a deep inlet on the north side of the island, being the last indentation of the coast but one from the western extremity of the island. It is about two miles deep, by one mile broad. The harbour which it forms is very unsafe at some distance from the shore, although there is good anchorage in the middle for light vessels. The most dangerous part is the western headland at the entrance of the bay, particularly as there is close to it a small island (Salamone), and a still smaller islet (Salamonetta), the currents and shoals around which are particularly dangerous in stormy weather. It is usually supposed that the vessel struck at this point. From this place the ancient capital of Malta (now Citta Vecchia, Old City) is distinctly seen at the distance of about five miles; and on looking towards the bay from the top of the church on the summit of the hill whereon the city stands, it occurred to the present writer that the people of the town might easily from this spot have perceived in the morning that a wreck had taken place; and this is a circumstance which throws a fresh light on some of the circumstances of the deeply interesting transactions which ensued.

The sacred historian calls the inhabitants *βάρβαροι*, 'barbarians:' — 'the barbarous people showed us no small kindness.' This is far from implying that they were savages or uncivilized men: it merely intimates that they were not of Greek or Roman origin. This description applies to the ancient inhabitants of Malta most accurately; and as it could not apply to the inhabitants of Melida, who were Greeks, this is another argument to show that not Melida but Malta is the Melita of Scripture.

The island of Malta lies in the Mediterranean, about sixty miles south from Cape Passaro in Sicily. It is sixty miles in circumference, twenty in length, and twelve in breadth. Near it, on the west, is a smaller island, called Gozo, about thirty miles in circumference. Malta has no mountains or high hills, and makes no figure from the sea. It is naturally a barren rock, but has been made in parts abundantly fertile by the industry and toil of man. The island was first colonized by the Phœnicians, from whom it was taken by the Greek colonists in Sicily, about B.C. 736; but the Carthaginians began to dispute its possession about B.C. 528, and eventually became entire masters of it. From their hands it passed into those of the Romans, B.C. 242, who treated the inhabitants well, making Melita a municipium, and allowing the people to be governed by their own laws. The government was administered by a proprætor, who depended upon the prætor of Sicily; and this office appears to have been held by Publius when Paul was on the island (Acts xxviii. 7). On the division of the Roman empire, Melita belonged to the western portion; but having, in A.D. 553, been recovered from the Vandals by Belisarius, it was afterwards attached to the empire of the East. About the end of the ninth century the island was taken from the Greeks by the Arabs, who made it a dependency upon Sicily, which was also in their possession. The Arabs have left the impress of their aspect, language, and many of their customs, upon the present inhabitants, whose dialect is to this day perfectly intelligible to the Arabians, and to the Moors of Africa. Malta was taken from the Arabs by the Normans in A.D. 1090, and afterwards underwent other changes till A.D. 1530, when Charles V., who had annexed it to his empire, transferred it to the Knights of St. John of Jerusalem, whom the Turks had recently dispossessed of Rhodes. Under the knights it became a flourishing state, and was the scene of their greatest glory and most signal exploits. The institution having become unsuited to modern times, the Order of St. John of Jerusalem, commonly called Knights of Malta, gradually fell into decay, and the island was surrendered to the French under Buonaparte when on his way to Egypt in 1798. From them it was retaken by the English with the concurrence and assistance of the natives; and it was to have been restored to the Knights of Malta by the stipulations of the treaty of Amiens; but as no sufficient security for the independence of the Order (composed mostly of Frenchmen) could be obtained, the English retained it in their hands; which necessary infraction of the treaty was the ostensible ground of the war which only ended with the battle of Waterloo. The island is still in the hands of the English, who have lately remodelled the government to meet the wishes of the numerous inhabitants. It has lately become the actual seat

of an Anglican bishopric, which however takes its title from Gibraltar out of deference to the existing Catholic bishopric of Malta—a deference not paid to the Oriental churches in recently establishing the Anglican bishopric of Jerusalem. Carlo, *Origine della Fede in Malta*, Milan, 1759; Ciantar, *Critica de' Critici Moderni sub Controversa Naufragio di San Paolo*, Venez. 1763; Boisgelin, *History of Malta*, 1804; and the works cited in the course of this article.

MELON. [Abbatachim.]

MEMPHIS, a very ancient city, the capital of Lower Egypt, standing at the apex of the Delta, ruins of which are still found not far from its successor and modern representative, Cairo. Its Egyptian name, in the *hieroglyphics*, is Menofri; in Coptic, Memfi, Manfi, Membe, Panonfi or Mefi, being probably corrupted from Man-nofri, 'the abode,' or, as Plutarch terms it, ὅρμος ἀγαθῶν (*Isid. et Osir.* c. 20), 'the haven of good men.' It was called also Pthah-ei, the abode of Pthah (Wilkinson, *Anc. Egypt.* iii. 278). In Hebrew the city bears the name of מֹף (Hos. ix. 6), or נֹף (Isa. xix. 13). These several names are obviously variations of one, of which Meph seems to contain the essential sounds. Whether we may hence derive support to the statement that the place was founded by Menes, the first human king of Egypt, or whether we have here a very early instance of the custom which prevailed so extensively among the Greeks and Romans, of inventing founders for cities, having names correspondent with the names of the places they were said to have built, it is impossible, with the materials we possess, to determine with any fair approach to certainty. Menes, however, is universally reputed to have founded not only Memphis but Thebes; the addition of the latter may seem to invalidate his claim to the former, making us suspect that here, too, we have a case of that custom of referring to some one distinguished name great events which happened, in truth, at different and far distant eras. If, as is probable, Thebes as well as Memphis was, at any early period, the seat of a distinct dynasty, the cradle and the throne of a line of independent sovereigns, they could scarcely have had one founder.

The statement, however, is, that having diverted the course of the Nile, which had washed the foot of the sandy mountains of the Libyan chain, Menes obliged it to run in the centre of the valley, and built the city Memphis in the bed of the ancient channel. This change was effected by constructing a dyke about a hundred stadia above the site of the projected city, whose lofty mounds and strong embankments turned the water to the East and confined the river to its new bed. The dyke was carefully kept in repair by succeeding kings, and even as late as the Persian invasion, a guard was always maintained there to overlook the necessary repairs; for, as Herodotus asserts, if the river were to break through the dyke, the whole of Memphis would be in danger of being overwhelmed with water, especially at the period of the inundation. Subsequently, however, when the increased deposit of the alluvial soil had raised the circumjacent plains, the precautions became unnecessary; and though the spot where the diversion of the Nile was made may still be traced, owing to the great bend it takes about fourteen miles above ancient Memphis, the lofty mounds once raised there are no longer visible. The accumulated deposit of the river has elevated the bank about Kafr-el-Iyat to a level with the summit of these mounds; and a large canal runs, during the inundation, close to the villages of Saggara and Metrahenny, which occupy part of the old city, without endangering their security. And it is the opinion of Wilkinson, that considering the great height of several mounds still existing at Memphis, the city could not have been overwhelmed at any period by the rising Nile, though much damage might have been done to some of the portions of it which may have stood on less elevated ground (Herod. ii. 99; Wilkinson, *Anc. Egypt.* i. 91). The site of Memphis was first accurately fixed by Pococke, at the village of Metrahenny. According to the reports of the French, the heaps which mark the site of the ancient buildings have three leagues of circumference; but this is less than its extent in early times, since Diodorus gives it 150 stadia, or six leagues and a quarter. Memphis declined after the foundation of Alexandria, and its materials were carried off to build Cairo (Kenrick, *Egypt of Herodotus*, p. 129; Rennell, ii. 115; Champoll. *Egypte et les Ph.* i. 336).

The kingdom of which Memphis was the capital, was most probably the Egypt of the patriarchs, in which Abraham, Jacob, and the Israelites resided. Psammetichus, in becoming sole monarch of all Egypt, raised Memphis to the dignity of the one metropolis of the entire land (*arx Ægypti regum*, Plin. *Hist. Nat.* v. 9), after which Memphis grew in the degree in which Thebes declined. It became distinguished for a multitude of splendid edifices, among which may be mentioned a large and magnificent temple to Vulcan, who was called by the Egyptians Phthah, the demiurgos, or creative power (Wilkinson, i. 96; Herod. ii. 136, 154; Strabo, xvii. p. 807; Plin. *Hist. Nat.* viii. 71; Diod. Sic. i. 57, 67). Under the dominion of the Persians, as well as of the Ptolemies, Memphis retained its pre-eminence as the capital, though even in the time of the former it began to part with its splendour; and when the latter bestowed their favour on Alexandria, it suffered a material change for the worse, from which the place never recovered. In the days of Strabo many of its fine buildings lay in ruins, though the city was still large and populous. The final blow was given to the prosperity of Memphis in the time of Abdollatif, by the erection of the Arabian city of Cairo.

That the arts were carried to a great degree of excellence at Memphis is proved by the most abundant evidence. Its manufactures of glass were famed for the superior quality of their workmanship, with which Rome continued to be supplied long after Egypt became a province of the empire. The environs of Memphis presented cultivated groves of the acacia tree, of whose wood were made the planks and masts of boats, the handles of offensive weapons of war, and various articles of furniture (Wilkinson, iii. 92, 168). Memphis was also distinguished as being the place where Apis was kept, and where his worship received special honour. Under the form of this sacred bull was Osiris worshipped. Psammetichus erected here in his honour a grand court ornamented with figures in lieu of columns, twelve

cubits in height, forming a peristyle around it, in which the god was kept when exhibited in public. The festival held in his honour lasted seven days, and brought a large concourse of people to Memphis. The priests then led the sacred bull in solemn procession, every one coming forward from their houses to welcome him as he passed; and Pliny affirms that children who smelt his breath were thought to be thereby gifted with the power of predicting future events (Wilkinson, ii. 351).—J. R. B.

MENAHEM (מְנַחֵם, *consoler;* Sept. Μαναήμ), sixteenth king of Israel, who began to reign B.C. 772, and reigned ten years. Menahem appears to have been one of the generals of king Zachariah. When he heard the news of the murder of that prince, and the usurpation of Shallum, he was at Tirzah, but immediately marched to Samaria, where Shallum had shut himself up, and slew him in that city. He then usurped the throne in his turn; and forthwith marched to Tiphsah, which refused to acknowledge his rule. Having taken this place after a siege, he treated the inhabitants with a degree of savage barbarity, which, as Josephus remarks (*Antiq.* ix. 11. 1), would not have been pardonable even to foreigners. He adhered to the sin of Jeroboam, like the other kings of Israel. In his time the Assyrians, under their king Pul, made their first appearance on the borders of Palestine; and Menahem was only able to save himself from this great invading power at the heavy price of 1000 talents of silver, which he raised by a tax of 50 shekels from every man of substance in Israel. This was probably the only choice left to him; and he is not therefore to be blamed, as he had not that resource in the treasures of the temple of which the kings of Judah availed themselves in similar emergencies. Menahem died in B.C. 761, leaving the throne to his son Pekahiah (2 Kings xv. 14-22.

MENE, MENE, TEKEL, UPHARSIN (מְנֵא, מְנֵא, תְּקֵל, וּפַרְסִין; Sept. Μανή, Θεκέλ, Φάρες; Vulg. *Mane, Thecel, Phares*), the inscription supernaturally written 'upon the plaster of the wall' in Belshazzar's palace at Babylon (Dan. v. 5-25); which 'the astrologers, the Chaldæans, and the soothsayers' could neither read nor interpret, but which Daniel first read, and then interpreted. Yet the words, as they are found in Daniel, are pure Chaldee, and if they appeared in the Chaldee character, could have been read, at least, by any person present on the occasion who understood the alphabet of his own language. To account for their inability to decipher this inscription, it has been supposed that it consisted of those Chaldee words written in another character. Dr. Hales thinks that it may have been written in the primitive Hebrew character, from which the Samaritan was formed, and that, in order to show on this occasion that the writer of the inscription was the offended God of Israel, whose authority was being at that moment peculiarly despised (ver. 2, 3, 4), he adopted his own sacred character, in which he had originally written the decalogue, in which Moses could transcribe it into the law, and whose autograph copy was found in Josiah's days, and was most probably brought to Babylon in the care of Daniel, who could therefore understand the character without inspiration, but which would be unknown to 'the wise men of Babylon' (*New Analysis of Chronology*, vol. i. p. 505, Lond. 1811). This theory has the recommendation, that it involves as little as possible of miraculous agency. Josephus makes Daniel discourse to Belshazzar as if the inscription had been in Greek. The passage is certainly curious: Ἐδήλου δὲ τὰ γεγραμμένα τάδε. ΜΑΝΗ. τοῦτο δ' ἔλεγεν Ἑλλάδι γλώττῃ σημαίνοιτ' ἂν ἀριθμός· ὥσπερ τῆς ζωῆς σου τοσοῦτον χρόνον καὶ τῆς ἀρχῆς ἠρίθμηκεν ὁ θεός, καὶ περισσεύειν ἐπὶ σοὶ βραχὺν χρόνον. ΘΕΚΕΛ. σημαίνει τοῦτο σταθμόν. στήσας οὖν σου λέγει τὸν χρόνον τῆς βασιλείας ὁ θεός, ἤδη καταφερομένην δηλοῖ. ΦΑΡΕΣ. καὶ τοῦτο κλάσμα δηλοῖ κατὰ Ἑλλάδα γλῶτταν. κλάσει τοιγαροῦν σου τὴν βασιλείαν, καὶ Μήδοις αὐτὴν καὶ Πέρσαις διανεμεῖ. 'He (Daniel) explained the writing thus: MANH. "this," said he, "*in the Greek language*, may mean *a number;* thus God hath numbered so long a time for thy life and for thy government, and that there remains a short time for thee." ΘΕΚΕΛ. This signifies *weight;* hence he says, "God having weighed in a balance the time of thy kingdom, finds it already going down." ΦΑΡΕΣ. This also, according to *the Greek language*, denotes *a fragment;* hence "he will break in pieces thy kingdom, and divide it among the Medes and Persians"' (*Antiq.* x. 11. 3). There is some doubt whether the reading ἔλεγεν be genuine, but Josephus evidently represents the whole passage as addressed by Daniel to the king, and makes him speak as if the inscription had been in Greek. Still Josephus, for some cause or other, represents Daniel as speaking doubtfully ('may mean') in the former part of the passage, and scarcely less so in the latter. It has been supposed by some, that 'the wise men' were not so much at fault to read the inscription, as to explain its meaning, which, it is said, they might sufficiently understand to see its boding import to the monarch, and be unwilling to consider further—like the disciples in regard to the predictions of our Lord's death (Luke ix. 45), where it is said, 'this saying was hid from them, they perceived it not, and they feared to ask him of that saying.' And certainly it is said throughout our narrative that 'the wise men could not read the writing, nor make known the interpretation of it,' phrases which would seem to mean one and the same thing; since, if they mean different things, the order of ideas would be that they could not interpret nor even read it, and Wintle accordingly translates, 'could not read so as to interpret it' (*Improved Version of Daniel*, Lond. 1807). At all events the meaning of the inscription by itself would be extremely enigmatical and obscure. To determine the application, and to give the full sense, of an isolated device which amounted to no more than 'he or it is numbered, he or it is numbered, he or it is weighed, they are divided' (and there is even a riddle or paranomasia on the last word פרס; comp. Susannah, ver. 54, 55 and 58, 59, Greek, and Jer. i. 11, 12, Hebrew; which may either mean 'they divide,' or 'the Persians,' according as it is pronounced), must surely have required a supernatural endowment on the part of Daniel—a conclusion which is confirmed by the exact coincidence of the event with the prediction, which he propounded with so much fortitude (ver. 30, 31).—J. F. D.

MENI (מְנִי; it is doubtful whether the Sept. renders it by τύχη, or by δαιμόνιον) is mentioned in Is. lxv. 11, together with Gad, as receiving an offering of mixed wine. As derived from מנה, 'to distribute,' 'to number,' the word is either taken, by those namely who consider Gad in that passage to mean *troop*, to signify a *multitude*, a *number*; or, by those who suppose the whole verse to refer to idolatrous worship, to be the name of a god, and to mean *destiny*. To this sense the first clause of the next verse appears to allude: 'But I destine you to the sword.' The signification of destiny is very naturally evolved from the primitive notion of distributing, apportioning: as in the Greek μοῖρα, and in the Arabic منى *manan*, *fate*, from the same root as *Meni*. Pocock has, moreover, pointed out the resemblance between Meni and Manât, an idol of the ancient Arabs, which is mentioned in the Qurân, Sur. liii. 20 (*Specim.* p. 94). The fact of Meni being a Babylonian god renders it probable that some planet was worshipped under this name: but there is much diversity of opinion as to the particular planet to which the designation of *destiny* would be most applicable. Münter considers it to be Venus, as the lesser star of good fortune; Ewald takes it to be Saturn, the chief dispenser of evil influences; and Movers has returned to an old opinion, that Meni is the moon, which was also supposed to be an arbitress of fortune: the best arguments for which last view are collected by Vitringa (*ad loc.*). It also deserves notice that there are some, among whom is Hitzig, who consider Gad and Meni to be names for one and the same god, and who chiefly differ as to whether the sun or the moon is the god intended.—J. N.

MEPHIBOSHETH (מְפִי בֹשֶׁת, *extermination of idols*; Sept. Μεμφιβοσθέ; also in 1 Chron. ix. 40, Merib-Baal), son of Jonathan and nephew of Saul (2 Sam. iv. 4). He was only five years of age when his father and grandfather were slain in Mount Gilboa: and on the news of this catastrophe, the woman who had charge of the child, apprehending that David would exterminate the whole house of Saul, fled away with him; but in her hasty flight she stumbled with the child, and lamed him for life (B.C. 1055). Under this calamity, which was very incapacitating in times when agility and strength were of prime importance, Mephibosheth was unable to take any part in the stirring political events of his early life. According to our notions, he should have been the heir of the house of Saul; but in those times a younger son of an actual king was considered to have at least as good a claim as the son of an heir apparent who had never reigned, and even a better claim if the latter were a minor. This, with his lameness, prevented Mephibosheth from ever appearing as the opponent or rival of his uncle Ishbosheth on the one hand, or of David on the other (2 Sam. ix). He thus grew up in quiet obscurity in the house of Machir, one of the great men of the country beyond the Jordan (2 Sam. ix. 4; xvii. 27); and his very existence was unknown to David till that monarch, when firmly settled in his kingdom, inquired whether any of the family of Jonathan survived, to whom he might show kindness for his father's sake. Hearing then of Mephibosheth from Ziba, who had been the royal steward under Saul, he invited him to Jerusalem, assigned him a place at his own table, and bestowed upon him lands, which were managed for him by Ziba, and which enabled him to support an establishment suited to his rank. He lived in this manner till the revolt of Absalom, and then David, in his flight, having noticed the absence of Mephibosheth, inquired for him of Ziba, and being informed that he had remained behind in the hope of being restored to his father's throne, instantly and very hastily revoked the grant of land, and bestowed it on Ziba (2 Sam. xvi. 1-4). Afterwards, on his return to Jerusalem, he was met with sincere congratulations by Mephibosheth, who explained that being lame he had been unable to follow the king on foot, and that Ziba had purposely prevented his beast from being made ready to carry him: and he declared that so far from having joined in heart, or even appearance, the enemies of the king, he had remained as a mourner, and, as his appearance declared, had not changed his clothes, or trimmed his beard, or even dressed his feet, from the day that the king departed to that on which he returned. David could not but have been sensible that he had acted wrong, and ought to have been touched by the devotedness of his friend's son, and angry at the imposition of Ziba; but to cover one fault by another, or from indifference, or from reluctance to offend Ziba, who had adhered to him when so many old friends forsook him, he answered coarsely, 'Why speakest thou any more of thy matters? I have said, thou and Ziba divide the land.' The answer of Mephibosheth was worthy of the son of the generous Jonathan:—'Yea, let him take all; forasmuch as my lord the king is come again in peace unto his own house' (2 Sam. xix. 24-30). Undoubtedly David does not shine in this part of his conduct to Mephibosheth; but some of the German writers, in their eagerness to impugn the character and motives of 'the man after God's own heart,' have handled the matter much more severely than a due consideration of the difficult circumstances in which the king was placed will be found to justify.

We hear no more of Mephibosheth, except that David was careful that he should not be included in the savage vengeance which the Gideonites were suffered to execute upon the house of Saul for the great wrong they had sustained during his reign (2 Sam. xxi. 7). Another Mephibosheth, a son of Saul by his concubine Rizpah, was, however, among those who suffered on that occasion (ver. 8, 9).

MERAB (מֵרַב, *increase*; Sept. Μερόβ), eldest daughter of king Saul, who was promised in marriage to David; but when the time fixed for their union approached, she was, to the surprise of all Israel, bestowed in marriage upon an unknown personage named Adriel (1 Sam. xiv. 49: xviii. 17-19). By him she had six sons, who were among those of the house of Saul that were given up to the Gibeonites, who put them to death in expiation for the wrongs they had sustained from their grandfather. By an error of some copyist, the name of Michal—the younger sister, who was afterwards given to David—has found its way into the text which records this transaction (2 Sam. xxi. 8), in place of that of Merab,

which renders the account unintelligible. The context, however, sufficiently indicates the proper correction.

MERARI (מְרָרִי, *bitter;* Sept. Μεραρί), youngest son of Levi, born in Canaan (Gen. xlvi. 11; Exod. vi. 16; Num. iii. 17; 1 Chron. vi. 1). He is only known from his name having been given to one of the three great divisions of the Levitical tribe.

MERCURY [HERMES].

MERCY-SEAT (כַּפֹּרֶת; Sept. ἱλαστήριον; Vulg. *propitiatorium;* Luth. *gnadenstuhl*). The Hebrew name literally denotes a *cover*, and, in fact, describes the lid of the ark with cherubim, over which appeared 'the glory of God' (Exod. xxvi. 17, sq.; xxx. 8; xxxi. 7, and elsewhere). [ARK.] Compare 1 Chron. xxviii. 11, where the holy of holies is called the בית הכפרת, 'house of the mercy-seat.' The idea involved in these translations seems to be founded upon the metaphorical application of the word כפר *copher* (perhaps the origin of the very word *cover* which translates it), thus making 'to cover sin' mean to forgive or expiate it. Whether this be the literal application of the word to the material covering of the ark, or a latent reference to this symbolical meaning of the term might have been doubted, had not the New Testament (Heb. ix. 5) followed the example of the Septuagint in assigning it the latter sense—which, therefore, all translators have felt bound to follow. The word used in the Septuagint and New Testament to translate the term, which in Hebrew means simply 'a cover,' is ἱλαστήριον, the 'expiatory' or 'propitiatory,' in allusion to that application of the Hebrew word which we have noted: which application is in this instance justified and explained by reference to the custom of the high-priest once a-year entering the most holy place, and sprinkling the lid of the ark with the blood of an expiatory victim, whereby 'he made atonement for the sins of the people.' As this was the most solemn and significant act of the Hebrew ritual, it is natural that a reference to it should be involved in the name which the covering of the ark acquired. By a comparison of the texts in which the word occurs, it will be seen that there would, in fact, have been little occasion to name the cover of the ark separately from the ark itself, but for this important ceremonial. From this it will be seen that 'mercy-seat' is not a good or correct translation of the idea involved in the metaphorical sense of the original Hebrew, and still less of the Greek ἱλαστήριον. It carries the idea a stage further from the original. The lid of the ark was no doubt the 'seat of mercy,' but it was mercy conferred through the act of expiation, and therefore a name bringing the sense nearer to the idea of expiation or of propitiation would be more exact. The term 'mercie-seat' occurs in Barker's Bible, but is explained there by 'or covering, or propitiatorie;' and the notion which led the English translators to call it 'mercie-seate,' is expressed in the note—'There God appeared mercifully unto them: and this was a figure of Christ.' In the same Bible a figure of the covering of the ark is given separately, and the explanatory description is, 'The propitiatorie, or mercie-seate, which is the covering of the arke of the testimonie.'

MERI-BAAL, or MERIB-BAAL (מְרִי־בַעַל; Sept. Μεριβαάλ), a name given to Mephibosheth, son of Jonathan, in 1 Chron. viii. 34; ix. 40 [MEPHIBOSHETH]. Of the two the latter seems the more correct form. It means 'contender against Baal.' Some think that the difference has arisen from some corruption of the text; but, from the analogy of Ishbosheth, whose original name was Esh-baal, it seems more like a designed alteration, arising probably from the reluctance of the Israelites to pronounce the name of Baal [ISHBOSHETH].

1. MERIBAH (מְרִיבָה, *quarrel, strife*), one of the names given by Moses to the fountain in the desert of Sin, on the western gulf of the Red Sea, which issued from the rock which he smote by the divine command (Exod. xvii. 1-17). He called the place, indeed, Massa (temptation) *and* Meribah, and the reason is assigned 'because of the *chiding* of the children of Israel, and because they did there *tempt* the Lord.' [WANDERING.]

2. MERIBAH. Another fountain produced in the same manner, and under similar circumstances, in the desert of Zin (Wady Arabah), near Kadesh; and to which the name was given with a similar reference to the previous misconduct of the Israelites (Num. xx. 13, 24; Deut. xxxiii. 8). In the last text, which is the only one where the two places are mentioned together, the former is called Massah only, to prevent the confusion of the two Meribahs, 'Whom thou didst prove at Massah, and with whom thou didst strive at the waters of Meribah.' Indeed this latter Meribah is almost always indicated by the addition of 'waters,' *i. e.* 'waters of Meribah' (מי מריבה), as if further to distinguish it from the other (Ps. lxxxi. 8; cvi. 32); and still more distinctly 'waters of Meribah in Kadesh' (Num. xxvii. 14; Deut. xxxii. 51; Ezek. xlvii. 19). Only once is this place called simply Meribah (Ps. xcv. 8). It is strange, that with all this carefulness of distinction in Scripture, the two places should rarely have been properly discriminated. The distance of place from the former Meribah, the distance of time, and the difference of the people in a new generation, are circumstances which, when the positive conditions of the two wells were so equal, explain why Moses might give the same name to two places. The necessity for a diversified nomenclature was not at all felt in those ancient times: hence the number of places which in Scripture are found bearing the same names; which, however, are not perhaps greater, nor indeed so great as the repetitions of the same names which occur at this day in our own and other European countries.

MERODACH (מְרֹדָךְ; Sept. Vat. Μαιρωδὰχ) occurs in Jer. l. 2, in such connection with idols as to leave no doubt that it is the name of a Babylonian god. In conformity with the general character of Babylonian idolatry Merodach is supposed to be the name of a planet; and, as the Tsabian and Arabic names for Mars are Nerig and Mirrich, 'arrow' (the latter of which Gesenius thinks may be for Mirdich, which is very nearly the same as Merodach), there is some presumption that it may be Mars. As for etymologies of the word, Gesenius has suggested that it is the Persian *mardak*, the diminutive of *mard*, 'man,'

used as a term of endearment; or, rather, that it is from the Persian and Indo-Germanic *mord*, or *mort* (which means death, and is so far in harmony with the conception of Mars, as the lesser star of evil omen), and the affix *oeh*, which is found in many Assyrian names, as Nisroch, &c. The bloody rites with which Mars was worshipped by the ancient Arabs are described in Norberg's *Onomast. Codicis Nasar.* p. 107.—J. N.

MEROM. 'The waters of Merom,' of Josh. ix. 5, are doubtless the lake Samechonitis, now called Huleh, the upper or highest lake of the Jordan [Palestine].

MERORIM (מְרֹרִים) occurs in two places in Scripture, and is in both translated *bitter herbs* in our Authorized Version, as well as in several others. In Exod. xii. 8, Moses commanded the Jews to eat the lamb of the Passover 'with unleavened bread, and with *bitter* herbs (*merorim*) they shall eat it.' So at the institution of the second Passover, in the wilderness of Sinai (Num. ix. 11), 'The fourteenth day of the second month at even they shall keep it, and eat it with unleavened bread and *bitter* herbs.' The word *merorim*, which is here translated 'bitter herbs,' is universally acknowledged to signify *bitter*, and the word *herbs* has been supplied to complete the sense. By the Sept. it has been translated ἐπὶ πικρίδων, and by St. Jerome, 'cum lactucis agrestibus.' Several interpreters, however, render it simply *amara;* which Celsius adopts, and considers that *merorim* has reference to the ἔμβαμμα which was eaten with the paschal lamb, and that it signifies 'cum amaritudinibus, vel rebus amaris.' In the Arabic a word similar to the Hebrew has also reference to bitterness, and, like the Greek word πικρός, came to be applied to a bitter plant. Thus the Arabic *murr*, 'bitter,' pl. *murar*, signifies a species of bitter tree or plant; as does *maru*, a fragrant herb which has always some degree of bitterness. *Murooa* is in India applied both to the bitter *Artemisia*, or wormwood, and to the fragrant *Ocymum pilosum*, a species of Basil; in Arabia, to the bitter Centaury, according to Forskal. It is extremely probable that a bitter herb of some kind is intended, but whether a particular species or *any* bitter herb, it is difficult to say. The Jews, as we learn from the Mishna (Tract. *Pesachim*, cap. ii. § 6, as quoted by Bochart, *Hieroz.* i. 1. ii. c. 50), used five kinds of bitter herbs, thus given by Dr. Harris: '1. *Chazareth*, taken for lettuce; 2. *Ulsin*, supposed to be endive, or succory; 3. *Tamea*, probably tansy; 4. *Charubbinim*, which Bochart thought might be the nettle, but Scheuchzer shows to be the camomile; 5. *Meror*, the sow-thistle, or dent-delion, or wild lettuce.' All these translations betray their European origin. To interpret them with any thing like accuracy, it is requisite in the first place to have a complete Flora of the countries, from Egypt to Syria, with the Arabic names of the useful plants, accompanied by a notice of their properties. Science is as yet far from having any thing of the kind. We have seen that the succory or endive was early selected as being the bitter herb especially intended; and Dr. Geddes justly remarks, that 'the Jews of Alexandria, who translated the Pentateuch, could not be ignorant what herbs were eaten with the paschal lamb in their days.' Jerome understood it in the same manner; and Pseudo-Jonathan expressly mentions *horehound* and *lettuces*. Forskal informs us that the Jews at Sana and in Egypt eat the lettuce with the paschal lamb. Lady Calcott inquires whether mint was originally one of the bitter herbs with which the Israelites ate the paschal, as our use of it with roast lamb, particularly about Easter time, inclined her to suppose it was. Aben Ezra, as quoted by Rosenmüller, states that the Egyptians used bitter herbs in every meal: so in India some of the bitter *Cucurbitaceæ*, as *kurella*, are constantly employed as food [Pakyoth]. It is curious that the two sets of plants which appear to have the greatest number of points in their favour, are the endive or succory, and one of the fragrant and usually also bitter labiate plants; because we find that the term *marooa* is in the East applied even in the present day both to the bitter wormwood and the fragrant *Ocymum*. Moreover the Chaldee translator, Jonathan, expressly mentions lettuce and *horehound*, or *marrubium*, which is also one of the Labiatæ. It is important to observe that the Artemisia, and some of these fragrant labiatæ, are found in many parts of Arabia and Syria; that is, in warm, dry, barren regions. The endive is also found in similar situations, but requires, upon the whole, a greater degree of moisture. Thus it is evident that the Israelites would be able to obtain suitable plants during their long wanderings in the Desert, though it is difficult for us to select any one out of the several which might have been employed by them.—J. F. R.

MEROZ (מֵרוֹז; Sept. Μηρώζ), a place in the northern part of Palestine, the inhabitants of which are severely reprehended in Judg. v. 23, for not having taken the field with Barak against Sisera. It would seem as if they had had an opportunity of rendering some particular and important service to the public cause which they neglected. The site is not known: Eusebius and Jerome (*Onomast.* s. v. 'Merus') fix it twelve Roman miles from Sebaste, on the road to Dothaim; but this position would place it south of the field of battle, and therefore scarcely agrees with the history.

MESECH; MESHECH [Nations, Dispersion of].

1. MESHA (מֵשָׁא; Sept. Μασσῆ), a place mentioned in describing that part of Arabia inhabited by the descendants of Joktan (Gen. x. 30). [See Nations, Dispersion of.]

2. MESHA (מֵישַׁע, *deliverance;* Sept. Μωσά), a king of Moab, who possessed an immense number of flocks and herds, and appears to have derived his chief wealth from them. In the time of Ahab, he being then under tribute, 'rendered unto the king of Israel 100,000 lambs, and 100,000 rams, with the wool (2 Kings iii. 4). These numbers may seem exaggerated if understood as the amount of yearly tribute. It is, therefore, more probable that the greedy and implacable Ahab had at some one time levied this enormous impost upon the Moabites; and it is likely that it was in the apprehension of a recurrence of such ruinous exactions, that they seized the opportunity for revolt, which the death of Ahab seemed to offer (2 Kings i. 1; iii. 5). The short reign of Ahaziah afforded no opportunity for

rations for war; and induced Jehoshaphat to join him in this expedition. The result, with the part taken by Elisha the prophet, has been related under other heads [Elisha; Jehoram; Jehoshaphat]. King Mesha was at length driven to shut himself up, with the remnant of his force, in Areopolis, his capital. He was there besieged so closely, that, having been foiled in an attempt to break through the camp of the Edomites (who were present as vassals of Judah), he was reduced to extremities, and in the madness of his despair, sought to propitiate his angry gods by offering up his own son, the heir of his crown, as a sacrifice, upon the wall of the city. On beholding this fearful sight, the besiegers withdrew in horror, lest some portion of the monstrous crime might attach to their own souls. By this withdrawal they, however, afforded the king the relief he desired, and this was, no doubt, attributed by him to the efficacy of his offering, and to the satisfaction of his gods therewith. The invaders, however, ravaged the country as they withdrew, and returned with much spoil to their own land [Moabites].

MESOPOTAMIA. [Aram.]

MESSIAH (מָשִׁיחַ; Sept. Χριστός). In both languages this word signifies the same thing, viz. *anointed*. Hence Sept. ὁ ἱερεὺς ὁ χριστός for הַכֹּהֵן הַמָּשִׁיחַ, *the high priest* (Lev. iv. 3, 5, 16). In order to have an accurate idea of the Scriptural application of the term, we must consider the custom of anointing which obtained amongst the Jews. That which was specifically set apart for God's service was anointed, whether *persons* or *things* [Anointing]. Thus we read that Jacob poured oil upon the pillar (Gen. xxviii. 18, 22). The tabernacle also and its utensils were anointed (Lev. viii. 10), being thereby appropriated to God's service.

But this ceremony had, moreover, relation to *persons*. Thus *priests*, as Aaron and his sons, were anointed, that they might minister unto God (Exod. xl. 13, 15). We are informed by Jewish writers (see Maimon. *H. Melach*; Abarbanel, on Exod. xxx. 33) that the high-priest was anointed, but not the inferior priests; the high-priesthood not devolving, as a matter of course, on the eldest son, the person who succeeded his father must needs be thus consecrated to God (Buxtorf, *Lex. Rabbin. s. v.* מָשִׁיחַ).

Kings were anointed. Hence it is that a king is designated *the Lord's anointed* (Heb. אֶת־מְשִׁיחַ יְהוָה; Sept. ὁ χριστὸς τοῦ Κυρίου). Saul and David were, according to the divine appointment, anointed by Samuel (1 Sam. x. 1; xv. 1; xvi. 3, 13). Zadok anointed Solomon, that there might be no dispute who should succeed David (1 Kings i. 39).

We cannot speak with confidence as to whether the prophets were *actually* anointed with the material oil. We have neither an express law nor practice to this effect on record. True it is that Elijah is commanded to anoint Elisha to be prophet in his room (1 Kings xix. 16); but no more may be meant by this expression than that he should constitute him his successor in the prophetic office; for all that he did, in executing he arose and ministered unto him (ver. 21). For kings and priests the precept and practice are unquestionable. It is in this extended, figurative, sense of the expression that we are to understand the passages in Ps. cv. 15 and Isa. xlv. 1, wherein the Israelites and Cyrus are called the *Lord's anointed*—they being expressly raised up for the accomplishment of the divine purposes.

But the name *Messiah* is, *par excellence*, applied to the Redeemer of man in the Old Testament (Dan. ix. 16; Ps. ii. 2). The words of Hannah, the mother of Samuel, at the close of her divine song, are very remarkable (1 Sam. ii. 10): 'The adversaries of the Lord shall be broken in pieces; out of heaven shall He thunder upon them: the Lord shall judge the ends of the earth; and he shall give strength unto his *king*, and exalt the horn of his *Messiah*.' The Hebrews as yet had no king; hence the passage may be taken as a striking prophecy of the promised deliverer. In various parts of the New Testament is this epithet applied to Jesus. St. Peter (Acts x. 36, 38) informs Cornelius the centurion that God had anointed Jesus of Nazareth to be the *Christ*, and our Lord himself acknowledges to the woman of Samaria that he is the expected Messiah (John iv. 25). This term, however, as applied to Jesus, is less a *name* than the expression of his office; thus Lactantius says, 'Christus non proprium nomen est, sed nuncupatio potestatis et regni' (*Institut.* iv. 7).

Thus the Jews had in *type*, under the Mosaic dispensation, what we have in *substance* under the Christian system. The prophets, priests, and kings of the former economy were types of Him who sustains these offices as the head of his mystical body, the Church [Mediator]. As the priests and kings of old were set apart for their offices and dignities by a certain form prescribed in the law of Moses, so was the blessed Saviour by a better anointing (of which the former was but a shadow), even by the Holy Ghost. Thus the apostle tells us that God anointed Jesus of Nazareth with the Holy Ghost, and with power (Acts x. 38). He was anointed:—

First, at his *conception:* the angel tells Mary, 'The Holy Ghost shall come upon thee, and the power of the Highest shall overshadow thee: therefore that holy thing which shall be born of thee shall be called the Son of God' (Luke i. 35).

Second, at his *baptism* at the river Jordan (Matt. iii. 13; Mark i. 9, 10, 11, 12). St. Luke, moreover, records (Luke iv. 17, 21) that our Lord being at Nazareth, he had given unto him the book of the prophet Isaiah; and on reading from ch. lxi. 1, 'The Spirit of the Lord is upon me,' &c., he said to his hearers, 'This day is this Scripture fulfilled in your ears.'

On this subject Chrysostom (*Homil.* i. *in Epist. ad Romanos*, p. 6) says, 'He, the Saviour, is called Christ, because, as to the flesh, he was anointed: and wherewith was he anointed? With nothing truly but the Spirit.' Commenting on Ps. xlv. the same father observes, 'Christ was anointed when the Spirit descended upon him in the form of a dove.' Theophylact, on Matt. i., writes, 'The Lord is called Christ as king, because He rules over sin, and as priest because He offered himself a sacrifice for us. He was

Church. But as the Jews will not acknowledge the right of either Jesus, or his apostles, to apply the prophetic passages which point to the Messiah to himself, it now remains for us to show—

First, That the promised Messiah *has already come.*

Second, That Jesus of Nazareth *is unquestionably he.*

To prove our first assertion, we shall confine our remarks to *three* prophecies. The first occurs in Gen. xlix. 8, 10, where Jacob is giving his sons his parting benediction, &c. When he comes to Judah he says: 'The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh come; and unto him shall the gathering of the people be.' It is evident that by Judah is here meant, not the *person* but the *tribe;* for Judah died in Egypt, without any pre-eminence. By *sceptre* and *lawgiver* are obviously intended the legislative and ruling power, which did, in the course of time, commence in David, and which, for centuries afterwards, was continued in his descendants. Whatever variety the form of government—whether monarchical or aristocratical—might have assumed, the *law* and polity *were still the same.* This prediction all the ancient Jews referred to the Messiah. Ben Uzziel renders it, 'Until the time when the king Messiah shall come.' The Targum of Onkelos speaks to the same effect, and that of Jerusalem paraphrases it thus: 'Kings shall not cease from the house of Judah, nor doctors that teach the law from his children, until that the king Messiah do come, whose the kingdom is; and all nations of the earth shall be subject unto him.' Now, that the sceptre has departed from Judah, and, consequently, that the Messiah has come, we argue from the acknowledgments of some most learned Jews themselves. Kimchi thus comments on Hosea: 'These are the days of our captivity, wherein we have neither king nor prince in Israel; but we are in the power of the Gentiles, and under their kings and princes.' Again, Abarbanel, commenting on Isa. c. liii., says that it is a great part of their misery in their captivity, that they have neither kingdom nor rule, nor a sceptre of judgment! The *precise* time when all authority departed from Judah is disputed. Some date its departure from the time when Herod, an Idumæan, set aside the Maccabees and Sanhedrim. Whereupon the Jews are said to have shaved their heads, put on sackcloth, and cried, 'Woe to us, because the sceptre is departed from Judah, and a lawgiver from beneath his feet!' Others think that it was when Vespasian and Titus destroyed Jerusalem and the Temple, that the Jews lost the last vestige of authority. If, therefore, the sceptre *has* departed from Judah—and who can question it who looks at the broken-up, scattered, and lost state of that tribe for ages?—the conclusion is clearly irresistible, that the Messiah *must have long since come!* To avoid the force of this conclusion the Jews now say, that the שֵׁבֶט *shebet*, which we render *sceptre*, may be translated *rod*, and metaphorically signifies, in the above passage, *affliction.* That the word cannot bear this meaning *here*, is evident, because

The next proof that the Messiah has long since come, we adduce from Dan. ix. 25, 26, 27. It is evident that the true Messiah is here spoken of. He is twice designated by the very name. And if we consider what the work is which he is here said to accomplish, we shall have a full confirmation of this. Who but He could finish and take away transgression, make reconciliation for iniquity, bring in everlasting righteousness, seal up the vision and prophecy, confirm the covenants with many, and cause to cease the sacrifice and oblation? Indeed there is a saying extant in the Talmud, as the tradition of former times, 'In Daniel is delivered to us the end of the Messiah,' *i. e.* the term wherein he ought to come, as it is explained by Jarchi. Grotius (*De Veritat.* v.) speaks of a Jew, R. Berachia, who lived fifty years before our Lord, and who declared that the time fixed by Daniel could not go beyond fifty years! If then it be the *true* Messiah who is described in the above prophecy, it remains for us to see how the time predicted for his coming has long since transpired. This is expressly said to be seventy weeks from the going forth of the commandment to restore and build Jerusalem. That by seventy weeks are to be understood seventy sevens of years, a day being put for a year, and a week for seven years, making up 490 years, is allowed by Kimchi, Jarchi, Rabbi Saadias, and other learned Jews, as well as by many Christian commentators. It is clear that these seventy weeks cannot consist of weeks of days, for all put together make but one year, four months, and odd days—a space of time too short to crowd so many various events into as are here specified; nor can any such time be assigned between the two captivities, wherein like events did happen (see Prideaux, *Connect.* lib. v., part 1). This period of time then *must have long since* elapsed, whether we date its commencement from the first decree of Cyrus (Ezra i. 1, 2), the second of Darius Hystaspes (ch. vi. 15), or that of Artaxerxes (ch. viii. 11). See Grotius *De Veritat.* v.; Josephus, *De Bell. Jud.* vii. 12, 13.

We can only barely allude to one remarkable prediction more, which fixes the time of the Messiah's advent, viz., Hag. ii. 7-9: 'I will shake all nations, and the desire of all nations shall come: and I will fill this house with glory, saith the Lord of Hosts. The silver is mine, and the gold is mine, saith the Lord of Hosts. The glory of this latter house shall be greater than of the former, saith the Lord of Hosts.' The glory here spoken of *must* be in reference to the Messiah, or on some other account. It could not have been said that the second Temple exceeded in glory the former one; for in many particulars, according to the acknowledgment of the Jews themselves, it was far inferior both as a building (Ezra iii. 3, 12), and in respect of the symbols and tokens of God's special favour being wanting (see Kimchi and R. Salomon on Hag. i. 8). The promised glory, therefore, must refer to the coming and presence of him who was promised to the world before there was any nation of the Jews; and who is aptly called the '*Desire of all nations.*' This view is amply confirmed by the prophet Malachi (ch. iii. 1). Since then the

very Temple into which the Saviour was to enter, has for ages been destroyed, *He must*, if the integrity of this prophecy be preserved, *have come*. That there was, at the time of our Lord's birth, a great expectation of the Messiah, both amongst Jews and Gentiles, may be seen from three celebrated historians, as well as from the sacred Scriptures. Tacitus (*Hist.* c. 13) says: 'Pluribus persuasio inerat, antiquis sacerdotum literis contineri, eo ipso tempore fore ut valesceret *Oriens*, profectique Judæa rerum potirentur.' Again, Suetonius (in *Vespas.* 4) says: 'Percrebruerat Oriente toto vetus et constans opinio, esse in fatis ut eo tempore Judæi profecti rerum potirentur.' Josephus not being able to find any calculation by which to protract the general expectation of the Messiah, applies it in the following words to Vespasian (*De Bell. Jud.* vii. 31): 'That which chiefly excited the Jews to war was an ambiguous prophecy, which was also found in the sacred books, that at that time some one within their country should arise, that should obtain the empire of the whole world.' We are, moreover, informed again by Suetonius (*Octav.* 94), that, upon the conception of Augustus, it was generally thought that *Nature* was then in labour to bring forth a king that should rule the Romans! Some suppose that the words of Virgil (*Eclog.* iv.), point at our Saviour; but they were intended by him to apply to the son of Pollio. We may just add, that as there was a general expectation of the Messiah at this time, so there were many impostors who drew after them many followers (Joseph. *Antiq.* xx. 2. 6; *De Bell. Jud.* lvii. 31). See also a full account of the false Christs who appeared by John à Lent *Schediasm*, c. 2; Maimon. *Ep. ad Judæos Marsilienses;* Christ prophesies of such persons (Matt. xxiv. 24, 29).

The limits of this article will admit of our only touching upon the proofs that Jesus of Nazareth, and none other, is the very Messiah who was to come. What was predicted of the Messiah was fulfilled in Jesus. Was the Messiah to be of the seed of the woman (Gen. iii. 15), and this woman a virgin? (Isa. vii. 14). So we are told (Gal. iv. 4; Matt. i. 18, and 22, 23) that Jesus was made of a woman, and born of a virgin. Was it predicted that he (Messiah) should be of the tribe of Judah, of the family of Jesse, and of the house of David? (Mic. v. 2; Gen. xlix. 10; Isa. xi. 10; Jer. xxiii. 5). This was fulfilled in Jesus (Luke i. 27, 69; Matt. i. 1) [Genealogy].

2. If the Messiah was to be a prophet like unto Moses, so was Jesus also (Isa. xviii.; John vi. 14). If the Messiah was to appear in the second Temple, so did Jesus (Hag. ii. 7, 9; John xviii. 20).

3. Was Messiah to work miracles? (Isa. xxxv. 5, 6; comp. Matt. xi. 4, 5).

4. If the Messiah was to suffer and die (Isa. liii.), we find that Jesus died in the same manner, at the very time, and under the identical circumstances, which were predicted of him. The very man who betrayed him, the price for which he was sold, the indignities he was to receive in his last moments, the parting of his garments, and his last words, &c., were all foretold of the Messiah, and accomplished in Jesus!

5. Was the Messiah to rise from the dead? So did Jesus! How stupendous and adorable is the Providence of God, who, through so many apparent contingencies, brought such things to pass!—J. W. D.

METALS. The principal metals are in this work considered separately under their several names; and a few general observations alone are necessary in this place.

The mountains of Palestine contained metals, nor were the Hebrews ignorant of the fact (Deut. viii. 9); but they do not appear to have understood the art of mining. They therefore obtained from others the superior as well as the inferior metals, and worked them up. They received also metal utensils ready made, or metal in plates (Jer. x. 9), from neighbouring and distant countries of Asia and Europe. The metals named in the Old Testament are ברזל *barzel*, iron (steel, Jer. xv. 12); נחשת *nechusheth*, copper, or copper ore; כסף *ceseph*, silver; זהב *zahab*, gold; עפרת *ophereth*, lead; and בדיל *bedil*, tin. The trade in these metals was chiefly in the hands of the Phœnicians (Ezek. xxvii. 7), who obtained them from their colonies, principally those in Spain (Jer. x. 9; Ezek. xxvii. 12). Some also came from Arabia (Ezek. xxvii. 19), and some apparently from the countries of the Caucasus (Ezek. xxvii. 13). A composition of several metals is expressed by the Hebrew word חשמל *chasmil* (which see). In general the ancients had a variety of metallic compositions, and that which the word *chasmil* describes appears to have been very valuable. Whether it was the same as that precious compound known among the ancients as Corinthian brass is uncertain, but it is likely that in later times the Jews possessed splendid vessels of the costly compound known by that name. Indeed this is distinctly affirmed by Josephus (*Vita*, 13).

The vast quantity of silver and gold used in the temple in the time of Solomon, and which was otherwise possessed by the Jews during the flourishing time of the nation, is very remarkable, under whatever interpretation we regard such texts as 1 Chron. xxii. 14; xxix. 4, &c. In like manner, we find among other ancient Asiatic nations, and also among the Romans, extraordinary wealth in gold and silver vessels and ornaments of jewellery. As all the accounts, received from sources so various, cannot be founded on exaggeration, we may rest assured that the precious metals were in those ancient times obtained abundantly from mines—gold from Africa, India, and perhaps even then from Northern Asia; and silver principally from Spain.

The following are the metallic manufactures named in the Old Testament:—Of *iron*, axes (Deut. xix. 5-2; 2 Kings vi. 5); saws (2 Sam. xii. 31); stone-cutters' tools (Deut. xxvii. 5); sauce-pans (Ezek. iv. 3); bolts, chains, knives, &c., but especially weapons of war (1 Sam. xvii. 7; 1 Macc. vi. 35). Bedsteads were even sometimes made of iron (Deut. iii. 11); 'chariots of iron,' *i. e.* war-chariots, are noticed elsewhere [Chariots]. Of *copper* we find vessels of all kinds (Lev. vi. 28; Num. xvi. 39; 2 Chron. iv. 16; Ezek. viii. 27); and also weapons of war, principally helmets, cuirasses, shields, spears (1 Sam. xvii. 5; vi. 38; 2 Sam. xxi. 16); also chains (Judg. xvi. 21); and even mirrors (Exod. xxxviii. 8) [Copper]. *Gold* and *silver* furnished articles of ornament, also vessels, such as cups, goblets, &c. The holy vessels of the temple were

mostly of gold (Ezra v. 14). Idolaters had idols and other sacred objects of silver (Exod. xx. 20; Isa. ii. 20; Acts xvii. 29; xix. 24). *Lead* is mentioned as being used for weights, and for plumb-lines in measuring (Amos vii. 7; Zech. v. 8). Some of the tools of workers in metal are also mentioned: פַּעַם *paam*, anvil (Isa. xli. 7); מַקֶּבָה *makkabah* (Isa. xliv. 12); פַּטִּישׁ *pattish*, hammer (Isa. xli. 7); מַלְקָחַיִם *mal kachim*, pincers; and מַפֻּחַ *mappuach*, bellows (Jer. vi. 29); מַצְרֵף *matzreph*, crucible (Prov. xvii. 3); כּוּר *cur*, melting-furnace (Ezek. xxii. 18).

There are also allusions to various operations connected with the preparation of metals. 1. The smelting of metal was not only for the purpose of rendering it fluid, but in order to separate and purify the richer metal when mixed with baser minerals, as silver from lead, &c. (Isa. i. 25; comp. Plin. *Hist. Nat.* xxxvii. 47; Ezek. xxii. 18-20). The dross separated by this process is called סִיגִים *sigim*, although this word also applies to metal not yet purified from its dross. For the actual or chemical separation other materials were mixed in the smelting, such as alkaline salts, בּוֹר *bor* (Isa. i. 25); and lead (Jer. vi. 29; comp. Plin. *Hist. Nat.* xxxiii. 31). 2. The casting of images (Exod. xxv. 12; xxvi. 37; Isa. xl. 19); which are always of gold, silver, or copper. The casting of iron is not mentioned, and was perhaps unknown to the ancients (Hausmann, in *Commentatt. Soc. Goett.* iv. 53, sqq.; Müller, *Archäol.* p. 371). 3. The hammering of metal, and making it into broad sheets (Num. xvi. 38; Isa. xliv. 12; Jer. x.). 4. Soldering and welting parts of metal together (Isa. xli. 7). 5. Smoothing and polishing metals (1 Kings vii. 45). 6. Overlaying with plates of gold and silver and copper (Exod. xxv. 11-24; 1 Kings vi. 20; 2 Chron. iii. 5; comp. Isa. xl. 19). The execution of these different metallurgic operations appears to have formed three distinct branches of handicraft before the Exile; for we read of the blacksmith, by the name of the 'worker in iron' (חָרַשׁ בַּרְזֶל, Isa. xliv. 12); the brass-founder (1 Kings vii. 14); and the gold and silver smith (Judg. xvii. 4; Mal. iii. 2).

The invention of the metallurgic arts is in Scripture ascribed to Tubal-cain (Gen. iv. 22). In later times the manufacture of useful utensils and implements in metals seems to have been carried on to a considerable extent among the Israelites, if we may judge from the frequent allusions to them by the poets and prophets. But it does not appear that, in the finer and more elaborate branches of this great art, they made much, if any progress, during the flourishing times of their commonwealth; and it will be remembered that Solomon was obliged to obtain assistance from the Phœnicians in executing the metal work of the temple (1 Kings vii. 13).

The Hebrew workers in iron, and especially such as made arms, were frequently carried away by the different conquerors of the Israelites (1 Sam. xiii. 19; 2 Kings xxiv. 14, 15; Jer. xxiv. 1; xxix. 2); which is one circumstance among others to show the high estimation in which this branch of handicraft was anciently held.

METHUSAEL (מְתוּשָׁאֵל, *man of God;* Sept. Μαθουσάλα), son of Mehujael, of the race of Cain (Gen. iv. 18).

METHUSELAH (מְתוּשֶׁלַח, *man of the dust;* Sept. Μαθουσάλα), son of Enoch, and remarkable as being the oldest of those antediluvian patriarchs whose great ages are recorded (Gen. v. 21, 22). At the age of 187 years he begat Lamech (the father of Noah); after which he lived 782 years, making altogether 969 years [LONGEVITY].

MEZUZOTH (מְזוּזוֹת). This word is found in Exod. xii. 17, 22; Deut. vi. 9; and in other places, in all of which it signifies 'door-posts.' It has no other meaning in Scripture. In the texts now referred to, the word occurs in the injunction, 'Thou shalt never forget the laws of the Lord thy God; but shalt write them on the posts of thy house, and on thy gates.' This, contrary to most Christian interpreters, the Jews understand in the literal sense; and in this sense it might have been followed in the East, where it is at this day not unusual for the Moslems to inscribe on or over the gates, and on other parts of buildings, passages from their sacred book, the Koran. If therefore the Jews, before their dispersion, interpreted this precept literally, they probably applied it in the same manner. But when they came into western countries, where such was not the custom, and where ofttimes it might have proved inconvenient thus to point out their houses as those belonging to Jews, they adopted the custom of writing the precepts on scrolls of parchment, which they enclosed in a case and attached to the doors of their houses and chambers. To the scrolls thus enclosed the name of *mezuzoth* is, not very properly, given.

The *mezuzah* (singular) then is a piece of parchment, prepared for the purpose according to the rules laid down by the rabbins, on which, with ink prepared with the same care, are written the words containing the precept, namely, Deut. vi. 4-9; xi. 13-30. The parchment is then rolled up, with the ends of the lines inward; the Hebrew word שַׁדַּי *Shaddai*, 'Almighty,' is then inscribed on the outside, and the roll is put into a cane, or a cylindrical tube of lead, in which a hole is cut that the word שַׁדַּי may appear. This tube is fastened to the door-post by a nail at each end. The fixing of it is accompanied by the prayer, 'Blessed art thou, O Lord our God, King of the Universe, who hast commanded us to fix the Mezuzah!' The injunction in the law being in the plural number, 'upon the posts of thy house and of thy gates,' it is concluded that Mezuzoth ought to be fixed on all the doors of dwelling-houses, whether palaces, bed-rooms, kitchens, or cellars, on the doors of barns or storehouses, or on the gates of cities or towns. The Mezuzah is generally placed on the right side of the entrance, and those who are deemed the most devout Israelites often touch and kiss it as they pass. The synagogue being a house of prayer, and not of residence, requires no Mezuzoth. *Talm. Bab. tit. Sabbat.* 10; Buxtorf, *Synag. Jud.* pp. 482-487; Leo Modena, *Rites and Customs*, pt. i. ch. ii. § iii.; Allen's *Modern Judaism*, pp. 327-329.

399.

MICAH (מִיכָה; Sept. Μιχαίας), one of the twelve Minor Prophets, who, according to the in-

scription of the book, prophesied during the reigns of Jotham, Ahaz, and Hezekiah (B.C. 759-699), and was consequently contemporary with Isaiah. It is however doubtful whether any accurate separation of the particular prophecies of Micah can be ascertained. He was a native of Moresheth of Gath (i. 14, 15), so called to distinguish it from another town of the same name, in the tribe of Judah (Josh. xv. 44; 2 Chron. xiv. 9, 10). Micah is to be distinguished from a former prophet of the same name, called also Micaiah, mentioned in 1 Kings xxii. 8 (B.C. 897). The allusions to idolatry (vii. 13) and to Babylon (iv. 10) have induced Berthold to refer the prophecy of Micah to the time of the captivity; but De Wette truly observes that this supposition is unnecessary, as idolatry existed under Hezekiah (2 Kings xxiii.), and Babylon equally belonged to the kingdom of Assyria. Hartmann's attempt to regard the passage respecting Babylon as an interpolation (see *Micah neu übersetzt*) De Wette regards as even still more venturesome; nor had this writer the slightest authority for supposing that some only of the prophecies are Micah's, and that the work was compiled during the exile. In fact, the period of Micah's predictions is fully attested by Jeremiah (xxvi. 18, 19), where it is stated that Micah the Morasthite foretold the destruction of Jerusalem in the reign of Hezekiah. It is a matter of dispute whether the passage in ch. iv. 13 is borrowed from Isaiah, ii. 2, 4, or whether the passage in Micah is the original, if, indeed, both may not be derived from a common and more ancient source. Hengstenberg (*Christology*) strongly maintains the originality of this passage in Micah. De Wette (*Einleitung*) observes that we have the best reason for regarding the last years of Ahaz as the period of Micah's prophetic glory.

The contents of Micah's prophecy may be briefly summed up. It consists of two parts, the first of which terminates with chapter v. He commences with a majestic exordium (i. 2-4), in which is introduced a sublime theophany, the Lord descending from his dwelling-place to judge the nations of the earth, who are approaching to receive judgment. There is then a sudden transition to the judgment of Israel, whose captivity is predicted (chaps. i. and ii.). That of Judah follows, when the complete destruction of Jerusalem is foretold, with the expatriation of the Jews to Babylon, their future return, the glories of Sion, and the celebrity of its temple (iv. 1, 8, 9, 12), with the chastisement prepared for the oppressors of the Jews (ver. 13). After this, glorious wars are seen in perspective, attended with great slaughter (ch. v.); after many calamities a ruler is seen to arise from Bethlehem. An invasion of the Assyrians is predicted, to oppose which there will be no want of able leaders (v. 4-8). A new monarchy is beheld, attended with wars and destruction.

The second part, from this to the end, consists of an elegant dialogue or contestation between the Lord and his people, in which the corruption of their morals is reproved, and their chastisement threatened; but they are consoled by the promise of a return from their captivity.

Jahn (*Introd.*) points out the following predictions as contained in the prophet Micah. 1. The destruction of the kingdom of Israel, which was impending when the prophecy was delivered, and which was fulfilled in the taking of Samaria by Shalmaneser, in the sixth year of Hezekiah (2 Kings xvii.), and then that of the kingdom of Judah, with the destruction of Jerusalem (iii. 12; vii. 13). 2. The Babylonian captivity (iv. 10, 11; vii. 7, 8, 13). These predictions were delivered 150 years before the event, when the Chaldæans, by whom they were accomplished, were scarcely known as a people. 3. The return from the exile, with its happy effects, and the tranquillity enjoyed by the Jews under the Persian and Grecian monarchies, which referred to events from 200 to 500 years distant (iv. 18; vii. 11; xiv. 12). 4. The heroic deeds of the Maccabees, and their victories over the Syrians or Syro-Macedonians, called Assyrians in Micah v., as well as Zechariah x. 11 (iv. 13). 5. The establishment of the royal residence in Sion (iv. 8). 6. The birth and reign of the Messiah (v. 2). The three last prophecies, observes this learned writer, are more obscure than the others, by reason of the remote distance, in point of time, of their accomplishment, from the period of their being delivered.

There is no prophecy in Micah so interesting to the Christian as that in which the native place of the Messiah is announced. 'But thou, Bethlehem Ephratah, [though] thou be little among the thousands of Judah, [yet] out of thee shall he come forth unto me, [that is] to be ruler in Israel' (Eng. Authorized Version). It is thus translated by the Sept.: Καὶ σὺ Βηθλεὲμ οἶκος τοῦ Ἐφραθὰ, ὀλιγοστὸς εἶ τοῦ εἶναι ἐν χιλιάσιν Ἰούδα· ἐκ σοῦ μοι ἐξελεύσεται ἡγούμενος τοῦ εἶναι εἰς ἄρχοντα ἐν τῷ Ἰσραήλ:—'And thou, Bethlehem, house of Ephratah, although thou be least among the thousands of Judah, out of thee shall come unto me one that shall be a ruler of Israel.' The citation of this passage by the Evangelist differs both from the Hebrew and the Septuagint: Καὶ σὺ Βηθλεὲμ γῆ Ἰούδα, οὐδαμῶς ἐλαχίστη εἶ ἐν τοῖς ἡγεμόσιν Ἰούδα· ἐκ σοῦ γαρ ἐξελεύσεται ἡγούμενος, ὅστις ποιμανεῖ τὸν λαόν μου τὸν Ἰσραήλ:—'And thou, Bethlehem, [in] the land of Judah, art not the least among the princes of Judah: for out of thee shall come a governor, that shall rule [Gr. feed] my people Israel' (Matt. ii. 6). The difference, however, is but verbal. Some suppose that the negative (οὐδαμῶς) originally belonged to the Hebrew, and others to the Greek, while many read the Hebrew interrogatively, 'art thou little,' &c.? Eichhorn supposes that the Greek translator of St. Matthew's Gospel interchanged אַלְפֵי, *thousands*, with אַלֻּפֵי, *rulers*.

Of more importance is the application of the prophecy. It is evident that the Jews in the time of Jesus interpreted this passage of the birth-place of the Messiah (Matt. ii. 5; John vii. 41, 42). The later Rabbinical writers, however, such as Kimchi, Aben Ezra, Abarbanel, &c., have maintained that it had only an indirect reference to the birth-place of the Messiah, who was to be a descendant of David, a Bethlehemite, but not of necessity himself born in Bethlehem. Others, however, as David Ganz (*B. Zemach David*), expressly mention Bethlehem as the birth-place of the Messiah. The interpretation which considered this prophecy as intimating only that the

Messiah was to be a descendant of David, was that current among the Jews in the time of Theodoret, Chrysostom, Theophylact, and Euthymius Zigabenus, from whom we learn that it was maintained to have been fulfilled in Zerubbabel, the leader of the Jews on their return from Babylon, of which, and not of Bethlehem, he was a native. This interpretation was held among Christians by the celebrated Theodore of Mopsuestia (as we learn from his condemnation by the council at Rome under Pope Vigilius), and afterwards by Grotius (*Comment.*), who, however, regarded Zerubbabel as a type of Christ, and considered Christ's birth-place at Bethlehem as an outward representation of his descent from the family of David. 'Natus ex Bethlehemo Zorobabel recte dicitur, quod ex Davidis familiâ esset, quæ orta Bethlehemi.' Many of the moderns have been attached to this interpretation of the prophecy, referring it to the general idea of the Messiah rather than to Zerubbabel, while some among them have, after the example of some Jews, ventured to assert that the account of the birth of Christ at Bethlehem was not to be depended on. Some have asserted after Jerome (*Comm. in Mic.*), that the citation in Matt. ii. 6 is that of the Sanhedrim only, not of the Evangelist (Hengstenberg's *Christology*). Jahn (*Append. Hermeneut.*) observes that it is evident that the Jews in the time of Christ expected the Messiah's birth to take place at Bethlehem; and although he admits that the prophecy may be understood tropically in the sense applied to it by Grotius, he contends that the context will not admit of its applicability either to Hezekiah or any other monarch than the Messiah; nor is it possible to apply the prophecy fully and literally to any but Him who was not only of the house and lineage of David, but was actually born at Bethlehem, according to the direct testimony of both St. Matthew's and St. Luke's Gospels.

The style of Micah is sublime and vehement, in which respects he exceeds Amos and Hosea. De Wette observes that he has more roundness, fulness, and clearness in his style and rhythm than the latter prophet. He abounds in rapid transitions and elegant tropes, and piquant plays upon words. He is successful in the use of the dialogue, and his prophecies are penetrated by the purest spirit of morality and piety (see especially ch. vi. 6-8; and vii. 1-10.)

Micah is the third of the minor prophets according to the arrangement of the Septuagint, the sixth according to the Hebrew, and the fifth according to the date of his prophecies.

See, besides the works on the minor prophecies collectively in De Wette's *Introd.*, Pococke's *Commentary on Micah;* Groseschopf's *Micah Uebersetzt;* and Jahn's and Eichhorn's *Introductions.*—W. W.

2. MICAH. An Ephraimite, apparently contemporary with the elders who outlived Joshua. He secretly appropriated 1100 shekels of silver which his mother had saved; but being alarmed at her imprecations on the author of her loss, he confessed the matter to her, and restored the money. She then forgave him, and returned him the silver, to be applied to the use for which it had been accumulated. Two hundred shekels of the amount were given to the founder, as the cost or material of two teraphim, the one molten and the other graven; and the rest of the money served to cover the other expenses of the semi-idolatrous establishment which was formed in the house of Micah, of which a wandering Levite became the priest, at a yearly stipend; till the Danite army, on their journey to settle northward in Laish, took away both the establishment and the priest, which they afterwards maintained in their new settlement (Judg. xvii. 18) [Dan; Jonathan 2]. The establishments of this kind, of which there are other instances—as that of Gideon at Ophrah—were, although most mistakenly, formed in honour of Jehovah, whom they thus sought to serve by means of a local worship, in imitation of that at Shiloh. This was in direct contravention of the law, which allowed but one place of sacrifice and ceremonial service; and was something of the same kind, although different in extent and degree, as the service of the golden calves, which Jeroboam set up, and his successors maintained, in Dan and Bethel. The previous existence of Micah's establishment in the former city no doubt pointed it out to Jeroboam as a suitable place for one of his golden calves.

MICAIAH (מִיכָיְהוּ, *who as Jehovah?* Sept. Μιχαίου), a prophet of the time of Ahab. He was absent from the mob of false prophets who incited the kings of Israel and Judah to march against the Syrians in Ramoth-gilead; for Ahab, having been offended by his sincerity and boldness, had not called for him on this occasion. But he was sent for at the special desire of Jehoshaphat; and as he declared against the enterprise, which the other prophets encouraged, Ahab commanded him to be imprisoned, and allowed only 'bread and water of affliction' till he returned from the wars in peace. To which the prophet ominously answered, 'If thou return at all in peace, then the Lord hath not spoken by me' (1 Kings xxii. 8-28). The event corresponded with this intimation [Ahab]; but we have no further information concerning the prophet.

2. MICAIAH. One of the princes whom Jehoshaphat sent to 'teach in the cities of Judah' (2 Chron. xviii. 7).

3. MICHAIAH, son of Gemariah, who, after having heard Baruch read the terrible predictions of Jeremiah in his father's hall, went, apparently with good intentions, to report to the king's officers what he had heard (Jer. xxxvi. 11-13).

MICHAEL (מִיכָאֵל, *who as God?* Sept. Μιχαήλ), the name given to one of the chief angels, who, in Dan. x. 13-21, is described as having special charge of the Israelites as a nation; and in Jude 9, as disputing with Satan about the body of Moses, in which dispute, instead of bringing against the arch-enemy any railing accusation, he only said, 'The Lord rebuke thee, O Satan!' Again, in Rev. xii. 7-9, Michael and his angels are represented as warring with Satan and his angels in the upper regions (ἐν τῷ οὐρανῷ), from which the latter are cast down upon the earth. This is all the reference to Michael which we find in the Bible.

On the authority of the first of these texts the Jews have made Michael not only one of the 'seven' archangels, but the chief of them; and on the authority of all three the Christian church has been disposed to concur in this impression.

The Jews regard the archangels as being such, not simply as a class by themselves, but as respectively the chiefs of the several classes into which they suppose the angels to be divided; and of these classes Michael is the head of the first, and therefore chief of all the archangels (*Sepher Othioth*, fol. 16).

The passages in Daniel and Revelations must be taken as symbolical, and in that view offer little difficulty. The allusion in Jude 9 is more difficult to understand, unless, with Vitringa, Lardner, Macknight, and others, we regard it also as symbolical; in which case the dispute referred to is that indicated in Zech. iii. 1; and 'the body of Moses' as a symbolical phrase for the Mosaical law and institutions [JUDE]. A comparison of Jude 9 with Zech. iii. 1 gives much force and probability to this conjecture.

MICHAL (מִיכַל, *who as God?* Sept. Μελχόλ), youngest daughter of king Saul (1 Sam. xiv. 49). She became attached to David, and made no secret of her love; so that Saul, after he had disappointed David of the elder daughter [MERAB], deemed it prudent to bestow Michal in marriage upon him (1 Sam. xviii. 20-28). Saul had hoped to make her the instrument of his designs against David, but was foiled in his attempt through the devoted attachment of the wife to her husband. Of this a most memorable instance is given in 1 Sam. xix. 11-17. When David escaped the javelin of Saul he retired to his own house, upon which the king set a guard over-night, with the intention to slay him in the morning. This being discovered by Michal, she assisted him to make his escape by a window, and afterwards amused the intended assassins under various pretences, in order to retard the pursuit. 'She took an image (*teraph*), and laid it in the bed, and put a pillow of goats' hair for a bolster, and covered it with a cloth.' This she pretended was David, sick in bed; and it was not until Saul had commanded him to be brought forth even in that state, that the deception was discovered. Michal then pretended to her father that David had threatened her with death if she did not assist his escape. Saul probably did not believe this; but he took advantage of it by cancelling the marriage, and bestowing her upon a person named Phalti (2 Sam. xxv. 44). David, however, as the divorce had been without his consent, felt that the law (Deut. xxiv. 4) against a husband taking back a divorced wife could not apply in this case: he therefore formally reclaimed her of Ish-bosheth, who employed no less a personage than Abner to take her from Phalti, and conduct her with all honour to David. It was under cover of this mission that Abner sounded the elders of Israel respecting their acceptance of David for king, and conferred with David himself on the same subject at Hebron (2 Sam. iii. 12-21). As this demand was not made by David until Abner had contrived to intimate his design, it has been supposed by some that it was contrived between them solely to afford Abner an ostensible errand in going to Hebron; but it is more pleasant to suppose that, although the matter happened to be so timed as to give a colour to this suspicion, the demand really arose from David's revived affection for his first wife and earliest love.

The re-union was less happy than might have been hoped. On that great day when the ark was brought to Jerusalem, Michal viewed the procession from a window, and the royal notions she had imbibed were so shocked at the sight of the king not only taking part in, but leading, the holy transports of his people, that she met him on his return home with a keen sarcasm on his undignified and unkingly behaviour. This ill-timed sneer, and the unsympathising state of feeling which it manifested, drew from David a severe but not unmerited retort; and the Great King, in whose honour David incurred this contumely, seems to have punished the wrong done to him, for we are told that '*therefore* Michal, the daughter of Saul, had no child to the day of her death' (2 Sam vi. 16-23). It was thus, perhaps, as Abarbanel remarks, ordered by Providence that the race of Saul and David should not be mixed, and that no one deriving any apparent right from Saul should succeed to the throne.

MICHMAS, or MICHMASH (מִכְמָס, מִכְמָשׂ, מִכְמָשׁ; Sept. Μαχμάς), a town of Benjamin (Ezra ii. 27; Neh. xi. 31; comp. vii. 31), east of Beth-aven (1 Sam. xiii. 5), and south from Migron, on the road to Jerusalem (Isa. x. 28). The words of 1 Sam. xiii. 2, xiv. 4, and Isa. x. 29, show that at Michmas was a pass where the progress of a military body might be impeded or opposed. It was perhaps for this reason that Jonathan Maccabæus fixed his abode at Michmas (1 Macc. ix. 73); and it is from the chivalrous exploit of another hero of the same name, the son of Saul, that the place is chiefly celebrated (1 Sam. xiii., xiv., 4-16). Eusebius describes Michmas as a large village nine R. miles from Jerusalem, on the road to Ramah (*Onomast. s. v.* Μαχμά). Travellers have usually identified it with Bir or El-Bireh; but Dr. Robinson (*Researches*, ii. 117) recognises it in a place still bearing the name of Mukhmas, at a distance and position which correspond well with these intimations. This is a village situated upon a slope to the north of a valley called Wady es-Suweinit. It is small, and almost desolate, but bears marks of having been once a place of strength and importance. There are many foundations of hewn stones, and some columns lie among them. The valley es-Suweinit, steep and precipitous, is probably the 'passage of Michmash' mentioned in Scripture. In it, says Dr. Robinson, 'just at the left of where we crossed, are two hills of a conical, or rather spherical, form, having steep rocky sides, with small wadys running up between each so as almost to isolate them. One of them is on the side towards Jeba (Gibeah), and the other towards Mukhmas. These would seem to be the two rocks mentioned in connection with Jonathan's adventure (1 Sam. xiv. 4, 5). They are not, indeed, so "sharp" as the language of Scripture would seem to imply; but they are the only rocks of the kind in this vicinity. The northern one is connected towards the west with an eminence still more distinctly isolated.'

MIDIAN, fourth son of Abraham by Keturah, and progenitor of the Midianites (Gen. xxv. 2).

MIDIANITES (מִדְיָנִים; Sept. Μαδιανίται, Μαδιηναῖοι), a tribe of people descended from

Abraham's son Midian. His descendants must have settled in Arabia, and engaged in trade at an early period, if we identify them with those who in the time of Jacob appear, along with the Ishmaelites, as merchants travelling from Gilead to Egypt, and who, having in their way bought Joseph from his brethren, sold him in the latter country (Gen. xxxvii. 28, 36). It is, however, very difficult to conceive that the descendants of a son of Abraham, born so many years after Isaac, had become a tribe of people at the time when the descendants of Isaac himself were so few. One is therefore much inclined to suppose that these Midianites were different and distinct from those descended from Abraham's son; and there appears the more ground for this when at a later period we find two tribes of Midianites, different in locality and character, and different in their feelings towards the Israelites. If this distinction be admitted, then it would be necessary to seek the earlier Midianites in those dwelling about the eastern arm of the Red Sea, among whom Moses found refuge when 'he fled from Egypt,' and whose priest or sheikh was Jethro, who became the father-in-law of the future lawgiver (Exod. iii. 1; xviii. 5; Num. x. 29). These, if not of Hebrew, would appear to have been of Cushite origin, and descended from Midian the son of Cush. It is certain that some Cushite tribes did settle in and on the outskirts of Arabia, which was therefore called Cush, in common with other districts occupied by Cushite tribes; and, under this view, it is observable that the wife of Moses is called a Cushite (Num. xii. 1), and that, in Hab. iii. 7, the Midianites are named with the Cushites; for these are undoubtedly the Midianites who trembled for fear when they heard that the Israelites had passed through the Red Sea. We do not again meet with these Midianites in the Jewish history, but they appear to have remained for a long time settled in the same quarter, where indeed is the seat of the only Midianites known to Oriental authors. The Arabian geographers of the middle age (Edrisi, Ibn el Wardi, and Abulfeda) speak of the ruins of an ancient town called Madian on the eastern side of the Red Sea, where was still to be seen the well at which Moses watered the flocks of Shoaib, or Jethro. This was doubtless the same as Modiana, a town in the same district, mentioned by Ptolemy (*Geog.* v. 19); and Niebuhr conjectures that the site is now occupied by Moilah, a small town or village on the Red Sea, on the Hadj road from Egypt (*Descript. Arab.* p. 377); but, as Rosenmüller remarks (*Bibl. Geog.* iii. 224), this place is too far south to be identified with the Midian of Jethro.

The other Midianites, undoubtedly descended from Abraham and Keturah, occupied the country east and south-east of the Moabites, who were seated on the east of the Dead Sea; or rather, perhaps, we should say that, as they appear to have been a semi-nomade people, they pastured their flocks in the unsettled country beyond the Moabites, with whom, as a kindred, although more settled tribe, they seem to have been on the most friendly terms, and on whose borders were situated those 'cities and goodly castles which they possessed' (Num. xxxi. 10). It will, in fact, much contribute to the better understanding of the passages in which the Midianites appear, if it be understood that they were still in a great degree a nomade people, extending their wanderings far beyond any limits to which we might confine their territorial possessions. These Midianites, like the other tribes and nations who had a common origin with them, were highly hostile to the Israelites. In conjunction with the Moabites, they designedly enticed them to idolatry as they approached Canaan (Num. xxxi. 2, 5; xxv. 6, 14-18); on which account Moses attacked them with a strong force, killed all their fighting men, including their five princes or emirs, and made the women and children captives (Num. xxxi.). The account of the spoil confirms the view which we have taken of the semi-nomade position of the Midianites—namely, 675,000 sheep, 72,000 beeves, 61,000 asses, 32,000 persons. This was only the 'prey,' or live stock; but besides this there was a great quantity of 'barbaric pearl and gold,' in the shape of 'jewels of gold, chains, and bracelets, rings, ear-rings, and tablets.'

Some time after the Israelites obtained possession of Canaan, the Midianites had become so numerous and powerful, that, for seven successive years, they made inroads into the Hebrew territory in the time of harvest, carrying off the fruits and cattle, and desolating the land. At length Gideon was raised up as the deliverer of his country, and his triumph was so complete that the Israelites were never more molested by them (Judg. vi. 1-7; vii.; viii.). Their mode of invasion in a vast horde for this purpose, and at the time of in-gathering, corroborates the view we have taken of the essentially nomade character of these Midianites; and, in the account of the spoil, we have an indication of 'camels,' which were alone necessary in addition to the former list to stamp their character (Judg. viii. 26; comp. Isa. lx. 6). Here also there is the same display of personal ornament which was noticed on the former occasion:—'Golden ear-rings, ornaments, collars, purple raiment that was on the kings of Midian, and chains that were about their camels' necks.' To this victory there are subsequent allusions in the sacred writings (Ps. lxxxiii. 10, 12; Isa. ix. 4; x. 6); but the Midianites do not again appear in sacred or profane history.

MIGDOL (מִגְדּוֹל; Sept. Μάγδωλος, Μαγδωλόν), a place between which and the Red Sea the Israelites were commanded to encamp on leaving Egypt (Exod. xiv. 2; Num. xxxiii. 7) [Exodus]. The name, which means *a tower*, appears to indicate a fortified place. In Jer. xliv. 1; xlvi. 14, it occurs as a city of Egypt, and it would seem to have been the last town on the Egyptian frontier, in the direction of the Red Sea: hence 'fromMigdol to Syene,' in Ezek. xxix. 10; xxx. 6.

MIGRON (מִגְרוֹן; Sept. Μαγδών), a town which, from the historical indications, must have been south or south-west of Ai, and north of Michmas (Isa. x. 28). From Michmas northward a narrow valley extends out of and at right angles with that which has been identified as the pass of Michmas [Michmas]. The town of Migron seems to have been upon and to have commanded the pass through this valley, but its precise situation has not been determined. Saul was stationed at the further side of Gibeah, 'under a pomegranate-tree

which is by Migron' (1 Sam. xiv. 2), when Jonathan performed his great exploit at Michmas; and this is to be explained on the supposition that Migron was on the border, towards Michmas, of the district to which Gibeah gave its name.

MILCOM. [Moloch.]

MILE (*μίλιον*). This word is only mentioned in Matt. v. 41, where Christ says, 'If any one compel thee to go with him one mile, go with him two.' The mile was originally (as its derivation from *mille*, 'a thousand,' implies) a Roman measure of 1000 geometrical paces *(passus)* of 5 feet each, and was therefore equal to 5000 Roman feet. Taking the Roman foot at 11·6496 English inches, the Roman mile would be 1618 English yards, or 142 yards less than the English statute mile. By another calculation, in which the foot is taken at 11·62 inches, the mile would be little more than 1614 yards. The number of Roman miles in a degree of a large circle of the earth is very little more than 75. The most common Latin term for the mile is *mille passuum*, or only the initials M.P.; sometimes the word *passuum* is omitted. The Roman mile contained 8 Greek stadia (see Smith's *Dict. of Greek and Rom. Antiq.*, art. 'Milliare'). The Greek stade hence bore the same relation to the Roman mile which the English furlong does to the English mile: and it is indeed usual with the earlier writers on Biblical geography to translate the Greek 'stade' into the English 'furlong,' in stating the measurements of Eusebius and Jerome. As the measurements of these writers are often cited in the present work, it is necessary to remember that their mile is always the Roman mile.

MILETUS (*Μίλητος*), a city and seaport of Ionia in Asia Minor, about thirty-six miles south of Ephesus. St. Paul touched at this port on his voyage from Greece to Syria, and delivered to the elders of Ephesus, who had come to meet him there, a remarkable and affecting address (Acts xx. 15-38). Miletus was a place of considerable note, and the ancient capital of Ionia and Caria. It was the birth-place of several men of renown—Thales, Timotheus, Anaximander, Anaximenes, Democritus (Pomp. Mela, i. 17; Diog. Laert. *Vit. Philosoph.* pp. 15, 88, 89, 650). Ptolemy (*Geog.* v. 2) places Miletus in Caria by the sea, and it is stated to have had four havens, one of which was capable of holding a fleet. It was noted for a famous temple of Apollo, the oracle of which is known to have been consulted so late as the fourth century (Apollodorus, *De Orig. Deor.* iii. 130). There was, however, a Christian church in the place; and in the fifth, seventh, and eighth centuries we read of bishops of Miletus, who were present at several councils (Magdeburg, *Hist. Eccles.* ii. 192; iv. 86; v. 3; vii. 254; viii. 4). The city fell to decay after its conquest by the Saracens, and is now in ruins, not far from the spot where the Meander falls into the sea. The site bears, among the Turks, the name of Melas.

Some take the Miletus where Paul left Trophimus sick (2 Tim. iv. 20) to have been in Crete, and therefore different from the above; but there seems no need for this conclusion.

MILK. The Hebrew word for milk, חָלָב *chalab*, is from the same root as חֵלֶב *cheleb*, 'fatness,' and is properly restricted to new milk, there being a distinct term, חֶמְאָה *chemah*, for milk when curdled. Milk, and the preparations from it, butter and cheese, are often mentioned in Scripture. Milk, in its fresh state, appears to have been used very largely among the Hebrews, as is usual among people who have much cattle, and yet make but sparing use of their flesh for food. The proportion which fresh milk held in the dietary of the Hebrews, must not, however, be measured by the comparative frequency with which the word occurs; because, in the greater number of examples, it is employed figuratively, to denote great abundance, and in many instances it is used as a general term for all or any of the preparations from it.

In its figurative use, the word occurs sometimes simply as the sign of abundance (Gen. xlix. 12; Ezek. xxv. 4; Joel iii. 18, &c.); but more frequently in combination with honey—'milk and honey' being a phrase which occurs about twenty times in Scripture. Thus a rich and fertile soil is described as a 'land flowing with milk and honey:' which, although usually said of Palestine, is also applied to other fruitful countries, as Egypt (Num. xvi. 13). This figure is by no means peculiar to the Hebrews, but is frequently met with in classical writers. A beautiful example occurs in Euripides (*Bacch.* 142). Hence its use to denote the food of children. Milk is also constantly employed as a symbol of the elementary parts or rudiments of doctrine (1 Cor. iii. 2; Heb. v. 12, 13); and from its purity and simplicity, it is also made to symbolize the unadulterated word of God (1 Pet. ii. 2; comp. Isa. lv. 1).

In reading of milk in Scripture, the milk of cows naturally presents itself to the mind of the European reader; but in Western Asia, and especially among the pastoral and semi-pastoral people, not only cows, but goats, sheep, and camels, are made to give their milk for the sustenance of man. That this was also the case among the Hebrews, may be clearly inferred even from the slight intimations which the Scriptures afford. Thus we read of 'butter of kine, and milk of sheep' (Deut. xxxii. 14); and in Prov. xxvii. 27, the emphatic intimation, 'Thou shalt have goats' milk for food,' seems to imply that this was considered the best for use in the simple state. 'Thirty milch camels' were among the cattle which Jacob presented to his brother Esau (Gen. xxxii. 15), implying the use of camels' milk.

The word for curdled milk (חמאה) is always translated 'butter' in the Authorized Version. It seems to mean both butter and curdled milk, but most generally the latter; and the context will, in most cases, suggest the distinction, which has been neglected by our translators. It was this curdled milk, highly esteemed as a refreshment in the East, that Abraham set before the angels (Gen. xviii. 8), and which Jael gave to Sisera, instead of the water which he asked (Judg. v. 25). In this state milk acquires a slightly inebriating power, if kept long enough. Isaiah vii. 22, where it is rendered 'butter,' is the only text in which the word is coupled with 'honey,' and there it is a sign of scarcity, not of plenty, as when honey is coupled with fresh milk. It means that there being no fruit or grain, the remnant would have to live on milk and honey; and, perhaps, that milk itself would be so scarce, that it would be needful to use it with economy;

and hence to curdle it, as fresh milk cannot be preserved for chary use. Although, however, this word properly denotes curdled milk, it seems also to be sometimes used for milk in general (Deut. xxxii. 14; Job xx. 15; Isa. vii. 15).

The most striking Scriptural allusion to milk is that which forbids a kid to be seethed in its mother's milk, and its importance is attested by its being thrice repeated (Exod. xxiii. 19; xxxiv. 26; Deut. xiv. 21). There is, perhaps, no precept of Scripture which has been more variously interpreted than this, and we may state the most remarkable views respecting it:—1. That it prohibits the eating of the fœtus of the goat as a delicacy: but there is not the least evidence that the Jews were ever attached to this disgusting luxury. 2. That it prevents the kid to be killed till it is eight days old, when, it is said, it might subsist without the milk of its mother. 3. This ground is admitted by those who deduce a further reason from the fact, that a kid was not, until the eighth day, fit for sacrifice. But there appears no good reason why a kid should be described as 'in its mother's milk,' in those days, more than in any other days of the period during which it is suckled. 4. Others, therefore, maintain that the eating of a sucking kid is altogether and absolutely prohibited. But a goat suckles its kid for three months, and it is not likely that the Jews were so long forbidden the use of it for food. No food is forbidden but as unclean, and a kid ceased to be unclean on the eighth day, when it was fit for sacrifice; and what was fit for sacrifice could not be unfit for food. 5. That the prohibition was meant to prevent the dam and kid from being slain at the same time. But this is forbidden with reference to the goat and other animals in express terms, and there seems no reason why it should be repeated in this remarkable form with reference to the goat only. 6. Others understand it literally, as a precept designed to encourage humane feelings. But, as Michaelis asks, how came the Israelites to hit upon the strange whim of boiling a kid in milk, and just in the milk of its own mother? 7. Still, understanding the text literally, it is possible that this was not a common act of cookery, but an idolatrous or magical rite. Maimonides, in his *More Nevochim*, urges this opinion. He says, 'Flesh eaten with milk, or in milk, appears to me to have been prohibited, not only because it affords gross nourishment, but because it savoured of idolatry, some of the idolaters probably doing it in their worship, or at their festivals; and I am the more inclined to this opinion from observing that the law, in noticing this practice, does so twice, immediately after having spoken of the three great annual feasts (Exod. xxiii. 17, 19; xxxiv. 23, 26). "Three times in the year all thy males shall appear before the Lord God. . . . . Thou shalt not seethe a kid in its mother's milk." As if it had been said, "When ye appear before me in your feasts, ye shall not cook your food after the manner of the idolaters, who are accustomed to this practice." This reason appears to me of great weight, although I have not yet been able to find it in the Zabian books.' This is confirmed by an extract which Cudworth (*Discourses concerning the True Notion of the Lord's Supper*, p. 30) gives from an ancient Karaïte commentary on the Pentateuch. 'It was a custom of the ancient heathen, when they had gathered in all their fruits, to take a kid, and boil it in the dam's milk, and then in a magical way to go about and besprinkle with it all their trees, and fields, and gardens, and orchards, thinking that by this means they should make them fructify, and bring forth more abundantly the following year.' Some such rite as this is supposed to be the one interdicted by the prohibition. This opinion is supported by Spencer (*De Legibus Hebr.* ii. 9, sec. 2), and has been advocated by Le Clerc, Dathe, and other able writers. It is also corroborated by the addition in the Samaritan copy, and in some degree by the Targum. The former has 'For he who doth this is like a man who sacrificeth an abomination, and it is a trespass against the God of Jacob:' and the latter, 'O my people, house of Israel, it is not lawful for you to boil or eat flesh and milk mixed together, lest my wrath be enkindled, and I boil your products, corn and straw, together.' 8. Michaelis, however, advances a quite new opinion of his own. He takes it for granted that בשל, rendered 'seethe,' may signify to roast as well as to boil, which is hardly disputable; that the kid's mother is not here limited to the real mother, but applies to any goat that has kidded; that חלב here denotes not *milk* but *butter;* and that the precept is not restricted to kids, but extends not only to lambs (which is generally granted), but to all other not forbidden animals. Having erected these props, Michaelis builds upon them the conjecture, that the motive of the precept was to endear to the Israelites the land of Canaan, which abounded in *oil*, and to make them forget their Egyptian *butter*. Moses, therefore, to prevent their having any longing desire to return to that country, enjoins them to use oil in cooking their victuals, as well as in seasoning their sacrifices (*Mosaisches Recht*, pt. iv. p. 210). This is ingenious, but it is open to objection. The postulates cannot readily be granted; and if granted, the conclusion deduced from them is scarcely just, seeing that, as Geddes remarks, 'there was no need nor temptation for the Israelites to return to Egypt on account of its butter, when they possessed a country that flowed with milk and honey' (*Critical Remarks*, p. 257).

Butter is not often mentioned in Scripture, and even less frequently than our version would suggest; for, as already intimated, the word חמאה *chemah*, must sometimes be understood of curdled milk. Indeed, it may be doubted whether it denotes butter in any place besides Deut. xxxii. 14, 'butter of kine,' and Prov. xxx. 33, 'the churning of milk bringeth forth butter,' as all the other texts will apply better to curdled milk than to butter. Butter was, however, doubtless, much in use among the Hebrews, and we may be sure that it was prepared in the same manner as at this day among the Arabs and Syrians. The milk is put into a large copper pan over a slow fire, and a little *leben* or sour milk (the same as the curdled milk mentioned above), or a portion of the dried entrails of a lamb, is thrown into it. The milk then separates, and is put into a goat-skin bag, which is tied to one of the tent poles, and constantly moved backwards and forwards for two hours. The buttery substance then coagulates, the water is pressed out, and the butter put

into another skin. In two days the butter is again placed over the fire, with the addition of a quantity of *burgoul* (wheat boiled with leaven, and dried in the sun), and allowed to boil for some time, during which it is carefully skimmed. It is then found that the burgoul has precipitated all the foreign substances, and that the butter remains quite clear at the top. This is the process used by the Bedouins, and it is also the one employed by the settled people of Syria and Arabia. The chief difference is, that in making butter and cheese the townspeople employ the milk of cows and buffaloes, whereas the Bedouins, who do not keep these animals, use that of sheep and goats. The butter is generally white, of the colour and consistence of lard, and is not much relished by English travellers. It is eaten with bread in large quantities by those who can afford it, not spread out thinly over the surface, as with us, but taken in mass with the separate morsels of bread.

Cheese has been noticed under its proper head.

MILL (רֶחַיִם; Sept. μύλη). The mill for grinding corn had not wholly superseded the mortar for pounding it in the time of Moses. The mortar and the mill are named together in Num. xi. 8. But fine meal, that is, meal ground or pounded fine, is mentioned so early as the time of Abraham (Gen. xviii. 6): hence mills and mortars must have been previously known. The mill common among the Hebrews differed little from that which is in use to this day throughout Western Asia and Northern

400.

Africa. It consisted of two circular stones two feet in diameter, and half a foot thick. The lower is called the 'nether millstone,' פלח תחתית Job xli. 16 (24), and the upper the 'rider,' רכב (Judg. ix. 53; 2 Sam. xi. 21). The former was usually fixed to the floor, and had a slight elevation in the centre, or in other words, was slightly convex in the upper surface. The upper stone had a concavity in its under surface fitting to, or receiving, the convexity of the lower stone. There was a hole in the top, through which the corn was introduced by handfuls at a time. The upper stone had an upright stick fixed in it as a handle, by which it was made to turn upon the lower stone, and by this action the corn was ground, and came out at the edges. As there were neither public mills nor bakers, except the king's (Gen. xl. 2; Hos. vii. 4-8), each family possessed a mill; and as it was in daily use, it was made an infringement of the law for a person to take another's mill or mill-stone in pledge (Deut. xxiv. 6). On the second day, in warm climates, bread becomes dry and insipid; hence the necessity of baking every day, and hence also the daily grinding at the mills early in the morning. The operation occasions considerable noise, and its simultaneous performance in a great number of houses or tents forms one of the sounds as indicative of an active population in the East, as the sound of wheel carriages is in the cities of the West. This sound is alluded to in Scripture (Jer. xxv. 10; Rev. xviii. 22, 23). The mill was, as now, commonly turned by two persons, usually women, and these, the work being laborious, the lowest maid-servants in the house. They sat opposite each other. One took hold of the mill-handle, and impelled it half way round; the other then seized it, and completed the revolution (Exod. xi. 5; Job xxxi. 10, 11; Isa. xlvii. 2; Matt. xxiv. 41). As the labour was severe and menial, enemies taken in war were often condemned to perform it (Judg. xvi. 21; Lam. v. 13). (Jahn, *Biblisches Archæol.* ix. 139.) It will be seen that this millstone does not materially differ from the Highland *quern;* and is, indeed, an obvious resource in those remote quarters, where a population is too thin or too scattered to afford remunerative employment to a miller by trade. In the East this trade is still unknown, the hand-mill being in general and exclusive use among the corn-consuming, and the mortar among the rice-consuming, nations. [Bread.]

MILLENNIUM. This word is not found in Scripture; but as it refers to ideas supposed to be founded in Scripture, a slight notice of it is required. The word denotes the term of a thousand years, and, in a theological sense, that thousand years mentioned in Rev. xx. 2, 3, 4, 6; during which Satan is there described as being bound, Christ as reigning triumphant, and the saints as living and reigning with him. The doctrine involved in this view is usually called Millennarianism, but in ecclesiastical history more usually *Chiliasm*, from the Greek word χίλιοι, 'a thousand.' As the world was made in six days, and as, according to Ps. xc. 4, 'a thousand years are as one day' in the sight of God, so it was thought the world would continue in the condition in which it had hitherto been for 6000 years; and as the Sabbath is a day of rest, so will the seventh period of a thousand years consist of this millennial kingdom, as the close of the whole earthly state.

The Jews supposed that the Messiah at his coming would reign as king upon the earth, and would reside at Jerusalem, the ancient royal city. The period of his reign they thought would be very long, and it was therefore put

down as a thousand years, which was at first understood only as a round number. This period was conceived by the Jews as a sort of golden age to the earth, and every one formed such a picture of it as agreed with his own disposition, and with the views concerning the highest felicity which were dictated by the degree of intellectual and moral culture to which he had attained. With many these views were very low, being confined to sensual delights, while others entertained better and more pure conceptions of that happy time (Wetstein, *Comment. in Rev.* xxii. 2; Knapp, *Christ. Theolog.*, translated by Leonard Woods, Jun. D.D., § 154).

This notion was taken up by many of the Judaizing Christians: Jesus had not yet appeared as an earthly king, and these persons were unwilling to abandon an expectation which seemed to them so important. They therefore allowed themselves to hope for a second advent of Christ to establish an earthly kingdom, and to this they transferred most if not all of that which in their unconverted state they had expected of the first. The apostles generally seem to have entertained this notion till after the ascension of Christ and the outpouring of the Holy Spirit, whereby they were instructed in the higher verities and mysteries of the Gospel: but that they then abandoned it, and expected no other coming of Christ than that at the judgment of the world, appears clear from 1 Cor. xv. and other passages. The fact that these Jewish notions had taken deep root in the minds of many Christians, even in the apostolical age, is however manifest from 1 Thess. iv. 13, sq. v., and 2 Thess. ii.

From this explanation, Eusebius must be understood with some limitation, when he alleges that the doctrine 'took its rise from Papias (a disciple of St. John), a man of slender judgment; but the antiquity of the man prevailed with many to be of that opinion, particularly with Irenæus' (*Hist. Eccles.* iii. 39). This seems to mean, not that Papias was the first to entertain the opinion, but the first to advance and advocate it in writing. It, however, occurs in the Epistle of Barnabas (ch. xv.), which, whatever view be formed of its genuineness, is evidence for the opinions of the age in which it was written. In the second century the opinion seems to have been all but universally received in the orthodox churches, and is as plainly produced in the writings of Justin Martyr, Irenæus, and Tertullian, as afterwards in those of Cyprian and Lactantius.

Perhaps the most satisfactory view of the opinions on this subject which many sincere, pious, and even well-instructed early Christians deemed themselves warranted in entertaining, is that which Semisch has collected out of the writings of Justin Martyr. After the lapse of the appointed time, which the prophet Daniel had foretold, Justin expected the visible return of Christ to earth. The prophets, he affirms, foretold two advents (*παρουσίαι*). One had already taken place. In that Christ appeared as a sufferer, in a mean and despised form, dishonoured, and at last crucified. It will be otherwise at his second appearing. Christ will then visit the earth in splendour and glory, on the clouds of heaven, and surrounded by the angelic hosts, as the judge of mankind. In the very place where he was crucified, his murderers will recognise him whom they pierced, and all the tribes shall mourn, tribe by tribe, the men apart, and the women apart (*Apol.* i. 52. p. 74; *Dial. c. Tryph.* xxxi. p. 128: xl. p. 137). But before this advent takes place Elias will come (*Dial. c. Tryph.* xlix. p. 145), agreeably to the prophecy in Mal. iv. 5; also the man of apostacy and iniquity, who will utter blasphemies against the Most High, and commit outrages against the Christians, must precede the re-appearance of the Son of Man. This will soon happen, for already the adversary is at the door (*Dial. c. Tr.* xxxii. p. 129). The immediate object of this return of Christ is the erection of the Millennial kingdom (*Dial.* li. 147). Christ, Justin says, will come again, in order to make a new heaven and new earth, to reign as king over Salem, and to shine in Jerusalem as an unchangeable light. The fallen city will be restored, changed, and beautified; all the saints, that is, believing Christians, will rise from the dead, and be assembled in Jerusalem and the Holy Land, in order to take possession of it, there to receive the eternal and unchangeable blessings promised to them, and to rejoice in communion with Christ. Justin dwells with deep emotion on this hope. It was in his esteem a sacred fire, at which he kindled afresh his Christian faith and practice. That this hope (in its pure millennarian character and extent) might possibly be vain, never entered his thoughts. He believed that it was supported by Scripture. He expressly appealed to the New Testament Apocalypse, and from such passages in the Old Testament as Isa. lxv. 22 (in connection with Gen. ii. 17, and v. 5, and Ps. xc. 4), he deduced the millennial period (*Dial.* lxxxi. 178 sq.). How could he doubt it? As to the specific mode in which he conceived that hope, he held the mean between the gross materialism with which the Ebionites (Jerome, *Comment. in Jes.* lxv. 20; lxvi. 20; *in Zech.* xiv. 9), Papias (*Adv. Hæres.* v. 33; Euseb. *Hist. Eccles.* iii. 39), Irenæus (*Adv. Hæres.* v. 53), and Lactantius (*Instit. Divin.* vii. 14) explained it; and the spiritualizing in which Barnabas (*Epist.* c. 15) and Tertullian (*Adv. Marc.* iii. 24) indulged. He certainly expected physical enjoyments, and believed that Christ would eat and drink with the members of his kingdom (*Dial. c. Tr.* li. 147). But he denied the continuance of the sexual functions, being assured from Luke xx. 34, that those who rose again would 'neither marry nor be given in marriage, but be as the angels' (*Dial.* li. p. 157); and depicted the state of the elect under the personal reign of Christ as one of blissful unchangeableness, repose, and exemption from pain. Thus he says, 'At his glorious advent Christ will in every way confound those who have hated him and unrighteously apostatized from him; but his own people he will bring to enjoy repose, and fulfil all their expectations' (*Dial.* cxxi. p. 214). And in another passage, 'Whoever is faithful to the doctrine of Jesus, him will Christ raise from the dead at his second advent, and make him immortal, unchangeable, and free from all sorrow' (*Dial.* lxix. p. 168). At the close of the thousand years of the personal reign, to enjoy which the saints only were to be raised, Justin expected that the general and final resurrection of all the dead would take place; but this being the term of the millennial

period we need not proceed with him further (Semisch, *Justin Martyr, his Life, Writings, and Opinions*, translated by J. E. Ryland, Edinb. 1843, ii. 370-376).

This millennial doctrine may be regarded as generally prevalent in the second century. Origen, in the third century, was the first who wrote in opposition to it, and who gave a different and allegorical interpretation of the texts of Scripture on which the Chiliasts rested their opinion. The anti-materialism of the Alexandrian school necessarily led to this opposition. Clement does not once allude to it, and Origen strenuously opposed it. And this opposition was effectual; for Origen's pupil, Dionysius (A.D. 223-248), bishop of Alexandria, may be regarded as having completely put down in the Eastern church, by personal argument and by his work περὶ ἐπαγγελιῶν, the doctrine which his master had attacked. (Knapp, *Christ. Theolog.* § 154, 2; Gieseler, *Eccles. Hist.*, ch. iii. § 61, 62, 64).

The blow thus given was followed up in the Latin churches by Augustine, Jerome, and others. Dionysius had been answered by Apollonaicus, and the answer so far satisfied the Latin churches, that it was still the prevailing opinion in them when Jerome wrote. This great man opposed the Chiliasts with characteristic energy. 'If,' says he, 'we understand the revelation literally, we must Judaize; if spiritually, as it is written, we shall seem to contradict many of the ancients, particularly the Latin, Tertullian, Victorinus, Lactantius, and the Greeks, especially Irenæus, bishop of Lyons, against whom Dionysius, bishop of the church of Alexandria, wrote a curious piece deriding the fable of a thousand years, the terrestrial Jerusalem adorned with gold and precious stones, rebuilding the temple, bloody sacrifices, sabbatical sect, circumcision, marriages, lyings-in, nursing of children, dainty feasts, and servitude of the nations: and, again, after this, wars, armies, triumphs, and slaughters of conquered enemies, and the death of the sinner a hundred years old. Him Apollonarius answered in two volumes, whom not only men of his own sect, but *most of our own people likewise*, follow in this point. So it is no hard matter to foresee what a multitude of persons I am like to displease' (Hieron. *In Es.* ii. 18; *In Proem.*, pp. 477, 478).

The outward prosperity which the church attained under Constantine and his successors seems to have done quite as much as the arguments of these fathers, in putting down a doctrine which had been cherished as a source of consolation to a suffering and martyr church; and during the invasions of the northern nations, and the deluge of disasters which flowed in upon the empire, speculation was overborne, and the minds of Christians were absorbed by the commotion of the times, and the evils endured by them or impending over them. In the age of darkness which succeeded, scarcely a vestige of millennarian doctrine is to be traced; but in the ferment produced in men's minds by the Reformation, it was turned up in Germany by Müncer and his followers, who wished to establish the earthly kingdom of Christ by fire and sword. Hence Luther and Melancthon set themselves against the doctrine with great zeal and earnestness (vide *Augsb. Confess.*, art. 18). But it was afterwards reproduced in England by the Fifth Monarchy men, who were disposed to carry their notions to the like extremities of infatuation. The writings of the learned Joseph Mede, in the seventeenth century, contributed much to revive the ancient doctrine as a speculative opinion; and individual writers have, from that time to this, sent forth their speculations, advocating substantially the same views. More especially, within the last ten or fifteen years, the subject has acquired anew a considerable degree of prominence, and has given rise in England to an animated controversy, which is at this day dividing the ranks of biblical scholars and theologians.

Dionysius, the ancient opponent of the millennial doctrine, perceiving that his antagonists derived their chief arguments and illustrations from the Apocalypse, took upon him to deny that that book was written by St. John.

The modern opponents of the opinion seldom take this ground; but allege that the Apocalypse (xx. 1-8) does not speak of Christ as reigning visibly and bodily upon the earth, but of his spiritual dominion, resulting from the spread of Christianity, when it shall at length be universally diffused throughout the earth—a kingdom which shall last a thousand years, here used as a round number to denote many centuries, or a long period. A modified expectation and hope, founded substantially on this latter view, sometimes exhibits itself in high-toned feeling and flowing language, which might be taken for downright chiliasm, and which has, indeed, caused many ancient writers to be set down as millennarians, who certainly would have refused the designation. On the other hand, the progress of this doctrine is not to be estimated by the number of those who adopt the name as a distinctive title. Believers in the doctrine, and advocates of it, have been, and are still, found among all denominations; and the number of the gifted and holy men by whom it has been entertained, and to whom it has been a well-spring of hope and comfort, entitles it to the respectful consideration even of those who deem it erroneous as a speculative opinion. When soberly entertained, there is nothing in it contrary to Christian grace; and it may safely be placed among the notions on which Christians may allowably differ. Neander, in his account of this doctrine (*Kirchengesch.*, b. i., abth. 3, sec. 1090), suggests the important caution, that we should not allow ourselves, through disgust at the extravagant visions of enthusiasts about the millennium, to decide against that which we are really justified in hoping and expecting as to the future extension of the kingdom of Christ. As the Old Testament contains an intimation of the things in the New, so Christianity contains an intimation of a higher order of things hereafter, which it will be the means of introducing; but faith must necessarily come before sight. The divine revelations enable us to see a little now and then of this higher order, but not enough to form a complete picture. As prophecy is always obscure until its fulfilment, so must be the last predictions of Christ respecting the destiny of his church, until the entrance of this higher order.

The doctrine is entertained with shades of difference so numerous, that it is difficult to define its characteristics beyond the great leading point

—that Christ shall again come in person to live and reign with his saints a thousand years upon the earth. The formal tenets of the millennarians, as a sect, do not materially differ from the notions already defined from Justin Martyr. In the most recent account of these tenets (Rupp's *History of the Religious Denominations of the United States*, 1844), in which the articles are written by members of the bodies described, an expectation of the restoration of antediluvian longevity during the millennial period, is deduced from Isa. lxv. 20, 'The child shall die a hundred years old,' coupled with ver. 23, 'As the days of a tree, are the days of my people;' 'which,' says the writer, 'according to the best testimony, is from 800 to 1000 years in Palestine,' as if the ages of trees did not vary with the species, and as if trees of the same species were not of the same age in Palestine as in other countries. The same writer is certainly in error, in alleging that millennarianism was the doctrine of the Reformers and their successors, till Whitby 'introduced into the Protestant church a system of spiritualizing the prophecies to such an extent, as to leave little to be anticipated in relation to the personal reign of David's greater son on the throne of his father David, as king of Zion.'

On a topic so fruitful of controversy, it is impossible to enumerate all the writers upon it. The following are among those which have fallen under our notice:—Tibbechon, *Hist. Chiliasmi*, 1667; Mede, *Works*, p. 603, sqq.; Whitby, *Treat. on the True Millenium;* Dauhez, *Perpet. Comment. on Revel.*, 1720; Gill, *Serm. on the Glory of the Chureh*, 1752; Corrodi, *Krit. Geseh. d. Chiliasmus*, 1781-1783; Gregoire, *Hist. des Seetes Relig.*, ii. 333, sqq.; Bogue, *Dise. on the Millenium;* Noel (Gerard), *Enquiry into the Prospeets of the Christian Chureh;* Anderson, *Apolog. for Millen. Doet.*, Glasg. 1830; Irving, *Leet. on the Revelat.*, 1831; Greswell, *Exposition of the Parables*, 1834-5; Pigou, *The Millennium*, 1837; *Millenniarism Unscriptural*, 1838; Jefferson, *The Millennium*, 1840; Bush, *The Millenium*, Salem (N.S.), 1842. Several American writers on the subject, little known in this country, are enumerated in Rupp's *Relig. Denominations*, p. 519.

MILLET. [Dochan.]

MILLO (מִלּוֹא; Sept. ἄκρα). This word denotes 'fulness,' and is applied to a mound or rampart, probably as being filled up with stones or earth. Hence it is the name given to

1. Part of the citadel of Jerusalem, probably the rampart (2 Sam. v. 9; 1 Kings ix. 15, 24; xi. 27; 1 Chron. xi. 8; 2 Chron. xxxii. 5). In the last of these texts, where David is said to have restored or fortified Millo 'of' (not 'in') the city of David, the Sept. has τὸ ἀνάλημμα τῆς πόλεως, 'the fortification of the city of David.'

2. The fortress in Shechem. 'All the men of Shechem, and all that dwelt in the house of Millo;' that is, in the castle or citadel (Judg. ix. 6, 20).

MINISTER, one who acts as the less (from *minus* or *minor*) or inferior agent, in obedience or subservience to another, or who serves, officiates, &c., as distinguished from the master, *magister* (from *magis*), or superior. The words so translated in the Old Testament are מְשָׁרֵת and פֻּלַח (Chald.), and in the New, διάκονος, λειτουργός, and ὑπηρέτης. 1. משרת, 'Moses and his minister Joshua' (Exod. xxiv. 13); Sept. παρεστηκὼς αὐτῷ; Aquila and Symm. ὁ λειτουργός αὐτοῦ; comp. Exod. xxxiii. 11 (Sept. θεράπων Ἰησοῦς); Num. xi. 28; Josh. i. 1 (Sept. ὑπουργὸς Μωυσῆ; Alex. λιτουργός). This Hebrew word is clearly distinguished from עבד, which is the more comprehensive term for servant (1 Kings x. 5), 'Solomon's servants and ministers,' where the Sept. reads παίδων for the former, and λειτουργῶν for the latter. It is applied to Elisha as minister to Elijah, 2 Kings vi. 15 (Sept. λειτουργός); comp. 2 Kings iii. 11; 1 Kings xix. 21. Persons thus designated sometimes succeeded to the office of their principal, as did Joshua and Elisha. The word is applied to the angels, Ps. ciii. 21 (λειτουργοί); comp. Ps. civ. 4; Heb. i. 7; and see Stuart's *Comment. in loc.* Both the Hebrew and Sept. words are applied to the Jews in their capacity as a sacred nation, 'Men shall call you the ministers of our God' (Isa. lxi. 6); to the priests (Jer. xxxiii. 21; Ezek. xliv. 11; xlv. 4; Joel i. 9). The Greek word is continued in the same sense in Luke i. 23, and applied to Christian teachers, Acts xiii. 2; Rom. xv. 16; and to Christ, Heb. viii. 2; to the collectors of the Roman tribute, in consequence of the divine authority of political government, 'they are God's ministers' (λειτουργοί). It was applied by the Athenians to those who administered the public offices (λειτουργίαι) at their own expense (Boeckh, *Staatshaush. der Athener.* i. 480; ii. 62; Potter's *Gr. Ant.* i. 85. 2. פלחי (Chald.), Ezra vii. 24, 'ministers' of religion, λειτουργοῖς (comp. פלחן, ver. 19), though he uses the word משרתים in the same sense, ch. viii. 17. 3. The word διάκονος, 'minister,' is applied to Christian teachers, 1 Cor. iii. 5; 2 Cor. iii. 6; vi. 4; xi. 23; 1 Thess. iii. 2; to false teachers, 2 Cor. xi. 15; to Christ, Rom. xv. 8, 16; Gal. ii. 17; to heathen magistrates, Rom. xiii. 4; in all which passages it has the sense of a minister, assistant, or servant in general, as in Matt. xx. 26; but it means a particular sort of minister, 'a deacon,' in Philip. i. 1; 1 Tim. iii. 8, 12. The term διάκονοι denotes among the Greeks a higher class of servants than the δοῦλοι (Athen. x. 192; B. comp. Xen. *l. c.* Buttm. *Lexic.* i. 220; comp. Matt. xxii. 13, and Sept. for משרת, Esth. i. 10; ii. 2; vi. 3). 4. ὑπηρέτης is applied to Christian ministers, Luke i. 2; Acts xxvi. 16; 2 Cor. iv. 1. Josephus calls Moses τὸν ὑπηρέτην Θεοῦ, *Antiq.* iii. 1. 4. Kings are so called in Wisd. vi. 4. The word denotes, in Luke iv. 20, the attendant in a synagogue who handed the volume to the reader, and returned it to its place. In Acts xiii. 5 it is applied to 'John whose surname was Mark,' in his capacity as an attendant or assistant on Barnabas and Saul. It primarily signifies an underrower on board a galley, of the class who used the longest oars, and consequently performed the severest duty, as distinguished from the θρανίτης, the rower upon the upper bench of the three, and from the οἱ ναῦται, sailors, or the ἐπιβάται, marines (Dem. 1209. 11. 14; comp. also 1208. 20: 1214. 23; 1216. 13; Pol. i. 25. 3): hence in general a hand, agent, minister, attendant, &c.

J. F. D.

MINCHA, the Hebrew name of the bloodless

offerings (meal, cakes, &c.) presented in the Temple [Offerings].

MINNI. [Armenia.]

MINNITH (מִנִּית), a town in the country of the Ammonites (Judg. xi. 33), celebrated for the excellence of its wheat, which was exported to the markets of Tyre (Ezek. xxvii. 17). It still existed in the age of Eusebius, four R. miles from Heshbon, on the road to Philadelphia (*Onomast.* in Μααvιθ). The Sept. seem to have found difficulty in this name. In Judg. xi. 33 they substitute the name of the Arnon, and in Ezek. xxvii. 17 they render it by μύρον, 'myrrh.'

MINT. [Heduosmon.]

MIRACLES. God sees fit to carry on his common operations on established and uniform principles. These principles, whether relating to the physical or moral world, are called *the laws of nature*. And by the laws of nature the most enlightened philosophers and divines have understood *the uniform plan according to which*, or *the uniform manner in which, God exercises his power throughout the created universe*. Or it may be said, the laws of nature are the uniform method in which the powers or active principles, which God has imparted to created things, called *second* or *secondary causes*, operate and produce their effects. Or, according to the language of some, the laws of nature are the uniform manner in which events come to pass, or, in which action and the results of action among created beings take place. It is evident that various powers and properties belong to the things which are made, and are inherent in them, and that nothing in the creation, whether material or spiritual, would be what it is without those powers and properties. But we know that the existence of things, with their several powers and properties, was, at first, owing to the operation of divine power, and that their continued existence is owing to the same cause.

The above-mentioned uniform method of divine operation is evidently conducive to the most important ends. It manifests the immutable wisdom and goodness of God, and, in ways too many to be here specified, promotes the welfare of his creatures. Without the influence of this uniformity, rational beings would have no effectual motive to effort, and the affairs of the universe, intelligent and unintelligent, would be in a state of total confusion. And this general fact may be considered as a sufficient reason why God, in the common course of his providence, has adopted a uniform method of operation in preference to any other.

But if, in conducting the affairs of his great empire, God sees, in any particular case, as good a reason for a *deviation* from this uniform order, as there is generally for *uniformity*, that is, if the glory of his attributes and the good of his creatures require it—and no one can say that such a case may not occur—then, unquestionably, the unchangeable God will cause such a deviation; in other words, will work *miracles*:—miracles being effects which are produced, or events which take place, in a manner not conformed to the common laws of nature, and which cannot be accounted for according to those laws. In the case supposed, if God should not depart from his usual course, and work miracles, he would not show the same regard as he ordinarily does to his own glory and the good of his creatures. On the condition, then, here supposed, there is a strong and decided presumption in favour of miraculous operations; and it would contradict our best views of the immutable perfection of God, to suppose that they will not take place.

It is admitted that no man, apart from the knowledge of facts, could ever, by mere reasoning, have arrived at a confident belief, that the conjuncture supposed would certainly occur. But to us, who know that mankind are so depraved and wretched, and that the efforts of human wisdom to obtain relief have been in vain, the importance of a special divine interposition is very apparent. And being informed what the plan is, which a merciful God has adopted for our recovery to holiness and happiness, and being satisfied that this plan, so perfectly suited to the end in view, could never have been discovered by man, and never executed, except by a divine dispensation involving miracles, we conclude, that the introduction of a new and miraculous dispensation was in the highest degree an honour to God and a blessing to the world. It is clear that man could not have been saved without it. The divine government proceeding according to the original law of justice, would have left no hope for transgressors. If man is to be saved, there must be a departure from the original laws of a moral government. There must be a new dispensation, and that new dispensation must be made known to man; because, without knowing it, man could not enjoy its benefits. The work of saving a lost world cannot be accomplished while the world remains wholly ignorant of the grace which saves. But the requisite knowledge can never be reached by any of our natural faculties, and never communicated to us by any thing in creation. It must come from God, and that in an extraordinary manner. Now God is able, if he please, by a supernatural influence, to impart the requisite knowledge directly to every human being. But this mode of imparting knowledge would itself be miraculous, as it would be entirely beyond what any human mind would be capable of in the use of ordinary means. But it is manifest that such a mode of imparting knowledge is not in fact the mode which God has chosen, and that it would not be well suited to the ends of divine wisdom. The method of divine appointment, as set forth in the sacred volume, is that of making a revelation to a number of individuals, who are to write and publish it for the benefit of the world. This revelation to individuals is made in such a manner as renders it certain to their minds, that the revelation is from God. But how can that revelation be made available to others? It will not answer the purpose for those who receive it merely to declare that God has made such a revelation to them, and authorized them to proclaim it to their fellow creatures. For how shall we know that they are not deceivers? Or if their character is such as to repel any suspicion of this kind, how shall we know that they are not themselves deceived,—as it is no uncommon thing for a man, even a good man, to be misled by enthusiastic impressions, or in some other way? How shall we come to feel entire confidence in the truth and divine au-

thority of what individuals say has been revealed to them from God? Have we not a right, nay, are we not bound in duty, to ask for evidence? But what evidence will suffice? The reply is obvious. The revelation, in order to be of use to us, as it is to those who receive it directly from God, must not only be declared by them to us, but must have a divine attestation. In other words, those who declare it to us must show, by some incontestable proof, that *it is from God.* Such proof is found in a miracle. If an event takes place which we know to be contrary to the laws of nature, we at once recognise it as the special act of him who is the God of nature, and who alone can suspend its laws, and produce effects in another way. The evidence of a direct interposition of God given in this way is irresistible. No man, no infidel, could witness an obvious miracle, without being struck with awe, and recognising *the finger of God.* What would become of the scepticism of a Hume or a Voltaire, should he go to the grave where a father or brother had been buried for years, and see him wake up to life and come forth at the word of a divine messenger? What will become of his scepticism, when he himself, after having slept in death thousands of years, shall rise from the dead, and shall see others rise around him? In a miracle, God works, and shows us his hand, speaks, and causes us to hear his voice, as plainly as if he should instantly, before our astonished eyes, create a new sun in the expanse of heaven, or in a voice as loud as thunder should speak distinct and intelligible words in our ears.

In respect to the subject before us, there is a manifest and wide difference between a miracle and any event which is referable to the laws of nature. Let a man come to us and say, that such a doctrine has been made known to him by special revelation. It may properly be our first inquiry, whether the doctrine referred to, for example, the deity of Christ, or the truth of the Newtonian philosophy, is supported by other evidence. If so, we receive it on the ground of that other evidence, not because he tells us that it was revealed to him. But suppose that there is no other evidence, and that if we receive it, we must receive it on the ground of his declaration. We look then for evidence that his declaration is true. We say to him, prove that you are a prophet sent from God, and that this doctrine has been revealed to you from above. He undertakes to give the proof required, and he says, the Hudson river, or the Danube, which is now liquid, shall, to a considerable depth, become a solid mass, before the end of January; and thus my claim to a special revelation shall be confirmed. We reply to him,—why not make it a solid mass now in the midst of summer? And why not freeze up a river in the torrid zone? A man who has had no revelation can do all that you undertake. He may say, he will bring about a total eclipse of the sun at such a time (having found out the right time). We tell him to bring about such an eclipse in *the old of the moon,* and we will yield to his pretensions.

It is clear that no event, which can be accounted for on natural principles, can prove a supernatural interposition, or contain a divine attestation to the truth of a prophet's claim. But when we look at an event which cannot be traced to the laws of nature, and is clearly above them, such as the burning of the wood upon the altar in the case of Elijah's controversy with the false prophets, or the resurrection of Lazarus, we cannot avoid the conviction, that the Lord of heaven and earth does, by such a miracle, give his testimony, that Elijah is his prophet, and that Jesus is the Messiah. The evidence arising from miracles is so striking and conclusive, that there is no way for an infidel to evade it, but to deny the existence of miracles, and to hold that all the events called miraculous may be accounted for according to the laws of nature.

Hume arrays *uniform experience* against the credibility of miracles. But the shallow sophistry of his argument has been fully exposed by Campbell, Paley, and many others. We inquire what and how much he means by *uniform experience.* Does he mean his own experience? But because *he* has never witnessed a miracle, does it follow that others have not? Does he mean the uniform experience of the greater part of mankind? But how does he know that the experience of a smaller part has not been different from that of the greater part? Does he mean, then, the uniform experience of all mankind in all ages? How then does his argument stand? He undertakes to prove that no man has ever witnessed or experienced a miracle, and his real argument is, that no one *has* ever witnessed or experienced it. In other words, to *prove* that there has never been a miracle, he *asserts* that there never has been a miracle. This is the nature of his argument—an instance of *petitio principii*, which a man of Hume's logical powers would never have resorted to, had it not been for his enmity to religion.

If it is said that the *ordinary* experience of mankind in general *contradicts* the idea of a miracle, it is said without due consideration. The experience or testimony of any number of men cannot be regarded as contradictory to the experience or testimony of other men, unless the experience or testimony of both parties relate to the same event, and to the same place and time of its occurrence. Ten thousand Romans might have said that no such thing as the murder of Julius Cæsar had ever taken place within their observation or experience, and their testimony might have been true; but how would their testimony have contradicted the testimony of those who witnessed the fatal deed of his murderers? There is no contradiction between two witnesses, or two sets of witnesses, if the testimony of both may be true. Suppose two men testify before a court of justice, that, at such a time, naming the hour and the minute, and in such a room, naming the very part of the room, they saw a man murder his father by stabbing him. Now let three other men come forward and testify that they often saw the father and son together, but never witnessed any act of violence on the part of the son. Here is no contradiction of testimonies; for both may be true. But let the three witnesses testify that they were present at the very time and place referred to; that they saw the father and son together in the room, and the part of the room mentioned by the two witnesses; that the son had no instrument in his hand; and that the father was attacked suddenly with apoplexy, and died in the arms of his son. Here you have contradic-

tory testimonies, and both cannot be true. The testimony of all generations antecedent to the time of Christ, that they had never seen a man who had been dead and buried for some days, raised to life by a word of command; and the testimony of the greater part of the Jewish nation at that time, that they had seen no such thing as the resurrection of Lazarus, would not have contradicted the testimony of the few who declared that they were present and witnessed his resurrection. The truth of the former testimonies would not have disproved the truth of the last. So much for the argument of Hume. After all, he seems to admit that a miracle may be credible, *if it is not wrought in favour of religion;* whereas it would have been much nearer the truth, had he said, a miracle is credible, if it *is* wrought in favour of religion.

The miraculous events recorded in the Scriptures, particularly those which took place in the times of Moses and Christ, have all the marks which are necessary to prove them to have been matters of fact, and worthy of full credit, and to distinguish them from the feats of jugglers and impostors. This has been shown very satisfactorily by Leslie, Paley, Douglas, and many others. These miracles took place in the most public manner, and in the presence of many witnesses; so that there was opportunity to subject them to the most searching scrutiny. Good men and bad men were able and disposed to examine them thoroughly, and to prove them to have been impostures, if they had been so. Why did not the scribes and pharisees and rulers, who were so full of zeal against the religion of Jesus, adopt the most natural and effectual means of preventing its growing influence? Why did they not bring Jesus and his disciples to a fair trial before a proper tribunal, and prove them to be deceivers?

A large number of men, of unquestionable honesty and intelligence, constantly affirmed that the miracles took place before their eyes. And some of these original witnesses wrote and published histories of the facts, in the places where they were alleged to have occurred, and near the time of their occurrence. In these histories it was openly asserted that the miracles, as described, were publicly known and acknowledged to have taken place; and this no one took upon him to contradict, or to question. Moreover, many persons who stood forth as witnesses of these miracles passed their lives in labours, dangers, and sufferings, in attestation of the accounts they delivered, and solely in consequence of their belief of the truth of those accounts; and, from the same motive, they voluntarily submitted to new rules of conduct; while nothing like this is true respecting any other pretended miracles (see Paley's *Evidences*). Paley attaches great importance, and that very justly, to these positions; and he says he should believe in the reality of miracles in any other case, if attended with the circumstances which distinguished the miracles of Christ. And if any one calls assent to such evidence credulity, it is incumbent on him to produce examples in which the same evidence has turned out to be fallacious.

In comparing the evidence for Christian miracles with that which can be offered in favour of any other miracles, it is proper, as the same author shows, to lay out of the case such accounts as the following:—

1. It is proper to lay out of the case such accounts of supernatural events as are written a long time after their alleged occurrence. On this principle, we may at once set aside the miraculous story of Pythagoras, the fables of the heroic ages, a great part of the accounts of Popish saints, and the miracles of Apollonius Tyanæus. And this circumstance is shown to be of special value in regard to the history of Ignatius Loyola. His life, written by a companion of his, who was one of the order of the Jesuits, was published about fifteen years after his death. The author of this biography, so far from ascribing miracles to Ignatius, states the reasons why he was not invested with any such power. About sixty years after, the Jesuits, wishing to exalt the character of their founder, began to attribute to him a catalogue of miracles, which could not then be distinctly disproved, and which those who ruled in the church were disposed to admit upon the slightest evidence.

2. 'We may lay out of the case accounts published in one country of what passed in a distant country, without any proof that such accounts were received or known at home.' It is greatly in favour of Christianity that the history of Christ was first published, and his church first planted in the place where he lived, and wrought miracles, and died. But most of the miracles of Apollonius Tyanæus are related to have been performed in India; while we have no evidence that the history of those miracles was ever published, or that the miracles were ever heard of, in India. This matter is satisfactorily treated by Douglas in his *Criterion*.

3. We ought to lay out of the case *transient rumours*. On the first publication of any story, unless we are personally acquainted with the fact referred to, we cannot know whether it is true or false. We look for its confirmation, its increasing notoriety, and its permanency, and for subsequent accounts in different forms, to give it support. In this respect the miracles recorded in Scripture are presented before us in the most favourable light.

4. We lay out of the case what may be called *naked history*,—history found merely in a book, unattended with any evidence that the accounts given in the book were credited and acted upon at the time when the events are said to have occurred, and unsupported by any collateral or subsequent testimony, or by any important visible effects. We see here what singular advantage attends the history of the miracles of Christ. That history is combined with permanent Christian institutions; with the time and place, and circumstances of the origin and progress of the Christian religion, as collected from other history; with its prevalence to the present day; with the fact of our present books having been received by the advocates of Christianity from the first; with a great variety of subsequent books referring to the transactions recorded in the four Gospels, and containing accounts of the effects which flowed from the belief of those transactions—those subsequent books having been written with very different views, 'so disagreeing as to repel the suspicion of confederacy, and yet so agreeing as to show that they were founded in a common origin.'

5. We lay out of the case stories of supernatural events upon which nothing depends, and in which no interest is involved—stories which require only an indolent assent, and which pass from one to another without examination. How different are the accounts of the miracles of Christ! Those accounts, if true, decided the most momentous questions upon which the immortal mind can fix. Who could be indifferent and careless in such a case as this? Whoever entertained the account of these miracles, whether Jew or Gentile, could not avoid the following reflection: 'If these things be true, I must surrender the principles in which I have been brought up, the religion in which my fathers lived and died.' And who would do this? Who would give up his most favourite opinions, and his former way of life, and adopt new rules, and new habits, and a new course of conduct, and encounter the severest sufferings, upon a mere idle report, or, indeed, without the most serious consideration, and the fullest conviction of the truth of the history in which he confided?

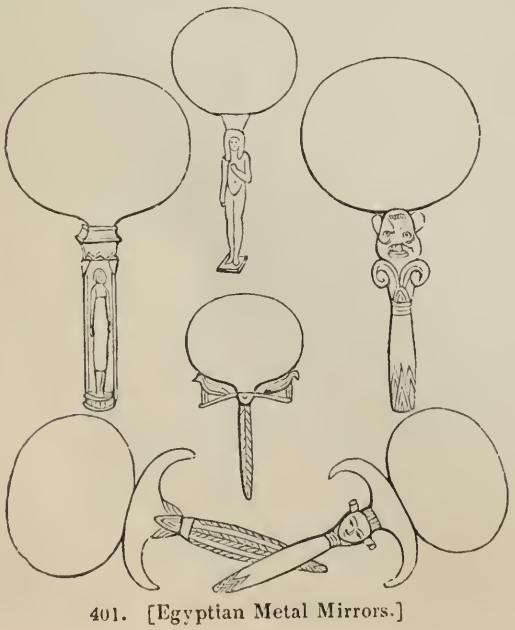
6. We lay aside all those events which can be accounted for by a heated imagination, false perception, momentary insanity, or any other natural principle. Now, although we may, in some cases, be in doubt, whether the events which take place can be resolved into the common powers of nature, no doubt can remain as to the principal miracles of Christ. If a person born blind is, by a word, restored to sight, or a man unquestionably dead restored to life, or if a conversion takes place, with the accompanying circumstances and the permanent consequences of that of Paul, we are sure that the event must be ascribed to a supernatural cause.

It appears, then, that after the various classes of events above-mentioned have been excluded, the miracles recorded in Scripture remain, with all the characteristics of supernatural events, showing the special presence and extraordinary agency of God, and containing his direct testimony in favour of the doctrines to which they refer. Hence we see the propriety and the perfect conclusiveness of the appeal which Jesus often made to his works as proof of his Messiahship: 'The works that I do in my Father's name, they bear witness of me;' again, 'The works that I do, bear witness of me, that the Father has sent me.' These miraculous works were as really a divine attestation to the Messiahship of Jesus, as that voice which God uttered from heaven, 'This is my beloved Son, hear ye him.'

It has been a long agitated question, whether miracles have ever been wrought, or can be consistently supposed to be wrought, *by apostate spirits*.

It is sufficient to say here, that it would be evidently inconsistent with the character of God to empower or to suffer wicked beings to work miracles *in support of falsehood*. Miracles, supposing them not to be wrought at random, but to contain a divine attestation, must go to support the truth. Neither wicked beings nor good beings can overwork them *in such a manner* that they shall avail to give countenance to error, and thus nullify the clearest and most striking evidence which can be given in support of the truth of a special divine communication. Balaam was a *real prophet;* that is, he was endued with supernatural knowledge, and enabled to predict the good which was to come upon the people of God. His supernatural foresight availed to make known the truth—as really so as though he had been a good man. Yea, the divine testimony in that case was attended with one peculiar advantage, namely, that Balaam was constrained by divine influence to pronounce a blessing upon Israel against both his interest and his inclination. And if wicked spirits in the time of Christ had power to produce preternatural effects upon the minds or bodies of men, and if those effects are to be ranked among real miracles (which, however, we do not affirm), still the end of miracles is not contravened. For those very operations of evil spirits were under the control of divine providence, and were made in two ways to subserve the cause of Christ. First; they furnished an occasion, as doubtless they were designed to do, for Christ to show his power over evil spirits, and, by his superior miracles, to give a new proof of his Messiahship. Secondly; the evil spirits themselves were constrained to give their testimony, that Jesus was the Christ, the Holy One of Israel—a very different matter from what it would have been if they had declared that Jesus was an impostor, and had undertaken to support their declaration by supernatural works.

Instead, therefore, of attempting to prove absolutely, as some writers have done, that evil spirits have never had power, and never been permitted, in any case, to do supernatural works, we shall content ourselves with saying, that God has never given them power, and never permitted them to do such works *in such circumstances, and in such a manner*, as to support error, or in any way to discredit divine truth. This being the case, it will not detract at all from the weight of the testimony which God gives by miracles to the truth of any supernatural revelation, if, in some instances, he should see fit to empower evil spirits to do miraculous works *for the same holy ends*—thus making use of the agency of evil spirits, as well as of good men, to promote the cause of righteousness and truth.



As to the time when the miraculous dispensation ceased, we can only remark, that the power of working miracles, which belonged pre-eminently to Christ and his apostles, and, in inferior degrees, to many other Christians in the apostolic age, subsided gradually. After the great object of supernatural works was accomplished in the establishment of the Christian religion, with all its sacred truths, and its divinely appointed institutions, during the life of Christ and his apostles, there appears to have been no farther occasion for miracles, and no satisfactory evidence that they actually occurred.

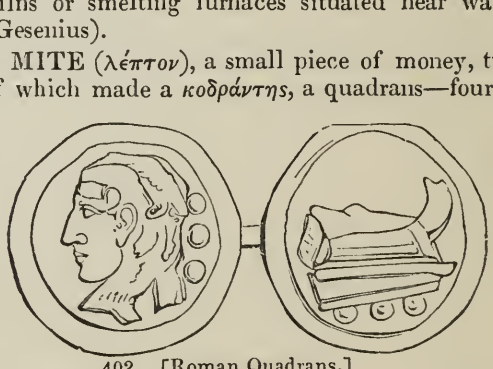
If the inquiry is made, whether in the future advancement of Christ's kingdom and the conversion of Jews and Gentiles, miraculous interpositions are to be expected, our reply is, that this must be referred entirely to the sovereign wisdom of God. It does, indeed, seem quite evident, that the grand design and appropriate influence of miracles have been already realized in the confirmation of the truth and authority of the Christian religion. And it has become more and more evident, that the Gospel may be propagated, and men in all circumstances converted, by the power of divine truth, and the renewing of the

Holy Spirit, without any resort to miracles. From these and other considerations we very naturally infer, that the recurrence of a miraculous dispensation is not required in order to the completion of the Saviour's work; still it is not for us to decide this point. As Christians, we ought to keep in remembrance that God's ways are not as our ways, and to cherish such a state of mind, that if God should at any time see fit, for the glory of his name and the salvation of men, to repeat the wonderful works which he wrought in former days, or to perform any other unquestionable miracles, we may not turn away from them in sullen unbelief, but may hail them as precious tokens of God's special favour, and evidences of his gracious design to give new success to the Gospel, and an enlargement and prosperity never before experienced to the kingdom of righteousness and peace.—L. W.

MIRIAM (מִרְיָם, *bitterness;* Sept. Μαριάμ; Josephus. Μαριάμνη), sister of Moses and Aaron, and supposed to be the same that watched her infant brother when exposed on the Nile; in which case she was probably ten or twelve years old at the time (Exod. ii. 4, sq.). When the Israelites left Egypt, Miriam naturally became the leading woman among them. She is called 'a prophetess' (Exod. xv. 20). After the passage of the Red Sea, she led the music, dance, and song, with which the women celebrated their deliverance (Exod. xv. 20-22). The arrival of Moses' wife in the camp seems to have created in her an unseemly dread of losing her influence and position, and led her into complaints of and dangerous reflections upon Moses, in which Aaron joined. For this she was smitten with leprosy, and, although healed at the intercession of Moses, was excluded for seven days from the camp (Num. xii.; Deut. xxiv. 9). Her death took place in the first month of the fortieth year after the Exodus, at the encampment of Kadesh-barnea (Num. xx. 1), where her sepulchre was still to be seen in the time of Eusebius.

MIRROR (מַרְאָה, Exod. xxxviii. 8; רְאִי, Job xxxii. 8). In the first of these passages the mirrors in the possession of the women of the Israelites, when they quitted Egypt, are described as being of brass; for 'the laver of brass, and the foot of it,' are made from them. In the second, the firmament is compared to 'a molten mirror.' In fact, all the mirrors used in ancient times were of metal; and as those of the Hebrew women in the wilderness were brought out of Egypt, they were doubtless of the same kind as those which have been found in the tombs of that country, and many of which now exist in our museums and collections of Egyptian antiquities. These are of mixed metals, chiefly copper, most carefully wrought and highly polished; and so admirably did the skill of the Egyptians succeed in the composition of metals, that this substitute for our modern looking-glass was susceptible of a lustre which has even been partially revived at the present day in some of those discovered at Thebes, though buried in the earth for so many centuries. The mirror itself was nearly round, and was inserted in a handle of wood, stone, or metal, the form of which varied according to the taste of the owner (see Wilkinson's *Ancient Egyptians*, iii. 384-386).

401. [Egyptian Metal Mirrors.]



MISHAEL, one of the three companions of Daniel, who were cast into the burning furnace by Nebuchadnezzar, and were miraculously delivered from it (Dan. iii. 13-30). The Chaldæan name was Meshech (Dan. i. 7).

MISHPAT, a fountain in Kadesh [see KADESH].

MISHNAH. [TALMUD.]

MISREPHOTH-MAIM (מִשְׂרְפוֹת מַיִם; Sept. Μασερέθ Μεμφωμαίμ), a place or district near Sidon (Josh. xi. 8; xiii. 6). The name means 'burnings of water,' which Kimchi understands of warm baths; but more probably it means burnings *by* or *beside* the water—either lime kilns or smelting furnaces situated near water (Gesenius).

MITE (λέπτον), a small piece of money, two of which made a κοδράντης, a quadrans—four of the latter being equal to the Roman *as*. The *as* was of less weight and value in later than in early times. Its original value was 3·4 farthings, and afterwards $2\frac{1}{8}$ farthings. The latter was its value in the time of Christ, and the mite being one-eighth of that sum, was little more than one-fourth of an English farthing. It was the smallest coin known to the Hebrews (Luke xii. 59).

402. [Roman Quadrans.]

MITHCAH, one of the encampments of the Israelites [WANDERING].

MITYLENE (Μιτυλήνη), the capital of the isle of Lesbos, in the Ægean Sea, about seven miles and a half from the opposite point on the coast of Asia Minor. It was a well-built town, but unwholesomely situated (Vitruv. *De Architect.* i. 6). It was the native place of Pittacus, Theophanes,

Theophrastus, Sappho, Alcæus, and Diophanes. St. Paul touched at Mitylene in his voyage from Corinth to Judæa (Acts xx. 14). It does not appear that any Christian church was established at this place in the apostolic age. No mention is made of it in ecclesiastical history until a late period; and in the second century heathenism was so rife in Mitylene that a man was annually sacrificed to Dionysus. In the fifth, sixth, seventh, and eighth centuries, we, however, find bishops of Mitylene present at several councils (Magdeburg, *Hist. Eccles. Cent.* ii. 195; v. 6; vi. 6; vii. 4, 253, 254; viii. 6). Mitylene still exists, and has given its name, in the form of Mytilni, to the whole island; but it is now a place of no importance.

MIZPAH (מִצְפָּה; Sept. Μασσηφά). The word signifies *a watch-tower*, and is the name of several towns and places in lofty situations whether furnished with a watch-tower or not.

1. MIZPAH, a town or city in Gilead (Judg. x. 17; xi. 11, 34; Hos. v. 1). The place originated in the heap of stones set up by Laban, and to which he gave his name (Gen. xxxi. 49). Some confound this with the Mizpeh of Gilead in Judg. xi. 29; but it is better to distinguish them [Mizpeh 3].

2. MIZPAH, a city of Benjamin, where the people were wont to convene (Josh. xviii. 26; Judg. xx. 1, 3; xxi. 1; 1 Sam. vii. 5-16; x. 17, sq.). It was afterwards fortified by Asa, to protect the borders against the kingdom of Israel (1 Kings xv. 22; 2 Chron. xvi. 6). In later times it became the residence of the governor under the Chaldæans (Jer. xl. 6, sq.; comp. Neh. iii. 7, 15, 19). In one place the name occurs with *e*, Mizpeh (מִצְפֶּה). Its position is nowhere mentioned in Scripture or by Josephus; but it could not have been far from Ramah, since king Asa fortified it with materials taken from that place; and that it was situated on an elevated spot is clear from its name. There are two such high points, which in these respects might correspond with the site of Mizpah. One is Tell el-Ful (Bean-hill), lying about an hour's journey south of Er-Ram (Ramah), towards Jerusalem. It is high, and overlooks the eastern slope of the mountains, and has upon it the remains of a large square tower; but there is no trace of a former city upon or even around the hill. The other point is at the present village of Neby Samwil (Prophet Samuel), which, although somewhat distant from Er-Ram, is a higher and more important station than the other. On these grounds Dr. Robinson (*Researches*, ii. 144) inclines to regard this as the probable site of Mizpah, especially as in 1 Macc. iii. 46 it is described as 'over against Jerusalem,' implying that it was visible from that city, which is true of Neby Samwil, but not of Tell el-Ful. This Neby Samwil is the place which it has been usual to identify with Ramah; but this on sufficient probability has been removed to Er-Ram, leaving Neby Samwil vacant for the present appropriation. This last place is now a poor village, seated upon the summit of an elevated ridge. It contains a mosque, now in a state of decay, which, on the ground of the apparently erroneous identification with Ramah, is regarded by Jews, Christians, and Moslems, as the tomb of Samuel. This mosque was once a Latin church, built in the form of a cross, upon older foundations, and probably of the time of the Crusaders. There are few houses now inhabited, but many traces of former dwellings. By the map of Dr. Robinson this place is about four miles and a half N.N.W. from Jerusalem.

MIZPEH (מִצְפֶּה). This name has the same meaning and application as Mizpah, and is borne by several places mentioned in Scripture.

1. MIZPEH, a town in the plains of Judah (Josh. xv. 38). Eusebius and Jerome identify it with a place which, in their time, bore the name of Mapha, on the borders of Eleutheropolis southward, on the road to Ælia or Jerusalem.

2. MIZPEH, the place more usually called Mizpah, in the tribe of Benjamin, is once called Mizpeh (Josh. xviii. 26) [Mizpah 2].

3. MIZPEH OF GILEAD, through or by which Jephthah passed in his pursuit of the Ammonites (Judg. xi. 29). Some think it the same with Mizpah 1; and it is possibly the same with the Ramath-mizpeh of Josh. xiii. 26.

4. MIZPEH, a valley in the region of Lebanon (Josh. xi. 8; comp. xi. 3).

MIZRAIM (מִצְרַיִם; Sept. Μεσραΐν), or LAND OF MIZRAIM, the name by which, in Scripture, Egypt is generally designated, apparently from its having been peopled by Mizraim, the son of Ham (Gen. x.). This ancient title is still preserved in Misr, the existing Arabic name of the country [Egypt].

MNASON (Μνάσων), an 'old disciple,' with whom St. Paul lodged when at Jerusalem in A.D. 58 (Acts xxi. 16). He seems to have been a native of Cyprus, but an inhabitant of Jerusalem, like Joses and Barnabas. Some think that he was converted by Paul and Barnabas while at Cyprus (Acts xiii. 9); but the designation 'an old disciple,' has more generally induced the conclusion that he was converted by Jesus himself, and was perhaps one of the seventy.

MOAB (מוֹאָב, *semen patris*; Sept. Μωάβ), son of Lot and his eldest daughter (Gen. xix. 30-38). He was born about the same time with Isaac, and became the founder of the Moabites.

MOABITES, a tribe descended from Moab the son of Lot, and consequently related to the Hebrews (Gen. xix. 37). Previous to the exodus of the latter from Egypt, the former, after expelling the original inhabitants, called אֵימִים *Emims* (Gen. xiv. 5; Deut. ii. 11), had possessed themselves of the region on the east of the Dead Sea and the Jordan, as far north as the river Jabbok. But the northern, and indeed the finest and best, portion of the territory, *viz.* that extending from the Jabbok to the Arnon, had passed into the hands of the Amorites, who founded there one of their kingdoms, with Heshbon for its capital (Num. xxi. 26). Og had established another at Bashan. Hence at the time of the exodus the valley and river Arnon constituted the northern boundary of Moab (Num. xxi. 13; Judg. xi. 18; Joseph. *Antiq.* iv. 5. 1). As the Hebrews advanced in order to take possession of Canaan, they did not enter the proper territory of the Moabites (Deut. ii. 9; Judg. xi. 18), but conquered the kingdom of the Amorites (a Canaanitish tribe), which had formerly belonged to Moab; whence the western part, lying along the

Jordan, frequently occurs under the name of עַרְבוֹת מוֹאָב, 'plains of Moab' (Deut. i. 5 ; xxix. 1). The Moabites, fearing the numbers that were marching around them, showed them at least no kindness (Deut. xxiii. 3) ; and their king (Balak) hired Balaam to utter prophetic curses, which, however, were converted into blessings in his mouth (Num. xii. sq.). The Gadites now took possession of the northern portion of this territory, which the Amorites had wrested from the Moabites, and established themselves there ; while the Reubenites settled in the southern part (Num. xxxii. 34 ; comp. Josh. xiii., which, however, differs somewhat in the designation of particular towns).

We see the first hostilities breaking out in the beginning of the period of the Judges, when the Hebrews had been for a long time tributary to the Moabites, but threw off their yoke under Ehud (Judg. iii. 12-30). Towards the end of this period, however, peace and friendship were restored, mutual honours were reciprocated (as the history of Ruth shows), and Moab appears often to have afforded a place of refuge to outcasts and emigrant Hebrews (Ruth i. 1; comp. 1 Sam. xxii. 3, 4; Jer. xl. 11; Isa. xvi. 2). After Saul had waged successful war against them (1 Sam. xiv. 47), David made them tributary (2 Sam. viii. 2, 12; xxiii. 20). The right to levy this tribute seems to have been transferred to Israel after the division of the kingdom ; for upon the death of Ahab (about B.C. 896), they refused to pay the customary tribute of 100,000 lambs and as many rams (2 Kings i. 1 ; iii. 4 ; comp. Isa. xvi. 1). Jehoram (B.C. 896), in alliance with Judah and Edom, sought indeed to bring them back to their subjection. The invading army, after having been preserved from perishing by thirst through the intervention of Elisha, defeated the Moabites and ravaged the country ; but, through the strange conduct of the king, in offering up in sacrifice his son [MESHA], were induced to retire without completing the object of the expedition. The Moabites deeply resented the part which the king of Judah took in this invasion, and formed a powerful confederacy with the Ammonites, Edomites, and others, who marched in great force into Judæa, and formed their camp at Engedi, where they fell out among themselves and destroyed each other through the special interposition of Providence, in favour of Jehoshaphat and his people (2 Kings iii. 4, sq. ; comp. 2 Chron. xx. 1-30) [ELISHA ; JEHORAM ; JEHOSHAPHAT]. Under Jehoash (B.C. 849) we see them undertake incursions into the kingdom of Israel, and carry on offensive war against it (2 Kings xiii. 20).

Though the subsequent history of Israel often mentions the Moabites, yet it is silent respecting a circumstance which, in relation to one passage, is of the greatest importance, namely, the reconquest of the territory between the Arnon and the Jabbok, which was wrested from the Moabites by the Amorites, and afterwards of the territory possessed by the tribes of Reuben and Gad. This territory in general we see, according to Isa. xvi., in the possession of the Moabites again. Even Selah, the ancient capital of the Edomites, seems likewise, from Isa. xvi. 1, to have belonged to them, at least for a time. The most natural supposition is that of Reland (*Palæstina*, p. 720), Paulus (*Clavis*, p. 110), and Rosenmüller (*in loc.*), that, after the carrying away of those tribes into captivity, the Moabites occupied their territory ; as it is expressly stated (Jer. xlix. 1-5) that the Amorites intruded themselves into the territory of the captive Gadites, as the Edomites did in respect to the Jews at a later period (Joseph. *De Bell. Jud.* v. 79). The tribes of Reuben and Gad were not, however, as is commonly supposed, first carried away after the destruction of Samaria (B.C. 722) by Shalmaneser (2 Kings xviii. 9,10), but, according to 1 Chron. v. 26, by Pul and Tiglathpileser certainly, and perhaps (for the account is somewhat indefinite) in the earliest campaign against Menahem, B.C. 774 (2 Kings xv. 19), and Pekah, B.C. 741 (2 Kings xv. 29). Nevertheless the singular fact remains, that here, where we should have expected every wrong done to the Israelites by Moab to be made prominent, this usurpation of their territory is not noticed. Hence we cannot wholly resist the conjecture that it was with that territory as with the territory of the Philistines, Tyrians, and Sidonians, *i. e.* it was never permanently possessed by the Hebrew tribes, and the division of this region into many parts in the book of Joshua remained ideal (an assignment *in partibus infidelium*), without being generally realised in history. Perhaps also many of these cities were as little inhabited by the Hebrews as Tyre and Sidon, which are likewise assigned them in the book of Joshua. In like manner it may be explained why many cities (Num. xxxii. 34, sq.) were apportioned to the tribe of Reuben, which are afterwards ascribed (Josh. xiii.) to Gad, and *vice versâ* (Reland, *Palæstina*, pp. 582, 720, 735).

Still later, under Nebuchadnezzar, we see the Moabites acting as the auxiliaries of the Chaldæans (2 Kings xxiv. 2), and beholding with malicious satisfaction the destruction of a kindred people (Ezek. xxv. 8-11); yet, according to an account in Josephus (*Antiq.* x. 9. 7), Nebuchadnezzar, when on his way to Egypt, made war upon them, and subdued them, together with the Ammonites, five years after the destruction of Jerusalem. On the other hand, there is no authority in any one ancient account for that which modern historians have repeatedly copied from one another, *viz.* that Moab was carried into exile by Nebuchadnezzar, and restored with the Hebrews under Cyrus.

That continual wars and contentions must have created a feeling of national hostility between the Hebrews and the Moabites, may be readily conceived. This feeling manifested itself on the part of the Hebrews, sometimes in bitter proverbs sometimes in the denunciations of the prophets ; on the part of the Moabites in proud boastings and expressions of contempt (Isa. xvi. 6).

Among the prophecies, however, that of Balaam (Num. xxii.-xxiv.) is above all remarkable, in which this ancient prophet (who withal was not an Israelite), hired by Moab to curse, is impelled by the Divine Spirit to *bless* Israel, and to announce the future destruction of Moab by a mighty hero in Israel (Num. xxiv. 17). It is a genuine epic representation worthy of the greatest poet of any age. Nor should we overlook the song of triumph and scorn respecting Moab, suggested by Heshbon, and obscure only as to its origin (Num. xxi. 17-30). Among the later prophets, Amos (ii. 1-3) predicts their destruction in consequence of their

cruelty to the king of Edom; probably with reference to the war recorded in 2 Kings iii., when the Edomites were confederate with the Hebrews; although the particular instance of cruelty is not there specified. Zephaniah (ii. 8-10) condemns them to punishment for their scorn and contempt of Israel. Jeremiah repeats the denunciation of evil, for the most part in the words of Numbers and Isaiah (Jer. xlviii.; comp. also ix. 26; xxv. 21); and Ezekiel threatens them with punishment for their malicious joy at the overthrow of Judæa (xxv. 6-11). Moreover, the subjection of Moab finds a place in every ideal description of splendid wars and golden ages predicted for Israel (Isa. xi. 14; xxv. 10; Ps. lx 8), 'Moab is my wash-pot' (Ps. lxxxiii. 6).

After the exile, an intimate connection between the two nations had found place by means of intermarriages (Ezra ix. 1, sq.; Neh. xiii. 1), which, however, were dissolved by the theocratic zeal of Ezra. The last (chronologically) notice of the Moabites which occurs in Scripture is in Dan. xi. 41, which contains an obscure intimation of the escape of the Moabites from the overthrow with which neighbouring countries would be visited: but Josephus, in the history of Alexander Jannæus, mentions the cities between Arnon and Jabbok under the title of cities of Moab (*Antiq.* xiii. 15). Thenceforth their name is lost under that of the Arabians, as was also the case with Ammon and Edom. At the time of Abulfeda, Moab Proper, south of the Arnon, bore the name of Karak, from the city so called; and the territory north of the Arnon, that of Belka, which includes also the Ammonites. Since that time, the accounts of that region are uncommonly meagre; for through fear of the predatory and mischievous Arabs that people it, few of the numerous travellers in Palestine have ventured to explore it. For scanty accounts, see Büsching's *Asia*, pp. 507, 508. Seetzen, who in February and March, 1806, not without danger of losing his life, undertook a tour from Damascus down to the south of the Jordan and the Dead Sea, and thence to Jerusalem, was the first to shed a new, and altogether unexpected light upon the topography of this region. He found a multitude of places, or at least of ruins of places, still bearing the old names; and thus has set bounds to the perfectly arbitrary designations of them on the old charts. Seetzen's wish, that some other traveller might acquaint the public with the remarkable ruins of this region, especially those of Gerasa and Ammân, and then advance to the splendid ruins of Petra at Wady Mousa, is already partly accomplished, and will soon be completely so. From June to September, 1812, Burckhardt made the same tour from Damascus beyond the Jordan down to Karak; whence he advanced over Wady Mousa, or the ancient Petra (which he was the first European traveller to visit), to the bay of Aila, and thence went to Cairo. The accurate details of this tour, which are contained in his *Travels in Syria and the Holy Land*, 1822, threw much light upon the ancient topography and present condition of the lands of Moab and Edom. The accounts of Seetzen and Burckhardt give the substance of all the information which we even yet possess concerning the land of Moab in particular, although of Edom, or rather of Petra, fuller, if not more exact accounts, have been since obtained. Most of the travellers who visited Petra after Burckhardt, passed also through the land of Moab; but it afterwards became usual to pass from Petra direct to Hebron; whence this country has escaped the researches of many travellers whose observations have of late years enriched the topography of this region. A party of English gentlemen, Captains Irby and Mangles, Mr. Bankes and Mr. Legh, passed through the land of Moab in returning from Petra in 1818; and their observations published in their *Travels* by Irby and Mangles, and by Legh in a Supplement to Dr. Macmichael's *Journey from Moscow to Constantinople*, 1819, furnish the most valuable additions which have as yet been obtained to the information of Seetzen and Burckhardt. The northern parts of the country were visited by Mr. Buckingham, and more lately by Mr. George Robinson and by Lord Lindsay, but very little additions have been made by these travellers to our previous knowledge. The plates to Laborde's new work, *Voyage en Orient*, show that he also visited the land of Moab; but the particulars of his journey have not yet been published.

From these sources we learn that in the land of Moab, which lay to the east and south-east of Judæa, and which bordered on the east, north-east, and partly on the south of the Dead Sea, the soil is rather more diversified than that of Ammon; and, where the desert and plains of salt have not encroached upon its borders, of equal fertility. There are manifest and abundant signs of its ancient importance. 'The whole of the plains are covered with the sites of towns on every eminence or spot convenient for the construction of one; and as the land is capable of rich cultivation, there can be no doubt that the country, now so deserted, once presented a continued picture of plenty and fertility' (Irby and Mangles, p. 378). The form of fields is still visible, and there are remains of Roman highways which are in some places completely paved, 'and on which there are milestones of the times of Trajan, Marcus Aurelius, and Severus, with the numbers of the miles legible upon them. Wherever any spot is cultivated the corn is luxuriant; and the frequency and almost, in many instances, the close vicinity of the sites of ancient towns, prove that the population of the country was formerly proportioned to its fertility' (Irby and Mangles, pp. 377, 378, 456, 460). It was in its state of highest prosperity that the prophets foretold that the cities of Moab should become desolate, without any to dwell in them; and accordingly we find, that although the sites, ruins, and names of many ancient cities of Moab can be traced, not one of them exists at the present day as tenanted by man. The argument for the inspiration of the sacred records deducible from this, among other facts of the same kind, is produced with considerable force by Dr. Keith in his work on Prophecy. Gesenius, *Comment. on Isa.* xv. xvi. *Introduct.* translated by W. S. Tyler, with *Notes* by Moses Stuart, in *Biblical Repos.* for 1836, vol. vii. pp. 107-124; Keith's *Evidence from Prophecy*, pp. 153-165; and *Land of Israel*, 279-295; *Pictorial Bible*, Notes to Deut. ii. 2; Isa. xvi. xvii.; Jer. xliii. See also the travels and other works cited in this article.

MOLE, חלד *chaled;* Arabic, *khuld* (Lev. xi. 29, in our version 'weasel'). Although the similarity of sound in names is an unsafe ground to depend upon when it is applied to specific animals, still, the Hebrew and Syriac appearing likewise to imply creeping into, creeping underneath by burrowing—characteristics most obvious in moles—and the Arabic denomination being undoubted, *chaled* may be assumed to indicate the above animal, in preference to *chinsemeth*, which, in conformity with the opinion of Bochart, is referred to the *chamælcon.* This conclusion is the more to be relied on as the animal is rather common in Syria, and in some places abundant. Zoologists have considered the particular species to be the *Talpa Europæa*, which, under the name of the common mole, is so well known as not to require a more particular description. The ancients represented the mole to have no eyes: which assertion later scientific writers believed they had disproved by showing our species to be possessed of these organs, though exceedingly small. Nevertheless, recent observations have proved that a species, in other respects scarcely, if at all, to be distinguished from the common, is totally destitute of eyes, and consequently has received the name of *Talpa cæca.* It is to be found in Italy, and probably extends to the East, instead of the *Europæa.* Moles must not, however, be considered as forming a part of the Rodent order, whereof all the families and genera are provided with strong incisor teeth, like rats and squirrels, and therefore intended for subsisting chiefly on grain and nuts: they are on the contrary supplied with a great number of small teeth, to the extent of twenty-two in each jaw—indicating a partial regimen; for they feed on worms, larvæ, and under-ground insects, as well as on roots, and thus belong to the insectivorous order: which brings the application of the name somewhat nearer to carnivora and its received interpretation 'weasel.'

With regard to the words חפר פרות *khaphar phiroth*, which have exercised the ingenuity of Gesenius and others, there does not appear sufficient evidence to prove that any, or a particular, animal is meant; and consequently, that the *Spalax microsthalmus*, or blind rat, may be intended, is very doubtful; nor is אשת *eseth*, 'an embryo,' 'an abortion,' more applicable to this *spalax*, which makes galleries and hills like the common mole, and, most likely, was confounded with it by the ancient Hebrews: unless it was designated by כרפדית, which should, perhaps, be read as one word, and gives great force to Isa. ii. 20.—C. H. S.

MOLOCH, or rather Molech (הַמֹּלֶךְ, always with the article, except in 1 Kings xi. 7). The Septuagint most frequently render it as an appellative, by ὁ ἄρχων, or βασιλέυς; but they also write Μολόχ, as Aquila, Symmachus, and Theodotion, appear to have generally done. Whatever reasons there may be for doubting whether *Malchâm* is a name of this god, or is merely 'their king,' in a civil sense, in Am. i. 15; Zeph. i. 5 (on which see the notes of Hitzig, *Die xii. Kleinen Propheten*), yet the context, in Jer. xlix. 1, seems to require that it should there denote this god, as indeed the Septuagint and Syriac versions have expressed it. But *Milchôm*—which Movers considers to be an Aramaic pronunciation of *Malcham, i. c.* to be an appellative, 'their king,' in a theocratical sense (*Die Phönizier*, i. 358)—is evidently a name of this god (comp. 1 Kings xi. 5 and 7).

Molech is chiefly found in the Old Testament as the national god of the Ammonites, to whom children were sacrificed by fire. There is some difficulty in ascertaining at what period the Israelites became acquainted with this idolatry; yet three reasons render it probable that it was before the time of Solomon, the date usually assigned for its introduction. First, Molech appears—if not under that name, yet under the notion that we attach to it—to have been a principal god of the Phœnicians and Canaanites, whose other idolatries the Israelites confessedly adopted very early. Secondly, there are some arguments which tend to connect Molech with Baal, and, if they be tenable, the worship of Molech might be essentially as old as that of the latter. Thirdly; if we assume, as there is much apparent ground for doing, that, wherever human sacrifices are mentioned in the Old Testament, we are to understand them to be offered to Molech—the apparent exception of the gods of Sepharvaim being only a strong evidence of their identity with him—then the remarkable passage in Ezek. xx. 26 (cf. v. 31) clearly shows that the Israelites sacrificed their first-born by fire, when they were *in the wilderness.** Moreover, those who ascribe the Pentateuch to Moses will recognise both the early existence of the worship of this god, and the apprehension of its contagion, in that express prohibition of his bloody rites which is found in Lev. xx. 1-5. Nevertheless, it is for the first time directly stated that Solomon erected a high-place for Molech on the Mount of Olives (1 Kings xi. 7); and from that period his worship continued uninterruptedly there, or in Tophet, in the valley of Hinnom, until Josiah defiled both places (2 Kings xxiii. 10, 13). Jehoahaz, however, the son and successor of Josiah, again 'did what was evil in the sight of Jehovah, according to all that his fathers had done' (2 Kings xxiii. 32). The same broad condemnation is made against the succeeding kings, Jehoiakim, Jehoiachin, and Zedekiah; and Ezekiel, writing during the captivity, says, 'Do you, by offering your gifts, and by making your sons pass through the fire, pollute yourselves with all your idols *until this day*, and shall I be enquired of by you?' (xx. 31). After the restoration, all traces of this idolatry disappear.

It has been attempted to explain the terms in which the act of sacrificing children is described in the Old Testament so as to make them mean a mere passing between two fires, without any risk of life, for the purpose of purification. This theory—which owes its origin to a desire in some Rabbins to lessen the mass of evidence which their own history offers of the perverse idolatries of the Jews—is effectually declared untenable by such passages as Ps. cvi. 38; Jer. vii. 31; Ezek. xvi. 20; xxiii. 37; the last two of which may

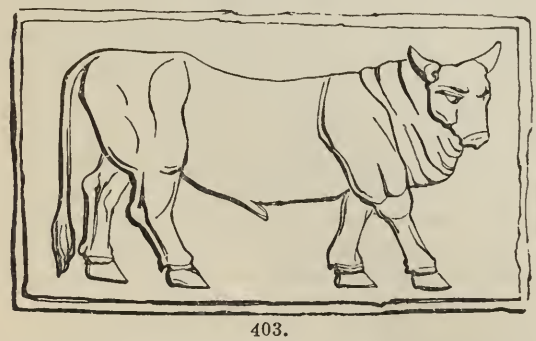
* The words in Amos v. 26, as rendered by the Septuagint, and as cited from that version in Acts vii. 43, might also be adduced here. But it is not clear that Molech is intended by the 'your king' of the original text; and Jarchi refers the whole verse to the *future*, instead of the past, in which he is followed by Ewald.

also be adduced to show that the victims were slaughtered before they were burnt.

As the accounts of this idol and his worship found in the Old Testament are very scanty, the more detailed notices which Greek and Latin writers give of the bloody rites of the Phœnician colonies acquire peculiar value. Münter has collected these testimonies with great completeness, in his *Religion der Karthager*. Many of these notices, however, only describe late developments of the primitive rites. Thus the description of the image of Molech as a brazen statue, which was heated red hot, and in the outstretched arms of which the child was laid, so that it fell down into the flaming furnace beneath—an account which is first found in Diodorus Siculus, as referring to the Carthaginian Κρόνος, but which was subsequently adopted by Jarchi and others—is not admitted by Movers to apply to the Molech of the Old Testament.

The connection between Molech and Baal—the very names, as meaning 'king' and 'lord,' being almost synonymous—is seen in comparing Jer. xxxii. 35 with xix. 5, in which both names are used as if they were interchangeable, and in which human sacrifices are ascribed to both. Another argument might be drawn from Jer. iii. 24, in which *Habbosheth*, 'shame,' is said to have devoured their flocks and herds, their sons and daughters. Now, as Bosheth is found, in the names Ish-bosheth and Jerubbesheth, to alternate with Baal, as if it was only a contemptuous perversion of it, it would appear that human sacrifices are here again ascribed to Baal. Further, whereas Baal is the chief name under which we find the principal god of the Phœnicians in the Old Testament, and whereas only the two above cited passages mention the human victims of Baal, it is remarkable that the Greek and Latin authors give abundant testimony to the human sacrifices which the Phœnicians and their colonies offered to their principal god, in whom the classical writers have almost always recognised their own Κρόνος and Saturn. Thus we are again brought to the difficulty, alluded to above [Baal], of reconciling Molech as Saturn with Baal as the sun and Jupiter. In reality, however, this difficulty is in part created by our association of classical with Semitic mythology. When regarded apart from such foreign affinities, Molech and Baal may appear as the personifications of the two powers which give and destroy life, which early religions regarded as not incompatible phases of the same one God of nature.—J. N.

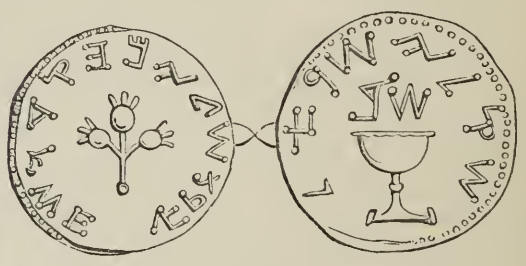
MONEY. This term is used to denote whatever commodity the inhabitants of any country may have agreed or are compelled to receive as an equivalent for their labour, and in exchange for other commodities. Etymologists differ respecting its derivation. Bouteroue contends that it is derived from *monere*, because the stamp impressed on the coin indicates its weight and fineness (*Recherches sur les Monnoyes de France*); and Suidas (*s. v.* Μονῆτα), that it originated in the circumstance of silver having been first coined at Rome in the temple of *Juno Moneta*.



Different commodities have been used as money in the primitive state of society in all countries. Those nations which subsist by the chase, such as the ancient Russians and the greater part of the North American Indians, use the skins of the animals killed in hunting as money (Storch, *Traité d'Economie Politique*, tome i.). In a pastoral state of society cattle are chiefly used as money. Thus, according to Homer, the armour of Diomede cost nine oxen, and that of Glaucus one hundred (*Iliad*, vi. 235). The etymology of the Latin word *pecunia*, signifying money, and of all its derivatives, affords sufficient evidence that cattle (*pecus*) were the first money of the Romans. They were also used as money by the Germans, whose laws fix the amount of penalties for particular offences to be paid in cattle (Storch, *l. c.*). In agricultural countries corn would be used in remote ages as money, and even at the present day it is not unusual to stipulate for corn rents and wages. Various commodities have been and are still used in different countries. Smith mentions salt as the common money of Abyssinia (*Wealth of Nations*, i. 4). A species of *cypræa* called the *cowree*, gathered on the shores of the Maldive Islands, and of which 6400 constitute a rupee, is used in making small payments throughout India, and is the only money of certain districts in Africa. Dried fish forms the money of Iceland and Newfoundland; sugar of some of the West India Islands; and among the first settlers in America corn and tobacco were used as money (Holmes's *American Annals*). Smith mentions that, at the time of the publication of the *Wealth of Nations*, there was a village in Scotland where it was customary for a workman to carry nails as money to the baker's shop or the alehouse (i. 4).

A long period of time must have intervened between the first introduction of the precious metals into commerce, and their becoming generally used as money. The peculiar qualities which so eminently fit them for this purpose would only be gradually discovered. They would probably be first introduced in their gross and unpurified state. A sheep, an ox, a certain quantity of corn, or any other article, would afterwards be bartered or exchanged for pieces of gold or silver in bars or ingots, in the same way as they would formerly have been exchanged for iron, copper, cloth, or anything else. The merchants would soon begin to estimate their proper value, and, in effecting exchanges, would first agree upon the quality of the metal to be given, and then the quantity which its possessor had become bound to pay would be ascertained by weight. This, according to Aristotle and Pliny, was the manner in which the precious metals were originally exchanged in Greece and Italy. The same practice is still observed in different countries. In many parts of China and Abyssinia the value of gold and silver is always ascertained by weight (Goguet, *De l'Origine des Loix*, &c.). Iron was the first money of the Lacedæmonians, and copper of the Romans.

In the sacred writings there is frequent mention of gold, silver, and brass, sums of money, purchases made with money, current money, and money of a certain weight. Indeed, the money of Scripture is all estimated by weight. 'Abraham weighed to Ephron the silver which he had named in the audience of the sons of Heth, four hundred shekels of silver, current money with the merchant' (Gen. xxiii. 19). The brethren of Joseph carried back into Egypt the money 'in



full weight' which they had found in their sacks (Gen. xliii. 21). The golden earring presented by Abraham's steward to Rebekah weighed half a shekel, and the two bracelets for her hands were 'ten shekels weight of gold' (Gen. xxiv. 22). In paying for the field of Hanameel, Jeremiah 'weighed him the money, even seventeen shekels of silver' (Jer. xxxii. 9). Amos represents the merchants of Israel as 'falsifying the balances by deceit' (viii. 5). The shekel and the talent do not appear to have been originally fixed and stamped pieces of money, but simply weights used in traffic. Hence, 'thou shalt not have in thy bag divers weights, a great and a small' (Deut. xxv. 13). It was customary for the Jews to have scales attached to their girdles for weighing the gold and silver they received; but the Canaanites carried them in their hands.

There is no direct allusion in the sacred writings to coined money as belonging to the Jewish nation. In Gen. xxxiii. 19, Jacob is said to have bought a part of a field 'for an hundred pieces of money;' and the friends of Job are said to have given him each 'a piece of money' (Job xlii. 11). The term in the original is *kesitoth*, and is by some thought to denote 'sheep' or 'lamb;' by others a kind of money having the impression of a sheep or lamb; and by others again a purse of money. The most correct translation may be presumed to be that which favours the idea of a piece of money bearing some stamp or mark indicating that it was of the value of a sheep or lamb. The name shekel, first used to indicate a weight, might afterwards be applied to a piece of money. According to Arbuthnot, 3000 of these shekels were equal to a talent. Some allegorical device would naturally suggest itself as the most appropriate for being impressed upon pieces of gold or silver of a given weight and fineness; and as in the patriarchal ages property consisted chiefly of flocks and herds, no better emblem could be used than that of a lamb, with which it is imagined the pieces of money alluded to may have been impressed. Maurice, in his *Antiquities of India* (vol. vii.), bears testimony to the fact that the earliest coins were stamped with the figure of an ox or sheep. In the British Museum there is a specimen of the original Roman As, the surface of which is nearly the size of a brick, with the figure of a bull impressed upon it. Other devices

403.

would suggest themselves to different nations as arising out of, or connected with, particular places or circumstances, as the Babylonish lion, Ægina's tortoise, Bœotia's shield, the lyre of Mytilene, the wheat of Metapontum. On some of the reverses of the Roman large brass may be deciphered, 'Valour standing full armed: Honour robed and chapleted: Happiness crowned with obliviscent poppies: Concord with extended hand, and the horn of plenty in her bosom: Hope tripping lightly, and smiling on a flower-bud: Peace offering the olive-branch: Fortune resting on a rudder: Military Faith stretching forth his consecrated standard: Abundance emptying her cornucopia: Security leaning on a column: Modesty veiled and sitting: Piety taking her gift to the altar: Fruitfulness in the midst of her nurselings: Equity adjusting her scales: Victory with wings and coronal and trumpet: Eternity holding the globe and risen phœnix; or better, seated on a starry sphere: Liberty with cap and staff: National Prosperity sailing as a good ship before the favouring gale: and Public Faith with joined hands clasping between them the palms of success, and the caduceus of health' (*Quarterly Review*, vol. lxxii. p. 358). Religion would also at an early period claim to be distinguished, and accordingly the effigies of Juno, Diana, Ceres, Jove, Hercules, Apollo, Bacchus, Pluto, Neptune, and many other of the heathen deities are found impressed upon the early coins. The Jews, however, were the worshippers of the one only true God; idolatry was strictly forbidden in their law; and therefore their shekel never bore a head, but was impressed simply with the almond rod and the pot of manna.

404.

The first Roman coinage took place, according to Pliny (*Hist. Nat.* xxxiii. 3), in the reign of Servius Tullius, about 550 years before Christ; but it was not until Alexander of Macedon had subdued the Persian monarchy, and Julius Cæsar had consolidated the Roman empire, that the image of a living ruler was permitted to be stamped upon the coins. Previous to that period heroes and deities alone gave currency to the money of imperial Rome.

Antiochus Sidetes, king of Syria, is represented to have granted to Simon Maccabæus the privilege of coining money in Judæa (1 Macc. xv. 6). This is considered to be the first mention of Hebrew money, properly so called. It consisted of shekels and demi-shekels, the third part of a shekel, and the quarter of a shekel, of silver.

From the time of Julius Cæsar, who first struck a living portrait on his coins, the Roman coins run in a continued succession of so-called Cæsars, their queens and crown-princes, from about B.C. 48 down to Romulus Augustulus, emperor of the West, who was dethroned by Odoacer about A.D. 475 (*Quarterly Review*, ut supra).

After its subjugation by Rome much foreign money found its way into the land of Judæa. The piece of tribute money, or coin mentioned in Luke xx. 24, as presented to our Saviour, bore the image and superscription of the Roman emperor, and it is reasonable to suppose that a

large quantity of Roman coins was at that time in circulation throughout Judæa.—G. M. B.

MONEY CHANGERS. It is mentioned by Volney that in Syria, Egypt, and Turkey, when any considerable payments are to be made, an agent of exchange is sent for, who counts paras by thousands, rejects pieces of false money, and weighs all the sequins either separately or together. It has hence been suggested that the 'current money with the merchant,' mentioned in Scripture (Gen. xxiii. 16), might have been such as was approved of by competent judges whose business it was to detect fraudulent money if offered in payment. The Hebrew word סוחר *socher*, signifies one who goes about from place to place, and is supposed to answer to the native exchange-agent or money-broker of the East, now called *shroff*. It appears that there were bankers or money-changers in Judæa, who made a trade of receiving money in deposit and paying interest for it (Matt. xxv. 27). Some of them had even established themselves within the precincts of the temple at Jerusalem (xxi. 12), where they were in the practice of exchanging one species of money for another. Persons who came from a distance to worship at Jerusalem would naturally bring with them the money current in their respective districts, and it might therefore be a matter of convenience for them to get this money exchanged at the door of the temple for that which was current in Jerusalem, and upon their departure to receive again that species of money which circulated in the districts to which they were journeying. These money-changers would, of course, charge a commission upon all their transactions, but from the observation of our Saviour, when he overthrew the tables of those in the temple, it may be inferred that they were not distinguished for honesty and fair dealing: 'It is written, my house shall be called the house of prayer, but ye have made it a den of thieves' (ver. 13).

In the *Life of Aratus*, by Plutarch, there is mention of a banker of Sicyon, a city of Peloponnesus, who lived 240 years before Christ, and whose whole business consisted in exchanging one species of money for another.—G. M. B.

MONTHS. It is proposed to comprise, under this head, some observations which may be considered supplementary to the articles on the separate months, and subordinate to that on the year. For this end it is expedient to distinguish three periods in the Jewish mode of denoting dates by months: the first extending until the Babylonian captivity; the second until one or two centuries after the destruction of Jerusalem by the Romans; and the third from the adoption of the calendar of Rabbi Hillel the younger (*i. e.* from about the middle of the fourth century of our era) until the present time.

In the first period the months are, as a rule, mentioned by their numerical designation only—as 'the first month,' 'the second,' &c.* We have no explicit indication of the number of days in a month, nor of the number of months in a year: the 27th day and the 11th month being respectively the highest mentioned (Gen. viii. 14; Deut. i. 3); unless 1 Kings iv. 7 be considered to prove that the year had 12 months.* Nevertheless, as the two Hebrew terms for month—חדשׁ, literally *new moon*, thence *month*, from a root signifying *to be new;* and ירח, *moon*, and thence *month*—afford some proof that the months were measured by the moon (comp. Ps. civ. 19); and, as the festivals of the Mosaic law bore a fixed relation to certain epochs of the agricultural year, which were fixed by nature, there is much reason to conclude that the year had twelve lunar months, and that it must have been kept parallel with the sun by some mode of intercalation adequate to, if not identical with, the one afterwards employed.

In the second period, we find, in part, a continuation of the previous method, with somewhat more definite statements (for instance, 1 Chron. xxvii. clearly proves that the year had twelve months), and, in part, the adoption of new names for the months: but the co-existence of both these systems is not easily explained. For, whereas Zechariah, Ezra, Nehemiah, and Esther, introduce the seven new names—Shebat, Chislev, Adar, Nisan, Elul, Tebeth, and Sivan—all th other canonical books written after the restoration do nothing more than enumerate the months, without any name, in the order of their succession. There is, moreover, another discrepancy in the usage of the writers of the former class, inasmuch as, while they all generally give the name of the month together with its ordinal adjective, Nehemiah gives the naked names alone. It is on these discrepancies that Benfey and Stern, who also give a minute statement of the particular deviations, rest one external support of their theory, that these names of the months are not Aramaic, as is commonly supposed, but Persian, and adopted during the Captivity—for which it may suffice to refer to their *Monatsnamen einiger alter Völker*, Berlin, 1836. Although only the above-mentioned seven names occur in the Old Testament, yet there is no manner of doubt that the Jews at the

* The only exception to this rule in the Pentateuch, occurs in the terms, 'in the month of Abib,' which are found in the Authorized Version. This is, however, only an apparent exception, since *Abib* is not the proper name of the month, but means *ears of corn*, and distinguishes that month, which is elsewhere called 'the first,' as the month of ears, in reference to the ripeness of the corn (Sept. μὴν τῶν νέων; Vulg. *mensis novarum frugum*). The only remaining exceptions in the other books of this period occur exclusively in 1 Kings vi. and viii., where we find the second, eighth, and seventh months called *Ziv*, *Bul*, and *Ethanim*. In this case, two circumstances militate against the hypothesis that these names were in the current use of the people: the one being, that this is the only instance of their use; the other, that the writer has, at the same time described the three by the order of their succession (as 'in the month Ziv, which is the second month,' &c.) just as the writers of the second period do with the confessedly foreign names, *Nisan*, &c.

* Some have attempted to show, from the sum of days assigned to the flood (Gen. vii. 11; viii. 4, 14), that the ancient Hebrew months had 30 days each, and that the antediluvian year was a solar year of 365 days, like that of the Egyptians. (See Von Bohlen, *Die Genesis*, p. 107).

same time adopted the entire twelve names, of which the following is a table:

Nisan,	Tishri,
Iyar,	Marcheshvan,
Sivan,	Chislev,
Tammuz,	Tebeth,
Ab,	Shebat,
Elul.	Adar.

In the same manner as the Old Testament contains no indication of the mode of intercalation, when yet it is certain that some mode must have been used, so also it does not mention by what method the commencement and conclusion of every month were ascertained in either of these periods. According to the Talmud, however, it is certain that, in the second period, the commencement of the month was dated from the time when the earliest visible appearance of the new moon was announced to the Sanhedrim; that, if this happened on the 30th day of the current month, that month was considered to have ended on the preceding 29th day, and was called *deficient* (חסר); but, if no announcement was made on the 30th day, that day was reckoned to the current month, which was in that case called *full* (מלא), and the ensuing day was at once considered to be the first of the next month. Further, as the cloudy state of the weather sometimes hindered the actual sight of the new moon, it was an established rule that no year should contain less than four, and more than eight, full months. It is generally assumed, although without express warrant, that the commencement of the month was determined in the same way in the first period: but it is very probable, and the Mosaic festivals of the new moon seem to be some evidence for it.

This is a fit occasion for discussing a question which equally concerns both periods:—with which of *our* months, namely, did the first month, 'the month of ears,' or Nisan, most nearly coincide? We are indebted to J. D. Michaelis for discovering the true state of this case, after the rabbinical writers had so universally established an erroneous opinion that it has not even yet disappeared from our popular books. His dissertation 'De Mensibus Hebræorum' (in his *Commentationes per annos* 1763-1768 *oblatæ*, Bremen, 1769, p. 16) proceeds on the following chief arguments:—That, if the first month began with the new moon of *March*, as was commonly asserted, the climate of Palestine would not in that month permit the oblation of the sheaf of barley, which is ordered on the second day of the Paschal Feast; nor could the harvest be finished before the Feast of Weeks, which would then fall in May; nor could the Feast of Tabernacles, which was after the gathering of all fruits, accord with the month of September, because all these feasts depend on certain stages in the agricultural year, which, as he shows from the observations of travellers, solely coincide with the states of vegetation which are found, in that climate, in the months of April, June, and October. Secondly, that the Syrian calendar, which has essentially the same names for the months, makes its Nisan absolutely parallel with our April. And, lastly, that Josephus, in one place, makes Nisan equivalent to the Macedonian month Xanthicus; and, in another, mentions that, on the 14th of Nisan, the sun was in the sign of the Ram—which could not be on that day, except in April (*Antiq.* ii. 14. 6; iii. 10. 5). Michaelis concludes that the later Jews fell into this departure from their ancient order, either through some mistake in the intercalation, or because they wished to imitate the Romans, whose year began in March. Ideler says, 'So much is certain, that, in the time of Moses, the month of ears cannot have commenced before the first days of our April, which was then the period of the vernal equinox (*Handbuch der Chronologie*, i. 490). As Nisan then began with the new moon of April, we have a scale for fixing the commencement of all the other months with reference to our calendar; and we must accordingly date their commencement one whole month later than is commonly done: allowing, of course, for the circumstance that, as the new moon varies its place in our solar months, the Jewish months will almost invariably consist of portions of two of ours.

With regard to the third period, it is not necessary to say more here than that, as the dispersion of the Jews rendered it impossible to communicate the intelligence of the visible appearance of the new moon, they were obliged to devise a systematic calculation of the duration of their months; but that they retained the above-mentioned names for the months, which are still lunar months, of the mean duration of 29 days, 12 hours, 44 seconds; and that when they were no longer able to regulate the epochs of their festivals by the agricultural year of Palestine, they came, for some such reasons as those assigned by Michaelis, to place every month earlier by one lunation than it had been in the first two periods, so that their Nisan now most nearly coincided with March. The rabbinical writers, therefore, who maintained that the ancient Nisan likewise began with the new moon of March, were mainly led into that opinion by the practice existing in their own time.—J. N.

MOON. The worship of the heavenly bodies was among the earliest corruptions of religion, which would naturally take its rise in the eastern parts of the world, where the atmosphere is pure and transparent, and the heavens as bright as they are glowing. In these countries the moon is of exceeding beauty. If the sun 'rules the day,' the moon has the throne of night, which, if less gorgeous than that of the sun, is more attractive, because of a less oppressively brilliant light, while her retinue of surrounding stars seems to give a sort of truth to her regal state, and certainly adds not inconsiderably to her beauty. The moon was therefore worshipped as a goddess in the East at a very early period; in India under the name of Maja; among the Assyrians as Mylitta; with the Phœnicians she was termed Astarte or Ashteroth, who was also denominated the Syrian mother. The Greeks and Romans worshipped her as Artemis and Diana. Job (xxxi. 26) alludes to the power of the moon over the human soul: 'If I beheld the sun when it shined, or the moon walking in brightness, and my heart hath been secretly enticed, or my mouth hath kissed my hand: this also were an iniquity, for I should have denied the God that is above.' There is to the same effect a remarkable passage in Julian (*Orat. in Salem.* p. 90): 'From my childhood I was filled with a wonderful love for the rays of that goddess; and when, in my boyhood, I di-

rected my eyes to her ætherial light, I was quite beside myself. By night especially, when I found myself under a wide, pure, cloudless sky, I forgot everything else under her influence, and was absorbed in the beauties of heaven, so that I did not hear if addressed, nor was aware of what I did. I appeared solely to be engaged with this divinity, so that even when a beardless boy I might have been taken for a stargazer.'

The moon, as being mistress of the night, may well have been considered as the lesser of the two great lights of heaven (Gen. i. 16). It was accordingly regarded in the old Syrian superstition as subject to the sun's influence, which was worshipped as the active and generative power of nature, while the moon was reverenced as the passive and producing power. The moon, accordingly, was looked upon as feminine. Herein Oriental usage agrees with our own. But this usage was by no means universal. The gender of *mond* in German is an exception in modern days, which may justify the inference that even among the northern nations the moon had masculine qualities ascribed to it. The Egyptians represented their moon as a male deity, Ihoth; and Wilkinson (*Anc. Egypt.* v. 5) remarks that 'the same custom of calling it male is retained in the East to the present day, while the sun is considered feminine, as in the language of the Germans. Ihoth, in the character of Lunus, the moon, has sometimes a man's face, with the crescent of the moon upon his head supporting a disk. Plutarch says the Egyptians 'call the moon the mother of the world, and hold it to be of both sexes: female, as it receives the influence of the sun; male, as it scatters and disperses through the air the principles of fecundity.' In other countries also the moon was held to be hermaphrodite. Another pair of dissimilar qualities was ascribed to the moon—the destructive and the generative faculty—whence it was worshipped as a bad as well as a good power.

The epithet 'queen of heaven' (Horace, siderum regina) appears to have been very common. Nor was it, any more than the worship of the moon, unknown to the Jews, as may be seen in a remarkable passage in Jeremiah (xliv. 17), where the Israelites (men and women, the latter exert most influence) appear given over to this species of idolatry: 'We will certainly burn incense to the *queen of heaven*, and pour out drink-offerings unto her, as we have done, we and our fathers; for then had we plenty of victuals, and were well, and saw no evil. But since we left off to burn incense to the queen of heaven, we have wanted all things.' The last verse of the passage adds to the burnt-offerings and drink-offerings, 'cakes to worship her.' Vows were also made by the Jews to the moon, which superstition required to be fulfilled (ver. 25). The appeal made in this passage to the alleged authority of the ancient Israelites can have no other ground than such as these idolaters made or found by referring to the religious observances in the Jewish church connected with the full moon. In all probability, however, their consciences misgave them while they put forth this plea, though they may to some extent have confounded the new moon ceremonies with their loved idolatrous rites. Whence arises a justification of the conduct of Moses in separating, in the most sharp and rigid manner, the customs, usages and laws of his people from those of the idolaters by whom they were surrounded: had he not done so, the flesh-pots of Egypt would have had an irresistible attraction for the children of Israel, and a nation of monotheists would not have been produced, to become the great spiritual instructors of the world.

The baneful influence of the moon still finds credence in the East. Moonlight is held to be detrimental to the eyes. In Ps. cxxi. 6 we read, 'The sun shall not smite thee by day, nor the moon by night;' so that the impression that the moon may do injury to man is neither partial nor vague. Rosenmüller (*Morgenland.* iv. 108) refers this to the cold of night, which, he says, is very great and sensible in the East, owing, partly, to the great heat of the day. If this extreme (comparative) cold is considered in connection with the Oriental custom of sleeping *sub divo*, out of doors, *à la belle étoile*, on the flat roofs of houses, or even on the ground, without in all cases sufficient precautionary measures for protecting the frame, we see no difficulty in understanding whence arose the evil influence ascribed to the moon. In the East Indies similar effects result from similar self-exposure. Shakspere, who knew everything that the eye and the heart could teach, makes reference in two passages to this evil influence:—

—— 'the moon, the governess of floods,
Pale in her anger, washes all the air,
That rheumatic diseases do abound.'
Mids. N. D. ii. 2.

'It is the very error of the moon;
She comes more nearer earth than she was wont,
And makes men mad.'—*Othello*, v. 2.

Unquestionably, great is the operation of the moon on all the higher animals, as well as man. The usages of language attest this, pointing also to her malign effects; thus 'moon-stricken,' 'lunatic.' Darkness seems essential to sound repose; accordingly men sleep uneasily under moonshine; sometimes they awake to a half or dreamy consciousness; or never sink into that entire self-oblivion which is necessary to sweet and refreshing slumber. By her very changes, too, the moon would rouse and stimulate the minds of men; the regularity of these changes would suggest and supply the earliest measure of time; the coincidence of certain events with certain states of the planet, would make the first be regarded as the consequence of the last; hence watchful observation, which would lead to honourable observance, and this feeling is worship begun. Even at the present hour, how much are the changes of the weather held by the vulgar weather-wise to depend on changes of the moon. The new moon is regarded as specially auspicious, not only to bring serene skies, but to give success. And, as of old the interlunar space was a time of terror (*iracunda Diana*, Horat. *Ars Poet.* v. 454), when the queen of heaven had sunk into Proserpine, 'mistress of hell,' so still the darkness which intervenes from the disappearance of the old to the return of the new moon, causes the latter to be hailed with pleasurable feelings, and to be regarded as the bright harbinger of various kinds of good (Hone, *Every-Day Book*, i. 1509). Birth and growth induce grateful and cheerful emotions; waning, vanishing, and darkness give sorrow and pain; no wonder, therefore, that the moon became an object

of intense interest to man. In some respects its claims were superior to those of the sun, since the moon, by its proximity, by its variations, by its soft light, and less oppressive beauty, seems to be more suited to the mind, the disposition, and the lot of mortal man, and may well have easily won its way to his heart as a friend taking part in the fluctuations and diversities of our human condition. Whence it came to pass that in days of ignorance and superstition the agency of the moon was sought in love potions and other remedies for human ills. Dido is represented by Virgil (*Æn.* iv. 512) to have chosen moonlight for getting the herbs requisite to recover for her the affection of Æneas:—

'ad lunam quæruntur
Pubentes herbæ.'

On the influence of the moon on man, see Hayn, *De Planetar. in Corp. hum. Influxu;* and Kretschmar, *De Astror. in Corp. hum. Imperio*, Jena, 1820; also Carne, *Leb. und Sitten im Morgenl.* i. 73.—J. R. B.

MOON, NEW. [Festivals.]

MOR (מוֹר), sometimes written Mur, is the well known substance *myrrh*, which the Æolians called *μύρρα*, and the other Greeks *σμύρνα*. The Greek *μύρρα* and the Latin *myrrha* are no doubt derived from the Hebrew *mor*, or Arabic مر *mur*, though some of the ancients traced them to the mythological Myrrha, daughter of Cinyras, king of Cyprus, who fled to Arabia, and was changed into this tree—'dominæ nomina gutta tenet' (Ov. *Art. Am.* i. 288). Myrrh is the exudation of a little known tree found in Arabia, but much more extensively in Abyssinia. It formed an article of the earliest commerce, was highly esteemed by the Egyptians and Jews, as well as by the Greeks and Romans, as it still is both in the East and in Europe. The earliest notice of it occurs in Exod. xxx. 23, 'Take thou also unto thee principal spices, of *pure myrrh (morderor)* 500 shekels.' It is afterwards mentioned in Esther ii. 12, as employed in the purification of women; in Ps. xlv. 8, as a perfume, 'All thy garments smell of myrrh, and aloes, and cassia;' also in several passages of the Song of Solomon, 'I will get me to the mountain of myrrh, and to the hill of frankincense' (iv. 6); 'My hands dropped with myrrh, and my fingers with *sweet smelling* myrrh' (v. 5); so in ver. 13, in both which passages Rosenmüller states that in the original it is *stilicidious* or *profluent myrrh.* Under its Greek name, *σμύρνα*, we find it mentioned in Matt. ii. 11, among the gifts presented by the wise men of the East to the infant Jesus—'gold, and frankincense, and myrrh.' It may be remarked as worthy of notice, that myrrh and frankincense are frequently mentioned together. In Mark xv. 23, we learn that the Roman soldiers 'gave him (Jesus) to drink wine mingled with *myrrh;* but he received it not.' The Apostle John (xix. 39) says, 'Then came also Nicodemus, and brought a mixture of myrrh and aloes [Ahalim], about an hundred pound weight,' for the purpose of embalming the body of our Saviour.

Though myrrh seems to have been known from the earliest times, and must consequently have been one of the most ancient articles of commerce, the country producing it long remained unknown. Herodotus mentions Arabia as the last inhabited country towards the south which produced frankincense, myrrh, &c.; Hippocrates employed it as a medicine; Theophrastus describes it as being produced in Southern Arabia, about Saba and Adramytta; so Pliny, 'Myrrha thuris arboribus permixta in Sabæorum sylvis nascitur;' so also Dioscorides and several other Greek authors. But others have not so limited its production. Celsius (*Hierobot.* i. 523) says, 'Gigni perhibent in Syria, Gedrosia (Arrian, *Exped. Al.* vi. p. 421), India, Æthiopia, Troglodytica, et Ægypto; ubi *βάλ* dictam fuisse refert Plutarchus de Iside et Osiride, p. 383 (Kircher, *Prod. Copt.* p. 175).' The fact of myrrh being called *bal* among the Egyptians is extremely curious, for *bol* is the name by which it is universally known throughout India in the present day. The writer learns from Professor Wilson that the Sanscrit name is *bola*, which occurs in the Ameera Cosha, that is, at least before the Christian era, with several other names showing that it was well known. But from the time of the ancients until that of Belon we were without any positive information respecting the tree yielding myrrh: he supposed it to be produced in Syria, and says, that near Rama he met with a thorny shrub with leaves resembling acacia, which he believed to be that producing myrrh (*Mimosa agrestis*, Spr.). Similar to this is the information of the Arabian author Abu'l Fadli, quoted by Celsius, who says, that *mur* is the Arabic name of a thorny tree resembling the acacia, from which flows a white juice, which thickens and becomes a gum. The Persian authors referred to under Abattachim state that myrrh is the gum of a tree common in the Mughrub, that is, the West or Africa, in Room (a general name for the Turkish empire), and in Socotra. The Arabian and Persian authors probably only knew it as an article of commerce: it certainly is not produced in Socotra, but has undoubtedly long been exported from Africa into Arabia. We were informed by the captain of a vessel trading with the Red Sea, that myrrh is always to be obtained cheap and abundant on the Soumalee coast. Bruce had indeed long previously stated that myrrh is produced in the country behind Azab. Mr. Johnson, in his recently published *Travels in Abyssinia* (i. 249), mentions that 'Myrrh and mimosa trees abounded in this place' (Koranhedudah in Adal). The former he describes as being 'a low, thorny, ragged-looking tree, with bright-green trifoliolate leaves; the gum exudes from cracks in the bark of the trunk near the root, and flows freely upon the stones immediately underneath. Artificially it is obtained by bruises made with stones. The natives collect it principally in the hot months of July and August, but it is to be found, though in very small quantities, at other times of the year. It is collected in small kid-skins, and taken to Errur, whence the Hurrah merchants, on their way from Shoa, convey it to the great annual market at Berberah, from whence great quantities are shipped for India and Arabia.' When the Portuguese first entered these seas, gold dust, ivory, myrrh, and slaves formed the staple commerce of Adal. So early as the time of Arrian, in his Periplus of the Erythræan Sea, we find myrrh (*σμύρνα*)

one of the articles of export, with λίβανος, or frankincense, from the coast of Adal, styled Barbaria.

The Periplus mentions the myrrh of this coast as the finest of its kind, and specifies the means of conveying it to Yemen, or Sabea. There the first Greek navigators found it, and through their hands it was conveyed into Europe under the name of Sabean myrrh. Though there is no doubt that the largest quantity of myrrh has always been obtained from Africa—'omnium prima est quæ Troglodytica appellatur'—yet it is equally certain that some is also procured in Arabia. This seems to be proved by Ehrenberg and Hemprich, who found a small tree in Arabia near Gison, on the borders of Arabia Felix, off which they collected pieces of myrrh, which, when brought home and analysed, was acknowledged to be genuine. It is an interesting fact that the specimens of the myrrh-plant brought by Mr. Johnson from the confines of Abyssinia seem to be of the same species. This is the *Balsamodendron Myrrha* of botanists, and which we here figure

405. [Balsamodendron Myrrha.]

from Nees von Esenbeck's plate of Ehrenberg's plant. By some it is supposed to be produced by another species of *Balsamodendron*, the *Amyris kataf* of Forskal, which differs little from *A. kâfal.*

Several kinds of myrrh were known to the ancients, and are described by Dioscorides under the name of *Stacte*, *Gabirea*, *Troglodytica*, *Kaukalis*, *Aminasa*, *Ergasima*. So the Arab authors mention several varieties, as 1. *mur saf*, 2. *mur fortarukh*, 3. *mur jushee;* and in modern commerce we have Turkish and East Indian myrrh, and different names used to be, and are still applied to it, as red and fatty myrrh, myrrh in tears, in sorts, and myrrh in grains. In the Bible also several kinds of myrrh are enumerated, respecting which various opinions have been entertained. Thus, in Exod. xxx. 23, the words *mor-deror* have been variously translated *myrrha prima*, *electa*, *ingenua*, *excellens*, &c. ذرور *dheror*, in Arabic, according to Celsius, means an aromatic powder, and *mur dheroree*, in Arabic, like *mor deror* in Hebrew, signifies *myrrheus pulvis.* This may be the correct meaning, but it is curious that the Arabians should apply the term *Kusb-al-zurire* to another famed aromatic, the sweet cane of Scripture. Hence there may be a connection between these similarly sounding terms. Rosenmüller says, 'Luther correctly translates the Hebrew expression, which properly denotes *spontaneously profluent myrrh.*' The same kind of myrrh is in the Song of Solomon (ch. v. 13) called *stilicidious* or *profluent myrrh* (*mor obor*), usually translated *myrrham electam et præstantissimam*, *transeuntem*, &c. (Cels. *l. c.* p. 528). Another kind of myrrh is said to be indicated by the word *Nataf*, translated *stacte*, which occurs in Exod. xxx. 24; but on this opinions have differed [Natap].

Myrrh, it is well known, was celebrated in the most ancient times as a perfume, and a fumigator, as well as for its uses in medicine. As several kinds were included under the name of myrrh, it is probable that some may have possessed more aromatic properties than others: but the tastes and the customs of nations vary so much in different ages of the world, that it is impossible for us to estimate correctly what was most agreeable to the nations of antiquity. Myrrh was burned in their temples, and employed in embalming the bodies of the dead. Herodotus, speaking of the practice of embalming among the Egyptians, says, 'They then fill the body with powder of pure myrrh, cassia, and other perfumes, except frankincense' (ii. 86). It was offered in presents, as natural products commonly were in those days, because such as were procured from distant countries were very rare. In the same way we often hear of a rare animal or bird being presented to royalty even in the present day. The ancients prepared a *wine of myrrh*, and also an *oil of myrrh*, and it formed an ingredient in many of the most celebrated compound medicines, as the *Theriaca*, the *Mithridata*, *Manus Dei*, &c. Even in Europe it continued to recent times to enjoy the highest medicinal reputation, as it does in the East in the present day. It is no doubt useful as a moderately stimulant medicine; but Von Helmont was extravagant enough to state that it is calculated to render man immortal, if we had any means of perfectly dissolving it in the juices of the body. From the sensible properties of this drug, and from the virtues which were ascribed to it, we may satisfactorily account for the mention of it in the several passages of Scripture which have been quoted.—J. F. R.

MORDECAI (מָרְדֳּכַי, supposed to come from the Persian مردکی, *little man*, *mannikin;* or, according to others, from the idol מְרֹדַךְ *Merodach*, thus signifying *a votary of Merodach.* The last supposition is not unlikely, seeing that Daniel had the Chaldæan name of Belshazzar; Sept. Μαρδοχαῖος), son of Jair, of the tribe of Benjamin, descended from one of the captives transported to Babylon with Jehoiachin (Esth. ii. 5). He was resident at Susa, then the metropolis of the Persian empire, and had under his care his niece Hadessa, otherwise Esther, at the time

when the fairest damsels of the land were gathered together, that from among them a fitting successor to queen Vashti might be selected for king Ahasuerus. Among them was Esther, and on her the choice fell; while, by what management we know not, her relationship to Mordecai, and her Jewish descent, remained unknown at the palace. The uncle lost none of his influence over the niece by her elevation, although the seclusion of the royal harem excluded him from direct intercourse with her. He seems to have held some office about the court; for we find him in daily attendance there, and it appears to have been through this employment that he became privy to a plot of two of the chamberlains against the life of the king, which through Esther he made known to the monarch. This great service was however suffered to pass without reward at the time. On the rise of Haman to power at court, Mordecai alone, of all the nobles and officers who crowded the royal gates, refused to manifest the customary signs of homage to the royal favourite. It would be too much to attribute this to an independence of spirit, which, however usual in Europe, is unknown in Eastern courts. Haman was an Amalekite; and Mordecai brooked not to bow himself down before one of a nation which from the earliest times had been the most devoted enemies of the Jewish people. The Orientals are tenacious of the outward marks of respect, which they hold to be due to the position they occupy; and the erect mien of Mordecai among the bending courtiers escaped not the keen eye of Haman. He noticed it, and brooded over it from day to day: he knew well the class of feelings in which it originated, and—remembering the eternal enmity vowed by the Israelites against his people, and how often their conquering sword had all but swept his nation from the face of the earth—he vowed by one great stroke to exterminate the Hebrew nation, the fate of which he believed to be in his hands. The temptation was great, and to his ill-regulated mind irresistible. He therefore procured the well-known and bloody decree from the king for the massacre of all the Israelites in the empire in one day. When this decree became known to Mordecai, he covered himself with sackcloth and ashes, and rent the air with his cries. This being made known to Esther through the servants of the harem, who now knew of their relationship, she sent Hatach, one of the royal eunuchs, to demand the cause of his grief: through that faithful servant he made the facts known to her, urged upon her the duty of delivering her people, and encouraged her to risk the consequences of the attempt. She was found equal to the occasion. She risked her life by entering the royal presence uncalled, and having by discreet management procured a favourable opportunity, accused Haman to the king of plotting to destroy *her* and her people. His doom was sealed on this occasion by the means which in his agitation he took to avert it; and when one of the eunuchs present intimated that this man had prepared a gallows fifty cubits high on which to hang Mordecai, the king at once said, 'Hang him thereon.' This was, in fact, a great aggravation of his offence, for the previous night, the king, being unable to sleep, had commanded the records of his reign to be read to him; and the reader had providentially turned to the part recording the conspiracy which had been frustrated through Mordecai. The king asked what had been the reward of this mighty service, and being answered 'nothing,' he commanded that any one who happened to be in attendance without, should be called. Haman was there, having come for the very purpose of asking the king's leave to hang Mordecai upon the gallows he had prepared, and was asked what should be done to the man whom the king delighted to honour? Thinking that the king could delight to honour no one but himself, he named the highest and most public honours he could conceive, and received from the monarch the astounding answer, 'Make haste, and do even so to Mordecai that sitteth in the king's gate!' Then was Haman constrained, without a word, and with seeming cheerfulness, to repair to the man whom he hated beyond all the world, to invest him with the royal robes, and to conduct him in magnificent cavalcade through the city, proclaiming, 'Thus shall it be done to the man whom the king delighteth to honour.' After this we may well believe that the sense of poetical justice decided the perhaps till then doubtful course of the king, when he heard of the gallows which Haman had prepared for the man by whom his own life had been preserved.

Mordecai was invested with power greater than that which Haman had lost, and the first use he made of it was, as far as possible, to neutralize or counteract the decree obtained by Haman. It could not be recalled, as the kings of Persia had no power to rescind a decree once issued; but as the altered wish of the court was known, and as the Jews were permitted to stand on their defence, they were preserved from the intended destruction, although much blood was, on the appointed day, shed even in the royal city. The Feast of Purim was instituted in memory of this deliverance, and is celebrated to this day (Esth. ii. 5; x.) [Purim].

A Mordecai, who returned from the exile with Zerubbabel, is mentioned in Ezra ii. 2 and Neh. vii. 7; but this cannot well have been the Mordecai of Esther, as some have supposed.

MORIAH (מֹרִיָּה; Sept. Ἀμωρία), one of the hills of Jerusalem, on which the temple was built by Solomon (2 Chron. iii. 1). The name seldom occurs, being usually included in that of Zion, to the north-east of which it lay, and from which it was separated by the valley of Tyropœon (Joseph. *Antiq.* viii. 3-9) [Jerusalem]. The Land of Moriah, whither Abraham went to offer up Isaac (Gen. xxii. 2), is generally supposed to denote the same place, and may at least be conceived to describe the surrounding district. The Jews themselves believe that the altar of burnt-offerings in the temple stood upon the very site of the altar on which the patriarch purposed to sacrifice his son.

MOSERAH, MOSEROTH, a station of the Israelites near Mount Hor (Num. xxxiii. 30) [Wandering].

MOSES (מֹשֶׁה; Μωϋσῆς; Μωσῆς), the lawgiver of Israel, belonged to the tribe of Levi, and was a son of Amram and Jochebed (Exod. vi. 20). According to Exod. ii. 10, the name מֹשֶׁה means *drawn out of water*. Even ancient writers knew that the correctness of this interpretation

could be proved by a reference to the Egyptian language (comp. Joseph. *Antiq.* ii. 9. 6; *contra Apionem*, i. 31; Philo, ii. 83, &c. ed. Mang.). The name contains also an allusion to the verb מָשָׁה, *extraxit, he extracted, pulled out.* Hence it appears that מֹשֶׁה is a significant memorial of the marvellous preservation of Moses when an infant, in spite of those Pharaonic edicts which were promulgated in order to lessen the number of the Israelites. It was the intention of divine providence that the great and wonderful destiny of the child should be from the first apparent: and what the Lord had done for Moses he intended also to accomplish for the whole nation of Israel.

It was an important event that the infant Moses, having been exposed near the banks of the Nile, was found there by an Egyptian princess; and that, having been adopted by her, he thus obtained an education at the royal court (Exod. ii. 1-10). Having been taught all the wisdom of the Egyptians (Acts vii. 22; comp. Joseph. *Antiq.* ii. 9. 7), the natural gifts of Moses were fully developed, and he thus became in many respects better prepared for his future vocation.

After Moses had grown up, he returned to his brethren, and, in spite of the degraded state of his people, manifested a sincere attachment to them. He felt deep compassion for their sufferings, and showed his indignation against their oppressors by slaying an Egyptian whom he saw ill treating an Israelite. This doubtful act became by Divine Providence a means of advancing him further in his preparation for his future vocation, by inducing him to escape into the Arabian desert, where he abode for a considerable period with the Midianitish prince, Jethro, whose daughter Zipporah he married (Exod. ii. 11, sq.). Here, in the solitude of pastoral life, he was appointed to ripen gradually for his high calling, before he was unexpectedly and suddenly sent back among his people, in order to achieve their deliverance from Egyptian bondage.

His entry upon this vocation was not in consequence of a mere natural resolution of Moses, whose constitutional timidity and want of courage rendered him disinclined for such an undertaking. An extraordinary divine operation was required to overcome his disinclination. On Mount Horeb he saw a burning thorn-bush, in the flame of which he recognised a sign of the immediate presence of Deity, and a divine admonition induced him to resolve upon the deliverance of his people. He returned into Egypt, where neither the dispirited state of the Israelites, nor the obstinate opposition and threatenings of Pharaoh, were now able to shake the man of God.

Supported by his brother Aaron, and commissioned by God as his chosen instrument, proving, by a series of marvellous deeds, in the midst of heathenism, the God of Israel to be the only true God, Moses at last overcame the opposition of the Egyptians. According to a divine decree, the people of the Lord were to quit Egypt, under the command of Moses, in a triumphant manner. The punishments of God were poured down upon the hostile people in an increasing ratio, terminating in the death of the firstborn, as a sign that all had deserved death. The formidable power of paganism, in its conflict with the theocracy, was obliged to bow before the apparently weak people of the Lord. The Egyptians paid tribute to the emigrating Israelites (Exod. xii. 35), who set out laden with the spoils of victory.

The enraged king vainly endeavoured to destroy the emigrants. Moses, firmly relying upon miraculous help from the Lord, led his people through the Red Sea into Arabia, while the host of Pharaoh perished in its waves (Exod. xii.-xv.).

After this began the most important functions of Moses as the lawgiver of the Israelites, who were destined to enter into Canaan as the people of promise, upon whom rested the ancient blessings of the patriarchs. By the instrumentality of Moses they were appointed to enter into intimate communion with God through a sacred covenant, and to be firmly bound to him by a new legislation. Moses, having victoriously repulsed the attack of the Amalekites, marched to Mount Sinai, where he signally punished the defection of his people, and gave them the law as a testimony of divine justice and mercy. From Mount Sinai they proceeded northward to the desert of Paran, and sent spies to explore the Land of Canaan (Num. x.-xiii.). On this occasion broke out a violent rebellion against the lawgiver, which he, however, by divine assistance, energetically repressed (Num. xiv.-xvi.).

The Israelites frequently murmured, and were disobedient during about forty years. In a part of the desert of Kadesh, which was called Zin, near the boundaries of the Edomites, after the sister of Moses had died, and after even the new generation had, like their fathers, proved to be obstinate and desponding, Moses fell into sin, and was on that account deprived of the privilege of introducing the people into Canaan. He was appointed to lead them only to the boundary of their country, to prepare all that was requisite for their entry into the land of promise, to admonish them impressively, and to bless them.

It was according to God's appointment that the new generation also, to whom the occupation of the country had been promised, should arrive at their goal only after having vanquished many obstacles. Even before they had reached the real boundaries of Canaan they were to be subjected to a heavy and purifying trial. It was important that a man like Moses was at the head of Israel during all these providential dispensations. His authority was a powerful preservative against despondency under heavy trials.

Having in vain attempted to pass through the territory of the Edomites, the people marched round its boundaries by a circuitous and tedious route. Two powerful kings of the Amorites, Sihon and Og, were vanquished. Moses led the people into the fields of Moab over against Jericho, to the very threshold of Canaan (Num. xx., xxi.). The oracles of Balaam became, by the instrumentality of Moses, blessings to his people, because by them they were rendered conscious of the great importance of having the Lord on their side.

Moses happily averted the danger which threatened the Israelites on the part of Midian (Num. xxv.-xxxi.). Hence he was enabled to grant to some of the tribes permanent dwellings in a considerable tract of country situated to the east of the river Jordan (Num. xxxii.), and to

give to his people a foretaste of that well-being which was in store for them.

Moses made excellent preparations for the conquest and distribution of the whole country, and took leave of his people with powerful admonitions and impressive benedictions, transferring his government to the hands of Joshua, who was not unworthy to become the successor of so great a man. With a longing but gratified look, he surveyed, from the elevated ground on the border of the Dead Sea, the beautiful country destined for his people.

Moses died in a retired spot at the age of one hundred and twenty years. He remained vigorous in mind and body to the last. His body was not buried in the promised land, and his grave remained unknown, lest it should become an object of superstitious and idolatrous worship. This honour was due, not to him, but to the Lord, who had manifested himself through the whole life of Moses. Not the body, but the word, of Moses was permanently to abide in Israel. The people of God produced no prophet greater than Moses, because by none was the Lord more glorified. Among all the men of God recorded in the Old Testament, Moses presents the most wonderful and imposing aspect.

The Pentateuch is the greatest monument of Moses as an author. The ninetieth psalm also seems to be correctly ascribed to him. Some learned men have endeavoured to prove that he was the author of the book of Job, but their arguments are inconclusive [Job].

Numerous traditions, as might have been expected, have been current respecting so celebrated a personage. Some of these were known to the ancient Jews, but most of them occur in later rabbinical writers (comp. Philo, *De Vita Mosis*, c. iii.; Joseph. *Antiq.* ii. 9, sq.; Bartolocci, *Bibliotheca Rabbinica*, iv. 115, sq.).

The name of Moses is celebrated among the Arabs also, and is the nucleus of a mass of legends (comp. Hottinger, *Historia Orientalis*, p. 80, sq.). The Greek and Roman classics repeatedly mention Moses, but their accounts contain the authentic Biblical history in a greatly distorted form (vid. the collection of Meier, *Judaica, seu veterum Scriptorum profanorum de Rebus Judaicis Fragmenta*, Jenæ, 1832).

Concerning the life of Moses, compare also Warburton, *On the Divine Legation of Moses;* Hess, *Geschichte Mosis*, Zurich, 1778, 2 vols.; Niemeyer, *Charakteristik der Bibel*, 3rd vol.

H. A. C. H.

MOTH (עָשׁ) occurs in Job iv. 19; xiii. 28; xxvii. 18; Isa. l. 9; li. 8; Hosea v. 12; Matt. vi. 19, 20; Luke xii. 33; Ecclus. xix. 3; xlii. 13: in all which places the Sept. and Greek Testament read *σής*, and the Vulg. *tinea*. In Ps. xxxix. 11, עש, Sept. *ἀράχνη*, Vulg. *aranea*. The same Hebrew word occurs in the phrase 'moth-eaten,' Job xiii. 28; Sept. *σητόβρωτον, comeditur a tineis;* James v. 2, *σητόβρωτα, a tineis comesta*. The word סס occurs once in Isa. li. 8; Sept. *σής*, Vulg. *tinea*. There is no biblical insect whose identity is better ascertained. The following is the chain of evidence through which it is traced. The word *σής*, adopted by the Sept., unquestionably means 'moth' in the writings of Aristotle (who was contemporary with the translators of the earliest and best rendered portions of the Sept.); for when treating of the generation of insects he says: Γίνεται δὲ καὶ ἄλλα ζῳδάρια, τὰ μὲν ἐν ἐρίοις, καὶ ὅσα ἐξ ἐρίων ἐστίν, οἷον οἱ σῆτες, οἱ ἐμφύονται μᾶλλον ὅταν κονιορτώδη ᾖ τὰ ἔρια. 'Other small creatures are generated, some in wool, and in such substances as are formed from wool, as for instance, moths, or moth worms, which are principally produced in dusty woollen substances:' and, again, speaking of the same insect, γίνεται δὲ ἐν χιτῶνι ὁ σκώληξ οὗτος, 'this worm or insect is produced in garments.' To the same effect, Aristotle's pupil, Theophrastus, speaking of the herb *πολίον*, says, τοῦτο δὲ καὶ πρὸς τοὺς σῆτας τοὺς ἐν τοῖς ἱματίοις ἀγαθόν— 'this is good against the moths in clothes' (*Hist. Plant.* i. 16). Menander, educated under Theophrastus, speaking of things which consume, says, τὸ δ' ἱμάτιον οἱ σῆτες, 'moths consume clothes.' Then with regard to the word *tinea*, adopted by the Vulg., Pliny uses it in translating our first quotation from Aristotle ('pulvis in lanis et veste *tineas* creat,' *Hist. Nat.* xi. 41, edit. Harduin), and elsewhere, for the moth, though he also applies the word to other insects, &c.; and from the time of Pliny to Aldrovandus, this, and almost all the other names in natural history, remained the same, and were retained as much as possible by Willughby and Linnæus. The latter, under the order Lepidoptera, genus Phalæna, gives the species of moths, *Tinea tapetzella*, *T. pellionella*, and *T. recurvaria sarcitella*, as peculiarly destructive to woollen clothes, furs, &c. The following allusions to the moth occur in Scripture;—to its being produced in clothes: 'for from garments cometh a moth' (Ecclus. xlii. 13); to its well-known fragility: 'mortal men are crushed *before* the moth' (Job iv. 19), literally 'before the face of the moth,' but which words really mean '*like as* the moth is crushed.' The Hebrew word לפני, here translated 'before,' occurs in the sense of *as* or *like* in 1 Sam. i. 16: 'count not thine handmaid (לפני בת־בליעל) as a daughter of Belial;' literally, 'before,' or 'as the face of:' and so the Sept. understood our passage, *σητὸς τρόπον*. The Latin phrase *ad faciem* occurs in the same sense in Plautus (*Cistell.* i. 1. 73): 'ad istam faciem est morbus qui me macerat.' Others take this allusion to the moth in an active sense, thus—'as a garment is consumed by the moth;' so the Vulg. *a tinea*. The allusion to 'the house of the moth' (Job xxvii. 18) seems to refer plainly to the silky spindle-shaped case, covered with detached hairs and particles of wool, made and inhabited by the larva of the *Tinea sarcitella;* or to the felted case or tunnel formed by the larva of the *Tinea pellionella;* or to the arched gallery formed by eating through wool by the larva of the *Tinea tapetzella*. References occur to the destructiveness of the clothes-moth: 'as a garment that is moth-eaten' (Job xiii. 28); 'the moth shall eat them up' (Isa. l. 9); 'the moth shall eat them up like a garment' (li. 8); 'I will be to Ephraim as a moth,' *i. e.* will secretly consume him (Hos. v. 12); comp. Matt. vi. 19, 20; Luke xii. 33; James v. 2, metaphorically; and Ecclus. xix. 3—'Moths and worms shall have him that cleaveth to harlots,' but the better reading is *σήπη*, 'rottenness.' Since the 'treasures' of the Orientals, in

ancient times, consisted partly of 'garments, both new and old' (Matt. xiii. 52; and comp. Josh. vii. 21; Judges xiv. 12), the ravages of the clothes-moth afforded them a lively emblem of destruction. Their treasures also consisted partly of corn laid up in barns, &c. (Luke xii. 18, 24); and it has been supposed that the *βρῶσις*, translated 'rust,' joined with the *σής* in Matt. vi. 19, 20, refers also to some species of moth, &c., probably in the larva state, which destroys corn. Kuinoel says the 'curculio, or kornwurm,' the larva of the *Tinea granella*, is injurious to corn. Compare the common Roman phrase *blatta et tinea*. Aquila gives *βρῶσις* for עש in Jer. l. 9; and those words, 'Gods which cannot save themselves from moths,' *βρωμάτων*, Ep. of Jer. xii., may be another instance. Comp. Mal. iii. 11, Sept. and MS. B. in margin, and Symmachus in Isa. v. 9. The word סס occurs, as well as the word עש, in Isa. li. 8: 'the עש shall eat them up like a garment, and the סס shall eat them like *wool*,' Sept. *ὡς ἔρια βρωθήσεται ὑπὸ σητός* (comp. the first quotation from Aristotle), where the similarity between the Hebrew and Greek word is striking. If two species of moth be here alluded to, may not the סס be the distinctive name for the *Tinea tapetzella*, which is peculiarly destructive to 'wool?' The Sept. also gives *σής* for רקב, Prov. xiv. 30, and for חדק, Micah vii. 4. Moths, like fleas, &c., amid other more immediate purposes of their existence, incidentally serve as a stimulus to human industry and cleanliness; for, by a remarkable discrimination in her instinct, the parent moth never deposits her eggs in garments frequently overlooked or kept clean. Indeed, the most remarkable of all proofs of animal intelligence, is to be found in the larvæ of the water-moth, which get into straws, and adjust the weight of their case so that it can always float: when too heavy they add a piece of straw or wood, and when too light a bit of gravel (*Transactions of the Royal Society of Edinburgh*, vol. i. p. 12).—J. F. D.

MOTHER. The Hebrew word for *mother* is אֵם *am*, and is regarded by the lexicographers as a primitive, imitating the earliest lisping of an infant: they compare it with the Greek *μάμμα, μάμμη, μαῖα*; Sanscrit, *má, ambâ*; Copt., *mau*; English and French, *mama*; German, *amme* (nurse), &c.

The ordinary applications of the word require no illustration; but the following points of Hebrew usage may be noticed. When the father had more than one wife, the son seems to have confined the title of 'mother' to his real mother, by which he distinguished her from the other wives of his father. Hence the source of Joseph's peculiar interest in Benjamin is indicated in Gen. xliii. 29, by his being 'his mother's son.' The other brethren were the sons of his father by other wives. Nevertheless, when this precision was not necessary, the step-mother was sometimes styled mother. Thus Jacob (Gen. xxxvii. 10) speaks of Leah as Joseph's mother, for his real mother had long been dead. The step mother was however more properly distinguished from the womb-mother by the name of 'father's wife' (אִשַּׁת אָב). The word 'mother' was also, like father, brother, sister, employed by the Hebrews in a somewhat wider sense than is usual with us. It is used of a grandmother (1 Kings xv. 10), and even of any female ancestor (Gen. iii. 20); of a benefactress (Judg. v. 7), and as expressing intimate relationship (Job xvii. 14). In Hebrew, as in English, a nation is considered as a mother, and individuals as her children (Isa. l. 1; Jer. l. 12; Ezek. xix. 2; Hos. ii. 4; iv. 5); so our 'mother-country,' which is quite as good as 'father-land,' which we seem beginning to copy from the Germans. Large and important cities are also called mothers, *i. e.* 'mother-cities,' with reference to the dependent towns and villages (2 Sam. xx. 19), or even to the inhabitants, who are called her children (Isa. iii. 12; xlix. 23). 'The *parting* of the way, at the head of two ways' (Ezek. xi. 21) is in the Hebrew 'the mother of the way,' because out of it the two ways arise as daughters. In Job i. 21, the earth is indicated as the common 'mother to whose bosom all mankind must return.' So Chaucer—

'And on the ground, which is my modres gate,
I knocke with my staf erlich and late,
And say to hire, "Leve, mother, let me in."'

The particulars relating to the position which a mother occupied among the Jews, are involved in other relations, which are referred to the general head Woman.

MOUNTAINS. The mountains mentioned in Scripture are noticed under their different names, and a general statement with reference to the mountains of Palestine is given under that head. We have therefore in this place only to notice more fully some remarkable symbolical or figurative uses of the word in the Bible.

In Scripture the governing part of the body politic appears under symbols of different kinds. If the allegory or figurative representation is taken from the heavens, the luminaries denote the governing body; if from an animal, the head or horns; if from the earth, a mountain or fortress; and in this case the capital city or residence of the governor is taken for the supreme power. These mutually illustrate each other. For a capital city is the head of the political body: the head of an ox is the fortress of the animal; mountains are the natural fortresses of the earth; and therefore a fortress or capital city, though seated in a plain, may be called a mountain. Thus the words head, mountain, hill, city, horn, and king, are used in a manner as synonymous terms to signify a kingdom, monarchy, or republic, united under one government, only with this difference, that it is to be understood in different respects; for the term head represents it in respect of the capital city; mountain or hill in respect of the strength of the metropolis, which gives law to, or is above, and commands the adjacent territory. When David says, 'Lord, by thy favour thou hast made my mountain to stand strong' (Ps. xxx. 7), he means to express the stability of his kingdom.

It is according to these ideas that the kingdom of the Messiah is described under the figure of a mountain (Isa. ii. 2; xi. 9; Dan. ii. 35), and its universality by its being the resort of all nations, and by its filling the whole earth. The mystic mountains in the Apocalypse denote kingdoms and states subverted to make room for the Messiah's kingdom (Rev. vi. 14; xvi. 20).

The Chaldæan monarchy is described as a mountain in Jer. li. 25; Zech. iv. 7; and the Targum illustrates the idea by substituting the

word 'fortress' in the former text. In this view, then, a mountain is the symbol of a kingdom, or of a capital city with its domains, or of a king, which is the same.

Mountains are frequently used to signify places of strength, of what kind soever, and to whatsoever use applied (Jer. iii. 23).

Eminences were very commonly chosen for the sites of Pagan temples: these became places of asylum, and were looked upon as the fortresses and defenders of the worshippers, by reason of the presence of the false deities in them. On this account mountains were the strongholds of Paganism, and therefore in several parts of Scripture they signify idolatrous temples and places of worship (Jer. ii. 23; Ezek. vi. 2-6; Mic. iv. 1; comp. Deut. xii. 2; Jer. ii. 20; iii. 16; Ezek. vi. 3). See Wemyss's *Clavis Symbolica*, pp. 309-316.

MOURNING. This head embraces both the outward expressions of sorrow for the dead, referred to in the Scriptures, and those expressions which were intended to exhibit repentance, &c. These subjects will be pursued according te Townsend's chronological arrangement, and sinco they nearly approximate, will be pursued together. Assuming the propriety of this arrangement, the earliest reference to any kind of mourning is that of Job (B.C. 2130), who being informed of the destruction of his children as the climax of his calamities, 'arose, rent his mantle, shaved his head, and fell down upon the ground and worshipped' (Job i. 20), uttered sentiments of submission (ver. 21), and sat down among the ashes (ch. ii. 8). His friends came to him by an appointment among themselves to mourn with him and comfort him (ver. 11); they lift up their voices and wept upon a view of his altered appearance; they rent every man his mantle and sprinkled dust upon their heads towards heaven (ver. 12), and sat down with him on the ground seven days and seven nights, waiting till his grief should subside before they commenced their office as mourners. Job then bewails aloud his unhappy condition (ch. iii.). In ch. xvi. 15, 16, reference is made to the customs of sewing sackcloth upon the skin, defiling the head with dust, and suffering the face to be begrimed with weeping. Clamour in grief is referred to (xix. 7; xx. 28): it is considered a wicked man's portion that his widows shall not weep at his death (xxvii. 15). Upon Job's recovery from his afflictions all his relatives and acquaintances bemoan and comfort him concerning his past sufferings; which seems to have been a kind of congratulatory mourning, indulged in order to heighten the pleasures of prosperity by recalling associations of adversity (ch. xlii. 11). Indeed, the expressions of affectionate joy and grief nearly coincide. Joseph fell upon his brother Benjamin's neck and wept (Gen. xlv. 14; comp. Acts xx. 37, 38, and Gen. l. 1). However it is to be accounted for, in the course of the book of Job nearly all the chief characteristics of eastern mourning are introduced. This will appear as we proceed. The next instance is that of Abraham, who came to mourn and weep for Sarah (B.C. 1871), words which denote a formal mourning (Gen. xxiii. 2). Days of mourning are referred to in regard to the expected death of Isaac (Gen. xxvii. 41). These appear generally to have consisted of seven, as for Saul (1 Sam. xxxi. 13; for Judith xvi. 24; comp. Ecclus. xxii. 12). Weeping appears (B.C. 1729), either as one chief expression of mourning, or as the general name for it. Hence when Deborah, Rebecca's nurse, was buried at Bethel under an oak, at this period, the tree was called Allon-bachuth, the oak of weeping (Gen. xxxv. 8). The children of Israel were heard to weep by Moses throughout their families, every man in the door of his tent (Num. xi. 10; comp. xiv. 1; xxv. 6). So numerous are the references to tears in the Scriptures as to give the impression that the Orientals had them nearly at command (comp. Ps. vi. 6). The woman washed our Lord's feet with tears (Luke vii. 38; comp. Ecclus. xxviii. 17). Weeping, with lifting up of the voice, occurs in Ruth i. 9; 1 Sam. ii. 4; 2 Sam. iii. 31; xiii. 36). Their exciteableness appears otherwise; they shout for joy and howl for grief, even the ministers of the altar (Joel i. 13; Micah i. 8, &c.). Reuben rent his clothes upon finding Joseph gone (Gen. xxxvii. 29), and uttered lamentations (ver. 30). Jacob rends his clothes and puts sackcloth upon his loins, and mourns for his son many days; his sons and his daughters rise up to comfort him, and he gives utterance to his grief; '*thus* his father wept for him' (Gen. xxxvii. 34, 35). Joseph's brothers rend their clothes (Gen. xliv. 13); and this act, as expressive of grief or horror, occurs in multitudes of passages down to the last age of the Jewish empire (Acts xiv. 14). Scarcely less numerous are the references to sackcloth on the loins as an expression of mourning; we have even lying in sackcloth (1 Kings xxi. 27), and sackcloth upon both man and beast at Nineveh (Jonah iii. 8). Joseph's brethren fell to the ground before him in token of grief (Gen. xliv. 14); and this, or lying, or sitting on the ground, was a common token of mourning (comp. Ps. xxxv. 14; 1 Sam. xxv. 24; Isa. iii. 26; xlvii. 1; Ezek. xxvi. 16, &c.). The next incident in the history of the subject is the mourning for Jacob by the Egyptians, which was conducted, no doubt, by professional mourners during threescore and ten days (Gen. l. 3), called the days of mourning (ver. 4), though most likely that computation includes the process of embalming (Wilkinson's *Manners and Customs of the Ancient Egyptians*, v. 454, 459). It seems to have amounted to a royal mourning, doubtless out of regard to Joseph. Herodotus states that the Egyptians mourned for a king seventy-two days. The mourning for Joseph's father was renewed by Joseph's command, with a very great and sore lamentation, upon the funeral cavalcade having arrived in Canaan, and continued seven days (ver. 10). The vehemency of that mourning seems to have surprised even the Canaanites, who in consequence named the place where it was held Abel-mizraim, or the mourning of the Egyptians (ver. 11). We learn from Diodorus that at the death of a king the Egyptian people tore their garments, every temple was closed, sacrifices were forbidden, and no festivals celebrated. A procession of two or three hundred persons wandered through the streets, throwing dust and mud upon their heads, and twice every day sung a funeral dirge in honour of the deceased. In the mean time the people abstained from baths, ointments, every luxury, and even wheaten bread (i. 72, 91). The Egyptians have ever been re-

nowned for the vociferation of their grief; 'there was a great cry in Egypt at the death of the first-born' (Exod. xii. 30). When the children of Israel (B.C. 1491) mourned under the threat of the divine displeasure, they did not put on their ornaments (Exod. xxxiii. 4; comp. Joel ii. 16; Ezek. xxiv. 17). At the giving of the law the modes of mourning were regulated by several enactments. It was forbidden the Jews to make cuttings in their flesh for the dead (Lev. xix. 28). The ancient Egyptians, according to Herodotus, did not cut themselves (ii. 61); it was a Syrian custom, as appears from the votaries of Baal (1 Kings xviii. 28): nor were the Jews allowed to make any baldness between their eyes for the dead (Deut. xiv. 1). The priests were forbidden to uncover the head in mourning (Lev. x. 6), or to rend their clothes, or to contract the ceremonial defilement involved in mourning except for their nearest kindred (Lev. xxi. 1, 4); but the high-priest was entirely forbidden to do so even for his father or his mother (ver. 11), and so was the Nazarite (Num. vi. 7). These prohibitions respecting the head and the beard (Lev. xix. 27) seem to have been restricted to funeral occasions, as the customs referred to were lawfully practised on other sorrowful events (comp. Ezra ix. 3; Job i. 20; Isa. xxii. 12; Jer. vii. 29; Micah i. 16). Even the food eaten by mourners was considered unclean (comp. Deut. xxvi. 14, with Hos. ix. 4; Ezek. xxiv. 17). The Jews were commanded to afflict their souls on the day of atonement (Lev. xxiii. 27), and at the Feast of Trumpets (Num. xxix. 7). All the house of Israel mourned for Aaron thirty days (Num. xx. 29). The beautiful captive, whom the law permitted to marry, was required first to bewail her father and mother a full month, and the requisitions that she should shave her head and pare her nails have been by some considered signs of mourning (Deut. xxi. 11, 13). The Israelites wept for Moses thirty days, called the days of weeping *and* mourning for Moses (Deut. xxxiv. 8; B.C. 1451). Joshua and the elders of Israel put dust upon their heads at the defeat of Ai, and fasted (Josh. vii. 6), as did the eleven tribes after the defeat at Gibeah, and wept (Judg. xx. 26), as did all the Israelites at the command of Joshua, on which occasion it is said 'they drew water and poured it out before the Lord' (1 Sam. vii. 6; comp. Ps. xxii. 14). The prophet Joel commanded a fast as part of a national mourning. A fast is proclaimed to all the inhabitants or visitors at Jerusalem (Jer. xxxvi. 9; comp. Zech. vii. 5). Fasting is practised at Nineveh as part of a public humiliation (Jonah iii. 5). In our Lord's language, 'to fast' and 'to mourn' are the same thing (Matt. ix. 15). Public humiliations attended with religious assemblies and prayers (Joel ii. 16, 17); with fasts (Isa. lviii. 3); see all these united (1 Macc. iii. 44, 47, 48). The first complete description of mourning for the dead occurs in 2 Sam. iii. 31, 35, where David commands Joab and all the people that were with him to rend their clothes, gird themselves with sackcloth, and mourn for Abner, and David himself followed the bier, and they buried Abner in Hebron; and the king lifted up his voice and wept at the grave of Abner, and all the people wept, and David fasted two days, and wrote a lamentation for the deceased. Elegies were composed by the prophets on several disastrous occasions (Ezek. xxvi. 1-18; xxvii. 1-36; Amos v. 1, &c.). The incident of Jephthah's daughter (B.C. 1187) is too uncertain to afford any index to the modes of mourning at that era. It appears that she was allowed two months to bewail her virginity, with her companions, and that the Jewish women of that country went some where yearly to lament or celebrate her (Judg. xi. 37-40) [JEPHTHAH]. In Ps. xxxv., which is ascribed to David, there is a description of the humiliations practised by the friends of the sick, in order to procure their recovery: 'When they were sick my clothing was sackcloth; I humbled my soul with fasting; I behaved as if it had been a friend or a brother; I bowed down heavily, as one that mourneth for his mother;' where different modes of mourning seem adverted to for different occasions. Samuel is honoured with a public mourning by the Israelites (1 Sam. xxv. 1), B.C. 1058. Upon the death of Saul, David wrote an elegy (2 Sam. i. 17-27). This, like that upon the death of Abner, seems to be a poetical description of the character of the departed, like the dirge for an Egyptian king.

406. [Mourning at Grave—Lifting up hands, &c.]

Lifting up the hands seems to have been an expression of grief (Ps. cxli. 2; Lam. i. 17; Ezra ix. 5). Messengers were sent to condole with survivors; thus David sent such to Hanun, king of Ammon, upon the death of his father (2 Sam. x. 1, 2); 'Many of the Jews came to comfort Martha and Mary' (John xi. 19); 'A great company of women attended our Lord to the cross, bewailing and lamenting him' (Luke xxiii. 27); 'Much people' were with the widow of Nain (Luke vii. 12). Indeed, if persons met a funeral procession they were expected to join it—a custom which is thought to illustrate St. Paul's words, 'Weep with them that weep' (Rom. xii. 15). Herodotus relates that when Cambyses bewailed his calamities, the Persians tore their garments and expressed their grief aloud (iii. 66). The next incident in historical order is the mourning of Bathsheba for Uriah (2 Sam. xi. 26). David, in deprecation of the death of his son by her, prayed to God for the child, fasted, and lay all night upon the earth. Ashes were often laid on the head in token of mourning; thus 'Tamar put ashes on her head,

rent her garment, and laid her hand upon her head, and went on crying' (2 Sam. xiii. 19, 20; comp. Isa. lxi. 3; 2 Esdras ix. 38). They even wallowed in ashes (Ezek. xxvii. 30). Mourning apparel is first mentioned in 2 Sam. xiv. 2, where it appears that the wearer did not anoint himself with oil (comp. Matt. vi. 17). In Egypt the common people allowed their beards to grow when mourning (Herod. ii. 36; comp. 2 Sam. xix. 24). The first reference to hired mourners occurs in Eccles. xii. 5, 'The mourners הסופדים go about the streets.' (The root of this word, observes Gesenius, signifies 'a mournful noise,' and he adduces Micah i. 8; Jer. xxii. 18; xxxiv. 5). They are certainly alluded to in Jer. ix. 17-20, 'the mourning women' (probably widows, comp. Ps. lxxviii. 64; Acts ix. 39), answering to the Præficæ of the Romans (comp. Hor. *Ars Poet.* 429). Another reference to them occurs in 2 Chron. xxxv. 25; comp. Joseph. *De Bell. Jud.* iii. 9. 5. The greater number of the mourners in ancient Egypt were women, as in the modern East. In the following cut (No. 407) mourners, all females, are

407. [Egyptian Mourners—ashes on Head.]

shown casting dust upon their heads before the mummy of a man. Mourning for the dead was conducted in a tumultuous manner; they also wept and wailed greatly (Mark v. 38). Even devout men made great lamentations (Acts viii. 2). When any one died in ancient Egypt the females of his family covered their faces with mud, ran through the streets with their bosoms exposed, striking themselves, and uttering loud lamentations; they were joined as they went by neighbours and friends, and, if the deceased was of consequence, by strangers also. The men, girding their dress below their waist, ran through the town, smiting their breast, and throwing mud upon their heads (Herod. ii. 85; Diod. Sic. i. 91). The modern lamentations in Cairo seem to resemble the ancient. The mourners are said to parade the streets, crying 'Oh, my misfortune!' 'Oh, my brother!' 'Oh, my master!' 'Oh, lord of the house!' &c. The similarity is striking between such exclamations and the following: Jephthah's 'Alas, my daughter!' David's 'Oh, Absalom, my son; my son Absalom!' (2 Sam. xviii. 33.) 'Alas, my brother!' (1 Kings xiii. 30). 'Ah, my brother! ah, my sister! ah, Lord, or ah, his glory' (Jer. xxii. 18). See Lane's *Modern Egyptians*, ii. 286.

Among other signs of mourning they shaved the head, and even tore off the hair (Amos viii. 10; Micah i. 16; Isa. xv. 2; xxii. 12; Jer. vii. 29). Ezra plucked off the hair of his head and of his beard (Ezra ix. 3; Joseph. *Antiq.* xvi. 7. 5). The Jews went up to the house-tops to mourn (Isa. xv. 2, 3; xxii. 1); and so did the Moabites

408. [Wail with Tabrets, &c.]

(Jer. xlviii. 37, 38; Judith viii. 5). They also made cuttings in their hands (Jer. xlviii. 37, 38); they smote upon the thigh (Jer. xxxi. 19; Ezek. xxi. 12); on the breast (Nahum ii. 7; Luke xviii. 13; xxiii. 48; they smote both hands together (Num. xxiv. 10), stamped with the foot (Ezek. vi. 11), bowed down the head (Lam. ii. 10), covered the lips (Micah iii. 7), the face (2 Sam. xix. 4), and the head (2 Sam. xv. 30), and went barefoot (2 Sam. xv. 30). Neighbours and friends provided food for the mourners (2 Sam. iii. 35; Jer. xvi. 7; comp. Ezek. xxiv. 17); this was called 'the bread of bitterness,' 'the cup of consolation.' In later times the Jews had a custom of giving bread to the poor, at funerals, and leaving it for their use at tombs, graves, &c., which resembles the Roman *visceratio* (Tobit iv. 17; Ecclus. xxx. 8). Women went to tombs to indulge their grief (John xi. 31); anniversary mournings (1 Esdras i. 22). The extravagance of mourning among the Greeks is ridiculed by

[409. Mourning the Dead—Etruscan.]

Lucian (*De Luctu*), who describes them as expostulating with the dead for leaving them, &c., and other particulars similar to an Irish wake. It is difficult to ascertain the philosophy of mourning. Potter thinks that it consisted in receding as much as possible from ordinary customs and manners, in token that an extraordinary event had happened, and observes that such is the diversity of human customs that the signs of mourning in some nations coincide with those of joy in others (*Archæologia Græca*, ii. 194, 195, Lond. 1775). Although, no doubt, many modes of mourning are conventional, and originated in caprice, yet there would seem to be physical reasons for certain forms which have so widely and permanently prevailed. Shaving the head may be a dictate of nature to relieve the excited brain. Plucking the hair is well calculated to assuage the action of some particular organs, to which the sensations of the individual may be a sufficient guide. Beat-

ing the breast may relieve the heart, oppressed with a tumultuous circulation. Cutting may be the effect of nature's indication of bleeding. Crying aloud certainly diverts the attention from anguish of mind or body. Tearing and rending seem to palliate nervous irritation, &c. (Carpzov, *De cinerum ap. Hebr. usu mœroris atque luctus*, Rostock; Kirchmann, *De Funer. Roman.*; J. Q. Hedenus, *De Scissione Vest. Ebræis ac Gentibus usitata*, Jen. 1663; or in Ugolini, *Thesaurus*, 29; Wichmannshausen, *De Laceratione Vestium ap. Hebr.* Viteb.; also in Ugolini, *Thesaurus*, 33; Wichmannshausen, *De Corpore Scissuris figurisque non cruentando*, Viteb.; J. G. Michaelis, *De Incisura super mortuos*, in *Observatt. Sacr.*—J. F. D.

MOUSE (עַכְבָּר *achbar*; perhaps generically including *aliarbai* or *jerboa*, or فَارَة *parah* of the Arabs). The word occurs where, it seems, the nomenclature in modern zoology would point out two species of distinct genera (Lev. xi. 29; 1 Sam. vi. 4, 5, 11, 18; Isa. lxvi. 17). The radical meaning of the name, according to Bochart, designates a field ravager, one that devours the produce of agriculture, and therefore is applicable to several genera of Rodentia, &c., notwithstanding that the learned etymologist would confine it to the *jerboa* or jumping-mouse of Syria and Egypt, although that animal is not abundant in the first-mentioned region, and even in the second is restricted almost exclusively to the desert, as it can live without water. Bochart, it is true, cites examples of the ravages committed by murine animals in divers localities; but among them several are pointed out where the *jerboa* is rare, or not found at all; consequently they apply not to that species, but to some other Rodent. It is likely that the Hebrews extended the acceptation of the word *achbar*, in the same manner as was the familiar custom of the Greeks, and still more of the Romans, who included within their term *mus*, insectivora of the genus *sorex*, that is 'shrews;' carnivora, among which was the *Mustela erminea*, 'stoat' or 'ermine,' their *Mus ponticus*; and in the systematic order Rodentia, the *muridæ* contain *Myoxus glis* or fat dormouse; *Dipus jaculus* or Egyptian jerboa; *Mus*, rats and mice properly so called, constituting several modern genera; and *cricetus* or hamster, which includes the marmot or Roman *Mus Alpinus*. This was a natural result of the imperfect state of zoological science, where a somewhat similar external appearance was often held sufficient for bestowing a general name which, when more remarkable particulars required further distinction, received some trivial addition of quality or native country, or a second local designation, as in the present case; for, according to some Biblical critics, the *jerboa* may have been known also by the name of שָׁפָן, *shaphan*. In the above texts, all in 1 Sam. vi. apparently refer to the short-tailed field-mouse, which is still the most destructive animal to the harvests of Syria, and is most likely the species noticed in antiquity and during the crusades; for, had they been *jerboas* in shape and resembled miniature kangaroos, we would expect William of Tyre to have mentioned the peculiar form of the hestriyers, which was then unknown to Western Europe; whereas, they being of species or appearance common to the Latin nations, no particulars were required. But in Leviticus and Isaiah, where the mouse is declared an unclean animal, the species most accessible and likely to invite the appetite of nations who, like the Arabs, were apt to covet all kinds of animals, even when expressly forbidden, were, no doubt, the hamster and the dormouse; and both are still eaten in common with the *jerboa*, by the Bedoueens, who are but too often driven to extremity by actual want of food.—

C. H. S.

MOUTH (פֶּה). The ordinary applications of this word, common to all languages, require no explanation; but the following somewhat peculiar uses may be noted: 'Heavy-mouthed,' that is, slow of speech, and so translated in Exod. iv. 10; 'smooth mouth' (Ps. xxvi. 28), that is, a flattering mouth; so also 'a mouth of deceit' (Ps. cix. 2). The following are also remarkable phrases: 'To speak with one mouth to mouth,' that is, in person, without the intervention of an interpreter (Num. xii. 8; comp. 1 Kings viii. 15; Jer. xxxii. 4). 'With one mouth,' that is, with one voice or consent (Josh. ix. 2; 1 Kings xxii. 13; 2 Chron. xviii. 12). 'With the whole mouth,' that is, with the utmost strength of voice (Job xix. 16; Ps. lxvi. 17). 'To put words into one's mouth,' that is, to suggest what one shall say (Exod. iv. 15; Num. xxii. 38; xxiii. 5, 12; 2 Sam. xiv. 19, &c.). 'To be in one's mouth,' is to be often spoken of, as a law, &c. (Exod. xiii. 9; comp. Ps. v. 10; xxxviii. 15). The Hebrew also says, '*upon* the mouth,' where we say, and indeed our translation says, *in* or *into* the mouth (*e. g.* Nah. iii. 12); that which is spoken is also said to be '*upon* the mouth,' where we should say, 'upon the lips' (as in 2 Sam. xiii. 32). 'To lay the hand upon the mouth' is to be silent (Judg. xviii. 19; Job xxi. 5; xl. 4; comp. Prov. xxx. 32), just as we lay the finger on the mouth to enjoin silence. 'To write from the mouth of any one' is to do so from his dictation (Jer. xxxvi. 4, 27, 32; xlv. 1).

The mouth, as the organ of speech, also signifies the words that proceed out of it, which in the sacred style are the same as commands and actions, because they imply the effects of the thoughts; words and commands being the means used to communicate decrees to those who are to execute them. Instances of this also not in Scripture, in various shades of application, but few of them are preserved in translation. Thus (Gen. xlv. 12), 'according to the commandment of Pharaoh,' is in the original, 'according to the *mouth* of Pharaoh' (comp., among numerous other examples, Num. iii. 16; Job xxxix. 27; Eccles. viii. 2). Hence, for a person or thing to come out of the mouth of another is to be constituted or commanded to become an agent or minister under a superior power: this is frequent in the Revelations (Rev. xvi. 13, 14; i. 16; xi. 4, 5; xii. 15; ix. 19). The term *mouth* is not only applied to a speech or words, but to the speaker (Exod. iv. 16; Jer. xv. 19), in which sense it has a near equivalent in our expression 'mouth piece.'

MULBERRY-TREE. [BACA.]

MUSIC. It seems probable that music is the oldest of all the fine arts. It is more than any other

an immediate work of nature. Hence we find it among all nations, even those which are totally ignorant of every other art. Some instruments of music are in Scripture named even before the deluge, as being invented by Jubal, one of Cain's descendants (Gen. iv. 21); and some will regard this as confirmed by the common opinion of the Orientals. Chardin relates that the Persians and Arabians call musicians and singers *Kayne*, or 'descendants from Cain.' The instruments invented by Jubal seem to have remained in use after the flood, or at least the names were still in use, and occur in the latest books of the Old Testament. Music, in practical use, is almost constantly mentioned in connection with the song and the dance (Gen. xxxi.27; Exod. xv. 20), and was doubtless employed to elevate the former and regulate the latter. Women especially are seen to have employed it in this connection from the earliest times (Exod. xv. 20; Judg. xi. 34; 1 Sam. xviii. 6). At a later period we trace the appearance of foreign girls in Palestine, as in Greece and Italy, who visited the towns like the Bayaderes of the present day (Isa. xxiii. 16). Music was also through all periods used in social meetings, and in public rejoicings (1 Kings i. 40; Isa. v. 12; xiv. 11; xxiv. 8; Amos vi. 5; Hag. v. 14; 1 Macc. ix. 39; Judith iii. 8). By David music was variously and conspicuously connected with the temple worship (1 Chron. xxv. 1); in particular, the Levites, in their several choirs, performed their music divided into different classes at the great sacrifices (2 Chron. xxix. 25; xxx. 21; xxxv. 15). The prophets also appear to have regarded music as necessary to their services (1 Sam. x. 5); and they used it sometimes for the purpose, apparently, of bringing their minds into the frame suited for prophetic inspirations (2 Kings iii. 15). In the case of David playing before Saul, we have marked and interesting evidence that the effect of music in soothing the perturbasions of a disordered intellect, was well known among the Hebrews (1 Sam. xvi. 16).

It would be truly interesting to know to what extent the Israelites, during their sojourn in Egypt, where they became a nation, profited by the musical science and instruments of that country. It is impossible but the patriarchs had some kind of music and musical instruments before they journeyed thither; but the presence of music among the Israelites is not positively indicated till after the exode. If we could rely on the assumption that the celebrated painting at Beni-Hassan really represents the arrival of the Israelites in Egypt, we should thence learn that they were in possession of a lyre peculiar to themselves, or more probably adopted from the Canaanites. Whatever instruments they had before they went down to Egypt they doubtless retained, although they may have *added to* their musical science and their instruments while in that country. One people adopts the musical instruments of another, without also adopting its music. If we find this to be the case now, how much more so in those ancient times, when the absence of musical notation made every air a matter of tradition—since the traditions of one people are not usually imparted to foreigners, or sought after by a foreign people. Hence, although we have no doubt that the musical *instruments* which we read of in Scripture may find their types in the Egyptian monuments, we are unable even to conjecture how much they were indebted to the music of that people, of which indeed we know almost as little as of that of the Hebrews, although we know more of their instruments.

It will be remembered that music and song were cultivated in the region from which the Israelites first came (Gen. xxxi. 27), and that there must have been in the party which Abraham brought from Aram, and in the larger party which Jacob took into Egypt, many persons by whom this native music was practised, and to whom it was dear; and they were almost certain to preserve and transmit it to their children. In Egypt they were in the midst of a people infinitely their superiors in all the arts of civilization, in consequence of which they were kept more apart, and likely to adopt less from them than if the resemblance had been greater. Their condition was also soon changed into one of intolerable bondage—a state in the highest degree unfavourable to the cultivation of music and its kindred arts, although there were doubtless among the Israelites many individuals who were led by circumstances or inclination to cultivate the learning and the arts of Egypt, among which music was not likely to be forgotten. The conclusion we should be disposed to deduce from this is, that the native music of the Israelites was much of the same kind which exists in Syria and Western Asia to this day, and that the instruments resembled the most simple of those in present use, while we must be content to remain in ignorance respecting the measure of that improvement in musical science which they may be supposed to have derived from the Egyptians; although with respect to the *instruments* much information may be collected from the monuments of that ancient people.

With respect to the nature of the Hebrew music, it was doubtless of the same essential character as that of other ancient nations, and of all the present Oriental nations; consisting not so much in harmony (in the modern sense of the term) as in unison or melody. This is the music of nature, and for a long time after the more ancient period was common among the Greeks and Romans. From the Hebrews themselves we have no definite accounts in reference to this subject; but the history of the art among other nations must here also serve as our guide. It was not the harmony of differing or dissonant sounds, but the voice formed after the tones of the lyre, that constituted the beauty of the ancient music.

'Tu calamos inflare leves, ego dicere versus,' was the general rule followed in the musical rhapsodies of the ancients, and which so enraptured the Arabian servant of Niebuhr, that he cried out, in contempt of European music, 'By Allah, that is fine! God bless you!' (*Reisebeschreib. nach Arabien*, p. 176). The whole of antiquity is full of stories in praise of this music. By its means battles were won, cities conquered, mutinies quelled, diseases cured (Plutarch, *De Musica*). Effects similar to these occur in the Scriptures, and have already been indicated. Why are these effects so seldom produced by our music? Are they among the things in music yet to be restored? The different parts which we now have are the invention of modern times. Respecting the base, treble, &c., very few discriminating re-

marks had then been made. The old, the young, maidens, &c., appear to have sung one part. The beauty of their music consisted altogether in melody. The instruments by which, in singing, this melody was accompanied, occupied the part of a sustained base; and, if we are disposed to apply in this case what Niebuhr has told us, the beauty of the concerts consisted in this—that other persons repeated the music which had just been sung, three, four, or five notes, lower or higher. Such, for instance, was the concert which Miriam held with her musical fellows, and to which the 'toph,' or tabret, furnished the continued base; just as Niebuhr has also remarked of the Arabian women of the present day, 'that when they dance or sing in their harem, they always beat the corresponding time upon this drum' (*Reiseb.* i. 181). To this mode of performance belongs the 21th Psalm, which rests altogether upon the varied representation; in like manner, also, the 20th and 21st Psalms. This was all the change it admitted; and although it is very possible that this monotonous, or rather unisonous music, might not be interesting to ears tuned to musical progressions, modulations, and cadences, there is something in it with which the Orientals are well pleased. They love it for the very reason that it is monotonous or unisonous, and from Morocco to China we meet with no other. Even the cultivated Chinese, whose civilization offers so many points of resemblance to that of the ancient Egyptians, like their own music, which consists wholly of melody, better than ours, although it is not wholly despised by them (Du Halde's *China*, iii. 216).

A music of this description could easily dispense with the compositions which mark the time by notes; and the Hebrews do not appear to have known anything of musical notation; for that the accents served that purpose is a position which yet remains to be proved. At the best the accent must have been a very imperfect instrument for this purpose, however high its antiquity. Europeans had not yet attained to musical notes in the 11th century; and the Orientals do not profess to have known them till the 17th. On the other hand, the word סלה *selah*, which occurs in the Psalms and Habakkuk, may very possibly be a mark for the change of time, or for repeating the melody a few tones higher, or, as some think, for an accompaniment or after-piece of entirely instrumental music.

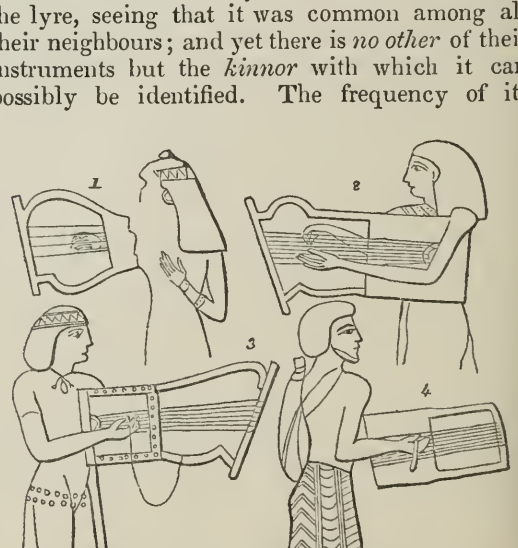
The Hebrew music is judged to have been of a shrill character; for this would result from the nature of the instruments — harps, flutes, and cymbals—which were employed in the temple service.

The manner of singing single songs was, it seems, ruled by that of others in the same measure, and it is usually supposed that many of the titles of the Psalms are intended to indicate the names of other songs according to which these were to be sung [Psalms].

There is a notion somewhat widely diffused, that in their sacred services the Hebrews dispensed with real melody, and contented themselves with such cantillation as they now use in their synagogues. This seems very doubtful. On such a subject it is not safe to argue from the practice of the modern Jews; and as singing is something so exceedingly simple and natural, it is difficult to believe that in the solemn services of their religion they stopped at the point of cantillation.

The allusions to music in the Scriptures are so incidental and concise, that it will never be possible to form out of them a complete or connected view of the state of musical science among the ancient Hebrews. The little knowledge which has been realized on the subject has been obtained chiefly through the patient labours and minute investigations of the authors named at the end of the next article.

MUSICAL INSTRUMENTS. It is less difficult to determine the general character of the Hebrew instruments of music, than to identify the particular instruments which are named in the Hebrew Scriptures. We see certain instruments different from our own in use among the modern Orientals, and we infer that the Hebrew instruments were probably not unlike these, because the Orientals change but little, and we recognise in them the peoples, and among them the habits and the manners described in the Bible. We see other instruments represented in great variety in the sculptures and mural tablets of the Egyptians; and we conclude that the Hebrews had something similar, on account of their long sojourn among that people. We find also many instruments presented in the sculptures of Greece and Rome, and we need not refuse to draw inferences from them, for they derived their origin from the East, and the Romans distinctly refer them to Syria (Juv. *Sat.* iii.; Liv. *Hist.* xxxix. 5). When, however, we endeavour to identify with these a particular instrument named by the Hebrews, our difficulty begins; because the Hebrew names are seldom to be recognised in those which they *now* bear, and because the Scripture affords us little information respecting the form of the instruments which it mentions. There are some clues, however. It is likely that the Greeks and Romans retained the names of the instruments they derived from Syria, and these names have been preserved. The Orientals also have for the most part retained the original names of things really old; and by comparing these names with the Hebrew, and then examining the instruments to which they appear to belong, we shall throw some glimmerings of light on the subject.

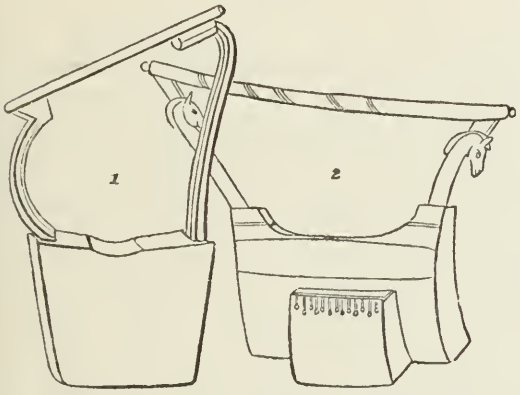


The matter naturally arranges itself under the following heads—

I. Stringed Instruments.
II. Wind Instruments.
III. Instruments of Percussion.

I.—1. At the head of the Stringed Instruments we must place the כִּנּוֹר *kinnor*, which is rendered 'harp' in the Authorized Version. The invention and first use of this instrument are ascribed to Jubal (Gen. iv. 21); and Laban names it among the instruments which should have celebrated the departure of his son-in-law (Gen. xxxi. 27). In the first ages the *kinnor* was consecrated to joy and exultation; hence the frequency of its use by David and others in praise of the Divine Majesty. It is thought probable that the instrument received some improvements from David (comp. Amos vi. 5). In bringing back the ark of the covenant (1 Chron. xvi. 5), as well as afterwards, at the consecration of the temple, the

kinnor was assigned to players of known eminence, chiefly of the family of Jeduthun (1 Chron. xxv. 3). Isaiah mentions it as used at festivals along with the *nebel;* he also describes it as carried round by Bayaderes from town to town (xxiii. 16), and as increasing by its presence the joy of vintage (xxiv. 8). When Jehoshaphat obtained his great victory over the Moabites, the triumphal entry into Jerusalem was accompanied by the *nebel* and the *kinnor* (2 Chron. xx. 27, 28). The sorrowing Jews of the captivity, far removed from their own land and the shadow of the sanctuary, hung their *kinnors* upon the willows by the waters of Babylon, and refused to sing the songs of Zion in a strange land (Ps. cxxxvii. 2). Many other passages of similar purport might be adduced in order to fix the uses of an instrument, the name of which occurs so often in the Hebrew Scriptures. They mostly indicate occasions of joy, such as jubilees and festivals. Of the instrument itself the Scripture affords us little further information than that it was composed of the sounding parts of good wood, and furnished with strings. David made it of the berosh wood [Berosh]; Solomon of the more costly algum (2 Sam. vi. 5; 2 Kings x. 12); and Josephus mentions some composed of the mixed metal called electrum. He also asserts that it was furnished with ten strings, and played with a plectrum (*Antiq.* vii. 12. 3); which however is not understood to imply that it never had any other number of strings, or was always played with the plectrum. David certainly played it with the hand (1 Sam. xvi. 23; xviii. 10; xix. 9), and it was probably used in both ways, according to its size.

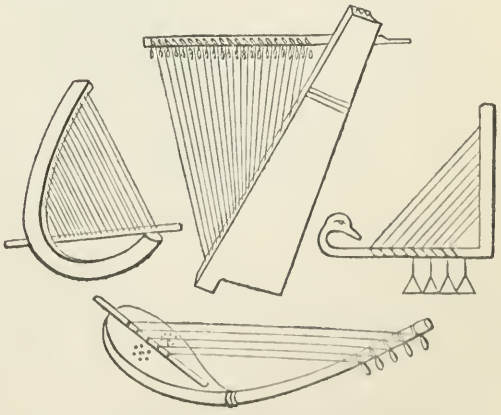


That this instrument was really a harp, is now very generally denied; and Pfeiffer, Winer, and other writers on the subject, conclude that it was a kind of guitar. This is entirely grounded on somewhat uncertain etymological derivations. Thus כנור is in the Septuagint translated by κιθάρα and κινύρα; and by Aquila, Symmachus, and Theodotion always by κιθάρα. Now the Greek *cithara*, it is argued, was a kind of guitar, from which the modern instrument so called, and its very name, *gittare*, *guitar*, is derived. The testimony of the Arabic is also adduced; for the name among the Arabians for instruments of the guitar kind is *tambūra*, and it happens that this is the very term by which the word *kinnor* is rendered in the Arabic version. When this kind of argument was used by Pfeiffer and others, it was not well known that the guitar was in fact an ancient Egyptian, as it is also a modern Oriental, instrument. It is frequently figured in the monuments. There is therefore little room to doubt that the guitar was known to the Hebrews, and probably in use among them. Notwithstanding this kind of evidence, the editor of the Pictorial Bible (on Ps. xliii. 4) ventured to suggest the greater probability that the *lyre*, in some of its various kinds, was denoted by the word *kinnor;* and subsequent inquiry has tended to establish this conclusion as firmly perhaps as the nature of the subject admits. It is shown, first, that the *cithara*, which the Greek translators appear to have had in view, was in fact originally the same as the lyre; in other words, the name λύρα, *lyra*, rarely occurs in the early Greek writers, that of κιθάρα being far more common. But, about the time of Pindar, certain innovations were introduced, in consequence of which the lyre and cithara came to be used as distinctive words: the *lyre* denoting the instrument which exhibited the strings free on both sides, and the *cithara* that with the strings partly drawn over the sounding body. This latter instrument, preserving the shape of the lyre, and wholly distinct in form and arrangement from the guitar, resembling it only in this one point, should surely not be confounded with it, especially as antiquity had another instrument which more obviously belongs to the guitar species. If those who allege that the *kinnor* was a kind of guitar, mean merely that it was a species of lyre which in one point resembled a guitar, we do not differ from them; but if they allege that it had any general resemblance to the modern instrument, they remove it from the lyre class of instruments, which the authorities on which they rely will not allow. If therefore the word κιθάρα denoted, when the Greek translators of the Bible lived, a species of lyre, which was the only lyre when the Hebrew Scriptures were written, it follows, that in using this word for the Hebrew *kinnor*, they understood and intended to convey that a lyre was signified. They also could not but know that the distinction between the *lyra* and *cithara* was of recent origin; and as the latter word had originally been a general term for the lyre, they must have felt it to be more strictly equivalent than *lyra* to the Hebrew *kinnor*. It may also be observed that all the uses of the *kinnor*, as described in Scripture, were such as were applicable to the lyre, and to the lyre only, of all the ancient instruments of music: most of them being egregiously inapplicable to the harp, and not very suitable to the guitar. And it must not be overlooked that it is morally certain the Hebrews had the lyre, seeing that it was common among all their neighbours; and yet there is *no other* of their instruments but the *kinnor* with which it can possibly be identified. The frequency of its

410. [Egyptian figures of lyres. 1, 2, played without, and 3, 4, with the plectrum; 4. is the supposed Hebrew lyre.]

occurrence in Scripture also corresponds with preference given to it in most ancient writers

We are moreover inclined to place some reliance upon the Egyptian painting supposed to represent the arrival of Joseph's brethren in Egypt (No. 410, fig. 4). Here one of the men is playing on a lyre of somewhat peculiar shape; and if he be a Hebrew the instrument is undoubtedly a *kinnor*, as no other stringed instrument is mentioned till the time of David. This instrument has *seven* strings (the usual number of the lyre), which are partly drawn over the sounding body: this is the characteristic of that more ancient species of lyre called the *cithara*. The engravings 410 and 411 will give some idea of the varieties in form and strings which the lyre assumed among the Egyptians. There were probably similar differences among the Hebrews; for in concluding the *kinnor* to be the lyre, we have no wish to restrict it to any one particular instrument: we rather apprehend that it was a general term for all instruments of the lyre kind. If there was one instrument more

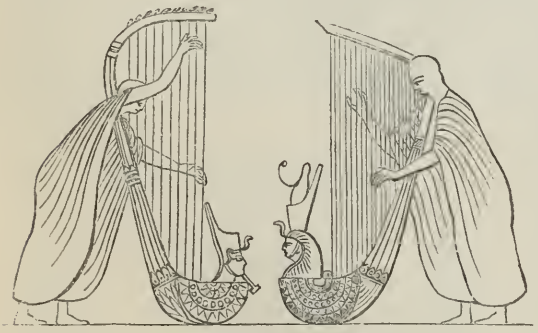


411. [Egyptian Lyres. 1, in the Leyden collection; 2, in the Berlin collection.]

than another on which the Hebrews were likely to pride themselves, and which should be regarded as their national instrument, it is the *kinnor;* and if they gave the figure of an instrument on any coin as a type of their nation, as the harp of Ireland, it would be this. Now the instrument which we do find on some coins ascribed to Simon Maccabæus is no other than a lyre (No. 415, fig. 3), and there can be little doubt that it was intended to represent the instrument known among the Hebrews by the name of *kinnor*. An instrument resembling the ancient lyre is also in use among the Arabians, bearing the name of *kussir* (derived perhaps from *kithara*). There is a figure of it in Niebuhr, and he saw no other instrument in the East which he felt disposed to identify with 'the harp of David' (*Reisebesch.* i. 179).

2. נֵבֶל *nebel*, is the next instrument which requires attention. The Greek *ναβλίον* (*νάβλα*, *νάβλη*, *ναύλα*, or *νάβλας*) and the Latin *nablium*, *nablum* (or *nabla*) are obviously connected with or derived from the same source as the Hebrew word, and may afford some help in our search after the instrument. The word is rendered 'psaltery' in the Authorized Version, in imitation of the Sept. translation of the Psalms and Nehemiah, which renders it by *ψαλτήριον* with the exception of *ψάλμος* in Ps. lxxi. 22, and *κιθάρα* in Ps. lxxxi. 2. The Septuagint in the other books in which the word occurs, renders it by *νάβλα*, or with a different ending *νάβλον*. As to when this instrument was invented, and when it came into use among the Hebrews, nothing can be determined with certainty. The first mention of it is in the reign of Saul (1 Sam. x. 5), and from that time forward we continue to meet with it in the Old Testament. It is however not found in the 2nd chapter of Daniel, where mention is made of so many instruments: whence we may infer either that it did not exist among the Babylonians, or was known among them by another name. Indeed, among the Greeks and Latins the word *nablium* is not of frequent occurrence, and is only employed by the poets, who are generally fond of borrowing foreign names. The use of the instrument prevailed particularly in the public worship of God. David's own instrument was the *kinnor;* but he neglected not the *nebel*. It was played upon by several persons in the grand procession at the removal of the ark (1 Chron. xv. 16; xvi. 5); and in the final organization of the temple music it was entrusted to the families of Asaph, Heman, and Jeduthun (1 Chron. xxv. 1-7); Asaph, however, was only the overseer of the nebelists, as he himself played on the מצלתים *metziltaim*. Out of the worship of God, it was employed at festivals and for luxurious purposes (Amos vi. 5). In the manufacture of this instrument a constant increase of splendour was exhibited. The first we meet with were made simply of the wood of the *berosh* (2 Sam. vi. 5; 1 Chron. xiii. 8), others of the rarer *algum* tree (1 Kings x. 12; 2 Chron. ix. 11); and some perhaps of metal (Joseph. *Antiq.* i. 8. 3), unless the last is to be understood of particular parts of the instrument.

Conjectures respecting the probable form of this instrument have been exceedingly various. Passing by the eccentric notion that the *nebel* was a kind of bagpipe, we may assume from the evident tendency of the Scriptural intimations, and from the general bearing of other authorities, that it was composed of strings stretched over a wooden frame. This being assumed or granted, we must proceed to seek some hint concerning its shape; and we find nothing more tangible than the concurrent testimony of Jerome, Isidorus, and Cassiodorus, that it was like the Greek letter Δ inverted ∇. The only in-



412. [Egyptian triangular instruments.]

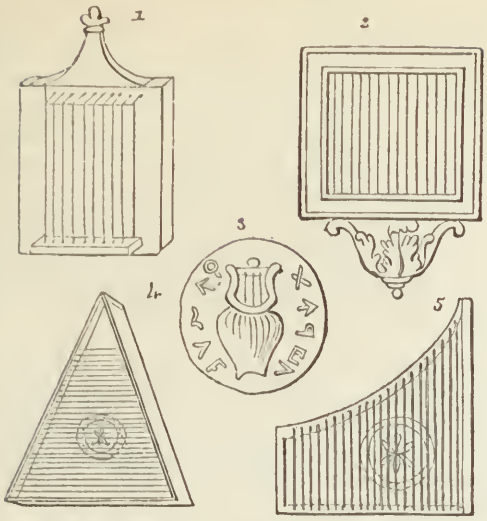
strument of this shape known to the older writers on the subject was the harp; which some of them (as Calmet) on this insufficient ground inferred to be the instrument intended. But since then vast

additions to our knowledge of ancient musical instruments have been found in the tombs of Egypt and the buried cities of Herculaneum and Pompeii. From these we learn two things—that the ancient harp was *not* shaped like the Greek Δ inverted; and that there were stringed instruments, something between the harp and the lyre, which in their various forms bore a remarkable resemblance to that letter (No. 412). We feel assured that among these forms may be found the instrument which the fathers had in view, for they lived while they were still in use. They held it to be the same as the Hebrew *nebel;* and as we can, through the Egyptian monuments, trace the instrument up to early Scriptural times, this view certainly deserves considerable attention.

We are, however, far from thinking that the *nebel* was always of this shape. It appears to us to be a general name for various of the larger stringed instruments of the harp kind, and also to denote, in a more special sense, one particular sort: in other words, that the *nebel* was an instrument of a principal species, the name of which was applied to the whole genus. In fact we have the names of several instruments which are generally conceived to be different varieties of the *nebel.* Before proceeding to these, we must express an opinion that one of these kinds, if not the principal kind, or the one most frequently denoted by the word, was the ancient harp, agreeing more or less with that represented in the Egyptian monuments. Whether the *nebel* or not, there can be little doubt that the Hebrews had such an instrument, although we may be unable to point out the precise word by which they described it. It is morally impossible that an instrument so common in Egypt, and of which the powers must have much exceeded that of any other instrument known to them, could have been neglected by a people whose stringed instruments of music were so various as those of the Hebrews. It may further be observed, that the use of this instrument as shown in the Egyptian paintings, agrees in all respects with that which the Scriptures refer to

413. [Grand Egyptian harps.]

the *nebel,* so far as we can gather any indications from them; and it is somewhat remarkable that the two great harps, in what is called Bruce's tomb, have respectively eleven and thirteen strings, being only one more and one less than the twelve assigned by Josephus to the *nebel.* These harps are shown in No. 413, and other varieties of the same instrument are figured in No. 414.

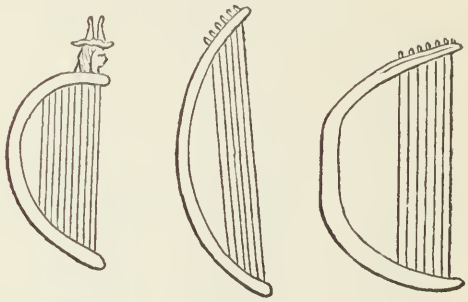


One of the classical traditions respecting the origin of the lyre refers it to an observation made upon the resonance of the gut-strings in the shell of a dried-up tortoise; another to a similar observation upon the twanging of a bow-string. These traditions have been deemed contradictory, from

414. [Other forms of Egyptian harps.]

being supposed to refer to one and the same instrument; but they are perfectly reconcilable when referred to two. The lyre, which we have already sought to connect with the Hebrew *kinnor,* might have had the tortoise origin, and the instrument we have now in view might as obviously be referred to the bow and its string. That the latter has only lately become known to us through the Egyptian monuments sufficiently accounts for this confusion, and explains why no attempt has hitherto been made (except in the *Pictorial Bible,* note on Ps. cxxxviii. 2), to place the Egyptian harp among the musical instruments of the Hebrews. We have no desire to insist on its identity with the *nebel* in particular: but it is remarkable that whereas the *nebel* is in Scripture mentioned so as to show that it always or generally formed part of a band of instruments, so the Egyptian harp is usually seen to be played in concert with other instruments. Sometimes, however, it was played alone, or as an accompaniment to the voice, and a band of seven or more choristers frequently sung to it a favourite air, beating time with their hands between each stanza (Wilkinson, *Anc. Egypt.* ii. 239). The principle of the bow was among the Egyptians extended to other instruments, which, from their smaller size and manner of being played, might be classed among lyres (No. 416). It is more than probable that these simple instruments were known to the Hebrews, although we are unable to discover the name by which they were called.

3. עָשׂוֹר *asor,* occurs as an instrument in only a few places, and never but in connection with the *nebel.* This has given rise to the conjecture that the two instruments may have differed from each other only in the number of their strings, or the openings at the bottom. Hence we meet with the Sept. translation ἐν δεκαχόρδῳ, and in the Chaldee, Syriac, and Arabic, words expressing an instrument of *ten* strings, which is also followed in the Authorized Version (Ps. xxxiii. 2; cxliv. 1). We see no reason to dissent from this conclusion. Pfeiffer was inclined to think that the *asor* may have been the quadrangular lyre which is represented in different varieties in ancient monuments, and which has usually ten strings, though sometimes more (No. 415, figs. 1, 2).



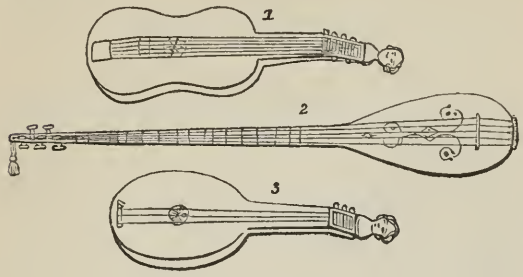
415. [Miscellaneous stringed instruments.]

4. גִּתִּית *gittith*, a word which occurs in the titles to Ps. viii., lxxxi., lxxxiv., and is generally supposed to denote a musical instrument. From the name it has been supposed to be an instrument which David brought from Gath; and it has been inferred from Isa. xvi. 10, that it was in particular use at the vintage season. If an instrument of music, it is remarkable that it does not occur in the list of the instruments assigned by David to the temple musicians; nor even in that list which appears in verses 1 and 2 of Ps. lxxxi., in the title of which it is found. The supposition of Gesenius, that it is a general name for *a stringed instrument*, obviates this difficulty. The Septuagint renders the title by ὑπὲρ τῶν ληνῶν, 'upon the winepress,' and Carpzov, Pfeiffer and others, follow this, in taking the word to denote a song composed for the vintage, or for the Feast of Tabernacles (Carpzov, *Observ. Philol. super Psalmos Tres* עַל־הַגִּתִּית, Helmst. 1758; Pfeiffer, *über die Musik*, p. 32).

5. מְנִים *minnim*, which occurs in Ps. xlv. 8 and cl. 4, is supposed by some to denote a stringed instrument, but it seems merely a poetical allusion to the *strings* of any instrument. Thus in Ps. xlv. 8 we would read 'Out of the ivory palaces *the strings* (*i. e.* concerts of music) have made thee glad;' and so in Ps. cl. 4, 'Praise him with strings (stringed instruments) and *ugabs*.'

6. שַׂבְּכָא or סַבְּכָא, *sabeca*, an instrument rendered 'sackbut,' and which occurs only in Dan. iii. 5, 7, 10, 15. It is doubtless the same as the stringed instrument of music denominated by the Greeks σαμβύκη, σαμβύκης, σάμβυξ, ζαμβίκη, and by the Latins *sambuca*. It seems to have been a species of harp or lyre, and, as some think, was only a species of the *nebel*, distinguished by the number of its strings. The able writer of the musical articles in Smith's *Classical Dictionary* thinks the sambuca was the same as the Egyptian harp, which we have already conjectured to be the particular instrument designated by the name *nebel*, or one of the instruments of the class so denominated. We should have no objection to regard this harp as being represented by the *sabeca* as a species of the *nebel;* but we cannot see that any proof of the conjecture is adduced, and as the word only occurs in a list of Babylonian instruments, and never among those of the Hebrews, the identification would go to show that the latter had *not* the harp, for which conclusion we are by no means prepared.

As the intimations which can be collected respecting the sambuca amount to this, that it was a *large* stringed instrument of a somewhat triangular shape, it may possibly have borne some resemblance to figs. 4 and 5, No. 415, which are copied from old writers on the subject, and which bear much resemblance to instruments, such as the *khanoon* and *tchenk*, which continue to be common and popular in Syria, Arabia, Egypt, and Persia, and which correspond to both these conditions.

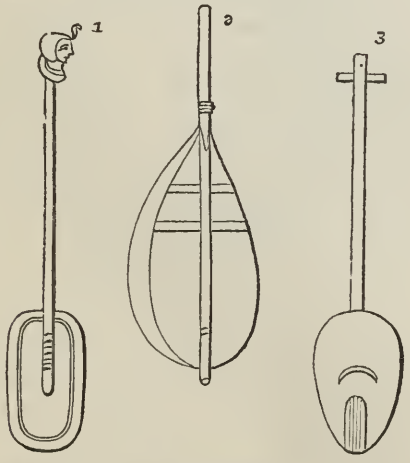


416. [Bow-shaped Egyptian instruments.]

7. פְּסַנְתֵּרִין or פְּסַנְטֵרִין, *pesanterin*, the ψαλτήριον or psaltery of the Greeks: it occurs only in Dan. iii. 7, 10, 15, where it is supposed to represent the Hebrew *nebel*. The word ψαλτήριον is, however, applied by the Greek translators so arbitrarily to instruments which have different names in Hebrew, that nothing can be built upon its use; still less are we disposed to accept the conclusion of Gesenius, that the Chaldee word is in this instance formed from the Greek. The Chaldee name, and perhaps the instrument represented by it, may be recognised in the modern سنطير *santeer*, which is of the class already referred to as represented by figs. 3, 4, No. 415).

8. מַחֲלַת *machalath*, which occurs in the titles of Ps. liii. and lxxxviii., is supposed by Gesenius and others to denote a kind of lute or guitar, which instrument others find in the *minnim* above noticed. We should not like to affirm that instruments of this kind are represented by either of these words—not that we doubt whether the Hebrews had such instruments, but because we are not satisfied that these are the precise words by which they were denoted. The prevalence in the East of instruments of this sort would alone suggest the probability that the Jews were not without them; and this probability is greatly increased by the evidence which the Egyptian paintings offer, that they were equally prevalent in ancient times in neighbouring nations. Before this evidence was obtained it was usual to offer figs. 1 and 3 in the subjoined cut (No. 417), as affording probable examples of Hebrew instruments of this class; and fig. 3, from Niebuhr's *Travels*, as a modern Arabian example. Objections were urged to these figures, which it would, until lately, have been difficult to answer. But now we find their prototypes among the ancient Egyptians. This will be seen from the

subjoined engravings, a very cursory inspection of which will show the general resemblance of



417. [1. A kind of guitar; 2. Ancient lute. 3. Arabian tanbur.]

the above to the instruments represented in at least figs. 1, 3 (No. 418), or in other words, to instruments of the lute and guitar class.

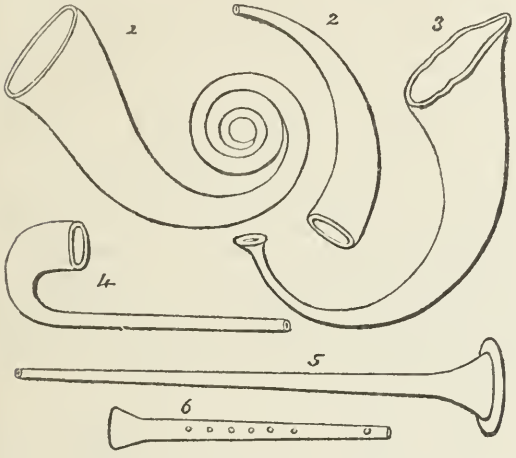
418. [Egyptian stringed instruments with necks.]

The Egyptian guitar consisted of two parts, a long flat neck or handle, and a hollow oval body, composed wholly of wood, or covered with leather, whose upper surface was perforated with several holes to allow the sound to escape; over this body, and the whole length of the handle, extended three strings of catgut secured at the upper extremity. The length of the handle was sometimes twice, sometimes thrice that of the body,

419. [Egyptian stringed instruments with necks.]

and the whole instrument seems to have measured three or four feet. It was struck with a plectrum, and the performers usually stood as they played. Both men and women used the guitar; some danced while they touched its strings (No. 418, fig. 2), supporting it on the right arm; and in one instance (fig. 3) it is seen slung by a band round the neck, like the modern Spanish guitar. The others (No. 419) are variations of these instruments; in fig. 3 making a near approach to the lute. They are from actual and somewhat decayed specimens, and therefore do not exhibit the wires and other minute parts.

With all this evidence before us, we need not hesitate to conclude that the Hebrews were in possession of instruments of this kind, although we may not venture to affirm by what name they were called.



II. Wind Instruments.—There is, happily, less difficulty with respect to instruments of this class than with respect to stringed instruments. The most ordinary division of these is into trumpets and pipes, of which the Hebrews had both, and of various kinds.

1. קֶרֶן *keren*, 'horn,' sometimes, but not often, occurs as the name of a musical instrument (Josh. vi. 5; 1 Chron. xxv. 5; Dan. iii. 5, 7, 10, 15). Of natural horns, and of instruments in the shape of horns, the antiquity and general use are evinced by every extensive collection of antiquities. It is admitted that natural horns were at first used, and that they at length came to be imitated in metal, but were still called horns. This use and application of the word are illustrated in our 'cornet.' It is generally conceived that rams' horns were the instruments used by the early Hebrews; and these are, indeed, expressly named in our own and many other versions, as the instruments used at the noted siege of Jericho (Josh. vi. 5); and the horns are those of the ram, which Josephus assigns to the soldiers of Gideon (*Antiq.* v. 6. 5; comp. Judg. vii. 16).

The former of these passages requires some remark. The text is קרן יובל, *keren jobel*, or *jobel*-horn. It is admitted that *jobel* means the *jubilee*, and in that case it would be jubilee-horn; and in the other verses of the chapter where trumpets are mentioned, with the epithet *jobelim* affixed, to denote 'jubilee-trumpets.' But then the translation 'rams' horn' in verse 5 is sought to be justified on the ground that the jubilee itself took its name from the instruments with which it was proclaimed, and as these instruments are believed to have been rams' horns, the term has so been rendered in this text. In other words the argument stands thus:—1. The jubilee was named from the instruments by which it was proclaimed. 2. These instruments were rams' horns. 3. Therefore *jobel* means a ram. It is, however, admitted that a ram is never called *jobel* in Hebrew: and an anecdote of R. Akiba implies that it was derived from an Arabian source. 'When I was in Arabia,' he says, 'I heard them call a ram *jobel;* and the trumpet itself is called *jobel*, because made of rams' horn.' It would be better, however, to translate it 'jubilee-horn' (see below, sect. 4). The text is not necessary to show that rams' horns were in use; the general belief of the Jews on the subject, and the existence of sculptured figures of ancient instruments imitated from the horns of rams, if not actually rams' horns, bring good evidence in favour of this opinion. Bochart and a few others contest this conclusion on the ground that rams'

horns are not suited to the purpose, and that the Greeks and Romans used the horns of neat cattle. Neither of these positions is tenable or of much weight, and the probability seems to be that *keren* was first, in its widest acceptation, the general name for instruments of the horn kind, and also the particular name for rams' horns, or the more crooked kind of horns, and were thus distinguished from the

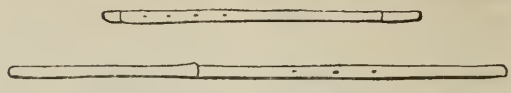
2. שׁוֹפָר *shophar*, which is a far more common word than *keren*, and is rendered 'trumpet' in the Authorized Version. This word seems, first, to

420. [1, 2, 3, 4. Ancient horns and curved trumpets; 5. straight trumpet; 6. pipe.]

denote horns of the straighter kind, including, probably, those of neat cattle, and all the instruments which were eventually made in imitation of and in improvement upon such horns. It is, however, difficult to draw a distinction between it and the *keren*, seeing that the words are sometimes used synonymously. Thus that which is called 'a jobel-horn' in Josh. vi. 5, is in the same chapter (ver. 4, 6, 8, 13), called 'a jobel-horn trumpet' (*shophar*). Upon the whole, we may take the *shophar*, however distinguished from the *keren*, to have been that kind of horn or horn-shaped trumpet which was best known to the Hebrews. The name *shophar* means *bright* or *clear*, and the instrument may be conceived to have been so called from its clear and shrill sound, just as we call an instrument a 'clarion,' and speak of a musical tone as 'brilliant' or 'clear.' In the service of God this *shophar* or trumpet was only employed in making announcements, and for calling the people together in the time of the holy solemnities, of war, of rebellion, or of any other great occasion (Exod. xix. 13; Num. x. 10; Judg. iii. 7; 1 Sam. xiii. 3; xv. 10; 2 Chron. xv. 14; Isa. xviii. 3). The strong sound of the instrument would have confounded a choir of singers, rather than have elevated their music. At feasts, and exhibitions of joy, horns and trumpets were not forgotten (2 Sam. vi. 15; 1 Chron. xvi. 42). There is no reason to conclude that the trumpet was an instrument peculiar to the Levites, as some have supposed. If that were the case we should be unable to account for the 300 trumpets with which Gideon's men were furnished (Judg. vii. 8), and for the use of trumpets in making signals by watchmen, who were not always Levites. In Matt. vi. 2, we read 'When thou doest thine alms, do not sound a trumpet before thee, as the hypocrites do in the synagogues, and in the streets, that they may have glory of men.' This verse has excited some speculation, and many have sought to illustrate it by reference to the custom of Eastern beggars of attracting attention by means of a musical instrument—a usage which, indeed, exists in England. But here it is the donor and not the beggar who is enjoined not to sound a trumpet; and Lightfoot, after examining the matter with his usual care, confesses that he can find no trace in the whole range of Hebrew literature, of a trumpet being sounded in connection with public or private almsgiving (*Hor. Hebr.* on Matt. vi. 2). It is therefore safest to suppose the expression derived by an easy metaphor from the practice of using the trumpet to proclaim whatever was about to be done, in order to call attention to it and make it extensively known.

3. חֲצֹצְרָה *chatzozerah*. This was the straight trumpet, different from the *shophar*, which was more or less bent like a horn. There has been various speculation on the name; but we are disposed to assent to the conclusion of Gesenius, that it is an onomatopoetic word, imitating the broken pulse-like sound of the trumpet, like the Latin *taratantara*, which this word would more resemble if pronounced as in Arabic, *hadâderah*. Among the Israelites these trumpets were a divine regulation, Moses having been expressly directed how to make them (Num. x. 2). They were of pure beaten silver, but the particular form does not appear in Scripture. The words בחצרות וקול שופר, 'with *chatzotzeroth* and voice of the *shophar*' (Ps. xcviii. 6), brings together names which most translators confound under that of 'trumpet,' and obliges them for once, at least, to draw a distinction between the two.

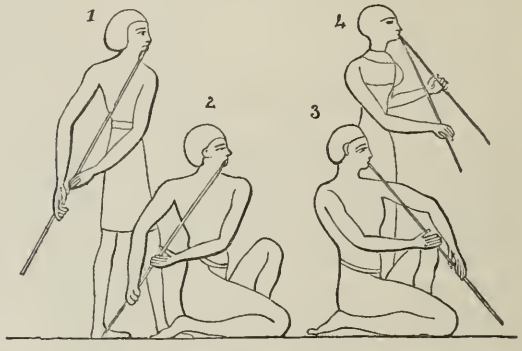
421. [Ancient Egyptian trumpets.]



The Auth. Vers. here has 'with trumpets and the sound of the cornet,' which clearly intimates that the translator considered the *shophar* a kind of horn, though usually called a trumpet. The Sept. draws the distinction very nicely—ἐν σάλπιγξιν ἐλαταῖς, και φωνῇ σάλπιγγος κερατίνης, 'with ductile trumpets, and the sound of horn-trumpets,' which is closely copied by the Vulgate, 'in tubis ductilibus, et voce tubæ corneæ.' The idea conveyed of the *chatzotzerah* in these translations is, that these trumpets were of wrought or ductile silver, and drawn out in length; with this some combine a reference to the signification of the word מִקְשָׁה *mikshah*, applied to these trumpets in the

original description in Num. x. 2, which they understand to mean 'turned' or 'rounded,' and hence infer that they were not merely drawn out in length but turned back upon themselves, like a trombone. Some German writers, indeed, directly call the instrument a trombone, as De Wette, who, in his translation of the Psalms, renders the line under notice 'Mit trompeten, mit posaunen-klang,' that is, 'with trumpets, with trombone-sound.' And Pfeiffer, pressing upon this signification, gives the figure of an Oriental instrument of this kind called the *sumara*, as a possible representative of the *chatzotzerah*. We assign little weight to all this. It seems clear that these instruments were long trumpets of solid wrought silver; and as it appears that these are the only musical instruments undoubted representations of which are preserved, there ought to be no question on the subject. These silver trumpets are figured on the arch of Titus, among the other spoils of the Jewish Temple (Fig. 5, No. 420), and they correspond with the description which Josephus, who, as a priest, could not in this matter be mistaken, has given: 'Moses,' he says, 'invented a kind of trumpet of silver; in length it was little less than a cubit, and it was somewhat thicker than a pipe; its opening was oblong, so as to permit blowing on it with the mouth; at the lower end it had the form of a bell, like the horn,' σάλπιγξ (*Antiq.* iii. 2). Moses was commanded to make only two of these trumpets, because there were then but two priests, the two sons of Aaron. Afterwards far more of them were made; and Josephus ventures to say that Solomon made 200,000 of them, according to the command of Moses (*Antiq.* viii. 4). When, however, riches departed from Palestine, trumpets of baser metal were used (2 Kings xii. 13), although probably a certain number of silver were still preserved. They were used in calling the congregation together for sacrifices, and in battle (Hos. v. 8). The tone of this trumpet, or rather the noise made by blowing on it, was very variable, and is distinguished by different terms in Scripture.

4. יוֹבֵל *jobēl*. There has been much speculation concerning this term, which the reader may find in ample abundance in Bochart (*Hieroz.* i. 436). It seems now to be agreed that the word does not denote a separate instrument, but is an epithet applied to the trumpets with which the jubilees were proclaimed, *i. e.* the '*jubilee*-trumpet;' and as the same trumpets were used for signals and alarms, 'the alarm-trumpet, the alarm-horn.' This name for the sound of music is supposed to be derived from Jubal, the inventor of instruments of music.



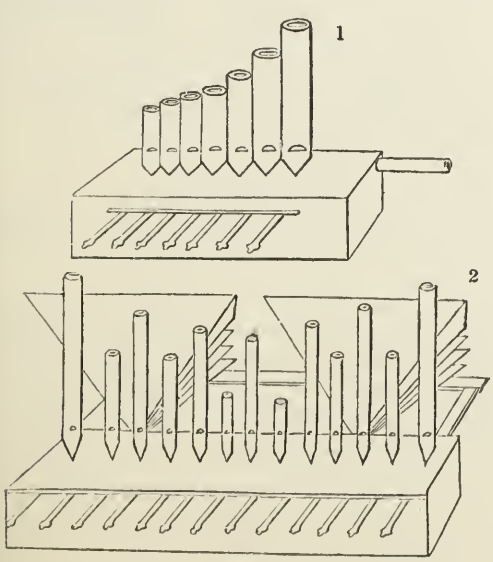
Wind instruments of softer sound next require attention. The first and principal of these is the

5. חָלִיל *chalil*, the meaning of which is *bored through*, and denotes a pipe, perforated and furnished with holes. The Sept. always renders it by αὐλός, a pipe or flute. There are but five places where it occurs in the Old Testament (1 Sam. x. 5; 1 Kings i. 40; Isa. v. 12; xxx. 29; Jer. xlviii. 36); but the Greek αὐλός occurs in the New Testament (Matt. ix. 23), and in the Apocryphal books (1 Macc. iv. 54; ix. 39; Judith iii. 8). It would seem to have come rather late into use among the Hebrews, and probably had a foreign origin. The passages to which we have referred will indicate the use of this instrument or class of instruments; but of the form

422. [Egyptian reed-pipes.]

we can only guess by reference to those of the ancient Egyptians, which are very similar to those still in use in Western Asia. The pipe is, however, rarely introduced in the Egyptian sculptures, and does not seem to have been held in much estimation. The principal are the single and double pipes. The single pipe of the Greeks is allowed to have been introduced from Egypt (J. Pollux, *Onom.* iv. 10; Athenæus, *Deipnos.* iv.), from which the Jews probably had theirs. It was a straight tube, without any increase at the mouth, and when played was held with both hands. It was usually of moderate length, about eighteen inches, but occasionally less, and sometimes so exceedingly long and the holes so low that the player was obliged to extend his arms to the utmost. Some had three holes, others four, and actual specimens made of common reed have been found (Wilkinson, *Ancient Egyptians*, ii. 309).

423. [1, 2, 3, Single pipes; 4, double pipe.]



The double pipe was formed with two of such tubes, of equal or unequal lengths, having a common mouth-piece, and each played with the corresponding hand. They were distinguished as the right and left pipes, and the latter, having but few holes and emitting a deep sound, served as a base; the other had more holes and gave a sharp sound (Plin. *Hist. Nat.* xvi. 36). This pipe is still used in Palestine. The Scottish missionary deputation overtook, among the hills of Judah, 'an Arab playing with all his might upon a shepherd's pipe, made of two reeds. This was the first time we had seen any marks of joy in the land' (*Narrative*, p. 118).

From the references which have been given it will be seen that the pipe was, among the Jews, chiefly consecrated to joy and pleasure. So much was this the case that in the time of Judas Maccabæus the Jews complained 'that joy was taken from Jacob, and the pipe with the harp (κιθάρα) ceased' (1 Macc. iii. 45). It was particularly used to enliven the periodical journeys to Jerusalem to attend the great festivals (Isa. xxx. 29); and this custom of accompanying travelling in companies with music is common in the East at this day (Harmer, *Observatt.* ii. 197; to which add Tournefort, *Voyage du Levant*, iii. 189). Athenæus (iv. 174) tells us of a plaintive pipe

which was in use among the Phœnicians. This serves to illustrate Matt. ix. 23, where our Saviour, finding the flute-players with the dead daughter of the ruler, orders them away, because the damsel was not dead; and in this we also recognise the regulation of the Jews, that every one, however poor he might be, should have at least two pipes (חלילים) at the death of his wife (Lightfoot, *Hor. Hebr. ad Matt.* ix. 23). [Mourning.]

6. מִשְׁרוֹקִיתָא *mishrokitha.* This word occurs four times in Daniel (ch. iii. 5, 7, 10, 15), but nowhere else, and appears to be the Chaldæan name for the flute with two reeds, of which we have already spoken. If that double pipe be not comprehended under the Hebrew *chalil*, then we may consider that we have it here. The Sept. and Theodotion render it by *σύριγξ*, *syrinx*, which is the name of the Pandæan pipe. This would imply that it had at least more than one reed; and if it really denotes the Pandæan pipe itself, the word is to be regarded as the Chaldæan name of the instrument called by the Hebrews עוּגָב *ugab*, which was undoubtedly the syrinx. This is the more probable from the fact that the Hebrew translator actually renders *mishrokitha* by *ugab*.

It may, however, have differed from the common *ugab;* and some writers on the subject have been disposed to regard it as similar to the instrument represented in the annexed cut (No. 424 fig. 1). This is constructed somewhat on the principle of an organ, being composed of pipes of various sizes, fitted into a kind of modern chest, open at top, and stopped at the bottom with wood covered by a skin; wind was conveyed to it from the lips by means of a pipe fixed to the chest; the pipes were of lengths musically proportioned to each other, and the melody was varied at pleasure, by stopping or unstopping the apertures at the upper extremity. We are not however satisfied with the evidence which makes this instrument, or the modification of it in fig. 2, to have been known to either the ancient Hebrews or the Babylonians.

424.

7. עוּגָב *ugab*, is the word rendered 'organ' in our version. This and the *kinnor* are the instruments whose invention is ascribed to Jubal (Gen. iv. 21), and higher antiquity cannot therefore be claimed for any instrument. There are only three other places in which it is mentioned in the Old Testament; two in the book of Job (xxi. 12; xxx. 31), and one in the Psalms (cl. 4). The Targum renders the word simply by אבובא, *a pipe;* the Septuagint varies; it has *κιθάρα* in Genesis, *ψάλμος* in Job, and *ὄργανον* in the Psalms. The last is the sense which the Arabic, Syriac, Latin, English, and most other versions have adopted. The *organon* simply denotes a double or manifold pipe; and hence in particular the Pandæan or shepherd's pipe, which is at this day called a 'mouth-organ' among ourselves. Formerly it was called simply 'organ,' and 'mouth' has been added to distinguish it from the comparatively modern instrument which has usurped the more simple designation of 'organ.' Our translators are thus not chargeable with the obscurity which has since arisen, for they, by the word 'organ,' intended to indicate no other instrument than this. We thus find a tolerably fair concurrence on the subject among the translations which we are accustomed to respect. The grounds of their conclusion are to be sought in the etymology of the Hebrew word; and, so far as these go, which is not very far, they tend to support it. To these probabilities the known antiquity of the Syrian syrinx (*σύριγξ*) or Pandean pipe may be added. The instrument is in fact so old that the profane writers do not know to whom to ascribe it. Some refer it to Pan (Virgil, *Ecl.* ii.), others to Mercury (Pind. *Od.* xii. *de Pallade*), others to Marsyas and Silenus (Athenæus, iv. 182). This antiquity corresponds with the Scriptural intimation concerning the *ugab*, and justifies us in seeking for the *syrinx* among the more ancient instruments of the Orientals, especially as it is still common in Western Asia. Niebuhr saw it in the hands of a peasant at Cairo (*Reisebeschr.* i. 181); and Russell, in his *Nat. Hist. of Aleppo* (i. 155, 156), says that 'the *syrinx* or Pan's pipe is still a festival instrument in Syria; it is known also in the city, but very few performers can sound it tolerably well. The higher notes are clear and pleasing, but the longer reeds are apt, like the dervise flute, to make a hissing sound, though blown by a good player. The number of reeds of which the *syrinx* is composed, varies in different instruments from five to twenty-three.' The classical *syrinx* is usually said to have had seven reeds (Virg. *Ecl.* ii.); but we find some in the monuments with a greater number, and the shepherd of Theocritus (*Id.* viii.) had one of nine reeds.

III. Instruments of Percussion,—or such as give forth their sounds on being struck or shaken.

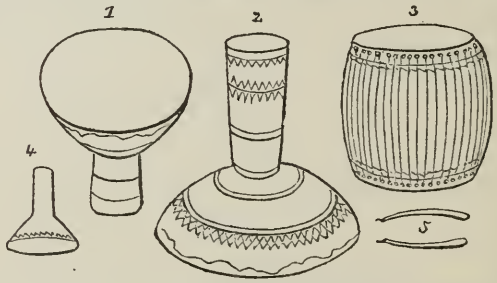
1. תֹּף *toph*, seems to have denoted primarily the tambourine, and generally all instruments of the drum kind which were in use among the Israelites. There is not the slightest doubt about this instrument. All the translations and lexicons agree in this one point; and we have, besides, the actual evidence of existing instruments of this kind among the Arabians, bearing the same name in the forms of *doff* and *adufe*. The *toph* was known to the Jews before they quitted Syria (Gen. xxxi. 27); it is also mentioned by Job (xxi. 12), and it is the first instrument named after the exode, being that with which Miriam led the dances with which the daughters of Israel celebrated the

overthrow of Pharaoh (Exod. xv. 20). It was employed by David in all the festivities of religion (2 Sam. vi. 5). Isaiah adduces it as the instrument of voluptuaries, but left in silence amid wars and desolations (Isa. xxiv. 8). The occasions on which it was used were mostly joyful, and those who played upon it were generally females (Ps. lxviii. 25), as was the case among most ancient nations, and is so at the present day in the East. It is nowhere mentioned in connection with battles or warlike transactions. The usages of the modern East might adequately illustrate all the Scriptural allusions to this instrument, but happily we have more ancient and very valuable illustration from the monuments of Egypt. In these we find that the tambourine was a favourite instrument, both on sacred and festive occasions. There were three kinds, differing, no doubt, in sound as well as form; one was circular, another square or oblong, and the third consisted of two squares separated by a bar. They were all beaten by the hand, and often used as an accompaniment to the harp and other instruments. The tambourine

425. [Tambourines. 1. angular; 2. circular.]

was usually played by females, who are represented as dancing to its sound without the accompaniment of any other instrument. The imperfect manner of representation does not allow us to see whether the Egyptian tambourine had the same moveable pieces of metal let into the wooden frame which we find in the tambourines of the present day. Their presence may, however, be inferred from the manner in which the tambourine is held up after being struck; and we know that the Greek instruments were furnished with balls of metal attached by short thongs to the circular rim (Wilkinson, *Ancient Egyptians*, ii. 314).

At mournings for the dead the tambourine was sometimes introduced among the Egyptians, and the 'mournful song' was accompanied by its monotonous sound. This is still a custom of the East, and probably existed among the Jews.



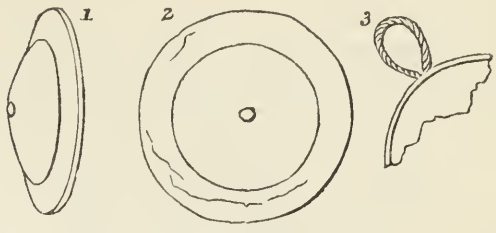
Whether the Israelites had drums or not does not clearly appear, and in the absence of evidence *pro* or *con* it is useless to speculate on the subject. If they had, they must be included under the general name of *toph*. The ancient Egyptians had a long drum, very similar to the tom-toms of India (No. 426, figs. 1, 3). It was about two feet or two feet and a half in length, and was beaten with the hand. The case was of wood or copper, covered at both ends with parchment or leather, and braced with cords extended diagonally over the exterior of the cylinder. It was used chiefly in war. There was another larger drum, less unlike

426. [Ancient Egyptian drums.]

our own; it was about two feet and a half long by about two feet broad, and was shaped much like a sugar-cask (No. 427, fig. 3). It was formed of copper, and covered at the ends with red leather, braced by catgut strings passing through small holes in its broad margin. This kind of drum was beaten with sticks (fig. 5). It does not appear on the monuments, but an actual specimen was found in the excavations made by D'Athanasi, in 1823, and is now in the museum at Paris.

Another species of drum is represented in the Egyptian paintings, and is of the same kind which is still in use in Egypt and Arabia, under the name of the *darabooka* drum. It is made of parchment stretched over the top of a funnel-shaped case of metal, wood, or pottery (No. 427, figs. 1, 2, 4). It is beaten with the hand, and when relaxed, the parchment is braced by exposing it for a few moments to the sun, or the warmth of a fire. This kind of drum claims particular attention from its being supposed to be represented on one of the coins ascribed to Simon Maccabæus (No. 429, fig. 5). When closely examined, this

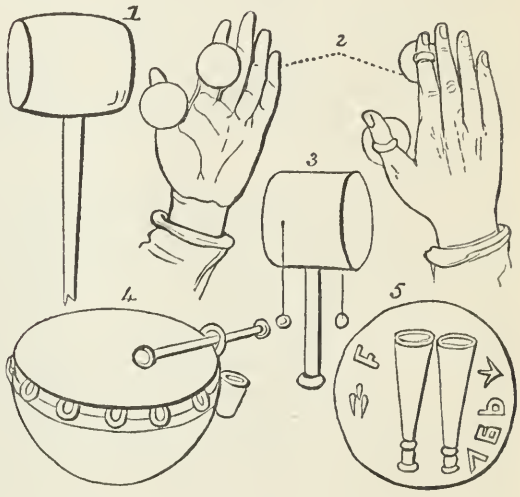
427. [Drums. 1, 2, 4. modern oriental; 3. ancient Egyptian; 5. sticks to 3.]



instrument will appear to be the same in principle with our kettle-drum, which, indeed, has been confessedly derived from the East, where other instruments on the same principle are not wanting. One of them (No. 429, fig. 4) is just the same as the instrument we have derived from it: others are smaller in various degrees, are of different forms, and are tapped lightly with the fingers. Such drum-tabrets were not unknown to the ancient Egyptians, as may be perceived by fig. 2, No. 426.

The Rabbins speak obscurely of a sort of drum which may have been of this kind. It stood, they say, in the temple court, and was used to call the priests to prayer, the Levites to singing, and

leprous persons to their purification. They venture to add that its sound could be heard from Jerusalem to Jericho (Buxtorf, *Lex. Rabbin.* s. v. מגריפה).

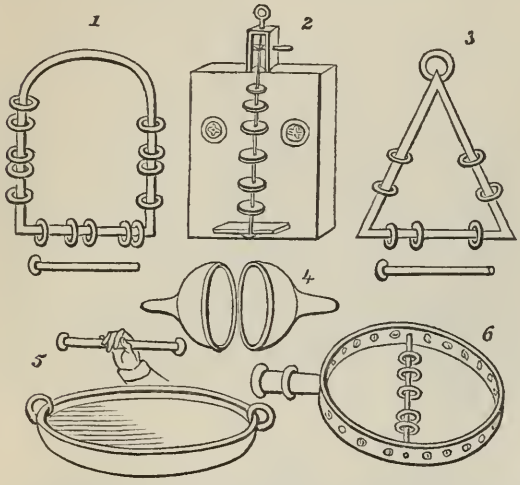


2. פַּעֲמוֹן *phaamon.* This name nowhere occurs but with reference to the small golden appendages to the robe of the high-priest (Exod. xxviii. 33; xxxix. 25), which all versions agree in rendering 'bells,' or 'little bells.' These bells were attached to the hem of the garment, and were separated from each other by golden knobs, shaped like pomegranates. They obviously produced their tinkling sound by striking against the golden knobs which were appended near them. There is no trace of bells among the ancient Egyptians, or in classical antiquity, and we call these such for want of a better term to describe sonorous pieces of metal used in this manner.

3. צֶלְצְלִים *tzeltzelim*, מְצִלּוֹת *metzilloth*, מְצִלְתַּיִם *metzilthaim.* These words are translated *cymbals* in most versions, except in Zech. xiv. 20, where they are rendered 'bells'—the 'bells of the horses.' If the words, however, denote cymbals in other places, they cannot well denote a different thing here. It is true that camels, and sometimes horses, wear bells in the East at present; and it is probable that the Hebrews had something similar in the shape of small cymbal-shaped pieces of metal, suspended under the necks of the animals, and which struck against each other with the motions of the animal. The Romans attached metallic pendants of this kind, called *phalarea*, to their war-horses, in order to produce a terrific effect when shaken by the rapid motions of the animals. These were certainly not bells, but might without any violent impropriety be called cymbals, from the manner in which they struck against each other. This is the single doubtful text; in all the other texts we may conclude with reasonable certainty that cymbals, and sometimes castagnets (which are small cymbals), are intended. There is an important passage (Ps. cl. 5), 'Praise him with the clear cymbal, praise him with the resounding cymbal,' which clearly points to two instruments under the same name, and leaves us to conclude that the Hebrews had both hand-cymbals and finger-cymbals (or castagnets), although it may not in all cases be easy to say which of the two is intended in particular texts. Cymbals figure in the grand procession at the removal of the ark (1 Chron. xiii. 8): other instances occur of their being used in the worship of God (Neh. xii. 27; Ps. cl. 5; 1 Chron. xv. 2); and the illustrious Asaph was himself a player on the cymbal (1 Chron. xvi. 5). The sound of these instruments is very sharp and piercing, but it does not belong to fine, speaking, expressive music. Hence Paul could describe it by the word ἀλαλάζον, 'clanging' (1 Cor. xiii. 1). The Hebrew instruments were probably similar to those of the Egyptians. These were of mixed metal, apparently brass, or a compound of brass and silver, and of a form exactly resembling those of modern times, though smaller, being only seven inches or five inches and a half in diameter. The handle has disappeared from the existing specimens, but is supposed to have been of the same material, bound with leather or string, and being inserted in a small hole at the summit, to have been secured by bending back the two ends (No. 428, fig. 3). The same kind of instrument is still used by the modern inhabitants of

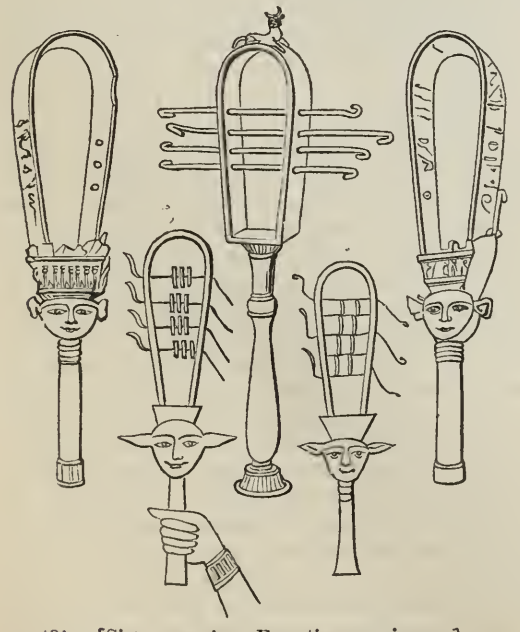
428. [Cymbals—Egyptian.]

Egypt, and from them, says Wilkinson, 'have been borrowed the very small cymbals played with the finger and thumb, which supply the place of castagnets in the *almeh* dance' (*Ancient Egypt.* iii. 255). In thus calling instruments used as castagnets 'small cymbals,' this author incidentally supports the view we have taken. The modern castagnet, introduced into Spain by the Moors, is to be referred to the same source.



429. [Instruments of Percussion. 1. mallet used in striking suspended boards; 2. castagnets; 3. tabret-drum, struck by attached balls; 4. Oriental kettle-drum; 5. supposed ancient Jewish coin representing drums.]

4. שְׁלִשִׁים *shalishim.* This word occurs but once, viz. in 1 Sam. xviii. 6, and is there uncertainly rendered, in the Authorized Version, 'instruments of music,' and in the margin 'three-stringed instruments.' The word is plural, and means 'threes.' Most writers, proceeding upon this interpretation, identify it with the triangle, which Athenæus (iv. 23) alleges to have been a Syrian invention. We have no Egyptian representation of it, but that people had instruments which are not figured on the existing monuments. As this was the instrument with which the damsels of Israel came forth to meet the victorious David, the ancient translators have usually rendered the word by cymbals or castagnets, which seemed to them more proper to women. But the triangle may not the less have been suited to a military triumph, and as an accompaniment to the other instruments used on that occasion. Jerome has *sistra*, an idea which has received little attention from commentators; but if we had not preferred to find the *sistrum* under another word



we would not hesitate to accept this conclusion, founded, as it manifestly is, on the *three* transverse moveable bars with which the *sistra* are usually furnished. In Barker's Bible (1595), the word is rendered by 'rebecke.'

5. מְנַעֲנְעִים *menaaneim*. This is another word which occurs but once in Scripture (2 Sam. vi. 5), where our version translates it by 'cymbals,'

430. [Instruments of Percussion. 1, 3, 6. Triangular and other rods of metal charged with rings; 2. a supposed Hebrew instrument, regarded by some as the *Menaaneim;* 4. a kind of Eastern cymbals; 5. a pan of sounding metal.]

although it has appropriated another word to that instrument. It is now more generally thought to denote the *sistrum*, and appears to be derived from נוּעַ *nua*, 'to shake' or 'to vibrate,' corresponding to the etymology of the *sistrum* (σεῖστρον), from σείω. An objection has indeed been urged, that the *sistrum* was not sufficiently ancient; but this has been set at rest by the recent discoveries in Egyptian antiquities, which have revealed *sistra* belonging to the most ancient period. The sistrum was generally from eight

431. [Sistra—various Egyptian specimens.]

to sixteen or eighteen inches in length, and entirely of bronze or brass. It was sometimes inlaid with silver, gilt, or otherwise ornamented, and being held upright was shaken, the rings moving to and fro upon the bars. The last were frequently made to imitate snakes, or simply bent at each end to secure them from slipping through the holes. Several actual specimens of these instruments have been found, and are deposited in the British, Berlin, and other museums. They are mostly furnished with sacred symbols, and were chiefly used by the priests and priestesses in the ceremonies of religion, particularly in those connected with the worship of Isis (Plut. *de Isid.* c. 63; Juven. xiii. 93; Jablonsky, *Opusc.* i. 306). See Burney's and Hawkins's *Histories of Music;* Forkel, *Geschichte der Musik;* Calmet, *Dissert. sur la Musique des Hébreux*, annexed to his Commentary on the Psalms; Pfeiffer, *Ueber die Musik der Alten Hebr.* 1779; Saalchutz, *Form der Hebr. MUSTARD-TREE. [Sinapis.]

MYRA (Μύρα), one of the chief towns of Lycia, in Asia Minor. It lay about a league from the sea (in N. lat. 36° 18′; E. long. 30°), upon a rising ground, at the foot of which flowed a navigable river with an excellent harbour at its mouth (Strabo, xiv. p. 665; Pliny, *Hist. Nat.* xxxii. 8). The town now lies desolate. When Paul was on his voyage from Cæsarea to Rome, he and the other prisoners were landed here, and were reembarked in a ship of Alexandria bound to Rome (Acts xxvii. 5).

MYRRH. [Mor.]

MYRTLE. [Hadas.]

MYSIA (Μυσία), a province occupying the north-west angle of Asia Minor, and separated from Europe only by the Propontis and Hellespont: on the south it joined Æolis, and was separated on the east from Bithynia by the river Æsopus. Latterly Æolis was included in Mysia, which was then separated from Lydia and Ionia by the river Hermus, now Sarabad or Djedis (Strabo, xii. 562, xiii. 628; Pliny, *Hist. Nat.* v. 32; Ptol. *Geog.* v. 2). In ancient times the province of Mysia was celebrated for its fertility in corn and wine, and although now but poorly tilled it is still one of the finest tracts in Asia Minor. Paul passed through this province and embarked at its chief port, Troas, on his first voyage to Europe (Acts xvi. 7, 8; Rosenmüller, *Bibl. Geog.* iii. 32; Winer, *Bibl. Realwörterb. s. v. Mysia;* Richter, *Wallfahrten*, p. 460).

MYSTERY (μυστήριον). The etymology of this Greek word, which seems to be the simplest and

most illustrative of its meaning, is that from סתר, to 'hide' or 'conceal,' whence מסתור or מסתר, a covert or secret place, a secret. A most unscriptural and dangerous sense is but too often put upon the word, as if it meant something absolutely unintelligible and incomprehensible; whereas, in every instance in which it occurs in the Sept. or New Testament, it is applied to something which is *revealed*, declared, explained, spoken, or which may be known or understood. This fact will appear from the following elucidation of the passages in which it is found. First, it is sometimes used to denote the meaning of a symbolical representation, whether addressed to the mind by a parable, allegory, &c., or to the eye, by a vision, &c. Thus our Lord, having delivered to the multitude the parable of the sower (Matt. xiii. 3-9), when the disciples asked him (ver. 10) why spoke to them in parables, replied, 'Unto you it is given to know the mysteries of the kingdom of heaven, but unto them which are without it is not given' (Mark iv. 11); 'Therefore I speak to them in parables' (Matt. xiii. 13); 'But *your* eyes see, and your ears understand' (ver. 16); where our Lord applies the term 'mysteries' to the *moral* truths couched under that parable, that is, to its figurative meaning. His words, taken in their general sense, are thus paraphrased by Dr. Macknight: 'I may explain to you the nature of the Messiah's kingdom, and the other difficult doctrines of the Gospel, because you are able to hear them, but I may not deal so with the multitude, who are obstinate to such a degree, that they will not hear anything contrary to their prejudices and passions' (*Harmony of the Gospels*, § 49). Again, the mystery or symbolical vision of the 'seven stars and of the seven golden candlesticks' (Rev. i. 12, 16), is explained to mean 'the angels of the seven churches of Asia, and the seven churches themselves' (ver. 20). Again, 'the mystery' or symbolical representation 'of the woman upon a scarlet-coloured beast' (Rev. xvii. 3-6), is also explained, 'I will tell thee the mystery of the woman,' &c. (xvii. 7). When St. Paul, speaking of marriage, says 'this is a great mystery' (Eph. v. 32), he evidently treats the original institution of marriage, as affording a figurative representation of the union betwixt Christ and the church (Campbell, *Dissertation*, p. 10, part iii. § 9). The word is also used to denote anything whatever which is hidden or concealed, till it is explained. The Sept. uses it to express רז, *a secret* (Dan. ii. 18, 19, 27, 28, 29, 30, 47; iv. 6), in relation to Nebuchadnezzar's dream, which was a secret till Daniel explained it, and even from the king himself, for he had totally forgotten it (ver. 5, 9). Thus the word is used in the New Testament to denote those doctrines of Christianity, general or particular, which the Jews and the world at large did not understand, till they were revealed by Christ and his apostles, 'Great is the mystery of godliness,' *i. e.* the Christian religion (1 Tim. iii. 16), the chief parts of which the apostle instantly proceeds to adduce,—'God was manifest in the flesh, justified by the Spirit, seen of angels,' &c.—facts which had not entered into the heart of man (1 Cor. ii. 9) until God visibly accomplished them, and revealed them to the apostles by inspiration (ver. 10). The apostle is generally thought here to compare the Gospel with the greater Eleusinian mysteries; for which see Diod. Sic. iv. 25; Dem. xxix. *ult.* Xen. *H. G.*, i. 4, 14; or Leland's *Advantage and Necessity of the Christian Revelation*, part i. ch. 8, 9; or Macknight's *Preface to the Ephesians*, § 7. Thus also the Gospel in general is called 'the mystery of the faith,' which it was requisite the deacons should 'hold with a pure conscience' (1 Tim. iii. 9), and 'the mystery which from the beginning of the world had been hid with God, but which was now made known through means of the church' (Eph. iii. 9); the mystery of the Gospel which St. Paul desired 'to make known' (Eph. vi. 19); 'the mystery of God, and of the Father, and of Christ,' to the full apprehension or understanding of which (rather than 'the acknowledgment') he prayed that the Colossians might come (Col. ii. 2; comp. the use of the word ἐπίγνωσις, 1 Tim. ii. 4; 2 Tim. iii. 7); which he desired the Colossians to pray that God would enable himself and his fellow apostles 'to speak and to make manifest' (Col. iv. 3, 4); which he calls 'the revelation of the mystery which was kept secret since the world began, but now is made manifest and known to all nations' (Rom. xvi. 25); which, he says, 'we speak' (1 Cor. ii. 7), and of which the apostles were 'stewards' (1 Cor. iv. 1). The same word is used respecting certain particular doctrines of the Gospel, as, for instance, 'the partial and temporary blindness of Israel,' of which mystery 'the apostle would not have Christians' ignorant (Rom. xi. 25), and which he explains (ver. 25-32). He styles the calling of the Gentiles 'a mystery which, in other ages, was not made known unto the sons of men as it is now revealed unto the holy apostles and prophets by the Spirit' (Eph. iii. 4-6; comp. i. 9, 10, &c.). To this class we refer the well-known phrase, 'Behold I show you a mystery (1 Cor. xv. 51), we shall all be changed;' and then follows an explanation of the change (ver. 51-55). Even in the case of a man speaking in an unknown tongue, in the absence of an interpreter, and when, therefore, no man understood him, although 'by the Spirit he was speaking mysteries,' yet the Apostle supposes that the man so doing understood what himself said (1 Cor. xiv. 2-4). And in the prophetic portion of his writings 'concerning the mystery of iniquity' (2 Thess. ii. 7), he speaks of it as being ultimately 'revealed' (ver. 8). Josephus applies nearly the same phrase, μυστήριον κακίας, *a mystery of wickedness*, to Antipater's *crafty conduct* to ensnare and destroy his brother Alexander (*De Bell. Jud.* i. 24. 1); and to complete the proof that the word 'mystery' is used in the sense of *knowable* secrets, we add the words 'Though *I understand all mysteries*' (1 Cor. xiii. 2). The Greeks used the word in the same way. Thus Menander, μυστήριον σου μὴ κατείπῃς τῷ φιλῷ, 'Tell not your secret to a friend' (p. 274, line 671, ed. Clerici). Even when they apply the term to the greater and lesser Eleusinian mysteries, they are still mysteries into which a person might be initiated, when they would, of course, cease to be mysteries to him. The word is used in the same sense throughout the Apocrypha as in the Sept. and New Testament (Tobit xii. 7; Judith ii. 2; Ecclus. xxii. 22; xxvii. 16, 17, 21; 2 Macc. xiii. 21); it is applied to divine or sacred mysteries (Wisd. ii. 22; vi. 23), and to the ceremonies of false religions (Wisd. xiv. 15, 23).

J. F. D.

N.

1. NAAMAH (נַעֲמָה, *pleasant;* Sept. Νοεμά), daughter of Lamech and Zillah, and sister of Tubal-cain (Gen. iv. 22). The family was one of inventors: and as few women are named, the Jewish commentators ascribe suitable inventions to each of them. Naamah is affirmed by them to have invented the spinning of wool and making of cloth. But the book of Genesis does not say this, and they could have no other source of information.

2. NAAMAH, an Ammonitess, one of the wives of Solomon, and mother of Rehoboam (1 Kings xiv. 21).

NAAMAN (נַעֲמָן, *pleasantness;* Sept. Ναιμάν), commander of the armies of Damascene Syria, in the time of Joram, king of Israel. Through his valour and abilities Naaman held a high place in the esteem of his king Benhadad; and although he was afflicted with leprosy, it would seem that this did not, as among the Hebrews, operate as a disqualification for public employment. Nevertheless the condition of a leper could not but have been in his high place both afflicting and painful: and when it was heard that a little Hebrew slave-girl, who waited upon Naaman's wife, had spoken of a prophet in Samaria who could cure her master of his leprosy, the faint and uncertain hope thus offered was eagerly seized; and the general obtained permission to visit the place where this relief was to be sought. Benhadad even furnished him with a letter to his old enemy king Joram; but as this letter merely stated that Naaman had been sent for him to cure, the king of Israel rent his clothes in astonishment and anger, suspecting that a request so impossible to grant, involved a studied insult or an intention to fix a quarrel upon him with a view to future aggressions. When tidings of this affair reached the prophet Elisha, he desired that the stranger might be sent to him. Naaman accordingly went, and his splendid train of chariots, horses, and laden camels filled the street before the prophet's house. As a leper, Naaman could not be admitted into the house; and Elisha did not come out to him as he expected, and as he thought civility required; but he sent out his servant to tell him to go and dip himself seven times in the Jordan, and that his leprosy would then pass from him. He was, however, by this time so much chafed and disgusted by the apparent neglect and incivility with which he had been treated, that if his attendants had not prevailed upon him to obey the directions of the prophet, he would have returned home still a leper. But he went to the Jordan, and having bent himself seven times beneath its waters, rose from them clear from all leprous stain. His gratitude was now proportioned to his previous wrath, and he drove back to vent the feelings of his full heart to the prophet of Israel. He avowed to him his conviction that the God of Israel, through whom this marvellous deed had been wrought, was great beyond all gods; and he declared that henceforth he would worship Him only, and to that end he proposed to take with him two mules' load of the soil of Israel wherewith to set up in Damascus an altar to Jehovah. This shows he had heard that an altar of earth was necessary (Exod. xx. 24); and the imperfect notions which he entertained of the duties which his desire to serve Jehovah involved, were natural in an uninstructed foreigner. He had also heard that Jehovah was a very jealous God, and had forbidden any of his servants to bow themselves down before idols; and therefore he expressed to Elisha a hope that he should be forgiven if, when his public duty required him to attend his king to the temple of Rimmon, he bowed with his master. The grateful Syrian would gladly have pressed upon Elisha gifts of high value, but the holy man resolutely refused to take anything, lest the glory redounding to God from this great act should in any degree be obscured. His servant, Gehazi, was less scrupulous, and hastened with a lie in his mouth to ask in his master's name for a portion of that which Elisha had refused. The illustrious Syrian no sooner saw the man running after his chariot, than he alighted to meet him, and happy to relieve himself in some degree under the sense of overwhelming obligation, he sent him back with more than he had ventured to ask (2 Kings v.). Nothing more is known of Naaman; and what befel Gehazi is related under another head [Gehazi].

The only points of difficulty in this narrative are those connected with the requests made by Naaman to Elisha, and which the prophet seems not to have refused. The request for two mules' load of earth with which to build an altar to Jehovah in Damascus, appears to have arisen from the notion that the soil of the land was proper to the God of the land, whom he proposed henceforth to worship. Jehovah's claim to be the universal God was unknown to, or misunderstood by, the neighbouring nations; and the only question that ever came before them was whether Jehovah, the God whom the Hebrews worshipped, was more or less powerful than the gods they worshipped. That he was infinitely more powerful, was, as we take it, the point at which this man's faith rested. He was convinced not that Jehovah was the universal God, but that 'there was no God in all the earth save only in the land of Israel'—and, therefore, he desired to worship at an altar formed of the soil which was thus eminently honoured. It is not clear whether he intended to say absolutely that there was no God in the world save in the land of Israel, or used the phrase as a strong expression of his belief that the gods of other lands were nought as compared with Him. The explanation applies in either sense. Naaman's other request for permission to bow in the house of Rimmon seems to have amounted to this. He had acknowledged indirectly that Rimmon was no god, or else a god too powerless to be henceforth the object of his worship. Yet, as a great officer of state, his duty required him to attend the king to the temple of this idol, and, as the king leaned upon his arm, to bow when the monarch bowed. To refuse this would bring disgrace upon him, and constrain him to relinquish his high place, if not his country; and for this he was not prepared. Of the views under which Elisha consented to this request, we are less able to judge. But indeed it is not clear that he did consent, or expressed any distinct opinion in the matter. His words of dismissal,

'Go in peace,' do not necessarily convey his approval of all that Naaman had asked, although in tenderness to one so well intentioned, and whom there was no opportunity of instructing further, he may have abstained from urging upon the Syrian those obligations which would have been indispensable to a subject of the Mosaical covenant.

NAAZUZ, or Naatzutz (נַעֲצוּץ), occurs only in two passages of Isaiah, in both of which it is translated 'thorn' in the Authorized Version. Thus (ch. vii. 18, 19), 'Jehovah shall hiss for the fly that is in the uttermost part of the rivers of Egypt, and for the bee that is in the land of Assyria: and they shall come, and shall rest all of them, in the desolate valleys, and in the holes of the rocks, and upon all the *thorns' (naazuzim)*. By some this has been translated *crevices:* but that it is a plant of some kind is evident from ch. lv. 13—'Instead of the *thorn (naazuz)* shall come up the fir-tree, and instead of the briar shall come up the myrtle-tree.' Some have translated it generally, as in the English version, by thorn, shrub, thorny shrub, or small tree. Others have attempted to define it specifically, rendering it bramble, white-thorn, &c. (Cels. *Hierobot.* ii. p. 190); but nothing certain has been determined respecting it. Celsius endeavours to trace it to the same origin as the Arabic word نعض *naaz*, which he states to be the name of a plant, of which the bark is employed in tanning leather. The meaning of the term he continues, in Chaldee, is *infigere, defigere*, 'to stick into' or 'fix,' and it is therefore supposed to refer to a prickly or thorny plant. R. Ben Melech says that commentators explain *naazuz* by the Arabic word *sidr*, which is the name of a well known thorny bush of Eastern countries, a species of Zizyphus. This, Sprengel says, is the *Z. vulgaris*, found in many parts of Palestine, as well as in many of the uncultivated tracts of Eastern countries. Others suppose the species to be the *nabak* of the Arabs, which is the *Zizyphus Lotus*, and considered to be the Lotus of the ancients. But from the context it would appear that the plant, if a zizyphus, must have been a less highly esteemed variety or species. But in a wild state these are very abundant, bushy, prickly, and of little value. Belon says, 'Les hayes, pour la plus part, sont de tamarisques, œnoplia (*i. e.* zizyphi species) et rhamnes.' In Freytag's Arabic Lexicon the above Arabic word *naaz* is said to be the name of a thorny tree, common in the Hedjaz, the bark of which is used in tanning hides, and from whose wood a dentifrice is prepared. This might be a species of acacia, of which many species are well known to be abundant in the dry and barren parts of Syria, Arabia, and Egypt.—J. F. R.

NABAL (נָבָל, *stupid, foolish;* Sept. Ναβάλ), a descendant of Caleb, dwelling at Maon, and having large possessions near Carmel of Judah, in the same neighbourhood. He had abundant wealth, being the possessor of 3000 sheep and 1000 goats, but his churlish and harsh character had not been softened by the prosperity with which he had been favoured. He was holding a great sheep-shearing of his numerous flocks at Carmel—which was a season of great festivity among the sheep-masters of Israel—when David sent some of his young men to request a small supply of provisions, of which his troop was in great need. He was warranted in asking this, as, while Nabal's flocks were out in the desert, the presence of David and his men in the neighbourhood had effectually protected them from the depredations of the Arabs. But Nabal refused this application, with harsh words, reflecting coarsely upon David and his troop as a set of worthless runagates. On learning this, David was highly incensed, and set out with his band to avenge the insult. But his intention was anticipated and averted by Nabal's wife Abigail, who met him on the road with a most acceptable supply of provisions, and by her consummate tact and good sense, mollified his anger, and indeed, caused him in the end to feel thankful that he had been prevented from the bloodshed which would have ensued. When Nabal, after recovering from the drunkenness of the feast, was informed of these circumstances, he was struck with such intense terror at the danger to which he had been exposed, that 'his heart died within him, and he became as a stone;' which seems to have been the exciting cause of a malady that carried him off about ten days after. David, not long after, evinced the favourable impression which the good sense and comeliness of Abigail had made upon him, by making her his wife, B.C. 1061 (1 Sam. xxv.) [Abigail].

NABATHÆANS. [Nebaioth.]

NABOTH (נָבוֹת, *fruit, produce;* Sept. Ναβουθαί), an inhabitant of Jezreel, who was the possessor of a patrimonial vineyard adjoining the garden of the palace which the kings of Israel had there. King Ahab had conceived a desire to add this vineyard to his ground, to make of it 'a garden of herbs,' but found that Naboth could not, on any consideration, be induced to alienate a property which he had derived from his fathers. This gave the king so much concern, that he took to his bed and refused his food; but when his wife, the notorious Jezebel, understood the cause of his trouble, she bade him be of good cheer, for *she* would procure him the vineyard. Some time after Naboth was, at a public feast, accused of blasphemy, by an order from her under the royal seal, and, being condemned through the testimony of false witnesses, was stoned to death, according to the law, outside the town (Lev. xxiv. 16; Num. xv. 30). Coquerel (in the *Biographie Sacrée*) thinks that the children of Naboth perished with him, being perhaps put to death by the creatures of Jezebel; and his reason is, that otherwise the crime would have been useless, as the children would still have been entitled to the father's heritage. But we know not that Naboth had any sons; and if he had sons, and they had been taken off, the estate might not have wanted an heir. It therefore rather seems that a usage had crept in for the property of persons convicted of treason (and blasphemy was treason in Israel) to be escheated to the crown. There are other indications of this usage. If it did not exist, the estate of Naboth could not have lapsed to the crown, even if his children had shared his fate; and if it did exist it was not necessary that the children should be slain to secure the estate to the king.

When Ahab heard of the death of Naboth—and he must have known how that death had been accomplished, or he would not have supposed himself a gainer by the event—he hastened to take possession. But he was speedily taught that this horrid crime had not passed without notice by the all-seeing God, and would not remain unpunished by his justice. The only tribunal to which he remained accountable, pronounced his doom through the prophet Elijah, who met him on the spot, 'In the place where dogs licked the blood of Naboth, shall dogs lick thy blood, even thine' (1 Kings xxi.).

NACHON (נָכוֹן; Sept. Ναχώρ). The floor of Nachon is the name given to the threshing-floor near which Uzzah was slain, for laying his hand upon the ark (2 Sam. vi. 6). It is doubted whether this be a proper name, denoting the owner of the floor, or merely an epithet applied to it, *i. e.* 'the prepared floor,' which in that case it would signify. This floor could not have been far from Jerusalem, and must have nearly adjoined the house of Obed-edom, in which the ark was deposited. In the parallel text (1 Chron. xiii. 9) the place is called the floor of Chidon, כִּידוֹן, showing that the owner or the place had two names, which last is the alternative adopted by the Hebrew writers (*T. Bab.* tit. *Sotah*, iii. fol. 35).

NACHOR. [Nahor.]

1. NADAB (נָדָב, *liberal;* Sept. Ναδάβ), eldest son of Aaron, who, with his brother Abihu, was slain for offering strange fire to the Lord [Abihu].

2. NADAB, son of Jeroboam, and second king of Israel. He ascended the throne upon the death of his father (B.C. 954), whose deep-laid, but criminal and dangerous policy, he followed. He was engaged in the siege of Gibbethon, a city of the Levites (of which the Philistines had obtained possession), when he was slain in the camp in a conspiracy formed against him by Baasha, one of his officers, who mounted the throne in his stead. He reigned two years (1 Kings xiv. 20; xv. 25-28).

NAHALAL (נַהֲלָל; Sept. Ναβαάλ), a town in the tribe of Zebulun (Josh. xix. 15), which was assigned to the Levites (Josh. xxi. 35), but of which Zebulun was slow in dispossessing the Canaanites (Judg. i. 30).

NAHALIEL, an encampment of the Israelites in the Wilderness [Wandering].

1. NAHASH (נָחָשׁ, *a serpent;* Sept. Νάας), a person named only in 2 Sam. xvii. 25; and as he is there described as the father of Abigail and Zeruiah, who are elsewhere called the sisters of David, this must have been either another name for Jesse, or, as some suppose, of a former husband of David's mother.

2. NAHASH, king of the Ammonites, noted for the barbarous terms of capitulation which he offered to the town of Jabesh-Gilead, and for his subsequent defeat by Saul [Jabesh]. It was natural that the enemy of Saul should be friendly to David; and we find that he did render to the latter, during his persecutions, some acts of kindness, which the monarch did not forget when he ascended the throne of Israel (1 Sam. x. 2; 1 Chron. xix. 2). These acts are not specified, but he probably offered the fugitive hero an asylum in his dominions.

1. NAHOR (נָחוֹר, *snorting;* Sept. Ναχώρ), or rather Nachor, as in Luke iii. 34, son of Serug, and father of Terah, the father of Abraham (Gen. xi. 22-25).

2. NAHOR, grandson of the preceding, being one of the sons of Terah, and brother of Abraham. Nahor espoused Milcah his niece, daughter of his eldest brother Haran (Gen. xi. 27-29). Nahor did not quit his native place, 'Ur of the Chaldees,' when the rest of the family removed to Haran (Gen. xi. 30); but it would appear that he went thither afterwards, as we eventually find his son Bethuel, and his grandson Laban, established there (Gen. xxvii. 43; xxix. 5).

NAHSHON (נַחְשׁוֹן, *enchanter;* Sept. Ναασσών, from which he is called Naason in the genealogies of Christ in Matt. i. 4; Luke iii. 32), son of Aminadab, and prince or chief of the tribe of Judah, at the time of the exode (Num. i. 7; ii. 3). The chiefs of tribes, of which Nahshon was one, took an important and leading part in the affairs of the Israelites, as described in the article Tribes.

NAIL. There are two Hebrew words thus translated in the Auth. Vers., which it may be well to distinguish.

1. יתד *yathed*, which usually denotes a peg, pin, or nail, as driven into a wall (Ezek. xv. 3; Isa. xxii. 25); and more especially a tent-pin driven into the earth to fasten the tent (Exod. xxvii. 19; xxxv. 18; xxxviii. 31; Judg. iv. 21, 22; Isa. xxxiii. 20; liv. 2). Hence, to drive a pin, or to fasten a nail, presents among the Hebrews an image of a fixed dwelling, a firm and stable abode (Isa. xxii. 23). And this image is still frequent among the Arabs, as shown by several quotations produced by Gesenius, in his *Thesaurus*, under this word. A pin or nail is also, by a further application of the metaphor, applied to a prince, on whom the care and welfare of the state depends (Zech. x. 4), where the term פִּנָּה, *corner stone*, is applied to the same person denoted by the word 'nail.' All these allusions will seem very plain, if we bear in mind the leading sense of the word, as referring to those large nails, or pins, or cramps, used in applications requiring great strength, being driven into walls, or into the ground.

2. מסמרות *mismeroth*, which, with some variations of form, is applied to ordinary and ornamental nails. It always occurs in the plural, and is the word which we find in 1 Chron. xxii. 3; 2 Chron. iii. 9; Isa. xli. 7; Jer. x. 4; Eccles. xii. 11. The last of these texts involves a very significant proverbial application—'The words of the wise are as nails infixed,' &c., that is, 'they sink deep into the heart of man.' The golden nails of the temple are denoted by this word.

NAIN (Ναΐν), a town of Palestine, mentioned only in the New Testament, as the place where Jesus raised the widow's son to life (Luke vii. 11-17). Eusebius and Jerome (*Onomast.* s. v. *Naim*) describe it as not far from Endor. As its name has always been preserved, it was recognised by the crusaders, and has been often noticed by travellers up to the present day. It has now dwindled to a small hamlet called *Nein*, which

is situated about three miles S. by W. from Mount Tabor.

NAIOTH (נָיוֹת; Sept. Ναυάθ), a place in or near Ramah, where Samuel abode with his disciples (1 Sam. xix. 18, 19, 22, 23; xx. 1). Naioth does not appear to have been a distinct town or village; and we are willing to accept the explanation of R. Isaiah and other Jewish commentators, who state that Ramah was the name of a hill, and Naioth of the place upon it. In that case Naioth must be fixed on the same grounds which determine the site of Ramah.

NAKED. The word עָרוֹם *arom*, rendered 'naked' in our Bibles, does not in many places mean absolute nakedness. It has this meaning in such passages as Job i. 21; Eccles. v. 15; Mic. i. 8; Amos ii. 16. But in other places it means one who is ragged or poorly clad (1 John xxi. 7; Isa. lviii. 7), in the same sense as γυμνός in James ii. 15; which does not indeed differ from a familiar application of the word 'naked' among ourselves. A more peculiar and Oriental sense of the word is that in which it is applied to one who has laid aside his loose outer garment, and goes about in his tunic. When, therefore, Saul is described as having lain down 'naked' (1 Sam. xix. 24), we are to understand that he had laid aside his flowing outer robe, by which his rank was most indicated, and was therefore a king 'naked' or undressed; and it was thus that Isaiah went 'naked' and barefoot (Isa. xx. 2; comp. John xxi. 7). The point of the expression may be the better apprehended when we mention that persons in their own houses freely lay aside their outer garment, and appear in their tunic and girdle; but this is undress, and they would count it improper to appear abroad, or to see company in their own house without the outer robe. In fact, our use of the word 'undress' to denote not nakedness, as it would literally imply, but a dress less than that which we consider full and complete, corresponds very exactly to this signification of the word.

The metaphorical uses of the word in Scripture are too obvious to require explanation.

NAMES, PROPER, chiefly of the Old Testament. It is so interesting, as well as useful, to know the original signification of proper names, that a careful investigation of their nature has many advantages. The chief use, however, which accrues from an accurate knowledge of them is, that we are by their means enabled to attain a more lively apprehension of the truth of ancient history. It is to be wished that greater attention may in future be paid to all those sources of historical knowledge which, although they do not, like the written annals, lie on the high road of research, yet for that very reason often shed over many obscurities a more unexpected light, which would be vainly sought for in the chronicles. Among these remoter auxiliaries of historical inquiry proper names also are to be classed: words apparently dead and unalterable, yet which originally have ever sprung from a full life and a clear sense, which therefore undergo quicker or slower changes according to the progress of the national development, and which, at every great revolution of the history of a people, easily assume a perfectly new form. While the use of proper names thus furnishes an evidence of the national customs, views, and tendencies predominating at certain periods, they at the same time, as words of more durable form, preserve many relics of an elder state of the language, which would otherwise disappear from the living tongue.

The Bible itself encourages and authorizes such inquiries. The origin and signification of a name are often expressly interpreted in the Old Testament, from Gen. ii. 19-23, where the name of Adam's wife (אִשָּׁה) is explained, down to the book of Esther, the chief object of which is to account not only for the origin, but also for the name of the Feast of Purim; nor are such explanations of names wanting in the New Testament.* It is well to remark, however, that the narrator who gives most of the explanations of names in the Old Testament does not belong to an earlier date than that one whom I have called 'the fourth narrator of the primitive history.'† It is evident from this that the ancient Hebrews did indeed make, comparatively speaking, a very early attempt at etymological interpretations, but it was, nevertheless, not until after the time of Solomon: at a period, therefore, when what we call literary culture began to flourish amongst them. For Solomon is always justly considered to be the founder of science among this people; and the attention which is directed to the signification of the ancient names, and which often undertakes to give different explanations of them,‡ is with reason traced to an already nascent zeal for wisdom.

Many elder scholars appreciated the importance of a correct understanding of the Biblical proper names; and two very comprehensive works appeared in the last century,§ in which they are collected with tolerable completeness, and are explained with an amount of learning very creditable for that period. These works were at the same time really supplements to the ordinary Biblical Lexicons and Concordances, which excluded proper names, and were so far defective in their representation of the language. Their chief merit, however, consisted merely in the diligence with which the materials had been collected; for, as for the interpretation of the sense of the names, in consequence of the imperfect views of all philology, and of the Hebrew grammar especially, which then still prevailed, it continued to be extremely precarious; and, as it set out from many erroneous assumptions, it also arrived at a large number of mistakes. And yet the latest Hebrew lexicons have not only adopted

* Mark iii. 17; Acts i. 19.

† The reader is referred, for a fuller discussion of this subject, to my *Geschichte des Volks Israel*, i. 22-24, and p. 122, sq.

‡ The name *Isaac* is explained no less than three or four times, and always somewhat differently (Gen. xvii. 17; xviii. 12-15; xxi. 6, 9); but these can only be regarded as different attempts to explain this ancient name. There are also several similar instances in the Old Testament.

§ Matthæi Hilleri *Onomasticon Sacrum*, Tubingæ, 1706, and Jo. Simonis *Onomasticon Sacrum*, Hal. 1741. The former is the larger of the two, but even it is not free from omissions.

these collections of the proper names, but also those very explanations which are wrong in the most important points, as if no single person, for a hundred years, had taken the trouble to investigate this difficult subject. For instance, when the name of the well-known wife of David, Abigail, is still explained to mean 'father of joy,' or, forsooth, 'whose father is joy,' it is evident that those who believe this neither understand Hebrew grammar, nor trouble themselves about the principles of the question; for what woman really ever bore such a senseless name?

Without doubt many parts of this subject are very obscure, as proper names are so often only the scattered and decayed ruins of a distant age. But as soon as we take a more animated view of all the relics that have been preserved to us, and compare them more cautiously with the customs of other nations, we are able to discern their more general and important features at least, with reasonable certainty, and, what is after all the only advantage to be derived from their study, to pluck some rare and noble fruits from these apparent thorns. I, therefore, claim indulgence for entering at some length into a closer examination of this question.

There are two chief classes of proper names, those of men, and those of every thing besides man, as beasts, places, and festivals. Those of the latter class are much more durable in their form, as man alone is always changing; they are also important for history, and it is desirable to ascertain, as far as possible, their original signification. But the proper names of the changeable races of men are in a much higher degree those in which history reflects itself in its vicissitudes; they also constitute the more numerous class. For these reasons, we confine ourselves at present to the proper names of men, as it is beyond our present scope to treat the entire subject.

The first fact that strikes us, on a general view of them all, is, that the ancient Hebrews always retained the greatest simplicity in the use of names. In reality, there is always only one single name which distinguishes a person. Where it is necessary, the name of the father is added; sometimes that of the mother instead, in case she happens to be more celebrated;* or the line of descent is traced farther back, often to the fourth generation, or even farther. Mere epithets, like 'David the king,' 'Isaiah the prophet,' always express the actual and significant dignity of a man. The instances in which a person receives two names alternately, as Jacob-Israel, Gideon-Jerubbaal (Judg. vi.-ix.), are casual and rare, and are not to be ascribed to a general custom of the people. On comparing the mode in which the Arabs use proper names, we discover a striking difference. With them, every man of any importance always receives, besides his proper name and perhaps nickname, a prænomen (*Kunje*), which might be most fittingly called the name of compliment, or domestic name, as it denotes the man under the special relation of father, as *Abu Zaid*, 'father of Zaid;' and, in addition to these, a name of honour for the world—which at least has prevailed generally since the time of the Abbassides, and which usually exalts, in pompous terms, the person in relation to religion (as *Salaheddin*, 'the welfare of religion'), or to the state (as *Saif-eddaula*, 'the sword of the state'). In this the Arabs are absolutely a modern people, and overvalue externals as much as the Europeans of the present day. How much more simple were the Hebrews during the most flourishing period of their history! For, in this respect also, the usage of names is only an evidence of the predominant customs and views of whole periods.

When we, then, consider proper names with reference to the grand distinction of times, we are able to discover in their varying use nearly the same three periods as those which mark the history of this people in all other respects. These are the three periods which are most simply defined by the three different names of the nation which prevailed in each: the *Hebrews*, as they were called in early times, gradually adopted the name of *Israelites* in the middle period, and exchanged this name, in the third, for that of *Jews*. It is a remarkable, but nevertheless true, coincidence that, just as the name of the nation varies in these three periods, the colour of the names of individuals changes in like manner, according to the different tendencies characterizing the times.

I. In the first period, which, for reasons adduced below, we here limit by the commencement of the Mosaic religion, we are able to see the whole process according to which names are formed among this people: the distinct character of the formation of names which was established in this primitive time, continues essentially the same in the succeeding period, while the elements of which names are formed undergo a partial change. For this reason, we may explain the laws of this formation in terms of merely general application.—Now names are either *simple* or *compound* words, or also words which arise from either of these kinds *by derivation*.

1. The *simple* names exist in great abundance; and their signification, as to the mere word itself, is generally evident: as דָּן, 'judge;' יָמִין, the Latin *dexter*, an ancient name, according to Gen. xlvi. 10, 1 Chron. ii. 27; שָׁאוּל, 'desired,' also an ancient name according to Gen. xlvi. 10, cf. xxxvi. 37; גֶּבֶר, 'hero,' 1 Kings iv. 19. Thus most of them express an honourable sense; although examples are not wanting of the direct contrary, as עֵקֶשׁ, 'crooked,' 2 Sam. xxiii. 26. With what ease also feminine words become names for men, is shown by cases like אַיָּה, 'vulture,' 2 Sam. iii. 7, xxi. 8; cf. Gen. xxxvi. 24; יוֹנָה, 'dove;' which are just as applicable to men as the masculine שׁוּעָל, 'fox,' 1 Chron. vii. 36. Diminutives, which are so frequently used as proper names by the Arabs, are rare among the Hebrews; but are by no means wanting, as is proved by זְבוּלוּן or זְבוּלֻן, the name of the son of Jacob, and יְדוּתוּן or יְדִיתוּן, the name of the singer of David. All those names which are formed with a prefixed *jod* are to be considered as especially ancient, because this nominal formation became entirely obsolete in the language, and recurs almost only in proper names,

* The three heroic brothers, Joab, Abishai, and 'Asael, are always called after their mother Zerûja (1 Chron. ii. 16).

as is shown not only by the well-known names, יעקב, יוסף, יהודה, יצחק, but also by a number of less common ones, as יְשׁוּב, Num. xxvi. 24; יָרִיב, 1 Chron. iv. 21; יַמְלֶךְ, iv. 34; יַעְבָּן, v. 13; יִצְהָר, Exod. vi. 18; יִבְחָר, 2 Sam. v. 15; יַפְלֶא, Num. xiii. 6, 1 Chron. vii. 38; יְרֻחָם, 1 Sam. i. 1, 1 Chron. viii. 27; and others. There is an ancient adjective-ending, that in *âm* or *ôm*, which has fixed itself most firmly in proper names, as אֲחֹתָם, 1 Chron. iv. 6; גַּזָּם, Ezra ii. 48; מִרְיָם, the sister of Moses, and גֵּרְשֹׁם, his son; כִּמְהָם, 2 Sam. xix. 38, which not only exists also in the form כִּמְהוֹם, Jer. xlii. 17, but in כִּמְהָן, 2 Sam. xix. 41, according to customary changes. We are anxious not to fatigue the reader by such philological observations, but we can assure him that a deeper investigation into these apparently dead subjects will lead to the discovery of much that illustrates the ancient language and customs of the people.

2. The *compound* names, however, are more important for history, because they express more complete and distinct ideas than the simple names. Some of them are altogether isolated, as פִּינְחָס, properly 'serpent's mouth,' the grandson of Aaron; יִשָּׂשכָר, the son of Jacob; *Oholiab*, Exod. xxxi. 6, 'father's tent,' a name resembling the Greek Patrocles. But most of them bear a general resemblance to each other, and follow in shoals certain dominant opinions and customs; and these last are what we must particularly consider here.

A great number of them owe their origin to the relations of the house, as the sense of the first word of the compound shows. Most of these have the word *abi*, 'father,' for their first member, as *Abiezer*, *Abital*, *Abigail*.* The prevalent opinion among modern scholars † respecting this class is that they are really epithets, which have afterwards, as it were casually, become proper names; that *Abigail*, for example, is literally 'father of joy,' or 'whose father is joy,' that this means *cheerful*, and thus became a proper name; and in proof they appeal to the Arabic language, in which such periphrases with *abi* are common. In reality, however, this assumption is extremely uncertain and erroneous. The Arabic undoubtedly possesses a vast number of such names, as Abul-Ma'âli, 'the father of dignities,' *i. e.* the venerable; Abul-husni, 'the father of beauty,' *i. e.* the peacock; Abul-hussaini, 'the father of the little fortress,' *i. e.* the fox, who lives in holes; Abu-Aijûba, 'the father of Job,' *i. e.* the camel, because it is as patient as Job. But such names, which may be formed *ad libitum*, by hundreds, belong in Arabic rather to the artificial, often to the sportive, and generally also to the later, language, and were not possible until the Arabs had adopted the custom of always using a prænomen, or domestic name—the above-mentioned Kunje—in addition to the chief name. As soon as ever it became customary to give a man a double designation—his real name, and the more familiar, often sportive, domestic name—this custom was gradually transferred to other subjects, and then these in themselves extraordinary circumlocutory names arose.* But such domestic names were never in use among the Hebrews—nay, more, such periphrastic names with *abi* do not even occur in their poetic diction; as the only passage which could be adduced in favour of it (Job xvii. 14) is not, when taken in its true sense, at all an instance in point. To call the camel 'father of Job' is undeniably a kind of sportive name: and are we to assume that this jesting custom prevailed among the primitive Hebrews? Thus we have here another striking example of the danger attending superficial comparisons of Arabic with Hebrew; for this view never could have been formed by those who were intimately acquainted with the treasures of Arabic literature.† I believe, on the contrary, that the first member of such compounds did indeed, in the early times in which they were first formed, really denote nothing but the father of the son who is named in the second member; but that subsequently, for a particular reason, they were employed only to denote a kind of dignity. If we compare the numerous genealogical registers in the books of Chronicles, which, dry as they are, yet contain much that is instructive, we find that a man is often called the *father*, that is, the *lord*, of a town or village, as 'Ashchur the father of Teqoa,' 1 Chron. ii. 29; 'Mesha, the father of Zif,' ver. 42; 'Meon, the father of Beth-zur,' ver. 45; 'Shobal, the father of Qirjathjearim,' ver. 50, &c. In these cases the meaning cannot be doubtful, as the second member always signifies a place; but this is at the same time a genuine Hebrew custom, which will hardly be found among the other Semitic nations. As soon, then, as it had become customary to use the word 'father' to denote a kind of dignity in the family and in the nation, it was easy to prefix this short word, as a mere term of honour, to any name by way of distinguishing the eldest or the favourite son. Several cogent arguments favour this view. First, it can almost always be proved, even from our present scanty documents, that the second member of such compound names was also used, by itself,

* This *abi* was, without doubt, gradually shortened to *ab*, as is proved by אבנר beside אבינר, 1 Sam. xiv. 50, 2 Sam. ii. 8, and by many other examples. The further softening of this *ab* to *eb* is only possible when a *j* follows it, as אֶבְיָתָר, 1 Sam. xxii. 20; אֶבְיָסָף, 1 Chron. vi. 8, 22, beside the older form אֲבִיאָסָף, Exod. vi. 24.

† For instance, Gesenius in his *Thesaurus*.

* See a learned article on the *Kunje*, by Koelgarten, in the *Zeitschrift für das Morgenland*, i. 297, sq.; in which he has only neglected to insist sufficiently on the fact, that *abu* originally denoted the actual father of the son mentioned in the second member.

† We could more easily admit such a metaphorical sense in the compounds with *son*, since בן is really often used in a highly metaphorical sense. Bathshéba' is certainly not the daughter of a man named Shéba', 2 Sam. xi. 3. Such compound names with *son*, however, are, on the whole, rare, and are only found in some frequency in 1 Kings iv. 7, sq.

as a proper name, as *Dân* beside *Abidân*, Num. i. 11; *Ezer*, 1 Chron. vii. 21, Neh. iii. 19, beside *Abiezer; Asaph* beside *Abiasaph* or *Ebjasaph; Nadab*, Exod. vi. 23, beside *Abinadab; Nóam* or *Nóam*, 1 Chron. iv. 15, beside *Abinoam; Jathar* or *Jether*, a very common name, beside *Ebjathar;* nay, they are even found in the same family, as *Abiner* or *Abner*, the son of *Ner*, 1 Sam. xiv. 50, 2 Sam. ii. 8. Moreover, this explains how other words of relationship are prefixed in the same way; the latter member is always a word which was originally a proper name, which is only multiplied by means of these little prefixes, and in which we indeed no longer discern why *father* is the word prefixed in one instance, and *brother* that in another. *Achi*, *i. e.* 'brother,' is often prefixed in this manner; thus, the one was called *Râm*, 1 Chron. ii. 9, xxv. 27, Ruth iv. 19; the other *Abirâm*, Num. xvi. 1; and the third *Achirâm*, Num. xxvi. 38. *Achinoam*, *Achiezer*, and others of this sort, are easily accounted for. *Chamu*, *i. e.* 'brother in law,' is rarely so used; as *Chamutal* or *Chamital*, 2 Kings xxiv. 18, Jer. lii. 1; beside *Abital*, 2 Sam. iii. 4. Under this class we may also include אִישׁ, 'man,' with which several names are compounded. As the Hebrews had a simple name, *Hûd* or *Hôd*, *i. e.* 'splendour,' (cf. *Jehûdah*), 1 Chron. vii. 37, and an *Abihud*, 1 Chron. viii. 3, and *Achihud*, Num. xxxiv. 27, so also they formed an *Ishehôd*, 1 Chron. vii. 18; as they had an *Abitûb* and *Achitob*, so also an *Ishtôb*, 2 Sam. x. 6; and as there was an ancient name *Chûr*, 'free,' who is mentioned in Exod. xvii. 10 as a friend of Moses, so *Ash-chûr* * appears as a relative of the family of *Chûr*, 1 Chron. iv. 5, comp. ver. 1.

Another, but a smaller, class consists of names compounded with עַם, 'people,' resembling the many Greek compositions with λαός and δῆμος; and just as in Greek δῆμος is placed first or last (Demosthenes, Aristodemos), so also עַם is at one time found in the first, and at another in the last place; only that, according to the laws of the Semitic language, the sense of one of these positions is exactly the reverse of the other. It is important, however, to remark here that in this, just as in the former class, one member is generally a word which is used by itself as a proper name; that here, therefore, instead of a reference to the mere family, a wider regard to the whole people prevails, and an individual is considered with relation to his nation. Thus the common name עַמִּינָדָב, Exod. vi. 23, the German *Edelvolk*, *i. e.* one who belongs to the noble people, so that it answers to the Greek Aristodemos; עַמִּיהוּד, *Glanzvolk*, also a favourite name, which would be Phaidrodemos in Greek; on the contrary, יִתְרְעָם, 2 Sam. iii. 5, perhaps the German *Volkhart*, the Greek Demosthenes; רַחַבְעָם, *Volkbreit;* יַרְקָעָם, *Volkgrün*, which occurs in 1 Chron. ii. 44 as the name of a place, but which must originally have been the name of the founder of that place. As all these compounds must be conceived to be in the state construct, so likewise we are probably to take the names יִרְבְעָם, properly 'people's increaser,' a suitable name for a prince, and יִשְׁבְעָם, 'people's turner' or 'leader;' for, as was observed above, the simple names are often formed with a prefixed *jod;* and we actually find יִשּׁוּב as a simple name, in Num. xxvi. 29, 1 Chron. vii. 1.

Most of the compound names, however, rather endeavour to express a religious sense, and therefore often contain the divine name. And here we at the same time find a new law of formation: as these compounds are intended to express a complete thought, such as the religious sentiment requires, a name may consist of an entire proposition with a verb, but of course in as brief a compass as possible; and indeed shorter compounds are made with a verb than with a passive participle, as נְתַנְאֵל (in the New Test. Ναθαναήλ, properly 'God-gave,' *i. e.* whom God gave, given by God, Θεόδοτος or Θεόδωρος) sounds shorter than נְתוּנִיאֵל with the participle, which would certainly express the same sense. But as the finite verb, as also any other predicate, can just as well precede as follow, accordingly a great freedom in the position of the divine name has prevailed in this class; and this peculiarity is preserved, in the same case, in the following period: but indeed the Greeks use Δωροθεός as well as Θεόδωρος. Thus, נְתַנְאֵל, 1 Chron. ii. 14, or אֶלְנָתָן, Jer. xxxvi. 12. The two names are then generally assigned to two different persons; nevertheless, both combinations may form names for the same person, as עַמִּיאֵל, 1 Chron. iii. 5, and אֱלִיעָם, 2 Sam. xi. 3, belong to the same individual. Now, as compound names evidently became very general, it is not surprising that, in the infinite multiplication of names to correspond with the infinite multitude of persons, some proper names were at length formed which solely consist of two names of God himself, expressing, as it were, the ineffably holy name to which the person dedicates himself,* as *Abiel* and *Eliab*, nay, even *Elicl*, 1 Chron. v. 24, viii. 20, 2 Chron.

* There is no doubt that this *ăsh*, as also *ĕsh*, in אֶשְׁבַּעַל, 1 Chron. viii. 33, is an abbreviation of *îsh*. No words are more liable to such gradual shortenings than proper names, especially those of longer compass. Even *Abi*, above explained, has been sometimes shortened to *î*, in consequence of its frequent use, as is shown by comparing אִיעֶזֶר, which occurs twice in Num. xxvi. 30, with the *Abiezer* of Josh. xvii. 2, Judg. vi. 11; and we must explain the few other names of this kind in the same way, such as אִיתָמָר, Exod. vi. 22; אִיזֶבֶל, 1 Kings xvi. 31; and אִיכָבוֹד, 1 Sam. iv. 21. In the last passage there is an allusion to the sense *without*, which אִי considered *per se* may express; but the only conclusion from this is, that this sound had already, in some names, suffered that change constantly.

* Names of this sort are found among all nations. We may briefly mention that there are persons with the Latin name *Salvator*, with the German ones, *Heiland*, *Herrgott*, and that a well known Dutch orientalist was called Louis *de Dieu*. The impious Seleucidæ took the name *Theos* for a different reason.

xxxi. 13. A very important question, however, still remains: what divine names were thus used in the earliest times until Moses? We find that *El* was then the commonest, and *Shaddai* less frequent; the latter is only found in צוּרִישַׁדַּי, 'rock of the Almighty,' Num. i. 6, ii. 12,* and עַמִּישַׁדַּי, 'people of the Almighty,' ver. 12; still more rarely is צוּר, 'rock,' itself used as a divine name, as פְּדָהצוּר, Num. i. 10, which is almost equivalent to פְּדָהאֵל, 'God redeems.' If we now consider that, according to the ancient testimony in Exod. vi. 3, the name Jahve (Jehovah) was not known then, but that the only other name of God which existed, beside the common *El* and *Elohim*, was the rarer and more awful Shaddai, these historical traces which are discovered in proper names, accord most perfectly with that statement, and furnish a very welcome confirmation of it.

On reviewing this whole system of forming compound names, it is evident that they at length became very common, as if their sounding pomp was considered more dignified and attractive; nevertheless, their chief tendency was to express the three great and most comprehensive relations in which a man can stand, namely, Home, People, and God. The original luxuriance of all language again gathered itself together in names, as in a fruitful soil; and accordingly there were times, even within the historical period, in which the primitive energies of all language were so busily active even in this apparently barren province, that (since all possible combinations were attempted in order to make an infinitude of names for the infinite number of persons) such names also were devised as, at first hearing, were surprising, as אֲבִיהוּא, properly 'self-father,' אֱלִיהוּא, 'self-god,' αὐτοθεός, a name which may be old, although it is only now found in the book of Job. And if we compare this Hebrew mode of forming compound names with that of the Greeks and Arabs, as the more familiar examples, we find this remarkable result, although it harmonises with many other phenomena; namely, that it is essentially more like the Greek than the Arab mode; only that the Greeks allude more frequently, in their names, to the *people*, which is characteristic of the whole of Greek life; while the Arabs, who always had families only, but never were a nation, never allude to the people, and do not, in composition, possess so great freedom in the position and juncture of words.

3. Lastly, many proper names have assumed the derivative syllable *-i*, or *ai* (which appears to be only dialectically different from *-i*, and is chiefly frequent in the later periods); and we must certainly consider that, in some cases, this syllable may possibly form mere adjectives, and therewith simple names, as אֲמָתַי, 'trueman,' from אֱמֶת, 'truth,' and *Barzillai* 'Iron,' or 'Ironman,' the name of a celebrated Gileadite family, Ezra ii. 61; 2 Sam. xvii. 27; or that it is derived from a place, as בְּאֵרִי, Hos. i. 1; 1 Chron. vii. 36, 'he of the well,' or, he of a place known as the well. But it undoubtedly very often also expresses a genealogical relation, like the Greek ending *-ιδης*, and presupposes a previous proper name from which it is derived; thus the name חוּרִי, 1 Chron. v. 14, as surely presupposes the above-mentioned *Chûr*, as the Greek Philippides does Philippos, and as *Ketûbai*, 1 Chron. ii. 9, one of the descendants of Judah, is connected with the Ketûb in iv. 11.*

Among the names of women, the oldest as well as the simplest which are found, are actually only suited for women, as *Rachel*, 'Ewe;' *Deborah*, 'Bee;' *Tamar*, 'Palm-tree;' *Hannah*, 'Favour,' the mother of Samuel. Those which express such a delicate and endearing sense as *Qéren Happûk*, 'box of eye-ointment,' Job xlii. 14, and חֶפְצִיבָה, 'my delight is in her,' 2 Kings xxi. 1, betray that they were formed in much later times; for, although the first occurs in the book of Job, which sedulously retains all archaisms, it nevertheless belongs to the same date as the latter. It appears indeed to have been customary, at an early period, to form names for women from those of men, by means of the feminine termination; as חַנִּית, 2 Sam. iii. 4, beside חַגִּי, Num. xxvi. 15; מִיכַלְתִּית, *i. e. Pia*, 2 Kings xxi. 19, beside מִיכָל, *Pius*, 1 Chron. v. 13, viii. 17, and יִשְׁלְמִית, *Friederike*, Num. xxiv. 11, beside יִשְׁלֹמוֹת, *Friederich*. But we must not overlook the fact that all these are instances of simple names;† no single example occurs from a compound man's name. As the same compound names, however, are sometimes used both for men and women, and as even these very names are applied to women, which could not originally have been applicable to any but men, as *Abigail*, *Achinoam*, accordingly, we must assume that the plastic power of the language had already exhausted itself in this remote province, and that, for that reason, the distinction of the feminine was omitted; almost in the same way as Sanscrit and Greek adjectives of the form

* That is, 'who seeks protection in the Almighty,' like Διοκράτης. It is desirable to confine the force of the *-i*, as much as possible, to that of a mere vowel of union, because the uniformity of the other structures of names requires it. There is no doubt, however, that in later times, as this union-vowel became lost to the common language, it was taken as the suffix of the first person, as is shown by the newly-coined poetical name, אֲתִיאֵל, 'With-me-is-God,' Prov. xxx. 1. But this is not the force of it originally.

* It is remarkable that the genealogical relation appears to be sometimes expressed by the mere ה of motion, as יַעְלָה, 1 Chron. iv. 36, which would be equivalently expressed by a German name *Zu-Jacob*; יִשְׂרְאֵלָה, *De Israel*, 1 Chron. xxv. 14, cf. ver. 2; and most distinctly in תֵּישֵׁבְנָה, 'reckoned to Dan,' Neh. vii. 4; cf. יֵישֵׁבְקָשָׁה in 1 Chron. xxv. 4.

† Or of those also in which the guttural has already dropped the second member; for Chanael and Zabdi, as is shown below, are shortened from Chananjah, Zabdijah

εὐδαίμων, εὐτυχής, are not able to distinguish the feminine in form.

II. This is the whole principle which regulates the formation of Hebrew names, both as it manifests itself in the earliest times, and as it extends into the succeeding periods, in which it receives new impulses, and undergoes modifications of colour but not of substance.

For if we inquire what new element the Mosaic period introduced into names, we find that, on the whole, it is only the influence of the new religion which manifests itself in the strongest characters, and causes extraordinary innovations. It is not in the Psalms only and other books that we discover how deeply this religion affected men; we may also infer it from the names which became current in that period. Nay, it is only these words of common life which render it evident to our senses with what a power this religion penetrated all the depths of the national mind, and how zealously every man in Israel endeavoured 'to glory in the name of Jahve,' according to the words of the prophet, Isa. xliv. 5; cf. Ps. cv. 3.

As the whole national life was renovated by so influential a new religion, the mode of giving names returned to its primitive state, since not only were new names created, but entire sentences, of the shortest compass, expressing the mighty thoughts which agitated the times, were also applied as names.* Thus, especially in the times in which the Mosaic religion exercised a more vivid influence, names were formed of entire sentences, in which some of its most affecting truths are expressed, as יוֹשַׁב חֶסֶד, 'mercy-is-recompensed,' 1 Chron. iii. 20; אֶלְיוֹעֵנַי, 'to-Jahve-are-mine-eyes' (as if it were derived from hymns like Ps. cxxiii.), 1 Chron. iv. 36, vii. 8, viii. 20;† Ezra x. 22, 27; Nehem. xii. 41; הוֹדַוְיָה, 'praise-ye-Jah' (from well-known passages of the Psalms), 1 Chron. iii. 24, Ezra ii. 40;‡ as a name of a woman, הַצִּלְלְפּוֹנִי, 'Give-shadow-thou-that-seest-me' (God), 1 Chron. iv. 3. But we seem to have the words of a great prophet distributed in names of several relations, when we find the words—

גִּדַּלְתִּי וְרוֹמַמְתִּי עֻזֶּר
מַלּוֹתִי הוֹתִיר מַחֲזִיאוֹת

i. e. 'I have given great and exalted aid,
Have spoken oracles in abundance'

(which evidently contain a verse such as an ancient prophecy might begin with), applied to the five musical sons of Hêman—*Giddalti* (ezer), *Romamtiezer*, *Mallôti*, *Hothîr*, *Machazioth*, 1 Chron. xxv. 4, cf. ver. 26, 28-31. This is really a remarkable example. We also once find, in Isa. vii., a particular representation of the mode in which such names as *Sheârjashûb* and *Immanuel* arose in real life.

But it was chiefly only the name of God in this religion, Jahve, which was employed in the formation of names (in the same way as the earlier divine names were); and it is shortened, when it constitutes the last member of the name, to *-jáhu*, or, still more, to *-jah*, and, when it is the first member, to *Jehó-*, or *Jo-*. In this usage it occurs with infinite frequency (the older name *Shaddai* becoming obsolete, and *El* alone continuing in use), while the other member of the name often retains the same form as in the primitive times, *e. g.* גֵּרְיָה, like גֵּר, and אֲבִינֵר. The mother of Moses, *Jokébed*, Exod. vi. 20, is, according to all traces, the first whose name bears evidence of the worship of this God (which is an exceedingly important testimony to the truth of the whole history, but we cannot pursue the subject farther here); and it is a beautiful incident that Moses, with his own mouth, changed the name of his most valiant warrior *Hoshéa*, *i. e.* 'Help!' into *Jehoshúa*, *i. e.* 'Godhelp;' as Muhammed, in like manner, gave some of his followers names conformable to his new religion.*

The frequency of such compositions with the name of Jahve may be estimated by the abbreviations which sometimes become customary in such names. Thus מִיכָיָהוּ, or מִיכָיְהוּ (as it is occasionally pointed), is not only shortened to מִיכָיָה, but to מִיכָה, Judg. xvii. 5, 9-13, cf. ver. 1, 4; 2 Chron. xviii. 14, cf. ver. 7-13; in which manner we are also to explain the name of the well-known minor prophet. Thus also the common name for men and women, *Abijáhu* or *Abija*, is once shortened to *Abi*, 2 Kings xviii. 2.† There are, however, two cases which are not to be confounded with these casual and gradual abbreviations. First, namely, we find the rare instance that a name which has been preserved unchanged, is nevertheless occasionally formed by dropping the syllable *Jo-* or *-jah*: as it is evident that נָתָן has been shortened from נְתַנְיָה or יוֹנָתָן; as likewise מַתָּן, 2 Kings xi. 18, from מַתַּנְיָה; and זַכָּר, 1 Chron. viii. 31, from זְכַרְיָה; because names which mean 'gave,' 'gift,' 'memory,' do not by themselves produce a suitable sense, and because they never are found with *Abi-*, *Achi-*, and such additions, nor can be traced back into the primitive times. We are therefore obliged, in this case, to assume that these names have been designedly shortened, in the effort to make as many different names as possible; and, as it is not uncommon for two brothers to receive similar names, this may be the immediate cause for the formation of a name *Nathan* beside *Nethanjah*.‡ Secondly, when-

* Similar instances occurred in England in the seventeenth century.

† In this place we find אליעני, which the Masoretes point *Eliênai;* but this would not produce any sense, and a ו has evidently been omitted. The Sept. reads Ἐλιωναΐ, which is right.

‡ The heavier pronunciation *Hodávjah* seems to be designedly preferred to *Hodújah*, because Hodújah would easily pass over into Hodijjah, which would give a different sense. There is only one other similar example, יוֹשַׁוְיָה, 1 Chron. xi. 46, the meaning of which is obscure.

* Weil, in his *Leben Muhammeds* (Stuttgardt, 1843, p. 344), treats this subject too briefly. Elnavavi discusses it more at length in the preface to his *Tahdsib elasmâi*, ed. Wüstenfeld, p. 15.

† In like manner, פַּלְטִי, 1 Sam. xxv. 14, is an abbreviation of פַּלְטִיאֵל, 2 Sam. iii. 15.

‡ This case occurs in the same way among

ever a derivative in *-i* is formed, the addition *-jah*, or even *Jo-* at the beginning, disappears; and in this case also we find חֲנָנִי (although it is equivalent to the patronymic *Chananiades*), beside חֲנַנְיָה, as the name of his brother, 1 Chron. xxv. 4, 23, 25.

III. This is the type and fashion of the names as late as the times after the first destruction of Jerusalem. The influence of the dispersion among foreign nations may, indeed, be immediately traced in the new names which allude to the captivity, as the name of *Zerubbabel* himself, which is a contraction of זְרוּ בָבֶל, means 'scattered to Babylon.' Yet this foreign influence is but transient; and in the centuries immediately succeeding the Exile, in which the last books of the Old Testament were written, we find, on the contrary, that the ancient mode of giving names is preserved almost unchanged.

In this respect, however, there is a total difference in the times between the close of the Old and the beginning of the New Testament. For after a purely learned study of the Old Testament had sprung up, and the whole nation only continued to exist in its sacred books, they delighted to give their children the ancient Scriptural names; nay, they sought out such names as had only been common in the times before Moses, and had become obsolete in the long interval: names like *Jacob*, *Joseph*, *Maria*. But while these dead names were revived and zealously sought out, the capability for forming new names became gradually weaker. And, as the love of novelty still operated, and as the people lost their independence more and more, many foreign names became favourites, and were used equally with the old Biblical names. In this manner the form of names had, by the time of the New Testament, reached a state of development which nearly resembles that prevalent among ourselves.

Lastly, with regard to the Biblical names of individuals belonging to the less eminent nations with which the Israelites were surrounded, such as the Edomites, Phœnicians, Damascenes, &c., their formation indeed is generally very like that of the Hebrew names, inasmuch as all these nations spoke a Semitic language; but the materials of which they are formed are so different, that one can almost recognise these foreign nations by their mere names. Thus names like *Hadad*, *Ben-hadad*, *Hadad-ezer*, are quite strange to the Israelites, and refer to the tribes to the East of Palestine, where a god named Hadad was worshipped.—H. v. E.

NAOMI, wife of Elimelech of Bethlehem, and mother-in-law of Ruth, in whose history hers is involved [RUTH].

NAPHTALI (נַפְתָּלִי, *my wrestling*; Sept. Νεφθαλείμ), the sixth son of Jacob, and his second by Bilhah, Rachel's handmaid, born B.C. 1747, in Padan-Aram. Nothing of his personal history is recorded. In the testamentary blessing of Jacob Naphtali is described as אַיָּלָה שְׁלוּחָה הַנֹּתֵן אִמְרֵי שָׁפֶר (Gen. xlix. 21), translated in the Auth. Vers. 'a hind let loose, he giveth goodly words.' This sense is certainly that conveyed by the pointed Hebrew text as it now stands, and it is substantially preserved in the Oriental and Latin versions, and in the Targum of Jonathan. Gesenius renders it, 'Naphtali est *cerva* procera, edens *verba* pulchra,' *i. e.* pleasant or persuasive words, referring, he thinks, to some poetic or oratorical talent of this tribe, otherwise unknown. He vindicates this, which is essentially the current version, from the common objection.—How can words be ascribed to a hind?—by observing that the 'giving forth' applies not to the hind but to Naphtali. The Sept. translators, however, must have found the words rendered 'hind' and 'words' different, for they render the verse, Νεφθαλείμ στέλεχος ἀνειμένον ἐπιδιδούς ἐν τῷ γενήματι κάλλος; and as this reading merely requires a difference of points in the two Hebrew words in question, the idea here conveyed has been adopted by the great body of modern interpreters, Bochart's version of it being generally followed:—'Naphtali *terebinthus* patula, edens *ramos* pulchros.' According to this reading the verse might be rendered, 'Naphtali is a goodly tree [terebinth or oak] that puts forth lovely branches.' We certainly incline to this view of the text; the metaphor which it involves being well adapted to the residence of the tribe of Naphtali, which was a beautiful woodland country, extending to Mount Lebanon, and producing fruits of every sort. With this interpretation, better than with the other, agrees the blessing of Moses upon the same tribe: 'O Naphtali, satisfied with favour, and full with the blessing of the Lord, possess thou the west and the south' (Deut. xxxiii. 23).

When the Israelites quitted Egypt, the tribe of Naphtali numbered 53,400 adult males (Num. i. 43), which made it the sixth in population among the tribes; but at the census taken in the plains of Moab it counted only 45,400 (Num. xxvi. 50), being a decrease of 8000 in one generation, whereby it became the seventh in point of numbers. The limits of the territory assigned to this tribe are stated in Josh. xix. 32-39, which show that it possessed one of the finest and most fertile districts of Upper Galilee, extending from the Lake Gennesareth and the border of Zebulon, on the south, to the sources of the Jordan and the spurs of Lebanon on the north, and from the Jordan, on the east, to the borders of Asher on the west. But it was somewhat slow in acquiring possession of the assigned territory (Judg. i. 33). The chief towns of the tribe were Kedesh, Hazor, Harosheth, and Chinnereth, which last was also the name of the great lake afterwards called Gennesareth. In the Hebrew history Naphtali is distinguished for the alacrity with which it obeyed the call to arms against the oppressors of Israel when many other tribes held back (Judg. iv. 10; v. 18; vi. 35; vii. 23). In the time of David the tribe had on its rolls 37,000 men fit for military service, armed with shields and spears, under a thousand officers (1 Chron. xii. 34).

NARCISSUS (Νάρκισσος), a person of Rome,

the Arabs (of which *Hasan* and *Husain*, the sons of Ali, are the readiest example) as among the Hebrews (cf. *Geschichte des Volks Israel*, i. 321). Instances like *Uzziel* and *Uzzi*, 1 Chron. vii. 7, belong altogether to this rule; as also *Jishvah* and *Jishvi* (with the derivative syllable), Gen. xlvi. 17. Father and son also, for the same reason, bear names of similar sound.

apparently of some consequence, to the believers of whose household St. Paul sent his greetings (Rom. xvi. 11). Many commentators have supposed this person the same Narcissus who was the freedman and favourite of the Emperor Claudius (Suet. *Claud.* 28; Tacit. *Annal.* xii. 17).

NATAF (נָטָף) occurs only once in Scripture, and is translated 'stacte' in the Authorized Version (Exod. xxx. 34). 'And the Lord said unto Moses, Take unto thee sweet spices, *stacte* (*nataf*), and onycha, and galbanum; these sweet spices with pure frankincense.' 'Thou shalt make it a perfume after the art of the apothecary' (ver. 35). *Nataf* has been variously translated—*balsam, liquid styrax, benzoin, costus, mastich, bdellium.* Celsius is of opinion that it means the purest kind of myrrh, called *stacte* by the Greeks [Mor], He adduces Pliny as saying of the myrrh-trees, 'Sudant sponte stacten dictam,' and remarks, 'Ebræis נטף *Nathaf* est stillare'—adding, as an argument, that if you do not translate it myrrh in this place, you will exclude myrrh altogether from the sacred perfume. But Rosenmüller says, 'This, however, would not be suited for the preparation of the perfume, and it also has another Hebrew name, for it is called *mor deror*. But the Greeks also called *stakte* a species of Storax gum, which Dioscorides describes as transparent like a tear and resembling myrrh. This agrees well with the Hebrew name.' But Storax does not appear to us to be more satisfactorily proved to be nataf than the former. The Arabs apply the term ناطف to a sweetmeat composed of sugar, flour, and butter, in equal parts, with the addition of aromatics. We have no means of determining the question more accurately.—J. F. R.

NATHAN (נָתָן, *given;* Sept. Ναθάν), a prophet of the time of David. When that monarch conceived the idea of building a temple to Jehovah, the design and motives seemed to Nathan so good that he ventured to approve of it without the Divine authority; but the night following he received the Divine command, which prevented the king from executing this great work (2 Sam. vii. 2, sq.; 1 Chron. xvii.). Nathan does not again appear in the sacred history, till he comes forward in the name of the Lord to reprove David, and to denounce dire punishment for his frightful crime in the matter of Uriah and Bathsheba. This he does by exciting the king's indignation, and leading him to condemn himself, by reciting to him the very striking parable of the traveller and the lamb. Then, changing the voice of a suppliant for that of a judge and a commissioned prophet, he exclaims, '*Thou* art the man!' and proceeds to announce the evils which were to embitter the remainder of his reign (2 Sam. xii. 1, sq.; comp. Ps. li.). The lamentations of the repentant king drew forth some mitigation of punishment; but the troubled history of the remainder of his reign shows how completely God's righteous doom was fulfilled. The child conceived in adultery died; but when Bathsheba's second son was born, the prophet gave him the name of Jedidiah *(beloved of Jehovah)*, although he is better known by that of Solomon (2 Sam. xii. 24, 25). He recognised in this young prince the successor of David; and it was in a great measure through his interposition that the design of Adonijah to seize the crown was unsuccessful (1 Kings i. 8, sq.). Nathan probably died soon after the accession of Solomon, for his name does not again historically occur. It is generally supposed that Solomon was brought up under his care. His sons occupied high places in this king's court (1 Kings iv. 5). He assisted David by his counsels when he re-organized the public worship (2 Chron. xxix. 25); and he composed annals of the times in which he lived (1 Chron. xxix. 29; 2 Chron. ix. 29); but these have not been preserved to us. In Zechariah (xii. 12) the name of Nathan occurs as representing the great family of the prophets.

NATHANAEL (נְתַנְאֵל, *given of God;* New Test. Ναθαναήλ), a person of Cana in Galilee, who, when informed by Philip that the Messiah had appeared in the person of Jesus of Nazareth, asked, 'Can any good thing come out of Nazareth?' But he nevertheless accepted Philip's laconic invitation, 'Come and see!' When Jesus saw him coming he said, 'Behold an Israelite indeed, in whom is no guile.' Astonished to hear this from a man to whom he supposed himself altogether unknown, he asked, 'Whence knowest thou me?' And the answer, 'Before that Philip called thee, when thou wast under the fig-tree, I saw thee,' wrought such conviction on his mind that he at once exclaimed, 'Rabbi, thou art the son of God; thou art the king of Israel!' (John i. 45-51). It is clear, from the effect, that Nathanael knew by this that Jesus was supernaturally acquainted with his disposition and character, as the answer had reference to the private acts of devotion, or to the meditations which filled his mind, when under the fig-tree in his garden. It is questioned whether Jesus had actually seen Nathanael or not with his bodily eyes. It matters not to the result; but the form of the words employed seems to suggest that he had actually noticed him when under the fig-tree, and had then cast a look through his inward being. Passages from the rabbinical books might be multiplied to show that the Jews were in the habit of studying the law and meditating on religious subjects under shady trees (comp. Tholuck, *Commentar zum Johan.* i. 49). It is believed that Nathanael is the same as the apostle Bartholomew. All the disciples of John the Baptist named in the first chapter of St. John became apostles; and St. John does not name Bartholomew, nor the other evangelists Nathanael in the lists of the apostles (Matt. x. 3; Mark iii. 18; Luke vi. 14): besides, the name of Bartholomew always follows that of Philip; and it would appear that Bartholomew (son of Tholmai) is no more than a surname [Bartholomew].

NATIONS, DISPERSION OF. Many obvious reasons incline us to suppose that the small number of mankind which divine mercy spared from the extirpation of the Deluge, eight persons, forming at the utmost five families, would continue to dwell near each other as long as the utmost stretch of convenience would permit them. The undutiful conduct of Ham and his fourth son cannot well be assigned to a point of time earlier than twenty or thirty years after the Flood. So long, at least, family affection and mutual interests would urge the children of Noah not to break up their society. The dread of dangers, known and unknown, and every day's experience

of the benefits derived from mutual aid, would strengthen other motives. It is evident from Gen. xi. 10-16, that about 100 years, according to the Hebrew text, were spent in this state of family propinquity, yet with a considerable degree of proximate diffusion, which necessity would urge: but the dates of the Septuagint, without including the generation of the post-diluvian Cainan [see that article], give 400. The well weighed computation of Professor Robert Wallace, not yet published, makes the period 531 years. The Hebrew period can scarcely be admitted: but even that, much more the others, will afford a sufficient time for such an increase of mankind as would render an extensive outspread highly expedient. A crowded population would be likely to furnish means and incentives to turbulence, on the one hand, and to some form of tyranny on the other. Many of the unoccupied districts would become dangerously unwholesome, by stagnating waters and the accumulation of vegetable and animal putrescence. The products of cultivation, and of other arts, would have been acquired so slowly, as to have retarded human improvement and comfort. Tardy expansion would have failed to reach distant regions, till many hundreds or thousands of years had run out. The noxious animals would have multiplied immoderately. The religious obedience associated, by the Divine command, with the possession and use of the earth, would have been checked and perverted to a greater degree than the world's bitter experience proves that it actually has been. Thus, it may appear with pretty strong evidence, that a dispersion of mankind was highly desirable to be in a more prompt and active style than would have been effected by the impulses of mere convenience and vague inclination.

That this dictate of reasonable conjecture was realized in fact, is determined by the Mosaic writings. Of the elder son of Eber, the narrative says, his 'name was Peleg, because in his days the earth was divided' (Gen. x. 18); and this is repeated, evidently as a literal transcript, in 1 Chron. i. 19. If we might coin a word to imitate the Hebrew, we might show the paronomasia by saying, 'the earth was *pelegged*.' Some are of opinion that the event took place about the time of his birth, and that his birth-name was given to him as a memorial of the transaction. But it was the practice of probably all nations in the early times, that persons assumed to themselves, or imposed upon their children and other connections, new names at different epochs of their lives, derived from coincident events in all the variety of associated ideas. Of that practice many examples occur in the Scriptures. The conjecture is more probable that, in this instance, the name was applied in the individual's maturer age, and *on account of* some personal concern which he had in the commencement or progress of the separation. But the signification usually given is by no means a matter of indubitable certainty. The verb occurs only in the two passages mentioned (strictly but one), and in Ps. lv. 9, 'divide their tongues,' and Job xxxviii. 25, 'who hath divided a channel for the torrent' (produced by a heavy thunder-shower)? Respectable philologists have disputed whether it refers at all to a separation of mankind; and think that the event which singularly marked Peleg's life was an occurrence in physical geography, an earthquake, which produced a vast chasm, separating two considerable parts of the earth, in or near the district inhabited by men. That earthquakes and dislocations of land have taken place in and around that region, at various times before the historical period, the present very different levels, and other results of volcanic agency, afford ample proofs. The *possibility*, therefore, of some geological convulsion cannot be denied; or that it might have been upon a great scale, and followed by important effects upon the condition of mankind.

But neither the affirming nor the rejecting of this interpretation of 'the earth's being divided,' can affect the question upon the primeval separation and migratory distributions of men. The reasons which we have mentioned render it certain, that some such event, and successive events, have taken place: and, without urging the passage of disputed interpretation, it is evident that the chapters of Genesis x. and xi. assume the fact, and may be considered as rather a summary recognition of it than as a detailed account. Two sentences are decisive (ch. ix. 19), 'These are the three sons of Noah, and from these all the earth (נפצה) was *scattered over*.' This is the closest translation we can give. Gesenius assigns to the verb a reflexive signification; and thus it would be well expressed in French by *la terre s'est répandue* or *s'est distribuée*. The other is ch. x. 32, 'These are the families of the sons of Noah, [according] to their generations, in their nations; and from these the nations (נפרדו) were *dispersed* in the earth, after the Flood.' Here another verb is used, often occurring in the Old Testament, and the meaning of which admits of no doubt. We find it also at verse 5—'From these the isles of the nations were *dispersed*, in their lands, each [according] to its language, [according] to their families, in their nations.' We have an idiom perfectly similar in our modern language, when we say, *the field is sown*, for *the seed is sown in the field*.

In the latest composition of Moses is another passage which, in this inquiry, must not be neglected (Deut. xxxii. 8, 9)—'In the Most High's assigning abodes to the nations, in his dispersing the sons of Adam, he fixed boundaries to the peoples according to the number (מספר, more exactly, *numeration*) of the sons of Israel: for the assigned portion of Jehovah is his people; Jacob, the lot of his inheritance.' Of this 8th verse the Septuagint translation is remarkable; and it thus became the source of extraordinary interpretations: 'When the Most High apportioned nations, when he scattered abroad the sons of Adam, he fixed boundaries of nations according to the number of the angels of God.' There might be a reading (*El* or *Elohim*, instead of *Israel*), which would yield that meaning from comparison with Job i. 6; ii. 1; xxxviii. 7. Also the Alexandrine translators might welcome a colourable reason for the rendering, that it might haply serve as a protection from the danger of the Macedonico-Egyptian government, taking up the idea that the Jews claimed a divine right of supremacy over all other nations. This reading, however, gave occasion to the Greek Fathers (Justin Martyr, Origen, Eusebius, &c.), to main-

tain the doctrine of a later Jewish origin, that the grandsons of Noah being seventy, each was the ancestor of a nation; each nation having its own language, derived from the confusion of Babel; and each also its guardian-angel, set over it by the Creator; excepting the nation of Israel, of which Jehovah himself was the Tutelary Deity. In this notion a reader who is versed in the Bible sees the mixture of a little truth with great error. That error of ancient heathen priests and their followers, of the Gnostics in the second and third centuries, and of some modern anti-supernaturalists, involves that the God of Israel, the Jehovah of the Old Testament, was an imaginary being, a part of the national mythological machinery, and not the ALL-PERFECT SUPREME.

The accessory perplexities in this passage are thus satisfactorily unravelled. The only real difficulty lies in its seeming to assert that the nascent population was distributed into groups with the express design of effecting a *numerical* correspondence with the Israelitish family eight hundred years after. The names assigned to the third degree, that is the sons (rather tribes or nations) of Noah's three sons, are, Japhet fourteen, Ham thirty-one, Shem twenty-five, making *seventy;* and the whole family of Jacob, when it came to be domiciliated in Egypt, was *seventy* (Gen. xlvi. 26; Exod. i. 5; Deut. x. 22). Some have also fancied a parallel in the seventy elders (Exod. xxiv. 1, 9; Num. xi. 16, 24, 25; see also *Pictorial Palestine, Civil History*, Index, article *Elders*). These puerilities might have been prevented had men considered that מספר does not signify merely an arithmetical amount, but is used to denote an *exact narration* (Judg. vii. 15). The passage is in the highly poetical style of the magnificent ode in which it occurs, and, reduced to plain terms, might be thus represented: 'The Almighty and Omniscient Jehovah has decreed and disposed all beings and events, in all time and every place, upon a perfect system of mutual relationship, every part of which corresponds to every other: therefore, by his provident wisdom and power, he directed the movements and settlements of all the tribes of men in such a manner as would, after the lapse of a thousand years, combine every agent and instrument for putting the Israelites into possession of the country promised to their ancestors, and thereby demonstrating them to be the peculiarly favoured people of God.'

We now come to the immediate subject of this article, the *Dispersion of Nations.*

Under this or some similar designation, it has been the prevalent opinion that the *outspreading*, which is the entire subject of Genesis, ch. x., and the *scattering* narrated in ch. xi. 1-9, refer to the same event, the latter being included in the former description, and being a statement of the *manner* in which the separation was effected. From this opinion, however, we dissent; and our conviction was formed solely from the perusal of the Scriptural narrative, before we were aware (or in total forgetfulness) that Mr. Jacob Bryant had long ago maintained the same opinion (*Ancient Mythology*, vol. iv., 3rd ed., pp. 23-44, 92). An unbiassed reading of the text appears most plainly to mark the distinctness, in time and character, of the two narratives. The first was universal, regulated, orderly, quiet, and progressive: the second, local, embracing only a part of mankind, sudden, turbulent, and attended with marks of the Divine displeasure.

The former is introduced and entitled in these words:—'Shem, and Ham, and Japheth;—these are the three sons of Noah; and from them was the whole earth overspread.' After the mention of the sons of Japheth, it is added, 'From these the isles of the nations were dispersed, in their lands, each to its language, to their families, in their nations.' A formula somewhat differing is annexed to the descendants of Ham: 'These are the sons of Ham, [according] to their families, to their tongues, in their lands, in their nations.' The same phrase follows the enumeration of the house of Shem: and the whole concludes with, 'These are the families of the sons of Noah, [according] to their generations, in their nations; and from these the nations were dispersed in the earth after the Flood' (Gen. ix. 19; x. 5, 20, 31, 32).

The second relation begins in the manner which often, in the Hebrew Scriptures, introduces a new subject. We shall present it in a literality even servile, that the reader may gain the most prompt apprehension of the meaning. 'And it was [*col-ha-aretz*] all the earth (but with perfect propriety it might be rendered *the whole land, country, region*, or *district*): lip one and words one [*i. e. the same, similar*]. And it was in their going forwards that they discovered a plain in the country Shinar; and they fixed [their abode] there.' Then comes the narrative of their resolving to build a lofty tower which should serve as a signal-point for their rallying and remaining united. The defeating of this purpose is expressed in the anthropomorphism, which is characteristic of the earliest Scriptures, and was adapted to the infantile condition of mankind. 'And Jehovah scattered them from thence upon the face of the whole earth [or *land*], and they ceased to build the city' (ch. xi. 2-9; ANTHROPOMORPHISM, BABEL, in this work; also J. Pye Smith's *Scripture and Geology*, lect. vii., where this characteristic of primeval style is largely investigated). We shall here quote so much from Mr. Bryant as appears to us supported by direct evidence, or a high degree of probability.

Of Noah—'We may suppose that his sons showed him always great reverence; and, after they were separated, and when he was no more, that they still behaved in conformity to the rules which he established. But there was one family which seems to have acted a contrary part. The sons of Cush would not submit to the Divine dispensation [in the dispersion of the families]: and Nimrod, who first took upon himself regal state, drove Ashur from his demesnes, and forced him to take shelter in the higher parts of Mesopotamia. The sacred historian, after this, mentions another act of a rebellious purpose, which consisted in building a lofty tower with a very evil intent. Most writers have described this and the former event (Nimrod's usurping conduct), as antecedent to the migration of mankind: but it will be my endeavour to show that the general migration was not only prior, but from another part of the world. I think that we may (from Gen. x. and xi.) observe two different occurrences which are generally blended together. First, that there was a formal *migration* of families to the several re-

gions appointed for them, according to the determination of the Almighty: secondly, that there was a *dissipation* of others, who would not acquiesce in the Divine dispensation. It is generally thought that the whole of mankind is included in this description (Gen. xi. 1, 2). But I am not certain that these words afford any proof to this opinion. The passage, when truly translated, does not by any means refer to the whole of mankind. According to the original, it is said indeterminately that, "in the journeying of people from the East, they found a plain in the land of Shinar." The purport of the whole passage amounts only to this, that before there was any alteration in the language of mankind, a body of people came from the East to the place above specified. So that I am far from being satisfied that the whole of mankind was engaged in this expedition from the East. The Scripture does not seem to say so; nor can there be any reason assigned why they should travel so far merely to be dissipated afterwards. We have reason to think that, soon after the descent from the ark, the patriarch found himself in a fine and fruitful country (as described by all the ancient and modern authorities). Here I imagine that the patriarch resided. The sacred writings mention seemingly his taking up his abode for a long time upon the spot. Indeed they do not afford us any reason to infer that he ever departed from it. The very plantation of the vine seems to imply a purpose of residence. Not a word is said of the patriarch's ever quitting the place; nor of any of his sons departing from it till *the general migration*.' When mankind had 'become very numerous, it pleased God to allot to the various families different regions to which they were to retire: and they accordingly, in the days of Peleg, did remove and betake themselves to their different departments. But the sons of Cush would not obey. They went off under the conduct of the arch-rebel Nimrod, and seem to have been for a long time in a roving state; but at last they arrived at the plains of Shinar. These they found occupied by Ashur (ch. x. 11) and his sons; for he had been placed there by divine appointment. But they ejected him, and seized upon his dominions. Their leader is often mentioned by the Gentile writers, who call him Belus' [*Bel, Baal;* 'not a name of any particular person, but a title assumed by many, and of different nations;' *Ane. Mythol.* vol. vi. p. 260]. 'In the beginning of this history it is said that they journeyed from the East when they came to the land of Shinar. This was the latter part of their route; and the reason of their coming in this direction may, I think, be plainly shown. The ark, according to the best accounts, both sacred and profane, rested upon a mountain of Armenia, called Minyas, Baris, Lubar, and Ararat.' [See in this work ARARAT, especially p. 200, and ARK.] 'Many families of the emigrants went probably directly *east* or *west*, in consequence of the situation to which they were appointed. But those who were destined to the southern parts of the great continents which they were to inhabit, could not so easily and uniformly proceed; there being but few outlets to their place of destination. For the high Tauric ridge and the Gordyæan mountains came between and intercepted their due course.' [Mr. Bryant introduces evidence of the next to insurmountable character of those mountains, which must have been far more impassable in those early times than now.] 'I should therefore think that mankind must necessarily, for some ages, have remained near the place of descent, from which they did not depart till the time of the general migration. Armenia is in great measure bounded either by the Pontic Sea or by mountains; and it seems to have been the purpose of Providence to confine the sons of men to this particular region, to prevent their roving too soon. Otherwise they might have gone off in small parties before the great families were constituted. Many families were obliged to travel more or less eastward, who wanted to come down to the remoter parts of Asia. The Cushites [*Cuthites*, Bryant, p. 246], who seem to have been a good while in a roving state, might possibly travel to the Pylæ Caspiæ before they found an outlet. In consequence of this the latter part of their route must have been a "journeying from the East." I was surprised, after I had formed this opinion from the natural history of the country, to find it verified by that ancient historian Berosus.' [The Chaldæan historian, contemporary with Alexander, a writer apparently of fidelity and judgment, considering his circumstances. Of his work a few fragments only are preserved by Josephus, Eusebius, and other ancient writers. See a considerable number of these passages translated by Mr. Bryant, vol. iv. p. 123-137.] 'He mentions the route of his countrymen from Ararat after the Deluge, and says that it was not in a straight line; but the people had been instructed to *take a circuit, and so descend to the regions of Babylonia*. In this manner the sons of Cush came to the plains of Shinar, of which Babylonia was a part; and from hence they ejected Ashur, and afterwards trespassed upon Elam in the region beyond the Tigris' (*Ane. Mythol.* vol. iv. p. 21-31).

Mr. Bryant adduces reasons for believing that the *confusion of speech* was a miraculously-inflicted failure of the physical organs, producing unintelligible pronunciation of one and the same language; that it affected only the house of Cush and their adherents; and that it was temporary, ceasing upon their separation. He proceeds:— 'They seem to have been a very numerous body; and, in consequence of this calamity, they fled away; not to any particular place of destination, but "were scattered abroad upon the face of the whole earth." They had many associates, probably out of every family; apostates from the truth, who had left the stock of their fathers and the religion of the true God. For when Babel was deserted we find among the Cushites of Chaldæa some of the line of Shem (ch. xi. 28, 31), whom we could scarcely have expected to have met in such a society. And we may well imagine that many of the branches of Ham were associated in the same manner in confederacy with the rebels: and some perhaps of every great division into which mankind was separated' (*Ib.* pp. 38-45).

Having thus removed, as we trust, the obstructions and obscurities, our course will be plain and brief in the consideration of our chief subject, the first and properly so-called DISPERSION of families and tribes destined to form the nations of the earth.

'The most ancient history of the human race, and the oldest composition perhaps in the world, is a work in Hebrew;' of which the initial portions (Gen. i., ii.) are 'a preface to the oldest civil history now extant; we see the truth of them confirmed by antecedent reasoning, and by evidence in part highly probable, and in part certain; but the connection of the Mosaic history with that of the Gospel, by a chain of sublime predictions unquestionably ancient, and apparently fulfilled, must induce us to think the Hebrew narrative more than human in its origin, and consequently true in every substantial part of it; though possibly expressed in figurative language [referring to the accounts of the creation and the fall]. It is no longer probable only, but it is absolutely certain, that the whole race of man proceeded from *Irân* [the proper and native name of Persia and some connected regions], as from a centre, whence they migrated at first in *three great colonies;* and that those three branches grew from a common stock, which had been miraculously preserved in a general convulsion and inundation of this globe' (Sir William Jones, *On the Origin and Families of Nations*, Works, ed. by Lord Teignmouth, 8vo. iii. 191-196).

From the study of this interesting fragment of antiquity, the following observations have presented themselves.

1. The enumeration comprises only nations existing in the age of Moses, and probably of them only the most conspicuous, as more or less connected with the history of the Israelites. Many nations have been formed in subsequent times, and indeed are still forming, by separation and by combination; these can be considered only as included on the ground of long subsequent derivation. Such are the populations of Eastern Asia, Medial and South Africa, America, and Australasia.

2. It cannot be affirmed with certainty that we are here presented with a complete *Table of Nations*, even as existing in the time of Moses. Of each of the sons of Noah, it gives the sons: but of their sons (Noah's great-grandsons) it is manifest that all are not mentioned, and we have no possible means of ascertaining how many are omitted. Thus, of the sons of Japheth, the line is pursued only of Gomer and Javan; Magog, Madai, Tubal, Meshech, and Tiras, are dropped without any mention of their issue; yet we have evidence that nations of great importance in the history of mankind have descended from them. Ham had four sons: of three of them the sons, or rather clannish or national descendants, are specified; but to Phut, the fourth, no posterity is assigned. Shem had five sons, but the descendants of only two of them are recorded. It cannot be supposed that those whose sequence is thus cut off, died without children; for, as we shall presently see, nations of great historical interest may be traced up to them.

3. The immediate descendants of Japheth, Ham, and Shem are, except in the instance of Nimrod and a few more, some of which are doubtful, given by names not personal, but designative of tribes or nations, or their countries. Thus, all those terminating in the plural *im*, and those specified by the Gentilitian adjective, the Jebusite, the Hivite, &c.

4. In attaching the names of nations to those here given, there is sometimes a deep uncertainty. Resemblances in orthographical appearance, or in similarity of sound, are not to be relied on alone; there must be accessory and confirmatory evidence. Oriental names possess a distinguished character of unchangeableness; a circumstance of which Dr. Robinson has made important use in his *Biblical Researches in Palestine*. On this ground, inferences are pretty safe. But it is far otherwise with names known to us only through the medium of the Greeks and Romans; for they were in the habit of altering proper names, often with wide licence, to a conformity with their own tongues. For the investigation before us we have an aid, invaluable both for its ample comprehension and its divine authority, in the account of the traffic of Tyre (Ezek. xxvii.).

5. We are not warranted to suppose that the families, or clans, or tribes, or however the groups might have been formed, migrated immediately to their respective seats, by any sort of general breaking up. This would presuppose some kind of compulsory enforcement, which neither the nature of the case, nor any intimation in the narrative, warrants us to assume. We may rather conceive that a diversity of movements took place, excited by general conviction of duty and utility, guided in a great measure by patriarchal directions, and strengthened by circumstances which would inevitably occur; such, on the one hand, as earthquakes, volcanic eruptions, local inundations, land-slips, proof of unwholesomeness in marshy districts, the annoyance of winged insects or other noxious animals—urging to depart from disagreeable or dangerous places; and, on the other hand, attractive peculiarities, new and more convenient situations for pasturage, better soils for the various kinds of agriculture, more pleasing sites for dwellings, the formation of towns, and the security of their inhabitants. It is also too probable that there were turbulent men, or those who had perpetrated crimes or occasioned offences, who, with their families and adherents, would quit hastily and travel as rapidly and as far as they could.

6. The acts of separation and journeying would have specific differences of impulse and performance; they would affect one party and another, more or less, as to time, numbers, and rapidity of movement.

7. Did this great measure, so important in its influence upon the whole history of mankind, originate in a DIVINE command, given by miraculous revelation? Or, was it brought to pass solely in the way of God's universal providence, to which nothing is great, nothing is small—operating by natural means upon the judgments, wills, and actions of men as rational agents? We think that we have not decisive reasons for adopting either side of this alternative. In favour of the former may be urged the necessity of a supernatural authority to induce universal obedience, the motive arising from the assurance of Divine guidance and protection, and the analogy of the fact which took place 600 years after (*corrected* chronology, but, according to the present Hebrew text, only 176); 'The Lord had said unto Abram, Get thee out of thy country, unto a land which I will show thee' (Gen. xii. 1). On behalf of the latter supposition it is to be recollected, that all events are equally providential,

that God rules by his unseen and too often unacknowledged influence upon the free actions of his creatures, no less than by any supernatural disclosure of his will; that, in this case, the inspired record is silent upon such a disclosure; that the ordinary plan of the Divine government is fully adequate to all the effects; and that the language upon which we have before commented (Deut. xxxii. 8) is completely applicable to that ordinary course of events by which 'the Most High God ruleth in the kingdom of men,' and 'worketh all things according to the counsel of his own will' (Dan. v. 21; Ephes. i. 11).

We have now only to place the enumeration of nations before our readers, having availed ourselves of the labours of Bochart, J. D. Michaelis, the younger Rosenmüller, Gesenius, Robinson, and Baumgarten.

I. Sons of Japheth, the *Iapetus* of the Greeks.

i. Gomer. This name is traced in the Kimmerii of Homer and Herodotus; the Gomares (Γομαρεῖς, Josephus, *Antiq.* i. 6), whence Kelts, Gauls, Galatians; the Kymry; all the Celtic and Iberian tribes, Welsh, Gaelic, Irish, Breton; the Cimmerian Bosphorus, Crimea.

Sons of Gomer:—

1. Ashkenaz. Axeni, inhabitants of the southern coasts of the Euxine Sea, where we find a country Askania, and a river Askanius, and a large part of Armenia; the Basques in the north of Spain; the Saxons, as the Jews interpret Ashkenaz, in Jer. li. 27, to be Germany.

2. Riphath (Diphath, 1 Chron. i. 6, a permutation of D and R, not unexampled). Rhibii, east of the Euxine; Tobata and other parts of Paphlagonia; Croatia; the Riphæan mountains, a very obscure name in ancient geography (Strabo, Virgil, Pliny, Mela), referring probably to the great chains of mountains from the north of Asia westwards (Hyperboræans, Steph. Byzant.), and therefore including vague knowledge of the Uralian, Hartz, and Alpine regions.

3. Togarmah. Peoples of Armenia and other parts of the Caucasian region. The Armenian traditions assign as their ancestor Haik, the son of Torgom and grandson of Noah.

ii. Magog. In Ezekiel this seems to be used as the name of a country, and Gog that of its chieftain. The Mongoles, Moguls; the great Tartar nation.

iii. Madai. The Medes; people of Iran, to whom the Sanscrit language belonged; primeval inhabitants of Hindustan.

iv. Javan. The Greeks, Asiatic and European. Ionies (Hom. *Il.* xiii. 685).

Sons of Javan:—

1. Elisha. Greeks especially of the Peloponnesus; Hellas; Elis, in which is Alisium (Ἀλείσιον, *Il.* ii. 617).

2. Tarshish. The east coast of Spain, where the Phœnician Canaanites afterwards planted their colony.

3. Kittim. Inhabitants of the isles and many of the coasts of the Mediterranean, particularly the Macedonians and the Romans, and those farther to the west.

4. Dodanim (Rhodanim, 1 Chron. i. 7). Dodona, a colony from which probably settled at the mouths of the Rhone, Rhodanus.

To this Javanian (Ionian) branch is attributed the peopling of 'the isles of the nations' (ver. 5), a frequent Hebrew denomination of the western countries to which the Israelites, Tyrians, Egyptians, &c., had access by sea.

II. Sons of Ham. The word signifies *heat* or *hot*, alluding to the climes which the most of his posterity were to occupy: it was also an indigenous name of Egypt.

i. Cush. The Ethiopians, first on the Arabian side of the Red Sea, then colonizing the African side, and subsequently extending indefinitely to the west, so that *Cushite* (Jer. xiii. 23) became the appellative of a negro.

Sons of Cush:—

1. Seba. Joined with Mizraim and Cush (Isa. xliii. 3), evidently denoting contiguity and affinity. This tribe or class is probably referred to Suba, a native name of Meroe upon the Nile, in the farthest south of Egypt, or the beginning of Ethiopia.

2. Havilah. Of this word vestiges are found in various names of places in Western Arabia, and the adjacent parts of Africa. It is quite distinct from the Havilah (ch. ii. 11) in or near Armenia, and probably from another (ver. 29) in Arabia, unless we suppose a union of tribes, or one succeeded by the other.

3. Sabtah. Sabota or Sabbatha is the name of an ancient trading town of Arabia.

4. Raamah, רַעְמָה, Sept. *Rhegma* (Alex. *Rhegehma*), which, changing ε into η, is the name of a port which the Ægypto-Greek geographer Claudius Ptolemy (who flourished in the earlier part of the second century) places on the Arabian coast of the Persian Gulf. To this place Dr. Baumgarten (Kiel, 1843) refers the name: others take it to be Reama, a town of considerable importance in the south-western part of Arabia the Happy, whose inhabitants are remarkably black; mentioned along with Sheba in Ezek. xxvii. 22, as a place of rich Oriental traffic.

Two sons of this Raamah are mentioned, Sheba and Dedan. We find these in the subsequent Scriptures distinguished for trade and opulence (Ps. lxxii. 10, 15; 1 Kings x. 2; Isa. lx. 6; Ezek. xxvii. 15, 20, 22). They both lie in the western part of Arabia. The queen of Sheba came to the court of Solomon. Dedan is not improbably considered as the origin of Aden, that very ancient sea-port and island at the mouth of the Arabian Gulf or Red Sea, which has very recently risen into new importance.

5. Nimrod, an individual [Nimrod]. He built, besides Babel, his metropolis, three cities or towns in the great plain of Shinar—Erech, Accad, and Calneh. These were probably Aracca or Arecha on the Tigris (some think Edessa); Sacada, near the confluence of the Lycus and the Tigris; and the third (Calne, Isa. x. 9) Chalonitis of the Greeks, afterwards called Ctesiphon: but much obscurity has upon these conjectures.

ii. Mizraim, literally the *two Egypts*, the upper and the lower: each was called *Mizr*, a word even now vernacular in that country. Of his descendants seven are specified under *plural* national names, some of which are well ascertained.

1. Ludim. Lydia, celebrated as soldiers and archers (Isa. lxvi. 19; Jer. xlvi. 9; Ezek. xxvii. 10; xxx. 5), and in these passages connected with other peoples known to be African.

The Ludim probably lay towards Ethiopia. They must not be confounded with the Lydians of Asia Minor (ver. 22). Mr. William John Hamilton, in his recent very valuable *Researches in Asia Minor, Pontus, and Armenia*, annexes the following paragraph to his account of the few remaining ruins of Sardis, the ancient capital of Lydia :—

'It was my intention to have added some observations on the early traditional history of Lydia, and, following the plan of an interesting work by the Abbé Guerin du Rocher, on the fabulous history of Egypt, to show how that of Lydia might also be divested of many of the inconsistent fables with which it has been clothed by Herodotus and other ancient historians. I wished to have shown that Manes, the first king of Lydia, was no other than Noah; that Lydus, the grandson of Manes, was Lud, the grandson of Noah; and, particularly with regard to the much involved question of the Tyrrhenian emigration of the Lydians, that the whole account is a confused and perverted narrative, founded on the real emigration of another Tyrrhenus, *viz.* Abraham the son of Terah, with the account of which, in the twelfth and thirteenth chapters of Genesis, the Lydian emigration coincides in every important respect. I have found, however, that the development of this view would extend to a greater length than I had anticipated; and I am therefore compelled to defer the consideration of it to a future opportunity' (vol. ii. p. 383).

2. Ananim. Very uncertain. Bochart supposes them to have been wandering tribes about the temple of Jupiter Ammon, where was an ancient people called Nasamones.

3. Lehabim. Perhaps inhabitants of a coast-district immediately west of Egypt. Probably the Lubim (2 Chron. xii. 3; Nahum iii. 9).

4. Pathrusim. The people of the Thebaid (Pathros) in Upper Egypt.

5. 'Casluhim, out of whom came Philistim.' A people on the north-east coast of Egypt, of whom the Philistines were a colony, probably combined with some of the Caphtorim.

6. Caphtorim. Inhabitants of the island Cyprus.

iii. Phut. This word occurs in two or three passages besides, always in connection with Africa. Josephus and Pliny mention an African river, Phutes. The great modern archæologist geographer, Ritter, says that hordes of peoples have been poured out of Futa, in the interior of Africa.

iv. Canaan. His descendants came out of Arabia, planted colonies in Palestine, and gradually possessed themselves of the whole country.

His children or posterity :—

1. Sidon, his first-born, founded the city of that name.

2. Heth, the ancestor of the Hittites. The remaining *nine* are well known, and are here laid down in the singular of the patronymic, or patrial adjective—the Jebusite, the Emorite (Amorite), the Girgashite, the Hivite, the Arkite, the Sinite, the Arvadite, the Zemarite, and the Hamathite. All are assigned to Palestine, and the boundaries of the country are precisely laid down.

III. Shem, though here introduced last, is declared to be the eldest of the three brothers. The reason of this order evidently is the design of the historian to pursue the line of the favoured people which the Divine Sovereign would raise up in the posterity of Shem, and in which, 'when the fulness of the time should come,' 'all the families of the earth should be blessed.'

Children of Shem :—

i. Elam. The ancestor of the Elamites or Elymæans, who possessed Elymais, a region between Susiana and Media, now called Khusistan. The Japhetian Persians afterwards entered that region and gained the ascendancy, and subsequently they were comprehended under the name of Elam.

ii. Ashur, the ancestor of the Assyrians.

iii. Arphaxad, a personal name in the Abrahamic line. The word, a remarkable compound, probably denotes *Neighbouring to the Chasdim, i. e.* Chaldæans. The name appears in *Arrhapachitis*, a province in Northern Assyria, the primitive seat of the Chasdim, and near to which, or in it, Abraham was born.

Children of Arphaxad :—

These are chiefly personal, and contribute to form the sacred pedigree which leads to the Messiah. In this line are mentioned two grandsons, Peleg, of whom we have treated before, and

Eber. The only circumstance that we can attach to him is the very important one (which seems therefore to imply something extraordinary in his personal history) of being the origin of the name Ebrew, or as it is commonly written, on account of the ע, *Hebrew*, the 'ancient and universal name' of the nation, including Abraham himself (see Ewald's *Hebr. Gramm.*, translated by Dr. Nicholson, p. 2, and our article Heber).

Joktan. Universally acknowledged to be the father of the numerous tribes of Arabs in *Yemen*, Arabia the Happy, so called on account of its spices and other rich products, and to distinguish it from the Rocky and the Desert. Of the founders of those tribes thirteen are specified. The first is evidently *Modad*, with the Arabic article: the second is *Shaleph;* and Ptolemy mentions a people of interior Arabia, the Salapeni. *Hatzarmaveth* is a fruitful district on the south coast, which still bears exactly the same name. That name signifies the *Enclosure*, *Gate*, or *Court of Death*, on account of its insalubrity, arising from the great abundance and mixture of powerful odours. Jerach signifies the *moon;* and on the west of this region is a gold-producing tract, in which are the Mountains of the Moon, which yet must be distinguished from a group in East Africa, very imperfectly known, and called also by Orientals the Backbone of the World. *Hadoram*, the Adramites of Ptolemy and Pliny, on the south coast. *Uzal*, mentioned in Ezek. xxvii. 19, which should be translated 'Vedan and Javan [perhaps Yemen?] from Uzal.' The ancient name of a principal city of Yemen, now Sanaha. *Obal* (Ebal in 1 Chron. i. 22), unknown. *Abimael*, unknown; the meaning is, *my father Mael*, and Bochart adduces the Mali of Theophrastus and the Minæi of Strabo, a tribe or tribes in Arabia, as possibly intended. *Sheba*, probably indicating an invasion of this tribe upon the Cushite Sheba and Dedan, Gen. x. 7, and see xxv. 3. From such mixtures much embarrassment often arises in ethnography. Sheba and Seba (x. 7) are often mentioned in the Old Testament as seats of great riches and traffic. *Ophir*, undoubtedly referring to the sea-port in South Arabia, so celebrated for

its traffic in gold, jewellery, and fine woods. The same name was probably given to places in India and East Africa, to which the mercantile ships of this Arabian Ophir resorted. A part of the south coast of Arabia is called Oman, and in it is a town called *El-Ophir*, with the article. *Havilah:* perhaps the Cushite settlers were invaded by this Joktanite tribe. *Jobab:* Ptolemy mentions a people, *Iobaritæ*, on the east coast of Arabia. The *r* may be a mistake, or a dialectic variety, for *b*.

These thirteen tribes seem to have formed the confederacy of the independent and unconquerable Arabs, whose peninsular, desert, and mountainous country defended them from invasion: Ishmael and his descendants were united with them.

Our text concludes with describing a boundary line for the country of these tribes 'from Mesha to Sephar.' The former is probably the country Maishon or Mesene, at the north-west head of the Persian Gulf; and the latter, on the south-west coast of Arabia, where is found a Mount Sabber.

iv. Lud. From him the Lydians in Asia Minor derived their name.

v. Aram. From him the inhabitants of Syria, Chalonitis, and a considerable part of Mesopotamia.

Children or posterity of Aram:—

1. Uz. In the northern part of Arabia, bordering upon Chaldæa: the land of Job.

2. Hul. The large flat district in the north of Palestine, through which lies the initial course of the Jordan, even now called the Land of Hûleh, and in which is the Lake Hûleh, anciently Merom, amply illustrated by Dr. Robinson, *Researches*, iii. 339-357.

3. Gether. East of Armenia; Carthara was a city on the Tigris.

4. Mash. A mountain region branching eastwards from the great Taurus ridge: the Masian mountains of the Greeks and Romans.

These are the results of our own endeavours in the study of this intricate and frequently obscure subject. But we are bound, in concluding, to state that Sir William Jones, whom all will admit to have been a scholar of the highest order, and more competent than most men to vanquish the difficulties of this investigation, proposed a theory very different, chiefly with respect to the family of Ham. He has himself given a luminous summary of his views, and we cannot do better than transcribe it.

'It seems to follow, that the only human family after the flood established themselves in the northern parts of Irân; that, as they multiplied, they were divided into three distinct branches, each retaining little at first, and losing the whole by degrees, of their common primary language, but agreeing severally on new expressions for new ideas; that the branch of YÁFET was enlarged in many scattered shoots over the north of Europe and Asia, diffusing themselves as far as the western and eastern seas, and at length, in the infancy of navigation, beyond them both; that they cultivated no liberal arts, and had no use of letters, but formed a variety of dialects, as their tribes were variously ramified; that, secondly, the children of HAM, who founded in Irân itself the monarchy of the first Chaldeans, invented letters, observed and named the luminaries of the firmament, calculated the known Indian period of 432,000 years, or 120 repetitions of the *saros*, and contrived the old system of mythology, partly allegorical and partly grounded on idolatrous veneration for their sages and lawgivers; that they were dispersed, at various intervals and in various colonies, over land and ocean; that the tribes of MISR, CUSH, and RAMA settled in Africa and India, while some of them, having improved the art of sailing, passed from Egypt, Phœnice, and Phrygia, into Italy and Greece, which they found thinly peopled by former emigrants [Japhetians?], of whom they supplanted some tribes and united themselves with others; whilst a swarm from the same hive moved, by a northerly course into Scandinavia, and another, by the head of the Oxus and through the passes of the Imaus, into Cashgar and Eighúr, Khatá and Khoten, as far as the territories of Chín and Tancút [an ancient division of China], where letters have been used and arts immemorially cultivated; nor is it unreasonable to believe that some of them found their way from the eastern isles into Mexico and Peru, where traces were discovered of rude literature and mythology analogous to those of Egypt and India;* that, thirdly, the old Chaldean empire being overthrown by the Assyrians under Cayúmers, other migrations took place, especially into India, while the rest of SHEM's progeny, some of whom had before settled on the Red Sea, peopled the whole Arabian peninsula, pressing close on the nations of Syria and Phœnice; that, lastly, from all the three families were detached many bold adventurers of an ardent spirit and a roving disposition, who disdained subordination, and wandered in separate clans till they settled in distant isles or in deserts and mountainous regions: that, on the whole, some colonies might have migrated before the death of their venerable progenitor, but that states and empires could scarce have assumed a regular form till 1500 or 1600 years before the Christian epoch;† and that, for the first thousand years of that period, we have no history unmixed with fable, except that of the turbulent and variable, but eminently distinguished, nation descended from Abraham.'—*Discourse on the Origin and Families of Nations;* Works, iii. 201.

Dr. Charles Von Rotteck, Professor of Jurisprudence in the University of Frieburg, published in 1826, the ninth and last volume of *A General History of the World.* This work has been received in Germany with great favour. It certainly contains proofs of extensive reading and eminent talents; but we think also of a precipitate judgment and dashing boldness, an aiming at pungency which often creates affectation, and a watchful habit, like that of Hume and Voltaire, of aiming a sly stab at revealed religion. Books

* How would Sir William Jones have been delighted, and have felt his argument strengthened, had he known of the massive ruins lately brought to our knowledge, by Mr. Stephens and others, in Central America!

† The recent disclosures of paintings and utensils in the Egyptian tombs and temples require a much higher assignment of established governments, mechanical arts, and great combinations of science and power.

having these qualities, especially if they possess some unquestionable excellences and an attractive style, as Rotteck's do, are sure to find readers and approvers. It is manifest that he is far better acquainted with the Greek and Roman writers, and the affairs to which they depose, than with the Hebrew and Christian Scriptures, the doctrines which they teach, and the information which they afford. In one word, he is a disbeliever in any revelation of fact, truth, or duty, positively from God, or in any other way than by the reason and genius of man. He maintains it to be a character of 'the scientific inquirer,' that 'he rejects every theory of the population of the earth, which is confined to the sons of Noah; and he knows that, in the time of those sons, or their nearest descendants, according to Moses's representation, already *nations* and *kingdoms* actually existed in Asia and Africa, which therefore originated not from the posterity of Noah:' and he adds, 'these last may indeed have sent colonies among those nations, perhaps, also, have occasioned the foundation of some new states; but they were not the only founders of them' (*Gen. Hist.* i. 63, Eng. transl.). Further, Von Rotteck intimates more than an inclination to reject the belief of the descent of mankind from any one common ancestor; founding that rejection 'especially upon the striking generic difference of the principal races of our species; and that in particular the attention of the thinker is claimed with perfect justice by the doctrine of three such principal races, viz., 1, the Europæo-Arabian or Caucasian; 2, the Mongolian; 3, the Æthiopian or Negro tribe' (p. 65).

Thus, as is the manner of the infidel school, assuming what he ought to have proved, but of which he brings no proof, this author seeks to fix his insinuated conclusion in the unwary mind.

In the absence therefore of counter-evidence, we adhere to the conclusion, that the whole human population has descended from Noah as a second ancestor, as is plainly affirmed in the pristine records to which we believe ourselves warranted to attribute a divine authority. For the physiological part of the argument, we appeal to the researches of the late venerable Blumenbach, Dr. Prichard in his elaborate volumes on this subject, the notes in J. Pye Smith's *Scripture and Geology*, and a dissertation by Samuel Forrey, M. D., entitled, *The Mosaic Account of the Unity of the Human Race confirmed by the Natural History of the American Aborigines*, in the *American Biblical Repository*, July, 1843.—J. P. S.

NAVIGATION. [Ship.]

NAZARENE, an epithet constituting a part of one of the names given to our Lord. There are two nearly similar Greek words connected with this designation—Ναζαρηνός and Ναζωραῖος—both derived from Ναζαρέθ, Nazareth, the place of the Saviour's childhood and education. These two Greek words occur in the New Testament 19 times; out of these instances two only are rendered Nazarene (Matt. ii. 23; Acts xxiv. 5); the rest are represented by the words 'of Nazareth;' thus, 'Jesus of Nazareth' (Matt. xxi. 11; Luke iv. 34; John xviii. 5; Acts ii. 22). From the number of times that the epithet is employed it appears that it became at the very first an appellation of our Lord, and was hence applied to designate his followers. Considering that the name was derived from the place where Jesus resided during the greater part of his life, we see no reason to think that at first it bore with it, in its application to him or his followers, anything of an offensive nature. Such a designation was in this case natural and proper. In process of time, however, other influences came into operation. Nazareth was in Galilee, a part of Palestine which was held in disesteem for several reasons:—its was a provincial dialect; lying remote from the capital, its inhabitants spoke a strange tongue, which was rough, harsh, and uncouth, having peculiar combinations of words, and words also peculiar to themselves (Buxtorf, *Lex. Talmud;* Mark xiv. 70); its population was impure, being made up not only of provincial Jews, but also of heathens of several sorts, Egyptians, Arabians, Phœnicians (Strabo, *Geog.* xvi. 523); its people were in an especial manner given to be seditious, which quality of character they not rarely displayed in the capital itself on occasion of the public festivals (Josephus, Wetstein, as cited in Schleusner, *s. v.* Γαλιλαῖος); whence may be seen the point of the accusation made against Paul, as 'ringleader of the sect of Nazarenes' (Acts xxiv. 5). As Galilee was a despised part of Palestine, so was Nazareth a despised part of Galilee, being a small, obscure, if not mean place. Accordingly its inhabitants were held in little consideration by other Galileans, and, of course, by those Jews who dwelt in Judæa. Hence the name Nazarene came to bear with it a bad odour, and was nearly synonymous with a low, ignorant, and uncultured, if not un-Jewish person (Kuinoel, in Matt. ii. 23). It became accordingly a contemptuous designation and a term of reproach (Wetstein, in Matt. ii. 23, 26, 71), and as such, as well as a mere epithet of description, it is used in the New Testament.—J. R. B.

NAZARITE. This word is derived from the Hebrew נָזַר, which signifies to 'separate one's-self;' and as such separation from ordinary life to religious purposes must be by abstinence of some kind, so it denotes 'to refrain from anything.' Hence the import of the term Nazarite—one, that is, who, by certain acts of self-denial, consecrated himself in a peculiar manner to the service, worship, and honour of God.

We are here, it is clear, in the midst of a sphere of ideas totally dissimilar to the genius of the Christian system; a sphere of ideas in which the outward predominates, in which self-mortification is held pleasing to God, and in which man's highest service is not enjoyment with gratitude, but privation with pain.

It may be questioned, if at least so much of this set of notions as supposes the Deity to be gratified and conciliated by the privations of his creatures, is in harmony with the ideas of God which the books of Moses exhibit, or had their origin in the law he promulgated. The manner in which he speaks on the subject (Num. vi. 1-21) would seem to imply that he was not introducing a new law, but regulating an old custom; for his words take for granted, that the subject was generally and well known, and that all that was needed was such directions as should bring existing observances into accordance with the Mosaic ritual. Winer, indeed, sees, in the minuteness and particularity of the Mosaic regulations, a proof that the

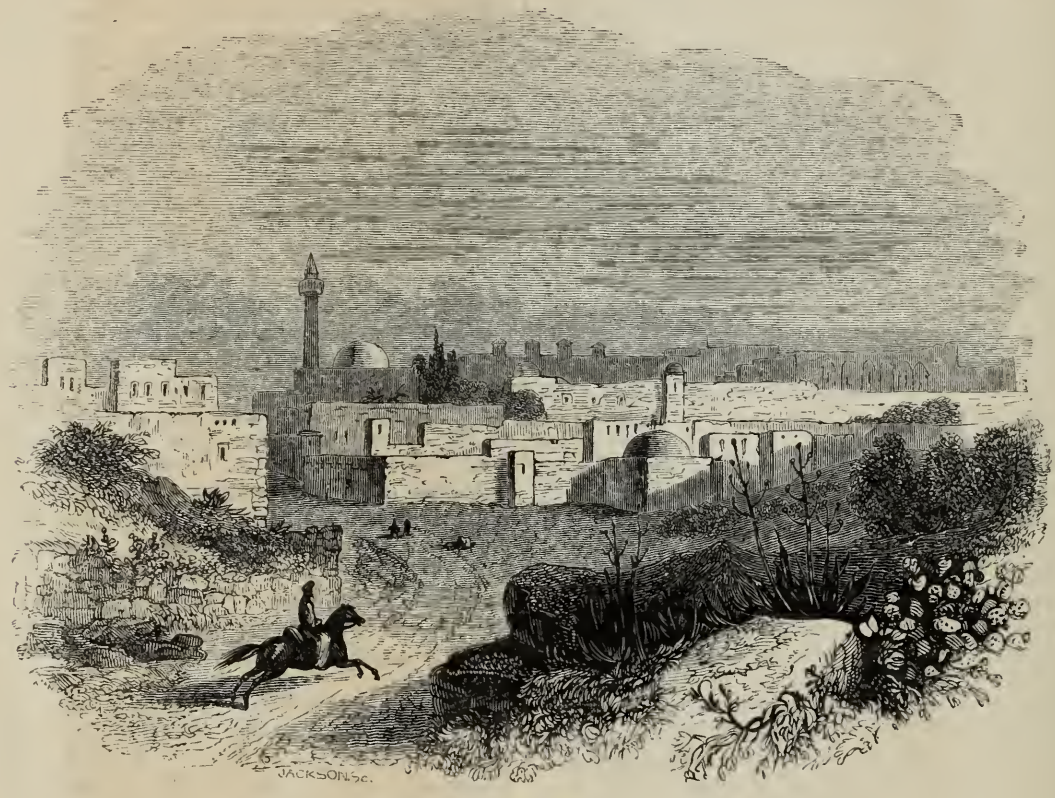
Nazarite vow was of home origin in Mosaism; an argument whose force we cannot discern, for a foreign practice, once introduced, must of necessity be conformed to its new abode.

It is not least among the merits of Judaism that in general it is eminently of a practical character. Though admitting a multitude of observances, some of which, being of a very minute kind, and relating to every-day life, must have been troublesome, if not vexatious, yet the ordinary current of existence was allowed to run on unimpeded; energy was not directed from its proper channel; and life was spent in the active discharge of those offices which human wants require, and by which human happiness may be best advanced. There was no Indian self-renunciation; there was no monkish isolation; yet the vow of the Nazarite shows that personal privations were not unknown in the Mosaic polity. This vow we regard as an instance and an exemplification of that asceticism which, wherever human nature is left free to develope itself, will always manifest its tendencies and put forth its effects. No age, no nation, no religion has been without asceticism. Self-mortification is, with some minds, as natural as self-enjoyment with others. The proneness to ascetic practices is a sort of disorder of temperament. It is in part a question of original constitution. As some individuals are inclined to melancholy, to brood over their own states of mind, so they tend to become morbid in their feelings, intensely self-dissatisfied, over-thoughtful, full of personal solicitudes; then gloomy; then still more dissatisfied with themselves, till at length they are led to think that nothing but severe mortifications and self-inflicted penalties can atone for their guilt, and placate a justly offended God. This general tendency of a certain physical temperament may be checked or encouraged by religious opinions or social institutions, as well as by the peculiar hue which the fortune of an age or a country may bear. The disease, however, is eminently contagious; and, if, owing to unknown circumstances, there was in the days of Moses a tendency, whether borrowed from Egypt or merely strengthened by Egyptian practices, which threatened, in its excess, to become in any degree epidemic, it was wise and patriotic in that lawgiver to take the subject into his own remedial hands, and to restrain and limit to individuals that which might otherwise infect large classes, if not reach and so weaken the national mind.

The law of the Nazarite, which may be found in Num vi., is, in effect, as follows:—male and female might assume the vow; on doing so a person was understood to separate himself unto the Lord; this separation consisted in abstinence from wine and all intoxicating liquors, and from everything made therefrom: 'From vinegar of wine, and vinegar of strong drink; neither shall he drink any liquor of grapes, nor eat moist grapes or dried; he was to 'eat nothing of the vine-tree, from the kernels even to the husks.' Nor was a razor to come upon his head all the time of his vow; he was to 'be holy, and let the locks of the hair of his head grow.' With special care was he to avoid touching any dead body whatever. Being holy unto the Lord, he was not to make himself unclean by touching the corpse even of a relative. Should he happen to do so, he was then to shave his head and offer a sin-offering and a burnt-offering; thus making an atonement for himself, 'for that he sinned by the dead.' A lamb also, of the first year, was to be offered as a trespass-offering. The days too that had gone before his defilement were to be lost, not reckoned in the number of those during which his vow was to last. On the termination of the period of the vow the Nazarite himself was brought unto the door of the tabernacle of the congregation, there to offer a burnt-offering, a sin-offering, a peace-offering, and a meat and a drink-offering. The Nazarite also shaved his head at the door of the tabernacle, and put the hair grown during the time of separation into the fire which was under the sacrifice of the peace-offerings. 'And the priest shall take the sodden shoulder of the ram and one unleavened cake out of the basket, and one unleavened wafer, and shall put them in the hands of the Nazarite after the hair of his separation is shaven; and the priest shall wave them for a wave-offering.' 'After that the Nazarite may drink wine.'

There are not wanting individual instances which serve to illustrate this vow, and to show that the law in the case went into operation. Hannah, Samson's mother, became a Nazarite that she might have a son. Samson himself was a Nazarite from the time of his birth (Judg. xiii.). In his history is found a fact which seems to present the reason why cutting the hair was forbidden to the Nazarite. The hair was considered the source of strength; it is, in fact, often connected with unusual strength of body, for the male has it in greater abundance than the female. Delilah urged Samson to tell her where his strength lay. After a time, 'He told her all his heart, and said unto her, There hath not come a razor upon mine head, for I have been a Nazarite unto God from my mother's womb: if I be shaven, then my strength will go from me, and I shall become weak, and be like any other man' (Judg. xvi. 15 sq.). The secret was revealed; Samson was shorn, and accordingly lost his strength and his life.

This conception led to the prohibition in question; for as the Nazarite was separated to the Lord, so was it proper that he should be in full vigour of body (secured by the presence of his hair) and of mind (secured by abstinence from strong drink). As animals offered in sacrifice were to be faultless and spotless, so a man or a woman set apart to God was to be in full possession of their faculties.



From the language employed by Samson, as well as from the tenor of the law in this case, the retention of the hair seems to have been one essential feature in the vow. It is, therefore, somewhat singular that any case should have been considered as the Nazaritic vow in which the shaving of the head is put forth as the chief particular. St. Paul is supposed to have been under *this* vow, when (Acts xviii. 18) he is said to have 'shorn his head in Cenchrea, for he had a vow' (see also Acts xxi. 24). The head was not shaven till the vow was performed, when a person had *not* a vow.

NAZARETH (Ναζαρέθ, Ναζαρέτ), a town in Galilee, in which the parents of Jesus were resident, and where in consequence he lived till the commencement of his ministry. It derives all its historical importance from this circumstance, for it is not even named in the Old Testament or by Josephus: which suffices to show that it could not have been a place of any consideration, and was probably no more than a village. Lightfoot indeed starts the question whether the name may not be recognised in that of the tower of Nozarim in 2 Kings xvii. 9 (*Hor. Hebr.* on Luke i. 26); but there is here nothing to go upon but the faint analogy of name. The expression of Nathanael, 'Can there any good thing come out of Nazareth?' (John i. 46) might imply a certain degree of evil notoriety in the place. There appears no reason for this, however; and as the speaker was himself of Galilee, the expression could not have been intended to apply to it merely as a Galilean town; it seems therefore likely that Nathanael's meaning was, 'Is it possible that so great a good should come from so obscure a place as Nazareth, which is never mentioned by the prophets.'

Nazareth is situated about six miles W.N.W. from Mount Tabor, on the western side of a narrow oblong basin, or depressed valley, about a mile long by a quarter of a mile broad. The buildings stand on the lower part of the slope of the western hill, which rises steep and high above them. It is now a small, but more than usually well-built place, containing about three thousand inhabitants, of whom two-thirds are Christians. The flat-roofed houses are built of stone, and are

432. [Nazareth.]

mostly two stories high. The environs are planted with luxuriantly-growing fig-trees, olive-trees, and vines, and the crops of corn are scarcely equalled throughout the length and breadth of Canaan. All the spots which could be supposed to be in any way connected with the history of Christ are, of course, pointed out by the monks and local guides, but on authority too precarious to deserve any credit, and with circumstances too puerile for reverence. It is enough to know that the Lord dwelt here; that for thirty years he trod this spot of earth, and that his eyes were familiar with the objects spread around. In the south-west part of the town is a small Maronite church, under a precipice of the hill, which here breaks off in a perpendicular wall forty or fifty feet in height. Dr. Robinson noticed several such precipices in the western hill around the village, and with very good reason concludes that one of these, probably the one just indicated, may well have been the spot whither the Jews led Jesus, 'unto the brow of the hill whereon the city was built, that they might cast him down headlong' (Luke iv. 28-30); and not the precipice, two miles from the village, overlooking the plain of Esdraelon, which monkish tradition indicates to the traveller as the 'Mount of Precipitation.' He denounces this as the most clumsy of all the local legends of the Holy Land; and indeed its intrinsic unsuitableness is so manifest, that the present monks of Nazareth can only surmount the difficulty by alleging that the ancient Nazareth was nearer than the modern to this mountain, forgetting that this hypothesis destroys the identity and credit of the holy places which they show in the present town. It appears to have been originally selected as a striking object to travellers approaching from the plain of Esdraelon (Robinson's *Researches*, iii. 183-200; comp. Burckhardt, *Syria*, p. 337; Richter, *Wallfahrten*, p. 37; Schubert's *Morgen-*

land, iii. 168; Clarke's *Travels*, iv. vol. i. p. 537; *Narrative of Scottish Deputation*, pp. 305, 306).

NEAPOLIS (Νεάπολις), a maritime city of Macedonia, near the borders of Thrace, now called Napoli. Paul landed here on his first journey into Europe (Acts xvi. 11).

NEBAIOTH, or Nebajoth (נְבָיוֹת), called by the Arabs نبت or نابت, the first-born son of Ishmael (Gen. xxv. 13; 1 Chron. i. 29), and the prince or *sheikh* (נָשִׂיא, rendered by Jerome φύλαρχος) of one of the twelve Ishmaelitish tribes, which, as well as the territory they occupied, continued to bear his name in after times (Gen. xxv. 16; comp. ch. xvii. 20). One of Esau's wives, Mahalath, otherwise called Bashemath, is expressly designated as 'the sister of Nebaioth' (Gen. xxviii. 9; xxxvi. 3); and by a singular coincidence the land of Esau, or Edom, was ultimately possessed by the posterity of Nebaioth. In common with the other Ishmaelites, they first settled in the wilderness 'before' (*i. e.* to the east of) their brethren, the other descendants of Abraham; by which we are probably to understand the great desert lying to the east and south-east of Palestine (Gen. xxv. 18; xxi. 21; xvi. 12; and see the article Arabia). In Gen. xxv. 16, the English Version speaks of the Ishmaelitish 'towns and castles,' but the former word in the original signifies 'a moveable village of tents' (the *horde* of the Tartars), and the latter seems to denote pens or folds for cattle and sheep. Both expressions thus point to the nomadic life of shepherds, which the tribe of Nebaioth seem to have followed for ages afterwards, inasmuch as in the days of Isaiah the 'rams of Nebaioth' are mentioned (Isa. lx. 7) as among the most precious gifts which the Bedawees, or 'Men of the Desert' would consecrate to the service of Jehovah. Arab writers mention the tribe of *Nabat* as successful cultivators in Babylonian Irak; but the name is written نبط with a *tha*. (D'Herbelot, *Bib. Orient.* under 'Nabat;' Pocock's *Spec. Hist. Arab.* pp. 46, 268).

The successful invasion of Western Asia, first by the Assyrians and afterwards by the Chaldæans, could not but affect the condition of the tribes in Northern Arabia, though we possess no record of the special results. The prophet Isaiah, after his obscure oracle regarding Dumah (ch. xxi. 11, 12), introduces a 'judgment upon Arabia,' *i. e.* Desert Arabia, which some suppose to have been fulfilled by Sennacherib, while others think it refers to the later events that are foretold by Jeremiah (ch. xlix. 28-33) as befalling 'Kedar and the kingdoms of Hazor' in consequence of the ravages of Nebuchadnezzar. Be this as it may, we know that when the latter carried the Jews captive to Babylon, the Edomites made themselves masters of a great part of the south of Palestine [Idumæa], while either then or at a later period they themselves were supplanted in the southern part of their own territory by a people called by Greek writers Ναβαταῖοι, and by the Romans *Nabatæi*—a name clearly traceable to the Nebaioth of the Hebrews. It were an error, however, to suppose that they consisted only of his descendants to the exclusion of other Ishmaelites. The Arabs are frequently described in Scripture as 'a mingled people' (Jer. xxv. 24); and as we find in the days both of Jacob (Gen. xxxvii. 27, 28, 36) and Gideon (Judg. viii. 22, 24) the name of 'Ishmaelites' used interchangeably for that of 'Midianites' (the descendants of another son of Abraham); so it cannot be doubted that the Nabathæans included a variety of Arab races who took their common name from the progenitor of the largest or most influential tribe, Nebaioth, the first-born of Ishmael. While the greater number of their countrymen followed the occupation of shepherds, others applied themselves to commerce, which we find them prosecuting so early as the days of Joseph (Gen. xxxvii. 27, 36). They appear to have originated the transit trade carried on by caravans across the desert towards Palestine and Egypt, and probably their chief motive in at length locating themselves in Idumæa was that they might command the great commercial route from the Red Sea northward through the continuous valley of El-Araba and El-Ghor.

The territory occupied by the Nabathæans is called by Greek writers Ναβατηνή (by Epiphanius Ναβατέα and Ναβαττίς), and by Latin writers *Nabathæa* or *Nabathena*. In its widest sense this included the whole of Northern Arabia from the Euphrates to the Elanitic Gulf of the Red Sea; but more strictly taken it denoted (at least in later times) only a portion of the southern part of that vast region (Josephus, *Antiq.* i. 12. 4; St. Jerome, *Quæst. on Isa.* xxv. 13: Ammianus Marcellinus, xiv. 8). We first hear of the Nabathæans in history in the reign of Antigonus, who succeeded Alexander the Great in Babylon, and died in the year B.C. 301. He sent two expeditions against them; the first under Athenæus, who found most of the men absent at a certain emporium or mart, having left their families, says Diodorus Siculus (xix. 95-98) ἐπί τινος Πέτρας, *i. e.* upon a certain rock, or, perhaps, rather 'in a certain place *called* Petra,' thus pointing to their famous metropolis, the Selah or Joktheel of the Hebrews [Petra]. Taking this stronghold by surprise, he found in it a large store of frankincense and myrrh, and five hundred talents of silver, all which he seized and carried off. But the Nabathæans having quickly rallied their forces pursued him and destroyed a great part of his army. Antigonus, after certain deceitful negociations, sent against them another expedition under his son Demetrius; but having had intelligence of his approach, they drove their flocks into the surrounding deserts and deposited their wealth in Petra, to which, says the historian, 'there was but a single approach, and that χειροποίητος,' *i. e.* made by hand—an expression strikingly descriptive of the passage of El Syk at Wady Mûsa. Demetrius, thus baffled, had to retire with his troops. It appears from these accounts that the Nabathæans were as yet essentially a pastoral people, though they were likewise engaged in commerce, which they afterwards prosecuted to a great extent, and thereby acquired great riches and renown. It was in this way that they gradually became more fixed in their habits; and living in towns and villages they were at length united under a regular monarchical government, constituting the kingdom of Arabia, or more strictly, *Arabia Petræa*, the name being derived not, as some suppose, from the rocky nature of the country, but from the chief city, Petra. Accord-

ing to Ptolemy this kingdom was bounded on the east by the desert, on the west by Egypt, on the north by Palestine and part of the Roman province of Syria, and it extended southward to the Elanitic Gulf. It was thus rather limited in extent, not materially exceeding (except on the west) the size of the territory which had been possessed by Edom.

The common name of the kings of Arabia Petræa was either Aretas or Obodas. Even in the time of Antiochus Epiphanes (about B.C. 166), we read in 2 Macc. v. 8, of an Aretas, king of the Arabians; and from that period downwards they came frequently into contact both with the Jews and Romans, as may be seen in the books of the Maccabees and the writings of Josephus. When Judas Maccabæus and his brother Jonathan had crossed the Jordan, they reached after a three days' march the country of the Nabathæans, who gave them a very friendly reception (1 Macc. v. 24, 25; Joseph. *Antiq* xii. 8. 3; comp. xiii. 13. 5. 15, and *De Bell. Jud.*, i. 4. 4. 7). Long before the kingdom of Arabia was actually conquered by the Romans, its sovereigns were dependent on the Roman power. An expedition was sent thither by Augustus, under Ælius Gallus, governor of Egypt, and a personal friend of the geographer Strabo, who has left us an account of it. After various obstacles, he at last reached Λευκὴ Κώμη, or Albus Pagus, the emporium of the Nabathæans, and the port of Petra, which was probably at or near Elath (Strabo, xvi. 4, 22, 24; Dion Cassius, liii. 27; Arrian, *Periplus Maris Eryth.*). Another friend of Strabo, the Stoic philosopher Athenodorus, had spent some time in Petra, and related to him with admiration how the inhabitants lived in entire harmony and union under excellent laws. The kingdom was hereditary; or at least the king was always one of the royal family, and had a prime minister or vizier, ἐπίτροπος, who was styled *the king's brother*. Pliny also repeatedly speaks of the Nabathæans (*Hist. Nat.* v. 11; vi. 28; xii. 27); and classes along with them the Cedrei, exactly as Kedar and Nebaioth are placed together in Isa. lx. 7. Another Arabian king of the name of Aretas is the one mentioned by St. Paul (2 Cor. ii. 32; comp. Acts vii. 24, 25; Joseph. *Antiq.* xviii. 5. 1). We find that a former Aretas had been invited to assume the sovereignty by the inhabitants of Damascus (Joseph. *De Bell. Jud.*, i. 4, 7; *Antiq.* xiii. 15. 1); and now, during the weak reign of Caligula, the same city is seized by another Aretas, and governed through an *ethnarch*, as related by Paul. The kingdom of Arabia Petræa maintained its nominal independence till about A.D. 105, in the reign of the Emperor Trajan, when it was subdued by Cornelius Palma, governor of Syria, and annexed to the vast empire of Rome.

The Nabathæans had, as we have seen, early applied themselves to commerce, especially as carriers of the products of Arabia, India, and the far-distant East, which, as we learn from Strabo, were transported on camels from the above-mentioned Leuke Komé to Petra, and thence to Rhinocoloura (El 'Arish) and elsewhere. 'But under the Roman dominion the trade of these regions appears to have widely extended itself, and to have flourished in still greater prosperity; probably from the circumstance that the lawless rapacity of the adjacent nomadic hordes was now kept in check by the Roman power, and particularly by the garrisons which were every where established for this specific purpose. The country, too, was now rendered more accessible, and the passage of merchants and caravans more practicable, by military ways. From Elath, or Ailah, one great road had its direction northwards to the rich and central Petra; thence it divided and led on one side to Jerusalem, Gaza, and other ports on the Mediterranean; and on the other side to Damascus. Another road appears to have led directly from Ailah along the Ghor to Jerusalem. Traces of these routes are still visible in many parts. These facts are derived not from the testimony of historians, but from the specifications of the celebrated *Tabula Theodosiana*, or *Peutingeriana*, compiled in the fourth century. According to this, a line of small fortresses was drawn along the eastern frontier of Arabia Petræa, towards the desert, some of which became the sites of towns and cities, whose names are still extant. But as the power of Rome fell into decay, the Arabs of the desert would seem again to have acquired the ascendancy. They plundered the cities, but did not destroy them; and hence those regions are still full of uninhabited, yet stately and often splendid ruins, of ancient wealth, and taste, and greatness. Even Petra, the rich and impregnable metropolis, was subjected to the same fate; and now exists, in its almost inaccessible loneliness, only to excite the curiosity of the scholar, and the wonder of the traveller, by the singularity of its site, its ruins, and its fortunes.'

In the course of the fourth century this region came to be included under the general name of 'Palestine;' and it then received the special designation of *Palæstina Tertia*, or *Salutaris*. It became the diocese of a metropolitan, whose seat was at Petra, and who was afterwards placed under the patriarch of Jerusalem. With the Mohammedan conquest in the seventh century its commercial prosperity disappeared. Lying between the three rival empires of Arabia, Egypt, and Syria, it lost its ancient independence; the course of trade was diverted into new channels; its great routes were abandoned; and at length the entire country was quietly yielded up to the Bedawees of the surrounding wilderness, whose descendants still claim it as their domain. During the twelfth century it was partially occupied by the Crusaders, who gave it the name of *Arabia Tertia*, or *Syria Sobal*. From that period it remained unvisited by Europeans, and had almost disappeared from their maps, until it was partially explored, first by Seetzen in 1807, and more fully by Burckhardt in 1812; and now the wonders of the Wady Mûsa are familiarly known to all. (See Reland's *Palæstina Illustr.*; Vincent's *Commerce of the Ancients;* Ritter's *Gesch. d. Petr. Arabiens*, in the 'Trans. of the Berlin Acad.', 1824; Forster's *Mohammedanism Unveiled*, and *Geography of Arabia;* Robinson's *Sketches of Idumæa*, in 'Amer. Bib. Repos.', 1833; and *Bibl. Researches*, vol. ii.)—N. M.

1. NEBO (נְבוֹ; Sept. Ναβώ), a Chaldæan idol mentioned in Isa. xlvi. 1, and supposed to have been the symbol of the planet Mercury, the celestial scribe and interpreter of the gods, answering to the Hermes and Anubis of the Egyptians. He was likewise worshipped by the Sabians in

Arabia (Norberg, *Onomast.* p. 95). Gesenius traces the name in נביא, *prophet*, an interpreter of the Divine will. The divine worship paid to this idol by the Chaldæans and Assyrians is attested by many compound proper names of which it forms part, as *Nebu*chadnezzar, *Nebu*zaradan, *Nebu*hashban; besides others mentioned in classical writers,—*Nabo*nedus, *Nabo*nassar, *Nabu*rianus, *Nabo*nabus, *Nabo*polassar. (See Gesenius and Henderson on Isa. xlvi. 1).

2. NEBO, the name of a mountain on the confines of Moab (Deut. xxxii. 49; xxxiv. 1), and of a town near it (Num. xxxii. 3, 38; Isa. xv. 2). Since the time of Seetzen and Burckhardt, Mount Nebo has been usually identified with Mount Attarus, east of the Dead Sea. Dr. Robinson has weakened this conclusion without substituting any other. He says, 'During the whole time we were on the coast of the Dead Sea, on the Jordan, and in or near the plains of Jericho, we were much interested in looking out among the eastern mountains for Mount Nebo, so celebrated in the history of the great Hebrew legislator, where he was permitted to behold with his eyes the Land of Promise, and then yielded up the ghost. But our search was in vain; for although we passed in such a direction as to see the mountains over against Jericho from every quarter, yet there seems to be none standing so out from the rest, or so marked, as to be recognised as the Nebo of the Scriptures. There is no peak or point perceptibly higher than the rest, but all is apparently one level line of summit, without peaks or gaps. The highest point in all the eastern mountains is Jebel el-Jil'âd, or es-Salt, near the city of that name, rising about 3000 feet above the Ghor; but this is much too far north to be Mount Nebo, to which Moses ascended from the plains of Moab over against Jericho. Possibly, on travelling into these mountains, some isolated point or summit might be found answering to the position and character of Nebo. Indeed, Seetzen, Burckhardt, and also Irby and Mangles, have all found Mount Nebo in Jebel 'Attârûs, a high mountain south of the Turka Ma'în. This, however, as the latter travellers remark, is "far from opposite Jericho," and would be almost as distant, and as little convenient to the plains of Moab, as is Jebel es-Salt. It may perhaps be sufficient to assume, that Moses merely went up from these plains to some high part of the adjacent mountains, from which he would every where have an extensive view over the Jordan valley, and the mountainous tract of Judah and Ephraim *towards* the western sea. The Mediterranean itself could never well be visible from any point east of the Jordan.'

3. NEBO, a town in the tribe of Judah (Ezra ii. 29); or more fully, in order to distinguish it from the preceding, נבו אחר, 'the other Nebo' (Neh. vii. 33). The name may have, as in the preceding instance, been derived from that of the idol Nebo; but more probably from נבה, 'to be high.'

NEBUCHADNEZZAR (נְבוּכַדְנֶאצַּר, Kings, Chronicles, and Daniel; Jer. xxvii.; xxviii.; xxxiv. 1; xxxix. 1; Ezek. xxvi. 7; and Ezra v. 12; written also נְבוּכַדְרֶאצַּר, Nebuchadrezzar, generally in Jeremiah, and in Ezek. xxx. 18) was the name of the Chaldæan monarch of Babylon by whom Judah was conquered, and the Jews led into their seventy years' captivity. In the Septuagint version he is called Ναβουχοδονόσορ; by Berosus (ap. Josephum), Ναβουχοδονόσορος; by Abydenus (ap. Eusebium, *Præp. Evang.*), Ναβουδρόσορος; and by Strabo, the only writer among the Greeks by whom he is named (xv. 687) Ναυκοοκοδρόσορος. This name, Nabuchodonosor, has passed from the Septuagint into the Latin Vulgate, and into the authorized English version of the books of Judith and Tobit. Nabu or Nebo (Isa. xlvi. 1) was the name of a Chaldæan deity, supposed to be Mercury, and enters frequently into the composition of Chaldæan proper names, as Nabopolassar (*Can. Ptol.*); Nabuzaradan (2 Kings xxv. 8. &c.); Samgar-nebu and Nebushasban (Jer. xxix. 3. 13). The name Nebuchadnezzar has been commonly explained to signify the *treasure of Nebo*, but, according to Lorsbach (*Archiv. f. Morgenl. Literatur*), it signifies *Nebo, the prince of gods;* Pers. نبو خذان سر; see also Norberg's *Onomasticon Cod. Nasar.* p. 95, sq. and Gesenius *in Isai.* iv. 344, 366.

The only notices which we have of this monarch in the canonical writings are found in the books of Kings, Chronicles, Daniel, and Ezra, and in the allusions of the prophets Jeremiah and Ezekiel.

From 2 Kings xxiii. 29, and 2 Chron. xxxv. 20, we gather that in the reign of Josiah (B.C. 610), Pharaoh-Necho, king of Egypt, having approached by sea the coast of Syria, made a friendly application to King Josiah to be allowed a passage through his territories to the dominions of the Assyrian monarch, with whom he was then at war. 'I come not against thee this day, but against the house wherewith I have war; for God (Elohim) commanded me to make haste,' &c. (2 Chron. xxxv. 20, 21). The design of Pharaoh-Necho was to seize upon Carchemish (Circesium or Cercusium), a strong post on the Euphrates; but Josiah, who was tributary to the Babylonian monarch, opposed his progress at Megiddo, where he was defeated and mortally wounded [JOSIAH]. Necho marched upon Jerusalem, when the Jews became tributary to the king of Egypt. Upon this, Nebuchadnezzar, king of Babylon (2 Kings xxiv. 1; 2 Chron. xxxvi. 6, where this monarch's name is for the first time introduced), invaded Judah, retook Carchemish, with the territory which had been wrested from him by Necho, seized upon Jehoiakim, the vassal of Pharaoh-Necho, and reduced him to submission (B.C. 607). This invasion took place, according to Jer. xxvi. 1; xlvi. 1, in the fourth year of Jehoiachim, but according to Daniel i. 12, in the third. In order to reconcile this apparent contradiction, it has been generally maintained that the first year of Nebuchadnezzar fell partly in the third and partly in the fourth year of Jehoiakim [CAPTIVITIES, DANIEL]. Jehoiachim was at first loaded with chains, in order to be led captive to Babylon, but was eventually restored by Nebuchadnezzar to his throne, on condition of paying an annual tribute. Nebuchadnezzar carried off part of the ornaments of the Temple, together with several hostages of distinguished rank, among whom were the youths Daniel and his three friends Hananiah, Azariah, and Mishael (Dan. i.). These were educated at court in the language and sciences of the Chal-

dæans, where they subsequently filled offices of distinction. The sacred vessels were transferred by Nebuchadnezzar to his temple at Babylon (Isa. xxxix.; 2 Chron. xxxvi. 6, 7); [Babylon].

After the conquest of Judæa, Nebuchadnezzar turned his attention towards the Egyptians, whom he drove out of Syria, taking possession of all the land between the Euphrates and the *river* (2 Kings xxiv. 7): which some suppose to mean the Nile, but others a small river in the desert, which was reckoned the boundary between Palestine and Egypt (Prideaux's *Connection*).

The fate of Jerusalem was now rapidly approaching its consummation. After three years of fidelity, Jehoiachim renounced his allegiance to Babylon, and renewed his alliance with Necho, when Nebuchadnezzar sent incursions of Ammonites, Moabites and Syrians, together with Chaldæans, to harass him. At length, in the eleventh year of his reign, he was made prisoner, and slain (Jer. xxii.) [Jehoiakim]. He was succeeded by his son Jehoiachin, who, after three months' reign, surrendered himself with his family to Nebuchadnezzar, who had come in person to besiege Jerusalem, in the eighth year of his reign (2 Kings xxiv. 10—12) [Jehoiachin]. Upon this occasion all the most distinguished inhabitants, including the artificers, were led captive [Captivities]. Among the captives, who amounted to no less than 50,000, were Ezekiel (Ezek. i. 1) and Mordecai [Esther]. The golden vessels of Solomon were now removed, with the royal treasures, and Mattaniah, the brother of Jehoiachin, placed on the throne by Nebuchadnezzar, who gave him the name of Zedekiah, and bound him by an oath not to enter into an alliance with Egypt. Zedekiah, however, in the ninth year of his reign, formed an alliance with Pharaoh-Hophra, the successor of Necho. Hophra, coming to the assistance of Zedekiah, was driven back into Egypt by Nebuchadnezzar, who finally captured Jerusalem in the eleventh year of Zedekiah's reign (B.C. 588) [Zedekiah]. The Temple, and the whole city, with its towers and walls, were all razed to the ground by Nebuzaradan, Nebuchadnezzar's lieutenant, and the principal remaining inhabitants put to death by Nebuchadnezzar at Riblah. Jeremiah was, however, spared, and Gedaliah appointed governor. He was shortly after murdered by Ishmael, a member of the royal family, who was himself soon obliged to take refuge among the Ammonites. Many of the remaining Jews fled into Egypt, accompanied by Jeremiah; those who remained were soon after expatriated by Nebuchadnezzar, who depopulated the whole country.

He next undertook the siege of Tyre [Tyre], and after its destruction proceeded to Egypt, now distracted by internal commotions, and devastated or made himself master of the whole country from Migdol to Syene (according to the reading of the Seventy, Ezek. xxix. 10; xxx. 6), transferring many of the inhabitants to the territory beyond the Euphrates.

We have referred to the captivity of the prophet Daniel, and have to turn to the book which bears his name for the history of this prophet, who, from an exile, was destined to become the great protector of his nation. In the second year of the reign of Nebuchadnezzar, Daniel, who was found superior in wisdom to the Chaldæan magi, was enabled not only to interpret, but to reveal a dream of Nebuchadnezzar's, the very subject of which that monarch had forgotten [Dreams]. This was the dream of the statue consisting of four different metals, which Daniel interpreted of four successive monarchies, the last of which was to be the reign of the Messiah. Daniel was elevated to be first minister of state, and his three friends were made governors of provinces. The history of these events (Dan. ii. 4, 8, 9) is written in the Chaldee language, together with the narrative which immediately follows (ch. iii.), of the golden statue erected by Nebuchadnezzar in the plain of Dura, for refusing to worship which, Daniel's three friends were thrown into a furnace, but miraculously preserved. The fourth chapter, also written in Chaldee, contains the singular history of the judgment inflicted on Nebuchadnezzar as a punishment for his pride, and which is narrated in the form of a royal proclamation from the monarch himself, giving an account to his people of his affliction and recovery. This affliction had been, by the monarch's account, predicted by Daniel a year before, in the interpretation of his fearful dream of the tree in the midst of the earth. While walking in his palace, and admiring his magnificent works, he uttered, in the plenitude of his pride, the remarkable words recorded in ver. 30, 'Is not this great Babylon that I have built for the house of the kingdom, by the might of my power, and for the honour of my majesty?' He had scarce uttered the words, when a voice from heaven proclaimed to him that his kingdom was departed from him; that he should be for seven *times* (generally supposed to mean years, although some reduce the period to fourteen months; Jahn, *Introd.*) driven from the habitations of men to dwell among the beasts of the field, and made to eat grass as an ox, until he learned 'that the Most High ruleth in the kingdom of men, and giveth it to whomsoever he will.' The sentence was immediately fulfilled, and Nebuchadnezzar continued in this melancholy state during the predicted period, at the end of which he was restored to the use of his understanding (ver. 36). We have no account in Scripture of any of the actions of this monarch's life after the period of his recovery, but the first year of the reign of his successor Evil-merodach is represented as having taken place in the thirty-seventh year of Jehoiachin, answering to B.C. 562 (2 Kings xxv. 27).

We have now to consider the light which profane history has thrown on the events of these times.

The canon of Ptolemy the mathematician, who flourished about the commencement of the Christian era, consists of a catalogue, arranged in chronological order, of the kings of Babylon, commencing with Nabonassar, who reigned B.C. 747, and ending with Nabonned, B.C. 556. According to this catalogue, Nabopolassar (*Ναβουπολάσαρος*), who died B.C. 625, was succeeded by Nabocolassar (*Ναβοκολάσαρος*), B.C. 605. This Nabocolassar is therefore presumed to be the Nebuchadnezzar of Scripture (for the canon of Ptolemy, see *Table Chronologique des Règnes*, &c. par l'Abbé Halmy, Paris, 1819). Nabopolassar, the father of Nabocolassar, is supposed to have been the first Chaldæan monarch of Babylon, and to have disunited it from the Assyrian empire, of

which it had hitherto formed a part (Jahn's *Hebrew Commonwealth*). According to a fragment of Alexander Polyhistor, reported by Syncellus in his *Chronographia*, it was this sovereign who destroyed the city of Nineveh, B.C. 612, which, according to Eusebius (*Chron.* p. 46), he effected in conjunction with Astyages, the eldest son of Cyaxares, king of the Medes (see also Tobit xiv. 15, where the latter is named Assuerus). The following extract, preserved by Josephus, from the lost Chaldæan history of Berosus, priest of the temple of Bel (B.C. 268), will be found to throw considerable light on the Scripture narrative: 'When his father Nabuchodonosor heard that the governor whom he had set over Egypt and the places about Cœle-Syria and Phœnicia had revolted from him, while he was not himself able any longer to undergo hardships, he committed to his son Nabuchodonosor, who was still but a youth, some parts of his army, and sent them against them. So when Nabuchodonosor had given him battle, and fought with the rebel, he overcame him, and reduced the country from under his subjection and made it a branch of his own kingdom. But about that time it happened that his father Nabuchodonosor fell ill, and ended his life in the city of Babylon, when he had reigned twenty-one years; and when he was made sensible that his father Nabuchodonosor was dead—having settled the affairs of Egypt and the other countries, and also those that concerned the captive Jews, and the Phœnicians, Syrians and Egyptians, and having committed the conveyance of them to Babylon to certain of his friends—he hastily crossed the desert, with a few companions, into Babylon. So he took upon him the management of public affairs, and of the kingdom which had been kept for him by one of the chief Chaldæans, and he received the entire dominions of his father, and appointed, that when the captives came, they should be placed in colonies in the most proper places of Babylonia' (*Antiq.* x. 11).

It will be observed that both Nebuchadnezzar (styled by some *the Great*) and his father are here equally named Nabuchodonosor, but, in the citation of the same narrative from Berosus by Josephus (*Cont. Apion.*, i. 19), the father of Nebuchadnezzar is called Nabolassar (Ναβολάσσαρος), corresponding nearly with the Nabopolassar of Ptolemy: which has induced some to suppose the name Nabuchodonosor in the former citation to be an error of transcription. We have already noticed the opinion of those who consider the Nabuchodonosor of Judith to be the same with the Saosduchin of Ptolemy, who was contemporary with Manasseh [JUDITH]. Some foundation has thus been afforded for considering Nebuchadnezzar as a general name for Babylonian sovereigns (Prideaux, *Connect.*); this, however, is considered by Whiston as a groundless mistake (Whiston's *Josephus*, note on ch. xi.). It is by no means improbable that the similarity of the two names may have led to their being sometimes confounded. The conqueror of Nineveh is also called by the name of Nebuchodonosor in Tobit xiv. 15 (in the Greek, for the Latin ends with ver. 14), and is on this account styled by some, *Nebuchadnezzar the First*, a designation first applied to him by Rabbi David Ganz, under the age of the world, 3285. Alber considers (*Inst. Herm. V. T.* vol. ii. ch. xv.) that the Nabuchodonosor of Judith was not one of the legitimate sovereigns who flourished before the Persian domination, but that both he and Arphaxad were governors of provinces, who had rebelled against the Persians, and assumed those names, and that the pretended Nebuchadnezzar, or *Nebuchadnezzar the Third*, was reduced to order upon the failure of his expedition under Holofernes. By this rather hazardous conjecture, whereby he further maintains, in contradiction to Bellarmine (*De Verb. Dei*), that the book of Judith refers to a period posterior to the exile, he endeavours to prove that the history of Judith is historically true, in opposition to Jahn, who regards it as a fiction [JUDITH].

According to Ptolemy's canon, the reign of Nabocolasar is made to commence two years later than that of the Nebuchadnezzar of Scripture. Many attempts have been made to reconcile this discrepancy, but the solution generally received assumes that the first capture of Jerusalem (Dan. i. 1) took place during the last years of the reign of Nabopolassar, in the expedition mentioned by Berosus (*ut supra*), and that the canon of Ptolemy dates the commencement of his reign from the death of his father, when he became sole king of Babylon (De Wette's *Introd.* § 253, note).

Although Herodotus does not name Nebuchadnezzar, he is supposed by some to allude to the expedition of Pharaoh-Necho against Babylon, when he observes that 'Necho, after an engagement at Magdolos in Egypt, took Kadytis, a great city of Syria.' It is conjectured that he may have confounded Migdol, in Egypt, with Megiddo, and that Kadytis was the same with Jerusalem (El Kaddosh, 'the holy city'). (Jahn's *Hebrew Commonwealth.*)

We learn from a continuation of the extract from Berosus already cited, that Nebuchadnezzar almost rebuilt the city of Babylon with the spoils of his expedition, and magnificently adorned the temple of Bel, together with other temples, and built a splendid palace, which he beautified with wooded terraces, and those hanging gardens which were considered one of the wonders of the world [BABYLON]. To him are also attributed those stupendous canals described by Herodotus, who himself visited Babylon about B.C. 130, and whose descriptions are fully corroborated by the statements of Philostratus, Quintus Curtius, Arrian, and Diodorus Siculus, by none of whom, however, is this monarch mentioned. Josephus adds, that Megasthenes, in his fourth book, refers to the same subject, and thereby endeavours to show that he exceeded Hercules, and conquered a great part of Africa and Spain. Strabo adds, that 'Sesostris, king of Egypt, and Tearcon, king of Ethiopia, extended their expedition as far as Europe, but that Navokodrosor, who is venerated by the Chaldæans more than Hercules by the Greeks . . . . . marched through Spain to Greece and Pontus.' According to the canon of Ptolemy (with which Josephus agrees, *c. Apion.* i. 20), Nebuchadnezzar reigned forty-three years, when he was succeeded by Iluaroudaroos, the Evil-Merodach of Scripture.

The difficulties attending the nature of the disease and recovery of Nebuchadnezzar have not escaped the notice of commentators in ancient as well as modern times. The impression made by them on the acute mind of Origen, that father

thus expresses: 'How is it possible to suppose a man metamorphosed into a beast? This sounds well enough in the poets, who speak of the companions of Ulysses and of Diomede as transformed into birds and wolves, fables which existed in the poet's imagination only. But how could a prince like Nebuchadnezzar, reared in delicacy and pleasure, be able to live naked for seven years, exposed to the inclemency of the weather, and having no nourishment but grass and wild fruits? How could he resist the violence of wild beasts? Who governed the empire of Chaldæa in his absence? How, at the end of seven years, was he received again by his people, resuming his throne as after the absence of a night? Finally, could an event so singular and so memorable have escaped the notice of profane historians, who relate so many other things regarding the same prince, much less curious, and less worthy of attention than this?' (ap. Hieron. *in Dan.*) It must, however, be borne in mind that Origen's passion for allegorizing frequently led him to overstate the difficulties of Scripture, and his own solution of those which he enumerates, viz., that the account of Nebuchadnezzar's metamorphosis was merely a representation of the fall of Lucifer, is not likely to meet with many supporters. Besides Origen's, there have been no less than five different opinions in reference to this subject. Bodin (in *Demonol.*) maintains that Nebuchadnezzar underwent an actual metamorphosis of soul and body, a similar instance of which is given by Cluvier (*Append. ad Epitom. Hist.*) on the testimony of an eye-witness. Tertullian (*De Pœnit.*) confines the transformation to the body only, but without loss of reason, of which kind of metamorphosis St. Augustine (*De Civ. Dei*, xviii. 18) reports some instances said to have taken place in Italy, to which he himself attaches little credit; but Gaspard Peucer asserts that the transformation of men into wolves was very common in Livonia. Some Jewish Rabbins have asserted that the soul of Nebuchadnezzar, by a real transmigration, changed places with that of an ox (Medina, *De rectâ in Deum fid.*); while others have supposed not a real, but an apparent or docetic change, of which there is a case recorded in the life of St. Macarius, the parents of a young woman having been persuaded that their daughter had been transformed into a mare. The most generally received opinion, however, is, that Nebuchadnezzar laboured under that species of hypochondriacal monomania which leads the patient to fancy himself changed into an animal or other substance, the habits of which he adopts. Jerome probably leaned to this opinion. 'Who does not see,' he observes, 'that *madmen* live like brute beasts in the fields and woods, and in what is it wonderful that this punishment should be inflicted by God's judgment to show the power of God, and to humble the pride of kings? Greek and Roman histories relate much more incredible things, as of men changed into Scylla, the Chimæra, and the Centaurs, into birds and beasts, flowers, trees, stars, and stones?' (*in Dan.* iv. 4). To this disease of the imagination physicians have given the name of Lycanthropy, Zoanthropy, or Insania Canina [Diseases of the Jews]. In Dan. iv. 15 (iv. 12, according to the Latin) there seems an allusion to some species of insanity in the expression, 'even with a band of iron and brass' (*alligetur vinculo ferreo et æreo*, Vulg.); and the loss and return of reason is very clearly intimated in ver. 34, 'mine understanding returned to me, and I blessed the Most High.' Virgil (*Eclog.* 6) refers to this kind of madness in the case of the daughters of Prœtus, who fancied themselves oxen, and made the plains resound with their bellowings:

Implerunt falsis mugitibus agros.

And a somewhat similar kind of insanity is described by Mr. Drummond Hay (*Western Barbary*, 1844, p. 65) as produced by the use of an intoxicating herb among the Gisowys, or Moorish fanatics. (See Heinroth, *Seelenstor.* i. 65; Ader, *De ægrotis in Evang.* p. 31, &c.; Meade, *Med. Sac.*; and Muller, *De Nebuchadnezz. μεταμορφώσει*).

The idea of an allegory has been revived in modern times, especially by De Wette (*Enleitung*, p. 257), who considers the accounts in Daniel too improbable, if literally understood, although he admits that they may have been founded on historical traditions. He considers the whole of the narrative in Daniel as referring to Antiochus Epiphanes, who he asserts is also signified by Belshazzar. In reference to the subject before us his translator adds, that 'Antiochus Epiphanes was called with perfect propriety *Epimanes*, or, the mad, which may have given the author a hint to represent the old and idealized monarch of his nation as bereft of reason, and reduced to the form and character of a beast. Here the historical fact is idealized, and an exquisite piece of sarcasm on the folly and brutality of Antiochus is produced' (Dan. iv. 14, 22-24, 29, 31, 32, 34). But the truth of this inference, however ingenious the arguments in its favour, depends altogether on the alleged spuriousness of the book of Daniel, whose genuineness is attested by the citations of the New Testament writers, and by the author of the 1st book of Maccabees, who was acquainted with the book of Daniel, even in the version of the Sept. (Macc. i. 54, comp. with Dan. ii. 27; and ii. 59 with Dan. iii. and vi.). [Daniel.] De Wette can only avoid the force of this evidence by denying the authority of the New Testament writers in a case of the kind. He adds that it is a biassed assumption of Hengstenberg to maintain that 1 Macc. was originally written in Greek (*allein dass es ursprünglich griechisch . . . sei, ist eine parteiische Annahme*) not *Hebrew*, as De Wette's English translator has it, and in the time of John Hyrcanus (B.C. 134—105), as according to him (De Wette) it appears from 1 Macc. xvi. 23, 24, to have been written much later [Maccabees].

Some have fancied that there was an allusion to the disease of Nebuchadnezzar in the passage of Berosus quoted by Josephus (*Cont. Apion.* i. 20). *Ναβουχοδονόσορος μὲν οὖν μετὰ τὸ ἄρξασθαι τοῦ προειρημένου τείχους, ἐμπεσὼν εἰς ἀῤῥωστίαν, μετηλλάξατο τὸν βίον.* 'Nabuchodonosor, after he had commenced the aforesaid wall, falling into a sickness, died.' There is another remarkable passage respecting him in Abydenus (ap. Eusebium, *Præpar. Evang.* ix. 41), where, having cited the passage from Megasthenes already referred to, he adds, upon the authority of the same writer, a speech of Nabuchodonosor, wherein, having been struck by some god, he foretold the destruction of Babylon by a 'Persian

mule,' assisted by a Mede, the former boast of Assyria, after which he instantly vanished. A reference has been supposed to exist in these words to Nebuchadnezzar's madness and consequent disappearance, but there is at most, as De Wette observes, only a traditional connection between them. Jahn *(Hebrew Commonwealth)* conceives the whole to be a tradition made up from his prophetic dreams, his insanity . . . . and from Daniel's explanation of the well-known handwriting in the banqueting-hall of Belshazzar.

Objections have been made by Sir Thomas Browne and others to the proportions of Nebuchadnezzar's golden statue (Dan. iii.), said to have been 60 cubits, or 90 feet high, and only 6 cubits in breadth; for it is evident that the statue of a man ten times higher than its breadth exceeds all natural symmetry. Jahn *(Introd.)* supposes that this form might have a more august appearance, or have been retained from a rude antiquity. Some consider that the height of 90 feet included the pedestal. Hengstenberg supposes that צֶלֶם may mean an *obelisk*, as well as a statue, in which case the proportions would be symmetrical. Diodorus Siculus (lib. ii.) informs us that one of the images of massy gold found by Xerxes in the Temple of Bel, measured 40 feet in height, which would have been fairly proportioned to a breadth of 6 feet, measured at the shoulders. Prideaux supposes that this may have been the identical statue erected by Nebuchadnezzar, which, however, Jahn conceives was more probably only gilt, as a statue of gold could scarcely have been safe from robbers in the plain of Dura; but this conjecture of Jahn's seems by no means necessary.—W. W.

NEBUSHASBAN (נְבוּשַׁזְבָּן; Sept. *Ναβουσεζβὰν*, Jer. xxxix. 13), a follower of Nebu. Pers. نبوچشبان' the name of one of the Babylonian officers sent by Nebuzar-adan to take Jeremiah out of prison.—W. W.

NEBUZAR-ADAN (נְבוּזַרְאֲדָן; Sept. *Ναβουζαρδάν*, 1 Kings xxv. 8; Jer. xxxix. 9; xl. 1; lii. 12, &c.). '*Nebu is the Lord*,' according to the Hebrew; or, according to the Persian, 'Nebu is wise' (comp. Pers. دان). The name of the captain of Nebuchadnezzar's guard, by whom the ruin of Jerusalem was completed.—W. W.

NECHO (נְכוֹ; Sept. *Νεχαώ*; Herodotus, *Νεκώς*), an Egyptian king, son and successor (according to Herodotus, ii. 158) of Psammetichus, and contemporary of the Jewish king Josias (B.C. 610). The wars and success of Necho, in Syria, are recorded by sacred as well as profane writers, affording an instance of agreement between them which the historical, and especially the Biblical student, would be glad to find of more frequent occurrence. Studious of military renown, and the furtherance of commerce, Necho, on ascending the throne of Egypt, applied himself to re-organize the army, and to equip a powerful fleet. In order to promote his purposes, he courted the Greeks, to whose troops he gave a post next to his Egyptians. He fitted out a fleet in the Mediterranean, and another in the Red Sea. Having engaged some expert Phœnician sailors, he sent them on a voyage of discovery along the coast of Africa. 'They were ordered (says Herod., iv. 42, 3) to start from the Arabian Gulf, and come round through the pillars of Hercules (the straits of Gibraltar) into the North Sea, and so return to Egypt. Sailing, therefore, down the gulf, they passed into the Southern Ocean, and when autumn arrived, they laid up their ships and sowed the land. Here they remained till harvest time, when, having reaped the corn, they continued their voyage. In this manner they occupied two years, and the third having brought them by the pillars of Hercules to Egypt, they related what to me appears incredible, that they had the sun on their right hand; and by this means was the form of Africa first known.' Similar expeditions round Africa were performed by other people (Herod., *ut supra*; Plin. *Hist. Nat.* ii. 67; Arrian, *Rer. Ind.* ad fin.). The honour, however, of being the first to equip an expedition for the purpose of circumnavigating Africa belongs to Pharaoh-Necho, who thereby ascertained the peninsular form of that continent, twenty-one centuries before the Cape of Good Hope was seen by Diaz, or doubled by Vasco de Gama. The assertion by Herodotus, that the sun (when rising) was on the right hand of these Egyptian navigators, though incredible to him, is satisfactory to his modern readers, who are indebted to his doubts for proof of a fact which might otherwise have been called in question.

Before entering on this voyage of discovery, Necho had commenced re-opening the canal from the Nile to the Red Sea, which had been cut many years before by Sesostris or Rameses the Great. The work, however, if we may believe Herodotus, was abandoned, an oracle warning the Egyptian monarch that he was labouring for the barbarian (Herod. ii. 158).

Necho also turned his attention to the Egyptian conquests already made in Asia; and, fearing lest the growing power of the Babylonians should endanger the territories acquired by the arms of his victorious predecessors, he determined to check their progress, and to attack the enemy on his own frontier. With this view he collected a powerful army, and entering Palestine, followed the route along the sea-coast of Judæa, intending to besiege the town of Carchemish on the Euphrates. But Josiah, king of Judah, offended at the passage of the Egyptian army through his territories, resolved to impede, if unable to prevent, their march. Necho sent messengers to induce him to desist, assuring him that he had no hostile intentions against Judæa, 'but against the house wherewith I have war; for God commanded me to make haste.' This conciliatory message was of no avail. Josiah posted himself in the valley of Megiddo, and prepared to oppose the Egyptians. Megiddo was a city in the tribe of Manasseh, between forty and fifty miles to the north of Jerusalem, and within three hours of the coast. It is called by Herodotus Magdolus. In this valley the feeble forces of the Jewish king, having attacked Necho, were routed with great slaughter. Josiah being wounded in the neck with an arrow, ordered his attendants to take him from the field. Escaping from the heavy shower of arrows with which their broken ranks were overwhelmed, they removed him from the chariot in which he had been wounded, and placing him in a 'second one that he had,' they conveyed him to Jerusalem, where

he died (2 Kings xxiii. 29 sq.; 2 Chron. xxxv. 20 sq.).

Intent upon his original project, Necho did not stop to revenge himself upon the Jews, but continued his march to the Euphrates. Three months had scarcely elapsed, when, returning from the capture of Carchemish and the defeat of the Chaldæans, he learned that, though Josiah had left an elder son, Jehoahaz had caused himself to be proclaimed king on the death of his father, without soliciting Necho to sanction his taking the crown. Incensed at this, he ordered Jehoahaz to meet him 'at Riblah, in the land of Hamath;' and having deposed him, and condemned the land to pay a heavy tribute, he carried him a prisoner to Jerusalem. On arriving there, Necho made Eliakim, the eldest son, king, changing his name to Jehoiakim; and taking the silver and gold which had been levied upon the Jewish nation, he returned to Egypt with the captive Jehoahaz, who there terminated his short and unfortunate career. Herodotus says that Necho, after having routed the Syrians (the Jews) at Magdolus, took Cadytis, a large city of Syria, in Palestine, which, he adds, is very little less than Sardis (ii. 159, iii. 5). By Cadytis there is scarcely a doubt he meant Jerusalem; the word is only a Greek form of the ancient, as well as the modern, name of that city. It is, however, to be regretted that the mural sculptures of Egypt present no commemoration of these triumphs on the part of Necho; the sole record of him which they give being the name of Necho, found among the hieroglyphics in the great hall of Karnak. His oval also occurs on vases, and some small objects of Egyptian art.

Pleased with his success, the Egyptian monarch dedicated the dress he wore to the Deity who was supposed to have given him the victory. He did not long enjoy the advantages he had obtained. In the fourth year after his expedition, being alarmed at the increasing power of the Babylonians, he again marched into Syria, and advanced to the Euphrates. The Babylonians were prepared for his approach. Nebuchadnezzar completely routed his army, recovered the town of Carchemish, and, pushing his conquests through Palestine, took from Necho all the territory belonging to the Pharaohs, from the Euphrates to the southern extremity of Syria (2 Kings xxiv. 7; Jer. xlvi. 2; 2 Chron. xxxvi. 9; 2 Kings xxiv. 8). Nebuchadnezzar deposed Jehoiachin, who had succeeded his father, and carried the warriors and treasures away to Babylon; a short time previous to which Necho died, and was succeeded by Psammetichus II. (Wilkinson's *Anc. Egyptians*, vol. i. 157 sq.)

According to Manetho (Euseb. *Chron. Armen.*, i. 219), Necho was the sixth king in the twenty-sixth dynasty, successor of Psammetichus, and as there had been another of the same name, he was properly Necho the Second. The period of his reign was, according to Manetho, six, according to Herodotus sixteen, years (Consult Gesenius, *Isaiah*, i. 596).—J. R. B.

NECOTH (נְכֹאת). This word occurs twice in the book of Genesis, and no doubt indicates a product of Syria, for in one case we find it carried into Egypt as an article of commerce, and in another sent as a present into the same country. It occurs in the same passages as *ladanum*, which is translated *myrrh* in the Authorized Version. Many of the same general observations will therefore apply to both [Loth]. Necoth has unfortunately been rendered *spicery*. This it is not likely to have meant, at least in the present sense of the term, for such commodities were not likely to be transported into Egypt from Gilead, though many Eastern products were, no doubt, carried north by caravans into Asia Minor, up the Euphrates, and by Palmyra into Syria. In the present case, however, all the articles mentioned, seem to be products indigenous in Syria. But it is necessary to attend strictly to the original names, for we are apt to be misled by the English translation. Thus, in Gen. xxxvii. 25, we read, 'Behold, a company of Ishmaelites came from Gilead with their camels, bearing *spiccry (necoth)*, and balm *(tzeri)*, and myrrh *(loth)*, going to carry it down to Egypt.' To these men Joseph was sold by his brethren, when they were feeding their flocks at Dothan, supposed to be a few miles to the north of Sebaste, or Samaria. It is curious that Jacob, when desiring a present to be taken to the ruler of Egypt, enumerates nearly the same articles (Gen. xliii. 11), 'Carry down the man a present, a little balm *(tzeri)*, and a little honey *(debash)*, *spices (necoth)* and myrrh *(loth)*; or, 'Sumite de laudatissimis hujus terræ fructibus in vasis vestris,' as Bochart translates it. (See the several words.)

Bochart *(Hierozoicon*, ii. lib. iv. c. 12) enters into a learned exposition of the meaning of *necoth*, of which Dr. Harris has given an abridged view in his article on spices. Bochart shows that the true import of *necoth* has always been considered uncertain, for it is rendered *wax* by the paraphrast Jonathan, in the Arabic version of Erpenius, and in Beresith Rabba (sect. 91, near the end). Others interpret it very differently. The Septuagint renders it θυμίαμα, *perfume*, Aquila *storax*, the Syrian version *resin*, the Samaritan *balsam*, one Arabic version *khurnoob* or *carob*, another *sumugha* (or gum), Kimchi *a desirable thing*, Rabbi Selomo *a collection of several aromatics*. Bochart himself considers it to mean *storax*, and gives six reasons in support of his opinion, but none of them appears of much weight. Storax, no doubt, was a natural product of Syria, and an indigenous product seems to be implied; and Jerome (Gen. xliii. 11) follows Aquila in rendering it *styrax*. Rosenmüller, in his *Bibl. Bot.* p. 165, Eng. transl., adopts *tragacanth* as the meaning of *necoth*, without expressing any doubt on the subject; stating that 'The Arabic word (نكا or نكعة *neka* or *nekat*) which is analogous to the Hebrew, denotes that gum which is obtained from the tragacanth, or, as it is commonly called, by way of contraction, traganth shrub, and which grows on Mount Lebanon, in the Isle of Candia, and also in southern Europe.' We have not been able to find any word similar to *necoth*, indicating the tragacanth, which, in our own MS. Materia Medica, is given under the Arabic name of *kitad*, sometimes pronounced *kithad;* and, indeed, it may be found under the same name in Avicenna and other Arabic authors. Tragacanth is an exudation from several species of the genus *Astragalus*, and subdivision *tragacantha*, which is produced in Crete, but chiefly in Northern Persia and in Koordistan.

In the latter province, Dr. Dickson, of Tripoli, saw large quantities of it collected from plants, of which he preserved specimens, and gave them to Mr. Brant, British consul at Erzeroum, by whom they were sent to Dr. Lindley. One of these, yielding the best tragacanth, proved to be *A. gummifer* of Labillardière. It was found by him on Mount Lebanon, where he ascertained that tragacanth was collected by the shepherds. It might therefore have been conveyed by Ishmaelites from Gilead to Egypt. It has in its favour, that it is a produce of the remote parts of Syria, is described by ancient authors, as Theophrastus, Dioscorides, &c., and has always been highly esteemed as a gum in Eastern countries: it was, therefore, very likely to be an article of commerce to Egypt in ancient times.

In Richardson's *Arabic Dictionary* we find نَقَاوَة *nakat*, translated as meaning the best part of corn (or dates) when sifted or cleaned; also *nukayet*, the choicest part of anything cleaned, but sometimes also the refuse.—J. F. R.

NEGINIOTH, a word which occurs in the titles of several Psalms [Psalms].

NEHEMIAH (נְחֶמְיָה, *comforted of Jehovah;* Sept. Νεεμίας). Three persons of this name occur in Scripture; one, the son of Azbuk (Neh. iii. 16), respecting whom no more is known than that he was ruler in Beth-zur, and took a prominent part in repairing the wall of Jerusalem [Beth-zur]. Another is mentioned (Ezra ii. 2; Neh. vii. 7) among those who accompanied Zerubbabel on the first return from captivity. Nothing further is known of this man, though some writers (see Carpzov, *Introd. ad Lib. Bib. Vet. Testamenti*, P. i. 340, sq.) hold him, without valid reasons, to be the same with the well-known Jewish patriot,

Nehemiah, whose genealogy is unknown, except that he was the son of Hachaliah (Neh. i. 1), and brother of Hanani (Neh. vii. 2). Some think he was of priestly descent, because his name appears at the head of a list of priests in Neh. x. 1-8; but it is obvious, from Neh. ix. 38, that he stands there as a prince, and not as a priest—that he heads the list because he was head of the nation. The Vulgate, in 2 Macc. i. 21, calls him '*sacerdos* Nehemias;' but this is a false version of the Greek, which has ἐκέλευσε τοὺς ἱερεῖς Νεεμίας, and not ὁ ἱερεύς, which the Latin would require. The Syriac agrees with the Greek. Others with some probability infer, from his station at the Persian court and the high commission he received, that he was, like Zerubbabel, of the tribe of Judah and of the house of David (Carpzov, *Introductio*, &c., P. i. 339).

While Nehemiah was cupbearer in the royal palace at Shushan, in the twentieth year of Artaxerxes Longimanus, or 444 years B.C. [Artaxerxes], he learned the mournful and desolate condition of the returned colony in Judæa. This filled him with such deep and prayerful concern for his country, that his sad countenance revealed to the king his 'sorrow of heart;' which induced the monarch to ascertain the cause, and also to vouchsafe the remedy, by sending him, with full powers, to rebuild the wall of Jerusalem, and 'to seek the welfare of the children of Israel.' Being furnished with this high commission, and enjoying the protection of a military escort (ch. ii. 9), Nehemiah reached Jerusalem in the year B.C. 444, and remained there till B.C. 432, being actively engaged for twelve years in promoting the public good (ch. v. 14). The principal work which he then accomplished was the rebuilding, or rather the repairing, of the city wall, which was done 'in fifty and two days' (ch. vi. 15), notwithstanding many discouragements and difficulties, caused chiefly by Sanballat, a Moabite of Horonaim, and Tobiah, an Ammonite, who were leading men in the rival and unfriendly colony of Samaria (ch. iv. 1-3). These men, with their allies among the Arabians, Ammonites, and Ashdodites (ch. iv. 7), sought to hinder the re-fortifying of Jerusalem, first by scoffing at the attempt; then by threatening to attack the workmen—which Nehemiah averted by 'setting a watch against them day and night,' and arming the whole people, so that 'every one with one of his hands wrought in the work, and with the other hand held a weapon' (ch. iv. 7-18); and finally, when scoffs and threats had failed, by using various stratagems to weaken Nehemiah's authority, and even to take his life (ch. vi. 1-14). But in the midst of these dangers from without, our patriot encountered troubles and hinderances from his own people, arising out of the general distress, which was aggravated by the cruel exactions and oppression of their nobles and rulers (ch. v. 1-5). These popular grievances were promptly redressed on the earnest and solemn remonstrance of Nehemiah, who had himself set a striking example of retrenchment and generosity in his high office (ch. v. 6-19). It appears also (ch. vi. 17-19) that some of the chief men in Jerusalem were at that time in conspiracy with Tobiah against Nehemiah. The wall was thus built in 'troublous times' (Dan. ix. 25); and its completion was most joyously celebrated by a solemn dedication under Nehemiah's direction (ch. xii. 27-43).

Having succeeded in fortifying the city, our reformer turned his attention to other measures in order to secure its good government and prosperity. He appointed some necessary officers (ch. vii. 1-3; also ch. xii. 44-47), and excited among the people more interest and zeal in religion by the public reading and exposition of the law (ch. viii. 1-12), by the unequalled celebration of the Feast of Tabernacles (ch. viii. 13-18), and by the observance of a national fast, when the sins of the people and the iniquities of their fathers were publicly and most strikingly confessed (ch. ix.), and when also a solemn covenant was made by all ranks and classes 'to walk in God's law,' by avoiding intermarriages with the heathen, by strictly observing the Sabbath, and by contributing to the support of the temple service (ch. x.). But the inhabitants of the city were as yet too few to defend it and to ensure its prosperity; and hence Nehemiah brought one out of every ten in the country to take up his abode in the ancient capital, which then presented so few inducements to the settler, that 'the people blessed all the men that willingly offered themselves to dwell at Jerusalem' (ch. vii. 4; also ch. xi. 1-19).

In these important public proceedings, which appear all to have happened in the first year of his government, Nehemiah enjoyed the assistance of Ezra, who is named on several occasions as taking a prominent part in conducting affairs (ch. viii. 1, 9, 13; xii. 36). Ezra had gone up to Jerusalem thirteen years before according to some, or thirty-three years according to others;

but on either reckoning, without supposing unusual longevity, he might well have lived to be Nehemiah's fellow-labourer [Ezra]. These contemporaries are alike eminent among the benefactors of the Jewish people—alike patriotic and zealous, though not uniform in character, or the same in operation. In the character of Ezra we find no indication of the self-complacency which forms a marked feature in that of Nehemiah. The former, in accordance with his priestly calling, laboured chiefly in promoting the interests of religion, but the latter had most to do with the general affairs of government; the one was in charge of the temple, the other of the state.

Nehemiah, at the close of his successful administration, 'from the twentieth year even to the thirty-second year of Artaxerxes the king' (ch. v. 14), returned to Babylon in the year B.C. 432, and resumed, as some think, his duties as royal cupbearer.

He returned, however, after a while, to Jerusalem, where his services became again requisite, in consequence of abuses that had crept in during his absence. His stay at the court of Artaxerxes was not very long (certainly not above nine years); 'for after certain days he obtained leave of the king and came to Jerusalem' (ch. xiii. 6, 7). The phrase 'after certain days' (לקץ ימים, *at the end of days*) is indeed quite vague, and hence many take it, as in our common biblical chronology, for the space of one year, while others, on the contrary, reckon it a period of about twenty years, and so consider the return to have happened about B.C. 410 (Prideaux, i. 520; Jahn, *Einleitung ins A. Test.* ii. 288; Winer, *Real-wörterbuch*). But the former reckoning appears too short, for it is exceedingly improbable that affairs could fall into such confusion had Nehemiah been absent only one year; and the latter, though it has much in its favour, is too long, for it makes Nehemiah return *after* the death of the very king from whom he obtained leave to depart. Artaxerxes Longimanus died in B.C. 423, having reigned forty-one years; and hence Nehemiah's return to Jerusalem cannot be dated *later* than B.C. 423, which allows only nine years for his stay at Babylon. If, then, we date his return about B.C. 424, we at once bring it within the reign of Artaxerxes, and allow time enough for abuses to creep in during his absence, or at least for the particular abuse which is expressly named (ch. xiii. 4-9) as having actually arisen (Hävernick, *Einleitung ins A. Test.* ii. 324).

After his return to the government of Judæa, Nehemiah enforced the separation of all the mixed multitude from Israel (ch. xiii. 1-3); and accordingly expelled Tobiah the Ammonite from the chamber which the high-priest, Eliashib, had prepared for him in the temple (ch. xiii. 4-9). Better arrangements were also made for the support of the temple service (ch. xiii. 10-14), and for the rigid observance of the Sabbath (ch. xiii. 15-22). One of the last acts of his government was an effort to put an end to mixed marriages, which led him to 'chase' away a son of Joiada the high-priest, because he was son-in-law to Sanballat the Horonite (ch. xiii. 23-29). The duration of this second administration cannot be determined: only it is evident that Joiada was high-priest during that period. Now Joiada, according to some chronologists, succeeded his father Eliashib in the year B.C. 413; and hence we may gather that Nehemiah's second rule lasted at least ten years, namely, from B.C. 424 to 413. It is not unlikely that he remained at his post till about the year B.C. 405, towards the close of the reign of Darius Nothus, who is mentioned in ch. xii. 22 [Darius]. At this time Nehemiah would be between sixty and seventy years old, if we suppose him (as most do) to have been only between twenty and thirty when he first went to Jerusalem. That he lived to be an old man is thus quite probable from the sacred history; and this is expressly declared by Josephus, who (*Antiq.* xi. 5, 6) states that he died at an advanced age (εἰς γῆρας ἀφικόμενος). Of the place and year of his death nothing is known.

Besides the account in Josephus, there are some notices of Nehemiah in the Apocrypha. The Son of Sirach (ch. xlix. 13) mentions him with great honour as the rebuilder of the city walls; and in 2 Macc. i. 19-36, he is said to have discovered the holy fire that had been concealed by Jeremiah the prophet, at the destruction of the temple, which is clearly a mere legend. In 2 Macc. ii. 13, he is said to have formed a library, and collected the books of the kings and prophets, and of David; and hence some think it probable that he was concerned in forming the canon of Hebrew Scriptures—which is quite credible [Canon].

Two titles are given to Nehemiah, expressive of his office. One is פחה (ch. xii. 26), which is translated 'governor.' It is considered a Persian word, meaning *friend* or *assistant* of a king, and of the same origin as *pasha*, still used for the governor of a Turkish province. The other is התרשתא *tirshatha*, in ch. viii. 9, which might also be translated 'governor,' as it comes probably from a Persian word, meaning *severe* or *stern*, and hence applicable to a ruler. But in Neh. vii. 65, 70, this title denotes not Nehemiah, but Zerubbabel, as is evident from Ezra ii. 63-70.

The Book of Nehemiah, which bears the title דברי נחמיה, *Nehemiah's Words*, was anciently connected with Ezra, as if it formed part of the same work (Eichhorn, *Einleitung*, ii. 627). This connection is still indicated by its first word, ויהי, '*And* it came to pass.' It arose, doubtless, from the fact that Nehemiah is a sort of continuation of Ezra [Ezra]. From this circumstance some ancient writers were led to call this book the 2nd book of Ezra, and even to regard that learned scribe as the author of it (Carpzov, *Introductio. &c.* p. 336). There can, however, be no reasonable doubt that it proceeded from Nehemiah, for its style and spirit, except in one portion, are wholly unlike Ezra's. Here we find no Chaldee documents, as in Ezra, though we might expect some from ch. ii. 7, 8, 9, and ch. vi. 5; and here also the writer discovers a species of egotism never manifested by Ezra (Neh. v. 14-19; Eichhorn, *Einleitung ins A. Test.* ii. 619).

The canonical character of Nehemiah's work is established by very ancient testimony. It should be noticed, however, that this book is not expressly named by Melito of Sardis [A.D. 170] in his account of the sacred writings; but this creates no difficulty, since he does mention Ezra, of

which Nehemiah was then considered but a part (Eichhorn, *Einleitung*, ii. 627).

The contents of the book have been specified above in the biography of the author. The work can scarcely be called a history of Nehemiah and his times. It is rather a collection of notices of some important transactions that happened during the first year of his government, with a few scraps from his later history. The contents appear to be arranged in chronological order, with the exception perhaps of ch. xii. 27-43, where the account of the dedication of the wall seems out of its proper place: we might expect it rather after ch. vii. 1-4, where the completion of the wall is mentioned.

As to the date of the book, it is not likely that it came from Nehemiah's hand till near the close of his life. Certainly it could not have been all written before the expulsion of the priest, recorded in ch. xiii. 23-29, which took place about the year B.C. 413.

While the book as a whole is considered to have come from Nehemiah, it consists in part of compilation. He doubtless wrote the greater part himself, but some portions he evidently took from other works. It is allowed by all that he is, in the strictest sense, the author of the narrative from ch. i. to ch. vii. 5 (Hävernick, *Einleitung*, ii. 304). The account in ch. vii. 6-73 is avowedly compiled, for he says in ver. 5, 'I found a register,' &c. This register we actually find also in Ezra ii. 1-70: hence it might be thought that our author borrowed this part from Ezra; but it is more likely that they both copied from public documents, such as 'the book of the chronicles' (דברי הימים), mentioned in Neh. xii. 23. Had Nehemiah taken his list from Ezra, we might expect agreement, if not identity, in the contents; whereas the two registers present an amazing number of palpable discrepancies, which can scarcely be accounted for without supposing that they were taken from public records that were discordant. It is, however, barely possible that the discrepancies arose from the errors of transcribers.

Chapters viii.-x. were probably not written by Nehemiah, since the narrative respecting him is in the third person (ch. viii. 9; x. 1), and not in the first, as usual (ch. ii. 9-20). Hävernick, indeed, (*Einleitung*, ii. 305-308) makes it appear, from the contents and style, that Ezra was the writer of this portion. The remaining chapters (xi.-xiii.) also exhibit some marks of compilation (ch. xii. 26, 47); but there are, on the contrary, clear proofs of Nehemiah's own authorship in ch. xii. 27-43, and in ch. xiii. 6-31; and hence Havernick thinks he wrote the whole except ch. xii. 1-26, which he took from 'the book of the chronicles,' mentioned in ver. 23 (*Einleitung*, ii. 315-319).

The mention of Jaddua as a high-priest, in ch. xii. 11, 22, has occasioned much perplexity. This Jaddua appears to have been in office in B.C. 332, when Alexander the Great came to Jerusalem (Joseph. *Antiq.* xi. 8): how then could he be named by Nehemiah? The common, and perhaps the readiest, escape from this difficulty is to regard the naming of Jaddua as an addition by a later hand. Yet it is just credible that Nehemiah wrote it, if we bear in mind that he lived to be an old man, so as possibly to see the year B.C. 370; and if we further suppose that Jaddua had at that time entered on his office, so that he filled it for about forty years, *i. e.* till B.C. 332. In support of this conjecture, see especially Hävernick's *Einleitung*, ii. 320-324.

The exegetical helps for the explanation of this book are chiefly, Poli *Synopsis;* Jo. Clerici *Comm. in Lib. Historicos V. T.*, Amst. 1708; Maurer, *Comment. Crit. Grammat. in V. T.*, vol. i. Lips. 1833; Strigelii *Scholia in Nehem.*, Lips. 1575; and Rambach, *Annotationes in Librum Nehemiæ.*—B. D.

NEHILOTH, a word which occurs in the title of the fifth Psalm [PSALMS].

NEHUSHTA (נְחֻשְׁתָּא, *brass;* Sept. Νέσθα), the mother of king Jehoiachin (2 Kings xxiv. 8).

NER (נֵר, *a light;* Sept. Νήρ), grandfather of king Saul (1 Sam. xiv. 50, 51; xxvi. 5; 1 Chron. viii. 33).

NERD or NARD (נֵרְד) is mentioned in three places in the Song of Solomon, and by Mark and John in the New Testament, under the name of νάρδος. Both are translated in the Authorized Version by the word *spikenard*, which indicates a far-famed perfume of the East, that has often engaged the attention of critics, but the plant which yields it has only been ascertained in very recent times. That the *nerd* of Scripture was a

483. [Nardostachys Jatamansi.]

perfume is evident from the passages in which it occurs. Cant. i. 12: 'While the king sitteth at his table, my spikenard [nard] sendeth forth the smell thereof.' So in Cant. iv. 14: 'Spikenard and saffron, calamus and cinnamon, with all trees of frankincense, myrrh and aloes, with all the chief spices.' Here we find it asso-

tioned along with many of the most valued aromatics which were known to the ancients, and all of which, with the exception perhaps of saffron, must have been obtained by foreign commerce from distant countries, as Persia, the east coast of Africa, Ceylon, the north-west and the south-east of India, and in the present instance even from the remote Himalayan mountains. Such substances must necessarily have been costly when the means of communication were defective, and the gains of the successful merchant proportionally great. That the nard or nardus was of great value we learn from the New Testament (Mark xiv. 3). When our Saviour sat at meat in Bethany, 'there came a woman having an alabaster box of ointment of (*νάρδου*) spikenard very precious; and she brake the box, and poured it on his head.' So in John xii. 3: 'Then took Mary a pound of ointment of spikenard (*μύρου νάρδου*), very costly, and anointed the feet of Jesus, and wiped his feet with her hair; and the house was filled with the odour of the ointment.' On this Judas, who afterwards betrayed our Saviour, said (ver. 5), 'Why was not this ointment sold for three hundred pence, and given to the poor?'

Before proceeding to identify the plant yielding nard, we may refer to the knowledge which the ancients had of this ointment. Horace, at a period nearly contemporary, 'promises to Virgil a whole cadus (about thirty-six quarts) of wine, for a small onyx-box full of spikenard' (Rosenmüller, p. 168),

—— Nardo vina merebere.
Nardi parvus onyx eliciet cadum.

The composition of this ointment is given by Dioscorides, in lib. i. c. 77, *περὶ ναρδίνου μύρου*, where it is described as being made with nut oil, and having as ingredients malabathrum, schœnus, costus, amomum, nardus, myrrha, and balsamum; that is, almost all the most valued perfumes of antiquity.

434. [Spikenard from a druggist's in London.]

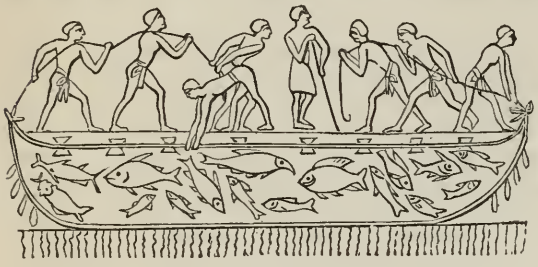
The nard, *νάρδος*, was known in very early times, and is noticed by Theophrastus, and by Hippocrates. Dioscorides, indeed, describes three kinds of nard. Of the first, called *νάρδος (nardos)* simply, there were two varieties, the one Syrian, the other Indian. The former is so called, not because it is produced in Syria, but because the mountains in which it is produced extend on one side towards Syria, and on the other towards India. This may refer to the Hindoo Khoosh, and to the extensive signification of the name Syria in ancient times, or to so many Indian products finding their way in those ages into Europe across Syria. These were brought there either by the caravan route from north-west India, or up the Persian Gulf and Euphrates. It is evident, from the passages quoted, that nard could not have been a produce of Syria, or its value would not have been so great either among the Romans or the Jews. The other variety is called Gangitis, from the Ganges, being found on a mountain round which it flows. It is described as having many spikes from one root. Hence it, no doubt, came to be called *ναρδόσταχυς*; and from the word *stachys* being rendered by the word *spike*, it has been translated spikenard. The second kind is by Dioscorides, called Celtic Nard (*νάρδος κελτική*), and the third kind mountain nard (*νάρδος ὀρεινή*). If we consult the authors subsequent to Dioscorides, as Galen, Pliny, Oribasius, Ætius, and Paulus Ægineta, we shall easily be able to trace these different kinds to the time of the Arabs. As the author of this article has already said *(v. infra)*, on consulting Avicenna, we are referred from *narden* to *sunbul*, pronounced *sumbul*, and in the Latin translation from *nardum* to *spica*, under which the Roman, the mountain, the Indian, and Syrian kinds are mentioned. So in Persian works on Materia Medica, chiefly translations from the Arabic, we have the different kinds of *sunbul* mentioned; as—1. *Sunbul hindee*. 2. *Sunbul roomie*, called also *sunbul ukletee* and *narden ukletee*, evidently the above Celtic nard, said also to be called *sunbul italion*, that is, the nard which grows in Italy. 3. *Sunbul jibullee*, or mountain nard. The first, however, is the only one with which we are at present concerned. The synonymes given to it in these Persian works are,—Arabic, *sunbul al teeb*, or fragrant nard; Greek, *narden;* Latin, *nardoom;* and Hindee, *balchur* and *jatamansee*.

Sir William Jones (*Asiat. Res.* ii. 416, 8vo.) was the first to ascertain that the above Hindee and Sanscrit synonymes referred to the true spikenard, and that the Arabs described it as being like the tail of an ermine. The next step was of course to attempt to get the plant which produced the drug. This he was not successful in doing, because he had not access to the Himalayan mountains, and a wrong plant was sent him, which is that figured and described by Dr. Roxburgh (*Asiat. Res.* iv. 97, 438). The author of this article, when in charge of the East India Company's botanic garden at Seharunpore, in 30° of N. latitude, about 30 miles from the foot of the Himalayan mountains, being favourably situated for the purpose, made inquiries on the subject. He there learnt that *jatamansi*, better known in India by the name *balchur*, was yearly brought down in considerable quantities, as an article of commerce, to the plains of India, from such mountains as Shalma, Kedar Kanta, and others, at the foot of which flow the Ganges and

Jumna rivers. Having obtained some of the fresh brought down roots, he planted them, both in the botanic garden at Seharunpore and in a nursery at Mussooree, in the Himalaya, attached to the garden. The plants produced are figured in his *Illustrations of Himalayan Botany*, t. 54, and a reduced figure is given in the accompanying wood-cut (No. 433). The plant produced was found to belong to the natural family of *Valerianeæ*, and has been named *nardostachys jatamansi* by De Candolle, and formerly *patrinia jatamansi*, by Mr. Dow, from plants sent home by Dr. Wallich from Gossamtham, a mountain of Nepal (*Penny Cyclopædia*, art. Spikenard; and Royle, *Illust. Himal. Botany*, p. 242).

Hence there can be no doubt that the *jatamansi* of the Hindoos is the *sunbul hindee* of the Arabs, which they compare to the tail of an ermine. This would almost be sufficient to identify the drug: the appearance to which it refers may be seen even in the wood-cut (434, fig. 1), but very conspicuously in the specimens of the drug which the author has deposited in the Museum of Materia Medica in King's College. This is produced in consequence of the woody fibres of the leaf and its footstalk not being decomposed in the cold and comparatively dry climate where they are produced, but remain and form a protection to the plant from the severity of the cold. There can be as little doubt that the Arabs refer to the descriptions of Dioscorides, and both they, and the Christian physicians who assisted them in making translations, had ample opportunities, from their profession and their local situation, of becoming well acquainted with things as well as words. There is as little reason to doubt that the *νάρδος* of Dioscorides is that of the other Greek authors, and this will carry us into ancient times. As many Indian products found their way into Egypt and Palestine, and are mentioned in Scripture, indeed in the very passage with nard we have calamus, cinnamon, and aloes *(ahalim)*, there is no reason why spikenard from the Himalayas could not as easily have been procured. The only difficulty appears to arise from the term *νάρδος* having occasionally been used in a general sense, and therefore there is sometimes confusion between the nard and the sweet cane [Kaneh bosem], another Indian product. Some difference of opinion exists respecting the fragrance of the *jatamansi:* it may be sufficient to state that it continues to be highly esteemed in Eastern countries in the present day, where fragrant essences are still procured from it, as the *unguentum nardinum* was of old.—J. F. R.

NERGAL (נֵרְגַל; Sept. Ἐργέλ), an idol of the Cuthites (2 Kings xvii. 30). The Rabbinical commentators believe that this idol was in the form of a cock; founding their not very happy conjecture apparently upon the fact that in the Talmud the similar word, תרנגול *tarnegol*, means a cock. The more measured researches of Norberg, Gesenius, and other inquirers into the astrolatry of the Assyrians and Chaldæans, lead to the conclusion that נרגל is the same as the Zabian نرجل, which was the name for the planet Mars. This name of the planet, both among the Zabians and Arabians, means *ill-luck, misfortune;* and it was by no means peculiar to the mythology of the West to make it the symbol of bloodshed and war. Among the people first named, the planet Mars was typified under the figure of a man holding in one hand a drawn sword, and in the other a human head just cut off; and his garments were also red, which, as well as the other ideas attached to this idol, were no doubt founded on the reddish hue which the body of the planet presents to the eye. Among the southern Arabs his temple was painted red; and they offered to him garments stained with blood, and also a warrior (probably a prisoner), who was cast into a pool. It is related of the khalif Hakeem that in the last night of his life, as he observed the stars, and saw the planet Mars rise above the horizon, he murmured between his lips, 'Dost thou ascend, thou accursed shedder of blood? then is my hour come;' and at that moment the assassins sprang upon him from their hiding-place' (Mohammed Abu Taleb, ap. Norberg, *Onomast.* p. 105; *Bar-Hebræus*, p. 220). Von Bohlen would rather derive the name from the Sanscrit *Nrigal*, 'man-devourer,' spoken of a fierce warrior, and corresponding to Merodach (Gesenius, *Thesaur.* p. 913, and *Comment. zu Jesa*, ii. p. 344).

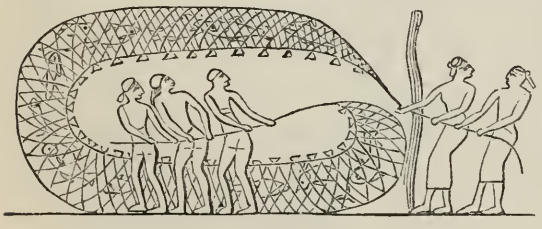


NERGAL-SHAREZER (נֵרְגַל-שַׂרְאֶצֶר; Pers. *Nergal, prince of fire;* Sept. Νεριγλισσάρ). 1. A military chieftain under Nebuchadnezzar (Jer. xxxix. 3). 2. The chief of the magi (Rab-mag) under the same king, and present in the same expedition (Jer. xxxix. 3, 13).

NESER. [Eagle.]

NET. There are in Scripture several words denoting different kinds of nets, and this, with the frequency of images derived from them, shows that nets were much in use among the Hebrews for fishing, hunting, and fowling. Indeed, for the two latter purposes, nets were formerly used to an extent of which now, since the invention of fire-arms, a notion can scarcely be formed. 1. חרם *cherem*, which denotes a net for either fishing or fowling. It is derived from a word signifying 'to shut up;' and the idea is, therefore, founded on its shutting in the prey. It occurs in Hab. i. 16, 17; Ezek. xxvi. 5, 14; xlvii. 10; Zech. xiv. 11, &c. In Eccles. vii. 26, it is applied by an apt metaphor to female entanglements. 2. מכמר *mikmor* or *machmor*, which occurs only in Ps. cxli. 10, Isa. li. 20, where it denotes a hunter's net; but a longer word, from the same source, מכמרת *mikmoreth*, denotes the net of fishermen in the only passages in which it is found (Isa. xix. 8; Hab. i. 15, 16). In these cases we find, by tracing the words to their source, that the idea is founded upon the plaiting, braiding, or interweaving of the net-work. 3. שבכה *sebaka*, which designates an actual hunting net in Job xviii. 6; but elsewhere it is applied to net-work or lattice-work, especially around the capitals of columns (1 Kings vii. 18, 20, 41, 42; 2 Kings xxvi. 17; 2 Chron. iv. 12, 13; Jer. lii. 22, 23); and also before a window or balcony (2 Kings i. 2). In the New Testament no other net than that for fishing alone is mentioned. The word which describes it (*δίκτυον*) is usually confined to fishing nets by classical writers, although sometimes applied to the nets of hunters. Another word to describe a net, *ἀμφίβληστρον*, occurs in Matt. iv. 18; Mark i. 16, which, like

cherem above, is founded on the idea of enfolding or shutting in the prey.



We have no positive information concerning the nets of the Hebrews, and can only suppose that they were not materially different from those of the ancient Egyptians, concerning which we now possess very good information. Indeed, the nets of Egypt, the fishers who used them, and the fish caught by them, are more than once mentioned in Scripture (Isa xix. 8). The usual fishing net among this people was of a long form, like the common drag-net, with wooden floats on the upper, and leads on the lower side. It was sometimes let down from a boat, but those who pulled it usually stood on the shore, and landed the fish on a shelving bank. This mode, however, was more

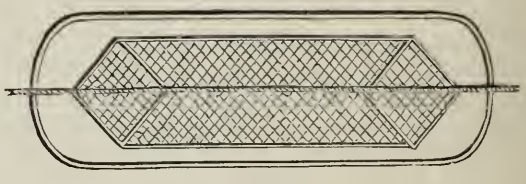
435.

adapted to river than to lake fishing; and hence, in all the detailed examples of fishing in the New Testament, the net is cast from and drawn into boats, excepting in one case where, the draft being too great to take into the boat, the fishers dragged the net after their boats to the shore (John xxi. 6, 8). Sometimes use was made of a smaller net for catching fish in shallow water, furnished with a pole on either side, to which it was attached; and the fisherman, holding one of the poles in either hand, thrust it below the surface of the water, and awaited the moment when a shoal of fish passed over it.

It is interesting to observe that the fishermen in the boat, excepting the master (No. 435), are almost

436.

naked, as are also those who have occasion to wade in the water in hauling the net to the shore (No. 436). Such seems also to have been the practice among his Hebrew fishermen; for Peter, when he left the boat to hasten on shore to his risen Lord, 'girt his fisher's coat unto him, for he was naked' (John xxi. 7); although, in this case, the word 'naked' must be understood with some latitude [Naked].



Nets were also used in taking birds, to an extent of which we can scarcely form an adequate conception. A clap net was usually employed. This was of different kinds, that shown in the cut (No. 438), being the most common. It consisted of two sides or frames, over which the network was spread; at one end was a short net, which they fastened to a bush, or a cluster of reeds, and at the other was one of considerable length, which, as soon as the birds were seen feeding in the area within, was pulled by the fowlers, causing the instantaneous collapse of the two sides (No. 437). Sir J. G. Wilkinson (*Ancient Egyptians*, iii. 45) says the nets are very similar

437.

to those used in Europe at the present day, but probably larger, and requiring a greater number of persons to manage them, than our own; which, however, may be ascribed to an imperfection in the contrivance for closing them.

In hunting, a space of considerable size was sometimes enclosed with nets, into which the animals were driven by beaters. The spots thus enclosed were usually in the vicinity of the water brooks to which they were in the habit of repairing in the morning and evening; and having awaited

438.

the time when they went to drink, the hunters disposed their nets, occupied proper positions for observing them unseen, and gradually closed in upon them. The usages of the Egyptians, and, so far as can be ascertained, of other Oriental nations, in this respect, correspond with the intimations of Julius Pollux (*Onomast.* v. 4), who states that two kinds of nets were employed in this mode of hunting. One, a long net, called by the Greeks δίκτυς, was furnished with several ropes, and was supported on forked poles, varying in length to correspond with the inequalities of the ground over which it extended. The others were smaller nets, called ἐνόδια, for stopping gaps. These practices are obviously alluded to in such passages as Job xix. 6; Ps. cxl. 5; Isa. li. 20.

NETER (נֶתֶר; Sept. and Symmachus, νίτρον; Vulg. *nitrum*; English version 'nitre') occurs in Prov. xxv. 20; Jer. ii. 22; where the substance in question is described as effervescing with vinegar, and as being used in washing; neither of which particulars applies to what is now, by a misappropriation of this ancient name, called 'nitre,' and which in modern usage means the saltpetre of commerce, but they both apply to the *natron*, or true *nitrum* of the ancients. The similarity of the names which is observable in this case is considered by Gesenius of great weight in a production of the East, the name of which usually passed with the article itself into Greece. Both Greek and Roman writers describe *natron* by the words given in the Sept. and Vulgate. Jerome, in his note on Prov. xxv. 20, considers this to be

the substance intended. Natron, though found in many parts of the East, has ever been one of the distinguishing natural productions of Egypt. Strabo mentions two places in that country, beyond Memphis, where it was found in great abundance, and says that those districts were in consequence called the nitritic nomes or provinces (*Geog.* xvii. p. 1139, Oxon. 1807), to which Pliny refers by the name Nitritis (*Hist. Nat.* v. 9), and describes the natural and manufactured nitrum of Egypt (xxxi. 10). This substance, according to Herodotus, was used by the Egyptians in the process of embalming (ii. 76, 77). The principal natron lakes now found in Egypt, six in number, are situate in a barren valley about thirty miles westward of the Delta, where it both floats as a whitish scum upon the water, and is found deposited at the bottom in a thick incrustation, after the water is evaporated by the heat of summer. It is a natural mineral alkali, composed of the carbonate, sulphate, and muriate of soda, derived from the soil of that region. Forskal says that it is known by the name اطرون *atrun*, or نطرون *natrun*, that it effervesces with vinegar, and is used as soap in washing linen, and by the bakers as yeast, and in cookery to assist in boiling meat, &c. (*Flora Ægyptiaco-Arabica*, Hauniæ, 1775, pp. 45, 46). Combined with oil it makes a harder and firmer soap than the vegetable alkali [Borith]. The application of the name nitre to saltpetre seems accounted for by the fact that the knowledge of natron, the true nitre, was lost for many centuries in this country, till revived by the Hon. R. Boyle, who says he 'had had some of it brought to him from Egypt' (*Memoirs for a History of Mineral Waters*, Lond. 1684-5, p. 86). See an interesting paper in which this is stated, in the *Philosophical Transactions*, abridged, 1809, vol. xiii. p. 216, &c.; and for a full description of the modern merchandise, uses, &c., of the natron of Egypt, see Sonini's *Travels*, Paris, vol. i. ch. xix.; Andréossi's *Memoire sur la Vallée des Lacs de Natron Decade Egyptienne*, No. iv., vol. ii.; Beckmann's *Beyträge zur Geschichte der Erfindungen*, th. iv. p. 15, ff.; J. D. Michaelis, *De Nitro Hebræor.* in *Comment. Societ. Regal. Prælect.* pt. i. p. 166; and *Supplem. ad Lex. Hebraic.* p. 1704; Shaw's *Travels*, 2nd ed. p. 479.

J. F. D.

NETHINIM (נְתִינִים; Sept. Ναθινίμ). This name, which means 'the given' or 'the devoted,' was applied to the servants of the temple, or temple slaves, who were under the Levites in the ministry of the tabernacle and temple. Gesenius (*Jewish Antiq.*, p. 289) is wrong in alleging that there is no trace of the name till the time of David. On the contrary, it was attached in the first instance to the Levites themselves. Thus God says, 'I have *given* the Levites as *a gift* (Heb. *nethinim*) to Aaron and to his sons from among the children of Israel, to do the service of the children of Israel in the tabernacle of the congregation' (Num. viii. 19). This, in fact, explains the origin of the name. The term 'Levites,' however, was at first sufficiently distinctive as a title; but when subordinate helpers were eventually *given* to these, the latter took the name of Nethinim. The first servants whom the Levites obtained were the Gibeonites, on whom devolved the very laborious services of fetching water and collecting wood (Josh. ix. 3-27). The number of such servants appears to have been increased by David; and it seems to have been then, when these servants ceased to be wholly Gibeonities, that Nethinim came into use as a proper name for the whole class (Ezra viii. 20). From that time forward, they appear to have been no longer regarded or treated as slaves, but as the lowest order of the servants of the sanctuary; who, although in their origin foreigners and heathen, had doubtless embraced the Jewish religion. These did not all forget their relationship to the sanctuary during the Captivity. Some of them returned to their duties under the decree of Cyrus, and were placed in cities with the Levites (Neh. xi. 3; Ezra ii. 70; 1 Chron. ix. 27. It was not to be expected that many of them would return to this humble station in Palestine, but 220 accompanied Ezra (Ezra viii. 20), and 392 Zerubbabel (ii. 5-8). The voluntary devotedness which was thus manifested by these persons considerably raised the station of the Nethinim, which was thenceforth regarded rather as honourable than degrading. Their number was, however, insufficient for the service of the temple; whence, as Josephus tells us (*De Bell. Jud.* ii. 17, 6), a festival, called Ξυλοφορία, Xylophoria, was established, in which the people, to supply the deficiency, were obliged to bring a certain quantity of wood to the temple for the use of the altar of burnt-offering.

NETOPHAH (נְטֹפָה; Sept. Νετωφά), a place not far from Bethlehem in Judæa (Ezra ii. 22; Neh. vii. 26). Hence the Gentile name Netophite (2 Sam. xxiii. 28, 29; 2 Kings xxv. 23).

NETTLE [Thorn].

NEW MOON [Festivals; Moon].

NEW YEAR [Year].

NIBHAZ (נִבְחַז; Sept. Ἐβλαζέρ), an idol of the Avites (2 Kings xvii. 31). The Jewish interpreters, knowing nothing of this idol, sought to deduce some idea of it from the etymology of the name. Deriving it from נבח, 'to bark,' they have assigned the idol the figure of a dog; although there are no traces of any idol of this figure worshipped in ancient Syria. In the Zabian books the corresponding name, לבא, is that of an evil demon, who sits on a throne upon the earth, while his feet rest on the bottom of Tartarus; but it is doubtful whether this should be identified with the Avite Nibhaz. Iken, *Dissert. de Idola Nibchaz*, 1743; Norberg, *Onomast. Cod. Nasar.*; Gesen. *Thesaur.* in נבחז.

NICODEMUS (Νικόδημος), a Pharisee and member of the Sanhedrim, who was impressed by what he had heard concerning Jesus; but being unwilling, on account of his station, to commit himself without greater surety than he possessed, repaired by night to the house in which Christ dwelt, and held with him that important discourse which occupies the third chapter of John's Gospel. The effect which was then produced upon his mind may be collected from the fact that subsequently, at one of the sittings of the venerable body to which he belonged, he ventured to let fall a few words in favour of Jesus

whose proceedings were then in question (John vii. 50); and that he took part with his colleague, Joseph of Arimathea, in rendering the last honours to the body of the crucified Redeemer (John xix. 39). Nothing further is known of Nicodemus from Scripture. Tradition, however, adds that after he had thus openly declared himself a follower of Jesus, and had been baptised by Peter, he was displaced from his office, and expelled from Jerusalem (Phot. *Cod.* p. 171). It is added that he found refuge in a country house of his cousin Gamaliel, and remained there till his death. Modern writers have been disposed to identify Nicodemus with a rich and pious person of the same name (but also called Bonai), mentioned in the Talmud, whose family eventually sank into great poverty (Otho. *Lex. Rabbin.*, p. 459). All this is, however, very uncertain, and what is stated in the Apocryphal Gospel of Nicodemus is unsafe, and in some parts manifestly untrue. Too strong an appreciation of the world's good opinion seems to have been the failing of Nicodemus, although Niemeyer (*Charakt.* i. 113) has lately made a strong effort to clear him from this imputation. We do not lay much stress upon what he ventured to say in the Sanhedrim; for he suffered himself to be easily put down, and did not come forward with any bold avowal of his belief. Winer calls attention to the fact, that although he took part in the sepulchral rites of Jesus, he did not join Joseph in his application to Pilate for the body of his crucified Lord; and justly remarks that such characters usually require a strong external impulse to bring them boldly forward, which impulse was probably in this case supplied by the resurrection of Jesus.

NICOLAITANS (Νικολαϊταί). This word occurs twice in the New Testament (Rev. ii. 6, 15). In the former passage the conduct of the Nicolaitans, τὰ ἔργα τῶν Νικολαϊτῶν, is condemned; in the latter, the angel of the church in Pergamus is censured because certain members of his church held their doctrine, τὴν διδαχὴν τῶν Νικολαϊτῶν. Irenæus, the earliest Christian author who mentions them, says simply (*Contra Hæres.*, i. 26), 'It very clearly appears, from the Apocalypse, that the Nicolaitans held fornication, and the eating of idol-sacrifices, to be things indifferent, and therefore permitted to Christians.' In short, Irenæus evidently knew nothing of the Nicolaitans, except what he gathered from the text of the Apocalypse; as, indeed, the concluding words of his short notice suggest: 'Quapropter dixit et de iis sermo: Sed hoc habes quod odisti opera Nicolaitarum, quæ et ego odi;' unless it be his statement that Nicolas, one of the seven deacons (Acts v.), was the founder of the sect. The practices of these heretics were the more reprehensible, as being not only opposed to the whole spirit and morality of the Gospel, but a violation of an express decree of the Apostles and Elders, issued in relation to this matter (Acts xv.). As time rolled on, however, the information regarding Nicolas and his proceedings seems continually to have increased, till Epiphanius, at length, furnishes us with a full-blown account of the manner in which the proselyte of Antioch founded the sect which was supposed to bear his name. Nicolas, such is the story of Epiphanius (*Advers. Hæres.* i. 25, p. 76, edit. Petav.), had a beautiful wife, and, following the counsels of perfection, he separated himself from her; but not being able to persevere in his resolution, he returned to her again (as a dog to his vomit, ὡς κύων ἐπὶ τὸν ἴδιον ἔμετον); and not only so, but justified his conduct by licentious principles, which laid the foundation of the sect of the Nicolaitans.

Against this account (in which Tertullian, Hilary, Gregory of Nyssa, and several other fathers, substantially concur) we may object—(1) That the custom of men putting away their wives for the attainment of a supposed higher sanctity evidently belongs to a later period, when the monastic ideas produced these and similar practices. Such an occurrence was natural enough in the age of Clement of Alexandria and of Tertullian—that is, towards the conclusion of the second century; but we cannot believe it could have happened in the Apostolic age. (2) It is not conceivable that his taking back his wife, even if he had, on those grounds, separated himself from her, would then be regarded as an immorality, much less as an enormous crime, especially considering what St. Paul had said on the subject (1 Cor. vii. 3-6). (3) Epiphanius, after stating that Nicolas lapsed into the greatest enormities, informs us that *all the Gnostics* derived their origin from him; a statement which throws an air of ridicule over all he has told us on this subject, and proves how little his authority in the matter is worth.

Clement of Alexandria has preserved a different version of the story (*Strom.* iii. 4, p. 522, edit. Potter), which Eusebius copies from him (*Hist. Eccles.*, iii. 29), and which is repeated by Augustine and other ancient writers. 'The apostles,' they say, 'reprehended Nicolas for jealousy of his wife, who was beautiful; whereupon Nicolas produced her, and said, Any one might marry her who pleased. In this affair the deacon let fall the expression, ὅτι παραχρήσασθαι τῇ σαρκὶ δεῖ, "that we should abuse the flesh;" which, though employed in a good sense by him, was perverted to a bad one by those who would gain to their licentiousness the sanction of a respectable name, and who from hence styled themselves Nicolatains.' Who can believe that a sect should take its rise and its name from a casual expression by a man whose obvious sense and whose conduct were opposed to the peculiarities of the sect? Neither can we think the conjecture of Grotius (*Annot. in Apocalyps.*, ii. 6) at all probable: 'Mihi veterum testimonia conferenti, media placet sententia, quæ hæc est: Nicolaum accusatum ζηλοτυπίας, quod, uxorem pulchram habens, usitata illa inter Christianos utriusque sexûs pacis oscula non satis ferret, in contrarium cucurrisse, et exemplo Laconum ac Catonis uxoris suæ usuram permisisse aliis, plane quasi in eo quod marito et uxore volentibus fieret non peccaretur, &c.' For it is hard to conceive that a custom which was universal could excite any jealousy; and yet more so that a man imbued with the doctrines of the Apostles, as Nicolas was, should seek to turn aside their displeasure by imitating the matrimonial enormities of Spartans or of Cato.

It is evident from the fathers, that the Nicolaitans with whom they were acquainted were Gnostics; since they impute to them the distinctive tenets and practices of the Gnostics. But in the

short allusion in Rev. ii. 6, 15, there is nothing to identify the tenets or conduct alluded to with Gnosticism, even supposing that Gnosticism, properly so called, existed in the Apostolic age, which, to say the least, has not been proved to be the case. So that the conjecture mentioned by Mosheim, and which Tertullian appears to favour, may be regarded as probable, that the Nicolaitans mentioned in Revelation had erroneously been confounded with a party of Gnostics formed at a later period by one Nicolas.

The ingenious conjecture of Michaelis is worthy of consideration, who supposes that by Nicolaitans (Rev. ii. 6, 15) the same class of persons is intended whom St. Peter (2 Ep. ii. 15) describes as ἐξακολουθήσαντες τῇ ὁδῷ τοῦ Βαλαάμ, *followers of the way of Balaam;* and that their name, Nicolaitans, is merely a Greek translation of their Hebrew designation, the noun Νικόλαος (from κικάω and λαός) being a literal version of בלעם, that is, בלע עם. The custom of translating names, which prevailed so extensively in modern Europe, was undoubtedly practised also among the Jews, as the example in Acts ix. 36 (to which others might be added) shows. Accordingly, the Arabic version, published by Erpenius, renders the words τὰ ἔργα τῶν Νικολαϊτῶν, *the works of the Shuaibites*, the Arabic *Shuaib* being apparently the name for Balaam. The only objection which occurs to us against this very ingenious and probable supposition, arises from the circumstance that, in the passage, Rev. ii. 14, 15, both 'they that hold the doctrine of Balaam,' and 'the Nicolaitans,' are specified, and are distinguished from each other: 'So hast thou also,' οὕτως ἔχεις καὶ σύ, the Nicolaitans, as well as the Balaamites, mentioned in the previous verse. So that whatever general agreement there might be between those two classes of heretics—and their collocation in the passage before us seems to imply that there was such agreement—it appears equally evident that some distinction also must have separated them the one from the other.—R. L.

NICOLAS (Νικόλαος), a proselyte of Antioch, and one of the seven deacons (Acts vi. 5). Nothing further is known of him; but a large body of unsafe tradition has been connected with his name, under the supposition that he was the founder of the heresy of the Nicolaitans, stigmatised in Rev. ii. 6, 15. (See the preceding article.)

NICOPOLIS (Νικόπολις), a city of Thrace, now Nicopi, on the river Nessus, now Karasou, which was here the boundary between Thrace and Macedonia; and hence the city is sometimes reckoned as belonging to the latter. In Titus iii. 15, Paul expresses an intention to winter at Nicopolis, and invites Titus, then in Crete, to join him there.

NIGER [Simon].

NIGHT. The general division of the night among the Hebrews has been described under Day; and it only remains to indicate a few marked applications of the word. The term of human life is usually called a day in Scripture; but in one passage it is called *night*, to be followed soon by day, 'the day is at hand' (Rom. viii. 12). Being a time of darkness, the image and shadow of death, in which the beasts of prey go forth to devour, it was made a symbol of a season of adversity and trouble, in which men prey upon each other, and the strong tyrannize over the weak (Isa. xxi. 12; Zech. xiv. 6, 7; comp. Rev. xxi. 23; xxii. 5). Hence continued day, or the absence of night, implies a constant state of quiet and happiness, undisturbed by the vicissitudes of peace and war. Night is also put, as in our own language, for a time of ignorance and helplessness (Mic. iii. 6). In John ix. 4 night represents death, a necessary result of the correlative usage which makes life a day.

NIGHTHAWK. [Tachmas.]

NILE [Egypt].

NIMRA [Beth-Nimra].

NIMROD (נמרד; Sept. Νεβρώδ; Josephus Νεβρώδης), a son of Cush, the eldest son of Ham (Gen. x. 8-10). Five sons of Cush are enumerated in verse 7 in the more usual manner of this chapter; but a change of phrase introduces Nimrod. This difference may indicate that while, in relation to the other five, the names have a national and geographical reference, this appellation is exclusively personal. It is strictly an abstract noun, signifying *contempt, rebellion, apostacy, impiety:* but 'it is not to be thought surprising, and it is a thing which, takes place in all languages, that a noun which in respect of its form, is properly an *abstract*, becomes in the use of speech a *concrete;* and conversely' (Gesenius, *Lehrgebäude*, p. 483). But such concretes usually carry a strengthened idea of the abstract, a kind of impersonation of the quality. Therefore Nimrod denotes intensively, *the extremely impious rebel.* Hence we conceive that it was not his original proper name, but was affixed to him afterwards, perhaps even after his death, as a characteristic appellative.

No other persons connected with this work must be considered as answerable for the opinion which the writer of this article thinks to rest upon probable grounds, that the earlier part of the book of Genesis consists of several independent and complete compositions, of the highest antiquity and authority, marked by some differences of style, and having clear indications of commencement in each instance. If this supposition be admitted, a reason presents itself for the citation of a proverbial phrase in ch. x. 9. The single instance of minute circumstantiality, in so brief a relation, seems to imply that the writer lived near the age of Nimrod, while his history was still a matter of traditional notoriety, and the comparison of any hero with him was a familiar form of speech. It is also supposed that those, not fragments, but complete, though short and separate compositions (of which eight or more are hypothetically enumerated in J. Pye Smith's *Scripture and Geology*, p. 202), were, under Divine authority, prefixed by Moses to his own history. Their series has a continuity generally, but not rigorously exact. If we place ourselves in such a point of time, suppose the age succeeding Nimrod, which might be the third century after the Deluge, we may see how naturally the origination of a common phrase would rise in the writer's mind; and that a motive of usefulness would be suggested with it. But both these ideas involve that of nearness to the time; a period in which the country traditions were yet fresh, and an elucidation of them would be acceptable and consonant to general feeling. An

apparently just reason thus accrues for the insertion of this little and insulated portion of personal history in the midst of a tablet of the descent of nations. A close translation of the whole passage is this: 'And Cush begat Nimrod: he began [החל opened a course of action, led the way] to being a hero in the earth [or in the land]: he was a hero at the chase in the presence of Jehovah; on which account the saying is, Like Nimrod, the hero of the chase, in the presence of Jehovah. And the chief [city] of his dominion was Babel; and [he founded] Ezek and Akkad, and Kalneh, in the land of Shinar.'

The common rendering, 'a mighty hunter,' is doubtless equivalent to this literal translation. The adjunct, 'in the presence of Jehovah,' occurs many times in the Hebrew Scriptures, and it generally conveys the idea of *favour* and *approbation*, as we in our language employ the word *countenance*. Hence some have supposed that here the expression is used in a *good* sense, and denotes that, by the special aid and blessing of God's providence, the bravery and skill of this hero were remarkably successful, in attacking and destroying the ferocious animals which had greatly multiplied. The Jewish commentator Abarbanel, with other Rabbinical writers, 'interpret those words favourably, saying that Nimrod was qualified by a peculiar dexterity and strength for the chace, and that he offered to God [portions] of the prey that he took; and several of the moderns are of opinion that this passage is not to be understood of his tyrannical oppressions, or of hunting of men, but of beasts' (*Ancient Univ. Hist.*, vol. i. p. 276, oct. ed.). Hence they have contended that we have no reason for regarding Nimrod as any other than a benefactor to his country, and, in that view, a man acceptable and well-pleasing to Jehovah.

But the general opinion is, that no moral approbation is implied, but only that, by his extraordinary possession of prowess, the gift of God, as is every natural talent, he became thus distinguished in clearing the country of wild beasts; and that these exploits led him to make aggressions upon men. Interpreters, with scarcely an exception, from the Septuagint and the Targums down to our own times, understand the whole case thus: that Nimrod was a man of vast bodily strength, and eminent for courage and skill in the arts of hunting down and capturing or killing the dangerous animals, which probably were both very numerous, and frequently of enormous size; that, by these recommendations, he made himself the favourite of bold and enterprising young men, who readily joined his hunting-expeditions; that hence he took encouragement to break the patriarchal union of venerable and peaceful subordination, to set himself up as a military chieftain, assailing and subduing men, training his adherents into formidable troops, by their aid subduing the inhabitants of Shinar and its neighbouring districts; and that, for consolidating and retaining his power, now become a despotism, he employed his subjects in building forts, which became towns and cities, that which was afterwards called Babel being the principal. Combining this with the contents of chapter xi., we infer that Nimrod either was an original party in the daring impiety of building the tower, or subsequently joined himself to those who had begun it. The former fact is positively affirmed by Josephus; but it is not probable that he could have any other evidence than that of the general interpretation of his countrymen. The late Mr. Rich, not thirty years ago, in the extensive plain where lie buried the ruins of Babylon, discovered the very remarkable mound with remains of buildings on its summit (of which see the figure in the article Babel, vol. i. p. 267, of this work), which even now bears the name of *Birs Nimrod:* and this may well be regarded as some confirmation of the common opinion. The precise meaning of the word *Birs* is said to be unknown; which seems to be a proof of high antiquity. There is only one other passage of the Old Testament in which Nimrod is mentioned, Micah v. 6, 'the land of Nimrod.' But it is not quite indubitable that these words refer to Babylon, though they may very properly be so construed; for it is possible, and agreeable to frequent usage, to take them as put in apposition with the preceding object of the action, 'the land of Assyria.' The repetition of the demonstrative particle אֵת adds something to the former of the two constructions, yet not decisively.

The two different translations of verse 11 have been stated and explained in the article Assyria, vol. i. p. 246. The translation there preferred, and which Bochart and many other high authorities have sanctioned, is, 'From that land he [Nimrod] went forth to Asshur, and builded Nineveh and Rehoboth city, and Calah, and Resen between Nineveh and Calah, that the great city.' As of the three last-named places we can find scarcely a vestige, or rather none at all, in the Scriptures or in profane authors, we seem to have here a proof of an antiquity far higher than the age of Moses—thus strengthening the idea of a collection, above mentioned. The annexed clause, 'That [or this] the great city' (we decline supplying the verb *is* or *was*, as we can have no authority for determining the tense) is most evidently, according to the use of the pronoun, to be referred to Resen, and not, as some have supposed, to the remoter object, Nineveh.

The writer of this article must acknowledge that he thinks the other rendering, taking Asshur for the name of the son of Shem (verse 22), is the more probable. His reasons are, (1.) The internal probability as arising from a remark made in the beginning of this article, that the whole chapter carries in itself moral evidence of having been written while many of the facts remained in the traditional memory of tribes and nations: thus this passage would give authentic confirmation to a matter of current belief. (2.) Had Asshur not been the nominative to the verb, but the name of the country, propriety would have required a preposition separate or prefixed, or the ה *directive* or *local* to be subjoined; as we find it in ch. xxv. 18—'in the going [*i. e.* on the road] to Asshur,' *Asshurah* (see ample and elucidatory proof of this usage in Ewald's *Gram.*, Nicholson's transl., § 420, and in Nordheimer's *Gram.* vol. i. § 642). We are aware of the objection, that this *He directive* is sometimes omitted; but, we reply, such omission is uncommon, and an instance cannot be found easily, if at all, of the omission when any importance attaches to the idea of local direction (see abund-

ant examples in Noldius's *Particul. Hebr.* p. 217). (3.) The translation for which we plead is the plain and natural one, the most obvious to both writer and reader; whereas the other is artificial and obscure: which would not therefore be likely to be adopted by a writer, such as this is, of extreme simplicity and straightforwardness. (4.) All the ancient versions, except the Targum of Onkelos (to which unquestionably great deference is due), adopt this construction.

The objections to this are, (1.) That it is out of place, and unnatural, to bring in any mention of another family, and that a circumstance which would have found its proper position in verse 22. To this objection we reply, that there are two links of association which would dictate the anticipative mention, the idea of building towns, which has this only place in the whole enumeration of descents from Noah's sons; and the fact that a son of Shem, having for some reason (probable, though we can only conjecture it), settled with his tribe among the Hamites, was, either by prospects of superior advantage, or by the jealousy and annoyance of Nimrod, induced to colonise another district. (2.) That, thus taken, the proposition comes naturally as the correlate of verse 10; the one laying down the commencement and chief seat of Nimrod's dominion, namely, Babel and its dependencies, and the other subjoining a secondary and subordinate annexation. To this we reply, that it is quite hypothetical, and that the flow of thought and connection is plain and natural upon the other interpretation. (3.) That, in Micah v. 6, Assyria is called 'the land of Nimrod.' The doubtfulness of this interpretation we have already shown. (4.) The learned Mr. Bochart even claims support from the lost writings of Ctesias, as cited by Diodorus the Sicilian; and he might have added Justin's *Epitome of Trogus*. Ctesias lived later than B.C. 400, and wrote histories of Assyria and Persia, of which some fragments, or rather abstracts, are in the collections of Photius. He professed to have derived his materials from ancient authorities in the respective countries; but he is declared by his contemporary Aristotle to be unworthy of any credit, by Plutarch to be frequently a liar, by Aulus Gellius to be a dealer in fables; and he is characterised by Joseph Scaliger as a petty and absurd writer, full of errors and direct falsehoods, and utterly worthless as an historical authority. Yet the utmost that can be derived from Ctesias is, that Ninus was the first king of the Assyrians, that he built Nineveh, calling it after his own name [suppose *Nin Navah*, 'town of Nin'], and that, after his death, his widow, Semiramis, founded, and carried to a great extent of magnificence, the city of Babylon. How precarious these premises are to support the conclusion, the studious reader will judge.

Mr. Bryant has discussed this question at large, and he gives the result thus: 'The chief objection made by these writers [Bochart, and Hyde in his *De Relig. Veterum Persarum*, &c.] to the common acceptation of the passage arises from this, that Asshur, they say, is here mentioned out of his place, which is the most frivolous and ill-grounded allegation that could be thought of. Nothing is more common with the sacred writers, in giving a list of people, than to introduce some little history of particular persons, as they mention them. The person here spoken of is Nimrod, of the line of Ham, who is mentioned as an extraordinary character. As he trespassed upon Asshur, and forced him to leave the land of Shinaar, his history is so blended with that of Asshur, that one could not be mentioned without the other. What is said is so far from being introduced out of its place, that nothing could come in more naturally, or with greater propriety. It was impossible to omit it without rendering the history defective. Nimrod was a bold and powerful man. He seized upon Babylon, and forced Asshur to leave that country; who went out of the land, and built Nineveh and other cities. This is the amount of it: and what can be more natural and proper?' (*Anc. Mythol.* vi. 192).

Concerning the subsequent life of Nimrod, the Scriptures give not the slightest information, nor even ground for conjecture. But, after seventeen or more centuries, a dubious and suppositious narrative got into credit, of which the earliest promoter that we know was Ctesias, but which, variously amplified, has been repeated by many compilers of ancient history down to our own times. Rollin, Shuckford, and Prideaux, seem to have given it a measure of credit. It is briefly to this effect:—Some make Nimrod to be Belus, and consider Nin (for *os* and *us* are only the Greek and Latin grammatical terminations) to have been his son: others identify Nimrod and Ninus. It is further narrated that Ninus, in confederacy with Aric, an Arabian sovereign, in seventeen years, spread his conquests over Mesopotamia, Media, and a large part of Armenia and other countries; that he married Semiramis, a warlike companion and continuatrix of his conquests, and the builder of Babylon; that their son Ninyas succeeded, and was followed by more than thirty sovereigns of the same family, he and all the rest being effeminate voluptuaries; that their indolent and licentious characters transmitted nothing to posterity; that the crown descended in this unworthy line one thousand three hundred and sixty years; that the last king of Assyria was Sardanapalus, proverbial for his luxury and dissipation; that his Median viceroy, Arbaces, with Belesis, a priest of Babylon, rebelled against him, took his capital Nineveh and destroyed it, according to the horrid practice of ancient conquerors, those pests of the earth, while the miserable Sardanapalus perished with his attendants by setting fire to his palace, in the ninth century before the Christian era.

That some portion of true history lies intermingled with error or fable in this legend, especially the concluding part of it, is probable. Mr. Bryant is of opinion that there are a few scattered notices of the Assyrians and their confederates and opponents in Eupolemus and other authors, of whom fragments are preserved by Eusebius; and in an obscure passage of Diodorus. To a part of this series, presenting a previous subjugation of some Canaanitish, of course Hamite nations, to the Assyrians, a revolt, and a reduction to the former vassalage, Mr. Bryant thinks that the very remarkable passage, Gen. xiv. 1-10, refers; and he supports his argument in an able manner by a variety of ethnological coincidences (*Anc. Mythol.*, vol. vi. pp. 195-208). But whatever we know with certainty of an Assyrian

monarchy commences with Pul, about B.C. 760; and we have then the succession in Tiglath-pileser, Shalmaneser, Sennacherib, and Esar-haddon. Under this last it is probable that the Assyrian kingdom was absorbed by the Chaldæo-Babylonian.

As a great part of the ancient mythology and idolatry arose from the histories of chiefs and sages, decorated with allegorical fables, it is by no means improbable that the life and actions of Nimrod gave occasion to stories of this kind. Hence, some have supposed him to have been signified by the Indian Bacchus, deriving that name from *Bar-Chus*, 'son of Cush:' and, it is probable, by the Persian giant *Gibber* (answering to the Hebrew *Gibbor*, 'mighty man,' 'hero,' in Gen. x. 8, 9): and by the Greek *Orion*, whose fame as a 'mighty hunter' is celebrated by Homer, in the *Odyssey*, xi. 571-4. The Persian and the Grecian fables are both represented by the well-known and magnificent constellation.—J. P. S.

NINEVEH, meaning the dwelling of Ninus; a famous city of the ancient world, capital of the great Assyrian empire, which stood on the eastern bank of the river Tigris, opposite to the present Mosul; its actual site being most probably the same with that of Nunia and the tomb of Jonah, about three-fourths of a mile from the river, in the midst of ruins, N. Lat. 36° 20′ 17″; E. L. 43° 10′ 17″. The name in Hebrew is נִינְוֵה; in the Greek of the Septuagint, Νινευΐ, Νινευή; in ordinary Greek, Νῖνος; Latin, *Ninus* (Joseph. *Antiq.* i. 6. 4; ix. 11. 3). The Bible makes the city a sort of colony from Babylon or Babel, Shinar [see BABEL], stating (Gen. x. 11), 'out of that land (Babel, &c., in the land of Shinar) went forth Asshur and builded Nineveh.' After this simple statement the sacred record is for a long time entirely silent respecting Nineveh, which, we may therefore presume, remained inconsiderable for many generations. At length, some fifteen hundred years after the first mention of the place, in the days of Jeroboam II., king of Israel (B.C. 825), Nineveh again enters by name on the biblical record, having meanwhile grown into a mighty power. This re-appearance of Nineveh is accidental, and shows that the Bible does not profess to give any orderly and systematic history of the world. Other countries come on the scene and disappear, just as the course of events in the kingdoms of Judah and Israel seems to require or may chance to occasion. Nineveh is described in the book of Jonah as 'that great city,' 'an exceeding great city of three days' journey,' probably in a straight line through the place, as the large cities of Asia stood on a great extent of country, having gardens, and even fields, in the midst of them; and Jonah is said to 'enter into the city a day's journey' (ch. iii. 4) before he began to foretell its overthrow; that is, as is most likely, he penetrated into the heart of the place, as being that which was most suitable for delivering his burden. The magnitude of the place may also be gathered from what is said in the last verse of the book: 'That great city, wherein are more than six score thousand persons that cannot discern between their right hand and their left hand, and also much cattle' (grazing). The population of a place must have been immense in which there were no fewer than 120,000 children — young children the language employed seems to denote. It also appears from the same book that the state of society was highly complex, organized in divers ranks from the king and the noble to the peasant; and, if we may argue from the exactness with which the number of children is given, we should be justified in asserting that the people were in an advanced stage of civilization, seeing that their social statistics were well attended to and carefully preserved. Civilization, however, had brought luxury, and luxury corruption of morals, for 'their wickedness had gone up before God' (ch. i. 2). Yet was not their iniquity of the lowest kind, for the Ninevites repented at the preaching of Jonah. In contemplating the dim shade of this immense city and powerful empire, and being made sensible that our sole means of acquiring the little we know about it is furnished by a few pages connected with a seer of the insignificant kingdom of Israel, we cannot fail to be surprised, nor to ask how it is that the records of Nineveh itself have perished, and that almost its only memorial is found among a petty and despised people? If the memorials of those great empires of ancient days have perished, and we owe our knowledge of them mainly to the Hebrew race, why did not these Hebrew records perish too? That which preserved them must have been an influence no less potent than peculiar. The sacred writings of the Hebrews were carefully preserved. This answer is not sufficient. What nation, having records, did not keep them with care? A special value must have been attached to the Hebrew memorials, otherwise so special and effectual a care would not have been bestowed on them. But a special value implies a special worth; and we are thus led to recognise the peculiar character of these written documents, namely, that they were true and divine.

A few years later we find the prophet Nahum entrusted with 'the burden of Nineveh.' From this book it would appear that the repentance of the city, if sincere, was not durable. Therefore was the anger of Jehovah about to fall upon it and make it a perpetual waste. Expressions that are employed tend to give a high idea of the size and splendour of the place: it had many strong holds, and many gates with bars, probably of brass; its inhabitants were 'many as the locust;' it had multiplied its merchants above the stars of heaven; its crowned (princes) were as the locusts, and its captains as the great grasshoppers (ch. iii. 12-17). So her wealth was prodigious: 'There is none end of the store and glory out of all the pleasant furniture.' The reason assigned for the destruction of the city shows how great was its wickedness: 'Out of the house of thy gods will I cut off the graven image and the molten image; I will make thy grave; for thou art vile' (ch. i. 14). 'Woe to the bloody city! It is all full of lies and robbery' (ch. iii. 1). Shortly after (B.C. 713) the delivery of this prophecy Sennacherib, king of Assyria, having invaded Judæa, suffered a signal defeat by the special act of God: 'So Sennacherib departed, and went and returned and dwelt at Nineveh' (2 Kings xix. 36). Very brief, however, was his dwelling there, for as he was worshipping in the house of Nisroch his god, Adrammelech and Sharezer, his sons, smote him with the sword; and Esarhaddon, his son, reigned in his stead (2 Kings xix. 37). The predicted punishment of

the city was now approaching. Zephaniah also gave his authority that it would come (ch. ii. 13). See also Isa. xiv. 24, sq.: 'The Lord will stretch out his hand against the north and destroy Assyria, and will make Nineveh a desolation, and dry like a wilderness.' The language which immediately ensues goes to confirm the view which has been given of the commercial greatness (it was the entrepôt for the trade of Eastern and Western Asia), the surpassing opulence, the high culture, the immense population, and the deep criminality of the city of Nineveh. For the account of the destruction of the city we must look beyond the Bible documents; but a description of what the place was before its overthrow, conceived in the finest style of Eastern poetry, and adorned with the most splendid imagery—a description which exhibits in the most striking and interesting manner the greatness of its dominion and the grandeur of its state—may be found in Ezekiel xxxi.

The scattered notices of Nineveh found in profane authors agree substantially with the Scriptural account. The phrase, 'that great city' (Jonah i. 2), which seems in the Bible to be employed as its customary appellation, is found applied to Nineveh (*Νῖνος μεγάλη*) in a poetic fragment preserved by Diodorus Sic. (ii. 23); so that the epithet would appear to be one by which the city was ordinarily and generally characterized. Its greatness was such that it was denominated 'the Great.' What, however, is most important and interesting is the agreement in so minute a particular of the sacred and the profane authorities. From Strabo (xvi. p. 737), the place appears to have been much greater than even Babylon; and from Diodorus Sic. (ii. 3), that it measured 480 stadia in circumference, having very high and broad walls, which, aided by the river, rendered it impregnable. This safety was, however, merely imaginary. Sardanapalus, who had a full share of the vices of his subjects, endured in the eighth century before Christ a siege of three years' duration at the hands of the Medes, under Arbaces, which led to the overthrow of the city (Diod. Sic. ii. 26). But so large and so powerful a capital was not easily destroyed. Nineveh was the seat of an Assyrian kingdom till the year B.C. 625, when it was taken by Nabopolassar of Babylon, and Cyaxares, king of the Medes, which led to the destruction of the Assyrian kingdom (Herod. i. 106). Nineveh flourished no more. Strabo (xvi. p. 737) represents it as lying waste; though in the times of the Roman emperors some remains of it seem to have survived, as a Nineveh on the Tigris is mentioned in Tacitus (*Annal.* xii. 13), and is characterized as a *castellum*, or fort, probably some small fortification raised out of the ruins of the city for predatory purposes. Something of the kind was found there at a later period, for in the thirteenth century Abulfaragius (*Hist. Dynast.* p. 404; Barhebræus, *Chron.* p. 464) makes mention of a *castellum* there.

449. [Nineveh.]

The tradition given by Herodotus (i. 185), that its founder's name was Ninus, disagrees with the Biblical statement, which is that the city was built by Asshur, and may be nothing more than a repetition of the practice so common with the Greeks and Latins, of making founders for cities from the names which the places bear.

The present remains comprise a rampart and fosse, four miles in circuit, with a counterscarped wall about twenty feet in height. The ruins at first sight present a range of hills. From these hills large stones are constantly dug out, from which probably a bridge over the Tigris has been built.

Jonah's connection with the city is still preserved in a tomb which bears his name; but how

far back in antiquity this building runs, it is now impossible to say. The tomb stands on a hill, and is covered by a mosque which is held in great veneration. Bricks, partly whole, partly in fragments, and pieces of gypsum with inscriptions in the arrow-head character, are found from time to time. Landseer, in his *Sabæan Researches*, gives an engraving of cylinders dug up at Nineveh, which he states to be numerous in the East, and supposes to have been employed as signets: they are of jasper, chalcedony, and jade, and bear astronomical emblems, the graving of which, especially considering the hardness of the materials, shows a high state of art.

Mosul, with which Nineveh is commonly identified, stands on the opposite, or western bank of the Tigris, and lies so near the river that its streets are often flooded—a circumstance which calls to mind some of the terms employed by the prophetic writers before referred to. This place, like its great prototype, carries on a trade (though to a small extent) between the East and the West. The climate is stated to be very healthy; the average temperature of summer not exceeding 66° Fahr.; but in spring, during the floods, epidemics are common, though not fatal.

See Niebuhr, *Reiseb.* ii. 353, 368; Ives, *Voyage*, p. 327, seq.; Rosenmüller, *Alterth.* i. 2,116; Bruns, *Erdbeschreibung*, ii. 1, 199, sq.; Mannert, v. 440, sq.; Kinneir's *Persia*, 256-9; Olivier, *Voyage en Turquie*, iv. 265; Ainsworth's *Assyria*, p. 256.—J. R. B.

NISAN (נִיסָן), the first month of the Hebrew civil year. The name, if Semitic, might be traced to נֵץ *netz*, 'a flower,' and would hence mean 'flower-month,' like the Floreal of republican France. As, however, this is a later name, posterior to the Captivity (Neh. ii. 1; Esther iii. 7), of the month which was originally called אָבִיב *Abib*, Gesenius is inclined to follow Benfey in seeking a Persian origin for the word, and finds it in the Zend *Navaçan*, 'new day,' made up of *nav*, 'new,' and *açan*, equivalent to the Sanscrit *ahan*, 'day.' Abib, by which name this month is called in the Pentateuch (Exod. xiii. 4; xxiii. 15; Deut. xvi. 1), means an ear of grain, a green ear; and hence 'the month Abib,' is 'the month of green ears.' It thus denoted the condition of the barley in the climate of Egypt and Palestine in this month. Nisan, otherwise Abib, began with the new moon of April, or according to the Rabbins, of March [Month].

NISROCH (נִסְרֹךְ; Sept. Μασαράχ), an idol of the Ninevites (2 Kings xix. 37; Isa. xxxvii. 38). The word is now usually supposed to mean 'great eagle,' from נֶשֶׁר, Arab. نسر, *eagle*, and the syllable *och*, *ach*, which in Persian is intensitive. This bird was held in peculiar veneration by the ancient Persians; and was likewise worshipped by the Arabs before the time of Mohammed. (Jurieu, *Hist. des Dogmes*, iv. 4, ch. 11; Creuzer, *Symbolik*, i. 723; Gesen. *Thesaur.* p. 892, where also may be seen several derivations proposed by Bohlen from the Sanscrit and Zend).

NITRE. [Neter.]

NO, or NO-AMMON [Thebes].

NOAH, the second father of the human race, was the son of the second Lamech, the grandson of Methuselah, and the tenth in descent from Adam. Methuselah, who died at the age of 969, was the longest lived of the patriarchs, and probably of all mankind. The genealogy is in the line of Seth, who is distinguished in the history (Gen. iv. 26) by an interposed observation, that in or about his 105th year 'a beginning was made for calling by the name of Jehovah;' or 'a beginning was made for calling upon the name of Jehovah;' or 'profanation was committed for calling the name of Jehovah,' *i. e.* applying the divine name to other objects. This diversity of renderings may seem very extraordinary; but it is to be considered—(1), that the parenthetic character of the sentence and its extreme brevity preclude our receiving aid, except inferentially, from the connection; (2), that the verb חלל appears not merely to diverge from one primary meaning into several significations, differing from each other, yet capable of being derived, in different lines of associated thought, from the primary (which is very much the case in the Hebrew and its allied languages); but that it belongs to the class of words, instances of which are probably to be found in all languages, alike in sound or in spelling, or even in both, but most widely different in meaning, and often in derivation, and therefore each entitled to be considered as a separate verb, having grown from a different radical, probably lost. Dr. Julius Fürst, in his very judicious and philosophical *Lexicography*, incorporated in his edition of Buxtorf's *Concordance* (Leipzig, 1840), makes of חלל four independent verbs, having the several meanings of—to *pierce*, to *turn* an object *from a holy use* to something wicked, to *begin*, and to *whirl round*. The question here lies between the second and the third of these senses. (3) That the frequent Hebrew phrase *to call*, connected by a preposition, especially ל for אל, with the noun for *name*, sometimes signifies *to apply* a name to an object merely, and sometimes to do so as an act of *religious* homage.

Thus the English reader sees the grounds of the difficulty; and so great is that difficulty on every side as to have compelled the illustrious Hebraist John Drusius to say, 'Long has this passage kept me on the rack, and so it does still;' and, after an able investigation, he concludes, yet not confidently, in favour of that sense which we have put the second. The earliest interpretation, that of the Septuagint, seems to have been formed upon a wrong reading, and few or none regard it as entitled to acceptance. The next in antiquity is the Targum (Chaldee Paraphrase) of Onkelos, attributed to the first century of the Christian era; it gives the passage, 'Thus, in his days, the sons of men set aside earnest supplication in the name of Jeja.' The Syriac has, 'Then he began to call upon the name of the Lord.' The Latin of Jerome is the same, both making Enos the agent of the verb. But St. Jerome, in his *Quæstiones in Genesim*, gives this translation and remark: '"Then was the beginning of calling upon the name of the Lord;" yet many of the Hebrews prefer a different meaning—that then first idols were fabricated in the name of the Lord and in his likeness.'

Of these interpretations we own that the first most commends itself to our judgment; yielding the sense that, in consequence of the awful in-

crease of wickedness, the true worshippers of God then began to be distinguished by the appellation *sons of God*. Thus the clause stands in an illustrative connection with its proper sequel, Gen. vi. 1; for ch. v. is an insulated part, which, in the modern way of composition, would be a genealogical table. This was the interpretation of Aquila in the second century; it is intimated in the margin of our common version, and is adopted by Piscator in both his Latin and his German versions; by Diodati in his Italian, by Hackspan, by Leclerc (1696), by Bishop Patrick, by Wells (1724), by Dereser (in Brentano's Bible, 1820), by Romanus Teller (1749), by Boothroyd, by Leander van Ess, and no doubt by many others. Dereser's note deserves to be cited: 'Some pious families began to call themselves *sons* (in the Hebrew idiom equivalent to disciples, learners) *of God*, in order to distinguish themselves from the *sons of men*, those who disregarded the instructions of divine authority, and gave themselves up to wickedness.' Wells's paraphrase is also excellent. Shuckford gives his sanction to this interpretation. Yet the second has great weight of both reason and authority in its favour, and probably the majority of expositors have sanctioned it. None have expressed it better than Bishop Alleigh, in the *Bishops' Bible* (1568): 'Then began men to make invocation in the name of the Lord.' It possesses a strong recommendation in that the most usual signification of *to call upon in the name of the Lord*, in the Old Testament, is to perform a solemn act of worship. 'Moses is presenting to us the piety of one family which worshipped God in purity and holiness when religion was almost universally corrupted and collapsed' (Calvin). 'Religious worship began to be celebrated with greater life and energy, and more publicly, than had before been' (Jas. Cappell, Willett, &c.).

The third interpretation, first found in Onkelos, and apparently implied in the *Antiquities* of Josephus, was maintained by Maimonides, Jarchi, and other Jewish interpreters, and adopted by our illustrious Selden, and by Antony van Dale. But it can scarcely be made to harmonize with the prefix ל before the second verb, which, it is observed by Theodore Hackspan (whose eminence in the niceties of Hebrew and all other Shemitic literature was considered as without a parallel in the former half of the seventeenth century), determines the sense of the antecedent verb to the idea of *beginning*.

The father of Noah must not be confounded with the Lamech who was the fourth in descent from Cain. There is another instance of the same name in each line, Enoch; but the periods of each of the two couples must have been very different, though we cannot exactly compare them, for the history does not give the years of life in the line of Cain. The two Lamechs, however, have one remarkable circumstance in common; to each of them a fragment of inartificial poetry is attached as his own composition. That of the Cainitic Lamech is in Gen. iv. 23, 24. That of the Sethite now comes before us in ch. v. 28, 29:—'Lamech lived 182 years, and then begat a son, and he called his name Noah. saying,

This shall comfort us
From our labour,
And from the sorrowful toils of our hands;
From the ground,
Which Jehovah hath cursed.'

The allusion is undoubtedly to the penal consequences of the fall in earthly toils and sufferings, and to the hope of a Deliverer excited by the promise made to Eve. That this expectation was grounded upon a divine communication we infer from the importance attached to it, and the confidence of its expression. See this subject well argued in Bishop Sherlock's *Use and Intent of Prophecy*, Disc. iv.

That the conduct of Noah corresponded to the faith and hope of his father we have no reason to doubt. The brevity of the history satisfies not human curiosity. He was born six hundred years before the Deluge. We may reasonably suppose that through that period he maintained the character given of him:—'Noah found favour in the eyes of the Lord. Noah was a just man, and perfect in his generations. Noah walked with God' (ch. vi. 8, 9). These words declare his piety, sincerity, and integrity, that he maintained habitual communion with the Father of Mercies, by the exercises of devotion, and that he was an inspired instrument of conveying the will of God to mankind. The wickedness of the human race had long called upon the wisdom and justice of God for some signal display of his displeasure, as a measure of righteous government and an example to future ages. For a long time, probably many centuries, the better part of men, the descendants of Seth, had kept themselves from society with the families of the Cainite race. The former class had become designated as 'the sons of God,' faithful and obedient: the latter were called by a term evidently designed to form an appellation of the contrary import, 'daughters of men,' of impious and licentious men. These women possessed beauty and blandishments, by which they won the affections of unwary men, and intermarriages upon a great scale took place. As is usual in such alliances, the worse part gained the ascendancy. The offspring became more depraved than the parents, and a universal corruption of minds and morals took place. Many of them became 'giants, the mighty men of old, men of renown' (נפלים *nephilim*) apostates (as the word implies), heroes, warriors, plunderers, 'filling the earth with violence.' God mercifully afforded a respite of one hundred and twenty years (ch. vi. 3; 1 Pet. iii. 20; 2 Pet. ii. 5), during which Noah sought to work salutary impressions upon their minds, and to bring them to repentance. Thus he was 'a preacher of righteousness,' exercising faith in the testimony of God, moved with holy reverence, obeying the divine commands, and, by the contrast of his conduct, condemning the world (Heb. xi. 7): and probably he had during a long previous period laboured in that benevolent and pious work.

At last the threatening was fulfilled. All human kind perished in the waters, except this eminently favoured and righteous man, with his three sons (born about a hundred years before) and the four wives [Deluge].

At the appointed time this terrible state of the earth ceased, and a new surface was disclosed for the occupation and industry of the delivered

family. In some places that surface would be washed bare to the naked rock, in others sand would be deposited, which would be long uncultivable; but by far the larger portion would be covered with rich soil. With agriculture and its allied arts the antediluvians must have been well acquainted [ADAM]. The four men, in the vigour of their mental faculties and bodily strength, according to the then existing scale of human life, would be at no loss for the profitable application of their powers. Immediately after the desolating judgment the merciful Jehovah gave intimations of his acceptance of the sacrifice and thanksgivings of Noah and his family, and of his gracious purposes revealed in the form of a solemn covenant for the continual benefit of them and their posterity. The beautiful phenomenon of the rainbow was put to a new and significant use. As infallibly certain as is the production of a rainbow under certain conditions of the atmosphere, so certain and sure of fulfilment are the promises of Jehovah. The act of grace is announced in the condescending language which was best adapted to the earliest condition of human thought [ANTHROPOMORPHISM]. 'The Lord smelled a sweet odour; and the Lord said to his heart, I will not add to inflict a malediction further upon the ground on account of man' (Gen. viii. 21). 'That old curse,' says Bishop Sherlock, 'was fully executed and accomplished in the flood. In consequence of which discharge from the curse a NEW blessing is immediately pronounced upon the earth' (*Use and Int.* p. 89). Noah and his children would labour the more assiduously from the consolation and hope thus inspired. Accordingly, in a subsequent part of the narrative, we read, 'And Noah began, a man of the ground' (ch. ix. 20), *i. e.* set diligently to his welcome labour, the sorrow being mitigated, the prospect encouraging, and the assurance of success given by divine promise. The simple phrase comprehends the continuity of action, the formation and prosecution of habit. It is added, 'And he planted a vineyard.' Dr. Dereser thinks that the two members of the sentence should be connected, producing this translation, 'And Noah, in his field-work, commenced the planting of a vineyard.' The narrative makes it evident that the occurrence next mentioned, the invention of wine-making, must have been some years after the cessation of the flood; for not Ham himself, but Canaan his son, is the first and emphatic object of the prophetic curse. We cannot with reason assume less than fifteen or eighteen years. We are thus led to the idea that agricultural processes were improved, and produce augmented in variety and in quality. The vine had existed before the flood, and Noah could not be unacquainted with it; but not till now had grapes been grown of such size, sweetness, and abundance of juice, as to strike out the thought of expressing that juice, and reserving it in a vessel for future use. Noah, we think it probable, knew not that, in a few days, it would ferment and acquire new and surprising properties. Innocently and without suspicion he drank of the alluring beverage, as if it had been water from the spring. The consequence is recorded in the characteristic simplicity of style which affirms neither censure nor apology. We regard that consequence as not a sinful intoxication, both from what was probably the occasional cause, and from the immediate agency of the Spirit of God in communicating prophecy. The latter, indeed, is not an impregnable ground; for bad men might receive gifts of inspiration, as Balaam and Judas; but Noah was eminently a righteous and perfect man, and it is inconceivable that a miraculous influence of God should be granted in immediate contiguity with a sinful action.

That prophetic denunciation is the last recorded fact of the life of Noah, though he lived through the subsequent period of 350 years. It is a prophecy of the most remarkable character, having been delivered in the infancy of mankind; in its undeniable fulfilment reaching through more than 4000 years down to our own time; and being even now in a visible course of fulfilment. It seems more strictly correct in philology, and more in accordance with fact, to render it as a prophecy, than as precatory of malediction and blessing. We give it in the closest version.

'Accursed Canaan!
A slave of slaves he will be to his brethren.
Blessed Jehovah, God of Shem!
And Canaan will be slave to him.
God will make Japheth to spread abroad,
And he will inhabit the tents of Shem,
And Canaan will be slave to him.'

The first part of this prediction implies that, in some way, the conduct of Canaan was more offensive than even that of his father Ham. The English reader will perceive the peculiar allusion or alliteration of the third member, when he is informed that the name Japheth comes from a verb, the radical idea of which is *opening, widening, expansion*. In two ways one might imitate it; by translating both the words, or by coining a verb; thus, 1, God will enlarge the enlarger; or, 2, God will japhethize Japheth. The whole paragraph, short as it is, contains a *germ* which, like the acorn to the oak, comprehends the spirit of the respective histories of the three great branches of mankind. The next chapter presents to us the incipient unfolding of the prophecy. See the article NATIONS, DISPERSION OF.

'God will give to Japheth an abundant posterity, which will spread itself into different regions, and will dwell among the posterity of Shem; and Canaan's posterity will be compelled to be slaves to that of Japheth. The following chapter shows how this prophecy has been fulfilled. The descendants of Japheth peopled Europe, the northern parts of Asia, Asia Minor, Media, Iberia, Armenia, the countries between the Black Sea and the Caspian, Great Tartary, India, China, the European settlements in America, and probably America itself. They also inhabit in part the more southerly parts of Asia, mingling freely with the posterity of Shem, who chiefly peopled those regions. On the other hand, Africa, which was peopled by the descendants of Canaan and [other sons of] Ham, was conquered and brought under the yoke by the Romans, descendants of Japheth.' [This applies only to the Carthaginians and settlers in other districts along the north coast of Africa, which had been peopled by the Phœnicians and other Canaanitish tribes. We have not the shadow of authority for deriving the negro tribes, or any of the nations of Medial and South Africa, from Canaan.] 'Down to our own

times Africa has been to all other nations the source of the supply of slaves' (Dereser, in the Roman Catholic *Germ. Transl.* of the *Bible*, by him, Brentano, and Scholz, 17 vols. Francf. 1820-1833): an excellent version, made from the Hebrew and Greek.

It is an old tradition of the Rabbinical Jews, on which they lay great stress, that at this juncture Noah delivered to his children seven precepts, to be enjoined upon all their descendants. These prohibit, 1, idolatry; 2, irreverence to the Deity; 3, homicide; 4, unchastity; 5, fraud and plundering; the 6th enjoins government and obedience; and the 7th forbids to eat any part of an animal still living. Mr. Selden has largely illustrated these precepts, and regards them as a concise tablet of the Law of Nature (*De Jure Nat. et Gent. juxta Disciplin. Ebræorum*), which excellent work of 900 pages is taken up in commenting upon them. Though we have no positive evidence of their having been formally enjoined by the great patriarch, we can have no great reason for rejecting such an hypothesis.

After this event, we have in the Scriptures no further account of Noah, than that 'all his days were nine hundred and fifty years; and he died.' That he had no more children is evident from the nature of the case, notwithstanding the antediluvian longevity, from the impossibility of his having a second wife without horrid incest, which surely no man of sound mind can impute to him, and from the absence of the constant clause of ch. v., which would naturally have come after the 28th verse of ch. ix., 'and begat sons and daughters.' Mr. Shuckford regards this absence of any mention of Noah, as 'a strong intimation that he neither came with the travellers to Shinaar, nor was settled in Armenia or Mesopotamia, or any of the adjacent countries. He was alive a great while after the confusion of Babel, for he lived 350 years after the flood; and surely, if he had come to Babel, or lived in any of the nations into which mankind were dispersed from thence, a person of such eminence could not at once sink to nothing, and be no more mentioned than if he had not been at all' (*Connect.* i. 99) But it must be confessed that the argument from silence, however strong it may appear in this case, is not decisive. The narratives of the Bible are not to be judged of by the common and just rules of writing history. Those narratives are not, properly speaking, a history, but are a collection of such anecdotes and detached facts as the Spirit of holiness and wisdom determined to be the most practically proper for the religious and moral instruction of all sorts of men. The Bible was written for children and poor peasants, as well as for scholars and philosophers. That learned and judicious author supposes that Noah migrated far into the East, and that the Chinese mean no other than him when their traditions assign Fohi as their first king, having no father, *i. e.* none recorded in their legends; to whom also they attribute several actions and circumstances which appear to be derived by disguisement from the real facts recorded in our sacred book of Genesis. One in particular is in connection with a universal deluge; and this is mentioned also by Sir William Jones, who says, 'the great progenitor of the Chinese is named by them Fohi,' and that 'the earth's being wholly covered with water just preceded the appearance of Fohi on the mountains of Chin' (*Works*, iii. 151-5). It may be very rationally conceived that Noah remained long in the neighbourhood of his descent from the ark; and that, at last, weighty reasons might induce him, with a sufficient number of associates, grandchildren and great-grandchildren, who would be born in some 80 or 100 years, to migrate far to the East.

Sir William Jones, also, is evidently inclined to think the seventh Menu of the Hindoos, connected in their ancient books with a universal deluge, to be no other than a legendary representation of Noah. The very name is, indeed, identical, *Me Nuh*, the *M* being a common Oriental prefix, and *Nuh* is Noah without the points.

As the flood affected equally the common ancestry of mankind, all nations that have not sunk into the lowest barbarism would be likely to preserve the memory of the chief person connected with it; and it would be a natural fallacy that every people should attach to itself a principal interest in that catastrophe, and regard that chief person as the founder of their own nation and belonging to their own locality. Hence we can well account for the traditions of so many peoples upon this capital fact of ancient history, and the chief person in it;—the *Xisuthrus* of the Chaldæans, with whom is associated a remarkable number of precise circumstances, corresponding to the Mosaic narrative (Alex. Polyhist. in the *Chronicle of Eusebius*, so happily recovered by Mr. Zohrab, in the Armenian version, and published by him in 1818); the Phrygian *Noë* of the celebrated Apamean medal, which, besides Noah and his wife with an ark, presents a raven, and a dove with an olive-branch in its mouth (figured in Bryant's *Anc. Myth.* vol. iii.); the *Manes* of the Lydians (Mr. W. J. Hamilton's *Asia Min.* iii. 383, [Nations, Dispersion of]; the *Deucalion* of the Syrians and the Greeks, of whose deluge the account given by Lucian is a copy almost exactly circumstantial of that in the book of Genesis (*Dea Syria;* Luciani *Opp.* iii. 457, ed. Reitz; Bryant, iii. 28); the many coincidences in the Greek mythology in respect of Saturn, Janus, and Bacchus; the traditions of the aboriginal Americans, as stated by Clavigero, in his *History of Mexico;* and many others.—J. P. S.

NOB (נֹב; Sept. Νομβᾶ), a city of Benjamin, in the vicinity of Jerusalem, belonging to the priests, and where the tabernacle was stationed in the time of Saul (1 Sam. xxi. 2; xxii. 9, 11, 19; Neh. xi. 32; Isa. x. 32. From the last of these texts it would appear that Jerusalem was visible from Nob, which, therefore, must have been situated somewhere upon the ridge of the Mount of Olives, north-east of the city. Dr. Robinson states that he diligently sought along the ridge for some traces of an ancient site, which might be regarded as that of Nob, but without the slightest success (*Bibl. Researches*, ii. 150).

NOBLEMAN. The word so rendered in John iv. 46 is βασιλικός, which is somewhat various in signification. It may mean: 1. *A rege oriundus*, descended from a king. 2. ὑπηρέτης τοῦ βασιλέως, one belonging to the court. 3. στρατιώτης βασιλέως, a soldier of the king, in which latter sense it often occurs in Josephus. The second signification seems, however, to be the prevalent one; and the Greek interpreters are also favourably inclined towards it.

Münter found it likewise in inscriptions. The Syriac has here, 'a royal servant;' the Ethiopic, 'a royal house-servant.' This person was, therefore, probably of the court of Herod Antipas, who reigned over Galilee and Peræa (Tholuck, *Commentar zum Johan.* iv. 46).

NOD (נוֹד; Sept. Ναΐδ), the land to which Cain withdrew, and in which he appears to have settled (Gen. iv. 16). While the site of Paradise itself remains undetermined, it is useless to seek for that of the land of Nod. This land, wherever it was, could not have had a name till Cain went to it; and it was doubtless called Nod (which signifies *flight, wandering*), from the circumstance that Cain fled to it.

NOPH [Memphis].

NOPHECH (נֹפֶךְ), a precious stone, named in Exod. xxviii. 18; xxxix. 11; Ezek. xxvii. 16; xxviii. 13; in all which places it is rendered 'Emerald' in the Authorised Version. The Sept. and Josephus render it by ἄνθραξ, or carbuncle. This name, denoting a live coal, the ancients gave to several glowing red stones resembling live coals (*a similitudine ignium appellati*, Plin. *Hist. Nat.* xxxii. 25; comp. Theophrast. *De Lapid.* 18), particularly rubies and garnets. The most valued of the carbuncles seems, however, to have been the Oriental garnet, a transparent red stone, with a violet shade, and strong vitreous lustre. It was engraved upon (Theophrast., 31), and was probably not so hard as the ruby, which, indeed, is the most beautiful and costly of the precious stones of a red colour, but is so hard that it cannot easily be subjected to the graving-tool. The Hebrew *nophech*, in the breastplate of the high-priest, was certainly an engraved stone; and there is no evidence that the ancients could engrave the ruby, although this has in modern times been accomplished. Upon the whole, the particular kind of stone denoted by the Hebrew word must be regarded as uncertain (Rosenmüller, *Biblical Mineralogy*, pp. 32, 33; Winer's *Real-wörterbuch*, art. 'Edelsteine;' Braunius, *De Vest. Sacerdot.* p. 523; Bellermann, *Ueber die Urim, u. Thummim*, p. 43).

NORTH (צָפוֹן; Sept. βορρᾶς; Vulg. *Septentrio*, &c.). The Shemite, in speaking of the quarters of the heavens and of the earth, supposes his face turned towards the east, so that the east is before him, the west behind, the south on the right hand, and the north on the left. Hence the words which signify east, west, north, and south, signify also that which is before, behind, on the right hand, and on the left. Thus Aquila renders the words, 'the north and the south' (Ps. lxxxix. 12), βορρᾶν καὶ δεξιάν, the 'north and the right hand.' The Hebrew word, translated north, occurs in the five following senses: 1. It denotes a quarter of the heavens; 2. of the earth; 3. a north aspect or direction; 4. it is the conventional name for certain countries irrespectively of their true geographical situation; and, 5. it indicates the north wind. 1. It denotes a particular quarter of the heavens; thus, 'fair weather cometh out of the north' (Job xxxvii. 22); literally, 'gold cometh,' which Gesenius understands figuratively, as meaning the golden splendour (of the firmament), and compares Zech. iv. 12, 'gold-coloured oil.' The Sept. somewhat favours this idea—ἀπὸ βορρᾶ νέφη χρυσαυγοῦντα, 'the cloud having the lustre of gold,' which perhaps corresponds with the χρυσωπὸς αἰθήρ, the gilded æther, or sky, of an old Greek tragedian, quoted by Grotius. The same Hebrew word seems used poetically for the whole heaven in the following passage: 'He stretcheth out the north (literally the concealed, dark place), (like πρὸς ζόφον, in Homer) over the empty place' (Job xxvi. 7; Sept. ἐπ' οὐδέν). Hence the meaning, probably is, that the north wind clears the sky of clouds; which agrees with the fact in Palestine, to which Solomon thus alludes, 'The north wind driveth away rain' (Prov. xxv. 23). Homer styles it αἰθρηγενέτης, 'producing clear weather' (*Il.* xv. 171; *Od.* v. 296). Josephus calls it αἰθριώτατος, 'that wind which most produces clear weather' (*Antiq.* xv. 9. 6); and Hesychius, ἐπιδέξιος, or 'auspicious'; and see the remarkable rendering of the Sept. in Prov. xxvii. 16. In the words, 'cold weather cometh out of the north' (Job xxxvii. 9), the word rendered 'north' is מְזָרִים *mezarim*, which Gesenius understands to mean literally 'the scattering,' and to be a poetical term for the north winds, which scatter the clouds and bring severe cold. He, therefore, with Cocceius and Schultens, approves of Kimchi's rendering of the phrase by 'venti flantes et dispergentes.' By some a northern star is here understood: the Vulgate has *arcturus;* the Sept. ἀκρωτήρια (perhaps to be read ἀρκτῷα or ἀρκτοῦρος); while others, as Aben-Ezra, and after him Michaelis, regard *Mezarim* in this text as the same with the constellation denoted elsewhere by *mazzaroth* (Job xxxviii. 22), and *mazzaloth* (2 Kings xxiii. 5).

The word צָפוֹן occurs also in the same sense in the following passages: 'the wind turneth about to the north' (Eccles. i. 6); 'a whirlwind out of the north' (Ezek. i. 4). 2. It means a quarter of the earth (Ps. cvii. 3; Isa. xliii. 6; Ezek. xx. 47; xxxii. 30; comp. Luke xiii. 29). 3. It occurs in the sense of a northern aspect or direction, &c.; thus, 'looking north' (1 Kings vii. 25; 1 Chron. ix. 24; Num. xxxiv. 7); on 'the north side' (Ps. xlviii. 2; Ezek. viii. 14; xl. 44; comp. Rev. xxi. 13). 4. It seems used as the conventional name for certain countries, irrespectively of their true geographical situation, namely, Babylonia, Chaldæa, Assyria, and Media, which are constantly represented as being to the north of Judæa, though some of them lay rather to the east of Palestine. Thus Assyria is called the north (Zeph. ii. 13), and Babylonia (Jer. i. 14; xlvi. 6, 10, 20, 24; Ezek. xxvi. 7; Judith xvi. 4). The origin of this use of the word is supposed to be found in the fact that the kings of most of these countries, avoiding the deserts, used to invade Judæa chiefly on the north side, by way of Damascus and Syria. Thus also, the kings of the north that were 'near,' may mean the kings of Syria, and 'those that are afar off,' the Hyrcanians and Bactrians, &c., who are reckoned by Xenophon among the peoples that were subjected or oppressed by the king of Babylon, and perhaps others besides of the neighbouring nations that were compelled to submit to the Babylonish yoke (Jer. xxv. 26). By 'the princes of the north' (Ezek. xxxii. 30), some understand the Tyrians and their allies (ch. xxvi. 16), joined here with the Zidonians, their neighbours. 'The families of the north' (Jer. i. 15) are inferior kings, who were allies or tributaries to the Babylonian empire

(comp. xxxiv. 1; l. 41; li. 27). 'The families of the north' (Jer. xxv. 9) may mean a still inferior class of people, or nations dependent on Babylon. 5. The Hebrew word is applied to the north wind. In Prov. xxvii. 16, the impossibility of concealing the qualities of a contentious wife, is illustrated by comparing it to an attempt to bind the north wind, צפן־רוח. The invocation of Solomon (Cant. iv. 16), 'Awake, oh north, and come, thou south, blow upon my garden that the spices may flow out,' and which has occasioned much perplexity to illustrators, seems well explained by Rosenmüller, as simply alluding to the effect of winds from opposite quarters, in dispersing the fragrance of aromatic shrubs (ver. 13, 14) far and wide, in all directions. A fine description of the effects of the north wind, in winter, occurs in Ecclus. xliii. 20; which truly agrees with the 'horrifer Boreas' of Ovid (*Met.* i. 65), and in which reference is made to the coincident effects of the north wind and of fire (v. 21; comp. v. 3, 4), like the 'Boreæ penetrabile frigus adurit' of Virgil (*Georg.* i. 93); or Milton's description,

—— 'The parching air
Burns fierce, and cold performs the effects of fire.'
Paradise Lost, ii. 595.

Josephus states that the north wind in the neighbourhood of Joppa was called by those who sailed there Μελαμβόρειος, 'the black north wind,' and certainly his description of its effects, on one occasion, off that coast, is appalling (*De Bell. Jud.* iii. 9. 3).—J. F. D.

NOSE-JEWEL [Women].

NOVICE, or Neophyte (Νεόφυτος), one newly converted (literally *newly planted*), not yet matured in Christian experience (1 Tim. iii. 6). The ancient Greek interpreters explain it by 'new-baptised,' νεοβάπτιστος, 'proselyte,' προσήλυτος, &c. The word continued to be in use in the early church; but it gradually acquired a meaning somewhat different from that which it bore under the Apostles, when 'newly converted' and 'newly baptised' described, in fact, the same condition, the converted being at once baptised. For when, in subsequent years, the church felt it prudent to put converts under a course of instruction before admitting them to baptism and the full privileges of Christian brotherhood, the term Νεόφυτοι, *Novitii*, Novices, was sometimes applied to them, although more usually distinguished by the general term of Catechumens.

NUMBERS is the appellation given to the fourth book of Moses, which in the Septuagint is called Ἀριθμοί, and in the Hebrew canon במדבר *be-midbar*, 'in the desert.'

Contents.—This book embraces more especially the continuation of the Sinaitic legislation, the march through the wilderness, the rejection of a whole generation, and the commencement of the conquest of Canaan. Thus we see that it treats on very different subjects, and on this account it has frequently been attempted to resolve it into separate fragments and documents, and to represent it as being composed of the most heterogeneous materials. We will endeavour to refute this opinion, by furnishing an accurate survey of its contents, and by describing the internal connection of its component parts, so that the organisation of the book may be clearly understood.

The sum and substance of the law having been stated in the preceding books, that of Numbers commences with the arrangements requisite for preserving good order in the camp of the Israelites. The people are numbered for the express purpose of separating the Levites from those Israelites who had to bear arms, and of thus introducing into practice the law concerning the first-born, for whom the tribe of Levi became a substitute. For this reason the people are not merely numbered, but also classed according to their descent; the order which each tribe should occupy in the camp is defined; and the Levites are introduced into their respective functions (ch. i.-iv.).

The camp, having been consecrated, was to be kept pure according to the law of Levitical cleansings; consequently all persons were excluded from it who were afflicted with leprosy, who had become unclean by a flux, and who had touched a corpse (ch. v. 1-4).

Thus, after civil and sacerdotal life had been brought into a definite form, other laws based upon this form came into force, especially those laws which regulated the authority of the priests in civil affairs (ch. v. 5; vi. 27). These regulations conclude with the beautiful form of benediction which indicates the blessing to be expected from the true observance of the preceding directions. The people are impressed with this fact; the hearts of the Israelites are willing to offer the required gifts, and to entrust them to the Levites.

Jehovah is faithful to his promise, and graciously reveals himself to his people (ch. vii.). Before the Levites enter upon the discharge of their sacred functions, the law concerning the lamps to be lighted in the sanctuary is significantly repeated (ch. viii.). These lamps symbolize the communication of the Holy Spirit, and bring to the recollection of the nation the blessings of theocracy to be derived from setting apart the tribe of Levi, which had recently been separated from the rest of the people.

Then follows a description of the celebration of the Passover, preparatory to the departure of the people from Mount Sinai (ch. ix. 1-14). Some regulations are connected with the celebration of the Passover, and the whole miraculous guidance of the people is described (ch. ix. 15-x.).

Thus the entrance of Israel into the Holy Land seemed to be fully prepared; and it was of great importance to show how they were prevented from entering it. Accurate details are therefore given of the spirit which pervaded the nation; a spirit which, in spite of the forbearance of God, manifested itself in daring rebellions against the divine authority (ch. xi. and xii.).

Now comes the turning point of the history. Everything seems externally prepared for the conquest of the country, when it appears that the nation are not yet internally ripe for the performance of so important an act (ch. xiii., xiv.).

In immediate connection with this are some laws which were given in the desert; the intention of which was to recal to the recollection of the rejected race, which had been justly condemned to suffer severe punishment, that nevertheless they had not ceased to be the people of the covenant, and the depositary of divine revelation (comp. ch. xv. 2, 13-16, 22, 23, 37, sq.). In this respect the facts mentioned in ch. xv. 32-36, and ch. xvi. are also of great importance. They show, on the one hand, the continuance of an evil

disposition in the people, and, on the other, the majesty of God watching over his holy law.

The contents of ch. xv.-xix. are of a similar character. The facts there recorded relate to a period of thirty-eight years. The conciseness with which they are stated significantly indicates the strictly legal and theocratical principles of the Mosaical legislation. The period of Israel's rejection is characterized by the circumstance, that the historian is almost silent respecting it, as being a period not strictly belonging to theocratical history. During this period the striking deeds of God, his miracles and signs, the more prominent operations of his grace, and his peculiar blessings, cease. The rejection of the nation consisted in this suspension of the divine operations. During this period God, as it were, ignored his people. Consequently, the historian also almost ignores the rebellious race. But the period in which the divine promises were to be fulfilled again forms a prominent portion of the history. The termination of the penal period is the commencement of the most important era in the Mosaical history. It brings the legislation to a splendid conclusion. The most glorious facts here follow each other in close succession; facts which were intended clearly to demonstrate that the chosen people entered into the land of promise, not by their own power and might, but that this land was given into their hands by the God of promise.

Miriam was already dead; and the forty years of wandering in the wilderness were accomplished. Israel was again in sight of the Holy Land on the borders of Edom. Then Moses and Aaron also sinned; soon after, Aaron died, and was succeeded by Eleazar. Israel sent ambassadors to the king of Edom to obtain permission to pass through his territory, but was haughtily refused (ch. xx.). Everything seemed to be prepared by preceding events already recorded. The dying off of the real emigrants from Egypt might be expected, after the divine decree that this should come to pass, had been mentioned; the unbelief of Moses arose from the protracted duration of the time of punishment, which at length broke his courage; the spirit of Edom arose in overbearing animosity, because it seemed that Jehovah had forsaken his people. It was appointed that Israel should undergo all this in order that they might grow strong in the Lord. Their strength was soon proved against Arad. They vowed to devote all the cities of the Canaanites to Jehovah, who gave them the victory. They were directed to avoid the boundaries of Edom, and to have Canaan alone in view. The people murmured, and the significant symbol of the serpent was erected before them, reminding them of their ancient sin, and how it had been healed and overcome by Jehovah. In all this Israel is constantly directed to Canaan. They march courageously to the boundaries of the Amorites, singing praises to Jehovah, and, by the power of the Lord, defeat the kings of Heshbon and Bashan (ch. xxi.).

In the plains of Moab still greater glory awaits the chosen people. The pagan prophet of Mesopotamia, being hired by the king of the Moabites, is overpowered by Jehovah, so that he is compelled to bless Israel instead of cursing them; and also directs them to the ancient blessings granted to the patriarchs. The bitterest enemies of the theocracy are here most deeply humbled, being themselves compelled to contribute to the glory of Jehovah (ch. xxii.-xxiv.). Not the God, but the people of Israel, were dishonoured through the devices of Balaam.

The subsequent account concerning the idolatry into which the people were led, forms a striking contrast with the preceding chapters, and evinces the impotence of the Israelites, whose first attack, therefore, was to be directed against their seducers. This was to be the beginning of the conquest of Canaan, which was essentially a combat against idolatry, and the victory of the kingdom of God over paganism. The conquered country was granted to separate tribes, and for this purpose the people were once more numbered, and Joshua appointed their leader.

Jehovah reserves his own rights in the distribution of the country, and Israel is directed not to forget the sacrifices to the Lord, the sabbaths, festivals, and vows; the ordinances concerning which are here briefly repeated, inculcated, and completed.

The people shall certainly gain the victory, but only in strict communion with Jehovah. Thus begins the combat against Midian, according to the directions of the law, and forming as it were a prototype of the later combats of Israel against pagan powers (ch. xxv.-xxxi.).

This was the last external work of Moses. Henceforth his eye is directed only to the internal affairs of his people. An entrance has been effected into the country, and the conquered territory is divided among two tribes and a half-tribe (ch. xxxii.).

Moses reminds the people of Jehovah's guidance in the wilderness, and of the manner in which the whole land was to be conquered. He commands the destruction of the Canaanites and of their idolatry. He appoints to what extent the land is to be conquered, and in what manner it should be divided; also the towns to be granted to the Levites, and the cities of refuge. He establishes also the statute, which was of great importance for the preservation of landed property, that an heiress should marry only within her own tribe (ch. xxxiii.-xxxvi.).

There have frequently been raised strong doubts against the historical credibility of the book of Numbers, although it is impressed with indubitable marks of the age to which it refers, and of perfect authenticity. The numerical statements in ch. i.-iv. are such that they repel every suspicion of forgery. There could apparently be no motive for any fabrication of this description. The numbering of the people is in perfect harmony with Exod. xxxviii. 26. The amount is here stated in round numbers, because a general survey only was required. When requisite, the more exact numbers are also added (ch. iii. 39, 43.) A later *falsarius*, or forger, would certainly have affected to possess the most exact knowledge of those circumstances, and consequently would have given, not round, but particularly definite numbers.

The account of the setting apart of the tribe of Levi has been especially urged as bearing the marks of fiction; but this account is strongly confirmed by the distribution of the cities of the

Levites (Num. xxxv.; Jos. xxi.). This distribution is an undeniable fact, and the existence of these Levitical towns may be appealed to as a document proving that the Levites were really set apart. Our opponents have vainly endeavoured to find contradictions, for instance, in the system of tithing (Num. xviii.), which, they say, is not mentioned in Deuteronomy, where the tithes are applied to different purposes (Deut. xii. 6, 7, 17-19; xiv. 22, seq.; xxvi. 12-15). But there were two sorts of tithes; one appointed for the maintenance of the Levites, and the other to defray the expenses of public banquets, of which the Levites also partook on account of their position in society (comp. Neh. xiii. 10; Tobit i. 7).

It has also been asserted that the book of Numbers contradicts itself in ch. iv. 2, 3, and ch. viii. 24, with respect to the proper age of Levites for doing duty. But the first of these passages speaks about carrying the tabernacle, and the second about performing sacred functions in the tabernacle. To carry the tabernacle was heavier work, and required an age of thirty years. The functions within the tabernacle were comparatively easy, for which an age of twenty-five years was deemed sufficient.

The opinions of those writers who deem that the book of Numbers had a mythical character, are in contradiction with passages like x. 26, sq., where Chobab is requested by Moses to aid the march through the wilderness. Such passages were written by a conscientious reporter, whose object was to state facts, who did not confine himself merely to the relation of miracles, and who does not conceal the natural occurrences which preceded the marvellous events in ch. xi. sq. How are our opponents able to reconcile these facts? Here again they require the aid of a new hypothesis, and speak of fragments loosely connected.

The author of the book of Numbers proves himself to be intimately acquainted with Egypt. The productions mentioned in ch. xi. 5 are, according to the most accurate investigations, really those which in that country chiefly served for food.

In ch. xiii., xxii., we find a notice concerning Zoan (Tanis), which indicates an exact knowledge of Egyptian history, as well in the author as in his readers. In ch. xvii. 2, where the writing of a name on a stick is mentioned, we find an allusion characteristic of Egyptian customs (compare Wilkinson, *Manners and Customs of the Ancient Egyptians*, i. p. 388.

The history of the rebellion of the sons of Korah (xvi. 17) has certainly some colouring of the marvellous, but it nevertheless bears the stamp of truth. It is absurd to suppose that a poet who wrote ch. xvii. 6, sq., in order to magnify the priestly dignity, should have represented the Levites themselves as the chief authors of these criminal proceedings. This circumstance is the more important, because the descendants of Korah (Num. xxvi. 11) became afterwards one of the most distinguished Levitical families. In this position we find them as early as the times of David; so that it is inconceivable how any body should have entertained the idea of inventing a crime to be charged upon one of the ancestors of this illustrious family.

Many vestiges of antiquity are found in ch. xxi. The whole chapter, indeed, bears a characteristically antique impress, which manifests itself in all those ancient poems which are here communicated only in fragments, so far as was required for the illustration of the narrative. Even such critical sceptics as De Wette consider these poems to be relics of the Mosaical period. But they are so closely connected with history, as to be unintelligible without a knowledge of the facts to which they refer.

Narratives like the history of Balaam (xxii., xxiv.) furnish also numerous proofs of their high antiquity. These confirmations are of the greatest importance, on account of the many marvellous and enigmatical points of the narrative. Compare, for instance, the geographical statements, which are uncommonly accurate, in ch. xxii. 1, 36, 39; xxiii. 14, 15, 27, 28. See Hengstenberg's *Geschichte Bileam's*, Berlin, 1842, p. 221, sq.

The nations particularly mentioned in Balaam's prophecy, the Amalekites, Edomites, Moabites, and Kenites, belong to the Mosaical period. In ch. xxiv. 7, it is stated that the king of Israel would be greater than Agag; and it can be proved that Agag was a standing title of the Amalekite princes, and that, consequently, there is no necessity to refer this declaration to that king Agag whom Saul vanquished. The Kenites, at a later period, disappeared entirely was from history. A prophet from Mesopotamia likely to make particular mention of Assur (ch. xxiv. 22). There is also a remarkable prediction, that persons sailing from the coast of Chittim should subdue Assur and Eber (ch. xxiv. 23). The inhabitants of the west should vanquish the dwellers in the east. The writers who consider the predictions of Balaam to be *vaticinia post eventum*, bring us down to so late a period as the Grecian age, in which the whole passage could have been inserted only under the supposition of most arbitrary dealings with history. The truth of the biblical narrative here asserts its power. There occur similar accounts, in which it is strikingly evident that they proceeded from the hands of an author contemporary with the events; for instance, ch. xxxii., in which the distribution of the trans-Jordanic territory is recorded, even the account, which has so frequently been attacked, concerning the Havoth-jair, the small towns, or rather tent villages of Jair (xxxii. 41, 42; compare Judg. x. 4, and Deut. iii. 14). Even this account, we say, is fully justified by a closer examination.

The list of stations in ch. xxxiii. is an important document, which could not have originated in a poetical imagination. This list contains a survey of the whole route of the Israelites, and mentions individual places only in case the Israelites abode there for a considerable period. It is not the production of a diligent compiler, but rather the original work of an author well versed in the circumstances of that period. A later author would certainly have avoided the appearance of some contradictions, such as that in Num. xxxiii. 30, 31, comp. with Deut. x. 6. This contradiction may best be removed, by observing that the book of Numbers speaks of the expedition of the Israelites in the second year of their wanderings, and the book of Deuteronomy, of

their expedition in the fortieth year. The list of stations contains also important historical notices; those, for instance, in ch. xxxiii. 4, 9, 14, 38. These notices demonstrate the accurate historical information of the author.

We still dwell for a moment on the consideration of the great fact, which is the basis of the narrative of the whole book—namely, the sojourn of the Israelites during forty years in the wilderness. The manner in which the narrator states this fact, we have mentioned above. A view so strictly theocratical, and a description so purely objective, are most befitting the law-giver himself. Modern criticism has chiefly taken offence at the statement that Jehovah had announced all this as a punishment to be inflicted upon the people. This, they say, is incomprehensible. However, the fact stands firm, that the Israelites really abode forty years in the wilderness. This fact is proved in the Scriptures by many other testimonies. Hence arises the question, how this protracted abode was occasioned, and what induced Moses to postpone or give up the conquest of Canaan. De Wette says that such resignation, in giving up a plan to which one has devoted the full half of a life, is not human. Göthe asserted, that by such a representation the picture of Moses is entirely disfigured. All this renders the problem of our opponents the more difficult. De Wette says, 'Who knows what happened in that long period?' This question would amount to a confession of our entire ignorance concerning what was most important, and what is the real turning point of the history of Israel, and would make an enormous and most striking gap in universal history. It is incredible that no tradition should have been preserved, in which was told to posterity what was here most important, even if it should only have been in a very disfigured form. It is incredible that what was most important should have been passed by, and that there should have been communicated only what was comparatively insignificant. If this were the case, the traditions of Israel would form a perfectly isolated phenomenon. Thus the history of Israel itself would be something incomprehensible. Either the history is inconceivable, or the astounding fact is, indeed, a truth. And so it is. The resignation of Moses, and the sojourn of the people in the wilderness, can be explained only by assuming an extraordinary divine intervention. A merely natural interpretation is here completely futile. The problem can only be solved by assuming that the whole proceeded from the command of God, which is unconditionally obeyed by his servant, and to which even the rebellious people must bow, because they have amply experienced that without God they can do nothing.

For the works relative to Numbers, see the article PENTATEUCH.—H. A. C. H.

NUN (נוּן; in Syr. and Arab., *a fish*), the father of Joshua, who is hence constantly called Joshua ben-Nun, 'Joshua the son of Nun.' Nothing is known of the person who bore this name. The Sept. constantly uses the form it Ναυή, which appears to have arisen from an error of an earlier copyist (ΝΑΥΗ for ΝΑΥΝ). From the forms Ναβή and Ναβί, found in some MSS., it would seem that later transcribers supposed this Ναυή to be the pronunciation of the Hebrew נביא. It is from this error of the Sept. that some of our old versions have 'Joshua the son of Naue.'

O.

OAK [ALLON].

OATH (שְׁבוּעָה and אָלָה), an appeal to God in attestation of the truth of what you say, or in confirmation of what you promise or undertake. The Latin term is *jusjurandum*, or *juramentum*. Cicero (*De Officiis*, iii. 29) correctly terms an oath a religious affirmation; that is, an affirmation with a religious sanction. This appears from the words which he proceeds to employ: 'Quod autem affirmate, quasi Deo teste, promiseris, id tenendum est. Jam enim non ad iram deorum, quæ nulla est, sed ad justitiam et ad fidem pertinet;' which in effect means that an oath is an appeal to God, as the source and the vindicator of justice and fidelity. Hence it appears that there are two essential elements in an oath: first, the human, a declared intention of speaking the truth, or performing the action in a given case; secondly, the divine, an appeal to God, as a Being who knows all things and will punish guilt. According to usage, however, there is a third element in the idea which 'oath' commonly conveys, namely, that the oath is taken only on solemn, or, more specifically, on juridical occasions. The canon law gives all three elements when it represents *judicium*, *veritas*, *justitia*, as entering into the constitution of an oath—*judicium*, judgment or trial on the part of society; *veritas*, truth on the part of the oath-taker; *justitia*, justice on the part of God. An oath is accordingly a religious undertaking either to say (*juramentum assertorium*), or to do (*juramentum promissorium*) something entered into voluntarily with the customary forms. Being a religious undertaking, the appeal will vary according to the religious opinions of the country in which the oath is taken. In some instances it will be an appeal immediately to God; in others, to objects supposed to have divine power; and by a natural declension, when men have left the only true God, they may appeal in their oaths even to stocks and stones. Accordingly the Romans swore, 'per caput suum vel suorum filiorum,' or 'per genium principis;' that is, by their own head or that of their children, or by the genius of the emperor. We shall have by and by to notice similar errors and abuses among the Jews.

The essence of an oath lies obviously in the appeal which is thereby made to God, or to divine knowledge and power. The customary form establishes this, 'So help me God.' The Latin words (known to have been used as early as the sixth century), whence our English form is taken, run thus: 'Sic me Deus adjuvet et hæc sancta Evangelia;' *so may God and these holy Gospels help me;* that is, 'as I say the truth.' The present custom of kissing a book containing the Gospels has in England taken place of the latter clause in the Latin formula.

If, then, an appeal to God is the essence of an oath, oath-taking is a practice which cannot be justified. Such an appeal is wrong, because it is

a mere act of a creature's will, being unrequired and unsanctioned by God, in a case in which God is made a party to a certain course, which course may or may not be agreeable to his mind (because a wish on the part of the oath-taker for punishment, should he fail in his undertaking, or any part of the same, is an act unbecoming a frail man, unseemly in its very nature, and awful to think of when man's sinfulness and God's power are rightly apprehended; because it relaxes the general bonds of religion, and morality, and truth; (for in establishing an occasion when justice must be done, it authorizes the idea that its observance is not imperative on other occasions); and because it is founded on an essentially false view of religious obligation; for as God sees, knows, and governs all things, and as all things so each thing, so man is bound universally to speak the truth and perform what he undertakes, bound as much in each and in all the actions of his life, as his dependance and God's sovereignty can bind a rational and accountable being; so that it is radically false to suppose that there is or can be any thing special in the obligation of an oath; the tendency of which falsity is not to raise, but to degrade the character, to reduce the general standard of truth and rectitude, to weaken the moral sense, by encouraging the idea that on special occasions, and of course on special occasions *only*, truth is to be spoken and promises performed.

It is one among those numerous small accordances comparatively with the dictates of right reason which will be found to prevail in the Bible the more minutely it is investigated, and which, though now, after a revelation has enlightened the mind, are discoverable by the mind, are yet so far beyond the reach of the mind when left to its own resources, that the practice of antiquity bears in an opposite direction—it is one of those very important accordances with truth, that the Mosaic legislation is not answerable for the practice of taking oaths, which existed before the time of Moses. It is found as early as the days of Abraham, who made the oldest servant of his family swear he would select for Isaac a wife of his own kindred (Gen. xxiv. 2, 3, 37). It is here observable that the oath is a private, not a judicial one; only that the rectoral authority of Abraham, as patriarch, must be taken into account. The form observed is found in these words: 'Put, I pray thee, thy hand under my thigh; and I will make thee swear by the Lord, the God of heaven and the God of earth, that,' &c. An oath was sometimes a public and general bond, obliging the parties who took it to a certain course—a case in which it appears to have been spontaneous and voluntary; as when, in Judges xxi., the men of Israel swore, saying, there shall not any of us give his daughter unto Benjamin to wife (comp. ver. 5). From 1 Kings xviii. 10, it appears to have been customary to require on occasions of great concern a public oath, embracing even an entire 'kingdom and nation;' but whether taken individually or by some representative, we have no means of ascertaining. Such a custom, however, implying, as it does, a doubt of the public faith of a people, would hardly be submitted to, unless on the part of an inferior.

Oaths did not take their origin in any divine command. They were a part of that consuetudinary law which Moses found prevalent, and was bound to respect, since no small portion of the force of law lies in custom, and a legislator can neither abrogate nor institute a binding law of his own mere will. Accordingly, Moses made use of the sanction which an oath gave, but in that general manner, and apart from minute directions and express words of approval; which shows that he merely used, without intending to sanction, an instrument that he found in existence and could not safely dispense with. Examples are found in Exod. xxii. 11, where an oath is ordered to be applied in the case of lost property; and here we first meet with what may strictly be called a judicial oath (Lev. vi. 3-5).

The forms of adjuration found in the Scriptures are numerous. Saul sware unto Jonathan, 'As the Lord liveth' (1 Sam. xix. 6). 'A heap and a pillar' were for a witness between Laban and Jacob, with the ensuing for a sanction, 'The God of Abraham and the God of Nahor, the God of their father, judge betwixt us. And Jacob sware *by the fear of his father Isaac*' (Gen. xxxi. 52, sq.). A common formula is, 'The Lord do so to me and more also' (Ruth i. 17; 1 Sam. iv. 44), which approaches nearly to our modern form, 'So help me God,' and is obviously elliptical. Reference appears to be had to the ancient custom of slaying some animal in confirmation of a treaty or agreement. The animal thus slain and offered in a burnt offering to God became an image or type, betokening the fate which would attend that one of the two contracting parties who failed in his engagement; and the words just cited were intended to be a voluntary assumption of the liability thus foreshadowed on the side of those who joined in the covenant: subsequently the sacrifice was in ordinary cases omitted, and the form came in itself to have the force of a solemn asseveration.

An oath, making an appeal to the divine justice and power, is a recognition of the divinity of the being to whom the appeal is made. Hence to swear by an idol is to be convicted of idolatry. Such an act is accordingly given in Scripture as a proof of idolatry and a reason for condign punishment. 'How shall I pardon thee for this? Thy children have forsaken me, and sworn by them that are no gods' (Jer. v. 7; xii. 16; Amos viii. 14; Zeph. i. 5).

Other beings besides God are sometimes added in the form of an oath: Elijah said to Elisha, 'As the Lord liveth, and as thy soul liveth' (2 Kings ii. 2; 1 Sam. xx. 3). The party addressed is frequently sworn by, especially if a prince: 'As thy soul liveth, my lord, I am the woman,' &c. (1 Sam. i. 26; xvii. 55; xxv. 26; 2 Sam. xi. 11). The Hebrews, as well as the Egyptians, swore also by the head or the life of an absent as well as a present prince: 'By the life of Pharaoh' (Gen. xlii. 15). Hanway says that the most sacred oath among the Persians is 'by the king's head.' Aben Ezra asserts that in his time (A.D. 1170) this oath was common in Egypt under the caliphs: death was the penalty of perjury. Selden, in his *Titles of Honour* (p. 45), ascribes the practice to the custom of applying the name god to princes (Rosenm. *Morgenl.* i. 200, sq.; comp. Strabo, xii. p. 557; Herod. iv. 68; Tertull. *Apol.* c. 52).

The oath-taker swore sometimes by his own

head (Matt. v. 36; see Virg. *Æn.* ix. 300; Ovid, *Trist.* iv. 4. 45; Juven. vi. 17); or by some precious part of his body, as the eyes (Ovid, *Amor.* iii. 3. 13; Tibull. iii. 6. 47); sometimes, but only in the case of the later Jews, by the earth, the heaven, and the sun (Matt. v. 34, 35; Eurip. *Hippol.* 1029; Virg. *Æn.* xii. 176); as well as by angels (Joseph. *De Bell. Jud.* ii. 16. 4); by the temple (Matt. xxiii. 16; comp. Lightfoot, p. 280); and even by parts of the temple (Matt. xxiii. 16; Wetstein). They also swore by Jerusalem, as the holy city (Matt. v. 35; Lightfoot, p. 281). The Rabbinical writers indulge in much prolixity on the subject of oaths, entering into nice distinctions, and showing themselves exquisite casuists. A brief view of their disquisitions may be seen in Othon. *Lex.* p. 347, sq. Some oaths they declared invalid: 'If any one swear by heaven, earth, the sun, and such things, although there may be in his mind while using these words a reference to Him who created them, yet this is not an oath; or if any one swear by one of the prophets, or by some book of Scripture, having reference to Him who sent the prophet and gave the book, nevertheless this is not an oath' (Maimon. *Hal. Schebhuoth*, c. 12). So the Mishna (*Schebhuoth*, c. 4): 'If any one adjures another by heaven or earth, he is not held bound by this.' It is easy to see that oaths of this nature, with authoritative interpretations and glosses so lax, could hardly fail to loosen moral obligation, and to lead to much practical perjury and impiety. Minute casuistical distinctions undermine the moral sense. When a man may swear and yet not swear, by the same formula appear to bind himself and yet be free, contract with his associates an obligation from which he may be released by religious authorities, the basis of private virtue and the grounds of public confidence are at once endangered. Besides, the practice of unauthorized and spontaneous oath-taking, which seems even in the earlier periods of Jewish history to have been too common, became about the time of our Lord of great frequency, and must have tended to lower the religious, as well as weaken the moral character. Peter's conduct is a striking case in point, who 'began to curse and to swear, saying, I know not the man' (Matt. xxvi. 74). An open falsehood, thus asserted and maintained by oaths and imprecations, shows how little regard there was at that time paid to such means of substantiating truth. The degree of guilt implied in such lamentable practices is not lessened by the emphasis with which the Mosaic law guarded the sanctity of the divine name, and prohibited the crime of perjury and profanation (Lev. xix. 12; Exod. xx. 7; Deut. v. 111; Matt. v. 33).

These remarks, tending to exhibit the state of mind and the manner of conduct prevalent in our Lord's time, show with what propriety he interposed his authority on the point, and not only disallowed the vain distinctions of the Pharisees (Matt. xxiii. 16), but also forbad swearing entirely (Matt. v. 33). Before, however, we submit his doctrine on this matter to some remarks, there are yet a few words to be added, in order to complete our statement touching the ceremonial observed in connection with an oath.

We have already intimated that it was usual to put the hand under the thigh (Gen. xxiv. 2; xlvii. 29). On this practice Aben Ezra observes: 'It appears probable to me that the meaning of this custom was as if the superior said, with the consent of his slave, If thou art under my power, and therefore prepared to execute my commands, put thy hand, as a token, under my thigh.' Winer, however, thinks that as it was usual to swear by the more important parts of the human frame, so this was a reference to the generative powers of man. But see on this interpretation, as well as on the general question of swearing by parts of the body, Meiner's *Geschichte der Relig.* ii. 286, sq. It is, however, certain that it was usual to touch that by which a person swore:

'Tange precor mensam, tangunt quo more precantes.'

Other instances may be seen in Niedek, *De Populor. Adorat.* p. 213, sq. At p. 218 of this work, with the plate relating to it, an instance may be found which cannot be mentioned, but which goes immediately to confirm the idea advanced by Winer.

The more usual employment of the hand was to raise it towards heaven; designed, probably, to excite attention, to point out the oath-taker, and to give solemnity to the act (Gen. xiv. 22, 23). In the strongly anthropomorphitic language of parts of the Scripture, even God is introduced saying, 'I lift up my hand to heaven, and say, I live for ever' (Deut. xxxii. 40). It can only be by the employment of a similar licence that the Almighty is represented as in any way coming under the obligation of an oath (Exod. vi. 8; Ezek. xx. 5). Instead of the head, the phylactery was sometimes touched by the Jews on taking an oath (Maimon. *Schebhuoth*, c. xi.). Even the Deity is sometimes introduced as swearing by phylacteries (*Tanch*, fol. vi. 3; Othon. *Lex.* p. 757). In cases where a civil authority adjured a party, that is, put a person to an oath, the answer was given by אַתָּה, σὺ εἶπας, 'thou hast said' (1 Kings xxii. 16; Num. v. 19; Matt. xxvi. 63; *Schebhuoth*, c. i.; *Misch.* ii.). Women and slaves were not permitted to take an oath (Maimon. *Hilch. Schebh.* 9, 10, 11).

The levity of the Jewish nation in regard to oaths, though reproved by some of their doctors (Othon. *Lex.* p. 351; Philo, ii. 194), was notorious; and when we find it entering as an element into popular poetry (Martial, xi. 9), we cannot ascribe the imputation to the known injustice of heathen writers towards the Israelites. This national vice, doubtless, had an influence with the Essenes [Essenes], in placing the prohibition of oaths among the rules of their reformatory order. Certainly, 'the Great Teacher' forbade oaths altogether. The language is most express (Matt. v. 34-37; James v. 12). Equally decided was the interpretation put on this language by the ancient church. Justin, Irenæus, Basil, Chrysostom, Augustine, held oaths to be unchristian (De Wette, *Sittenlehre*, iii. 143). Even modern philosophy has given its vote against the practice (see Bentham's 'Swear not at all'). That no case has been made out by Christian commentators in favour of judicial swearing we do not affirm; but we must be excused if we add that the case is a very weak one, wears a casuistical appearance, and as if necessitated in order to excuse existing usages, and guard against errors imputed to unpopular sects, such as the Quakers and Mennonites. If in-

ferential and merely probable conclusions, such as the case consists of, may be allowed to prevail against the explicit language of Jesus and James, Scripture is robbed of its certainty, and prohibitions the most express lose their force. For instance, it has been alleged that our Lord himself took part in an oath when, being adjured by the high-priest, he answered 'Thou hast said' (Matt. xxvi. 63-4). But what has this to do with his own doctrine on the point? Placed at the bar of judgment, Jesus was a criminal, not a teacher, bound by the laws of his country, which it was a part of his plan never unnecessarily to disregard, to give an answer to the question judicially put to him, and bound equally by a regard to the great interests which he had come into the world to serve. Jesus did not swear, but was sworn. The putting the oath he could not prevent. His sole question was, Should he answer the interrogatory? —a question which depended on considerations of the highest moment, and which he who alone could judge decided in the affirmative. That question in effect was, 'Art thou the Messiah?' His reply was a simple affirmative. The employment of the adjuration was the act of the magistrate: to have objected to which would have brought on Jesus the charge of equivocation, if not of evasion, or even the denial of his 'high calling.'

The general tendency of this article is to show how desirable it is that the practice of oath-taking of all kinds, judicial as well as others, should at least be diminished, till at the proper time it is totally abolished; for whatsoever is more than a simple affirmation cometh from the Evil One, ἐκ τοῦ πονηροῦ (Matt. v. 37), and equally leadeth to evil.

OBADIAH (עֹבַדְיָהוּ and עֹבַדְיָה, *servant of Jehovah;* Sept. Ἀβδιού), the name of several persons mentioned in Scripture.

1. OBADIAH, the fourth of the minor prophets according to the Hebrew, the fifth according to the Greek, and the eighth according to chronological arrangement, is supposed to have prophesied about the year B.C. 599 (Jahn's *Introd.*). We have, however, but a small fragment of his prophecies, and it is impossible to determine anything with certainty respecting himself or his history. Several persons of this name occur about the same period, one of whom presided at the restoration of the temple in the reign of Josiah, B.C. 624, and is considered by many to have been the author of the prophecy. Another, who was governor of the house of Ahab, was regarded by the ancient Jews as the author of the book: which opinion is followed by Jerome (Hieron. *Comm. in Abdiam;* Sixtus Senens. *Bib. Sanct.*). Others place the author in the reign of Ahaz, B.C. 728-699; while some think him to have been a contemporary of Hosea, who prophesied B.C. 722. But, as is observed by Jahn, Newcome, and others, it is evident from ver. 20 that he prophesied while Jerusalem was subjected to the yoke of the Chaldæans, and after the expatriation of several of the citizens—which refers him to the period after the seventh year of the captivity, B.C. 599. Jahn maintains, from the warnings to the Edomites, ver. 12-14, that Obadiah prophesied before the destruction of Jerusalem by Nebuchadnezzar; while De Wette infers from the mention of the 'captivity of the children of Israel,' and the 'captivity of Jerusalem' in ver. 20, that the composition of the book must be placed after the destruction of that city. From a comparison of Obad. ver. 1-4, with Jer. xlix. 14-16; Obad. ver. 6, with Jer. xlix. 9, 10; and Obad. ver. 8, with Jer. xlix. 7, it is evident that one of these prophets had read the other's work. It is not easy, observes Calmet, to decide which of the two copied from the other; but from the fact that Jeremiah had made use of the writings of other prophets also, it has been generally concluded that Obadiah was the original writer (See Eichhorn's *Introd.* § 512; Rosenmüller's *Scholia*, and Jäger, *Ueb. die Zeit Obadjah*). That Jeremiah was the original writer has been maintained by Bertholdt, Credner, De Wette, and others. De Wette supposes (*Introd.* § 235) that Obadiah made use of Jeremiah from recollection.

His prophecies are directed against the Edomites, and in this respect correspond with Amos i. 11, Jer. xlix. 22, Ezek. xxv. 12-14, and Ps. cxxxvii. 7 (Jahn's *Introd.*). He menaces Edom with destruction for their hostile feeling towards Judah, and their insulting conduct towards the Hebrews when Jerusalem was taken (ver. 11, 12); but consoles the Jews with a promise of restoration from their captivity, when the Hebrews and the Ten Tribes (Jahn's *Introd.*) shall repossess both their land and that of Edom and Philistia—a prophecy which was fulfilled in the time of the Maccabees, under John Hyrcanus, B.C. 125 (Jahn, *l. c.*).

The language of Obadiah is pure; but Jahn and others have observed that he is inferior to the more ancient prophets in its too great addiction to the interrogatory form of expression (see ver. 8). His sentiments are noble, and his figures bold and striking (De Wette's *Introd.*, Eng. transl.). De Wette's translator observes that his hatred towards other nations is not so deep and deadly as that of some of his younger contemporaries.

See Leusden's *Obadiah;* Pfeiffer, *Comm. in Obad.;* Schröer, *Der Prophet Obad.*, &c.; Venema, *Lectt. in Obad.*, with the additions of Verschuir and Lohze; Kohler, *Anmerkk.;* Schnurrer's *Dissert. Philol.;* Hendewerth, *Obadjæ Prophetæ Oraculum in Idumæos.* These are the works referred to in De Wette's *Introduction.*—W. W.

2. OBADIAH, the governor of King Ahab's household, and high in the confidence of his master, notwithstanding his aversion to the idolatries which the court patronized. In the persecution raised by Jezebel, Obadiah hid one hundred of the Lord's prophets in caves, and supplied them secretly with nourishment during the famine. It was this person, when sent out to explore the country in the vain search of pasture unconsumed by the drought, whom Elijah encountered when

about to show himself to Ahab, and who was reluctantly prevailed upon to conduct the prophet to his master (1 Kings xviii. 4-16). B.C. 906.

3. OBADIAH, one of the heroes of the tribe of Gad, who joined David at Ziklag (1 Chron. xii. 9).

4. OBADIAH, one of the nobles whom Jehoshaphat sent to teach in the cities of Judah (2 Chron. xvii. 7).

5. OBADIAH, one of the Levites who presided over the restoration of the temple under Josiah (2 Chron. xxxiv. 12).

6. OBADIAH, the head of a party, consisting of 218 males, with females and children in proportion, who returned with Ezra from Babylon (Ezra viii. 9).

7. OBADIAH, one of the priests, who sealed the written covenant which Nehemiah caused the people to enter into (Neh. x. 5).

Other persons of this name occur in 1 Chron. iii. 21; vii. 3; viii. 38; ix. 16, 44; xxvii. 19.

OBED (עוֹבֵד, *serving;* Sept. Ὼβήδ), son of Boaz and Ruth, and father of Jesse the father of David, according to the apparently incomplete genealogical list (Ruth iv. 17; 1 Chron. ii. 12). The name occurs in the genealogies of Matthew (i. 5) and Luke (iii. 32).

OBED-EDOM (עֹבֵד אֱדֹם, *serving Edom;* Sept. Ἀβεδδαρά), a Levite in whose premises, and under whose care, the ark was deposited, when the death of Uzzah caused David to apprehend danger in taking it farther. It remained here three months, during which the family of Obed-edom so signally prospered, that the king was encouraged to resume his first intention, which he then happily carried into effect (2 Sam. vi. 10-12). We learn from 1 Chron. xvi. 38, that Obed-edom's connection with the ark did not then terminate, he and his brethren having charge of the doors of the sanctuary (1 Chron. xv. 18, 24).

OBIL (אוֹבִיל, *chief of the camels;* Sept. Ἀβίας), an Ishmaelite, or Arab, doubtless of the nomade tribes, who had charge of the royal camels in the time of David—an exceedingly fit employment for an Arab (1 Chron. xxvii. 30). As Obil means in Arabic 'a keeper of camels' Hieron. (ii. 2), reasonably infers that the person had his name from his office, which has always been a very common circumstance in the East.

OBLATION [Offering].

OBOTH, a station of the Israelites [Wandering].

1. ODED (עוֹדֵד, *erecting;* Sept. Ὼδήδ), the prophet who remonstrated against the detention as captives of the persons whom the army of King Pekah had brought prisoners from Judah, and at whose suggestion they were handsomely treated, and conducted back with all tenderness and care to their own country (2 Chron. xxviii. 9).

2. ODED, father of Azariah the prophet, who was commissioned to meet and encourage Asa on his return from defeating the Ethiopians (2 Chron. xv. 1-8). It curiously happens that the address which, at the commencement, is ascribed to Azariah, the son of Oded, is at the end ascribed to Oded himself (xv. 8). But this is supposed to have been a slip of copyists, and the versions read the latter verse like the former.

ODEM (אֹדֶם; Sept. σάρδιον), one of the precious stones in the breastplate of the high-priest (Exod. xxviii. 17; xxxix. 10), and also mentioned in Ezek. xxviii. 13. In all these places it is rendered 'sardius' in the Authorized Version, following the Septuagint and Josephus (*De Bell. Jud.*, v. 5, 7), who, however, in *Antiq.* iii. 7. 6, makes it the sardonyx (σαρδόνυξ). The sardius is the stone now called the carnelian, from its colour (*a carne*), which resembles that of raw flesh. The Hebrew name is derived from a root which signifies being red. The sardius or carnelian is of the flint family, and is a kind of chalcedony. The more vivid the red in this stone, the higher is the estimation in which it is held. It was anciently, as now, more frequently engraved on than any other stone. The ancients called it sardius, because Sardis in Lydia was the place where they first became acquainted with it; but the sardius of Babylon was considered of greater value (Plin. *Hist. Nat.* xxxvii. 7). The Hebrews probably obtained the carnelian from Arabia. In Yemen there is found a very fine dark-red carnelian, which is called *el-Akik* (Niebuhr, *Beschreib.*, p. 142). The Arabs wear it on the finger, on the arm above the elbow, and in the belt before the abdomen. It is supposed to stop hemorrhage when laid on a fresh wound.

OFFERING (the general name for which in Hebrew is קָרְבָּן) is anything presented to God as a means of conciliating his favour: which being in the Jewish, as well as in all other religions, considered as the one thing needful, offerings accordingly have always constituted an essential part of public worship and private piety.

Offerings have been divided into three kinds; 1. Impetratoria; 2. Eucharistica; 3. Piacularia: the first denoting those which are designed to procure some favour or benefit; the second, those which are expressive of gratitude for bounties or mercies received; the third, those which are meant to atone for sins and propitiate the Deity. Porphyry also gives three reasons for making offerings to the gods (*Abstinentia*, ii. 24),—in order to do them honour, to acknowledge a favour, or to procure a supply for human needs. Among the Hebrews we find a complex and multiform system of offerings extending through the entire circle of divine worship, and prescribing the minutest details. A leading distinction separates their offerings into unbloody (מִנְחוֹת, προσφοραί, δῶρα) and bloody (זְבָחִים, θυσίαι). Used in its widest sense the term offering, or oblation, indicates in the Hebrew ritual a very great number of things—as the firstlings of the flock, first-fruits, tithes, incense, the shew-bread, the wood for burning in the temple (Neh. x. 34). The objects offered were salt, meal, baked and roasted grain, olive-oil, clean animals, such as oxen, goats, doves, but not fish. The animals were required to be spotless (Lev. xxii. 20; Mal. i. 8), and, with the exception of the doves, not under eight days old (Lev. xxii. 27), younger animals being tasteless and innutritious. The smaller beasts, such as sheep, goats, and calves, were commonly one year old (Exod. xxix. 38; Lev. ix. 3; xii. 6; xiv. 10; Num. xv. 27; xxviii. 9, sq.). Oxen were offered at three years of age; in Judges (vi. 25) one is offered which is seven years old. As to sex, an option was sometimes left to the offerer, as in peace and sin-offerings (Lev. iii. 1, 6; xii. 5, 6); at other times

males were required, as in burnt sacrifices, for, contrary to classical usage, the male was considered the more perfect. In burnt-offerings and in thank-offerings the kind of animal was left to the choice of the worshipper (Lev. i. 3), but in trespass and sin-offerings it was regulated by law (Lev. iv. 5). If the desire of the worshipper was to express his gratitude, he offered a peace or thank-offering; if to obtain forgiveness, he offered a trespass or sin-offering. Burnt-offerings were of a general kind (Num. xv. 3; Deut. xii. 6; Jer. xvii. 26). Hecatombs or large numbers of cattle were sacrificed on special occasions. In 1 Kings viii. 5, 63, Solomon is said to have 'sacrificed sheep and oxen that could not be told or numbered for multitude,' 'two and twenty thousand oxen and an hundred and twenty thousand sheep' (see also 2 Chron. xxix. 32, sq.; xxx. 24; xxxv. 7, sq.; comp. Herod. vii. 43; Xenoph. *Hellen.* vi. 4; Sueton. *Calig.* 14). Offerings were also either public or private, prescribed or free-will. Sometimes they were presented by an individual, sometimes by a family; once, or at regular and periodic intervals (1 Sam. i. 24; Job i. 5; 2 Macc. iii. 32). Foreigners were permitted to make offerings on the national altar (Num. xv. 14; 2 Macc. iii. 35; xiii. 23; Philo, *Legat.* p. 1014; Joseph. *c. Apion.* ii. 5). Offerings were made by Jews for heathen princes (1 Macc. vii. 33; Joseph. *Antiq.* xii. 2. 5). In the case of bloody-offerings the possessor, after he had sanctified himself (1 Sam. xvi. 5), brought the victim, in case of thank-offerings, with his horns gilded and with garlands, &c. (Joseph. *Antiq.* xiii. 8. 2; Winer, *Real-wörterb.* ii. 212, note 5) to the altar (Lev. iii. 1; xii. 4; xiv. 17), where, laying his hand on the head of the animal (Lev. i. 4; iii. 2; iv. 4), he thus, in a clear and pointed way, devoted it to God. Having so done he proceeded to slay the victim himself (Lev. iii. 2; iv. 4); which act might be, and in later times was, done by the priests (2 Chron. xxix. 24), and probably by the Levites (Hottinger, *De Functionibus Sacerdot. circa victimam*, Marb. 1706). The blood was taken, and, according to the kind of offering, sprinkled upon the altar, or brought into the temple and there shed upon the ark of the covenant and smeared upon the horns of the altar of incense, and then the remainder poured forth at the foot of the altar of burnt-offerings. Having slain the animal, the offerer struck off its head (Lev. i. 6), which when not burnt (Lev. iv. 11) belonged either to the priest (Lev. vii. 8), or to the offerer (comp. Mishna, *Zebach.* xii. 2). The victim was then cut into pieces (Lev. i. 6; viii. 20), which were either all, or only the best and most tasty, set on fire on the altar by the priests or the offerer, or must be burnt without the precincts of the holy city. The treatment of doves may be seen in Lev. i. 14, sq.; v. 8 (see Hottinger, *De Sacrificiis Avium*, Marb. 1706). In some sacrifices heaving (תרומה) and waving (תנופה) were usual either before or after the slaying.

The annual expense of offerings, including those made by individuals as well as the nation, must have been considerable. It may, however, be said that the country produced on all sides in great abundance most of the required objects, and that there were numerous forests whence wood for use in sacrifice was procured. At later periods of the nation foreign princes, desirous of conciliating the goodwill of the Jews, made large contributions both of natural objects and of money towards the support of the ceremonial of public worship (Ezra vi. 9; 1 Macc. x. 39; 2 Macc. iii. 3; ix. 16; Joseph. *Antiq.* xii. 3. 3). The place where offerings were exclusively to be presented was the outer court of the national sanctuary, at first the Tabernacle, afterwards the Temple. Every offering made elsewhere was forbidden under penalty of death (Lev. xvii. 4, sq.; Deut. xii. 5, sq.; comp. 1 Kings xii. 27). The precise spot is laid down in Lev. i. 3; iii. 2, 'at the door of the tabernacle of the congregation before the Lord.' According to the Mishna (*Zebach.* c. 5), offerings were to be slain partly on the north side of the altar, and, if they were inconsiderable, at any part of the outer court. The object of these regulations was to prevent any secret idolatrous rites from taking place under the mask of the national ritual; and a common place of worship must have tended considerably to preserve the unity of the people, whose constant disagreements required precautions of a special kind (1 Kings xii. 27). The oneness, however, of the place of sacrifice was not strictly preserved in the troubled period of the Judges, nor indeed till the time of David (1 Kings iii. 2, 3). Offerings were made in other places besides the door of the Tabernacle (1 Sam. vii. 17; Judg. ii. 5). High places, which had long been used by the Canaanites, retained a certain sanctity, and were honoured with offerings (Judg. vi. 26; xiii. 19). Even the loyal Samuel followed this practice (1 Sam.), and David endured it (1 Kings iii. 2). After Solomon these offerings on high places still continued. In the kingdom of Israel, cut off as its subjects were from the holy city, the national temple was neglected.

Offerings being regarded as an expression of gratitude and piety, and required as a necessary part of ordinary private life, were diligently and abundantly presented, failure in this point being held as a sign of irreligion (Ps. lxvi. 15; cx. 3; Jer. xxxvii. 11; Matt. viii. 4; Acts xxi. 26; Isa. xliii. 23). Offerings were sworn by, as being something in themselves holy, from the purpose to which they were consecrated (Matt. xxiii. 18). And in the glowing pictures of religious happiness and national prosperity which the poets drew, there is found an ideal perfection of this essential element of Israelitish worship (Isa. xix. 21; lvi. 7; lx. 7; Zech. xiv. 21; Jer. xvii. 26; xxxiii. 18); and deprivation of this privilege was among the calamities of the period of exile (Hos. iii. 4).

Under the load and the multiplicity of these outward ordinances, however, the Hebrews forgot the substance, lost the thought in the symbol, the thing signified in the sign; and, failing in those devotional sentiments and that practical obedience which offerings were intended to prefigure and cultivate, sank into the practice of mere dead works. Hereupon began the prophets to utter their admonitory lessons, to which the world is indebted for so many graphic descriptions of the real nature of religion and the only true worship of Almighty God (Isa. i. 11; Jer. vi. 20; vii. 21, sq.; Hos. vi. 6; Amos v. 22; Micah vi. 6, sq.; comp. Ps. xl. 6; li. 17, sq.; Prov. xxi. 3). Thus the failures of one church prepared the way for the higher privileges of another, and the law

proved a schoolmaster to bring us to Christ (Matt. v. 23; Gal. iii. 24). Even before the advent of our Lord pious and reflecting men, like the Essenes, discovered the lamentable abuses of the national ritual, and were led to abstain altogether from the customary forms of a mere outward worship (Joseph. *Antiq.* xviii. 1. 5). The 50th Psalm must have had great influence in preparing the minds of thinking men for a pure and spiritual form of worship, the rather because some of its principles strike at the very root of all offerings of a mere outward kind: thus, 'I will take no bullock out of thy house, nor he-goats out of thy folds; for every beast of the forest is mine, and the cattle upon a thousand hills. If I were hungry I would not tell thee; for the world is mine, and the fulness thereof. Will I eat the flesh of bulls or drink the blood of goats? Offer unto God thanksgiving.' Indeed the conception and composition of such a noble piece show what great progress the best cultivated minds had made from the rudimental notions of primitive times, and may serve of themselves to prove that with all the abuses which had ensued, the Mosaic ritual and institutions were admirably fitted to carry forward the education of the mind of the people. Thus was the Hebrew nation, and through them the world, led on so as to be in some measure prepared for receiving the Gospel of the Lord Jesus, in which all outward offerings are done away, the one great offering being made, and all those who are members of the church are required to offer themselves, body, soul and spirit, a holy offering to the Lord (Heb. x.; Rom. xii.). 'By Him therefore let us offer the sacrifice of praise to God continually, that is, the fruit of our lips, giving thanks to his name. But to do good and to communicate forget not; for with such sacrifices God is well pleased' (Heb. xiii. 15, 16; Matt. ix. 13; xii. 7; Rom. xv. 16; Phil. ii. 17; 2 Tim. iv. 6).

Lightfoot's work, *De Ministerio Templi*, is especially to be recommended on this subject; see also Outram, *De Sacrif.;* Reland, *Antiq. Sacr.* iii. 1; Bauer, *Gottesd. Verfass.* i. 80, sq.; Rosenmüller, *Excurs.* I. *ad Lev.* The Jewish doctrines on offerings may be found in the treatises *Sebachim*, *Menachoth*, and *Temura;* a selection from which, as well as from the Rabbins, is given in that useful little work, Othon. *Lex. Talmud.* p. 621, sq.; see Ugolin. *Thesaur.* tom. xix.—J. R. B.

OG (עוֹג, *giant;* Sept. Ὤγ), an Amoritish king of Bashan (Num. xxi. 33; xxxii. 33; Deut. iv. 47; xxxi. 4). In form he was a giant, so that his bedstead was preserved as a memorial of his huge stature (Deut. iii. 11; Josh. xiii. 12) [Bed]. He was defeated by the Israelites under Moses (Num. xxi. 33; Deut. i. 4; iii. 3); and his country, which contained many walled cities (Deut. iii. 4-10), was assigned to the tribe of Manasseh (Deut. iii. 13; Josh. xiii. 30) [Amorites; Bashan; Giant].

OIL (שֶׁמֶן; Sept. ἔλαιον) was far more extensively used among the ancient Hebrews than in our northern climate. The use of oil is equally general throughout Western Asia at the present time, as it was in primitive ages. Oil was much used instead of butter and animal fat, at meals and in various preparations of food (see Food, and comp. Ezek. xvi. 13). In such uses oil, when fresh and sweet, is more agreeable than animal fat. The Orientals think so; and Europeans soon acquire the same preference. Oil was also in many cases taken as a meat-offering (Lev. v. 11; Num. v. 15); and it was then mixed with the meal of oblation (Exod. xxix. 40; Lev. ii. 4; vi. 21; vii. 12; Num. vi. 15) [Offering]. The rite of sprinkling with oil, as a libation, does not occur in the law, but seems to be alluded to in Micah vi. 7.

The application of oil to the person has been described in the article Anointing. Whether for luxury or ceremony, the head and beard were the parts usually anointed (Deut. xxviii. 40; 2 Sam. xiv. 2: Ps. xxiii. 5; xcii. 11; civ. 15; Luke vii. 46); and this use of oil became at length proverbially common among the Israelites (Prov. xxi. 17).

The employment of oil for burning has been illustrated in the article Lamps. It is only necessary to add, that for this, and indeed for most other purposes, olive-oil was considered the best, and was therefore used in the lamps of the tabernacle. The custom of anointing the diseased and the dead has been noticed in the article Anointing; and for the use and composition of fragrant oils and ointments, see Perfumes.

The numerous olive-plantations in Palestine made olive-oil one of the chief, and one of the most lucrative products of the country: it supplied an article of extensive and profitable traffic with the Tyrians (Ezek. xxvii. 17; comp. 1 Kings v. 11); and presents of the finer sorts of olive-oil were deemed suitable for kings. There is in fact no other kind of oil distinctly mentioned in Scripture; and the best, middling, and inferior oils appear to have been merely different qualities of olive-oil. The berries of the olive-tree were sometimes plucked, or carefully shaken off by the hand, before they were ripe (Deut. xxiv. 20; Isa. xvii. 6; xxiv. 13). If while they were yet green, instead of being thrown into the press, they were only beaten or squeezed, they yielded the best kind of oil. It was called *Ophacinum*, or the oil of unripe olives, and also 'beaten' or 'fresh oil' (Exod. xxvii. 20). There were presses of a peculiar kind for preparing oil called גַּת שְׁמֶן, *gath-shemen* (whence the name Gethsemane, or 'oil-press,' Matt. xxvi. 36; John xviii. 1), in which the oil was trodden out by the feet (Micah vi. 15). The first expression of the oil was better than the second, and the second than the third. Ripe olives yielded the least valuable kind of oil, but the quantity was more abundant. The best sort of oil was prepared with fragrant spices, and was used in anointing; the inferior sorts were used with food and for lamps.

OLIVE-TREE. [Zayit.]

OLIVES, MOUNT OF, a mountain or ridge now called by the Arabs Jebel et-Tur, lying to the east of Jerusalem, from which it is separated only by the narrow valley of Jehoshaphat. Towards the south it sinks down into a lower ridge, over against the so-called 'well of Nehemiah,' now called by Franks the Mount of Offence, in allusion to the idolatrous worship established by Solomon 'on the hill that is before,' that is, eastward of 'Jerusalem.' In this direction lies the usual road to Bethany, so often trodden by our Saviour. About a mile towards the north is

another summit, nearly or quite as high as the middle one. The ridge between the two bends slightly eastward, leaving room for the valley below to expand somewhat in that part. The view of the Holy City and of the Dead Sea, from the southern summit, is described in the article JERUSALEM; that from the northern summit does not embrace the Dead Sea. The elevation of the central peak of the Mount of Olives is stated by Schubert (*Reise*, ii. 341) at 2556 Paris feet, or 416 Paris feet above the valley of Jehoshaphat; and hence it appears to be 175 Paris feet above the highest part of Mount Zion. Beyond the northern summit the ridge sweeps round towards the west, and spreads out into the high level tract north of the city, which is skirted on the west and south by the upper part of the valley of Jehoshaphat (Robinson's *Researches*, ii. 405-407; Olin's *Travels*, ii. 127). This inconsiderable ridge derives all its importance from its connection with Jerusalem, and from the sacred associations which hence became connected with it. To the mount whose ascent David 'went up, weeping and barefoot,' to which our Saviour ofttimes withdrew with his disciples, over which he often passed, and from which he eventually ascended into heaven, belongs a higher degree of sacred and moral interest than is to be found in mere physical magnitude, or than the record connects even with Lebanon, Tabor, or Ararat.

OLYMPAS (Ὀλυμπᾶς), a Christian at Rome, whom Paul salutes in his Epistle to the Romans (Rom. xvi. 15).

OMEGA (Ω), the last letter of the Greek alphabet, proverbially applied to express the end, as Alpha (A), the first letter, the beginning of any thing [ALPHA].

OMER [WEIGHTS AND MEASURES].

OMRI (עָמְרִי, *God-taught;* Sept. Ἀμβρί), sixth king of Israel, who began to reign in B.C. 929, and reigned twelve years. He was raised to the throne by the army, while it was engaged in the siege of Gibbethon, a Levitical city in Dan, of which the Philistines had gained possession, when the news came to the camp of the death of Elah, and the usurpation of Zimri. On this, the army proclaimed their general, Omri, king of Israel. He then lost not a moment, but leaving Gibbethon in the power of the infidels, went and besieged his competitor in Tirzah. But he was no sooner delivered of this rival [ZIMRI], than another appeared in the person of Tibni, whom a part of the people had raised to the throne, probably from unwillingness to submit to military dictation. This occasioned a civil war, which lasted six years, and left Omri undisputed master of the throne, B.C. 925. His reign lasted six years more, and its chief event was the foundation of Samaria, which thenceforth became the capital city of the kingdom of Israel (1 Kings xvi. 15-28). [SAMARIA.]

ON (אוֹן, *strength;* Sept. Ἀύν), a chief of the tribe of Reuben, who was one of the accomplices of Korah in the revolt against the authority of Moses and Aaron. He is mentioned among the leaders of this conspiracy in the first instance (Num. xvi. 17), but does not appear in any of the subsequent transactions, and is not by name included in the final punishment. The Rabbinical tradition is, that the wife of On persuaded her husband to abandon the enterprise.

ON (אוֹן; Sept. Ἡλιούπολις), one of the oldest cities in the world, situated in Lower Egypt, about two hours N.N.E. from Cairo. The Septuagint translates the name On by Heliopolis, which signifies 'city of the sun;' and in Jer. xliii. 13, it bears a name, Beth-shemesh (oppidum solis, Pliny, *Hist. Nat.* v. 11), of equivalent import. On is a Coptic and ancient Egyptian word, signifying light and the sun (Ritter, *Erdk.* i. 822). The site is now marked by low mounds, enclosing a space about three quarters of a mile in length by half a mile in breadth, which was once occupied by houses and by the celebrated Temple of the Sun. This area is at present a ploughed field, a garden of herbs; and the solitary obelisk which still rises in the midst of it is the sole remnant of the former splendours of the place. In the days of Edrisi and Abdallatif the place bore the name of Ain Shems; and in the neighbouring village, Matariyeh, is still shown an ancient well bearing the same name. Near by it is a very old sycamore, its trunk straggling and gnarled, under which legendary tradition relates that the holy family once rested (Robinson's *Biblical Researches*, i. 36). Heliopolis was the capital of a district or nomos bearing the same name (Plin. *Hist. Nat.* v. 9; Ptolem. iv. 5).

440.

The place is mentioned in Gen. xli. 45, where it is said that Pharaoh gave to Joseph a wife, Asenath, the daughter of Poti-pherah, priest of On (ver. 50). From the passage in Jeremiah (*ut supra*), it may be inferred that it was distinguished for idolatrous worship: 'He shall break also the images of Beth-shemesh that is in the land of Egypt, and the houses of the gods of the Egyptians shall he burn with fire.' The names, 'City of the Sun,' 'Temples of the Sun,' connected with the place, taken in conjunction with the words just cited from the prophet, seem to refer the mind to the purer form of worship which prevailed at a very early period in Egypt, namely,

the worship of the heavenly bodies, and thence to carry the thoughts to the deteriorations which it afterwards underwent in sinking to the adoration of images and animals.

The traces of this city which are found in classic authors correspond with the little of it that we know from the brief intimations of Holy Writ. According to Herodotus (ii. 59), Heliopolis was one of the four great cities that were rendered famous in Egypt by being the centres of solemn religious festivals, which were attended by splendid processions and homage to the gods. In Heliopolis the observance was held in honour of the sun. The majesty of these sacred visits may be best learned now by a careful study of the temples (in their ruins) in which the rites were performed (Wilkinson's *Anc. Egyptians*). Heliopolis had its priesthood, a numerous and learned body, celebrated before other Egyptians for their historical and antiquarian lore; it long continued the university of the Egyptians, the chief seat of their science (Kenrick's *Herod.* ii. 3; Wilkinson); the priests dwelt as a holy community in a spacious structure appropriated to their use. In Strabo's time the halls were to be seen in which Eudoxus and Plato had studied under the direction of the priests of Heliopolis. A detailed description of the temple, with its long alleys of sphinxes, obelisks, &c., may be found in Strabo (xvii.; Joseph. *c. Apion.* ii. 2), who says that the mural sculpture in it was very similar to the old Etruscan and Grecian works. In the temple a bullock was fed—a symbol of the god Mnevis. The city suffered heavily by the Persian invasion. From the time of Shaw and Pococke, the place has been described by many travellers. At an early period remains of the famous temple were found. Abdallatif (A.D. 1200) saw many colossal sphinxes, partly prostrate, partly standing. He also saw the gates or propylæa of the temple covered with inscriptions; he describes two immense obelisks whose summits were covered with massive brass, around which were others one-half or one-third the size of the first, placed in so thick a mass that they could scarcely be counted; most of them thrown down. An obelisk which the Emperor Augustus caused to be carried to Rome, and placed in the Campus Martius, is held by Zoega (*De Orig. et Usu Obelisci*) to have been brought from Heliopolis, and to have owed its origin to Sesostris. This city furnished works of art to Augustus for adorning Rome, and to Constantine for adorning Constantinople. Ritter (*Erdkunde*, i. 823) says that the sole remaining obelisk is from 60 to 70 feet high, of a block of red granite, bearing hieroglyphics which remind the beholder of what Strabo terms the Etruscan style. 'The figure of the cross which it bears (*crux ansata*) has attracted the special notice of Christian antiquaries' (Ritter).—J. R. B.

ONAN (אוֹנָן, *strong, stout;* Sept. Αὐνάν), second son of Judah, who, being constrained by the obligations of the ancient Levirate law to espouse Tamar, his elder brother's widow, took means to frustrate the intention of this usage, which was to provide heirs for a brother who had died childless. This crime, rendered without excuse by the allowance of polygamy, and the seriousness of which can scarcely be appreciated but in respect to the usages of the times in which it was committed, was punished by premature death (Gen. xxxviii. 4, sq.).

ONESIMUS (Ὀνήσιμος, *profitable*), a slave belonging to Philemon of Colossæ, who fled from his master, and proceeded to Rome, where he was converted by St. Paul, who sent him back to his master, a friend and convert of the apostle, with an eloquent letter, the purport of which is described in the article PHILEMON. Onesimus, accompanied by Tychicus, left Rome with not only this epistle, but with those to the Ephesians and Colossians (Col. iv. 9). It is believed that Onesimus, anxious to justify the confidence which Paul reposed in him, by appearing speedily before his master, left Tychicus to take the Epistle to the Ephesians; and hastened to Colossæ, where he doubtless received the forgiveness which Paul had so touchingly implored for him as 'a brother beloved' (*Canon. Apost.* 73). An uncertain tradition makes Onesimus to have been bishop of Beræa, where he is said to have suffered martyrdom (*Const. Apostol* vii. 46). The part which Paul took in this difficult and trying case is highly honourable to him; while for Onesimus himself, the highest praise is, that he obtained the friendship and confidence of the apostle.

ONESIPHORUS (Ὀνησίφορος, *profit-bringer*), a believer of Ephesus, who came to Rome during the second captivity of St. Paul in that city; and having found out the apostle, who was in custody of a soldier, to whose arm his own was chained, was 'not ashamed of his chain,' but attended him frequently, and rendered him all the services in his power. This faithful attachment, at a time of calamity and desertion, was fully appreciated and well remembered by the apostle, who, in his Epistle to Timothy, carefully records the circumstance; and, after charging him to salute in his name 'the household of Onesiphorus,' expresses the most earnest and grateful wishes for his spiritual welfare (1 Tim. ii. 16-18). It would appear from this that Onesiphorus had then quitted Rome.

ONION. [BETZAL.]

ONYX. [YAHALOM.]

OPHEL (הָעֹפֶל; Sept. Ὤφάλ), a place or quarter of Jerusalem near the walls (2 Chron. xxvii. 3; xxxiii. 44), on the east side (Neh. iii. 26; xi. 21). Ophel, or, as he calls it, Ophla (Ὀφλά, Ὀφλάς), is often mentioned by Josephus as adjoining the valley of the Kidron and the temple mount (*De Bell. Jud.* v. 6. 1; vi. 6. 3). He explains himself more precisely in v. 4. 2, where he makes the first wall of the city to extend from the tower of the Essenes over Siloam and the pools of Solomon to Ophel. From these intimations Winer collects that Ophel was a high or ascending place, built over (in the ancient city) with houses. This view is confirmed by Dr. Robinson, who identifies it with the low ridge which extends southward from the temple mount to Mount Zion, between the exterior valley of Jehoshaphat and the interior valley of Tyropœon. The top of this ridge is flat, descending rapidly towards the south, sometimes by offsets of rocks; and the ground is now tilled and planted with olive and other fruit trees. This ridge is considerably below the level of Mount Moriah; its length is 1550 feet, and its breadth in the

middle part, from brow to brow, 290 feet (Winer, *s. v.* 'Ophel;' Robinson, ii. 349) [JERUSALEM].

OPHER (עפר; Arabic الغفر *algophro*), in the Song of Solomon (ch. iv. 5), denotes the calf or fawn of a stag (*ail*); it occurs in no other book of Scripture, is unknown in the Syriac and Chaldee, and appears to be only a poetical application of a term more strictly belonging to fawn-like animals; for in the above passage it is applied to couples feeding in a bed of lilies—indications not descriptive of young goats or stags, but quite applicable to the Antilopine groups which are characterized in Griffith's Cuvier, in subgenus X. *Cephalophus*, and XI. *Nectragus;* both furnishing species of exceeding delicacy and graceful diminutive structures, several of which habitually feed in pairs among shrubs and geraniums on the hilly plains of Africa; and as they have always been and still are in request among the wealthy in warm climates for domestication, we may conjecture that a species designated by the name of Opher (עפר, perhaps alluding to אופיר, Ophir, or even Africa), was to be found in the parks or royal gardens of a sovereign so interested in natural history as Solomon was, and from the sovereign's own observation became alluded to in the truly apposite imagery of his poetical diction (Cant. iv. 12). Among the species in question, in which both male and female are exceedingly similar, and which might have reached him by sea or by caravan, we may reckon *Cephalophus Grimmia, C. Perpusilla, C. Philantomba*, all marked by a small black tuft of hair between their very short horns, as also the *Neotragus Pygmea*, or Guevei, the smallest of cloven-footed animals, and the Madoka, with speckled legs; all these species being natives of Central Africa, and from time immemorial brought by caravans from the interior, for sale or presents.—C. H. S.

OPHIR occurs first, as the proper name of one of the thirteen sons of Joktan, the son of Eber, a great-grandson of Shem, in Gen. x. 26-29 (אוֹפִר; Sept. Οὐφείρ; Vulg. *Ophir*). Many Arabian countries are believed to have been peopled by these persons, and to have been called after their respective names, as Sheba, &c., and among others Ophir (Bochart, *Phaleg*, iii. 15). Ophir occurs also as the name of a place, country, or region, famous for its gold, which Solomon's ships visited in company with the Phœnician (אוֹפִיר; Sept. Οὐφίρ; Alex. Οὐφείρ: Σουφίρ, Σουφείρ, Σωφίρ, Σωφιρά; Alex. Σωφαρά and Σωφηρά; Ald. Σαπφείρ; Cam. Ὀπφείρ; Alex. and Cam. Ὤφειρ; Vulg. *Ophir*). The difficulty is to ascertain where Ophir was situated. Some writers, reasoning from the etymology of the word, which is supposed to mean dust, &c., have inferred almost every place where gold dust is procured in abundance. Others have rested their conclusions upon the similarity of the name in Hebrew to that of other countries, as for instance Aphar, a port of Arabia mentioned by Arrian in his *Periplus of the Erythræan Sea;* or upon the similarity of the name in the Sept., Σωφιρά; hence Sofala, &c.: and others, by a transposition of the letters of the Hebrew word, have, among other conjectures, even made out Peru! By such methods of investigation the following countries, among others, have been proposed: Melindah on the coast of Africa, Angola, Carthage, St. Domingo, Mexico, New Guinea, Urphe an island in the Red Sea, and Ormuz in the Persian Gulf. Bochart thinks that the Ophir from which David obtained gold (1 Chron. xxix. 4) was the Cassanitis of Ptolemy and Stephanus, on the coast of Arabia; while that visited by the fleet of Solomon was Taprobanê, now called Ceylon (*Geogr. Sacra*, ii. 27). Pegu is the place selected by Maffæi (*Hist. Ind.* lib. i.). Others decide in favour of the peninsula of Malacca, which abounds in precious ores, apes, and peacocks: others prefer Sumatra, for the same reason. Lipenius, relying on the authority of Josephus, Theodoret, and Procopius, who call Ophir 'the golden land,' 'the golden chersonese,' says that the children of Joktan peopled all the countries bounded by the eastern seas, and that Ophir includes not only Sumatra or Malacca, but every coast and island from Ceylon to the Indian Archipelago. We shall now lay before the readers what we conceive to be the exact amount of our information respecting Ophir, and show how far it applies to what appear to us to be the three most probable theories respecting its situation, namely, Arabia, Africa, and India. Ophir is mentioned in the following thirteen passages: Gen. x. 29; 1 Chron. i. 23; 1 Kings ix. 28; 2 Chron. viii. 18; ix. 10; 1 Kings x. 11; xxii. 48; 1 Chron. xxix. 4; Job xxii. 24; xxviii. 16; Ps. xlv. 9; Isa. xiii. 12; Ecclus. vii. 18. Only seven of these passages afford even the slightest clue to its position, and these are reduced to three when the parallel passages and texts in which Ophir is not a local name have been withdrawn. We further think that the situation of Tarshish is not in any way connected with this inquiry. It is indeed said, in reference to the voyage to Ophir, that 'Solomon had at sea a navy of Tarshish, and that once in three years came the navy of Tarshish' (1 Kings x. 22); and that 'Jehoshaphat made ships of Tarshish to go to Ophir for gold' (1 Kings xxii. 48); but the word may denote large merchant ships bound on long voyages, perhaps distinguished by their construction from the common Phœnician ships, even though they were sent to other countries instead of Tarshish (compare the English naval phrase, an Indiaman, and see Isa. xxiii. 1; lx. 9; Ps. xlviii. 7; Isa. ii. 16); and although the Tarshish ships which went to Ophir (1 Kings xxii. 48, &c.) are expressly said by the writer of Chronicles to have gone to Tarshish (2 Chron. ix. 21; xx. 36, 37), yet in the interval between the composition of the books of Kings and that of Chronicles the name was most probably transferred to denote any distant country [TARSHISH]. The utmost that can be said is, that Solomon sent ships to Tarshish as well as to Ophir, but it cannot be proved that the same ships are meant, or that they went to both places in the same voyage. It seems to us most probable that Solomon sent direct to Ophir for gold, wherever it might be; and that, whereas it had been hitherto procured from thence by David, &c. by foreign merchants, Solomon fitted out a fleet to obtain it at first hand. Neither do we think that the time occupied by the voyage to Ophir is precisely determinable from the words 'once in three years came the navy' (1 Kings x. 22). Upon the whole then our information ap-

pears to amount to this, that King Solomon made a navy of ships in Ezion-geber, which is beside Eloth, on the shore of the Red Sea, in the land of Edom, and that his Phœnician neighbour and ally, Hiram, king of Tyre, sent in this navy his servants, shipmen that had knowledge of the sea, with the servants of Solomon, and that they came to Ophir, and fetched from thence gold, and brought it to Solomon (1 Kings ix. 26-29), and that they brought in the same voyage algum or almug-trees and precious stones (1 Kings x. 11), silver, ivory, apes, or rather monkeys, and peacocks, or, according to some, pheasants, and to others, parrots; and that gold in great abundance and of the purest quality was procured from Ophir (1 Chron. xxix. 4; Job xxviii. 16), rendered by Symmachus χρυσὸς πρωτεῖος, (Ps. xlv. 9; Isa. xiii. 12); Vulg. *mundo obrizo*, (Ecclus. vii. 18). The first theory which appears to be attended with some degree of evidence not purely fanciful is that Ophir was situate in Arabia. In Gen. x. 29, Ophir stands in the midst of other Arabian countries. Still, as Gesenius observes, it is possibly mentioned in that connection only on account of its being an Arabian colony planted abroad. Though gold is not now found in Arabia (Niebuhr, *Description de l'Arabie*, Copenhague, 1773, p. 124), yet the ancients ascribe it to the inhabitants in great plenty (Judg. viii. 24, 26; 2 Chron. i.; 1 Kings x. 1, 2; Ps. lxxii. 15). This gold, Dr. Lee thinks, was no other than the gold of Havilah (Gen. ii. 11), which he supposes to have been situate somewhere in Arabia, and refers to Gen. x. 7, 29; xxv. 18; 1 Sam. xv. 7; 1 Chron. i. 9 (*Translation of the Book Job, &c.*, Lond. 1837, p. 55). But Diodorus Siculus ascribes gold mines to Arabia: Μεταλλεύεται δὲ καὶ κατὰ την Ἀραβίαν καὶ ὁ προσαγορεύομενος ἄπυρος χρυσὸς (comp. Gen. ii. 12), οὐχ ὥσπερ παρὰ τοῖς ἄλλοις ἐκ ψηγμάτων καθεψομένος, ἀλλ' εὐθὺς ὀρυττόμενος εὑρίσκεται (ii. 50). He also testifies to the abundance of 'precious stones' in Arabia (ii. 54), especially among the inhabitants of Sabas (iii. 46; comp. Gen. ii. 12; 2 Chron. ix. 1; 1 Kings x. 1, 2). Pliny also speaks of the 'Sabæi ditissimi auri metallis' (*Hist. Nat.* vi. 32). Again, 'Littus Hammæum, ubi auri metalla' (*ib.*). Others suppose that though Ophir was situate somewhere on the coast of Arabia, it was rather an emporium, at which the Hebrews and Tyrians obtained gold, silver, ivory, apes, almug-trees, &c., brought thither from India and Africa by the Arabian merchants, and even from Ethiopia, to which Herodotus (iii. 114) ascribes gold in great quantities, elephants' teeth, and trees and shrubs of every kind. Apes, properly speaking, are also ascribed to it by Pliny (viii. 19); who speaks also of the confluence of merchandize in Arabia: 'Sabæi mirumque dictu, ex innumeris populis pars æqua in commerciis aut latrociniis degit: in universum gentes ditissimæ, ut apud quas maximæ opes Romanorum Parthorumque subsistant, vendentibus quæ e mari aut sylvis capiunt' (*ut supra*). A little before he speaks of the Arabian emporiums: 'Insulæ multæ: emporium eorum Acila, ex quo in Indiam navigatur.' Again: 'Thimaneos...Areni: oppidum in quo omnis negotiatio convenit' (comp. Strabo, xvi.; 2 Chron. ix.; Ezek. xxvii. 21, 22; and Diod. Sic. ii. 54). In behalf of the supposition that Ophir was the Arabian port Aphar, already referred to, it may be remarked that the name has undergone similar changes to that of the Sept. of Ophir; for it is called by Arrian Aphar, by Pliny Saphar, by Ptolemy Sapphera, and by Stephanus Saphirini. Grotius thinks his to be Ophir. The very name El Ophir has been lately pointed out as a city of Oman, in former times the centre of a very active Arabian commerce (Seetzen, in *Zachs. Monatl. Correspond.* xix. 331, ff.). In the article Ophir in the *Encyclopædia Londinensis*, great stress is laid upon the objection that if Ophir had been anywhere in Arabia or Asia, Solomon could have conveyed the commodities he procured from it by caravans: but surely a water-carriage was more convenient, at least for the algum-trees, which he procured from Ophir, and of which he made pillars for the house of the Lord and for the king's house (2 Chron. ix. 10, 11) [Algum], and which it is highly improbable he had the means of conveying by land. In favour of the theory which places Ophir in Africa, it has been suggested that we have the very name in אופיר *afri*, Africa, the Roman termination, Africa terra, and that Tarshish was some city or country in Africa; that the Chald. Targumist on 1 Kings xxii. 48 so understood it, where he renders תרשיש by אפריקה. He probably inferred from 2 Chron. xx. 36, that to go to Ophir and to Tarshish was one and the same thing, and that Tarshish there meant the name of a place. Origen also says, on Job. xxii. 24, that some of the interpreters understood Ophir to be Africa. Michaelis supposes that Solomon's fleet, coming down the Red Sea from Ezion-geber, coasted along the shore of Africa, doubling the Cape of Good Hope, and came to Tarshish, which he, with many others, supposes to have been Tartessus in Spain, and thence back again the same way; that this conjecture accounts for their three years' voyage out and home; and that Spain and the coasts of Africa furnished all the commodities which they brought back (*Spicileg. Geogr. Hebr. Exterœ.* p. 98). Strabo indeed says that Spain abounded in gold, and immensely more so in silver (see 1 Mac. viii. 3). Others have not hesitated to carry Solomon's fleet round from Spain up the Mediterranean to Joppa. The chief support for this supposition is the very remarkable statement of Herodotus, that Necho, king of Egypt, the Pharaoh-Necho of Scripture, whose enterprising disposition appears from his project to unite the Nile and the Red Sea by a canal, 'dispatched some vessels, under the conduct of Phœnicians, with directions to pass by the columns of Hercules, now called the Straits of Gibraltar, and after penetrating the Northern Ocean to return to Egypt; that these Phœnicians, taking their course from the Red Sea, entered into the Southern Ocean, and on the approach of autumn landed in Libya, and planted some corn in the place where they happened to find themselves; that when this was ripe they cut it down and departed. Having thus consumed two years, they in the *third* year doubled the columns of Hercules, and returned to Egypt.' He adds, 'This relation may obtain attention from others, but to me it seems incredible, for they affirmed that, having sailed round Libya, they had the sun on their right hand.' Thus, he observes, 'was Libya for the first time known' (iv. 42). It seems certain that this

voyage was accomplished, for the mariners would have the sun on their right hand after passing the line, a fact which never could have been imagined in that age, when astronomy was in its infancy; and it has been supposed that this was the voyage made 'once in three years' by Solomon's fleet, under the conduct also of Phœnician mariners. But, assuming this to have been the case, it seems strange that the knowledge and record of it should have been so completely lost in the time of Pharaoh-Necho, only two centuries after Solomon, as that Herodotus, whose information and accuracy appear from this very account, should say that Libya, evidently meaning the circuit of it by the sea, was thus for the first time known. Heeren finds an answer in the desolating ravages of the Babylonian conquerors, and indeed in the protracted siege of Tyre itself by Nebuchadnezzar, which followed shortly after the time of Solomon. It seems likely indeed that Necho had heard of such a passage, and believed that the Phœnicians knew how to find it; and that it was not much frequented during many subsequent ages appears from the notice taken by Pliny of the few who had accomplished it (*Hist. Nat.* ii. 67); and it was, we know, after his time unused and forgotten till recovered by the Spaniards, A.D. 1497. It must be allowed that, if Solomon's fleet actually pursued this course, then Ophir as Africa, and Tartessus in Spain, as Tarshish, seem on many accounts very plausible suppositions. In behalf of the conjecture that Ophir was in India, the following arguments are alleged: that it is most natural to understand from the narrative that all the productions said to have been brought from Ophir came from one and the same country, and that they were all procurable only from India. The Sept. translators also appear to have understood it to be India, from rendering the word Σωφίρ, Σουφίρ, Σωφιρά, which is the Egyptian name for that country. Champollion says that, in the Coptic vocabularies India bears the name *Coϕsp* (*L'Egypte sous les Pharaons*, Paris, 1814, tom. i. p. 98; Jablonskii *Opuscula*, Lug. Bat., 1804, tom. i. p. 336, &c.). Josephus also gives to the sons of Joktan the locality from Cophen, an Indian river, and in part of Asia adjoining it (*Antiq.* i. 6. 4). He also expressly and unhesitatingly affirms that the land to which Solomon sent for gold was anciently called Ophir, but now the Aurea Chersonesus, which belongs to India' (*Antiq.* viii. 6. 4). The Vulgate renders the words 'the gold of Ophir' (Job xxviii. 16) by 'tinctis Indiæ coloribus.' Hesychius thus defines Σουφειρ· χώρα, ἐν οἱ πολύτιμοι λίθοι, καὶ ὁ χρυσός, ἐν Ἰνδίᾳ; and Suidas, Σουφείρ, χώρα ἐν Ἰνδίᾳ; and see Eusebii *Onomast.* p. 146, ed. Clerici. There are several places comprised in that region which was actually known as India to the ancients [INDIA], any of which would have supplied the cargo of Solomon's fleet: for instance, the coast of Malabar, where the natives still call the peacock *togei*, which is supposed to resemble the Hebrew תכיים. Perhaps the most probable of all is Malacca, which is known to be the Aurea Chersonesus of the ancients. It is also worthy of remark that the natives of Malacca still call their gold-mines *Ophirs*. De P. Poivre says, 'Les îles malaises produisent beaucoup de bois de teinture surtout du sapan, qui est le même que le bois de Bresil. On y trouve plusieurs mines d'or, qui les habitans de Malaca et de Sumatra nomment *ophirs*, et dont quelques-unes, surtout celles que renferme la côte orientale de Celebes, et les îles adjacentes, sont plus riches que toutes celles du Perou et du Bresil' (*Voyage d'un Philosophe, Œuvres Complettes*, Paris, 1797, p. 123). On the other hand, some writers give a wider extent to the country in question. Heeren observes that 'Ophir, like the name of all other very distant places or regions of antiquity, like Thule, Tartessus, and others, denotes no particular spot, but only a certain region or part of the world, such as the East or West Indies in modern geography. Hence Ophir was the general name for the rich countries of the south lying on the African, Arabian, or Indian coasts, as far as at that time known' (*Historical Researches, translated from the German*, Oxford, 1833, vol. ii. pp. 73, 74). It remains to be observed, that in Jer. x. 9 we have 'the gold from Uphaz,' אוּפָז; and in Dan. x. 5, 'the fine gold of Uphaz;' and see the Heb. of 1 Kings x. 18. In these instances Uphaz is, by a slight change of pronunciation, put for Ophir. The words of Daniel are quoted and paraphrased in Rev. i. 13, in a manner which shows this to be the true explanation of the difference. If the words 'the gold of Parvaim' (פַּרְוַיִם, 2 Chron. iii. 6) be really, as Bochart conjectures, the same with אוֹפִיר, the name had undergone a still wider alteration. It was by taking this for granted, and arguing from the similarity, that the wild conjecture that Ophir was Peru was obtained. The alterations suffered by the Septuagint words are before the reader. Among other works on this controversy not before referred to, see Wahner, *De Regione Ophir;* Tychsen, *De Commerc. Hebr.* in *Commentt. Gott.* xvi. 164, &c.; Huetii *Commentatio de Navigatione Salomonis;* Reland, *Dissertt. Miscell.* i. 172; or in Ugolini *Thesaurus*, vii.—J. F. D.

1. OPHRAH (עָפְרָה; Sept. Ἐφραθά), a town of Benjamin (Josh. xviii. 23), seemingly in the north-east of that tribe's domain (1 Sam. xiii. 17). Accordingly it is placed by Eusebius and Jerome (*Onomast.* s. v. Aphia) five Roman miles east of Bethel. This corresponds with the position of a place called et-Taiyibeh, which was visited by Dr. Robinson in his excursion to Bethel (*Bibl. Researches*, ii. 120-123). It is now a small village, curiously situated upon a conical hill, on the summit of which is an old tower, whence is commanded a splendid view of the valley of the Jordan, the Dead Sea, and the eastern mountains.

2. OPHRAH, a town in the tribe of Manasseh, to which Gideon belonged, and where he continued to reside after he had delivered Israel from the Midianites, establishing there his ephod, which became a snare to Israel (Judg. vi. 11-24; viii. 27). Josephus calls the place Ephra (*Antiq.* v. 6. 5). It cannot be positively determined from the narrative, whether this Ophrah was in the territory of Manasseh east or west of the Jordan; and no satisfactory attempt to fix the site has yet been made.

OREB and ZEEB (עֹרֵב וְזְאֵב; Sept. Ὀρὴβ καὶ Ζήβ), the remarkable names (*raven and wolf*) of two emirs of the Midianites, who were made prisoners by the Ephraimites in attempting

to recross the Jordan after the victory of Gideon. They were put to death by the captors, and their heads carried as a trophy to the conqueror, who was then on the other side the Jordan (Judg. vii. 25; viii. 3). The first of these princes met his death near a rock, which thenceforth bore his name (Isa. x. 26); the other seems to have at first sought refuge in one of those excavations in which wines were preserved, and which was thenceforth called the winepress of Zeeb (Judg. vii. 25).

OREB, or Orebim (עֹרֵב or עֲרָבִים), written also Arab and Arabim, occurs in several passages of Scripture, in all of which it is translated *willow* in the Authorized, and most other modern versions. This sense has been inferred from the similarity of the word *arab* to the Arabic ضرب *gharb*, and from the most ancient Greek translators adopting ἰτέα as the synonyme of the Hebrew *arab*. But it is also similar to another Arabic word, *ghurab*, signifying *crows*; whence probably some of the early translators have adopted this as the meaning of the Hebrew word. Thus the Arabic translator has, in Job xl. 17, adopted ضرنان, *corvos*, as the interpretation of *arabim*. So also the Septuagint, in Isa. xv. 7, gives the same interpretation to this word, and has thus been the cause of error and confusion. Moreover, in Lev. xxiii. 40, after ἰτέας it adds without authority ἄγνου κλάδους, *ramulos agni*, and has adopted ἄγνου in Job xl. 17 (Cels. *Hierobot.* i. 304). Ἄγνος is intended, no doubt, for the plant which by botanists is now called *Vitex agnus castus*, and was at one time called *Salix amerina*.

There is, however, little doubt of 'willow' being the correct interpretation, from its suitableness to all the passages. Thus in Job xl. 22, referring to behemoth it is said, 'The shady trees cover him with their shadow; the *willows* (*orabim*) *of the brook* compass him about.' So the Jews when in captivity sing, 'By the rivers of Babylon, there we sat down; we hanged our harps upon the willows (*orebim*) in the midst thereof' (Ps. cxxxvii.) And again, in Isa. xliv. 4, 'And they shall spring up as among the grass, as willows (*orebim*) of the water-courses.' The willow is as applicable as any other plant to the other passages, quoted above, in which orebim is mentioned.

The word *gharb* is in the present day applied in many parts of the East to the poplar (which one of the Latin versions gives for the Heb. *oreb*, Cels.; 304), a genus closely allied to the willow, and forming with it the group of Salicineæ in modern botany. The words *arab* and *gharb* do not differ so much in the Arabic as they appear to do in the English dress; for the initial letters are *ain* and *ghain*, between which mutual interchanges frequently take place.

That willows grow in moist situations, and in the neighbourhood of both still and running water, is sufficiently well known. That they are common in Judæa is evident from what Reland says: 'Salices, tamarisci, agnus castus, et cannæ ingentes, quæ usum hastarum præbent, crescunt ad ripam Jordanis, uti referunt αὐτίπται.' So also on the banks of the Nile, to which we may suppose Job alludes when he speaks of the behemoth being covered by the willows of the brook, *saliees torrentis* of the Latin version. In reference to this, Celsius quotes: 'Terram istam Nilus alluit ab oriente ad occidentem, ibique ad ripas ipsius nascuntur arundines Indicæ, arbores Ebeni, atque buxi, الخاز, item salicum et tamarisci, arborumque similium sylvæ latissimæ' (Geog. Nubiensis, *Clim.* i. p. 1). It hardly required to be proved that willows were found in Judæa and on the banks of the Nile, but still less does it require to be shown that the willow is common on the rivers of Babylon, for we have a species which is called *Salix Babylonica*, commonly known by the name of weeping willow, and which Celsius considers to be peculiarly the willow of the brook. Bochart says of the channels of the Euphrates, 'Quorum ripæ tam multis salicibus erant consitæ, ut Babylonia ideo vocetur, vallis salicum.' In all points, therefore, the willow seem well suited to the passages in which *orebim* occurs, though it is probable that this may have been used, like willow, in a generic rather than in a specific sense; but there is another word, which is also supposed to denote one of these willows [Zaphzaphah].—J. F. R.

OREN (אֹרֶן) occurs only once in Scripture, and is variously translated; but from the manner in which it is introduced, it is impossible to determine whether any of the translations are correct. The *oren* is mentioned with other trees, of whose timber idols were made, in Isa. xliv. 14: 'He heweth him down *cedars* (*eres*) and taketh the *cypress* (*tirsah*), and the *oak* (*allon*), which he strengtheneth for himself among the trees of the forest; he planteth an *ash* (*oren*), and the rain doth nourish it.' Though the English version renders it *ash*, others consider *pine-tree* to be the correct translation; but for neither does there appear to be any decisive proof, nor for the rubus or bramble, adopted for *oren* in the fable of the Cedar and Rubus, translated from the Hebrew of R. Berechia Hannakdan, by Celsius (*Hierobot.*, i. 186).

Oren is translated *pine*-tree both in the Greek Septuagint and the Latin Vulgate, and this has been acquiesced in by several of the most learned critics, and among them by Calvin and Bochart. Celsius (*l. c.* p. 191) states, moreover, that some of the Rabbins also consider *oren* to be the same as the Arabic *sunober* (which is no doubt a pine), and that they often join together, *arasim*, *aranim*, and *beroschim*, as trees of the same nature. Luther and the Portuguese version read cedar. Rosenmüller contends that it is not the common wild pine (*pinus sylvestris*) which is intended, but what the ancients called the domestic pine, which was raised in gardens on account of its elegant shape and the pleasant fruit it yields, the Pignole nuts of the Italians (*Pinus pinea* of Linnæus), and quotes Virgil as saying, 'Fraxinus in sylvis pulcherrima, pinus in hortis.'

The English version instead of *pine* gives *ash* as the translation of *oren*; in consequence probably of *ornus* having been adopted by several translators, apparently only because the elementary letters of the Hebrew are found also in the Latin word. Celsius objects to this as an insufficient reason for supposing that the ash was intended; and there does not appear to be any other proof. *Ornus europæa*, or manna ash, does, however,

grow in Syria, but being a cultivated plant, it may have been introduced. Celsius quotes from the Arab author, 'Abu l Fadli, the description of a tree called ارن *aran*, which appears well suited to the passage, though it has not yet been ascertained what tree is intended. The *aran* is said to be a tree of Arabia Petræa, of a thorny nature, inhabiting the valleys, but found also in the mountains, where it is however less thorny. The wood is said to be much valued for cleaning the teeth. The fruit is in bunches like small grapes. The berry is noxious while green, and bitter like galls; as it ripens it becomes red, then black and somewhat sweetish, and when eaten is grateful to the stomach, &c., and seems to act as a stimulant medicine. Sprengel supposes this to be the caper plant, *Capparis spinosa* of Linnæus. Faber thought it to be the *Rhamnus siculus pentaphyllus* of Shaw. Link identifies it with *Flacourtia sepiaria* of Roxburgh, a tree, however, which has not been found in Syria. To us it appears to agree in some respects with *Salvadora persica*, but not in all points, and therefore it is preferable to leave it as one of those still requiring investigation by some traveller in Syria conversant both with plants and their oriental names and uses.—J. F. R.

ORION. [Astronomy.]

ORON, or Arar (ערער) occurs in two or three places of Scripture, and has been variously translated, as *myrica*, *tamarisk*; *tamarin*, which is an Indian tree, the tamarind; *retama*, that is, the broom; and also, as in the French and English versions, *bruiere*, *heath*, which is perhaps the most incorrect of all, though Hasselquist mentions finding heath near Jericho, in Syria. As far as the context is concerned, some of these plants, as the *retam* and *tamarisk*, would answer very well; but the Arabic name, عرعر *arar*, is applied to a totally different plant, a species of juniper, as has been clearly shown by Celsius (*Hierobot.* p. ii. p. 195), who states that Arias Montanus is the only one who has so translated the Hebrew *arar* or *oror* (Jer. xvii. 6): 'For he shall be like the *heath* (*oror*) in the desert, and shall not see when good cometh, but shall inhabit the parched places in the wilderness, in a salt land, and not inhabited.' The word *arar*, in all the old Arabic authors, signifies a kind of juniper.

Several species of juniper are no doubt found in Syria and Palestine, as has already been mentioned under the head of Eres. Robinson met with some in proceeding from Hebron to Wady Musa, near the romantic pass of Nemela: 'On the rocks above we found the juniper tree, Arabic *ar'ar*; its berries have the appearance and taste of the common juniper, except that there is more of the aroma of the pine. These trees were ten or fifteen feet in height, and hung upon the rocks even to the summits of the cliffs and needles.' In a note the author says: 'This is doubtless the Hebrew ערוער *aroer* (Jer. xlvii. 6); whence both the English version and Luther read incorrectly *heath*. The juniper of the same translation is the *retem*' (*Bibl. Researches*, i. 506). In proceeding S.E. he states: 'Large trees of the juniper become quite common in the Wadys and on the rocks.' It is mentioned in the same situations by other travellers, and is no doubt common enough, particularly in wild, uncultivated, and often inaccessible situations, and is thus suitable to Jer. xlviii. 6: 'Flee, save your lives, and be like the *heath* (*oror*) in the wilderness.' In this passage, some authors propose reading *orud* instead of *oror* as the translators of the Septuagint seem to have done, for they render *oror* by ὄνος ἀγριος, *wild ass*. 'Be like the wild ass in the wilderness,' which is considered as agreeing well with the flight recommended. Mr. Taylor, in *Scripture Illustrated*, inquires whether the *orud*, wild ass, may not be the subject of both passages? This can only be settled by Hebrew scholars; we have shown that the juniper, from growing in wild and inaccessible places, is also suitable to the sense of both passages.—J. F. R.

OROTH (אורות) occurs in two passages of Scripture, where it is translated *herb* in the Authorised Version: it is generally supposed to indicate such plants as are employed for food. The most ancient translators seem, however, to have been at a loss for its meaning. Thus the Septuagint in one passage (2 Kings iv. 39) has only the Hebrew word in Greek characters, ἀριώθ, and in the other (Isa. xxvi. 19), 'Ίαμα, *sanationem*, v. medicinam, vel herbas medicinales.' The Latin Vulgate, and the Chaldee and Syriac versions, translate *oroth* in the latter passage by *lucem*, in consequence of confounding one Hebrew word with another, according to Celsius (*Hierobot.* vol. i. p. 459). But the Syriac and Arabic translators give the names for *mallows*, the Arabic خبيزا *khabeeza*, in Lower Egypt called *habeeza*.

With respect to the meaning of *oroth*, Rosenmüller says that it occurs in its original and general signification in Isa. xxvi. 19, viz. *green herbs*. The future restoration of the Hebrew people is there announced under the type and figure of a revival of the dead. '*Thy dew is a dew of green herbs*,' says the prophet, *i. e.* as by the dew, green herbs are revived, so shalt thou, being revived by God's strengthening power, flourish again. The passage, however, appears an obscure one, with respect to the meaning of *oroth*. Celsius has, with his usual learning, shown that mallows were much employed as food in ancient times. Of this there can be no doubt, but there is no proof adduced that *oroth* means mallows. It might or it might not, because there are many other plants which were and still are employed as articles of diet in the East, as purslane, goosefoot, chenopodiums, lettuce, endive, &c. Some have translated *oroth* in 2 Kings iv. 39, by the word *eruca*, which is usually applied to a species of brassica.

But it appears to us that *oroth* should be considered only in conjunction with *pakyoth*; for we find in 2 Kings iv. that when Elisha came again to Gilgal, and there was a dearth in the land, he said unto his servant, 'Set on the great pot, and seethe pottage for the sons of the prophets (ver. 39); and one went out into the field to gather *herbs* (*oroth*), and found a wild vine, and gathered thereof *wild gourds* (*pakyoth*) his lap full, and came and shred them into the pot of pottage, for they knew them not.' From this it would appear that *pakyoth* had been mistaken for *oroth*; and as the former is universally acknowledged to

be the *fruit* of one of the gourd tribe, so it is not unreasonable to conclude that *oroth* also was the fruit of some plant, for which the *pakyoth* had been mistaken. This is nothing more than conjecture, but it appears to be justified by the context, and may be admitted, as nothing better than conjecture has been adduced in support of other interpretations, and as there are fruits, such as that of the egg plant, which are used as articles of diet, and for which the fruit of the *pakyoth*, or wild gourd, might have been mistaken by an ignorant person [PAKYOTH].—J. F. R.

ORPAH (עָרְפָּה, *fawn;* Sept. Ὀρφά), daughter-in-law of Naomi, who remained behind among her kindred in Moab, when Ruth returned with Naomi to Bethlehem (Ruth i. 4-14) [RUTH].

OSPRAY. [AZANIAH.]

OSSIFRAGE. [PERES.]

OSTRICH (יַעֲנָה *yaanah*, poetically בת־היענה *bath-ha-yaanah;* also רננים, Job xxxix. 13). In Arabic, *nea-mah, thar-eds jammel, i. e.* 'camel-bird;' the same as the Persian *sutur morgh;* in Western Arabic, *emmim;* and in Greek, στρουθός, and στρουθοκάμηλος; from which the Latin *struthio camelus* is formed.

The ostrich is frequently mentioned in the Bible in terms of great beauty and precision; which commentators, perhaps more conversant with the exploded misstatements of the ancients than with the true physiological history of the bird in question, have not been happy in explaining, sometimes referring it to wrong species, such as the peacock, or mistaking it for the stork, the eagle, or the bustard (Lev. xi. 19; Deut. xiv. 15; Job xxx. 29; xxxix. 13; Isa. xiii. 21; xxxiv. 13; xliii. 20; Jer. L. 39; Lam. iv. 3; Micah i. 8). In several of these passages 'owls' has been used in our version for *yaanah*, now generally admitted to mean 'ostriches;' for the passages where the word occurs relate to the deserts and the presence of serpents—certainly more applicable to the latter than the former; for although the owl and the serpent are found in certain localities in the desert, nevertheless neither of them retires far into the absolute barren waste, as the ostrich constantly is observed to do. Both *joneh* and *rinonim*, as Pococke well observes, appear to be derived from the power of uttering loud-sounding cries; and the third name, *bath-ha-yaanah*, 'the daughter of vociferation,' or 'loud moaning,' is in conformity with the others, and an Oriental figurative mode of expressing the same faculty (which exists not, we think, in the females alone, but in the whole species); for the ostrich has an awful voice, which, when heard on the desert, is sometimes mistaken in the night, even by natives, for the roar of a lion. It is uttered most likely as a warning to the family, and as a threat to some nightly prowler, stealing towards the nest, and coming within ken of their watchful organs.

There are two varieties, if not two species, of the ostrich; one never attaining seven feet in height, and covered chiefly with grey and dingy feathers; the other sometimes growing to more than ten feet, and of a glossy black plumage; the males in both having the great feathers of the wings and tail white, but the females the tail only of that colour. Their dimensions render them both the largest animals of the feathered creation now existing. They appear promiscuously in Asia and Africa, but the troops or coveys of each are always separate; the grey is more common in the south, while the black, which grows largest in Caffraria, predominates to the north of the equator. One of the last mentioned, taken on board a French prize, and wounded in the capture, we remember to have seen in London, where it was able to peck its food from a cross-beam eleven feet from the ground. The enormous bird afterwards shown in Bullock's museum was said to be the same. The common-sized ostrich weighs about eighty pounds; whence it may be judged that the individual here mentioned may have been at least forty pounds heavier.

441.

The head of the ostrich is small, and not composed of strong bones; the bill, in form somewhat like that of a duck, is flat, with a nail at the apex, and broad at the gape; the eyes, hazel-coloured, have a clear and distinct vision of objects to a great distance, although when seen obliquely they have an opalescent appearance; the auditory apparatus is large and open, notwithstanding that in the pairing season ostriches are said to be very deaf; the neck, long and slender, is, together with the head, but scantily clothed with whitish shining hairs, and in the pairing season becomes for a time pink or rosy red; towards the base it assumes the general colour of the plumage, which, with the quill and tail plumes, is entirely composed of loose downy-webbed feathers, only differing in size and colour; the wings, each from three to four feet long, exclusive of feathers, are entirely naked on the inner side, and are supplied towards the end of the pinion bone on each side with two sharp pointed quills resembling those of a porcupine, and no doubt serving for defence; the thighs, nearly bare of plumage, and of a deep flesh-colour, are as full and muscular as those of a strong man, and the tarsi or legs, of corresponding length with the proportions of the neck, are covered with broad horny scales, and terminate in two toes; the inner, being the longest, is armed with a broad strong claw; and that on the outside, only half the length of the other, is without any. The great feathers, so much prized in commerce, are twenty

in each wing, those of the tail being nearly always useless, broken, and worn. The cloven feet, long neck, and vaulted back of these birds are in themselves quite sufficient to suggest to the imagination an animal of the camel kind: but these external appearances are not the only points of resemblance; the stomach is so formed as to appear possessed of a third ventricle, and there are other structural particulars, such as a sternum, not keel-shaped, as in birds, but in the form of a round buckler, to protect the chest, which, with the fact that they are without the muscular conformation to render them capable of flying, altogether approximate these birds to quadrupeds, and particularly to the order of Ruminantia.

Ostriches are gregarious—from families consisting of a male with one or several female birds, and perhaps a brood or two of young, up to troops of near a hundred. They keep aloof from the presence of water in the wild and arid desert, mixing without hesitation among herds of gnu, wild asses, quaggas, and other striped Equidæ, and the larger species of Antilopidæ. From the nature of their food, which consists of seeds and vegetables, although seldom or never in want of drink, it is evident that they must often approach more productive regions, which, by means of the great rapidity of motion they possess, is easily accomplished; and they are consequently known to be very destructive to cultivated fields. As the organ of taste is very obtuse in these birds, they swallow with little or no discrimination all kinds of substances, and among others stones; it is also probable that, like poultry, they devour lizards, snakes, and the young of birds that fall in their way. We have had our own sketch-book snapped out of our hand by an ostrich, attracted to it by the sight of the white paper. It is not yet finally decided whether the two species are polygamous, though concurrent testimony seems to leave no doubt of the fact: there is, however, no uncertainty respecting the nest, which is merely a circular basin scraped out of the soil, with a slight elevation at the border, and sufficiently large to contain a great number of eggs; for from twelve to about sixty have been found in them, exclusive of a certain number, always observed to be outlying, or placed beyond the raised border of the nest, and amounting apparently to nearly one-third of the whole. These are supposed to feed the young brood when first hatched, either in their fresh state, or in a corrupted form, when the substance in them has produced worms. These eggs are of different periods of laying, like those within, and the birds hatched form only a part of the contents of a nest, until the breeding season closes. The eggs are of different sizes, some attaining to seven inches in their longer diameter, and others less, having a dirty white shell, finely speckled with rust colour; and their weight borders on three pounds. Within the tropics they are kept sufficiently warm in the day-time not to require incubation, but beyond these one or more females sit constantly, and the male bird takes that duty himself after the sun is set. It is then that the short roar may be heard during darkness; and at other times different sounds are uttered, likened to the cooing of pigeons, the cry of a hoarse child, and the hissing of a goose; no doubt expressive of different emotions; but that the roar is expressive of the feeling of anger may be inferred from the assertion that jackals and foxes (*Canis Megalotis Caama?*) have been found close to the nests of these birds, kicked to death. This fact is the more credible, as the last mentioned animal is a dexterous purloiner of their eggs; and it may be here added, in proof of the organ of smelling not being quite so obtuse in the ostrich as is asserted, that Caffres and Hottentots, when they daily rob a nest for their own convenience, always withdraw the eggs by means of a stick, in order to prevent the female finding out the larceny by means of the scent which human hands would leave behind; for then they will not continue to lay, but forsake the abode altogether. This circumstance may account for the small number of eggs often found in their nests.

Although possessed of strength sufficient to carry with velocity two adult human beings, and although readily tamed, even when taken in a state of maturity, may easily rendered familiar and docile, and although they are by no means the stupid creatures they have been believed, still their voracity, leading to the destruction of young poultry, and the impracticability of guiding their powers, will ever render them unsafe and unprofitable domestics. Though at first sight useless, we may be assured that Providence has not appointed their abode in the desert in vain; and they still continue to exist, not only in Africa, but in the region of Arabia, east and south of Palestine beyond the Euphrates; but it may be a question whether they extend so far to the eastward as Goa, although that limit is assigned them by late French ornithologists.

The flesh of a young ostrich is said to be not unpalatable; but its being declared unclean in Mosaic legislation may be ascribed to a two-fold cause. The first is sufficiently obvious from its indiscriminate voracity already mentioned, and the other may have been an intention to lay a restriction upon the Israelites in order to wean them from the love of a nomade life, which hunting in the desert would have fostered; for ostriches must be sought on the barren plains, where they are not accessible on foot, except by stratagem. When pursued, they cast stones and gravel behind them with great force; and though it requires long endurance and skill, their natural mode of fleeing in a circular form enables well mounted Arabs to overtake and slay them. It may be questioned whether among the Hebrew names referred to 'ostrich' in our versions, one in particular, נצה *nesseh*, be not the Arabian bustard, *Otis Arabs*, a bird of great size, abundantly clad with feathers, endowed with the habit of half raising its wings, and keeping them in tremulous motion, particularly when preparing to run; for this species always preludes with a rapid course before it can rise on the wing. It occurs in Arabia and the desert of Syria, and we take it to be the species represented by Sir J. G. Wilkinson, where an Egyptian leads by a rope about its neck a bird with three toed feet, which that interesting writer takes, we believe by inadvertence, to be a young ostrich.—C. H. S.

OTHNIEL עתניאל, *Lion of God*; Sept. Γοθονιήλ), first judge of Israel, son of Kenaz, the younger brother of Caleb, whose daughter Achsah he obtained in marriage by his daring valour at

the siege of Debir (Josh. xv. 17; Judg. i. 13; 1 Chron. iv. 13). Rendered famous among his countrymen by this exploit, and connected by a twofold tie with one of the only two Israelites of the former generation who had not died in the desert, we are prepared for the fact that on him devolved the mission to deliver Israel from the Mesopotamian oppression under which, in punishment for their sins, they fell after the death of Joshua and of the elders who outlived him (Judg. iii. 9). This victory secured to Israel a peace of forty years. For the chronology, &c., of this period see JUDGES.

OWL (כּוֹס *cos*; לִילִית *lilith*). Two other Hebrew names have been likewise assigned in our versions to presumed species of owls; namely, ינשׁוּף *yansuph*, which, although it must be confessed that in common Hebrew it indicates the owl, we have endeavoured to show is applied more particularly to the night-heron, *Ardea nicticorax* [IBIS], and קפוֹז *kiphoz*, either the same or confounded, as it appears, with קפוֹד *kephod*, which has led to much controversy, and caused one or the other to be referred to six or seven animals, all widely different, for they include owl, osprey, bittern, hedgehog or porcupine (קפד), otter (?), and tortoise. Our reasons for applying *kephod* to the bittern will be found in KEPHOD. קפּוֹז *kippoz*, we have already noticed. Bochart, though admitting that it may designate a kind of owl, was inclined to refer the more specific appellation to the *jaculus*, or darting serpent; and it may be asked whether the Arab *kebsch*, the wild mountain sheep, or Arabian *musmon*, deriving its name likewise from darting or plunging down precipices, does not deserve consideration? If these names are in part mistakes, and the admitted not free from objections, several others adopted by translators for owl are proved to be quite wrong, such as Luther's and the Vulgate. אִיִּים *iyim*, which is more applicable to howling quadrupeds [SHUAL]. תחמס *tachmas*, night-hawk or goat-sucker, has been taken for *Strix otus*, or ear-owl; which bird others again find in the ינשׁוּף *yansuph*, one that dwells beneath ruins, and to which is imputed the very questionable habit mentioned by the Arabs of entering open windows at night and tearing the faces of unguarded infants. Be it observed that this unlikely tale is related as occurring in a country where the inhabitants, nearly all the year round, sleep in tents or on the housetops; but as the imputation evidently means to point out an existing species pre-eminently an object of superstitious fear, we would take it to be the לִילִית *lilith*, which name appears again to include both the goat-sucker and the owl. It is not unlikely, in the indefinite form which zoological nomenclature maintained in Scripture, as repeatedly pointed out in preceding articles, that *yansuph* was used more or less generically for night-birds, and thus was often taken for the owl, because the family of *Strigidæ* constituting all, or with few exceptions, 'birds of darkness,' it was most present in the public mind; was connected, as it still is, with superstitious notions, and portended evil to the vulgar.

There are noticed in Egypt and Syria three well-known species of the genus *Strix*, or owl:— *Strix bubo*, 'the great-eared owl;' *Strix flammea*, the common barn owl; and *Strix passerina*, the little owl. In this list *Strix otus*, the long-eared owl, *Strix brachyotus* or *ulula*, the short-eared owl, known nearly over the whole earth, and *Strix orientalis* of Hasselquist, are not included, and several other species of these wandering birds, both of Africa and Asiatic regions, occur in Palestine. כּוֹס *cos* or *chos* (Lev. xi. 17; Deut. xiv. 16; Ps. cii. 6), rendered 'little owl' and 'owl of the desert,' is most applicable to the white or barn owl, *Strix flammea*. Bochart referred this name to the pelican, on account of the assumed signification of *cos*, 'cup,' by him fancied to point out the pouch beneath the bill; whereas it is more probably an indication of the disproportionate bulk and flatness of the head compared with the body, of which it measures to the eye full half of the whole bird, when the feathers are raised in their usual appearance. 'Cos' is only a variation of 'cup' and 'cap,' which, with some inflexions, additional or terminal particles, is common to all the great languages of the old continent. The barn owl is still sacred in Northern Asia.

442.

The eagle-owl, or great-eared owl, *Strix bubo*, we do not find in ornithological works as an inhabitant of Syria, though no doubt it is an occasional winter visitant; and the smaller species, *Bubo Atheniensis* of Gmelin, which may be a rare but permanent resident, probably also visiting Egypt. It is not, however, we believe, that species, but the *Otus ascalaphus* of Cuvier, which is common in Egypt, and which in all probability is the type of the innumerable representations of an eared owl in hieroglyphical inscriptions. This may be the species noticed under the indefinite name of קפּוֹז *kippoz*, for it is fairly applicable to Isa. xxxiv. 15.

Next we have *Strix ulula*, *Strix brachyotus*, or short-eared owl, likewise found in Egypt and Arabia, as well as to the north of Syria, a bold, pugnacious bird, residing in ruined buildings, mistaken by commentators for the screech-owl, *Strix stridula*, and most probably the לִילִית *lilith* of the Bible (Isa. xxxiv. 14). The spectral species, again, confounded with the goat-sucker, is, we believe, *Strix coromanda* [NIGHT-HAWK], and the same as *Strix orientalis* of Hasselquist, who makes it synonymous with *massasa* and with the Syrian *bana*, but apparently only upon the evidence of the vulgar, who believe in the 'spectral lady' appearance of the *lilith* and *bana*, and in its propensity to lacerate infants, of which

this bird, together with the *Strix ulula* and *bubo* of antiquity, is accused. The original version of the story, however, refers, not to an owl or goat-sucker, but to the poetical *Strix* of the ancients, a *Lamia* with breasts, that is, a harpy or a vampire, being a blood-sucking species of the bat family (Ovid, *Fast.*, vi. 139, and the fables of C. Titinius, quoted by Gesner, *De Strige*, p. 738) [Bat].

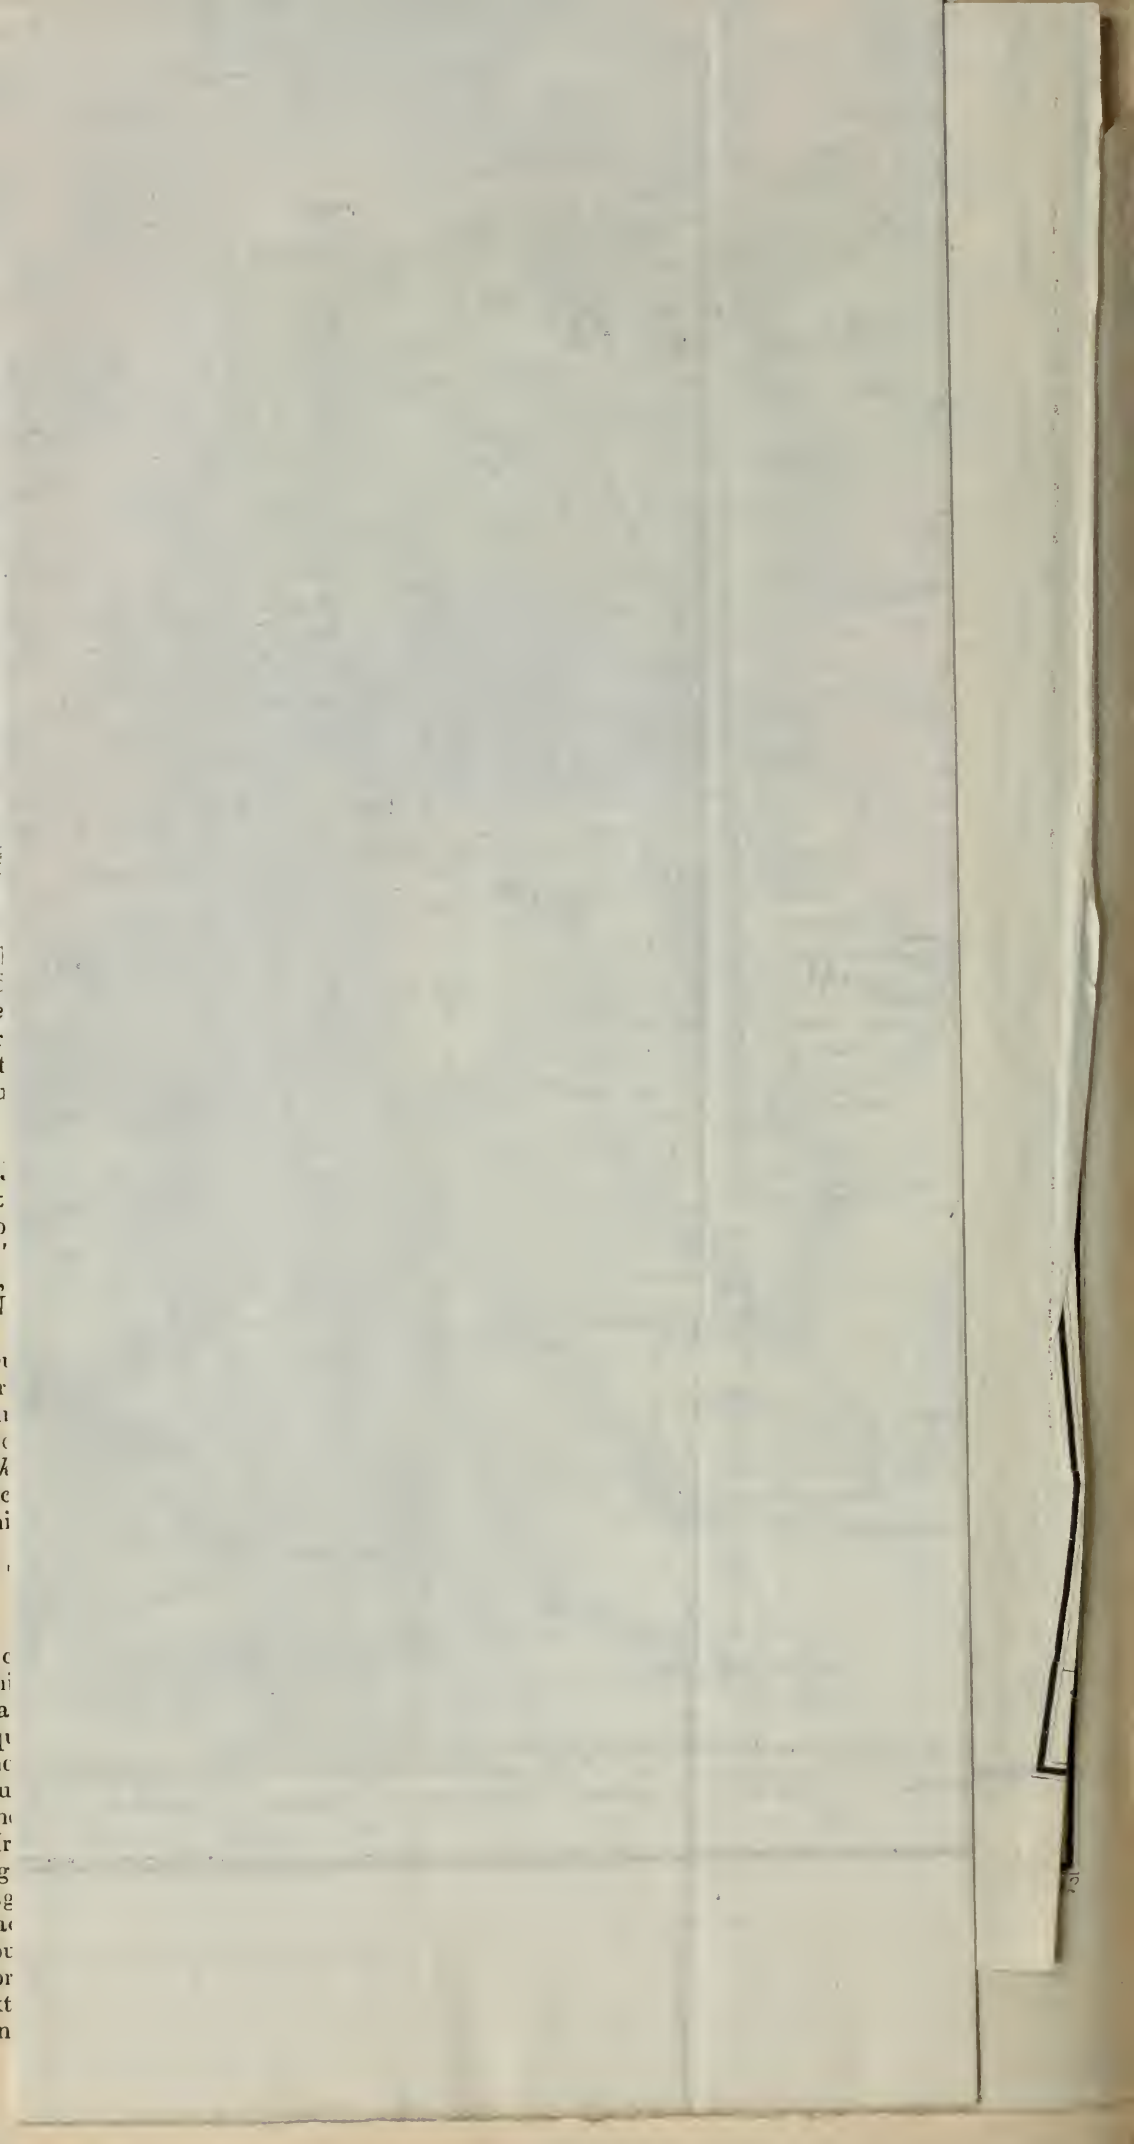
The little owl of Egypt is not likely to be the Passerine species of Europe, and probably does not occur under a distinct name in Biblical Hebrew; but that the owls which inhabited Palestine were numerous may be inferred with tolerable certainty from the abundance of mice, rats, and other vermin, occasioned by the offal and offerings at the numerous sacrifices, and consequently the number of nocturnal birds of prey that subsisted upon them, and were tolerated for that purpose.—C. H. S.

OX (בָּקָר *bakar*, in a collective sense, 'cattle,' 'neat cattle'). Having already noticed the domestic *beeves* under Bull and Calf (to which we refer), the few words added here will apply to the breeds of Western Asia and the manner of treating them. The earliest pastoral tribes appear to have had domesticated cattle in the herd; and judging from the manners of South Africa, where we find nations still retaining in many respects primeval usages, it is likely that the patriarchal families, or at least their moveables, were transported on the backs of oxen in the manner which the Caffres still practise, as also the Gwallahs and grain-merchants in India, who come down from the interior with whole droves bearing burthens. But as the Hebrews did not castrate their bulls, it is plain some other method of enervation (*bistournure?*) was necessary in order to render their violent and brutal indocility sufficiently tractable to permit the use of a metal ring or twisted rope passed through the nostrils, and to ensure something like safety and command to their owners. In Egypt, emasculation, no doubt, was resorted to, for no ring is observable in the numerous representations of cattle, while many of these indicate even more entire docility in these animals than is now attained.

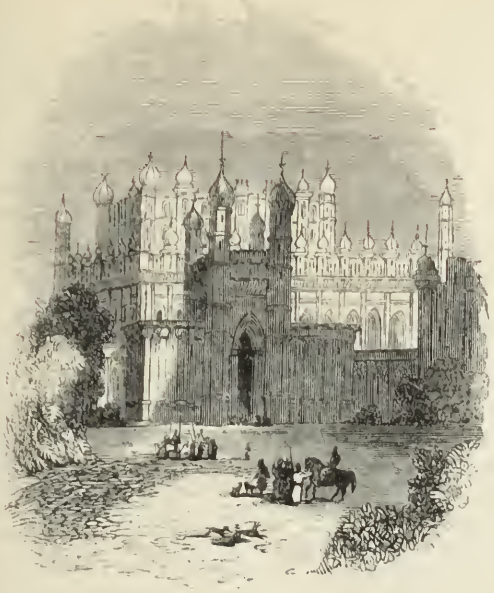
The breeds of Egypt were various, differing in the length and flexures of the horns. There were some with long horns, others with short, and even none, while a hunched race of Nubia reveals an Indian origin, and indicates that at least one of the nations on the Upper Nile had come from the valleys of the Ganges; for it is to the east of the Indus alone that that species is to be found whose original stock appears to be the mountain yak (*Bos grunniens*). It is born with two teeth in the mouth, has a groaning voice, and is possessed of other distinctive characters. Figures of this species or variety bear the significant lotus flower suspended from the neck, and, as is still practised in India, they are harnessed to the cars of princesses of Nubia. These, as well as the straight-backed cattle of Egypt, are all figured with evident indication of beauty in their form, and they are in general painted white with black, or rufous clouds, or entirely red, speckled, or *grandinated*, that is, black with numerous small white specks; and there are also steeves with white and black occasionally marked in a peculiar manner, seemingly the kind of tokens by which the priesthood pretended to recognise their sacred individuals. The cattle of Egypt continued to be remarkable for beauty for some ages after the Moslem conquest; for Abdollatiph, the historian, extols their bulk and proportions, and in particular mentions the Al-chisiah breed for the abundance of milk it furnished and for the beauty of its curved horns.

The domestic buffalo was unknown to Western Asia and Egypt till after the Arabian conquest: it is now common in the last-mentioned region and far to the south, but not beyond the equator; and from structural differences it may be surmised that there was in early ages a domesticated distinct species of this animal in Africa. In Syria and Egypt the present races of domestic cattle are somewhat less than the large breeds of Europe, and those of Palestine appear to be of at least two forms, both with short horns and both used to the plough, one being tall and lanky, the other more compact; and we possess figures of the present Egyptian cattle with long horns bent down and forwards. From Egyptian pictures it is to be inferred that large droves of fine cattle were imported from Abyssinia, and that in the valley of the Nile they were in general stall-fed, used exclusively for the plough, and treated with humanity. In Palestine the Mosaic law provided with care for the kind treatment of cattle; for in treading out corn—the Oriental mode of separating the grain from the straw—it was enjoined that the ox should not be muzzled (Deut. xxv. 4), and old cattle that had long served in tillage were often suffered to wander at large till their death—a practice still in vogue, though from a different motive, in India. But the Hebrews and other nations of Syria grazed their domestic stock, particularly those tribes which, residing to the east of the Jordan, had fertile districts for that purpose. Here, of course, the droves became shy and wild; and though we are inclined to apply the passage in Ps. xxii. 12, to wild species, yet old bulls, roaming at large in a land where the lion still abounded, no doubt became fierce; and as they would obtain cows from the pastures, there must have been feral breeds in the woods, as fierce and resolute as real wild Uri—which ancient name may be a mere modification of Reem [Reem].—C. H. S.

P.



PADAN-ARAM. [Aram.]



PAKYOTH (פַּקְּעוֹת) and Pekaim (פקעים). It is related in 2 Kings iv. 38-40, that Elisha having come again to Gilgal, when there was a famine in the land, and many sons of the prophets were assembled there, he ordered his servant to prepare for them a dish of vegetables: 'One went out into the field to gather *herbs* (*oroth*), and found a *wild vine*, and gathered thereof *wild gourds* (*pakyoth sadeh*) his lap-full, and came and shred them into the pot of pottage, for they knew them not.' 'So they poured out for the men to eat: but as they were eating of the pottage, they cried out, O thou man of God, there is death in the pot; and they could not eat thereof.'

From this it appears that the servant mistook the fruit of one plant, *pakyoth*, for something else, called *oroth*, and that the former was vine-like, that is, with long, weak, slender stems, and that the fruit had some remarkable taste, by which the mistake was discovered whenever the pottage was tasted. Though a few other plants have been indicated, the *pakyoth* has almost universally been supposed to be one of the family of the gourd or cucumber-like plants, several of which are conspicuous for their bitterness, and a few poisonous, while others, it is well known, are edible. Therefore one of the former may have been mistaken for one of the latter, or the *oroth* may have been some similar-shaped fruit, as, for instance, the egg-plant, used as a vegetable. The reasons why *pakyoth* has been supposed to be one of the gourd tribe, usually the *Colocynth*, are given in detail by Celsius (*Hierobot.* vol. i. p. 393). 1. The name is supposed to be derived from פָּקַע *paka*, 'to crush,' or 'to burst;' and this is the characteristic of the species called the wild cucumber by the ancients. Thus Pliny says: 'Semen exilit, oculorum etiam periculo.' This is the kind called *Spring gurken* by the Germans, and *Squirting cucumber* in England. 2. The form of the fruit appears to have been ovoid, as the *pekaim* of 1 Kings vi. 18 are supposed to be the same fruit as *pakyoth*: 'And the cedar of the house within was carved with *knops* ' (*pekaim*). So in vii. 24: 'And under the brim of it round about there were knops (*pekaim*) compassing it: the knops (*pekaim*) were cast in two rows, when it was cast.' Kimchi distinctly says these were called *pekaim*, 'quia figuram haberent τῶν *pakyoth* agrestium.' That the form of these was ovoid would appear from the more free exposition of the Chaldaic version of Jonathan, to whom the form of the fruit could not have been unknown: 'Et figuræ ovorum subter labium ejus' (*vid.* Cels. *l. c.* p. 397). 3. The seeds of the *pakyoth*, moreover, yielded oil, as appears from the tract *Shabbath* (ii. § 2): 'Non accendunt resina, propter honorem sabbati. At sapientes permittunt omnia olea sequentia: oleum sesamorum, oleum nucum, oleum raphanorum, oleum piscium, oleum *pakyoth*.' So Kimchi: 'Faciunt e seminibus eorum oleum, quod vocant Rabbini nostri piæ mem. oleum *pakyoth*.' The seeds of the different gourd and cucumber-like plants are well known to yield oil, which was employed by the ancients, and still is in the East, both as medicine and in the arts. 4. The bitterness which was probably perceived on eating of the pottage, and which disappeared on the addition of meal, is found in many of the cucumber tribe, and conspicuously in the species which have been usually selected as the *pakyoth*, that is, the Colocynth (*Cucumis Colocynthis*), the Squinting Cucumber (*Momordica Elaterium*), and *Cucumis prophetarum*: all of which are found in Syria, as related by various travellers. The *Coloquintida* is essentially a desert plant. Mr. Kitto says, 'In the desert parts of Syria, Egypt, and Arabia, and on the banks of the rivers Tigris and Euphrates, its tendrils run over vast tracts of ground, offering a prodigious number of gourds, which are crushed under foot by camels, horses, and men. In winter we have seen the extent of many miles covered with the connecting tendrils and dry gourds of the preceding season, the latter exhibiting precisely the same appearance as in our shops, and when crushed, with a crackling noise, beneath the feet, discharging, in the form of a light powder, the valuable drug which it contains.' In the Arabic version, *hunzal* (which is the Colocynth) is used as the synonyme for *pakyoth* in 2 Kings iv. 39. The Globe Cucumber, Mr. Kitto continues, 'derives its specific name (*Cucumis prophetarum*) from the notion that it afforded the gourd which "the sons of the prophets" shred by mistake into their pottage, and which made them declare, when they came to taste it, that there was "death in the pot." This plant is smaller in every part than the common melon, and has a nauseous odour, while its fruit is to the full as bitter as the *Coloquintida*. The fruit has a rather singular appearance, from the manner in which its surface is armed with prickles, which are, however, soft and harmless' (*Pictorial Palestine; Physical Geog.* p. cclxxxix.). But this plant, though it is nauseous and bitter as the *Colocynth*, yet the fruit not being bigger than a cherry, does not appear likely to have been that which was *shred* into the pot. Celsius, however, was of opinion that the *Cucumis agrestis* of the Ancients, and which was found by Belon in descending from Mount Sinai, was the plant. This, he says, is the *Olera asini* of the Hebrews, the *Chate al hemar* of the Arabs, and the *Cucumis asininus* of the druggists of his day. This plant is now called *Momordica elaterium*, or Squirting Cucumber, and is a well known drastic purgative, violent enough in its action to be considered even a poison. Its fruit is ovate, obtuse, and scabrous. But it is not easy to say whether this or the *Colocynth* is most likely to have been the plant mistaken for *oroth*; but the fruit of this species might certainly be mistaken for young gherkins. Both are bitter and poisonous.—J. F. R.

PALACE, in Scripture, denotes what is contained within the outer enclosure of the royal residence, including all the buildings, courts, and gardens (2 Chron. xxxvi. 19; comp. Ps. xlviii. 4; cxxii. 7; cxxii. 7; Prov. ix. 3; xviii. 19; Isa. xxiii. 13; xxv. 2; Jer. xxii. 14; Amos i. 7, 12, 14; Nah. ii. 6). In the New Testament the term palace (αὐλή) is applied to the residence of a man of rank (Matt. xxvi. 3; Mark xiv. 66; Luke xi. 21; John xviii. 15). The specific allusions are to the palace built by Herod, which was afterwards occupied by the Roman governors, and was the prætorium, or hall, which formed the abode of Pilate when Christ was brought before him (Mark xv. 16): the other passages above cited, except Luke xi. 21, refer to the residence of the high-priest.

The particulars which have been given under the head HOUSE, require only to be aggrandized to convey a suitable idea of a palace; for the general arrangements and distribution of parts are the same in the palace as in the house, save that the courts are more numerous, and with more distinct appropriations, the buildings more extensive, and the materials more costly. The palace of the kings of Judah in Jerusalem was that built by Solomon, called 'the house of the forest of Lebanon,' of which some particulars are given in 1 Kings vii. 1-12; and if read along with the description which Josephus gives of the same pile

443.

(*Antiq.* v. 5), a faint idea may be formed of it, as a magnificent collection of buildings in adjoining courts, connected with and surrounded by galleries and colonnades. The details of the Jewish historian are not to be contemned; for he was necessarily better able than we are to apprehend the particulars in the Scriptural account, on which his own description is based. To him we are also indebted for an account of Herod's palace, his description of which, from personal knowledge, may be found in *De Bell. Jud.* v. 4. 4.

PALESTINE. This name, usually applied to the country formerly inhabited by the Israelites, does not occur in the Hebrew Bible. It is, however, derived from Philistia (פְּלֶשֶׁת), or the country of the Philistines, which comprised the southern part of the coast plain of Canaan along the Mediterranean. The word *Philistia* occurs in Exod. xiii. 17; Ps. lx. 8; lxxxiii. 7; lxxxvii. 4; cviii. 9; Isa. xiv. 29, 31. From this arose the name Palestine (Παλαιστίνη), which was applied by most ancient writers, and even by Josephus (*Antiq.* i. 6. 2; ii. 15. 2; viii. 10. 3), to the whole land of the Israelites (see Reland's *Palæstina*, p. 38, sq.).

Names.—The other names of the country may be given in the order of their occurrence in Scripture.

1. *Canaan* (כְּנַעַן), from Canaan, the fourth son of Ham, from whom the first inhabitants were descended. It is the most ancient name of the country, and is first found as such in Gen. x. 31. This denomination was confined to the country between the Mediterranean and the Jordan; for Exod. xvi. 35 (comp. Josh. v. 11, 12) shows that the Jordan was the eastern boundary of Canaan. This is also seen in Num. xxxiii. 51; xxxiv. 11, 12; comp. Exod. xv. 15. When the name Canaan was thus used with reference to the country west of the Jordan, the region east of that river was called the Land of Gilead (Deut. xxxiv. 1; Josh. xxii. 9, 11). In later times the term Canaan was understood to include Phœnicia (Isa. xxiii. 11; Matt. xv. 21-22), and also the land of the Philistines.

2. *Land of Israel.* This name was given to the whole country as distributed among and occupied by the tribes of Israel. Those recent writers have therefore fallen into error, who imagine that it ever comprehended the utmost extent of dominion promised to the seed of Abraham, or actually possessed by David and Solomon. The designation, Land of Israel, was never applied but to the aggregate possessions of the tribes as defined by the limits laid down when the distribution was made in the time of Joshua (Judg. xix. 29; 1 Sam. xiii. 19; Ezek. vii. 2; Matt. ii. 20, 21, γῆ Ἰσραήλ). In Ezek. xxvii. 17, and other places, the land of Israel is considered as the territory of the ten tribes, forming the separate kingdom of Israel, as distinct from that of Judah.

3. *Land of Promise.* So called as the land which God promised to the patriarchal fathers to bestow on their descendants. This name was applied to it chiefly before the country was actually possessed (Gen. xv. 18; l. 24; Num. xxxii. 1; comp. Heb. xi. 9).

4. *Land of Jehovah.* So called as being in a special and peculiar sense the property of Jehovah, who, as the sovereign proprietor of the soil, granted it to the Hebrews (Lev. xxv. 23; Ps. lxxxv. 1; Isa. viii. 8).

5. *The Holy Land.* This name only occurs in Zech. ii. 12, 'The Lord shall inherit Judah, his portion in the Holy Land.' It was, however, probably without any particular reference to the present text that this became from frequent use a proper name for Palestine. The land is here called 'Holy,' as being the Lord's property, and sanctified by his temple and worship: but Christians, in applying to it the same title, probably regard it more as the scene of the life, the travels, and the sufferings of Christ.

5. *Judah, Judæa.* This name belonged at first to the territory of the tribe of Judah alone. After the separation of the two kingdoms, one of them took the name of Judah, which contained the territories both of that tribe and of Benjamin. After the Captivity, down to and after the time of Christ, Judæa was used in a loose way as a general name for the whole country of Palestine; but in more precise language, and with reference to internal distribution, it denoted nearly the territories of the ancient kingdom, as distinguished from Samaria and Galilee on the west of the Jordan, and Peræa on the east.

Divisions.—The divisions of Palestine were different in different ages.

1. *In the time of the Patriarchs*, the country was divided among the tribes or nations descended from the sons of Canaan. The precise locality of each nation is not, in every case, distinctly known; but our map exhibits the most probable arrangement. Here it is sufficient to mention that the Kenites, the Kenizzites, and the Kadmonites lived on the east of the Jordan (Gen. xv. 18-21); and that, on the west of that river, or in Palestine Proper, the Hittites, the Perizzites, the Jebusites, and the Amorites, abode

in the hill country of the south (afterwards belonging to Judah); the Canaanites—properly so called—in the middle, across the country, from the sea-coast to the river Jordan; the Girgashites, along the eastern border of the lake of Gennesareth; and the Hivites in the north, among the southern branches of the Lebanon mountains. The southern part of the coast was occupied by the Philistines, and the northern part by the Phœnicians.

2. *In the time of Moses*, when the Israelites were preparing to enter Canaan, the distribution of the nations on the west of the Jordan had undergone very little change; but, on the east of that river, we find the three principal territories to have been Bashan, in the north,—that is to say, east and north-east of the lake Gennesareth; Gilead, in the middle; and, in the south, on the east of the Dead Sea, the Land of Moab.

3. *After the Conquest*, the land was distributed by lot among the tribes. The particulars of this distribution will be best seen by reference to the map. Judah, Benjamin, Simeon, and Dan occupied the south; Ephraim, half of Manasseh, and Issachar, the middle; and Zebulon, Naphtali, and Asher, the north. Reuben, Gad, and the other half of Manasseh were settled beyond the Jordan, in Bashan and Gilead. This distribution was in no way affected by the division of the country into two kingdoms, which took place after the death of Solomon. The boundary line between them was the northern limit of the tribe of Benjamin.

4. *After the Captivity*, we hear very little of the territories of the tribes, for ten of them never returned to occupy their ancient domains.

5. *In the time of Christ*, the country on the west of the Jordan was divided into the provinces of Galilee, Samaria, and Judæa. Galilee is a name which occurs repeatedly in the book of Joshua (xxi. 32); and very often in the later history. It was applied to that part of Palestine north of the plain of Esdraelon or Jezreel. This province was divided into Lower or Southern, and Upper or Northern Galilee. The latter section was also denominated Galilee of the Gentiles (Matt. iv. 15). Samaria occupied nearly the middle of Palestine; but, although it extended across the country, it did not come down to the sea-shore. Judæa, as a province, corresponded to the northern and western parts of the ancient kingdom of that name; but the south-eastern portion formed the territory of Idumæa. On the other side of the Jordan the divisions were, at this time, more numerous and less distinct. The whole country, generally, was called Peræa, and was divided into eight districts or cantons, namely:—1. *Peræa*, in the more limited sense, which was the southernmost canton, extending from the river Arnon to the river Jabbok. 2. *Gilead*, north of the Jabbok, and highly populous. 3. *Decapolis*, or the district of ten cities, which were Scythopolis or Bethshan (on the west side of the Jordan), Hippos, Gadara, Pella, Philadelphia (formerly Rabbath), Dium, Canatha, Gerasa, Rapnana, and, perhaps, Damascus: but there is not much certainty with regard to the ten cities from which the region had its name. 4. *Gaulonitis*, extending to the north-east of the Upper Jordan and of the lake of Gennesareth. 5. *Batanæa*, the ancient Bashan, but less extensive, east of the lake of Gennesareth. 6. *Auranitis*, also called *Ituræa*, and known to this day by the old name of Hauran (Ezek. xlvii. 16-18), to the north of Batanæa and the east of Gaulonitis. 7. *Trachonitis*, extending to the north of Gaulonitis, and east from Paneas (Cæsarea Philippi) and the sources of the Jordan, where it was separated from Galilee (Luke iii. 1). 8. *Abilene*, in the extreme north, among the mountains of Anti-Libanus, between Baalbec and Damascus. The more important of these names have been noticed under their several heads.

Situation and Boundaries.—Syria lies at the easternmost extremity of the Mediterranean Sea, upon a line of coast which, if prolonged northward, might have been conterminous with the eastern extremity of the Black Sea, did not the peninsula of Asia Minor intervene. It forms part of the western coast of Asia, and has Asia Minor and Mesopotamia on the north, Arabia on the east and south-east, Egypt on the south-west, and the Mediterranean on the west. Of this region Palestine is the south-western part, extending from the mountains of Lebanon to the borders of Egypt. It lies about midway between the equator and the polar circle, to which happy position it owes the fine medium climate which it possesses. Its length is embraced between 30° 40′ and 33° 32′ of N. latitude, and between 33° 45′ of E. longitude in the south-west, and 35° 48′ in the north-east. The line of coast from north to south trends westward, which causes the country between the coast and the valley of the Jordan to be much wider in the south than in the north. But where the country was narrowest there were possessions on the east of the river, and where widest, there were none beyond the line of the river, so that the actual breadth of territory was in some degree equalized throughout; and may be taken at an average of sixty-five miles, the *extreme* breadth being about 100 miles. The length, from Mount Hermon in the north, to which the territory of Manasseh beyond the Jordan extended (Josh. xiii. 11), to Kadesh-barnea in the south, to which the territory of Judah reached, was 180 miles. The above measurement is considerably greater than that which is usually given. This is because the usual measurement is founded upon the authority of the popular scriptural phrase 'from Dan to Beersheba.' But that phrase was only used to designate the length of the country west of the river; for it is clear that the territory beyond the line of the Jordan reached far more to the north, even to Mount Hermon (now Jebel-es-Sheikh), while on the south we now know that Kadesh-barnea, on the borders of the great Arabah, or valley south of the Dead Sea, was on a parallel considerably to the south of Beersheba. Even in making the measurement from Dan to Beersheba only, the extent would be greater than has usually been given, seeing that Beersheba is now ascertained to be considerably to the south of the position formerly assigned to it. In fixing the limits as from Dan to Beersheba, it has been forgotten that the popular usage merely described two well-known points towards the opposite extremities of the land, and does not imply that there was no territory northward of Dan or southward of Beersheba. The usage

is the same as that according to which it was formerly customary to describe the length of England by the phrase, from London to York, although there is much country north of York and south of London. Dan was the northernmost and Beersheba the southernmost great and well-known towns of the land. Dan was also near the northern frontier of the western territory; but although in the tract beyond Beersheba southward, there were few inhabited sites, it is not mere desert, as was formerly supposed; but, as some years since conjectured (*Pictorial Bible*, on Josh. xiii.), and since proved by Dr. Robinson (*Bib. Researches*, i. 281-309), consists of good pasture grounds, into which the inhabitants of the settled country sent their flocks to graze.

Under this more extended view, Palestine may be regarded as embracing an area of almost 11,000 square miles, which is somewhat more than is usually given to it. Having arrived at this result, we are enabled to give some suggestive comparisons of its extent, as contrasted with that of other countries, and find that 'this does not give a superficial extent equal to one-fourth of England and Wales, nor more than two-fifths of Scotland, Ireland, or Portugal. Bavaria and Sardinia offer an area about twice as large; that of Denmark is about one-third larger, but according to the estimate we have made, the area of Palestine is nearly double that of Wales, Wirtemberg, or Tuscany. Thus, as to mere extent, the country can only be compared to some of the smaller European states, of which Hanover, Belgium, Switzerland, and the Papal States, appear to offer the nearest approximations. But the real surface is much greater than this estimate and these comparisons would imply; for Palestine being essentially a hilly country, the sides of the mountains and the slopes of the hills enlarge the available surface to an extent which does not admit of calculation' (*Physical Geog.*, p. xxviii., in Kitto's *Pictorial Hist. of Palestine*). Still, with all allowances, Palestine is an exceedingly small country in proportion to the interest which has been concentrated on it; and this fact, as compared with the large claims to attention advanced by and for the ancient inhabitants, has given occasion for ancient unbelievers and modern infidels to blaspheme. Cicero could infer the littleness of the Hebrew god from the smallness of the territory he had given to his people; and the poor blasphemies of such men as Voltaire and Rhegellini are more lamentable, as uttered against the light of history, which shows that the true interest and importance of a country arise, not from its territorial extent, but from the men who form its living soul; from its institutions, bearing the impress of mind and spirit; and from the events which grow out of the character and condition of its inhabitants. It is thus that the histories of such small countries as Phœnicia, Greece, early Rome, Venice, Holland, England, possess an interest and importance to which those of countries of ten times their extent cannot present the slightest claim.

After this general statement, we may examine the lines of boundary with somewhat more attention. The clearest description of them is that contained in Num. xxxiv. In going through that chapter on a former occasion (*Pictorial Bible*), the present writer had an opportunity of stating his views on the subject at greater length than can be afforded in this general summary. Subsequent inquiry has only confirmed the conclusions at which he then arrived, and which may here be summarily stated.

The South Boundary. The text (Num. xxxiv. 3, 5) we read thus: 'Your south border shall be at the wilderness of Zin adjoining to Edom, and your south border shall be at the utmost point of the great sea southward.' There is here a general description of the line, namely, that it extends from the desert of Zin (Wady Arabah), at a point not stated, to the Mediterranean, at a point also not stated. Then in the following verses the writer returns to state the particulars of this same boundary line: 'Your south border shall wind by the ascent of Akrabbim (at the end of the Dead Sea), and pass on (down the Arabah) to Zin; and thence extending (still southward down the Arabah), *to the south of Kadesh-barnea*, it shall go on to Hazar-addar, and pass on to Azmon. And from Azmon the boundary shall wind about to the river of Egypt, and its termination shall be at the sea.' What is here said respecting Hazar-addar and Azmon we do not understand, as the sites have not been determined; but without this, it is clear that the writer, after prolonging the *eastern* boundary line from the end of the Dead Sea down the edge of the Arabah, to a point somewhere south of Kadesh-barnea, then turns off westward to form the southern line, which he extends to the Mediterranean, at a point where 'the river of Egypt' falls into the sea. This river of Egypt is usually, and on very adequate grounds, supposed to be the stream which falls into the sea near El-Arish. In formerly considering this matter, we had to prove the position of Kadesh-barnea by argument; but Dr. Robinson has relieved us from the necessity of reproducing this argument, by having actually identified the site at a point very near to that in which we had placed it. This conclusion obliged us to draw the southern boundary line much to the south of Beersheba (which, it will be observed, is not named in these verses), and thus to assign to Palestine a large and important tract of country which had not formerly been ascribed to Israel. The determination of the site of Kadesh-barnea makes all the rest clear; for it is certain that the boundary was drawn south of that place, which is on a parallel 32 minutes south of that of Beersheba.

The West Border. In the 6th verse of the same chapter (Num. xxxiv.) the western border is stated as defined by the Mediterranean coast. This was the boundary of Palestine; but the Hebrews never possessed the whole of it. The northern part of the coast from Sidon to Akko (Acre) was in the hands of the Phœnicians, and the southern part, from Ashdod to Gaza, was retained by the Philistines, except at intervals, in and after the time of David, when they were subject to the Hebrew sceptre (Philistines); and a central portion, about one-third of the whole, from Mount Carmel to Jabneh (Jamnia) was almost permanently open to the Israelites. The reason for the non-possession of the Phœnician boundary has been stated; and the reason for their not occupying the coast from the border of Sidon to Carmel we take to be this. At the time of the conquest the southernmost Phœnician town was Sidon, to the

very border of which the coast assigned to Israel extended (Josh. xix. 24); but as the Hebrews neglected to appropriate this territory, the Phœnicians did so, and founded thereon Tyre and other settlements. Tyre is admitted to have been 'the daughter of Sidon' (Isa. xxii. 12), and there are no traces of its existence in the time of Joshua. The friendly relations which afterwards grew up prevented the Hebrews from urging their claim to the narrow slip of coast south of Sidon, which the Phœnicians had appropriated, and which indeed the Hebrews, as an agricultural people, did not feel the want of, though it was invaluable to the Phœnicians. This sufficiently accounts for the exception.

The North Border is as difficult to define as the south. The verses in which it is described we read thus: 'This shall be your north boundary; from the great sea ye shall draw a line to the great mountain [Lebanon]; from the great mountain ye shall draw your border to the entering in of Hamath; and the boundary shall pass on to Zedad, and the boundary shall go on to Ziphron, and its termination shall be at Hazarenan' (Num. xxxiv. 7-9). This only refers to the northern boundary of the western territory, or Canaan Proper, and we may therefore extend it in the same direction to Mount Hermon, for the purpose of completing the northern boundary. The Authorized Version of this text has created some confusion by translating הר־ההר *hor ha-hor* by 'Mount Hor;' but the phrase, which literally means 'mountain of the mountain,' that is, 'the great mountain,' obviously denotes Lebanon. We think that we cannot be mistaken in understanding that the line commenced at the sea somewhere not far to the south of Sidon, whence it was extended to Lebanon, and crossing the narrow valley (here called 'the entering in of Hamath'), which leads into the great plain enclosed between Libanus and Anti-Libanus, terminated at Mount Hermon, in the latter range. This arrangement of the northern line of boundary seems to us to meet all the difficulties arising from deficient knowledge, which have hung like a dense mist over the northern boundary of Palestine.

The Eastern Boundary, as respects Canaan Proper, was defined by the Jordan and its lakes; but as respects the whole country, including the portion beyond the Jordan, it is not so easily determined; yet it may be made out with close attention. Salchah was a town on the eastern limits of Bashan, and also, therefore, of the Hebrew territory (Deut. iii. 10; Josh. xii. 5). There is a town in the Hauran of the name of Salkhad, visited by Burckhardt (*Syria*, p. 99), who calls it Szalkhat, and which Gesenius is disposed to identify with Salchah. This place is more to the east than the territory usually assigned to the Israelites; and if the identification is to be relied upon, the line drawn to this place from Hermon must have included a considerable breadth of country. From this point, however, the line must have inclined somewhat sharply to the south-west, and it would be best to bring it to the point where the Wady-ed-Deir enters the Zerka, and thence extend it almost due south to the Arnon, which was the southern limit of the eastern territory. The necessity of bringing the eastern boundary line so far west as Wady-ed-Deir, arises from the obligation of excluding the site of Amman, as that city certainly did not belong to the Israelites.

Mineralogy.—Under this head we know not that we can do better than introduce the observations of Professor Schubert in his *Reise nach dem Morgenlande*:—'As regards the mineralogy of the Jerusalem neighbourhood, and, if I may form a judgment from the districts through which I passed, of the Holy Land generally, I should say that the mountains on the west of the Jordan consist chiefly of chalk, on which basalt begins to occur beyond Cana (northward), as is manifestly exhibited in the heights of Hattin, and in the western descent to the lake of Tiberias, in such large quantity and great extent as I have never before observed. That the so-called white limestone, which is met with around Jerusalem and thence to Jericho, which covers the summit and forms the declivities of the Mount of Olives, and which is also found at Mount Tabor and around Nazareth, is a kind of chalk, is obvious to any one but slightly acquainted with mineralogy.' By this we suppose Schubert means that it is a chalk considerably indurated, and approaching to whitish compact limestone, such as may be seen in Normandy, on the high road bordering the Seine, between Havre and Rouen. 'Layers and detached masses of flint,' Schubert continues, 'are very commonly seen in it; and these mountains preserve the character of their formation, as well in their more solid condition, resembling Alpine limestone and Schnürl-limestone, as in their softer organization, which has a likeness to chalk-marl. Besides this indurated chalk, a stone is found in the immediate vicinity of Jerusalem, chiefly towards the north, as well as towards Safet, and in other parts of the country, which, together with the dolomite formation occasionally met with, I could not but consider to be of what in Germany is called the Jura formation. I am supported in this conclusion by the opinion of a professional gentleman, M. Russegger, the distinguished geologist, who travelled in Palestine at a later period. He also describes the stone of which I am speaking as "a formation which, according to all external and internal marks, is to be classed with the upper Jura formation, the oolite, and the Jura-dolomite." Among the Jura-chalk, containing dolomite, of Jerusalem, Russegger found limestones containing much iron, but no dolomite; and this formation he was disposed to class with the inferior oolites.' After mentioning that an unfortunate accident, which deprived him of the use of the extensive geological collections made by him in Arabia Petræa, &c., prevented him from at present entering into the subject so largely as he wished, he subjoins: 'This one observation on the mineralogy of Palestine may, however be added, that it deserves to be most emphatically called the country of salt, which is produced in vast abundance, chiefly in the neighbourhood of the Dead Sea, which deserves to be regarded as one of the great natural salt-works of the world.'

Under this head it may be noted that the fine impalpable desert-sand, which proves so menacing to travellers, and even to inhabitants, is scarcely found in Palestine Proper; but it occurs beyond

Lebanon, near Beirut, and in the neighbourhood of Damascus.

Palestine is eminently a country of caverns, to which there is frequent allusion in Scripture [Caves], and which are hardly so numerous in any country of the same extent. Many of them were enlarged by the inhabitants, and even artificial grottoes were formed by manual labour. In these the inhabitants still like to reside; as in summer they afford protection from the heat, and in winter from cold and rain. Even now, in many places, houses are observed built so near to rocks, that their cavities may be used for rooms or sheds suited to the condition of the seasons. Though the country is not unfrequently visited by earthquakes, they leave behind no such frightful traces as those of Asia Minor; as the vaults of limestone offer more effectual resistance than the sandstone of the latter country. While the great earthquake of January 1, 1837, precipitated many buildings to the ground in and around Nazareth, not one of the grottoes dedicated to devotion was in the slightest degree injured, or their contents disturbed.

We are glad to see so competent a witness as Schubert bear his testimony to the natural resources of the soil, which superficial observers, judging only from present appearance, have so often questioned. He says, 'The ridge of chalk mountains, chiefly those containing marl, is in most places so irrigated by water, and so acted upon by the sun, as to be remarkable for the luxuriant growth of the great variety of plants with which they are adorned. The basalt mountains give birth to numerous springs. No soil could be naturally more fruitful and fit for cultivation than that of Palestine, if man had not destroyed the source of fertility by annihilating the former green covering of the hills and slopes, and thereby destroying the regular circulation of sweet water, which ascends as vapour from the sea to be cooled in the higher regions, and then descends to form the springs and rivers, for it is well known that the vegetable kingdom performs in this circulation the function of capillary tubes. But although the natives, from exasperation against their foreign conquerors and rulers (Pliny, *Hist. Nat.* xii. 54), and the invaders who have so often overruled this scene of ancient blessings, have greatly reduced its prosperity, still I cannot comprehend how not only scoffers like Voltaire, but early travellers, who doubtless intended to declare the truth, represent Palestine as a natural desert, whose soil never could have been fit for profitable cultivation. Whoever saw the exhaustless abundance of plants on Carmel and the border of the desert, the grassy carpet of Esdraelon, the lawns adjoining the Jordan, and the rich foliage of the forests of Mount Tabor; whoever saw the borders of the lakes of Merom and Gennesareth, wanting only the cultivator to entrust to the soil his seed and plants, may state what other country on earth, devastated by two thousand years of warfare and spoliation, could be more fit for being again taken into cultivation. The bountiful hand of the Most High, which formerly showered abundance upon this renowned land, continues to be still open to those desirous of his blessings.'

There are some very excellent remarks on this subject in Dr. Olin's *Travels* (ii. 235-240), to which we must be content to refer the reader, being prevented by want of room from introducing them in this place.

Levels.—Annexed to the additions to his *Palästina*, which Raumer has lately published, under the title of *Beiträge zur Biblischen Geographie*, 1843, there is an engraved scale of levels in Palestine. This document is curious and valuable, and embodies the observations of Schubert, Rüppell, Russegger, and others, whose scientific observations are more important than the rough guesses of ordinary travellers. We shall copy the results in the subjoined table, and then offer some remarks upon them. The measurements are in Paris feet, *above* and *below* the level of the Dead Sea.

	Above.
Great Hermon	10,000
Mount St. Catherine (in Sinai)	8063
Jebel Monsa (in Sinai)	7033
Jebel et-Tyh (in Sinai)	4300
Jebel er-Ramah	3000
Kanneytra	2850
Hebron	2700
Mount of Olives	2536
Sinjil	2520
Safet	2500
Mount Gerizim	2400
Semua	2225
Damascus	2186
Kidron (brook)	2140
Nabulus	1751
Mount Tabor	1748
Pass of Zephath	1437
Desert of et-Tyh	1400
Nazareth	821
Zerin	515
Plain of Esdraelon	459
	Below.
Lake of Tiberias	84 *
The Arabah at Kadesh	91
Dead Sea	1337*

Some of these results are so extraordinary, that one might occupy whole pages in discussing them. The most important of them will be considered under their proper heads; and it is here only necessary to indicate a few of the more marked results. First, here is the remarkable fact, that the Mount of Olives and the Kidron, and consequently Jerusalem, stand 700 feet higher than the top of Mount Tabor, and about 2500 feet above the level of the Mediterranean. More to the south, Hebron stands on still higher ground; and while it is 2700 feet above the sea on the one hand, the Asphaltic Lake lies 4000 feet below it on the other. This fact has no known parallel in any other region, and within so short a distance of the sea: and the extraordinary depression of the lake (1337 feet below the sea level) adequately accounts for the very peculiar climate which its remarkable basin exhibits. The points at Tiberias to the north, and Kadesh to the south of the Dead

* These measurements are in English feet, and give the results of the lines of altitude carried from the Mediterranean to the Dead Sea and the Lake of Tiberias, by the British engineers left in Syria to make a military survey of the country, when the fleet was withdrawn from the coast in 1841.

Sea, are both, and nearly equally, below the Mediterranean level, and, taken together, they show the great slope *both* from the north and from *the south* towards the Dead Sea, confirming the discovery of Dr. Robinson, that the water-shed to the south of the Asphaltic Lake is towards its basin, and that, therefore, the Jordan could not at any time, as the country is at present constituted, have flowed on southward to the Elanitic Gulf, as was formerly supposed. On the effects resulting from this great inequality of surface, we cannot do better than cite the observations of Schubert (*Reise*, iii. 104), which are of somewhat general application, although suggested by the extraordinary elevation of the site of Jerusalem. . . 'Apart from the grandeur of this country's history, nature has stamped on its surface such distinguishing and peculiar features as hardly any other portion of the world exhibits. This observation applies in particular to the neighbourhood of Jerusalem. Without taking into account the girdle of heights in its immediate neighbourhood, the ascent on all sides to this high-seated town is very considerable. It is nearly 2500 feet above the sea, which is an elevation belonging to few cities of the Eastern hemisphere equally near the sea. The ascent is, however, most striking from the east, from the vicinity of the Dead Sea, and the Jordan. Science has in our time made such progress, that the question may be fairly raised :—is there any place on earth where extraordinary elevations and depressions co-exist so near each other as they do here, where in the distance of seven hours' slow travel we find a depression of at least 600 feet, and an elevation of more than four times that amount below and above the level of the sea? The difference of elevation between Jerusalem and the plain of Jericho (near the village so called) is upwards of 3000 feet. Now it is supposed that 100 metres of this difference occasion a difference of climate equal to that which would be produced by a degree of latitude; and consequently the temperature of points so near to each other must be equal to the difference between places so remote in latitude as Rome and London. While the climate in the plain of the Jordan and Dead Sea is similar to that of Southern Arabia and the Delta of the Nile, that of Jerusalem exhibits a temperature similar to that of the isle of Lemnos and the ancient Troy, or that of the vale of Tempe and the middle districts of Sardinia. And if, from the observations of a few weeks only (but made in April when the temperature is nearly at the average of the year), an inference may be drawn, it will probably be near the mark to estimate the average heat of the summer at 84 or 85 degrees of Fahrenheit.

Mountains.—As all the principal mountains of Palestine are noticed in this work under their respective names, a few general observations are all that here seem necessary. Schubert's remarks, given in this article under the heads Mineralogy and Levels, still further limit the scope of the observations to be offered, which will consist of a bird's-eye view over the country from north to south.

To Lebanon, which forms the northern boundary of the land [Lebanon], succeeds the high table-land of Galilee, which extends to the plain of Esdraelon, and the general height of which above the sea may, by a comparison of levels, be estimated at between 900 and 1000 feet. The elevated situation of this region is evinced by the gradual declivity which it exhibits on all sides but the north, —sloping on the East towards the Jordan and its upper lakes, on the west to the plain of the Acre, and on the south to the plain of Esdraelon. Travellers express surprise at the deep descent from the comparatively level plains of Galilee to the lake of Tiberias, which, as we have seen, is 905 Paris feet below the level of Nazareth. This table-land is not without its eminences. The chief of these is Jebel Safet, which is seen to tower conspicuously and isolated, from every point except the north. This is one of the highest summits in Palestine (2500 Paris feet), although being merely a peak of the high table-land from which it rises, it does not seem to exceed elevations rising from lower levels, which are scarcely inferior. Still it is very high, even in apparent altitude. The summit of this lofty and steep mountain is crowned by a castle, and a little below the summit there is a city. This city is supposed to be that which our Saviour had in view, as 'a city set on a hill,' in his sermon on the Mount (Matt. v. 4); but it is doubtful if any city existed there so early, although modern ecclesiastical tradition has been disposed to regard this as the Bethulia of Judith [Bethulia]. The mountain itself is not named in Scripture, unless, as is probable, it be the 'mountain of Naphtali,' mentioned in Josh. xx. 9. Among the swells of this table-land are the Khurun Hattin (Horns of Hattin). This is a ridge about a quarter of a mile in length, and thirty or forty feet high, terminating at each end in an elevated peak, which gives the ridge the shape of a saddle. This is alleged to have been the place from which our Lord delivered his famous Sermon on the Mount to the multitude standing in the adjacent plain. The authority for this is very doubtful; and in the neighbourhood, towards Tiberias, there are at least a dozen other eminences which would just as well answer to the circumstances of the history. One of these, nearly three miles south-east of this, is by similarly uncertain tradition alleged to be the spot where the five thousand were fed with five loaves, although that miracle probably took place on the east side of the lake of Tiberias (Matt. xiv. 13-21).

If we consider the difference of elevation between the highland of Galilee and the low plain of Esdraelon, we shall see reason to regard the mountains and ridges of the border between them, and which form as it were the boundaries of the low plain, as merely detached or connected recesses, or peaks of the highland. The mountains of Gilboa and Hermon, which bound the plain of Esdraelon on the East, are certainly no other than portions of this high land, though they become mountains from the lower level of the great plain. Tabor itself seems but as one advanced peak or promontory of the high lands of Galilee [Tabor]. On the west the Great Plain is bounded by Carmel, which may be either regarded as a detached ridge, or as connected with the mountains of Samaria, which rise beyond the plain on the south [Carmel].

Southward of the plain of Esdraelon, throughout to the borders of the southern desert, is an almost unbroken mountainous country, or ridge of

mountains, extending north and south. It offers few conspicuous points, but its general elevation in the centre may be determined by that of Gerizim in the north (2400 Paris feet), of Olivet in the centre (2536 P. feet), and of Hebron in the south (2700 P. feet). The ascent to the higher and central region from the plain of the coast on the west is gradual, by a succession of natural terraces; but eastward, in the direction of the Jordan and Dead Sea, the descents are comparatively abrupt and precipitous.

There is no distinct *natural* boundary between the mountains of Samaria and Judæa. The hills of Samaria exhibit scenery very different from those of Galilee. They are often beautifully wooded, and the region is more populous and better cultivated than any other part of Palestine. Among numerous venerable olive-woods towns and villages are scattered in every direction, and some of the views rival those of Switzerland. The principal mountains of Samaria are those of Ebal and Gerizim, which have been described under the proper heads (Morison, ii. 10; Buckingham, *Palestine*, ch. xcii.; Elliot, ii. 380; Olin, ii. 354).

The mountains of Judæa, although of greater historical celebrity, are now less attractive than those of Samaria, but apparently for no other reason than that their cultivation has been more neglected. The hills are generally separated from each other by valleys and torrents, and are for the most part of moderate height, uneven, and seldom of any regular figure. The rock of which they are composed is easily converted into mould, which, being arrested by terraces when washed down by the rains, renders the hills cultivable, in a series of long narrow gardens, formed by these terraces, from the base upwards. Thus the hills were clad in former time most abundantly, and enriched and beautified with the fig-tree, the olive, and the vine; and it is in this way that the limited cultivation which survives is still carried on. But when the inhabitants were thinned out, and cultivation abandoned, the terraces fell to decay, and the soil which had collected on them was washed down into the valleys, leaving only the arid rock, bare and desolate. This is the general character of the hills of Judæa; but in some parts they are beautifully wooded, and in others the application of the ancient mode of culture suggests to the traveller how productive the country once was, and how fair the aspect which it offered (Kitto's *Palestine*; *Phys. Geog.* p. xxxix.; comp. Mariti, ii. 362; Elliot, ii. 107, 108; Olin, ii.; Raumer, *Palastina*, p. 47, sq.).

The characteristics of desolation which have been indicated, apply with peculiar force to the northern part of Judæa, forming the ancient territory of Benjamin. Its most favourably-situated mountains are wholly uncultivated; and perhaps in no other country is such a mass of rock exhibited without an atom of soil. In the East, towards the plain of Jericho, it takes a naturally stern and grand character, such as no other part of Palestine offers. It is through this wild and melancholy region that the roads from Jerusalem to Jericho, and (by way of Wady Saba) to the Dead Sea lie. It has hence, by the former route, often been passed by travellers in their pilgrimages to the Jordan; and they unite in depicting it in the most gloomy hues. 'The road,' says Dr. Olin, 'runs along the edge of steep precipices and yawning gulfs, and in a few places is overhung with the crags of the mountain. The aspect of the whole region is peculiarly savage and dreary, vying in these respects, though not in overpowering grandeur, with the wilds of Sinai. The mountains seem to have been loosened from their foundations, and rent in pieces by some terrible convulsion, and there left to be scathed by the burning rays of the sun, which scorches the land with consuming heat' (*Travels*, ii. 197). These characteristics became more manifest on approaching the Jordan; and the wild region extending north of the road is believed, with sufficient probability, to form 'the wilderness' where, after his baptism, Jesus 'was led up of the Spirit, to be tempted of the devil,' and where 'he fasted forty days and forty nights' (Matt. iv. 1, 2). The lofty ridge which extends north of the road, and fronts the plain of Jericho, is called Quarantana, with reference to this event, and the particular summit from which Satan is supposed to have displayed to the Saviour 'the kingdoms of the world and the glory of them,' is crowned by a chapel, still occasionally resorted to by the devouter pilgrims, while the eastern face which overhangs the plain is much occupied with grots and cells, once the favourite abode of pious anchorites. The Quarantana forms, apparently, the highest summit of the whole immense pile, and is distinguished for its sere and desolate aspect, even in this gloomy region of savage and dreary sights. It has not, that we know, been measured, but Dr. Olin computes its height at nearly 2000 feet in perpendicular height (*Travels*, ii. 119; Kitto's *Palest.*; *Phys. Geog.* p. xxxix.; Robinson, ii. 289; Hasselquist, p. 128; Maundrell, p. 79; Morison, p. 523; Nau, p. 403).

In the southern region, usually called in Scripture 'the hill country of Judah' (Matt. iii. 1), there are few mountains of a marked character; the peaks of the general ridge being of little apparent elevation, although actually much elevated above the sea-level. The most remarkable of the whole of this wild region seems to have been distinguished as 'the wilderness of Judah' (Luke i. 39, 65), while 'the mountains of Judah,' or 'the hill country of Judæa,' applies to the mountainous region south of Jerusalem towards Hebron (Josh. xi. 21; 2 Chron. xxvii. 4, &c.). To this district belongs the wilderness of Tekoa (2 Chron. xx. 20), and beyond it eastward, 'the wilderness of Engeddi' (1 Sam. xxiv. 2), Maon (1 Sam. xxiii. 24, 25), and Ziph (1 Sam. xxiii. 14, 15), names made familiar to us by the history of David. Here also is the Frank Mountain near Tekoa, which has already been described [BETHLEHEM], as well as the Carmel mentioned in the history of Nabal (Josh. xv. 55; 1 Sam. xxv.). It would seem that the hills of southernmost Judæa were, before the conquest of the country by the Hebrews, called 'the mountains of the Amorites' (Deut. i. 7, 19, 20, 43, 44). This tract has only of late been explored by travellers on the new route from Petra to Hebron, except by Seetzen, at the beginning of the present century. To obtain a clear notion of it, we should view it from the great Arabah, beyond the southern extremity of the Dead Sea, whence it was surveyed by the Israelites, when they contemplated entering the Promised Land from the south-east. The two terraces which, towards the south end of

the Dead Sea on the east side form the descent to its deep basin from the high-lands of Judæa, stretch off to the south-west, and the ascents from the plain to the first, and from the plateau of the first to the top of the second, which forms the general level of Judæa, present to him who approaches from the lower region of the Arabah, high mountain barriers, which he has to ascend by gorges or passes of more or less difficult ascent. After ascending from the great valley the traveller passes over a wild district covered with rocky hills, till he comes to the frontier wall of the first terrace or step, and which was probably pre-eminently '*the* mountain of the Amorites.' There are in this three principal passes; the southernmost being that of Nubeh-es-Sufah, the Zephath of Scripture, called also Hormah, which we know to have been the pass by which the Israelites attempted to enter Palestine from Kadesh, when they were driven back (Deut. i. 44; Num. xiv. 45; Judg. i. 17). The top of this pass is given in the table of Levels, on the authority of Schubert, as 1434 feet above the level of the sea. A particular description of this 'vast inclined plane of rock' may be seen in Robinson's *Researches* (ii. 590). On reaching the top a journey of three hours among hills of chalky limestone brings the traveller to the second great ascent to the general level of the hill country of eastern Judæa. This second ascent is similar to the first, but not more than half as high. This statement will convey some idea of that difficulty of military access to the country in this direction which eventually induced the invading Hebrews to take another and more circuitous route.

In the direct south of Judah the approach is marked by an ascent more gradual, over a succession of less elevated plateaus, from the desert regions of sand and rock to the hills of Judah. Recent discoveries in that quarter, chiefly those of Dr. Robinson, have shown that much of the south border country, which was formerly regarded as desert, is in fact a variegated region affording good pastures, into which the sheep-masters of Judah doubtless sent their flocks of old. On the mountains of Palestine generally, see Raumer's *Palästina*, pp. 29-84; Winer's *Real-worterb.*, art. 'Gebirge;' Kitto's *Palest.*, '*Phys. Geog.*' ch. ii.

Plains and Valleys.—The two preceding sections will have given an idea of the general arrangement of the plains and valleys of Palestine: and it is therefore here only necessary to indicate those which are separately the most important or the most distinguished. These are those of Lebanon, of the Jordan, of Jericho, of Esdraelon, and of the Coast.

The Plain of Lebanon may be described as the valley which is enclosed between the parallel mountain ranges of Libanus and Anti-Libanus. Although the greater part of it must have been within Solomon's dominion, it can scarcely be deemed to belong to Palestine Proper; but its geographical and historical connection with that country requires its introduction. This enclosed plain is the Cœle-Syria of the ancients, and now bears the name of El-Bekka (the Valley). It is about ninety miles in length, from north to south, by eleven miles in breadth, nearly equal throughout, except that it widens at the northern end and narrows at the southern. This plain is, perhaps, the most rich and beautiful part of Syria. The soil is good, and the water abundant from the numerous mountain springs on each side; but the concentration of the sun's rays renders the summer heat excessive. These are the sources of that fertility for which the valley has, in all ages, been renowned; but only a small portion is now cultivated, the rest being left in pasture to the Arab tribes. (La Roque, i. 115-120; Volney, i. 271; Burckhardt, pp. 4-18, 31; Addison, ii. 48-50; *Modern Syrians*, p. 124).

The Plain of the Jordan. By this name we understand the margin of the lakes, as well as the valley watered by the river. Here the heat is still greater than in the valley of Lebanon, and, in consequence, palm-trees and the fruits of more southern climes than Palestine, will grow freely wherever there are soil and water. But the latter is usually wanting, and, therefore, except on the immediate borders of the river, of the lake of Gennesareth, and of the lesser streams, the whole plain is barren and desolate: for the intense heat which causes exuberant fertility wherever there is water, consumes the plain wherever it is wanting.

The Plain of Jericho is but an opening or expansion in the plain of the Jordan, towards the Dead Sea. The whole expansion takes in the plains of Moab on the east side of the river, and the plains of Jericho on the west, the breadth across being from ten to twelve miles. In fact, the plain of the Jordan is in no other part so wide. The large plain of Jericho is partly desert, but, from the abundance of water and the heat of the climate, it might be rendered highly productive; indeed, the fertility of this plain has been celebrated in every age. Josephus describes it as the most fertile tract of Judæa, and calls it a 'divine region.' He speaks also of its beautiful gardens, and its groves of palm-trees; and his description is borne out by Scripture, in which Jericho is described as 'The city of palm-trees' (Deut. xxxiv. 3; Judg. i. 16). This region also produced honey, opobalsam, the cypress-tree (or *el henna*), and myrobalanum, as well as the common fruits of the earth in prolific abundance. The Scripture adds the sycamore-tree to the number of its products (Luke xix. 4). Of all these productions which so distinguished the climate of Jericho, and the greater part of which it enjoyed in common with Egypt, very few now remain. Only one solitary palm tree lingers in the plain; the sycamores have altogether disappeared; the celebrated opobalsam is not known; and the myrobalanum alone appears to thrive, being probably the thorny shrub, growing wild in the plain, to which the name of *zukkum* is given by the present inhabitants—the modern 'Balsam of Jericho' is an oil, extracted from the kernels of the green nut which it bears. (Nau, p. 349; Morison, p. 507; Surius, p. 491; Mariti, ii. 301; Robinson, ii. 281, sqq.; Olin, ii. 226).

The Plain of Esdraelon is often mentioned in sacred history (Judg. iv. 13, 15, 16; v. 19; 2 Kings xxiii. 29; Zech. xii. 11; Judith i. 8), as the great battle-field of the Jewish and other nations, under the names of the *Valley of Megiddo* and the *Valley of Jezreel;* and by Josephus as the *Great Plain.* The convenience of its extent and situation for military action and display has, from the earliest periods of history down to our own day, caused its surface, at certain intervals,

to be moistened with the blood, and covered with the bodies, of conflicting warriors of almost every nation under heaven. This extensive plain, exclusive of three great arms which stretch eastward towards the valley of the Jordan, may be said to be in the form of an acute triangle, having the measure of thirteen or fourteen miles on the north, about eighteen on the east, and above twenty on the south-west. In the western portion it seems perfectly level, with a general declivity towards the Mediterranean; but in the east it is somewhat undulated by slight spurs and swells from the roots of the mountains: from the eastern side three great valleys go off to the valley of the Jordan. These valleys are separated by the ridges of Gilboa and Little Hermon, and the space which lies between these two ridges, is the *proper* valley of Jezreel, which name seems to be sometimes given to the whole plain of Esdraelon. The valley of Jezreel is a deep plain, and about three miles across. Before the verdure of spring and early summer has been parched up by the heat and drought of the late summer and autumn, the view of the Great Plain is, from its fertility and beauty, very delightful. In June, yellow fields of grain, with green patches of millet and cotton interspersed, chequer the landscape like a carpet. The plain itself is almost without villages, but there are several on the slopes of the enclosing hills, especially on the side of Mount Carmel. (Robinson, ii. 160-162; Olin, ii. 376; Schubert, iii. 163; Clarke, iv. 356-360; Jowett, ii. 192; Stephens, ii. 307; Elliot, ii. 360.)

The Plain of the Coast is that tract of land which extends along the coast, between the sea and the mountains. In some places, where the mountains approach the sea, this tract is interrupted by promontories and rising grounds; but, taken generally, the whole coast of Palestine may be described as an extensive plain of various breadth. Sometimes it expands into broad plains, at others it is contracted into narrow valleys. With the exception of some sandy tracts the soil is throughout rich, and exceedingly productive. The climate is everywhere very warm, and is considered rather insalubrious as compared with the upland country. It is not mentioned by any one collective name in Scripture. The part fronting Samaria, and between Mount Carmel and Jaffa, near a rich pasture-ground, was called the *Valley of Sharon;* and the continuation southward, between Jaffa and Gaza, was called *The Plain*, as distinguished from the hill-country of Judah. A minute description of this plain throughout its extent is given in Kitto's *Palestine, Phys. Geog.* p. c.-cv.

Rivers.—The Jordan is the only river of any note in Palestine, and besides it there are only two or three perennial streams. The greater number of the streams which figure in the history, and find a place in the maps, are merely torrents or water-courses, which carry off the waters in the season of rain, or if they have their origin in springs, are spent, in the season of drought, soon after they quit their sources.

The Jordan. We should like to consider this river simply as the stream issuing from the reservoir of the lake Huleh, but custom requires its source to be traced to some one or more of the streams which form that reservoir. The two largest streams, which enter the lake on the north, are each formed by the junction of two others. It is usual to refer the origin of a river to its remotest sources; but in this case the largest and longest, being the most easterly of the two streams, does not appear to have been at any time identified with the Jordan—that honour having for ages been ascribed to the western stream; *this* river has distinct sources, at Banias and at Tel-el-Kâdi. At Banias (anciently *Paneas*, from the worship of Pan) a stream issues from a spacious cavern, under a wall of rock, at the base of the Heish mountains. Directly over the cavern, and in other parts, in the face of the perpendicular rock, niches have been cut to receive statues. Here Herod built a temple in honour of Augustus; and there was a town somewhat below, traces of which still remain. This is, undoubtedly, that place and cavern, at the foot of a mountain, which Josephus describes as the main source of the Jordan (Joseph. *Antiq.* xv. 10. 3; *De Bell. Jud.* i. 21. 3). Yet, in another place (*De Bell. Jud.* iii. 10. 7), this writer refers the source to a remoter quarter. He relates that the Tetrarch Philip cast some chaff into the lake Phiala, and as it came out at the Paneas cavern, the lake was deemed the true source of the river. This lake lay 120 stadia eastward, and was deep and round, like a bowl or cup—whence its name Phiala. Such a lake, about a mile in circumference and perfectly round, was discovered by Captains Irby and Mangles, as they journeyed from Damascus to Banias, not more than twelve miles from the latter place.

A second source of the Jordan, as described by ancient writers, is at the place now called Tel-el-Kâdi, which is about three miles to the west of the cavern at Banias. The *Tell* (hill) is a small elevation in the plain, with a flat space on the top: here are two springs, one of which is very large. The united waters immediately form a stream, twelve or fifteen yards across, which rushes rapidly over a stony bed into a lower plain. After a course of about four miles the stream unites with that from Banias, forming the reputed Jordan, which then continues its course to the lake.

The true Jordan—the stream that *quits* this lake—passes rapidly along the narrow valley, and between well-shaded banks, to the lake of Gennesareth: the distance is about nine miles. Nearly two miles below the lake is a bridge, called Jacob's bridge; and here the river is about eighty feet wide, and four feet deep. It is said that, in passing through, the Jordan does not mingle its waters with those of the lake of Gennesareth: the same thing is reported of other rivers that pass through lakes. It is certain that the course of the river may be traced through the middle of the lake by a line of smoother water.

On leaving the lake of Gennesareth the river enters a very broad valley, or *Ghor*, by which name the natives designate a depressed tract or plain between mountains. This name is applied to the plain of the Jordan, not only between the lake of Gennesareth and the Dead Sea, but quite across the Dead Sea, and to some distance beyond. The valley varies in width from five to ten miles between the mountains on each side. The river does not make its way straight through the midst of the Ghor; it flows first near the western hills,

then near the eastern, but advances to the Dead Sea through the middle of the valley. Within this valley there is a lower one, and within that, in some parts, another still lower, through which the river flows; the inner valley is about half a mile wide, and is generally green and beautiful, covered with trees and bushes, whereas the upper or large valley is, for the most part, sandy or barren. The distance between the two lakes, in a direct line, is about sixty miles. In the first part of its course the stream is clear, but it becomes turbid as it advances to the Dead Sea, probably from passing over beds of sandy clay. The water is very wholesome, always cool, and nearly tasteless. The breadth and depth of the river varies much in different places and at different times of the year. Dr. Shaw calculates the average breadth at thirty yards, and the depth at nine feet. In the season of flood, in April and early in May, the river is full, and sometimes overflows its lower banks, to which fact there are several allusions in Scripture (Josh. iii. 15; 1 Chron. xii. 15; Jer. xii. 5; xlix. 19; l. 44; Ecclus. xxiv. 26). (Nau, p. 272; Shaw, ii. 156; Paxton, p. 158; Stephens, ii. 361-363; Burckhardt, pp. 39-43; 314, 345, 514; Irby and Mangles, pp. 283-290; 304, 326; Buckingham, *Arab Tribes*, pp. 401-406; *Palestine*, i. 90, 93; Robinson, ii. 255-267; iii. 309-312; 347, 355; Olin, ii. 229-334; Schubert, iii. 80-84; Pococke, ii. 71; Richardson, ii. 425, 445, 446; Lindsay, ii. 65, 91; Elliot, i. 74-77.)

The Kishon, that 'ancient river,' by whose wide and rapid stream the hosts of Sisera were swept away (Judg. iv. 13; v. 21), has been noticed under the proper head [Kishon].

The Belus, now called *Nahr Kardanus*, enters the bay of Acre higher up than the Kishon. It

444. [Ford of the Jordan.]

is a small stream, fordable even at its mouth in summer. It is not mentioned in the Bible, and is chiefly celebrated for the tradition, that the accidental vitrefaction of its sands taught man the art of making glass.

The other streams of note enter the Jordan from the east; these are the Jarmuth, the Jabbok, and the Arnon, of which the last two have been noticed under their proper heads. *The Jarmuth*, called also *Sheriat-el-Mandhour*, anciently *Hieromax*, joins the Jordan five miles below the lake of Gennesareth. Its source is ascribed to a small lake, almost a mile in circumference, at Mezareib, which is thirty miles east of the Jordan. It is a beautiful stream, and yields a considerable body of water to the Jordan [Arnon; Jabbok].

Lakes.—The river Jordan in its course forms three remarkable lakes, in the last of which, called the Dead Sea, it is lost:—

The Lake Merom (Joseph. *Antiq.* xi. 5, 7), or *Samochonitis* (*Antiq.* v. 5, 1), now called *Huleh*, the first of these, serves as a kind of reservoir to collect the waters which form the Jordan, and again to send them forth in a single stream. In the spring, when the waters are highest, the lake is seven miles long and three and a half broad; but in summer it becomes a mere marsh. In some parts it is sown with rice, and its reeds and rushes afford shelter to wild hogs. (Pococke, ii. 71; Burckhardt, p. 316; Irby and Mangles, p. 290; Buckingham, *Arab Tribes*, p. 309; Richardson, ii. 450, 451; Robinson, ii. 339-342.)

The Lake of Gennesareth, called also the *Sea of Galilee*, and the *Lake of Tiberias*. After quitting the lake Merom, the river Jordan proceeds for about thirteen miles southward, and then enters the great lake of Gennesareth. This lake lies very deep, among fruitful hills and mountains, from which, in the rainy season, many rivulets descend; its shape will be seen from the map. Its extent has been greatly over-rated: Professor Robinson considers that its length, in a straight line, does not exceed eleven or twelve geographical miles, and that its breadth is from five to six miles. From numerous indications, it is judged that the bed of

this lake was formed by some ancient volcanic eruption, which history has not recorded. Its waters are very clear and sweet, and contain various kinds of excellent fish in great abundance. It will be remembered that several of the apostles were fishermen of this lake, and that it was also the scene of several transactions in the life of Christ: it is thus frequently mentioned in the New Testament, but very rarely in the Old, where it is called the *Sea of Cinnereth*, of which *Gennesareth* is a corruption. The borders of the lake were in the time of Christ well peopled, being covered with numerous towns and villages; but now they are almost desolate, and the fish and water-fowl are but little disturbed. (Robinson, iii. 253, 264, 312, 314; Schubert, iii. 235-243; Olin, ii. 406-408; D'Arvieux, ii. 176, 177; Clarke, iv. 119-225; Burckhardt, p. 332; Buckingham, *Palest.* ch. xxv.; Irby and Mangles, p. 295; Jowett, pp. 172-176; Hardy, pp. 237-241; Elliot, ii. 342-350.)

The Dead Sea, called also the *Salt Sea*, the *Sea of Sodom*, and the *Asphaltic Lake* (*Lacus Asphaltites*), is from its size the most important, and from its history and qualities the most remarkable, of all the lakes of Palestine. It was long assumed that this lake did not exist before the destruction of Sodom and the other 'cities of the plain' (Gen. xix.); and that before that time the present bed of the lake was a fertile plain, in which these cities stood. It was also concluded that the river Jordan then flowed through this plain, and afterwards pursued its course, through the great valley of Arabah, to the eastern arm of the Red Sea. The careful observations of Professor Robinson have now, however, rendered it more probable that a lake which, as now, received the river Jordan, existed here before Sodom was destroyed; but that an encroachment of the waters, southward, then took place, overwhelming a beautiful and well-watered plain which lay on the southern border of the lake, and on which Sodom, Gomorrah, Admah, Zeboim, and Zoar were situated. The promontory, or rather peninsula,* towards the south, which is so distinct a feature of this lake, probably marks the original boundary of the lake in that direction, and shows the point through which the waters broke into the plain beyond.

The Dead Sea is about thirty-nine or forty geographical miles long from north to south, and nine or ten miles wide from east to west; and it lies embedded very deep between lofty cliffs on the western side, which are about 1500 feet high, and mountains on the eastern shore, the highest ridges of which are reckoned to be from 2000 to 2500 feet above the water. The water of the lake is much salter than that of the sea. From the quantity of salt which the water holds in solution it is thick and heavy, and no fish can live, or marine plants grow in it. The old stories about the pestiferous qualities of the Dead Sea and its waters are mere fables or delusions; and actual appearances are the natural and obvious effects of the confined and deep situation, the intense heat, and the uncommon saltness of the waters. Lying in its deep cauldron, surrounded by lofty cliffs of naked limestone rock, exposed for seven or eight months in the year to the unclouded beams of a burning sun, nothing but sterility and solitude can be looked for upon its shores; and nothing else is actually found, except in those parts where there are fountains or streams of fresh water; in all which places there is a fertile soil and abundant vegetation. Birds also abound, and they are observed to fly over and across the sea without being, as old stories tell, injured or killed by its exhalations. Professor Robinson was five days in the vicinity of its shores, without being able to perceive that any noisome smell or noxious vapour arose from the bosom of the lake. Its coasts have always been inhabited, and are so now; and although the inhabitants suffer from fevers in summer, this is not more than might be expected from the concentrated heat of the climate in connection with the marshes. The same effects might be experienced were there no lake, or were the waters fresh instead of salt.

On the borders of this lake is found much sulphur, in pieces as large as walnuts, and even larger. There is also a black shining stone, which will partly burn in the fire, and which then emits a bituminous smell: this is the 'stink-stone' of Burckhardt. At Jerusalem it is made into rosaries and toys, of which great quantities are sold to the pilgrims who visit the sacred places. Another remarkable production found here, from which, indeed, the lake takes one of its names, is *asphaltum*, or bitumen. Josephus says, that 'the sea in many places sends up black masses of asphaltum, which float upon the surface, having the size and shape of headless oxen' (*De Bell. Jud.* iv. 8, 4). From recent information it appears that large masses are rarely found, and then generally after earthquakes. The substance is doubtless produced from the bottom of the sea, in which it coagulates, and rises to the surface; or possibly the coagulation may have been ancient, and the substance adheres to the bottom until detached by earthquakes and other convulsions, when its buoyancy brings it to the surface. We know that 'the vale of Siddim' (Gen. xiv. 10) was anciently 'full of slime-pits' or sources of bitumen; and these, now under the water, probably supply the asphaltum which is found on such occasions (Nau, pp. 577, 578; Morison, ch. xxx.; Shaw, ii. 157, 158; Hasselquist, pp. 130, 131, 284; Irby and Mangles, pp. 351-356, 346-359; Hardy, pp. 201-204; Monro, i. 145-148; Elliott, ii. 479-486; Wilde, ii.; Lindsay, ii. 64-66; Stephens, ii. ch. 15; Paxton, pp. 159-163; Robinson, ii. 204-239; 601-608; 661-677; Schubert, iii. 84-92; Olin, ii. 234-245).

Climate and Seasons.—The variations of sunshine and rain which, with us, extend throughout the year, are in Palestine confined chiefly to the latter part of autumn and the winter. During all the rest of the year the sky is almost uninterruptedly cloudless, and rain very rarely falls.

The autumnal rains usually commence at the latter end of October, or beginning of November, not suddenly, but by degrees; which gives opportunity to the husbandman to sow his wheat and barley. The rains come mostly from the west (Luke xii. 54) and south-west, and continue for two or three days at a time, falling chiefly in the night; the wind then changes to the north or east, and several days of fine weather succeed. During the months of November and December the rains

* See the figure of the Dead Sea in the map.

continue to fall heavily; afterwards they return at longer intervals, and are not so heavy; but at no period during the winter do they entirely cease to occur. Rain continues to fall more or less during the month of March, but is afterwards very rare. Morning mists occur as late as May, but rain almost never. Rain in the time of harvest was as incomprehensible to an ancient Jew as snow in summer (Prov. xxvi. 1; 1 Sam. xii. 17; Amos iv. 7). The 'early' and the 'latter' rains, for which the Jewish husbandmen awaited with longing (Prov. xvi. 15; James v. 7), seem to have been the first showers of autumn, which revived the parched and thirsty soil, and prepared it for the seed; and the later showers of spring, which continued to refresh and forward the ripening crops and the vernal products of the fields.

The cold of winter is not severe, and the ground is never frozen. Snow falls more or less. In the low-lying plains but little falls, and it disappears early in the day; in the higher lands, as at Jerusalem, it often falls, chiefly in January and February, to the depth of a foot or more; but even there it does not lie long on the ground. Thunder and lightning are frequent in the winter.

In the plains and valleys the heat of summer is oppressive, but not in the more elevated tracts, as at Jerusalem, except when the south wind (*Sirocco*) blows (Luke xii. 55). In such high grounds the nights are cool, often with heavy dew. The total absence of rain in summer soon destroys the verdure of the fields, and gives to the general landscape, even in the high country, an aspect of drought and barrenness. No green thing remains but the foliage of the scattered fruit-trees, and occasional vineyards and fields of millet. In autumn the whole land becomes dry and parched; the cisterns are nearly empty, and all nature, animate and inanimate, looks forward with longing for the return of the rainy season.

In the hill-country the season of harvest is later than in the plains of the Jordan and of the sea-coast. The barley-harvest is about a fortnight earlier than that of wheat. In the plain of the Jordan the wheat-harvest is early in May; in the plains of the Coast and of Esdraelon it is towards the latter end of that month; and in the hills, not until June. The general vintage is in September, but the first grapes ripen in July, and from that time the towns are well supplied with this fruit.

In the Biblical narrative only two seasons of the year, summer and winter, are directly mentioned. Among many Oriental nations, as the Hindoos and Arabians, the year has six seasons. The Talmud (*Bava Mezia*, p. 106. 2) exhibits a similar arrangement, which in this case appears to have been founded on Gen. viii. 22, 'While the earth remaineth, seedtime and harvest, and cold and heat, and summer and winter, shall not cease.' This is the only passage of Scripture which can be construed to have reference to any such division of the seasons, and in this it is not very clear. But if such a distribution of the seasons ever existed, the following would seem to have been its arrangement:

1. זֶרַע, *Seedtime;* 15th October to 15th December.

2. חֹרֶף, *Winter;* 15th December to 15th February.

3. קוֹר, *Cold;* 15th February to 15th April.

4. קָצִיר, *Harvest;* 15th April to 15th June.

5. חֹם, *Heat;* 15th June to 15th August.

6. קַיִץ, *Summer;* 15th August to 15th October.

The climate of Palestine has always been considered healthy, and the inhabitants have for the most part lived to a good old age (Tacit. *Hist.* v. 6). Jerusalem, in particular, from its great elevation, clear sky and invigorating atmosphere, should be a healthy place, and so it is generally esteemed; but the plague frequently appears among its ill-fed and uncleanly population; and bilious fevers, the result of great and sudden vicissitudes of temperature, are more common than might be expected in such a situation. (Schubert, *Morgenland*, iii. 106; Olin, ii. 333; Robinson, ii. 96-100; Kalthoff, *Hebr. Alterthum*, pp. 42-46; *Bibliotheca Sacra*, Feb. 1844, pp. 221-224.)

Inhabitants.—Under this head we present the reader with the following observations of Dr. Olin (*Travels*, ii. 438, 439):—'The inhabitants of Palestine are Arabs; that is, they speak the Arabic, though, with slight exceptions, they are probably all descendants of the old inhabitants of Syria. They are a fine, spirited race of men, and have given Mohammed Ali much trouble in subduing them, and still more in retaining them in subjection. They are said to be industrious for Orientals, and to have the right elements for becoming, under better auspices, a civilized intellectual nation. I believe, however, it will be found impracticable to raise any people to a respectable social and moral state under a Turkish or Egyptian, or any other Mohammedan government. The inherent vices of the religious system enter, and, from their unavoidable connections, must enter, so deeply into the political administration, that any reform in government or improvememt in the people, beyond temporary alleviations of evils too pressing to be endured, cannot reasonably be expected. The Turks and Syrians are about at the maximum of the civilization possible to Mohammedans of the present time. The mercantile class is said to be little respected, and generally to lack integrity. Veracity is held very lightly by all classes. The people are commonly temperate and frugal, which may be denominated Oriental virtues. Their situation, with regard to the physical means of comfort and subsistence, is, in many respects, favourable, and under a tolerable government would be almost unequalled. As it is, the Syrian peasant and his family fare much better than the labouring classes of Europe. The mildness of the climate, the abundance of land and its fertility, with the free and luxuriant pasturage that covers the mountains and the plains, render it nearly impossible that the peasant should not be well supplied with bread, fruit, meat, and milk. The people almost always appear well clothed. Their houses, too, though often of a slight construction and mean appearance, must be pronounced commodious when compared with the dark, crowded apartments usually occupied by the corresponding classes in Europe. Agricultural wages vary a good deal in different parts of the country, but I had reason to conclude that the average was not less than three or four piasters per day.' With all these advantages population

is on the decline, arising from polygamy, military conscription, unequal and oppressive taxation, forced labour, general insecurity of property, the discouragement of industry, and the plague.

Natural History.—As all the objects of natural history, mentioned in Scripture, are in the present work examined under the proper heads with unexampled care and completeness, by writers eminent in their several departments, it is unnecessary in this place to go over the ground which has been so advantageously pre-occupied. All that is here wanted is an account of the *actual* natural history of the country. In the *Physical Geography*, attached to the present writer's *Pictorial History of Palestine*, a large body of information on this subject, derived from a great number of travellers, has been brought together. Since then Schubert has published his *Reise in das Morgenland*, Erlangen, 1840; the third volume of which contains several pages (pp. 104-123) devoted to the natural history of Palestine. Schubert was a most competent observer, and one of the very few real naturalists who have visited the country since Hasselquist; and we consider that his account forms the most valuable contribution to the natural history of the country which any single traveller has yet offered. His observations on the mineralogy of Palestine have already been introduced, and we shall further enrich this article with the remainder of his important and interesting notice.

Botany. In the present work, that which is called *Biblical Botany* is largely considered under the names of the several products; and for the actual Flora of the country the most copious account which has hitherto been furnished, will be found in the writer's above-named work on *Palestine*. The ample materials there brought together are not however so well suited to the object of this sketch, as the short account given by Schubert of the principal products. He states that a more detailed account is reserved for another work, and for the present is content to lead his reader along one footpath of the great garden.

In the Koran of Mohammed God is introduced as swearing by the fig and by the olive, which the Moslem commentators say, mean Damascus and Jerusalem. The olive certainly was, and still continues to be, the chief of all the trees of Palestine, which seems to be its natural home. 'Never,' says Schubert, 'have I any where beheld such ancient olive-trees as here. But the plantations might be more extensive, and the produce more profitable, were they tended by such careful and diligent hands as those of Provence. Excellent oil is obtained from the fruit. But although the pre-eminence among the trees of Palestine must be assigned to the olive, *fig-trees* also occur in great numbers, and the plantations sometimes cover large tracts which the eye can scarcely embrace. This sight is most common in the neighbourhood of Jabrut, in the hills between Bir and Sinjil. The fruit has a peculiarly pleasant flavour, and an aromatic sweetness, but is generally smaller than that of Smyrna. As to the *vine*, which is now only found in some districts of Palestine, it is not surpassed by any on earth for the strength of its juice, and—at least in the southern mountains—for the size and abundance of the grapes. In the neighbourhood of Lebanon I drank wine, which seemed to me unequalled by any I had ever tasted for strength and flavour. As the Moslems do not openly drink wine, though they are beginning to relish the forbidden enjoyment, they avail themselves of such of the abundance of grapes which the country yields, as they do not eat, or sell to Christians and Jews, who press them for wine, in preparing raisins, but more in making an unrivalled syrup called *dibs*, which is exported chiefly to Egypt. From the large quantities exported the great abundance of the produce is apparent; and Dr. Shaw states that in his time not less than 2000 cwts. were annually exported from Hebron alone. In the environs of Jerusalem and Hebron the grapes are ripe, and are gathered in September; only in Lebanon do the people trouble themselves to cherish and preserve the wine; but generally drink the produce of the year from one vintage to another.

The first tree whose blossoms appear prior to the period of the latter rains, and open in the very deep valleys before the cold days of February set in, is the *Luz* or *almond-tree*. We found the environs of Hebron, in March, adorned with fruit-trees in blossom, among which were the apricot, the apple, and the pear; in April the purple of the pomegranate flowers combines with the white of the myrtle blossoms; and at the same period the roses of the country, and the variegated ladanes (Cistus); the zukkîm-tree (Elæagnus angustifolius), the storax-tree, whose flowers resemble those of the German jasmine (Philadelphus coronarius), emit their fragrant odours.*

Together with the victorious strength of the country, the palm-tree, the symbol of victory, has been removed from its place; and of the famous palm groves of Jericho very few traces now remain. But how well this excellent tree thrives in the low-lands, we witnessed at Acre, and in the environs of Caipha, under Carmel.

The tall cypress only exists in Palestine, as cultivated by man, in gardens, and in cemeteries, and other open places of towns. But as the spontaneous growth of the country, we find upon the heights and swelling hills the azarole (Cratægus azarolus), the walnut-tree, the strawberry-tree, the laurel-tree, the laurestinus, species of the pistachio and terebinth trees, of evergreen oaks, and of the rhamnus of the size of trees and shrubs, the cedrine juniper-tree, and some sorts of thymelæus; while on the formerly wooded heights various kinds of pine-trees, large and small, still maintain their ground. The sycamore, the carob trees, and the opuntia fig trees, are only found as objects of cultivation in or near towns; and orchards of orange and lemon trees occur chiefly in the neighbourhood of Nabulus (Shechem).

The various kinds of corn grow spontaneously in great plenty in many districts, chiefly in the plains of Jezreel and the heights of Galilee, being the wild progeny of formerly cultivated fields, and bearing testimony by their presence to the fitness of the soil for the production of grain. In addition to wheat and barley, among this wild growth, the common rye was often seen. The present course

* A very full account of the state of the vegetable products of Palestine, from month to month, throughout the year, is given in the *Physical Geography of Palestine* above referred to.

of agriculture, which is but carelessly practised, comprises nearly the same kinds of grain which are grown in Egypt. Fields are seen covered with summer *dhurah* (*dhurah gaydi*), the common *dhurah* (*dhurah sayfeh*), and the autumnal *dhurah* (*dhurah dimiri*), all of which are varieties of the Holcus sorghum. Maize (*kumh*), spelt, and barley (*schayir*), thrive everywhere; and rice (*aruz*) is produced on the Upper Jordan and the marshy borders of the lake Merom. Upon the Jordan, near Jacob's bridge, may be seen fine tall specimens of the papyrus reed. Of pulse the inhabitants grow the *hommos* or chick pea (Cicer arietanum), the *fool* or Egyptian bean (Vicia faba), the *gishrungayga* (Phaseolus Mungo), the *gilban* (Lathyrus sativus), together with the *ads* or lentil, and the *bisilleh* or peas (Pisum arvense). Of esculent vegetables, the produce of the various species of hibiscus are much liked and cultivated, particularly the *bamia towileh* (Hibiscus esculentus), the *bamia beledi*, or *wayka* (Hibiscus præcox). In some places the Christian inhabitants or Franks are endeavouring to introduce the potato which the natives call *kolkas Franschi*. In the garden of the monasteries the *kharschuf* or artichoke is very common, as is also the *khus* or salad: in most districts, as about Nabulus (Shechem) the water-melon (*batikh*) and cucumber (*khiar*) are common. Hemp (*bust*) is more commonly grown in Palestine than flax (*kettan*); and in favourable localities cotton (*kotn*) is cultivated, and also madder (*fuah*, Rubia tinctorum) for dyeing.

'My report,' pursues Schubert, 'would become a volume were I to enumerate the plants and flowers which the season exhibited to our view; for whoever follows the comparatively short course of the Jordan from the Dead Sea northward, along the borders of the lakes of Gennesareth and Merom, and onward to the utmost springs in Anti-Libanus, traverses in a few days climates, zones, and observes varieties of plants which are in other countries separated by hundreds of miles. The blood-immortelle (Gnaphilium sanguineum) is a small plant which the pilgrims commonly gather in the Mount of Olives; while from Carmel and Lebanon they pluck the great Oriental immortelle (Gnaph. orientale) as a memorial of their pilgrimage. The fruits of the mandrake of Palestine (Mandragora autumnalis) are sought in the neighbourhood of Jerusalem by the Oriental Christians, as well as by the Moslems, because they are considered to possess peculiar powers: but the plant is in that quarter very rare, though of frequent occurrence on the south of Hebron, and in Mounts Tabor and Carmel. Whoever desires views really extensive and beautiful of lilies, tulips, hyacinths, and narcissuses, must in the spring season visit the districts through which we passed; where also the garlic assumes a size and beauty which might render it worthy of becoming an ornamental plant in our gardens.'

Animals.—Herds of black cattle are now but rarely seen in Palestine. The ox in the neighbourhood of Jerusalem is small and unsightly, and beef or veal is but rarely eaten. But on the Upper Jordan, and in the vicinity of Tabor and Nazareth, and to the east of the Jordan on the way from Jacob's bridge to Damascus, the ox thrives better and is more frequently seen. The buffalo thrives upon the coast, and is there equal in size and strength to the buffalo of Egypt. The rearing of black cattle seems to have been checked by the exactions of the government, from whose notice wealth, in the shape of animals so bulky, could not be easily withdrawn or concealed. The absence of fences also renders it difficult to put them to graze, as they could hardly be prevented from trespassing in the corn-fields, and of treading down ten times more than they would eat. King Solomon required daily for his table ten fattened and twenty grass-fed oxen (1 Kings iv. 23); but were another Solomon now to ascend the throne of Israel, he would have to be contented with the flesh of sheep and goats. These animals are still seen in great numbers in all parts of the country: their flesh and milk serve for daily food, and their wool and hair for clothing. The common sort of sheep in Palestine manifest the tendency to form a fat and large tail. The long-eared Syrian goat is furnished with hair of considerable fineness, but seemingly not so fine as that of the same species of goat in Asia Minor. Of animals of the deer kind, Schubert saw only the female of the fallow-deer, and this was in the same district in which Hasselquist also met with fallow-deer, namely, on Mount Tabor. On another occasion he thought that he discovered animals of the deer kind upon the mountain top; but, on a closer view, deemed it more probable that they were the native brown antelope (*A. hinnuleus*); for of the antelopes several species are met with in the country.

Camels are not reared in Palestine to any extent worth mentioning, at least on the west of the Jordan; but several herds of these animals were noticed near Baalbec, in the great valley between Libanus and Anti-Libanus. Palestine cannot boast of its native breed of horses, although fine animals of beautiful shape, and apparently of high Arabian race, are not unfrequently seen. The ass of the country scarcely takes higher relative rank than the horse; asses and mules are still, however, much used for riding, as they afford a means of locomotion well suited to the difficult mountain paths of the country. Boars (*khanzie*) are very often observed upon Mount Tabor and the Lesser Hermon, as well as on the woody slopes of Mount Carmel; and from these habitats they often descend into the plains of Acre and Esdraelon. Of the *waber* or Hyrax Syriacus, to which, in Arabia Petræa, so much attention has lately been drawn, no trace has been found in Palestine or Syria, although it has been named from the latter country. Our traveller was informed by the guides who conducted his party from Jerusalem to the Dead Sea, and afterwards to Damascus, to the neighbourhood of which they belonged, that the lion was among the most dangerous animals of the country; 'but,' he adds, 'I could not credit them, on account of their general ignorance, which they evinced by naming several animals after which I inquired by the general term *hywan*, *i. e.* "animal;" or at best, *wakesch*, *i. e.* "wild-animal." If the lion should really have been in modern times seen in Palestine, it can scarcely have been indigenous, but must in all probability have wandered from the more eastern region towards the Euphrates, where it certainly exists.' Among indigenous animals of the genus *felis*, we

may however name the common panther (*nimr*) which is found among the mountains of central Palestine; and in the genus *canis* there is the small *Abul Hhosseyn*, or Canis famelicus, and a kind of large fox (Canis Syriacus), which our traveller did not himself see, but supposed to be denoted by the word *taleb*. In addition to these is the jackal (*dibb*), which is very injurious to the flocks. The hyæna (*zabue*) is found chiefly in the valley of the Jordan, and in the mountains around the lake of Tiberias, but is also occasionally seen in other districts of Palestine. Of bears our traveller saw none, but he met with hides cut up and hanging from the saddles of some mules, to whose riders they furnished a comfortable seat. The animals to which the hides belonged were said to have been killed in the Anti-Libanus, not far from Damascus. The hides had more resemblance to that of the common brown bear than to that of the bear described by Ehrenberg under the name of Ursus Syriacus. A hedgehog was procured near Bethlehem, which was found to resemble the common European animal, and not to be the long-eared Egyptian species. The native *arneb* or hare is the same as the Arabian. The porcupine is frequently found in the clefts of the rocks in Palestine, and is called *kanfeds*, though the common people also give it the same name with the hedgehog.

Among the larger birds of prey Schubert often saw the common *cathartes* or vulture (C. percnopterus), and the *hedy* or kite. The native wild dove, called *qimri*, differs not perceptibly from our own species, which is also the case with the shrikes, crows, rollers, and other species found in Palestine.

Schubert had no opportunity of ascertaining whether the large animal called by the Arabs *temsah*, and said to be found in a river or small lake to the west of Shechem, really was the crocodile, as the name implies. The tortoise, observed near Bethlehem and Nazareth, was the Testudo Græca, which is found also in Italy and Greece. Serpents are rare, and none of those which have been observed are poisonous. Our traveller noticed them only in the environs of Nazareth, and on the route from Cana to the lake of Tiberias. For observations on the fresh-water snakes of Palestine, we are referred for information to an intended work of Schubert's fellow-traveller, Dr. Roth, which does not seem to have been yet published. Near Beirut was noticed the Janthina fragilis, which yields the common purple dye. Among the insects the bee is the most conspicuous. Mosquitoes are somewhat troublesome, but not at the time of the year in which Schubert travelled. Beetles are abundant, and of various species, which our traveller does not enumerate, but which are figured and described in Ehrenberg's *Symbolæ Physicæ*.

Of the numerous works on Palestine it is impossible to offer a complete list in this place. A copious list of such works was given in the *Pictorial History of Palestine;* and since then one, not materially different, has also been presented in Dr. Robinson's *Biblical Researches*. A very excellent list is also prefixed to Raumer's *Palästina*. Nearly all the works in these lists are in the writer's possession, or have been examined by him; but his object in drawing up the following summary is simply to supply the titles of the works which, for brevity, are referred to in the preceding article only by the names of the writers, and to indicate such others as appear to him the most trustworthy and useful. Works merely curious or entertaining are purposely omitted. We have adopted a chronological arrangement. The dates are those of publication; but the order is that of travel :—

Eusebii et Hieronymii *Onomasticon Locorum et Urbium*, 1631, 1639; *Itinerarium* B. Antonini Martyris, 1640; Adamnanus, *De Locis Sanctis*, 1619; Benjamin Tudelensis, *Itinerarium*, 1633, Berlin, 1840; Will. Tyrensis, *Historia Belli Sacri*, 1549; Jacobi de Vitriaco, *Historia Hierosolymitana*, 1597; Brocardi *Locorum Terræ Sanctæ Descriptio*, 1513; Abulfedæ *Tabula Syriæ* (Arab. and Latin), 1766; Suchem, *Von dem Gelobten Land*, 1477; Gumpenberg, *Meerfarth In das Heilige Land*, 1561; Tucher, *Reyssbeschreibung*, 1482; Breydenbach, *Itiner. Hieros. ac in T. Sanctam*, 1486; Fabri, *Eigentliche Beschreybung der Hin. und Wiederfarth zu dem H. Land*, 1556; La Huen, *La Grant Voyage de Hierusalem*, 1516; Baumgarten, *Peregrinatio*, 1594; Belon, *Observations*, 1553; Furer, *Itinerarium*, 1620; Rauwolf, *Aigenliche Beischreibung, &c.*, 1581, translated in Ray's *Collection*, 1696; Radzivil, *Jerosolymitana Peregrinatio*, 1601; Zuallart, *Il Devotissimo Viaggio di Gierusalemme*, 1587; Cotovicus, *Itinerar. Hierosolymitanum et Syriaeum*, 1619; Rochetta, *Peregrinatione di Terra Santa*, 1630; Sandys' *Travailes*, 1615; Quaresmius, *Historica, theologica, et moralis Terræ Sanctæ Elucidatio*, 1639; Castillo, *El Devoto Peregrino y Viage de Tierra Santa*, 1656; Surius, *Le Pieux Pelerin*, 1666; Monconys, *Journal des Voyages, &e*, 1665; Doubdan, *Le Voyage de la Terre Sainte*, 1657; Thevenot, *Voyage au Levant*, 1665; D'Arvieux, *Voyage dans la Palestine*, 1717; Von Troilo, *Orientalische Reisebesehreibung*, 1676; De Bruyn (Le Brun), *Reyzen door den Levant*, 1699; Nau, *Voyage Nouveau de la Terre Sainte*, 1679; De la Roque, *Voyage de Syrie et du Mont Leban*, 1722; Maundrell, *Journey from Aleppo to Jerusalem*, 1697; Morison, *Relation d'un Voyage au Mont Sinai et à Jerusalem*, 1704; Van Egmond en Heyman, *Reizen door een Gedeelte van Europa . . . Syria, &c.*, 1757, 1758—English, 1759; Shaw, *Travels in Barbary and the Levant*, 1738; Korten, *Reise nach dem Gelobten Lande*, 1741; Pococke, *Description of the East*, 1743-1748; Hasselquist, *Iter Palæstinum*, 1757—English, 1766; Schulz, *Leitungen*, &c., 1771-75; Mariti, *Viaggi per le Soria e Palestine*, 1769-71; Niebuhr, *Beschreibung von Arabien*, 1773; *Reisbeschreibung nach Arabien*, 1774-78—the volume relating to the Holy Land was not published till 1837; Volney, *Voyage en Syrie*, 1787; Clarke, *Travels*, 1811; Ali Bey, *Travels*, 1816; Seetzen—his valuable observations are scattered through many volumes of Zach's *Monatliche Correspondenz;* a small portion was translated and published in 1812 by the 'Palestine Society,' under the title of *A Brief Account of the Countries adjoining the Lake of Tiberias, the Jordan, and the Dead Sea*. Burckhardt, *Travels in Syria and the Holy Land*, 1822; Turner, *Journal of a Tour in the Levant*, 1820; Richter, *Wallfahrten im Morgenlande*, 1822; Buckingham, *Travels in Palestine*, 1821; *Travels among the*

Arab Tribes, 1825; Richardson, *Travels along the Mediterranean*, 1822; Joliffe, *Letters from Palestine*, 1819; Irby and Mangles, *Travels in Egypt, Nubia, Syria, &c.*, 1822; Jowett, *Christian Researches in Syria and the Holy Land*, 1825; Rüppell, *Reisen in Nubien, Kordofan, und den Peträischen Arabien*, 1829; Hogg, *Visit to Alexandria, Damascus, and Jerusalem*, 1825; Hardy, *Notices of the Holy Land*, 1835; Monro, *A Summer Ramble in Syria*, 1835; Stephens, *Incidents of Travel*, 1837; Elliot, *Travels*, 1838: Wilde, *Narrative of a Voyage*, 1840; Paxton, *Letters on Palestine and Egypt*, 1839; Lord Lindsay, *Letters on Egypt, Edom, and the Holy Land*, 1839; Schubert, *Reise nach dem Morgenlande*, 1838-40; Robinson, *Biblical Researches in Palestine*, 1841; Bowring, *Report on the Commercial Statistics of Syria*, 1840; Olin, *Travels in the East*, 1843; *Narrative of a Mission of Inquiry to the Jews from the Church of Scotland*, 1842: Herschell, *Visit to My Father-Land*, 1844; *Eōthen*, 1844; *Modern Syrians*, 1844; Russegger, *Reisen in Europa, Asien, und Afrika*, 1844, in course of publication.

Extensive as is the above list, it is but a selection from books numerous enough to fill a library. Besides these, there are numerous works on the geography of Palestine, of which the following are the principal: — Adrichomius, *Theatrum Terræ Sanctæ*, 1590; Bochart, *Geographia Sacra*, 1646; Sanson, *Geographia Sacra*, 1665; Fuller, *Pisgah Sight of Palestine*, 1650; Dapper, *Syrie en Palastyn of Heilige Lant*, 1677; Wells, *Historical Geography of the New Test.*, 1712; *Historical Geography of the Old Test.*, 1712; Reland, *Palæstina ex Monumentis veteribus Illustrata*, 1714; Bachiene, *Heilige Geographie*, 1758-68; Busching's *Erdbeschreibung*, 1785; Hamelsveldt, *Bibliche Geographie*, 1793; Mannert, *Geographie der Griechen und Römer*, 1799 (*Arabia, Palestine, and Syria*, in vol. vi. pt. 1); Ritter, *Die Erdekunde*, 1818 (*Western Asia* in vol. ii.); Rosenmüller, *Bibliche Geographie*, 1823-1828; Raumer, *Palästina*, 1835 and 1838; *Supplement*, 1843; Kitto's *Pictorial History and Physical Geography of Palestine*, 1841.

PALM. [Weights and Measures.]

PALM-TREE. [Tamar.]

PALSY. [Diseases.]

PAMPHYLIA (Παμφυλία), a province in the southern part of Asia Minor, having the Mediterranean on the south, Cilicia on the east, Pisidia on the north, and Lycia on the west. It was nearly opposite the island of Cyprus; and the sea between the coast and the island is called in Acts the sea of Pamphylia. The chief cities of this province were Perga and Attalia. Christianity was probably first preached in this country by some of the Jewish proselytes who were converted on the day of Pentecost (Acts ii. 10, 15, 38). It was afterwards visited by Paul and Barnabas (Acts xiii. 13).

PANNAG (פַּנַּג) occurs only once in Scripture, but so much uncertainty exists respecting the meaning of the word, that in many translations, as, for instance, in the Authorized English Version, the original is retained. Thus in the account of the commerce of Tyre, it is stated in Ezek. xxvii. 17, 'Judah and the land of Israel, they were thy merchants; they traded in thy markets wheat of Minnith, and *Pannag*, and oil, and honey, and *balm*' (*tzeri*, translated also *rosin* in the margin of the English Bible). From the context it is evident that wheat, oil, and honey, were conveyed by Judah and Israel, that is, the products of their country as an agricultural people, as articles of traffic to the merchants and manufacturers of Tyre, who, it is certain, must, from their insular position, have obtained their chief articles of diet from the neighbouring land of Syria. It is probable, therefore, that *pannag* and *tzeri*, whatever they may have been, were the produce of Palestine, or at least of Syria. Some have considered *pannag* to indicate *balsam*, others *cassia*, and some again *sweetmeats*. 'Chaldæus *kolija* Græca voce, quam interpretatur Hesychius τρωγάλια, bellaria ex melle.' Some of the Rabbins have also thought that it was a district of Judæa, which, like Minnith, yielded the best wheat; others, as Junius and Tremellius, from the similarity in the name, have thought it might be the original of the name of Phœnicia. But Hiller (*Hierophytica*, ii. p. 51) says, 'Nullus horum, ut opinor, recte divinavit. Nec enim est casia, nam casiæ suum nomen est; neque balsamum, quia in hortis regiis plantatus balsami frutex, nihil plebi ad mercatum reliquerat, et generali nomine צרי opobalsamum notatum; nec bellaria ex melle, merces vulgatissima, quam Tyrii et Græci mercatores domi parare poterant; nec denique Phœniciam Pannag significaverit, quod insciti Ezechiel scriberet Israelitas triticum Phœniciæ in Phœniciam ad nundinas scil. Tyrias attulisse.' He, however, continues, 'Pannag, nisi magnopere fallor, est Panax vel Panaces, vox Græcæ vel Syriacæ originis ad Græcam etymologiam aptata, quo videatur ipso nomine omnium morborum remedia promittere.' The name panax occurs as early as the time of Theophrastus (ix. 10), and several kinds are described by him, as well as by Dioscorides; one kind is called especially Syrian panax. Of one of these plants, now supposed to be species of *Ferula laserpitium* or *Heracleum*, the juice was called opopanax. This was in great repute among the ancients, and still holds its place as a medicine, though not possessed of any remarkable properties; but its name is the origin of our panacea, from πανακεία, 'an universal remedy.' It is curious, however, that the plant yielding the opopanax of commerce is still unknown, as well as the exact locality where it is produced, whether in Syria, or in some part of the Persian empire. By the Arabs it is called *juwasheer*. Lady Calcott has supposed the panax of the ancients to refer to *Panax quinquefolium*, or *ginsing* of the Chinese, which they also suppose to be a universal remedy, though not possessed of any active properties. But the name panax was not applied to this plant until the time of Linnæus, and there is no proof, nor indeed is it probable, that it found its way from China at any such early period: at all events the Israelites were not likely to convey it to Tyre. The Syrian version, however, translates *pannag* by the word *dokhon*, which, we have already seen (vol. i. p. 570), signifies 'millet,' or *Panicum miliaceum*. Bishop Newcome, therefore, translates *pannag* by the word panis, signifying the species of millet which was employed by the ancients as an article of diet, and which still is so by the natives of the East. Dr. Harris quotes

Cæsar, as stating that the Massilienses, when besieged, 'panico vetere omnes alebantur.' From the context it would seem most likely that this *pannag* was a produce of the country, and probably an article of diet. One objection to its being the millet is, that this grain has a name, *dokhon*, which is used by the same prophet in Ezek. iv. 9. Notwithstanding the authority of Hiller, there does not appear sufficient proof in support of his opinion, that the juice of the panax or opopanax was the article intended, and therefore *pannag* must still be considered undetermined.—J. F. R.

PAPER, PAPYRUS. [Writing.]

PAPHOS (Πάφος), a city of Cyprus, at the western extremity of the island, and the seat of the Roman governor. That officer, when Paul visited the place, was named Sergius Paulus, who was converted through the preaching of the apostle and the miracle performed on Elymas (Acts xiii. 6-11). Paphos was celebrated for a temple of Venus, whose infamous rites were still practised here 400 years afterwards, notwithstanding the success of Paul, Barnabas, and others, in preaching the Gospel. Paphos is now a poor and inconsiderable place, but gives its name to a Greek bishopric.

PARABLE. The word parable is derived from παραβολή, which comes from παραβάλλειν, *to compare, to collate.* In the New Testament it is employed by our translators as the rendering of παραβολή; in the Old it answers to מָשָׁל [Proverbs]. 1. It denotes an obscure or enigmatical saying, *e. g.* Ps. xlix. 4,

'I will incline mine ear to a *parable;*
I will open my *dark saying* upon the harp.'

And Ps. lxxviii. 2,

'I will open my mouth in a *parable;*
I will utter *dark sayings* of old.'

2. It denotes a fictitious narrative, invented for the purpose of conveying truth in a less offensive or more engaging form than that of direct assertion. Of this sort is the parable by which Nathan reproved David (2 Sam. xii. 2, 3), that in which Jotham exposed the folly of the Shechemites (Judg. ix. 7-15), and that addressed by Jehoash to Amaziah (2 Kings xiv. 9, 10). To this class also belong the parables of Christ. 3. Any discourse expressed in figurative, poetical, or highly ornamented diction is called a *parable.* Thus it is said, 'Balaam took up his *parable*' (Num. xxiii. 7); and, 'Job continued his parable' (Job xxvii. 1). Under this general and wider signification the two former classes may not improperly be included.

In the New Testament the word seems to have a more restricted signification, being generally employed in the second sense mentioned above, viz., to denote a fictitious narrative, under which is veiled some important truth. It has been supposed, indeed, that some of the parables uttered by our Saviour narrate real and not fictitious events; but whether this was the case or not is a point of no consequence. Each of his parables was *essentially* true; it was true to human nature, and nothing more was necessary. Another meaning which the word occasionally bears in the New Testament is that of a *type* or *emblem*, as in Heb. ix. 9, where παραβολή is rendered in our version *figure.* [According to Macknight, the word in Heb. xi. 19 has the same meaning, but this is probably incorrect.]

Parables or fables are found in the literature of all nations. They were called by the Greeks αἶνοι, and by the Romans *fabulæ.* It has been usual to consider the parable as composed of two parts: viz., the *protasis*, conveying merely the *literal sense;* and the *apodosis*, containing the *mystical* or *figurative* sense. It is not necessary, however, that this second part should be always expressed. It is frequently omitted in the parables of our Lord, when the truth illustrated was such as his disciples were unable at the time fully to comprehend, or when it was his design to reveal to them something which was to be hidden from the unbelieving Jews (comp. Matt. xiii. 11-13).

The excellence of a parable depends on the propriety and force of the comparison on which it is founded; on the general fitness and harmony of its parts; on the obviousness of its main scope or design; on the beauty and conciseness of the style in which it is expressed; and on its adaptation to the circumstances and capacities of the hearers. If the illustration is drawn from an object obscure or little known, it will throw no light on the point to be illustrated. If the resemblance is forced and inobvious, the mind is perplexed and disappointed in seeking for it. We must be careful, however, not to insist on too minute a correspondence of the objects compared. It is not to be expected that the resemblance will hold good in every particular; *non enim res tota rei toti necesse est similis sit*, says Cicero; but it is sufficient if the agreement exists in those points on which the main scope of the parable depends.

The parable of the *Ten Virgins*, for example, is designed to teach the importance and necessity of being always prepared for the coming of the Lord; and therefore no inference can be drawn as to the number of those finally saved, from the circumstance that five of the virgins were wise and five of them were foolish. Nor does the parable of the *Householder* teach that there will be no difference in the rewards of the righteous hereafter, because each of the labourers received a penny. The design of the parable as expressed in the words 'Is it not lawful for me to do what I will with mine own?' is to set forth the perfect *sovereignty* of God in the dispensation of his rewards, the truth that all reward is of *grace*, and that it is consistent with the strictest justice for him to treat some *better* than they deserve, since none are treated *worse.*

If we test the parables of the Old Testament by the rules above laid down, we shall not find them wanting in any excellence belonging to this species of composition. What can be more forcible, more persuasive, and more beautiful than the parables of Jotham (Judg. ix. 7-15), of Nathan (2 Sam. xii. 1-14), of Isaiah (v. 1-5), and of Ezekiel (xix. 1-9)?

But the parables uttered by our Saviour claim pre-eminence over all others on account of their number, variety, appositeness, and beauty. Indeed it is impossible to conceive of a mode of instruction better fitted to engage the attention, interest the feelings, and impress the conscience, than that which our Lord adopted. Among its advantages may be mentioned the following:—

1. It secured the attention of multitudes who would not have listened to truth conveyed in the form of abstract propositions. It did so in virtue of two principles of human nature, viz., that outward and sensible objects make a more vivid impression than inward notions or ideas; and that the particular and the concrete affect the mind more than the general and the abstract. Thus a virtue or vice may be held up for abhorrence or admiration far more successfully by exhibiting its effects on the character of an individual than by eulogizing or declaiming against it in the abstract. How could a disquisition have exhibited the contrast between humility and self-confidence so vividly as does the parable of the Pharisee and the publican? Or how could so effectual a sermon have been preached against worldliness as by the parable of the rich man who said to his soul, 'Eat, drink, and be merry.'

2. This mode of teaching was one with which the Jews were familiar, and for which they entertained a preference. They had been accustomed to it in the writings of their prophets, and, like other eastern nations, listened with pleasure to truths thus wrapped in the veil of allegory.

3. Some truths which, if openly stated, would have been opposed by a barrier of prejudice, were in this way insinuated, as it were, into men's minds, and secured their assent unawares. Whenever ancient prejudices stand in the way of the reception of truth, it is important that the teacher should adopt such a circuitous mode of approach as may for a time conceal his design, and secure for his instructions an impartial hearing.

4. The parabolic style was well adapted to conceal Christ's meaning from those who, through obstinacy and perverseness, were indisposed to receive it. This is the meaning of Isaiah in the passage quoted in Matt. xiii. 13. Not that the truth was ever hidden from those who sincerely sought to know it; but it was wrapped in just enough of obscurity to veil it from those who 'had pleasure in unrighteousness,' and who would 'not come to the light lest their deeds should be reproved.' In accordance with strict justice, such were 'given up to strong delusions, that they might believe a lie.' '*With the upright man thou wilt show thyself upright; with the froward thou wilt show thyself froward.*'

The *scope* or *design* of Christ's parables is sometimes to be gathered from his own express declaration, as in Luke xii. 16-20, xiv. 11, xvi. 9. In other cases it must be sought by considering the context, the circumstances in which it was spoken, and the features of the narrative itself, *i. e.* the *literal* sense. For the right understanding of this, an acquaintance with the customs of the people, with the productions of their country, and with the events of their history, is often desirable. Most of our Lord's parables, however, admit of no doubt as to their main scope, and are so simple and perspicuous that 'he who runs may read,' 'if there be first a willing mind.' To those more difficult of comprehension more thought and study should be given, agreeably to the admonition prefixed to some of them by our Lord himself, 'Whoso heareth, let him understand.'—The following are among the principal works on the parables:—Gray, *Delineation of the Parables*, 1777; Bulkley, *Discourses on the Parables*, 1771; Collyer, *Discourses on the Parables*, 1815; Kromm, *Homilien über die Parabeln Jesu*, 1823; Unger, *De Parabolis Jesu*, 1828; Bailey, *Exposition of the Parables*, 1829; Schultze, *De Parabolis Jesu Christi*, 1827; Lisco, *Die Parabeln Jesu*, 1832.—L. P. H.

PARACLETUS (Παράκλητος). This word is applied to Christ in 1 John ii. 1. Indeed, in that famous passage in which Christ promises the Holy Spirit as a paraclete to his sorrowing disciples, he takes the title himself: 'I will send you *another* paraclete' (John xiv. 16), implying that he was himself one, and that on his departure he would send another. The question then is, In what sense does Christ denominate himself and the Spirit sent from him and the Father, παράκλητος, *paraclete?* The answer to this is not to be found without some difficulty, and it becomes the more difficult from the fact that in genuine Greek the verb παρακαλεῖν has a variety of significations:—1. To call to a place; to call to aid. 2. To admonish; to persuade; to incite. 3. To entreat; to pray. To which may be added the Hellenistic signification, 'to console;' 'to soothe;' 'to encourage.' Finally, the Rabbins also in their language use the word פרקליטא, *peraklita;* a circumstance which must also be taken into consideration. In the explanation of the word the leading circumstance to guide us must be to take that signification which is applicable to the different passages in which it occurs. For we may distinguish three explanations:—1. Origen explains it where it is applied to the Holy Spirit by 'Consolator' (παραμυθητής), while in 1 John ii. 1 he adopts the signification of 'Deprecator.' This is the course taken by most of the Greek commentators (Suicer, *Thesaur.* s. v.), and which has been followed by Erasmus, Luther, and others. But to this Tholuck and others object that, not to insist that the signification cannot be grammatically established (for no *admissible* instance can be adduced where the passive παράκλητος is used in an active sense for παρακλήτωρ), it is suitable to but a very few passages only, while to others it is either too circumscribed or altogether inappropriate. 2. Aware of this, others, after the example of Theodore of Mopsuestia, sanctioned by Mede, Ernesti, and others, would translate it *teacher.* But neither does this sense seem adapted to all the passages. It would also be difficult to deduce it from the usages of the language; for—not to mention that in this case also the active signification would be assumed for the passive form—we are pressed with the question, whether the verb παρακαλεῖν can anywhere in the New Testament be found in the sense of 'to teach,' as this hypothesis assumes. It is at least very certain that this sense never was transferred to the Rabbinical פרקליטא; and since the word occurs here also, this must necessarily be taken into account in determining the signification. 3. The considerations which tell against these views incline the balance in favour of a third sense, which is that of 'assistant,' 'helper,' 'advocate' (intercessor). Demosthenes uses it with this force in a judicial sense (see Index, ed. Reiske); and it occurs in the same sense in Philo (see Lœsner, *Observatt.*), and in the Rabbinical dialect. It is supported by Rom. viii. 26, and, which is still more to the purpose, is appropriate to all the passages in the New Testa-

ment where the word occurs. After the example of the early Latin fathers, Calvin, Beza, Lampe, Bengel, Knapp, Kuinoel, Tittmann, and many others, have adopted this sense. Tertullian and Augustine have *advocate*. The Authorized Version renders the word by 'advocate' in 1 John ii. 1, but in other places (John xiv. 16, 26; xv. 26; xvi. 7) by 'comforter.' How much better, however, the more extensive term 'helper' (including teacher, monitor, advocate) agrees with these passages than the narrow term 'comforter,' may be shown by a single instance. Jesus says to his disciples, 'I will send you *another* paraclete' (John xiv. 16), implying that he himself had been such to them. But he had not been in any distinguishing sense a 'comforter' or 'consoler,' because, having Him present with them, they had not mourned (Matt. ix. 15). But he had been eminently a helper, in the extensive sense which has been indicated; and such as he had been to them—to teach, to guide, and to uphold—the Holy Spirit would become to them after his removal (see the Commentators above named, particularly Tholuck and Tittmann on John xiv. 16; also Knapp, *De Sp. S. et Christi Paraeletis*, Halle, 1790).

PARADISE, the term which by long and extensive use has been employed to designate the Garden *of Eden*, the first dwelling-place of human beings. Of this word (παράδεισος) the earliest instance that we have is in the *Cyropædia* and other writings of Xenophon, nearly 400 years before Christ; but his use of it has that appearance of ease and familiarity which leads us to suppose that it was current among his countrymen. We find it also used by Plutarch, who lived in the first and second century of our era. It was by those authors evidently employed to signify an extensive plot of ground, enclosed with a strong fence or wall, abounding in trees, shrubs, plants, and garden culture, and in which choice animals were kept in different ways of restraint or freedom, according as they were ferocious or peaceable; thus answering very closely to our English word *park*, with the addition of *gardens*, a *menagerie*, and an *aviary*.

The circumstance which has given to this term its extensive and popular use, is its having been taken by the Greek translators of the Pentateuch, in the third century B.C., and, following them, in the ancient Syriac version, and by Jerome in the Latin Vulgate, as the translation of the *garden* (גַּן *gan*) which the benignant providence of the Creator prepared for the abode of innocent and happy man. Those translators also use it, not only in the twelve places of Gen. ii. and iii., but in eight others, and two in which the feminine form (*gannah*) occurs; whereas, in other instances of those two words, they employ κῆπος, the usual Greek word for a garden or an enclosure of fruit-trees. But there are three places in which the Hebrew text itself has the very word, giving it the form פַּרְדֵּס *pardes*. These are, 'the keeper of the king's *forest*, that he may give me timber' (Neh. ii. 8); '*orchards*' (Eccles. ii. 5); 'an *orchard* of pomegranates' (Song of Solomon, iv. 13). Evidently the word is not proper Hebrew, but is an exotic, imported from a more eastern tongue, probably the Persian, from which source also Xenophon derived it. But the best authorities carry the derivation farther back. 'The word is regarded by most learned men as Persian, of the same signification as the Hebrew *gan*. Certainly it was used by the Persians in this sense, corresponding to their *darehen;* but that it is an Armenian word is shown both from its constant use in that language, and from its formation, it being compounded of two Armenian simple words, *part* and *ses*, meaning *necessary grains* or *edible herbs*. The Armenians apply this word, *pardes*, to denote a garden adjoining to the dwelling, and replenished with the different sorts of grain, herbs, and flowers for use and ornament' (Schœderi *Thesaur. Ling. Armen. Dissert.*, p. 56, Amst. 1711). With this E. F. C. Rosenmüller accords (*Bibl. Alterthumsk.* vol. i., part i., p. 174). 'It corresponds to the Greek παράδεισος, a word appropriated to the pleasure-gardens and parks with wild animals around the palace of the Persian monarchs. The origin of the word, however, is to be sought with neither the Greeks nor the Hebrews, but in the languages of Eastern Asia. We find it in Sanscrit *paradeesha*, a region of surpassing beauty; and the Armenian *pardes*, a park or garden adjoining to the house, planted with trees for use and ornament' (Gesenius and Robinson, combining the Leipzig and the American editions of the *Hebr. Lex.*). 'A *paradise*, *i. e.* an orchard, an arboretum, particularly of pomegranates, a park, a fruit-garden; a name common to several Oriental languages, and especially current among the Persians, as we learn from Xenophon and Julius Pollux. Sanscrit, *pardeesha;* Armenian, *pardez;* Arabic, *firdaus;* Syriac, *fardaiso;* Chaldee of the Targums, *pardeesa*' (Fürst, *Concord. V. T.* p. 920, Leipzig, 1840).

In the apocryphal book of Susanna (a moral tale or little novel, possibly founded on some genuine tradition), the word *paradise* is constantly used for the garden. It occurs also in three passages of the Son of Sirach, the first of which is in the description of Wisdom: 'I came forth as a canal dug from a river, and as a water-pipe into a *paradise*' (ch. xxiv. 30). In the other two, it is the objective term of comparisons: 'kindness is as a *paradise* in blessings, and mercifulness abideth for ever—the fear of the Lord is as a *paradise* of blessing, and it adorns above all pomp' (ch. xl. 17, 27). Josephus calls the gardens of Solomon, in the plural number, 'paradises' (*Antiq.* viii. 7. 3). Berosus (cent. iv. B.C.), quoted by Josephus (*c. Apion.* i. 20), says that the lofty garden-platforms, erected at Babylon by Nebuchadnezzar, were called the *Suspended Paradise*.

The term, having thus become a metaphor for the abstract idea of exquisite delight, was transferred still higher to denote the happiness of the righteous in the future state. The origin of this application must be assigned to the Jews of the middle period between the Old and the New Testament. In the Chaldee Targums, 'the garden of Eden' is put as the exposition of heavenly blessedness (Ps. xc. 17, and other places). The Talmudical writings, cited by the elder Buxtorf (*Lex. Chald. et Talm.*, p. 1802), and John James Wetstein (*N. T. Gr.* vol. i. p. 819), contain frequent references to *Paradise* as the immortal heaven, to which the spirits of the just are admitted immediately upon the liberation from the

body. The book *Sohar* speaks of an earthly and a heavenly *Paradise*, of which the latter excels the former 'as much as darkness does light.' (Schöetgen. *Hor. Hebr.* vol. i. p. 1096).

Hence we see that it was in the acceptation of the current Jewish phraseology that the expression was used by our Lord and the apostles: 'To-day thou shalt be with me in Paradise;' 'He was caught up into Paradise;' 'The tree of life, which is in the Paradise of my God' (Luke xxiii. 43; 2 Cor. xii. 4; Rev. ii. 7).

EDEN is the most ancient and venerable name in geography, the name of the first district of the earth's surface of which human beings could have any knowledge. The word is found in the Arabic as well as in the Hebrew language. It is explained by Firuzabadi, in his celebrated Arabic Lexicon (*Kamús*), as signifying *delight, tenderness, loveliness* (see Morren, in *Edinb. Biblical Cabinet*, vol. xi. pp. 2, 48, 49). Major Wilford and Professor Wilson find its elements in the Sanscrit. The Greek ἡδονή is next to identical with it in both sound and sense. It occurs in three places (Isa. xxxvii. 12; Ezek. xxvii. 23; Amos i. 5) as the name of some eminently pleasant districts, but not the Eden of this article. Of them we have no certain knowledge, except that the latter instance points to the neighbourhood of Damascus. In these cases it is pointed with both syllables short; but, when it is applied to the primitive seat of man, the first syllable is long. Those passages, in addition to Gen. ii. iii. iv. 16, are the few following, of which we transcribe the chief, because they cast light upon the primeval term: 'He will make her wilderness like Eden and her desert like the garden of Jehovah.' 'Thou hast been in Eden, the garden of God.' 'All the trees of Eden, that were in the garden of God, envied him.' 'This land which was desolate is become like the garden of Eden' (Isa. li. 3; Ezek. xxviii. 13; xxxi. 9, 16, 18; xxxvi. 35; Joel ii. 3).

All this evidence goes to show that *Eden* was a tract of country; and that in the most eligible part of it was the *Paradise*, the garden of all delights, in which the Creator was pleased to place his new and pre-eminent creature, with the inferior beings for his sustenance and solace.

We now present the passage from the Hebrew Archives to which this disquisition belongs:—

Genesis ii. 8—'And Jehovah Elohim planted a garden in Eden, on the east; and placed there the man whom he had formed. And Jehovah Elohim caused to grow out of the ground there every tree agreeable to the sight, and good for eating; and the tree of life in the midst of the garden, and the tree of the knowledge of good and evil. And a river proceeded from Eden, for the watering of the garden; and from thence it was divided, and became into four heads. The name of the first, Pishon; it surroundeth the whole country of Havilah, where is the gold, and gold of that land is good; there is the *bedolach* and the stone *shohar*. And the name of the second river, Gihon; it surroundeth the whole country of Cush. And the name of the third river, Hiddekel; it is that which goeth easterly to Assyria. And the fourth river, it is the Phrat.'

Upon this description, we shall offer our sentiments in the shortest manner that we can.

I. It is given in that simple, artless, childlike style which characterizes the whole of the primeval Hebrew Scriptures. This is the style which was alone adapted to the early stages of the human history. Our whole race had to pass through a long succession of trying and training circumstances, which formed truly the collective education of mankind. The communications of knowledge must have been made and recorded in such terms and phrases as the men of the age could at the first *understand;* and which yet should possess a suggestive and attractive character, which would gradually capacitate for higher and more spiritual disclosures. (See the observations on the modes of divine manifestation to the first human beings, in the article ADAM, vol. i. p. 60.) If it were objected, that thus 'the revelation would be clothed in the imagery of gross and sensible objects, with the imperfections and misconceptions under which those objects appeared to men possessing only the rude ideas of a primeval state of society,' and this would of necessity produce a rude and imperfect language [ANTHROPOMORPHISM], we reply, that the spirit of the objection would require 'that the terms and style of the revelation should have been in the most pure and abstract kind of phrase that human diction could afford, the most nearly approaching to the spirituality of the Divine nature and the majesty of eternal things; and this would be equivalent to saying, that it ought to have anticipated by many centuries the progress of man as an intellectual and social being; that it ought to have been written, not in the language of shepherds and herdsmen, but in that of moral philosophers and rhetoricians; not in Hebrew, but in Greek or English. It would also follow, that a revelation so expressed would have been *unintelligible* to the ages and generations of primitive time, and to the generality of mankind in all times' (Pye Smith, *On Scripture and Geology*, p. 242).

Upon this principle we understand the expression, 'the Lord God *planted*,' *caused to grow, placed;* he, the supreme and omnipotent cause, produced those effects, in ways, immediate or mediate, the most worthy of his perfections.

II. The *situation* of Eden: though מִקֶּדֶם is literally *from the east*, it answers to our phrase *on the east* or *eastwards*, precisely as the Latin *ab occasu*. The supposed station-point we cannot suppose to be any other than Palestine. In every country, the region of the rising sun must always be pre-eminent, on account of the beauty and majesty of the sky; and hence it is a natural representative of excellence: and this most interesting of regions, the birthplace of mankind, did lie eastward from the land of the Israelites. Also, the earliest traditions of human and divine knowledge were associated with the splendours of the east.

Upon the question of its exact geographical position dissertations innumerable have been written. Many authors have given descriptive lists of them, with arguments for and against each. The most convenient presentation of their respective outlines has been reduced to a tabulated form, with ample illustrations, by the Rev. N. Morren, annexed to his Translation of the younger Rosenmüller's *Biblical Geography of Central Asia*, pp. 91—98, Edinb. 1836. He reduces them to nine principal theories. But the

fact is that not one of them answers to all the conditions of the problem. We more than doubt the possibility of finding any locality that will do so. That *Phrat* is the Euphrates, and *Hiddekel* the Tigris, is agreed, with scarcely an exception; but in determining the two other rivers, great diversity of opinion exists; and, to our apprehension, satisfaction is and must remain unattainable, from the impossibility of making the evidence to cohere in all its parts. It has been remarked that this difficulty might have been expected, and is obviously probable, from the geological changes that may have taken place, and especially in connection with the deluge. This remark would not be applicable, to the extent that is necessary for the argument, except upon the supposition before mentioned, that the earlier parts of the book of Genesis consist of primeval documents, even antediluvian, and that this is one of them. There is reason to think that *since the deluge* the face of the country cannot have undergone any change approaching to what the hypothesis of a postdiluvian composition would require. But we think it highly probable that the principal of the immediate causes of the deluge, the 'breaking up of the fountains of the great deep,' was a subsidence of a large part or parts of the land between the inhabited tract (which we humbly venture to place in E. long. from Greenwich, 30° to 90°, and N. lat. 25° to 40°) and the sea which lay to the south; or an elevation of the bed of that sea [Deluge]. Either of these occurrences, produced by volcanic causes, or both of them conjointly or successively, would be adequate to the production of the awful deluge, and the return of the waters would be effected by an elevation of some part of the district which had been submerged; and that part could scarcely fail to be charged with animal remains. Now the recent geological researches of Dr. Falconer and Capt. Cautley have brought to light bones, more or less mineralized, of the giraffe (*camelopardalis*,) in the Sewalik range of hills, which seems to be a branch of the Himalaya, westward of the river Jumna. But the giraffe is not an animal that can live in a mountainous region, or even on the skirts of such a region; its subsistence and its safety require 'an open country and broad plains to roam over.' (Falconer and Cautley, in *Proceed. Geol. Soc.*, Nov. 15, 1843). The present position, therefore, of these fossil remains (—'of almost every large pachydermatous genus, such as the elephant, mastodon, rhinoceros, hippopotamus, sus (swine), horse, &c.' *ib.*, also deer and oxen)—lodged in ravines and vales among the peaks, at vast elevations, leads to the supposition of a late elevation of extensive plains.

Thus we seem to have a middle course pointed out between the two extremes; the one, that by the deluge, the ocean and the land were made to exchange places for permanency; the other, that very little alteration was produced in the configuration of the earth's surface. Indeed, such alteration might not be considerable in places very distant from the focus of elevation; but near that central district it could not but be very great. An alteration of level, five hundred times less than that effected by the upthrow of the Himalayas, would change the beds of many rivers, and quite obliterate others.

We therefore decline to enter into disquisitions, interminable and surely disappointing, upon the rivers Pishon and Gihon, and the countries of Havilah and Cush. Etymological similarities afford no safe ground for conclusions; for many names of close resemblance are to be found in the Asiatic languages, but of which the natural history and collateral circumstances are incompatible with other parts of this (as we think) antediluvian fragment of topography. Also Gihon certainly, and probably Pishon, were used in the ancient Oriental languages as appellatives, separate or prefixed, signifying a stream in general; as the old British *Avon*, which has the same meaning, has become the proper name of several rivers in England, Wales, and Scotland.

III. We venture to give a summary of this description. It was a tract of country, the finest imaginable, lying probably between the 33rd and the 37th degree of N. latitude, of such moderate elevation, and so adjusted, with respect to mountain ranges and water-sheds and forests, as to preserve the most agreeable and salubrious conditions of temperature and all atmospheric changes. Its surface must therefore have been constantly diversified by hill and plain. From its hill-sides, between the croppings out of their strata, springs trickled out, whose streamlets, joining in their courses, formed at the bottom small rivers, which again receiving other streams (which had in the same way flowed down from the higher grounds), became, in the bottom of every valley, a more considerable river. These valleys inosculated, as must consequently their contained streams; wider valleys or larger plains appeared; the river of each united itself with that of its next neighbour; others contributed their waters as the augmenting stream proceeded; and finally it quitted the land of Eden, to continue its course to some sea, or to lose its waters by the evaporation of the atmosphere or the absorption of the sandy desert. In the finest part of this land of Eden, the Creator had formed an enclosure, probably by rocks and forests and rivers, and had filled it with every product of nature conducive to use and happiness. Due moisture, of both the ground and the air, was preserved by the streamlets from the nearest hills, and the rivulets from the more distant; and such streamlets and rivulets, collected according to the levels of the surrounding country ('it proceeded from Eden') flowed off afterwards in four larger streams, each of which thus became the source of a great river.

This metaphrase deviates from what is commonly thought to be the meaning of the original, but not, we think, from its true signification and intention.

1. It is a metonymy occurring probably, though not very frequently, in all languages, that a collective noun is sometimes used when the idea is compound and distributive. The usage is recognised in the Hebrew language, by Gesenius in his *Lehrgebaude*, p. 525; Ewald, *Gramm.* § 346; and Nordheimer, *Gramm.* § 738—750. This kind of synthesis would be likely to find place in a primitive and consequently very simple language. The multitude of dreppings and tricklings, rills and streamlets, having one beneficial design, and ever tending to confluence, would, in the mind of a primeval writer, readily coalesce into a singular term, a river. We have

an appropriate example in Ps. lxv. 10, where the aggregate of showers is called 'the river of God, full of water.' The principle applies equally to פלג and נהר. It is therefore no unwarrantable liberty to understand by the 'river' a number of rills and rivulets dispersed throughout the ground, and flowing into one channel about the issue into the external country. If the water entered the garden as a river properly, that is in one body, it could not 'water the garden' without artificial appliances; and it would have divided the garden, making one part inaccessible from the other, without a boat or a bridge.

2. That a river should be 'divided into four heads,' or sources of new rivers, is naturally impossible. If to a running stream, small or large, two or more channels be presented, it will not divide itself distributively, but will pour its whole mass of water into *the deepest* channel: it will ever seek the lowest bottom. We must therefore understand the passage as saying that, from four different collections of rills, which had flowed down different declivities in the same neighbourhood, the sources were formed of four rivers which in their progress became great and celebrated. To controvert this reasoning it would not be sufficient to adduce the division of a great river into branches as it approaches the sea, and meets an extensive swamp or flat shore, as in the deltas of the Rhine (forming, with many inferior streams, the Leck and the Waal), the Po, the Nile, the Ganges, and many others. The soft and almost horizontal level causes the water to cease flowing, or nearly so, and the vast extent of mud or sand permits branches of the stream to take place when some small change of the surface gives occasion. But the rivers of Paradise must have been in high ground, and have had a considerable fall. It is possible, indeed, that rocky obstacles might exist, connected backwards with a mountainous country, presenting their heads against the stream, and thus separating it, as islets are formed in the higher course of the Rhine. But the conditions necessary to derive four great rivers out of one, in this way, are scarcely conceivable as occurring in one place. The origin of two or more rivers from different fountains in the same locality of high ground, but on different levels, and then pursuing different courses, is not an unexampled phenomenon. The Rhine and the Rhone rise but about eight English miles from each other; and, which applies to the case directly before us, the *sources of the Euphrates and the Tigris*, on the eastern frontier of Armenia, so far as they can be followed up, are only *fifteen miles apart*.

Here, then, in the south of Armenia, after the explication we have given, it may seem the most suitable to look for the object of our exploration, the *site of* PARADISE. From this opinion few, we think, will dissent.

But the stringent difficulty is to find any two rivers that will reasonably answer to the predicates of the Pishon and the Gihon; and any countries which can be collocated as Havilah and Cush. The latter name, indeed, was given by the Hebrews and other Orientals to several extensive countries, and those very distant both from Armenia and from each other. As for Havilah, we have the name again in the account of the Dispersion of the Descendants of Noah (ch. x. 29), but whether that was the same as this Havilah, and in what part of Asia it was, we despair of ascertaining. Reland and others, the best writers upon this question, have felt themselves compelled to give to these names a comprehension which destroys all preciseness. So, likewise, the meaning of the two names of natural products can be little more than matter of conjecture; the *bedolach* and the stone *shoham*. The former word occurs only here and in Num. xi. 7. The Septuagint, our oldest and best authority with regard to terms of natural history, renders it, in our passage, by *anthrax*, meaning probably the ruby, or possibly the topaz; and in Numbers by *crystallos*, which the Greeks applied not merely to rock-crystal, but to any finely transparent mineral. Any of the several kinds of odoriferous gum, which many ancient and modern authorities have maintained, is not likely; for it could not be in value comparable to gold. The pearl is possible, but not quite probable; for it is an animal product, and the connection seems rather to confine us to minerals; and pearls, though translucent, are not transparent as good crystal is. Would not the diamond be an admissible conjecture? The *shoham* occurs in ten other places, chiefly in the book of Exodus, and in all those instances our version says onyx; but the Septuagint varies, taking onyx, sardius, sardonyx, beryl, prase-stone, sapphire, and smaragdus, which is a green-tinctured rock-crystal. The preponderance seems to be in favour of onyx, one of the many varieties of banded agate; but the idea of *value* leads us to think that the emerald is the most probable. There are two remarkable inventories of precious stones in Exod. xxxix. 10-13, and Ezek. xxviii. 13; which may be profitably studied, comparing the Septuagint with the Hebrew.

A nearer approach to the solution of our problem, we cannot hope to make.

A gentleman to whom high respect is due, the late Mr. Granville Penn, proposes to sweep away the difficulties by denying the authenticity of the passage, verses 11 to 14 (*Comparative Estimate of the Mineral and Mosaical Geologies*, p. 418). We think the reply sufficient, that the passage cannot be regarded as an interpolation without violating all the principles of just criticism.

The numerous attempts of modern German writers to resolve this part and all the rest of the Mosaic Archæology into what they call a *Mythic Philosopheme* (an allegory made up of tradition and fancy), would require a large space to detail and examine them. They are full of arbitrary assumptions and inconsistencies; their tendency and design are to undermine all the facts of supernatural revelation, to destroy the authority of the Mosaic and the prophetical Scriptures, and consequently of the Christian, and thus eventually to supersede all religion that rests upon any other ground than egotistical reasonings and romantic fancies. They form a great part of a multifarious scheme of infidelity and pantheism, which requires to be met by the proofs of the existence of a personal, intelligent, and efficient God, and the evidences that HE has bestowed upon man a positive manifestation of his authority and his love.

A learned and apparently pious writer, in

the first volume of a *Theological Commentary upon the Old Testament* (Kiel, 1843, the only part yet published), Dr. M. Baumgarten, has proposed to eliminate the perplexities in a new way. Admitting the impossibility of finding any place, in the present condition of the earth, that will answer to the description, yet believing that it was realized at the time, he conceives that it pleased the Author of revelation to combine with the historical fact, a symbolical and prophetical intention. We shall conclude this article by citing a passage from that work:—

'Amidst all this litigation of contending and contradictory opinions, it has been altogether overlooked, that we ought to inquire for *what reason* this remarkably circumstantial description was given: for it is not the manner of the Holy Scriptures to communicate minute particulars for the gratification of useless curiosity. The word of God never loses sight of its chief object; and it puts all its minor parts into connection with that. The question then is, *What connection* does the description of Paradise hold with the rest of the history? That the mention of the river, flowing out of Eden, hath its proper and important place, is plain from the purpose ascribed to it—the *watering of the garden*, the impartation of life and fertility, that it might be sufficiently adapted for the abode of the first human creatures. But what now must be the design of the branches of the river, which are expressly pointed out as not belonging to the garden? It evidently must be the same as in the first case, the watering of some ground; and that ground can be no other than the countries through which those derived streams are declared to flow. Here then we are met with the particulars stated concerning Havilah and the other geographical names. The four branches go out into the country of gold, of precious stones, and of aromatics: they go out into the countries in which men first formed communities and founded mighty kingdoms, the lands of Cush, Assyria, and Babylon. Thus the great river which comes from the east, and has its rise in Eden, and thence immediately waters the garden, is that which pours its waters into the principal countries of the world, as the streams of life to the nations. The number also of both the streams and the countries claims consideration; it is *four*. Bähr (in his work on *Symbols*, vol. i. p. 155-171) has shown that this number was the symbolical sign of *proportion* and *order*; and was consequently regarded as a designation of the world, considered as a work of order and proportional arrangement—the proper idea of the Greek κόσμος. At a later period, we find the Scripture assigning *four* as the number of the great monarchies of the world (Dan. vii.). The description must therefore be understood as directing us far forward into the future, and as giving a prophetic intimation of its own meaning. The life of the human race began in Paradise; but from thence it was to diffuse itself into all other regions, and bring the morning-beam of divine light, which enlightened man in the garden, to be enjoyed over the whole earth. And indeed those countries are the most immediately pointed out, which held ready their fulness and power, and as it were kept in their view the coming of their Lord, in order to do him homage (Matt. ii. 11). But now, with respect to the geographical question, it should not be forgotten that, between the commencement of history and our times, there lies a great revolution, the Deluge. It cannot be supposed that such a mighty shock of the whole terrestrial globe could do otherwise than greatly disfigure the earth's surface. It might indeed be thought that this consideration would justify an entire relinquishment of attempts to collate the description with now existing localities. But, on the other hand, it should be considered that the Deluge did not take away the identity of the earth; and that the special names, as Phrat and Assur, without doubt have their reference to the earth's subsequent condition. The two names Phrat and Hiddekel appear to determine explicitly the tract of country through which they flow; and consequently we may be led to conceive of the whole matter thus: that from the region of Armenia a river flowed, and then divided itself into four branches, of which the two eastern corresponded to the rivers afterwards denominated the Euphrates and the Tigris, and the two western had their course through Arabia; but that country (Arabia), in some following age, was elevated (by volcanic action) above the original river-bed. Prof. Ritter (of the University of Berlin, the father of what may be called a new science, *Comparative Geography*, and which he has happily combined with Ethnography) has remarked that, even within the modern period, the Euphrates has not inconsiderably changed its course. (See his *Geography in relation to Nature and the History of Mankind*, vol. ii. p. 121, 1st. ed.) In the following times of history, we have seen how the river of mankind from the mountains of Armenia poured itself into the plains of the Tigris and the Euphrates. The tribes of men went forth into the regions of the streams of Paradise, acquired power and gathered riches. But of gold they made gods, decked them with jewels, and brought incense to the things which have noses and smell not. Their power rebelled against God and his people, and by the rivers of Babylon the children of Israel sat down and wept. Thus, in the world's history, has the track of the four branch rivers maintained itself, but, by the intrusion of sin, the glorious future of the primeval Paradise has been changed into a mournful present.' *Theolog. Comment. zum A. Testam.* vol. i. p. 39).

We have thought it but fair to put our readers into possession of this interpretation, presenting the passage as, though literally true, yet having an allegorical and prophetic intention. It is ingenious and striking; but what we want is some solid ground of *evidence*.—J. P. S.

PARAN (פָּארָן; Sept. Φαράν), a name which seems to be applied in Scripture to the whole of the desert region extending from the frontiers of Judah to the borders of Sinai. At least, as we find it in the south of this region, bordering Sinai (Num. x. 12), and in the north bordering on Kadesh (Num. xiii. 26, and elsewhere), it seems easier to suppose that Paran was the name of the whole region marked by these limits, than that there were two opposite districts bearing the same name. Under this view the difficulty of rightly appropriating the name is obviated, seeing that all the separate allocations which different writers have sought for it meet in the somewhat

extensive district which we suppose it to have embraced. The name is still preserved in that of Wady *Feiran*, a valley of the lower Sinai, through which lay the road which appears to have been taken by the Israelites in their march to the upper region. In this valley there are ruins of a town, and indeed of more than one, with towers, aqueducts, and sepulchral excavations; and here Rüppell found the remains of a church, which he assigns to the fifth century (*Reise in Nubien*, p. 263; Burckhardt, *Syria*, p. 616). This was the Pharan or Faran which had a Christian population, and was the seat of a bishopric so early as A.D. 400 (*Oriens Christ.* col. 735; Reland, *Palæst.* pp. 219, 220, 228). The city is described, under the name of Feiran, by the Arabian historian Edrisi, about A.D. 1150, and by Makriri, about A.D. 1400. The description of the latter is copied by Burckhardt. He mentions it as having been a city of the Amalekites; and the history of the Hebrew pilgrimage renders it extremely probable that the Amalekites were actually stationed in this valley, from which they came forth to attack the Israelites, when encamped near it at Rephedim (Exod. xvii. 8). We thus perceive the ground on which Jerome proceeded in stating that the desert of Paran joined on Horeb (*Onomast.* s. v. *Φαράν*, Faran; *Χωρήβ*, Choreb). Wady Feiran does actually join upon Mount Serbal; and hence it might seem that Jerome regarded this as the Horeb of Scripture.

PARCHMENT. [WRITING.]

PARLOUR. [HOUSE.]

PARMENAS (*Παρμενάς*), one of the seven first deacons of the church formed at Jerusalem (Acts vi. 5). Nothing more is known of him; but the Roman martyrologies allege that he suffered martyrdom under Trajan.

PARTHIA (*Παρθία*, Ptol., *Παρθυαία*, Strabo and Arrian), the country of the Parthians (*Πάρθοι*), mentioned in Acts ii. 9, as being with their neighbours, the Medes and Elamites, present at Jerusalem on the day of Pentecost. The persons referred to were Jews from Parthia, and the passage is a strong evidence showing how widely spread were members of the Hebrew family in the first century of our era. The term originally referred to a small mountainous district lying to the north-east of Media. Afterwards it came to be applied to the great Parthian kingdom, into which this province expanded. Parthia Proper, or Ancient Parthia, lying between Aria and Hyrcania, the residence of a rude and poor tribe, and traversed by bare mountains, woods, and sandy steppes, formed a part of the great Persian monarchy, being a dependency on the satrapy of Hyrcania. Its inhabitants were of Scythian origin. They formed a part of the army of Xerxes, and were found in that of the last Darius. In the breaking up of the kingdom of Alexander the Parthians took sides with Eumenes, and became subject to Antigonus and the Seleucidæ. About 256 years before Christ Arsaces rose against the Syro-Macedonian power, and commenced a new dynasty in his own person, designated by the title of Arsacidæ. This was the beginning of the great Parthian empire, which extended itself in the early days of Christianity over all the provinces of what had been the Persian kingdom, having the Euphrates for its western boundary, by which it was separated from the dominions of Rome. It was divided into eighteen provinces. Now at peace, now in bitter hostilities with Rome, now the victor and now the vanquished, the Parthians were never subjugated by the Romans.

445.

At length Artaxerxes founded a new dynasty. Representing himself as a descendant of the ancient Persian kings, and calling upon the Persians to recover their independence, he raised a large army, defeated the Parthians in a great battle, succeeded to all the dominions of the Parthian kings, and founded the new Persian empire, to the rulers of which is commonly given the name of the Sassanidæ. The government of Parthia was monarchical; but as there was no settled and recognised line of succession, rival aspirants were constantly presenting themselves, which weakened the country with internal broils, especially as the Romans saw it to be their interest to foster dissensions and encourage rivalries, and led eventually to the overthrow of the dynasty in the case of the successful aspirant Artaxerxes. During the Syro-Macedonian period the Parthian and Jewish history kept apart in separate spheres, but under the Romans the Parthians defended the party of Antigonus against Hyrcanus, and even took and plundered Jerusalem (Joseph. *Antiq.* xiv. 13. 3; *De Bell. Jud.* i. 13). The geography of Parthia may be studied, besides the ancient authorities, in Cellar. *Notit.* ii. 700; Mannert, v. 102.—J. R. B.

PARTRIDGE (קרא, *kra*, *kora*, *koria;* 1 Sam. xxvi. 20; Jer. xvii. 11; Sept. *πέρδιξ*; Vulg. *perdix*, Ecclus. xi. 31). Late commentators state that there are four species of the *tetrao* (grouse) of Linnæus abundant in Palestine; the francolin (*T. francolinus*), the katta (*T. alchata*), the red-legged or Barbary partridge (*T. petrosus*), and the Greek partridge (*T. saxatilis*). In this now obsolete classification there are included not less than three genera, according to the more correct systems of recent writers, and not one strictly a grouse occurs in the number, though the real *T. Urogallus*, or cock of the woods, is reported to frequent Asia Minor in winter, and in that case is probably no stranger in Libanus. There is, however, the genus *Pterocles*, of which the *P. alchata* is the katta, ganga, cata, and pin-tailed grouse of authors, a species very common in Palestine, and innumerable in Arabia; but it is not the only one, for the sand-grouse of Latham (*P. arenarius*) occurs in France, Spain, Barbary, Arabia, Persia, and on the north side of the Mediterranean, or all round Palestine. *P. Arabicus*, and probably *P.*

exustus, or the Arabian and singed gangas, occur equally in the open districts of the south, peopling the desert along with the ostrich. All are distinguished from other genera of *Tetraonidæ* by their long and powerful wings, enabling them to reach water, which they delight to drink in abundance; and by this propensity they often indicate to the thirsty caravan in what direction to find relief. They feed more on insects, larvæ, and worms than on seeds, and none of the species having a perfect hind toe that reaches the ground, they run fast: these characteristics are of some importance in determining whether they were held to be really clean birds, and consequently could be the *selav* of the Israelites, which our versions have rendered 'quail' [Quail; Unclean Birds].

The Francolin forms a second genus, whereof *F. vulgaris*, or the common tree-partridge, is the Syrian species best known, though most likely not the only one of that country. It is larger than the ganga; the male is always provided with one pair of spurs (though others of the genus have two), and has the tail longer than true partridges. This species is valued for the table, is of handsome plumage, and common from Spain and France, on both sides of the Mediterranean, eastward to Bengal.

446. [Partridge of Syria. Francolinus Vulgaris.]

The partridge is a third genus, reckoning in Syria the two species before named, both red-legged and furnished with orange and black crescents on the sides; but the other markings differ,

447. [The Katta. Pterocles Alchata.]

and the Barbary species is smaller than the Greek. They are inferior in delicacy to the common partridge, and it is probable that *Perdix rufa*, and the Caspian partridge, both resembling the former in many particulars, are no strangers in Syria.

The expostulation of David with Saul, where he says, 'The king of Israel is come out to seek a flea, as when one doth hunt a partridge on the mountains,' is perfectly natural; for the red-legged partridges are partial to upland brushwood, which is not an uncommon character of the hills and mountains of Palestine; and the koria sitting on her eggs and not hatching them (Jerem. xvii. 11), we take to allude to the liability of the nest being trodden under foot, or robbed by carnivorous animals, notwithstanding all the care and interesting manœuvres of the parent birds to save it or the brood; for this genus is monogamous, nestles on the ground, and both male and female sit and anxiously watch over the safety of their young. This explanation renders it unnecessary to advert to exploded notions drawn from the ancients. The little regard paid to specific and generic identity by the Rabbinical and Arabian writers is exposed in Bochart's comment, and is manifested constantly in the colloquial terminology of the East, where cognate languages express very different objects by words really or apparently the same.

קרח *kore*, is, we think, derived from the voice of a bird, and more than one species of bustard is thereby indicated in various tongues to the extremity of Africa and of India; among which *Otis cory* and *Otis Arabs* are so called at this day, although the first mentioned resides on the plains of Western India, the second in Arabia. We take both these, however, to be the same species. 'Cory' is likewise applied in Caffraria to a bustard, which from an indigenous word has been converted by the Dutch into knorhaan. Notwithstanding the pretended etymology of the word, by which it is made to indicate a long beak, none of the genus, not even *Otis Denhami* (a large bird of Northern Africa), has it long, it being, in fact, middle-sized in all. Thus it would appear that the type of the name belongs to Otis, and it might be maintained that species of that genus were known to the Hebrews, by their name קרא *kora* or *koria*, were it not for the fact that birds bearing this name were hunted by the Hebrews, which could not well have been the case had they not included other genera; for bustards, being without a hind toe, were considered unclean, while partridges, having it, were clean. The ganga or katta, being provided with a small incomplete one, may have offered an instance where the judgment of the priesthood must have decided. We give figures of both *Francolinus vulgaris* and *Pterocles alchata*.—C. H. S.

PARVAIM (פַּרְוַיִם: Sept. Φαρουήμ), a region producing the finest gold (2 Chron. iii. 6). There is very strong reason to conclude, with Bochart, that it is the same with Ophir. Castell, however, identifies it with Barbatia on the Tigris, which is named by Pliny (*Hist. Nat.* vi. 32); and Gesenius, seeking the root of the name in the Sanskrit *pûrva*, 'before,' *i. e.* 'eastern,' concludes it to be a general term, corresponding to our Levant, meaning east country; so that 'gold of Parvaim' means Eastern gold.

1. PASHUR (פַּשְׁחוּר; Sept. Φασσούρ, Φασσουβ), son of Immer, a priest, and chief overseer of the Temple, who smote Jeremiah and put him in the stocks for his prophecies of captivity and

ruin; on which the prophet was commissioned to declare that he should be one of those to go into exile, and that he and all his friends should die in Babylon, and be buried there (Jer. xx. 1-6).

2. PASHUR, son of Melchiah, a high officer of king Zedekiah, and one of those at whose instance Jeremiah was cast into prison (Jer. xxi. 1; xxxviii. 1-6). A descendant of his is mentioned among the new colonists of Jerusalem after the captivity (Neh. xi. 12).

PASSOVER (פסח; πάσχα; pascha, a *passing over*, *sparing*, or *protection*). The Passover, like the sabbath and other institutions, had a two-fold reference—historical and typical. As a commemorative institution it was designed to preserve amongst the Hebrews a grateful sense of their redemption from Egyptian bondage, and of the protection granted to their first-born on the night when all the first-born of the Egyptians were destroyed (Exod. xii. 27); as a typical institute its object was to shadow forth the great facts and consequences of the Christian Sacrifice (1 Cor. v. 7). That the ancient Jews understood this institution to prefigure the sufferings of the Christ is evident, not only from the New Testament, but from the Mishna, where, among the five things said to be contained in the *great Hallel* (a hymn composed of several psalms, and sung after the paschal supper), one is, the sufferings of Messiah, for which they refer to Ps. cxvi. (*Pesachim*, f. 119).

The word Passover has three general acceptations in Scripture. 1st. It denotes the yearly solemnity celebrated on the 14th day of Nisan or Abib, which was strictly the *Passover of the Lamb*, for on that day the Israelites were commanded to roast the lamb and eat it in their own houses; 2nd. It signifies that yearly festivity, celebrated on the 15th of Nisan, which may be called the *Feast of the Passover* (Deut. xvi. 2; Num. xxviii. 16, 17); 3rd. It denotes the whole solemnity, commencing on the 14th, and ending on the 21st day of Nisan (Luke xxii. 1), though, in strictness of speech, the Passover and the חג המצות, *feast of unfermented things*, are distinct institutions. The Passover was to be kept on the eve of the 14th of the first month (Abib), in which, although unfermented things were enjoined to be eaten with the lamb, yet the feast of unleavened bread did not commence until the following morning, continuing seven days, of which the first and last only were sabbaths (Lev. xxiii. 5-8), the first probably in commemoration of the commencement of their march out of Egypt, the last of their passage through the Red Sea [Festivals]. The paschal lamb, in the age following the first institution of the Passover in Egypt, and after the settlement of the Hebrews in Palestine, could only be killed by the priests in the court of the temple (Deut. xvi. 5-7; 2 Chron. xxxv. 1-11; Lev. xvii. 3-6), whence the owner of the lamb received it from the priests, and 'brought it to his house *in Jerusalem*, and roasted it, and ate it in the evening' (Maimonides, *Corban Pesach*, c. i. § 6); and it was thus that Christ kept the Passover, eating it in a chamber within Jerusalem (Luke xxii. 7-11); but the feast of *unfermented things* (מצות, Exod. xii. 15) the Jews thought themselves bound to keep in every place in which they might dwell, if they could not visit Jerusalem; 'the eating of it,' says Maimonides, 'depended not upon the Passover, for it was a commandment by itself' (*Chometz Vematzah*, § 6). As, however, from the evening of the 14th to the 21st day of Abib or Nisan (April), all ferment was banished from the habitations of the Hebrews, both institutions thus received a common name (1 Cor. v. 5, 7, 8, 13).* Hence the 14th of Abib may with propriety, as it is in some passages, be called the *first* day of unfermented things, since the ferment was removed on the 14th before evening. Thus, while Deut. xvi. 8 mentions only *six* days of unfermented bread, Josephus once assigns eight (*Antiq.* ii. 15. 1), and in other places seven (*Antiq.* iii. 10. 5; ix. 13. 3). Comp. Num. xxviii. 16-18; Matt. xxvi. 17.

On the 10th of the month Abib, the master of a family separated a ram or a goat of a year old, without blemish (Exod. xii. 1-6; 1 Pet. i. 19), which was slain on the 14th day, *between the two evenings*, בין ערבים, before the altar (Deut. xvi. 2, 5, 6).† Originally the blood was sprinkled

* The Rabbins enumerate four degrees of preparation for the feast of unfermented things. (1.) *Expurgatio fermenti*, the cleansing of all their household utensils, lest any taint of ferment might be attached to them, which process of purification was effected two or three days before the Passover. (2.) *Inquisitio fermenti*, the searching after ferment or leaven throughout all their houses, even to the mouse-holes, the Mishna expressly enjoining the cellar to be searched. This search was made with a wax candle on the night preceding the Passover. (3.) *Conflagratio fermenti*, or burning of the ferment, which took place about noon. (4.) Then followed the last degree, *Execratio fermenti*, בטול חמין, the cursing or annulling of the ferment in this form: 'All manner of ferment, or whatsoever fermented thing is in my possession, whether seen of me or not seen, cleansed of me or not cleansed, let it all be scattered, annulled, and accounted as the dust of the earth' (Vide *Chometz Vematzah*, ii. 2; Buxtorf, *Synag. Jud.* p. 12; Scaliger, *De Emend. Temp.*; *Prolegom.*; Fagius, *in Exod.* xii.).

† The Jewish day had twelve hours (John xi. 9), counting from sunrise, about six of the clock of our time. The ninth hour (or three in the afternoon) was the hour of prayer, when they went into the temple, at the daily evening sacrifice (Acts iii. 1). This was the ordinary time for the Passover, as appears from the Babylonian Talmud. 'The daily evening sacrifice was killed at the eighth hour and a-half, and it was offered up at the ninth hour and a-half. In the evening of the Passover it was killed at the seventh hour and a-half, and offered at the eighth hour and a-half' (*Pesachim*, c. 5). The reason of this obviously is, because the priests had first to kill the daily sacrifice, and then to slay the Passover and eat it; and also to rest on the evening prior to the sabbath. Thus in the evening of times (Heb. i. 2; 1 Pet. i. 19-20), or *last days*, about the same hour of the day when the paschal lamb was offered in the temple, did Christ die on Calvary, so that the substance and the shadow corresponded (Mark xv. 25-33). Calmet, in a very elaborate dissertation, contends, with many of the ancients,

on the posts of the door (Exod. xii. 7), but afterwards the priests sprinkled the blood upon the bottom of the altar (comp. Deut. vi. 9; 1 Pet. i. 2; Heb. viii. 10; ix. 13, 14). The ram or kid was roasted in an oven (כירים) whole, with two spits made of pomegranate wood thrust through it, the one lengthwise, the other transversely (crossing the longitudinal one near the fore-legs), thus forming a cross (*Pesachim*, c. 3). This mode of roasting is expressed in Arabic by the verb صلب, 'to crucify' (Jahn's *Bib. Antiq.* § 142). Thus roasted with fire, as an emblem of purification, it was served up with a bitter salad [Merorim] unpickled, indicative of the bitterness of their bondage in Egypt, and with the flesh of the other sacrifices (Deut. xvi. 2-6). What of the flesh remained uneaten was to be consumed with fire, lest it should see corruption (comp. Exod. xii. 10; Ps. xvi. 10; Acts ii. 27). Not fewer than ten, nor more than twenty persons, were admitted to this sacred solemnity. At its first observance the Hebrews ate the Passover with loins girt about, sandals on their feet, staves in their hands, and in haste, like travellers equipped and prepared for immediate departure (Exod. xii. 11); but subsequently the usual mode of reclining was adopted, in token of rest and security (John xiii. 23). Several of these rites are therefore omitted by Moses in repeating the laws of the Passover (Lev. xxiii. 5-8; Num. ix. 2-11; xxviii. 16, 17; Deut. xvi.). The Rabbins enumerate the following particulars as peculiar to its original observance:—1. The eating of it in their houses dispersed in Egypt; 2. The taking up of the paschal lamb from the tenth day; 3. The charge to strike the blood on the door-posts; 4. The eating of it in haste (Bab. Talmud, *Pesachim*, c. 9; Maim. *Corban Pesach.* c. 10, § 15). But the command not to break a bone of the offering was always observed (John xix. 36).

Considering the condition of the Hebrews in Egypt, and that the country was not celebrated for its wines, though it had its vineyards (Ps. lxxviii. 47; cv. 33; Gen. xl. 11), it seems probable that *water* was the general drink at the original institution, though some of the more wealthy might have wine. In this case, we apprehend, it would be such as Pharaoh is represented as drinking (Gen. xl. 11), which is called by Herodotus (ii. 37) *οἶνος ἀμπέλινος*, and which, in Exod. xxii. 29; xxix. 40, under the names of דמע, *tears*, and יין, *wine*, is appointed amongst the offerings. As wine, then, afterwards formed part of their oblations, and was consumed in their sacred feasts, it would thus naturally become introduced into that of the Passover. The wine used would of course be unfermented, but it is not certain that it was always the fresh expressed juice or 'pure blood of the grape' (Deut. xxxii. 14); for the Mishna states that the Jews were in the habit of using *boiled wine*. 'They do not boil the wine of the heave-offering, *because it diminishes it*,' and consequently thickens it, thus rendering the mingling of water with it when drunk necessary; but it is immediately added, 'Rabbi Yehudah permits this, *because it improves it*' (*Teroomoth Perek*, c. xi.). Independent of this, however, we may consider it certain, that on the special occasion of the Passover, when all fermented things were so cautiously banished, this practice of boiling the wine would be often resorted to as a well-known means of destroying the fermenting principle, and securing the purity of the wine [Wine]. Though the Rabbins have made many burdensome and unauthorized additions to the simple laws of the Bible, their writings still illustrate our subject to a very great extent, and, with reference to some of the chief ceremonies of the Passover, demonstrate that our Lord's practice corresponded with theirs.* One of the ordinances of the *Hilchoth Chometz* (whereby are typified the four blessings expressed in Exod. vi. 6, 7) is, that 'all persons, whether *men or women*, are bound on this night to drink four cups of wine, and this number is not to be diminished' (c. vii.). Besides these four cups, wine was also drunk during the supper. Such a quantity of wine of the modern kind (about two and a half pints English), exclusive of water, drunk by each person present, would have transformed this sacred festival into a sad scene of revelry and drunkenness, which, considering the grave and temperate habits of the ancient Jews, is a supposition we are not warranted to make. Fermented wine was in fact excluded by a *general law* [Leaven], which appears to have been well understood. This is evident from many facts. The Mishna enumerates three species of drink, the use of which would violate the Passover: *viz.* 'the *cutach* of Babylon, the *shekar* of the Medes, and the *chometz* of Idumæa' (*Pes.* c. iii.). Maimonides and Bartenora, in their comments, say that water and *the juices of fruits* were allowed to be drunk at the Passover by the ancient Jews, who held an hypothesis that the water of fruits did not ferment! The former says, 'The juice of fruits does not leaven, but putrefies: and *the liquor of fruits are wine*, and milk, and honey, and oil-olive, and the juice of apples and pomegranates, and such like. But if any water be mixed with them they do ferment' (*Chometz Vematzah*, c. v. § 1). Again: 'Paste that is kneaded in the liquor of fruits, if they boil it in the liquor of fruits, or fry it in a pan in oil, it is lawful, for the liquor of fruits ferments not' (*ibid.*). These statements serve to prove that, in the judgment of the ancient Jews, both the letter and spirit of the law extended to the prohibition of *everything known* to be fermented. The later Jews, as well as some of the earlier, may have held erroneous chemical hypotheses on this subject, but one thing is certain, that *our Lord*, in observing the law, did not err in its application. He employed the 'fruit of the vine,' פרי הגפן, *γενήμα τῆς ἀμπέλου*. The oral law, however, clearly indicates the kind of wine used by the Jews on this occasion: 'Whosoever has not got wine transgresses an injunction of the Rabbins,

that our Saviour did not celebrate the Passover the last year of his life, or, at least, that the Jews celebrated it on Friday, the day of Christ's death.

* The Jewish writings of course vary much in value, according as they approach to, or recede from, the primitive ages. The Mishnical doctors must be distinguished from their more modern commentators, the Gemarists, who, like annotators in general, often obscure a subject, as well as sometimes explain one.

for they have said that there is to be no diminution from the four cups. And, if necessary, he must sell what he has, in order to keep the injunction of the wise men. He is not to depend upon the bread, for if he fulfil the command concerning one cup, he has not fulfilled that concerning the three. Therefore let him sell what he has, and furnish the expense, until he procure (יין או צמוקים) WINE OR RAISINS' (*Arbah Turim. Orach Chayim*, p. 483). This accords with the practice of the modern Jews. 'They are forbidden to drink any liquor made from grain' (clearly because such drinks are always fermented), 'or that has passed through the process of fermentation. Their drink is either pure water, or *raisin-wine* prepared by themselves' (Allen's *Modern Judaism*, p. 394, 1830). Hyam Isaacs says, 'Their drink during the time of the feast is either fair water or *raisin-wine* prepared by themselves, but no kind of leaven must be mixed' (*Ceremonies, &c. of the Jews*, p. 98).*

The CEREMONIES practised at the eating of the Paschal Supper, as described in the Jewish ritual ספר הגדה על פסח, and other books, will illustrate many circumstances alluded to by the Evangelists in their account of the last Passover kept by the Saviour. Since the destruction of Jerusalem the Jews can sacrifice no paschal lamb, and only observe the parts of the feast which relate to the bread, herbs, and wine. Assuming that the Mishna pretty correctly details the customs of the Hebrews in the days of Christ, the following summary will exhibit such parts of the ceremonies observed by the ancient Jews as appear to throw light upon the Gospel narratives.

* Professor Moses Stuart has the following interesting remarks on the subject of the Passover-wine: 'Perhaps, however, the usage which was carried so far by the Jews, arose mainly from strict regard to the supposed real meaning of the command in Exod. xii. 15; xiii. 3, 7, al., which is not expressed by *bread* (לחם חמיץ), but by declaring that they should not eat חמיץ, *i. e. anything fermented.* Now as the word אכל, translated *eating*, is, in cases without number, employed to include a partaking of all refreshments at a meal, that is, of the drinks as well as the food, the Rabbins, it would seem, interpreted the command just cited as extending to the *wine*, as well as the *bread*, of the Passover.' 'The Rabbins, therefore, in order to exclude every kind of fermentation from the Passover, taught the Jews to make a wine from raisins or dried grapes expressly for that occasion, and this was to be drunk before it had time to ferment.' '*When* the Jewish custom began of excluding fermented wine from the Passover-feast is not known. That the custom is very ancient, that it is even now almost universal, and that it has been so for time whereof the memory of man runneth not to the contrary, I take to be facts that cannot be fairly controverted.' 'I cannot doubt that חמיץ, in its widest sense, was excluded from the Jewish Passover, when the Lord's Supper was first instituted; for I am not able to find evidence to make me doubt that the custom among the Jews of excluding fermented wine as well as bread is older than the Christian era' (Dr. Robinson's *Bibliotheca Sacra*, pp. 507, 508, New York, 1843).

After the Paschal Supper had been prepared, and the washings or purifications usual at feasts performed, the master of the family (or most eminent guest) proceeded to the giving of thanks. Sitting down with the company, he took a cupful of wine in his right hand, with which he began the consecration, saying, 'Blessed be Thou, O Lord our God, the King of the universe, who hast created *the fruit of the vine*' (פרי הגפן). He then drank the first cup of wine, and his example was followed by each person present. This thanksgiving was called ברכת היין, *the blessing of the wine* (Luke xxii. 17). He then blessed for the washing of hands, and washed. A table was next brought in furnished, having upon it bitter herbs, unleavened bread, and the sauce called חרוסת *charoseth* (or rather a sort of wine or fruit cake composed of raisins, dates, figs, &c., stamped or *pressed* together, a species of מצות, so as to resemble clay, the Rabbins deeming it a memorial of the Jews having wrought therein), also the body of the paschal lamb, and the flesh of the *chagigah*, or feast-offering, which is for the 14th day of Nisan (Deut. xvi. 2). Then he began to bless God who created the *fruit of the earth*, taking an herb and first dipping it in the sauce or paste, eating it, with all who lay at the table around him, none eating less than the size of an olive. The table was now removed from before *him only* who made the declaration הגדה *haggadah*, or showing forth (1 Cor. xi. 26) of their deliverance out of Egypt, as commanded in Exod. xii. 17; xiii. 8. Then the second cup of wine was filled, and the son or other young person asked, according to Exod. xii. 26, 'What mean ye by this service?' He who presided would then respond, according to a prescribed form or liturgy, 'How different is this night from all other nights! For all other nights we wash but once, but this night twice. All other nights we eat leavened bread, or unleavened, but these nights unfermented only. All other nights we eat flesh, roasted, baked, or boiled, but this night roasted only. All other nights we eat of any other herbs, but this night only bitter herbs. All other nights we eat either sitting or lying, but this night lying only.' Then the table was again placed before him, and he said, 'This Passover which we eat is in respect that the Lord passed over the houses of our fathers in Egypt.' Then, holding up the bitter herbs, he would say, 'These bitter herbs that we eat are in respect that the Egyptians made the lives of our fathers bitter in Egypt.' Then, holding up the unleavened bread in his hand, he saith, 'This unleavened bread which we eat is in respect that the dough of our fathers had not time to be leavened, when the Lord appeared unto them and redeemed them out of the hand of the enemy; and they baked unleavened cakes of the dough which they brought out of Egypt' (Exod. xii. 39). Then he said, 'Therefore are we bound to confess, to praise, to laud, to glorify, to honour, to extol, to magnify, and to ascribe victory to Him who did unto our fathers and unto us all these signs, and who brought us forth from servitude to freedom, from sorrow to joy, from darkness to marvellous light, and we say before Him, *Halleluyah!* &c.' Psalms cxiii. and cxiv. were then repeated. Then they blessed the Lord who had redeemed them and their fathers out of Egypt, and preserved them

unto that night, to eat unleavened bread and bitter herbs. The second cup of wine, after the usual blessing, was then drunk. He next blessed for the washing of hands, and washed a second time (John xiii. 4, 5, 12). Then he took two cakes, and he 'brake' one of them, using both hands, and pronouncing the consecration in these words, 'Blessed be Thou, O Lord our God, the King of the universe, who bringest forth food out of the earth' (Psalm civ. 14). This was called ברכה הלחם, *the blessing of the bread*, and he who pronounced the blessing הביצע, *the breaker* (Luke xxii. 19). He then distributed a piece of the bread to each person around him, blessing God who commanded to eat unleavened bread and bitter herbs, and saying, '*This* is the bread of affliction which our fathers did eat in the land of Egypt.' [This form of speech was followed by the Saviour (Luke xxii. 19), when he gave to the bread a new reference, saying, '*This* is my body,' *i. e.* a *sign* of it.] Then all ate, such of them as chose dipping their portion into the *charoseth* (John xiii. 26). The master next blessed God who commanded the eating of the sacrifice, and he ate of the flesh of the feast-offering: then he blessed God who commanded the eating of the Passover, and he ate of the body of the paschal lamb. After this the company sat long at supper, each person eating and drinking as much as he required, religious discourse being generally carried on during the meal. Afterwards they ate of the flesh of the Passover, if only a piece the size of an olive, but tasted no other food afterwards, so that it might be the end of their supper, and the taste of it remain in the mouth. After this, he lifted up his hands, and blessed the *third cup* of wine in the usual form, and the wine was drunk, each person, in these ceremonies, repeating the words of the master, and following his example in eating and drinking. This cup was properly *the cup of benediction*, כוס הברכה (Matt. xxvi. 27; 1 Cor. x. 16), with which the Saviour commended the mysteries of his blood to his disciples. After this third cup was drunk, thanksgiving was continued for the food of which they had partaken, for the deliverance of their fathers from Egyptian servitude, for the covenant of circumcision, and for the law given to Moses. Hence the propriety of the Saviour selecting *this* cup as the sign of 'the *new covenant* in his blood' (Luke xxii. 20). A fourth cup was then filled, the praise of the song pronounced, which is, '*All thy works praise thee, O Lord*, &c.' (Psalm cxlv. 10), and the usual blessing on the wine. After the fourth cup the Jews tasted nothing that night, save water, unless they chose to fill a fifth cup, for which they must say the *Great Hallel* (Psalm cxxxvi.), '*O confess ye to the Lord, for he is good, for his mercy endureth for ever*,' and other hymns. No fourth cup seems to have been drunk by our Lord or his disciples, though hymns were sung at the close of the repast (Matt. xxvi. 30; Mark xiv. 26).—P. R. L.

PASTURAGE. In the first period of their history the Hebrews led an unsettled pastoral life, such as we still find among many Oriental tribes. One great object of the Mosaical polity was to turn them from this condition into that of fixed cultivators of the soil. Pastorage was, however, only discouraged as a *condition of life* unfriendly to settled habits and institutions, and not as a pursuit connected with agriculture. Hence, although in later times the principal attention of the Hebrews was given to agriculture, the tending of sheep and cattle was not at any time neglected.

The shepherds who move about with their flocks from one pasture-ground to another, according to the demands of the season, the state of the herbage, and the supply of water, are called *nomads*—that is, not merely *shepherds*, but *wandering shepherds*. They feed their flocks on the 'commons,' or the deserts and wildernesses, which no settled or cultivating people have appropriated. At first, no pastoral tribe can have any particular property in such tracts of ground in preference to another tribe; but, in the end, a particular tract becomes appropriated to some one tribe, or section of a tribe, either from long occupation, or from digging wells therein. According to the ideas of the East, the digging of a well is so meritorious an act, that he who performs it acquires a property in the waste-lands around. In the time of the patriarchs, Palestine was but thinly peopled by the Canaanites, and offered many such tracts of unappropriated grounds fit for pasturage. In these they fed their flocks, without establishing any exclusive claims to the soil, until they proceeded to dig wells, which, being considered as an act of appropriation, was opposed by some of the inhabitants (Gen. xxi. 25, 26). After the conquest of Canaan, those Israelites who possessed large flocks and herds sent them out, under the care of shepherds, into the 'wilderness,' or commons, of the east and south, where there are rich and juicy pasturages during the moist seasons of the year (1 Sam. xvii. 28; xxv. 4-15; 1 Chron. xxvii. 29-31; Isa. lxv. 10; Jer. l. 39). The nomads occupy, successively, the same stations in the deserts every year. In summer, when the plains are parched with drought, and every green herb is dried up, they proceed northwards, or into the mountains, or to the banks of rivers; and in winter and spring, when the rains have re-clothed the plains with verdure, and filled the watercourses, they return. When these pastures remove, they strike their tents, pack them up, and convey them on camels to the next station. Nearly all the pastoral usages were the same, anciently, as now. The sheep were constantly kept in the open air, and guarded by hired servants and by the sons and daughters of the owners. Even the daughters of emirs, or chiefs, did not disdain to tend the sheep (Gen. xxix. 17-20; xxix. 9; Exod. ii. 16). The principal shepherd was responsible for the sheep intrusted to his care, and if any were lost he had to make them good, except in certain cases (Gen. xxxi. 39; Exod. xxii. 13; Amos iii. 12). Their services were often paid by a certain proportion of the young of the flock (Gen. xxx. 20). On the more dangerous stations, towers were erected, from which the approach of enemies might be discovered. These were called the Towers of the Flock (Gen. xxv. 21; 2 Chron. xxvi. 10; Micah iv. 8.)

PATARA (*Πάταρα*), a port of Lycia in Asia Minor, where Paul, on his voyage to Jerusalem, changed his ship for one bound to Phœnicia (Acts xxi. 1, 2). Patara was at the mouth of the river Xanthus, and had a famous temple and oracle of

Apollo (Strabo, xiv. 665; Plin. *Hist. Nat.* v. 28; Mela, i. 15; Herod. i. 182).

PATHROS, a name given to Egypt, particularly Upper Egypt, by the prophet Ezekiel (ch. xxix. 14; xxx. 14) [EGYPT].

PATMOS (Πάτμος), a rocky and bare island of the Ægean Sea, about fifteen miles in circumference, and reckoned as one of the Sporades (Plin. *Hist. Nat.* iv. 23; Strabo, x. 480). On account of its stern and desolate character, the island was used, under the Roman empire, as a place of banishment, which accounts for the exile of John thither 'for the testimony of Jesus' (Rev. i. 9) [JOHN]. He was here favoured with those visions which are contained in the Apocalypse, and to which the place owes its Scriptural interest. The external aspect of the island, as ewed from the sea, and the associations connected with it, are neatly indicated by the Scottish Deputation (*Narrative*, p. 326):—'We saw the peaks of its two prominent hills, but our course did not lie very near it. Still it was intensely interesting to get even a glance of that memorable spot where the beloved disciple saw the visions of God; the spot, too, where the Saviour was seen, and his voice heard, for the last time till he comes again. John's eye often rested on the mountains and the islands among which we were passing, and on the shores and waves of this great sea; and often, after the vision was passed, these natural features of his place of exile would refresh his spirit, recalling to his mind how 'he stood on the sand of the sea' (Rev. xiii. 1), and how he had seen that 'every island fled away, and the mountains were not found' (Rev. xvi. 29).

448. [Patmos.]

On approaching the island the coast is found to be high, and to consist of a succession of capes, which form so many ports, some of which are excellent. The only one in use is, however, a deep bay, sheltered by high mountains on every side but one, where it is protected by a projecting cape. The town attached to this port is situated upon a high rocky mountain, rising immediately from the sea; and this, with the Scala below upon the shore, consisting of some shops and houses, forms the only inhabited site of the island. The best and most recent account of this island is that of Schubert in his *Reise nach Morgenland*, iii. 424-442.

Patmos is deficient of trees, but abounds in flowering plants and shrubs. Walnuts and other fruit trees are grown in the orchards; and the wine of Patmos is the strongest and best flavoured of any in the Greek islands. Maize and barley are cultivated, but not in a quantity sufficient for the use of the inhabitants, and for the supply of their own vessels and others which often put in at the great harbour for provisions. The island now bears the names of Patino and Palmosa, and the inhabitants do not exceed 4000 or 5000, many of whom are emigrants from the neighbouring continent. About half way on which, whereon the town is built, is shown a natural grotto in the rock, where St. John is supposed to have seen his visions, and to have written the Revelation. In and around it is a small church, connected with which is a school or college, where the ancient Greek literature is said to be well taught and understood. On the top of the mountain, and consequently in the middle of the town, is a monastery, which, from its situation, has a very majestic appearance. It was built by Alexius Comnenus, and in the library are a great many printed books and manuscripts. The latter have been examined and described by Dr. Clarke and Professor Carlisle. See also Turner, *Journal of a Tour*, iii.

98-101, and Schubert, *Reise ins Morgenland*, iii. 424-434.

PAVEMENT. [Gabbatha.]

PAVILION. [Tent.]

PAUL (Παῦλος), originally *Saul* (שָׁאוּל, Σαῦλος, *asked for*), was a native of Tarsus, a city of Cilicia (Acts xxii. 3, &c.), and was of Jewish descent, of the tribe of Benjamin (Phil. iii. 5). From his father he inherited the rights of Roman citizenship, which had probably been earned by some of his ancestry through services rendered to the Roman state (Lardner, *Works*, i. 228, ed. 1788, 8vo; Grotius, *ad Act.* xxii. 28). The supposition that he enjoyed them in virtue of being a native of Tarsus is not well founded; for though that city had been created by Augustus an *urbs libera* (Dion. Chrysost. ii. 36, ed. Reiske; Plin. *Hist. Nat.* v. 27), it does not follow from this that all its natives enjoyed the privilege of Roman citizenship; and besides, from Acts xxi. 39, compared with xxii. 24, 27, it may be inferred that, as the chief captain knew Paul to be a native of Tarsus and yet was not aware of his Roman citizenship, the latter of these was not necessarily associated with the former. From his receiving the name *Saul* it has been supposed that he was the first-born son of his parents, and that they had long desired and often asked for such a favour from God; that he was not their only child, however, appears from the mention made (Acts xxiii. 16) of his 'sister's son.' Whether Andronicus, Junia, and Herodion, whom he terms, in the Epistle to the Romans (xvi. 7, 11), *συγγενεῖς μου*, were of the number of his blood relations, or only belonged to the same tribe with him, is a question on which learned men have taken different sides (comp. Lardner, *Works*, vi. 235; Estius, *Comm. in loc.*).

At that time Tarsus was the rival of Athens and Alexandria as a place of learning and philosophical research (Strabo, xiv. 5); but to what extent the future 'Apostle of the Gentiles' enjoyed the advantage of its schools we have no means of accurately determining. Attempts have been made to show from his writings that he was familiar with Greek literature, and Dr. Bentley has not hesitated to affirm that 'as Moses was learned in all the wisdom of the Egyptians, so it is manifest from this chapter alone (Acts xxvii.), if nothing else had been now extant, that St. Paul was a great master in all the learning of the Greeks' (*Boyle Lectures*, Serm. iii. *sub. init.*). An authority like that of Bentley in a question of Greek literature is not to be lightly set aside; yet on referring to the evidence which has been furnished both by himself and others in support of the opinion to which he has lent his sanction, it will not be found, we think, such as to justify the strong and decided language he has employed. This evidence consists, (1) of a few supposed references, in the discourse alluded to by Dr. Bentley, to certain dogmas of the Greek philosophers; but even supposing the Apostle to have had these in his eye, it will not follow that he must have studied the writings in which these dogmas were unfolded and defended, because he might have learned enough of them to guide him to such references, as by the supposition he makes in that discourse, from those controversial encounters with 'the philosophers of the Epicureans and of the Stoics,' which we are told he had in the market-place of Athens, previous to the delivering of his oration on the Areopagus; (2) of three quotations made by him from Greek poets, one from the Phænomena (ver. 5) of his countryman Aratus (Acts xvii. 28), one from a lost play of Menander (1 Cor. xv. 33), and one from Epimenides (Tit. i. 12), all of which, however, bear the general character of gnomes or proverbs, and might consequently find their way to the Apostle merely as part of the current coin of popular conversation, without his having once visited the treasury whence they were originally drawn; and (3) of certain similarities of idea and expression between some passages of the Apostle and some that are found in classic authors (Horne's *Introduction*, iv. 343); but none of which are of such a nature as to necessitate the conclusion that the coincidence is more than purely accidental. It must be allowed, however, that the mere circumstance of having spent his early years in such a city as Tarsus could not but exert a very powerful influence on the mind of such a man as Paul, in the way of sharpening his faculties, refining his tastes, and enlarging the circle of his sympathies and affections. 'If, even to the meanest citizen,' as Eichhorn remarks, 'such a circumstance affords—unless he be by nature utterly unobservant—much information which otherwise he could not have obtained, and in consequence of this a certain activity of mind, how much greater may not its effect be supposed to have been on a great mind like that of Paul. To his birth and early residence in Tarsus may be traced the urbanity which the Apostle at no time laid aside, and of which he was frequently a perfect model, many insinuating turns which he gives to his epistles, and a more skilful use of the Greek tongue than a Jew born and educated in Palestine could well have attained' (*Einleit. ins N. T.* iii. 5).

But whatever uncertainty may hang over the early studies of the Apostle in the department of Greek learning, there can be no doubt that, being the son of a Pharisee, and destined, in all probability, from his infancy to the pursuits of a doctor of Jewish law, he would be carefully instructed from his earliest years in the elements of Rabbinical lore. It is probable also that at this time he acquired his skill in that handicraft trade by which in later years he frequently supported himself (Acts xvii. 3; 1 Cor. iv. 12, &c.); for it was a maxim among the Jews, that 'he who does not teach his son a trade, teaches him to steal.' This trade is described by Luke as that of a *σκηνοποιός*, a word regarding the meaning of which there has been no small difference of opinion. Luther makes it 'carpet-maker;' Morus (*in Act.* xviii. 3) and others, 'maker of mats or mattresses;' Michaelis (*Einl. ins N. T.* § 216) and Haenlein (*Einl. ins N. T.* iii. 301), 'tool-maker;' Chrysostom and others, 'worker in leather' (= *σκυτοτόμος*); Hug (*Introd.* p. 505, Fosdick's Trans.) and Eichhorn (*Einl. ins N. T.* iii. 8), 'maker of tent-cloth;' but most critics agree with our translators in rendering it 'tent-maker' (comp. Kuinoel, Dindorf, Rosenmüller, Olshausen, *in loc.*; Winer, *Realwörterb.* Art. 'Paulus;' Schleusner, *in voc.*).

At the proper age (supposed to be after he was fourteen years old), the Apostle proceeded to Jerusalem, to prosecute his studies in the learning of the Jews. Here he became a student under

Gamaliel, a distinguished teacher of the law, and who is supposed to be the person of that name who is celebrated in the writings of the Talmudists as one of the seven teachers to whom the title 'Rabban' was given (Lightfoot, *Horæ Hebr. in Act.* v. 34; Neander, *Apostol. Zeitalter*, u. s. w. s. 62; Otho, *Lex. Rabbinico-Phil.* s.v. 'Rabbi'). Besides acquaintance with the Jewish law, and a sincere conviction of the supreme excellence of Judaism, Gamaliel appears to have possessed a singularly calm and judicious mind, and to have exercised a freedom of thought as well as pursued a range of study very unlike what was common among the party to which he belonged (Acts v. 34—39; comp. Neander, *loc. cit.*). How much the instructions and the example of such a teacher may have influenced the mind of Paul in a direction favourable to the course he was subsequently called to pursue, it is easy for us to imagine, though from the absence of all testimony on the subject it is not competent for us to affirm.

We now approach the period in Paul's history when he becomes a prominent figure on the page of the sacred historian, and when, consequently, the facts of his life can be more confidently narrated. The points about which differences of opinion chiefly exist relate to the chronology of the events recorded concerning him. On such questions our limited space forbids us to enter, and therefore, contenting ourselves with a general reference to the article Acts of the Apostles, in this work, where the reader will find the dates assigned to each event of prominent importance in the Apostle's life, by Ussher, Pearson, Michaelis, Hug, Haenlein, Greswell, and Anger, respectively, we shall proceed to narrate briefly the Apostle's history, without any attempt to ascertain the year either of his own life or of the Christian era when each event occurred.

He is introduced to our notice by the sacred historian for the first time in connection with the martyrdom of Stephen, in which transaction he was, if not an assistant, something more than a mere spectator. He is described as at this time 'a young man' (*νεανίας*); but this term was employed with so much latitude by the Greeks, that it is impossible from the mere use of it, to determine whether the party to whom it was applied, was under thirty, or between that and forty. The probability is, that Paul must have reached the age of thirty at least; for, otherwise, it is not likely that he would have shared the counsels of the chief priests, or been intrusted by them with the entire responsibility of executing their designs against the followers of Jesus, as we know was the case (Acts xxvi. 10, 12). For such a task he showed a painful aptitude, and discharged it with a zeal which spared neither age nor sex (Acts viii. 1-3; xxvi. 10, 11). But whilst thus, in his ignorance and unbelief, he was seeking to be 'injurious' to the cause of Christ, the great Author of Christianity was about to make him a distinguished trophy of its power, and one of the most devoted and successful of its advocates. Whilst journeying to Damascus, with a commission from the high priest, to arrest and bring back as prisoners to Jerusalem the Christians who had escaped thither from the fury of their persecutors, and when he had almost completed his journey, he was suddenly arrested by a miraculous vision of Christ, who addressing him from heaven, demanded the reason of his furious zeal, in the remarkable words, 'Saul, Saul, why persecutest thou me?' Struck to the ground by the suddenness and overwhelming splendour of the vision, and able only to ask by whom it was he was thus addressed, he received for answer, 'I am Jesus of Nazareth whom thou persecutest; but arise, and go into the city, and it shall be told thee what to do.' This command the confounded and now humble zealot immediately rose to obey, but as the brilliancy of the light which had shone around him had dazzled him to blindness, he had to be led into the city by his attendants. Here he remained for three days and nights in a state of deep mental conflict and dejection, tasting neither meat nor drink, until a person of the name of Ananias appeared at the command of Christ to relieve his distress, and to admit him into the Christian fraternity by baptizing him into the name of the Lord (Acts ix. 1-18).

Respecting the character of this transaction different opinions have been entertained; some regarding the whole narrative as a mere myth; others maintaining that the events may be explained on natural principles (such as a severe storm of thunder and lightning, by which Saul was blinded and terrified, and which he, 'according to the faith of the ancients, viewed as an omen whereby he was warned to desist from the persecuting design with which he had commenced his journey to Damascus' (Eichhorn, *Einleit.* iii. 12); whilst others regard the whole as having been a mere vision which passed before 'the inner consciousness' of Saul. Such suppositions, however, are utterly irreconcilable with the authenticity of the Acts of the Apostles, and with the references to this period of his life by the Apostle himself in his Epistles (comp. 1 Cor. xv. 8; ix. 1; Gal. i. 1; Neander, *Apostol. Zeitalter.* s. 111 ff.; Olshausen, *on Acts* ix. 1-19; Lyttleton's *Observations on the Conversion and Apostleship of St. Paul*).

Immediately on his conversion to Christianity Saul seems to have gone into Arabia, where he remained three years (Gal. i. 11-17); and where he, in all probability, was chiefly occupied, by meditation and study, in preparing himself for the great work to which he had been called. Here also we may venture to suppose he received that Gospel which afterwards he preached 'by revelation' from Christ (Gal. i. 12). Neander (*l. c.* s. 121) and Anger (*De Tempp. in Actis App. Ratione*, p. 123) have endeavoured to show that Paul went into Arabia to preach the Gospel; but the reasons they adduce have little weight, (comp. Olshausen, *on Acts* ix. 20-25).

Returning from Arabia to Damascus the Apostle commenced his public efforts in the service of Christ, by boldly advocating in the synagogues of the Jews the claims of Jesus to be venerated as the Son of God. At first astonished, the Jews were afterwards furiously incensed at this change in the opinions and conduct of Saul, and in consequence of their attempts upon his liberty and life, he was obliged to make his escape from Damascus. This he effected with difficulty by the aid of the Christians, some of whom let him down in a basket from the window of a dwelling erected upon the outer wall of the city (Acts ix. 21, &c.; 2 Cor. xi. 32). After this he went up to Jerusalem (for the *first* time after

his conversion), where, on the testimony of Barnabas, he was acknowledged as a Christian brother, and admitted by the Apostles to that place in their fraternity which had been assigned to him by Christ. From Jerusalem he was soon driven by the hostility of the Jews; when, after visiting Cæsarea, he went to his native town Tarsus, where he abode several years (Acts ix. 26-30). From this retreat he was summoned by Barnabas, who, having been appointed by the Apostles at Jerusalem to visit the church at Antioch, where accessions had been made to the number of the followers of Jesus from among the Gentiles as well as the Jews, and finding the need of counsel and co-operation in his work, went to Tarsus to procure the assistance of Saul (Acts xi. 22-25). After residing and labouring for a year in Antioch, these two distinguished servants of Christ were sent up to Jerusalem with certain contributions which had been made among the Christians at Antioch, on behalf of their brethren in Judea, who were suffering from the effects of a dearth (Acts xi. 27-30). This, as commonly received, was the Apostle's *second* visit to Jerusalem after his conversion.

Having discharged this commission they returned to Antioch, accompanied by John Mark, the nephew of Barnabas, and were shortly afterwards despatched by that church, in obedience to an injunction from heaven, on a general missionary tour. In the course of this tour, during the earlier part only of which they were accompanied by Mark, in consequence of his shrinking from the toils and dangers of the journey and returning to Jerusalem, they visited Seleucia, Cyprus, Perga in Pamphylia, Antioch in Pisidia, Iconium, Lystra and Derbe, cities of Lycaonia (in the former of which the fickle populace, though at first they had with difficulty been prevented from offering them divine honours, were almost immediately afterwards, at the instigation of the Jews, led to stone the Apostle until he was left for dead); and then they returned by way of Attalia, a city of Pamphylia, by sea to Antioch, where they rehearsed to the church all that God had done by them (Acts xiii.-xiv.). This formed the Apostle's *first* great missionary tour.

In the narrative of this journey, given by Luke, the historian, without assigning any reason for so doing, drops the name Saul and adopts that of Paul, in designating the Apostle. It is probable from this, that it was during this journey that the Apostle's change of name actually took place. What led to that change we can only conjecture; and of conjectures on this point there has been no lack. Jerome and Augustine, whom, among recent writers, Olshausen follows, ascribe the change to the conversion of Sergius Paulus, whose name the Apostle assumed in commemoration of so important an event. Chrysostom, followed by Theophylact and Theodoret, imputes it to the Apostle's determination that, as Peter had two names, he would not, even in this respect, 'be behind the chiefest of the apostles.' Nicephorus (*Hist. Eccles.* ii. 37) thinks he received the name as a sort of nickname from the Romans, on account of his diminutive stature; *Paulus*, quasi *Pusillus*. Lightfoot, Hammond, and others, suppose that from his birth the Apostle had the two names, the one in virtue of his Hebrew descent, the other in virtue of his Roman citizenship, and that he used the one among the Jews, but adopted the other when he came to labour chiefly among Gentiles. But the most probable opinion is that of Beza, Grotius, Doddridge, Kuinoel, &c., that as the Romans and Greeks were in the habit of softening the Hebrew names in pronunciation, and accommodating their form to that of the Latin or Greek (comp. Jason for Jesus, Silvanus for Silas, Pollio for Hillel, &c.), they substituted Paulus for שָׁאוּל, and the Apostle henceforward adopted the substituted name as his usual designation.

Not long after Paul and Barnabas had returned to Antioch, they were deputed by the church there again to visit Jerusalem, to consult the Apostles and elders upon the question, which certain members of the church at Jerusalem had raised in that at Antioch, whether converts from heathenism required to be circumcised, and so become Jews before they could be saved? The Apostle on this occasion visited Jerusalem for the *third* time after his conversion; and after the question had been settled by the parties in that city with whom the power to do so lay, he and his companion returned to Antioch. After restoring peace to the church there Paul proposed to Barnabas to undertake another missionary tour, to which the latter cordially assented; but, unhappily, on the very eve of their departure, a contention arose between them, in consequence of Barnabas being determined to take with them his nephew John Mark, and Paul being equally determined that one, who had on a former occasion ingloriously deserted them, should not again be employed in the work. Unable to come to an agreement on this point they separated, and Paul, accompanied by Silas, commenced his second missionary journey, in the course of which, after passing through Syria and Cilicia, he revisited Lystra and Derbe. At the former of these places he found Timothy, whom he associated with Silas, as the companion of his further travels, after he had been ordained by the Apostle and the presbytery of the church of which he was a member (1 Tim. iv. 14). Paul then passed through the regions of Phrygia and Galatia, and, avoiding Asia strictly so called, and Bithynia, he came with his companions by way of Mysia to Troas, on the borders of the Hellespont. Hence they crossed to Samothracia, and thence to Neapolis, and so to Philippi, whither he had been summoned in a vision by a man of Macedonia saying, 'Come over and help us.' After some time spent in this city they passed through Amphipolis and Apollonia, cities of Macedonia, and came to Thessalonica, where, though they abode only a short time, they preached the Gospel with no small success. Driven from that city by the malice of the Jews, they came by night to Berea, another city of Macedonia, where at first they were favourably received by the Jews, until a party from Thessalonica, which had followed them, incited the Bereans against them. Paul, as especially obnoxious to the Jews, deemed it prudent to leave the place, and accordingly retired to Athens, where he determined to await the arrival of Silas and Timothy. Whilst residing in this city, and observing the manners and religious customs of its inhabitants, his spirit was stirred within him, when he saw how entirely they

were immersed in idolatry; and unable to refrain, he commenced in the synagogues of the Jews, and in the market-place, to hold discussions with all whom he encountered. This led to his being taken to the Areopagus, where, surrounded by perhaps the shrewdest, most polished, most acute, most witty, and most scornful assemblage that ever surrounded a preacher of Christianity, he, with exquisite tact and ability, exposed the folly of their superstitions, and unfolded the character and claims of the living and true God. For the purpose of more effectually arresting the attention of his audience, he commenced by referring to an altar in their city, on which he had read the inscription ἀγνώστῳ θεῷ, *to an unknown God;* and, applying this to Jehovah, he proposed to declare to them that Deity, whom thus, without knowing him (ἀγνοοῦντες), they were worshipping. Considerable difficulty has been found by many interpreters to reconcile this with the fact, that no mention is made by the classic authors of any altar in Athens bearing this inscription, whilst we are informed by Pausanias (*Attic.* i. 4; *Eliac.* v. 14) and Philostratus (*Vit. Apollonii Tyan.*, vi. 3), that there were several altars inscribed ἀγνώστοις θεοῖς, in the plural; and different suppositions have been made to account for the Apostle's language (Kuinoel, *in Act.* xvii. 23). But why should we not receive the Apostle's own testimony on this subject, as reported by the inspired historian? It is certain that no one is in circumstances to affirm that no altar existed in Athens bearing such an inscription at the time Paul visited that city; and when, therefore, Paul, publicly addressing the Athenians, says he saw such an altar, why should we hesitate for a moment to take his words for what they literally mean? Besides, there is nothing in what Pausanias and Philostratus affirm that appears incompatible with Paul's assertion. It is to be observed that neither of them says there were altars, *on each of which* the inscription was in the plural number, but only there were 'altars of gods called unknown' (βωμοὶ θεῶν ὀνομαζομένων ἀγνώστων); so that for aught that appears to the contrary, each altar might bear the inscription which Paul says he saw upon one.

On being rejoined by Timothy (1 Thess. iii. 1), and perhaps also by Silas (comp. Greswell's *Dissertations*, ii. pp. 31, 32), the Apostle sent them both back to Macedonia, and went alone to visit Corinth, whither they soon after followed him (Acts xviii. 5). Here he abode for a year and a half preaching the Gospel, and supporting himself by his trade as a tent-maker, in which he was joined by a converted Jew of the name of Aquila, who, with his wife Priscilla, had been expelled from Rome by an edict of the emperor, forbidding Jews to remain in that city. Driven from Corinth by the enmity of the Jews, he, along with Aquila and Priscilla, betook himself to Ephesus, whence, after a residence of only a few days, he went up to Jerusalem, being commanded by God to visit that city, at the time of the approaching passover. His visit on this occasion—the *fourth* since his conversion—was very brief; and at the close of it he went down to Antioch, thereby completing his *second* great apostolic tour.

At Antioch he abode for some time, and then, accompanied, as is supposed, by Titus, he commenced another extensive tour, in the course of which, after passing through Phrygia and Galatia, he visited Ephesus. The importance of this city, in relation to the region of Hither Asia, determined him to remain in it for a considerable time; and he accordingly continued preaching the Gospel there for three years, with occasional brief periods of absence, for the purpose of visiting places in the vicinity. With such success were his efforts crowned, that the gains of those who were interested in supporting the worship of Diana, the tutelar goddess of the city, began to be seriously affected; and at the instigation of one of these, by name Demetrius, a silversmith, who had enjoyed a lucrative traffic by the manufacture of what appear to have been miniature representations of the famous temple of Diana (ναοὺς ἀργυροῦς Ἀρτέμιδος, comp. Kuinoel, *in Act.* xix. 24; Neander, *Apost. Zeit.* s. 350), a popular tumult was excited against the Apostle, from the fury of which he was with difficulty rescued by the sagacity and tact of the town-clerk, aided by others of the chief men of the place, who appear to have been friendly towards Paul. By this occurrence the Apostle's removal from Ephesus, on which, however, he had already determined (Acts xix. 21), was in all probability expedited; and, accordingly, he very soon after the tumult went by way of Troas to Philippi, where he appears to have resided some time, and from which, as his head-quarters, he made extensive excursions into the surrounding districts, penetrating even to Illyricum, on the eastern shore of the Adriatic (Rom. xv. 19). From Philippi he went to Corinth, where he resided three months, and then returned to Philippi, having been frustrated in his design of proceeding through Syria to Jerusalem by the malice of the Jews. Sailing from Philippi, he came to Troas, where he abode seven days; thence he journeyed on foot to Assos; thence he proceeded by sea to Miletus, where he had an affecting interview with the elders of the church at Ephesus (Acts xx. 17, ff.); thence he sailed for Syria, and, after visiting several intermediate ports, landed at Tyre; and thence, after a residence of seven days, he travelled by way of Ptolemais and Cæsarea to Jerusalem. This constituted his *fifth* visit to that city after his conversion.

On his arrival at Jerusalem he had the mortification to find that, whilst the malice of his enemies the Jews was unabated, the minds of many of his brother Christians were alienated from him on account of what they deemed his too lax and liberal notions of the obligations of the Mosaic ritual. To obviate these feelings on their part, he, at the suggestion of the Apostle James, joined himself to four persons who had taken on them the vows of a Nazarite, and engaged to pay the cost of the sacrifices by which the Mosaic ritual required that such should be absolved from their vows. With what success this somewhat questionable act of the Apostle was attended, as respects the minds of his brethren, we are not informed, but it had no effect whatever in securing for him any mitigation of the hatred with which he was regarded by the unconverted Jews; on the contrary, his appearance in the temple so much exasperated them, that, before his vow was accomplished, they seized him, and would have put him to death had not Lysias, the commander of the Roman cohort in the adjoining citadel,

brought soldiers to his rescue. Under the protection of Lysias, the Apostle addressed the angry mob, setting forth the main circumstances of his life, and especially his conversion to Christianity, and his appointment to preach the Gospel to the Gentiles. Up to this point they heard him patiently; but no sooner had he insinuated that the Gentiles were viewed by him as placed on a par with the Jews, than all their feelings of national bigotry burst forth in a tempest of execration and fury against the Apostle. Lysias, ignorant of what Paul had been saying, from his having addressed the people in Hebrew, and suspecting from these vehement demonstrations of the detestation in which he was held by the Jews that something flagrantly vicious must have been committed by him, gave orders that he should be examined, and forced by scourging to confess his crime. From this indignity Paul delivered himself by asserting his privileges as a Roman citizen, whom it was not lawful to bind or scourge. Next day, in the presence of the Sanhedrim, he entered into a defence of his conduct, in the course of which, having avowed himself a believer in the doctrine of a bodily resurrection, he awakened so fierce a controversy on this point between the Pharisees and the Sadducees in the council, that Lysias, fearing he might be torn to pieces among them, gave orders to remove him into the fort. From a conspiracy into which above forty of the Jews had entered to assassinate him he was delivered by the timely interposition of his nephew, who, having acquired intelligence of the plot, intimated it first to Paul, and then to Lysias. Alarmed at the serious appearance which the matter was assuming, Lysias determined to send Paul to Cæsarea, where Felix the procurator was residing, and to leave the affair to his decision. At Cæsarea Paul and his accusers were heard by Felix; but though the Apostle's defence was unanswerable, the procurator, fearful of giving the Jews offence, declined pronouncing any decision, and still retained Paul in bonds. Some time after he was again summoned to appear before Felix, who, along with his wife Drusilla, expressed a desire to hear him 'concerning the faith in Christ;' and on this occasion the faithful and fearless Apostle discoursed so pointedly on certain branches of good morals, in which the parties he was addressing were notoriously deficient, that Felix trembled, and hastily sent him from his presence. Shortly after this Felix was succeeded in his government by Porcius Festus, before whom the Jews again brought their charges against Paul; and who, when the cause came to be heard, showed so much of a disposition to favour the Jews, that the Apostle felt himself constrained to appeal to Cæsar. To gratify King Agrippa and his wife Bernice, who had come to Cæsarea to visit Festus, and whose curiosity was excited by what they had heard of Paul, he was again called before the governor and 'permitted to speak for himself.' On this occasion he recapitulated the leading points of his history, and gave such an account of his views and designs, that a deep impression was made on the mind of Agrippa favourable to Christianity and to the Apostle; so much so that, but for his having appealed to Cæsar, it is probable he would have been set at liberty. His cause, however, having by that appeal been placed in the hands of the emperor, it was necessary that he should go to Rome, and thither accordingly Festus sent him. His voyage was long and disastrous. Leaving Cæsarea when the season was already considerably advanced, they coasted along Syria as far as Sidon, and then crossed to Myra, a port of Lycia; thence they sailed slowly to Cnidus; and thence, in consequence of unfavourable winds, they struck across to Crete, and with difficulty reached a port on the southern part of that island called 'The Fair Haven,' near the town of Lasea. There Paul urged the centurion, under whose charge he and his fellow-prisoners had been placed, to winter; but the place not being very suitable for this purpose, and the weather promising favourably, this advice was not followed, and they again set sail, intending to reach Phœnice, a port in the same island, and there to winter. Scarcely had they set sail, however, when a tempest arose, at the mercy of which they were driven for fourteen days in a westerly direction, until they were cast upon the coast of Malta, where they suffered shipwreck, but without any loss of life. Hospitably received by the natives, they abode there three months, during which time Paul had a favourable opportunity of preaching the Gospel, and of showing the power with which he was endued for the authentication of his message by performing many miracles for the advantage of the people. On the approach of spring they availed themselves of a ship of Alexandria which had wintered in the island, and set sail for Syracuse, where they remained three days; thence they crossed to Rhegium, in Italy; and thence to Puteoli, from which place Paul and his companions journeyed to Rome. Here he was delivered by the centurion to the captain of the guard, who permitted him to dwell in his own hired house under the surveillance of a soldier. And thus he continued for two years, 'receiving all that came to him, preaching the kingdom of God, and teaching those things which concern the Lord Jesus Christ, with all confidence, no man forbidding him' (Acts xxi. 17; xxviii. 31).

At this point the evangelist abruptly closes his narrative, leaving us to glean our information regarding the subsequent history of the Apostle from less certain sources. Tradition stedfastly affirms that he suffered martyrdom at Rome, and that the manner of his death was by beheading (Tillemont, *Mémoires*, i. p. 324); but whether this took place at the close of the imprisonment mentioned by Luke, or after a second imprisonment incurred subsequent to an intervening period of freedom and active exertion in the cause of Christianity, has been much discussed by modern writers. The latter hypothesis rests chiefly on some statements in Paul's second Epistle to Timothy, which it is deemed impossible to reconcile with the former hypothesis. The consideration of these belongs properly to the literary history of that Epistle [Second Epistle to Timothy], and we shall not therefore enter upon them here. Suffice it to remark that, though the whole subject is involved in much obscurity, the preponderance of evidence seems to be in favour of the supposition of a second imprisonment of the Apostle. The testimonies of some of the later fathers in support of this supposition cannot, however, be allowed much weight, for they all rest upon Eusebius, and he rests upon a mere 'rumour' (his words are λόγος ἔχει, *Hist. Eccles.* ii. 22),

and upon the Apostle's expressions in the second Epistle to Timothy. More weight is due to the testimony of Clemens Romanus, because of his proximity in time to the Apostle, and of his residence at Rome; but all the information he furnishes bearing on this question is that Paul, 'after having proclaimed the Gospel both in the east and in the west . . . . . and taught righteousness to the whole world, and having come to the boundary of the west (*τέρμα τῆς δύσεως*), and having testified before the rulers (or having suffered martyrdom by order of the rulers, *μαρτυρήσας ἐπὶ τῶν ἡγουμένων*), thus left the world and went to the holy place' (Ep. i. ad Cor. c. 5). By 'the boundary of the west' it is affirmed, on the part of the advocates of a second imprisonment of the Apostle, that Clement means Spain, or perhaps the extreme west part of Spain; and as Paul never visited this during the portion of his life of which we have record in the New Testament, it is inferred that he must have done so at a subsequent period after being liberated from imprisonment. But this is not very cogent reasoning; for it is still open to question whether by *τὸ τέρμα τῆς δύσεως* Clement really intended to designate Spain. We may give up at once the opinion of Hemsen, that the place referred to is Illyricum, as fanciful and untenable; nor do we feel inclined to contend strenuously for Rome as the place intended, though this is not altogether improbable; but it is not so easy to get over the suggestion that Clement means nothing more by the phrase than simply the western part of the Roman empire, without intending to specify any one place in particular. It is to be observed that his language is, through the whole sentence, vague and exaggerated, as when, for instance, he affirms that Paul 'had taught righteousness to the whole world;' and, in such a case, it is attributing too much to his assertion to insist upon understanding it of some definite locality. Besides, the use of *ἐλθων* by Clement would seem to intimate that he was himself residing at the place or in the region which was present to his mind while writing as the *terminus ad quem* of the Apostle's journeyings; and, moreover, if by the succeeding clause we understand him as alluding to Paul's having suffered martyrdom by order of the emperor (which is the rendering usually given by those who adduce the passage as favouring the hypothesis of a second imprisonment), does it not appear to follow that the *τέρμα τῆς δύσεως* was the place where that occurred? Both these suggestions are in favour of Rome, or of the West generally, as the place referred to by Clement; and adopting this interpretation of his words, the inferential evidence they have been supposed to yield in favour of the hypothesis that the Apostle enjoyed a period of labour, and suffered a second imprisonment subsequent to that mentioned by Luke, is of course destroyed.

If, on the evidence furnished by the allusions in the Second Epistle to Timothy, we adopt the supposition above stated, it will follow that Paul, during the interval between his first and second imprisonments, undertook an extensive apostolic tour, in the course of which he visited his former scenes of labour in Asia and Greece, and perhaps also fulfilled his purpose of going into Spain (Rom. xv. 24-28). He probably also visited Crete and Dalmatia (comp. Greswell, vol. ii. pp. 78-100).

In the apostle's own writings one or two incidents of his life are alluded to of which no notice has been taken in the preceding sketch of his history, in consequence of the obscurity in which they are involved, in some cases as to the time when they occurred, and in others as to the nature of the event itself. These are his visit to Jerusalem, mentioned Gal. ii. 1; his rapture into the third heavens (2 Cor. xii. 1-4); the thorn in the flesh with which he was afflicted after that event (ver. 7); and his fighting with wild beasts at Ephesus, mentioned in 1 Cor. xv. 32. As to the first of these it does not readily synchronize with any visit of the apostle to Jerusalem noticed by Luke. That it was anterior to the visit mentioned in Acts xv. is evidenced by the entire discrepancy of the two narratives (comp. Tate's *Continuous History of St. Paul*, p. 141); and that it was the same as the visit mentioned in Acts xi. 30, is rendered doubtful by the circumstance that on the occasion referred to by the apostle, Titus accompanied him and Barnabas to Jerusalem, whereas it would appear from the narrative of Luke as if Paul and Barnabas were without any companion when they went up with the alms for the poor saints (comp. Acts xi. 30, and xii. 25). We are strongly inclined, therefore, to suppose that during the interval which elapsed between what are commonly reckoned as the apostle's *second* and *third* visits to Jerusalem (an interval of about *five* years), a short visit was paid by him and Barnabas, along with Titus, of a private nature, and probably with a view of consulting the apostles resident at Jerusalem, as to the proper treatment of Gentile converts (Gal. ii. 2-10).

As respects the rapture into the third heavens, one thing appears very certain, viz., that those are mistaken who attempt to identify this with the vision on the road to Damascus which led to the apostle's conversion. The design, character, and consequences of the one are so different from those of the other, that it is surprising any should have imagined the two events were the same (Neander, *Apostol. Zeitalter*, i. 115). It is not improbable that the *ὀπτασία* of which Paul writes to the Corinthians was the same as the *ἔκστασις* referred to by him in the recapitulation of the events of his life in his address to the Jews as recorded in Acts xxii. 17. When in an ecstasy or trance an individual might be well described as *ἁρπάγεις*, for all outward perception was suspended, and the whole mind was wrapt in contemplation of the objects presented in the vision. The date, moreover, which the apostle assigns to the event, mentioned in the Epistle to the Corinthians, agrees very closely with that of the event mentioned in the Acts. The latter, Paul says, occurred when he was in Jerusalem for the first time after his conversion: the former, he says, took place 'about fourteen years' before the time of his writing the Second Epistle to the Corinthians. Now, according to almost all the chronologers, a space of fourteen years intervened between the apostle's first visit to Jerusalem and his writing that epistle; so that it is highly probable that the vision referred to in the two narratives is the same.

What 'the thorn in the flesh' was with which the apostle was visited after his vision, has proved indeed a *quæstio vexata* to interpreters (Cf. Poli *Synops. Crit. in loc.*). The conclusion to which

Neander has come on this subject appears to us much the most judicious. 'We must regard it as something entirely personal, affecting him not as an apostle, but as Paul; though, in the absence of any information as to its characteristics, it would be foolish to decide more precisely *what* it was' (*Apostol. Zeit.* i. 228).

Respecting the apostle's fighting with wild beasts at Ephesus, the question is whether this should be understood *literally* of an actual exposure in the theatre to the assault of savage beasts, or *figuratively* of dangers to which he was exposed from the attacks of savage men. It is no objection to the literal interpretation that Luke has not noticed any such event in his narrative; for from Rom. xvi. 4, we find that the apostle must have encountered many deadly perils at Ephesus of which no notice is taken by Luke. As little force is there in the objection that Paul, as a Roman citizen, could not legally be subjected to such a punishment; for however his privileges in this respect may have availed him on some occasions, we know that they did not on all, else he would not have endured the indignity of being scourged, as he was at Philippi (Acts xvi. 23), and, according to his own testimony, often besides (2 Cor. xi. 24, 25). Tradition is in favour of the literal interpretation (Nicephori *Hist. Eccles.* ii. 6. 25); and no exegesis of the whole clause seems better than that of Theodoret: κατὰ ἀνθρώπινον λογισμὸν θηρίων ἐγενόμην βορά, ἀλλὰ παραδόξως ἐσώθην; for it is far from improbable that the furious mob might have raised the cry '*Ad leones*' against the apostle, and that some unexpected interposition had saved him from the fearful doom. To interpret this statement of his treatment at the hands of Demetrius, is absurdly to make him refer to an event which at the time he was writing had not occurred.

On the writings of the apostle Paul, see the articles in this work under the titles of his different epistles.

PEACOCK. It is a question, perhaps, more of geographical and historical than of Biblical interest to decide whether תכיים *thūkyim* (1 Kings x. 22) and תוכיים *thūkyim* (2 Chron. ix. 21) denote peacocks strictly so called, or some other species of animal or bird; for on the solution of the question in the affirmative depends the real direction of Solomon's fleet; that is, whether, after passing the straits of Bab-el-Mandeb, it proceeded along the east coast of Africa towards Sofala, or whether it turned eastward, ranging along the Arabian and Persian shores to the Peninsula of India, and perhaps went onwards to Ceylon, and penetrated to the great Australian, or even to the Spice Islands. Bochart, unable to discover a Hebrew root in *Thukyim*, rather arbitrarily proposes a transposition of letters by which he converts the word into *Cuthyim*, denoting, as he supposes, the country of the *Cuthei*, which, in an extended sense, is applied, in conformity with various writers of antiquity, to Media and Persia; and Greek authorities are cited to show that peacocks abounded in Babylonia, &c. This mode of proceeding to determine the species and the native country of the bird is altogether inadmissible, since Greek writers speak of Persian peacocks at a much later period than the age of Solomon; and it is well known that they were successively carried westward till they passed from the Greek islands into Europe, and that, as Juno's birds, the Romans gradually spread them to Gaul and Spain, where, however, they were not common until after the tenth century. But even if peacocks had been numerous in Media and northern Persia at the time in question, how were they to be furnished to a fleet which was navigating the Indian Ocean, many degrees to the south of the colder region of High Asia? and as for the land of the Cuthei, or of Cush, when it serves their purpose, writers remove it to Africa along with the migrations of the Cushites. The *Thukyim* have been presumed to derive their appellation from an exotic word implying 'tufted' or 'crested,' which, though true of the peacock, is not so obvious a character as that afforded by its splendid tail; and therefore a crested parrot has been supposed to be meant. Parrots, though many species are indigenous in Africa, do not appear on the monuments of Egypt; they were unknown till the time of Alexander, and then both Greeks and Romans were acquainted only with species from Ceylon, destitute of crests, such as *Psittacus Alexandri;* and the Romans for a long time received these only by way of Alexandria, though in the time of Pliny others became known. Again, the pheasant has been proposed as the bird intended; but *Phas. Colchicus*, the only species known in antiquity, is likewise without a prominent crest, and is a bird of the colder regions of the central range of Asiatic mountains. Following a line of latitude, it gradually reached westward to High Armenia and Colchis, whence it was first brought to Europe by Greek merchants, who frequented the early emporium on the Phasis. The centre of existence of the genus, rich in splendid species, is in the woody region beneath the snowy peaks of the Himalayas, reaching also eastward to northern China, where the common pheasant is abundant; but not, we believe, any where naturally in a low latitude. Thus it appears that pheasants were not the birds intended by the Hebrew *Thukyim*, although all versions and comments agree that after the *Ebi*, or apes (probably *Cercopithecus Entellus*, one of the sacred species of India), some kind of remarkable bird is meant; and none are more obviously entitled to the application of the name than the peacock, since it is abundant in the jungles of India, and would be met with, both wild and domesticated, by navigators to the coasts from Camboge to Ceylon, and would better than any of the others bear a long sea voyage in the crowded ships of antiquity. Moreover, we find it still denominated *Togei* in the Malabaric dialects of the country, which may be the source of *Thuki*, as well as of the Arabic *Tawas*, and Armenian *Taus*.

With regard to the objection, that the long ocellated feathers of the rump, and not those of the tail, as is commonly believed, are the most conspicuous object offered by this bird, it may be answered, that if the name *Togei* be the original, it may not refer to a tuft, or may express both the erectile feathers on the head of a bird and those about the rump or the tail; and that those of the peacock have at all times been sought to form artificial crests for human ornaments. One other point remains to be considered; namely, whether the fleet went to the East, or proceeded southward along the African shore? No doubt, had the Phœnician trade guided the Hebrews in the last mentioned direction, gold and apes might have been obtained on the east coast of Africa, and even some kinds of spices in the ports of Abyssinia; for all that region, as far as the Strait of Madagascar, was at that early period in a state of comparative affluence and civilization. But in that case a great part of the commercial produce would have been obtained within the borders of the Red Sea, and beyond the Straits; the distance to be traversed, therefore, being but partially affected by the monsoons, never could have required a period of three years for its accomplishment; and a prolonged voyage round the Cape to the Guinea and Gold Coast is an assumption so wild, that it does not merit serious consideration; but intending to proceed to India, the fleet had to reach the Straits of Bab-el-Mandeb in time to take advantage of the western monsoon; be in port, perhaps at or near Bombay, before the change; and after the storms accompanying the change, it had to proceed during the eastern monsoon under the lee of the land to Coodramalli, or the port of Palesimundus in Taprobana, on the east coast of Ceylon; thence to the Coromandel shore, perhaps to the site of the present ruins of Mahabalipuram; while the return voyage would again occupy one year and a half. The ports of India and Ceylon could furnish gold, precious stones, eastern spices, and even Chinese wares; for the last fact is fully established by discoveries in very ancient Egyptian tombs. Silks, which are first mentioned in Proverbs xxxi. 22, could not have come from Africa, and many articles of advanced and refined social life, not the produce of Egypt, could alone have been derived from India [Ophir].

Though in this short abstract of the arguments respecting the direction of Solomon's fleet, there may be errors, none, we believe, are of sufficient weight to impugn the general conclusion, which supports the usual rendering of *Thukyim* by 'peacocks;' although the increase of species in the west does not appear to have been remarkable till some ages after the reign of the great Hebrew monarch, when the bird was dedicated to Juno, and reared at first in her temple at Samos. There are only two species of true peacocks, viz., that under consideration, which is the *Pavo cristatus* of Linn.; and another, *Pavo Muticus*, more recently discovered, which differs in some particulars, and originally belongs to Japan and China. Peacocks bear the cold of the Himalayas: they run with great swiftness, and where they are, serpents do not abound, as they devour the young with great avidity, and, it is said, attack with spirit even the *Cobra di Capello* when grown to considerable size, arresting its progress and confusing it by the rapidity and variety of their evolutions around it, till exhausted with fatigue it is struck on the head and dispatched.

A detailed description of a species so well known, we deem superfluous.—C. H. S.

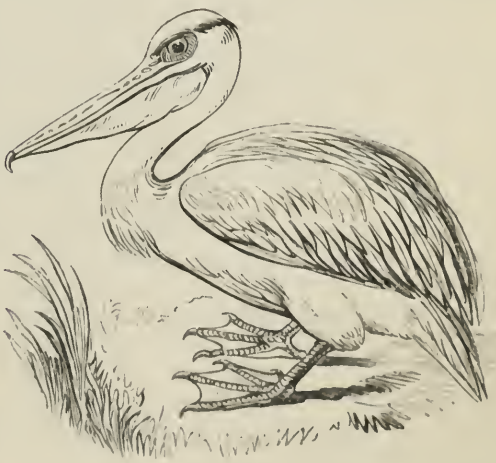
PEARLS. It is doubtful that pearls are mentioned in the Old Testament. The word גביש, *gabish*, rendered 'pearl' in Job xxviii. 18, appears to mean crystal; and the word פנינים, *peninim*, which our version translates by 'rubies,' is now supposed to mean coral [Coral]. But in the New Testament the pearls (μαργαρίτης) are repeatedly mentioned. In Matt. xiii. 45, 46, a merchant (travelling jeweller) seeking goodly *pearls*, finds one pearl of great price, and to be able to purchase it, sells all that he has—all the jewels he had previously secured. In 1 Tim. ii. 9, and Rev. xvii. 4, pearls are mentioned as the ornaments of females; in Rev. xviii. 12-16, among costly merchandize; and Rev. xxi. 12, the twelve gates of the heavenly Jerusalem are 'twelve pearls.' These intimations seem to indicate that pearls were in more common use among the Jews after than before the captivity, while they evince the estimation in which they were in later times held (Plin. *Hist. Nat.* ix. 54; xii. 41; Ælian, *Anim.* x. 13; comp. Ritter, *Erdkunde*, ii. 164). The island of Tylos (Bahrein) was especially renowned for its fishery of pearls (Plin. vi. 32; comp. Strabo, xvi. p. 767; Athen. iii. 93); the Indian ocean was also known to produce pearls (Arrian, *Indica*, p. 194; Plin. ix. 54; xxxiv. 48; Strabo, xv. p. 717). Heeren feels assured that this indication must be understood to refer to the strait between Taprobana, or Ceylon, and the southernmost point of the mainland of India, Cape Comorin, whence Europeans, even at present, derive their principal supplies of these costly natural productions. This writer adds, 'Pearls have at all times been esteemed one of the most valuable commodities of the East. Their modest splendour and simple beauty appear to have captivated the Orientals, even more than the dazzling brilliancy of the diamond, and have made them at all times the favourite ornament of despotic princes. In the West, the passion for this elegant luxury was at its height about the period of the extinction of Roman freedom, and they were valued in Rome and Alexandria as highly as precious stones. In Asia this taste was of more ancient date, and may be traced to a period anterior to the Persian dynasty; nor has it ever declined. A string of pearls of the largest size is an indispensable part of the decorations of an Eastern monarch. It was thus that Tippoo was adorned when he fell before the gates of his capital; and it is thus that the present ruler of the Persians is usually decorated (*Ideen*, i. 2. 224).

PEGANON (πηγάνον). The word *rue* occurs only in Luke xi. 42. 'But woe unto you, Pharisees! for ye tithe mint and rue and all manner of herbs, and pass over judgment,' &c. In the parallel passage, Matt. xxiii. 23, *dill* (ἄνηθον), translated *anise* in the English Version, is mentioned instead of rue. Both dill and rue were cultivated in the gardens of Eastern countries in ancient times as they are at the present day. Dioscorides describes two kinds, πήγανον ὀρεινόν, *Ruta montana*, and πήγανον κηπευτόν, *Ruta hortensis*. 'Ex hortensi autem esui magis idonea, quæ juxta

ficos provenit.' These are considered by botanists to be distinct species, and are called respectively, the first, *Ruta montana*, which is common in the south of Europe and the north of Africa; the other is usually called *Ruta graveolens*, and by some *R. hortensis*, which is found in the south of Europe, and is the kind commonly cultivated in gardens. Rue was highly esteemed as a medicine, even as early as the time of Hippocrates. Pliny says, 'Rue is an herbe as medicinable as the best. That of the garden hath a broader leafe, and brauncheth more than the wild, which is more hotte, vehement, and rigorous in all operations; also that is it sowed usually in Februarie, when the western wind, Favonius, bloweth. Certes we find, that in old time rue was in some great account, and especiall reckoning above other hearbs: for I read in auncient histories, That Cornelius Cethegus, at what time as he was chosen Consull with Quintius Flaminius, presently upon the said election, gave a largesse to the people of new wine, aromatized with rue. The fig-tree and rue are in a great league and amitie, insomuch as this herb, sow and set it where you will, in no place prospereth better than under that tree; for planted it may be of a slip in spring' (Holland's Pliny, xix. c. viii.). That it was employed as an ingredient in diet, and as a condiment, is abundantly evident from Apicius, as noticed by Celsius, and is not more extraordinary than the fondness of some Eastern nations were of assafœtida as a seasoning to food. That one kind was cultivated by the Israelites, is evident from its being mentioned as one of the articles of which the Pharisees paid their tithes, though they neglected the weightier matters of the law. Rosenmüller states that in the Talmud (*Tract Shebüth*, cap. ix., § 1) the rue is indeed mentioned amongst kitchen herbs (*asparagus portulacæ et coriandro*); but, at the same time, it is there expressly stated, that it is tithe free, it being one of those herbs which are not cultivated in gardens, according to the general rule established in the Talmud.' Celsius long previously observed with reference to this fact: 'Cum autem dicunt ibidem, rutam a decimatione immunem esse, ostendunt, quantum recesserint a consuetudine majorum, quos decimas ex ruta separasse, ipsum affirmat os veritatis' (*Hierobot.* ii. p. 253). —

J. F. R.

PEKAH (פֶּקַח, *open-eyed;* Sept. Φακέε), the officer who slew Pekahiah and mounted the throne in his stead (B.C. 758), becoming the eighteenth king of Israel. He reigned twenty years. Towards the close of his life (but not before the seventeenth year of his reign) he entered into a league with Rezin, king of Damascene-Syria, against Judah; and the success which attended their operations induced Ahaz to tender to Tiglath-pileser, king of Assyria, his homage and tribute, as the price of his aid and protection. The result was that the kings of Syria and Israel were soon obliged to abandon their designs against Judah in order to attend to their own dominions, of which considerable parts were seized and retained by the Assyrians. Israel lost all the territory east of the Jordan, and the two and a half tribes which inhabited it were sent into exile. These disasters seem to have created such popular discontent as to give the sanction of public opinion to the conspiracy headed by Hoshea, in which the king lost his life (2 Kings xv. 25, sq.; xvi. 5, sq.; Isa. vii.; viii. 1-9; xvii. 1-11).



PEKAHIAH (פְּקַחְיָה, *Jehovah has opened his eyes;* Sept. Φακεσίας, Φακείας), son and successor of Menahem, king of Israel, who began to reign in B.C. 760. He patronized and supported the idolatry of the golden calves; and after an undistinguished reign of two years, Pekah, one of his generals, conspired against him, and with the aid of Argob and Arish, and fifty Gileadites, slew him in the haram of his own palace (2 Kings xv. 22-25).

PELEG, son of Eber, and fourth in descent from Shem. His name, פֶּלֶג, means *division*, and is said to have been given him 'because in his days the earth was divided' (Gen. x. 25; xi. 16); concerning which see NATIONS, DISPERSION OF.

PELICAN. קָאַת *kaath;* Syriac, *kaka;* Arabic and Talmuds, *kuk* and *kik*.

The name *kaath* is supposed to be derived from the action of throwing up food, which the bird really effects when discharging the contents of the bag beneath its bill. But it may be suggested, as not unlikely, that all the above names are imitative of the voice of the pelican, which, although seldom heard in captivity, is uttered frequently at the periods of migration, and is compared to the braying of an ass. It may be likewise that this characteristic has influenced several translators of the Hebrew text in substituting on some, or on all occasions, where *kaath* occurs, bittern for pelican, but we think without sufficient reason [KEPHOD; BITTERN]. *Kaath* is found in Lev. xi. 18; Deut. xiv. 17; Ps. cii. 6; Isa. xxxiv. 11; Zeph. ii. 14.

Pelicans are chiefly tropical birds, equal or superior in bulk to the common swan: they have powerful wings; fly at a great elevation; are partially gregarious; and though some always remain in their favourite subsolar regions, most of them migrate in our hemisphere with the northern spring, occupy Syria, the lakes and rivers of temperate Asia, and extend westward into Europe up the

449.

Danube into Hungary, and northward to some rivers of southern Russia. They likewise frequent salt-water marshes, and the shallows of harbours, but seldom alight on the open sea, though they are said to dart down upon fish from a considerable height.

The face of the pelican is naked; the bill long,

broad, and flat, is terminated by a strong crooked and crimson-coloured nail, which, when fish is pressed out of the pouch, and the bird is at rest, is seen reposing upon the crop, and then may be fancied to represent an ensanguined spot. This may have occasioned the fabulous tale which represents the bird as wounding her own bared breast to revive its young brood; for that part of the bag which is visible then appears like a naked breast, all the feathers of the body being white or slightly tinged with rose colour, except the great quills, which are black. The feet have all the toes united by broad membranes, and are of a nearly orange colour. *Pelicanus onocrotalus*, the species here noticed, is the most widely-spread of the genus, being supposed to be identical at the Cape of Good Hope and in India, as well as in western Asia. It is very distinctly represented in ancient Egyptian paintings, where the birds are seen in numbers congregated among reeds, and the natives collecting basketfuls of their eggs. They still frequent the marshes of the Delta of the Nile, and the islands of the river high up the country, and resort to the lakes of Palestine, excepting the Dead Sea. With regard to the words 'of the wilderness or desert,' often added to the pelican's name in consequence of their occurrence in Ps. cii. 6, there is not sufficient ground to infer from them any peculiar capability in the genus to occupy remote solitudes; for they live on fish, and generally nestle in reedy abodes; and man, in all regions, equally desirous to possess food, water, and verdure, occupies the same localities for the same reasons. We think the Psalmist refers to one isolated by circumstances from the usual haunts of these birds, and casually nestling among rocks, where water, and consequently food, begins to fail in the dry season, as is commonly the case eastward of the Jordan—such a supposition offering an image of misery and desolation forcibly applicable to the context.—C. H. S.

PELITHITES. [Cherethites and Pelithites.]

PEN. [Writing.]

PENIEL (פְּנִיאֵל, *face of God;* Sept. Εἶδος Θεοῦ), or Penuel, a place beyond the Jordan, where Jacob wrestled with the angel, and 'called the name of the place Peniel; for I have seen God face to face, and my life is preserved' (Gen. xxxii. 30). There was in after-times a fortified town in this place, the inhabitants of which exposed themselves to the resentment of Gideon, for refusing succour to his troops when pursuing the Midianites (Judg. viii. 8). The site is not known; but it must have been at some point on or not far from the north bank of the Jabbok. Men of this name occur in 1 Chron. iv. 4; viii. 25.

PENINNAH (פְּנִנָּה, *coral;* Sept. Φεννάνα), one of the two wives of Elkanah, the father of Samuel (1 Sam. i. 2).

PENNY. [Drachma; Denarius.]

PENTATEUCH is the title given to the five books of Moses. The Jews usually call the Pentateuch התורה, *the law;* or, more fully, חמשה חומשי התורה, *the five-fifths of the law.* This title again has been abbreviated into חמשין, for the whole, and חומש, for a single book of the Pentateuch. In Greek its usual appellations are ὁ νόμος, and πεντάτευχος. The word τεῦχος occurs in the later Alexandrian writers in the signification of *volumen.* The division into five books is alluded to in the works of Josephus and Philo. It seems that this division was first made by the Alexandrian critics. In Jewish writers are found statements indicating that the Pentateuch was formerly divided into seven portions (comp. Jarchi, *ad Proverb.* ix. 1; *ibique* Breithaupt).

In the Jewish canon the Pentateuch is kept somewhat distinct from the other sacred books of the Old Testament, because, considered with reference to its contents, it is the book of books of the ancient covenant. It is the basis of the religion of the Old Testament, and of the whole theocratical life. The term law characterizes the principal substance of the Pentateuch, but its real kernel and central point is the foundation of the Jewish theocracy, the historical demonstration of that peculiar communion into which the God of heaven and earth entered with one chosen people, through the instrumentality of Moses; the preparation for, and the development of, that communion; the covenant relation of Jehovah and Israel, from its first rise down to its complete termination. In considering the Pentateuch, the first question which arises is—Who was its author? It is of great importance to hear first, what the book itself says on this subject. The Pentateuch does not present itself as an anonymous production. It is manifestly intended and destined to be a public muniment for the whole people, and it does not veil its origin in a mysterious obscurity; on the contrary the book speaks most clearly on this subject.

According to Exod. xvii. 14, Moses was commanded by God to write the victory over the Amalekites *in the book* (בספר). This passage shows that the account to be inserted was intended to form a portion of a more extensive work, with which the reader is supposed to be acquainted. It also proves that Moses, at an early period of his public career, was filled with the idea of leaving to his people a written memorial of the Divine guidance, and that he fully understood the close and necessary connection of an authoritative law with a written code, or זכרון. It is, therefore, by no means surprising that the observation repeatedly occurs, that Moses wrote down the account of certain events (Exod. xxiv. 4, 7; xxxiv. 27, 28; Num. xxxiii. 2). Especially important are the statements in Deut. i. 5; xxviii. 58. In Deut. xxxi. 9, 24 (30) the whole work is expressly ascribed to Moses as the author, including the poem in Deut. xxxii. It may be made a question whether the hand of a later writer, who finished the Pentateuch, is perceptible from ch. xxxi. 24 (comp. xxxiii. 1, and xxxiv.), or whether the words in xxxi. 24-30 are still the words of Moses. In the former case we have two witnesses, viz. Moses himself, and the continuator of the Pentateuch; in the latter case, which seems to us the more likely, we have the testimony of Moses alone.

Modern criticism has raised many objections against these statements of the Pentateuch relative to its own origin. Many critics suppose that they can discover in the Pentateuch indications that the author intended to make himself known as a person different from Moses. The

most important objection is the following: that the Pentateuch, speaking of Moses, always uses the third person, bestows praise upon him, and uses concerning him expressions of respect. The Pentateuch even exhibits Moses quite objectively in the blessing recorded in Deut. xxxiii. 4, 5.

To this objection we reply, that the use of the third person proves nothing. The later Hebrew writers also speak of themselves in the third person. We might adduce similar instances from the classical authors, as Cæsar, Xenophon, and others. The use of the third person, instead of the first, prevails also among Oriental authors. In addition to this we should observe, that the nature of the book itself demands the use of the third person, in reference to Moses, throughout the Pentateuch. This usage entirely corresponds with the character both of the history and of the law contained in the Pentateuch. By the use of the word I, the objective character of this history would have been destroyed, and the law of Jehovah would have been brought down to the sphere of human subjectivity and option. If we consider that the Pentateuch was destined to be a book of divine revelation, in which God exhibited to his people the exemplification of his providential guidance, we cannot expect that Moses, by whom the Lord had communicated his latest revelations, should be spoken of otherwise than in the third person. In the poetry contained in Deut. xxxiii. 4, Moses speaks in the name of the people, which he personifies and introduces as speaking. The expressions in Exod. xi. 3, and Num. xii. 3 and 7, belong entirely to the context of history, and to its faithful and complete relation; consequently it is by no means vain boasting that is there expressed, but admiration of the divine mercy glorified in the people of God. In considering these passages we must also bear in mind the far greater number of other passages which speak of the feebleness and the sins of Moses.

It is certain that the author of the Pentateuch asserts himself to be Moses. The question then arises, whether it is POSSIBLE to consider this assertion to be true—whether Moses CAN be admitted to be the author? In this question is contained another, viz. whether the Pentateuch forms such a continuous whole that it is possible to ascribe it to one author? This question has been principally discussed in modern criticism. In various manners it has been tried to destroy the unity of the Pentateuch, and to resolve its constituent parts into a number of documents and fragments (comp. here especially the article GENESIS). Eichhorn and his followers assert that GENESIS only is composed of several ancient documents. This assertion is still reconcileable with the Mosaical origin of the Pentateuch. But Vater and others allege that the whole Pentateuch is composed of fragments; from which it necessarily follows that Moses was not the author of the whole. Modern critics are, however, by no means unanimous in their opinions. The latest writer on this subject, Ewald, in his history of the people of Israel (*Geschichte des Volkes Israel*, vol. i. Göttingen, 1843), asserts that there were seven different authors concerned in the Pentateuch. On the other hand, the internal unity of the Pentateuch has been demonstrated in many able essays. The attempts at division are especially supported by an appeal to the prevailing use of the different names of God in various portions of the work; but the arguments derived from this circumstance have been found insufficient to prove that the Pentateuch was written by different authors (comp. the articles GENESIS, EXODUS, LEVITICUS, NUMBERS, and DEUTERONOMY).

The inquiry concerning the unity of the Pentateuch is intimately connected with its HISTORICAL CHARACTER. If there are in the Pentateuch decided contradictions, or different contradictory statements of one and the same fact, not only its unity but also its historical truth would be negatived. On the other hand, if the work is to be considered as written by Moses, the whole style and internal veracity of the Pentateuch must correspond with the character of Moses. Considerate critics, who are not under the sway of dogmatic prejudices, find that the passages which are produced in order to prove that the Pentateuch was written after the time of Moses, by no means support such a conclusion, and that a more accurate examination of the contents of the separate portions discovers many vestiges demonstrating that the work originated in the age of Moses (compare here again the articles on the separate books).

The general arguments for and against the authenticity of the Pentateuch, which are here still to be considered separately, are the following:—

The history of the art of writing among the Hebrews has often been appealed to in order to disprove the authenticity of the Pentateuch. It is true that in our days no critic of good repute for learning, ventures any longer to assert that the art of writing was invented subsequent to the Mosaical age (Ewald's *Geschichte des Volkes Israel*, p. 64, sq.); but it is questioned whether the Hebrews were acquainted with that art. Such a doubt proceeds from erroneous ideas concerning the condition of this people, and concerning the civilization necessarily imparted to them in Egypt. The reality of this civilization is proved by indubitable testimony. It is said that a work of such extent as the Pentateuch was beyond the means of the primitive modes of writing then existing. But various testimonies, not merely in the Pentateuch itself, but also derived from other sources, from the period immediately subsequent to that of Moses, prove that a knowledge of the art of writing was widely diffused among the Hebrews (comp. Judges viii. 14). And if there was any knowledge of this art, its application would entirely depend upon the particular circumstances of a given period. Some writers seem to entertain the opinion that the materials for writing were yet, in the days of Moses, too clumsy for the execution of larger works. This opinion is refuted by the fact, that the Hebrews became acquainted, just in the Mosaical period, with the use of very good materials for writing, such as papyrus, byssus, parchment, &c. (comp. Herodotus, v. 58). There are, indeed, mentioned in the Pentateuch some more solid materials for writing, such as tables of stone (Exod. xxiv. 12, xxxi. 18, xxxiv. 1, &c.); but this does not prove that in those days nothing was written except upon stone. Stone was employed, on account of its durability, for specific purposes.

The language of the Pentateuch has also been the subject of many discussions. It has frequently been urged that it differs less from that of the later books of the Old Testament than might have been

expected if this work proceeded from Moses. In this objection the characteristic stability of the Oriental languages has been overlooked. The Oriental languages are not, in the same degree as the Occidental, in a state of development and constant change. It is also overlooked that the Pentateuch itself, by its high authority, exerted a constant influence upon the whole subsequent religious literature of the Hebrews. And we do not know any other literature of the ancient Hebrews except the religious. In addition to this we must observe that, nevertheless, the style of the Pentateuch has its distinctive features of antiquity.

The Pentateuch contains a number of characteristic GRAMMATICAL FORMATIONS; such are, for instance, the use of the pronoun הוא as a feminine also, the form האל for אלה; נחנו; the forms of the imperatives in Gen. iv. 23, Exod. ii. 20, the word נער as a feminine for נערה.

The Pentateuch contains also WORDS which do not occur in the other parts of the Old Testament, such as מין, *species;* קבב, *to curse*, for נקב; כשׂב, *lamb*, for כבש; רכש and רכוש in the signification of *property*.

There occur also characteristic PHRASES, as, *their shade* (צלם) *is departed from them;* i.e. *they are defenceless* (Num. xiv. 9); *he was gathered to his people*, עמיו; *the agreeable odour, or sweet savour*, of the sacrifice, ריח הניחח; *to cover the eye of the earth*, עין הארץ (Exod. x. 5, 15; Num. xxii. 5, 11, &c.).

Others have vainly endeavoured to find in the Pentateuch, and especially in Deuteronomy, vestiges of a later style. The instances produced by the opponents of the Mosaical origin of the Pentateuch do not stand examination, and are, therefore, unable to counterbalance the weight of argument deducible from the antique expressions in the Mosaical writings.

Lastly, the historical contents of the Pentateuch are of very great importance in our present inquiry, because they constantly bear testimony in favour of its age and authenticity, and lead to the following important results. We find, in later times, no period which we could deem capable of producing the Pentateuch as a whole: for this reason, the opponents of its authenticity are obliged to ascribe the different portions of the work to widely different periods. If we allow that the apostles were such persons as they assert themselves to be, we must admit also that the very frequent apostolical allusions to the Pentateuch are a high sanction to the work; and we cannot overlook the fact, that every opinion which, with greater or less decision, finds in the Pentateuch a work of fraud, enters into an unavoidable conflict with the New Testament itself.

In the remote times of Jewish and Christian antiquity, we find no vestiges of doubt as to the genuineness of the Mosaical books. The Gnostics, indeed, opposed the Pentateuch, but attacked it merely on account of their dogmatical opinions concerning the Law, and Judaism in general; consequently they did not impugn the authenticity, but merely the divine authority, of the Law. Heathen authors alone, as Celsus and Julian, represented the contents of the Pentateuch as being mythological, and paralleled them with Pagan mythology.

In the middle ages, but not earlier, we find some very concealed critical doubts in the works of some Jews—as Isaac Ben Jasos, who lived in the eleventh century, and Aben Ezra. After the reformation, it was sometimes attempted to demonstrate the later origin of the Pentateuch. Such attempts were made by Spinoza, Richard Simon, Le Clerc, and Van Dale; but these critics were not unanimous in their results. Against them wrote Heidegger (*Exercitationes Biblicæ*, i. 246, sq.); Witsius (*Miscellanea Sacra*, i. 103, sq.); and Carpzov (*Introductio*, i. 38, sq.).

In the period of English, French, and German deism, the Pentateuch was attacked rather by jests than by arguments. Attacks of a more scientific nature were made about the end of the eighteenth century. But these were met by such critics as John David Michaelis and Eichhorn, who energetically and effectually defended the genuineness of the Pentateuch. These critics, however, on account of their own false position, did as much harm as good to the cause of the Pentateuch.

A new epoch of criticism commences about the year 1805. This was produced by Vater's *Commentary* and De Wette's *Beiträge zur Einleitung in das alte Testament*. Vater embodied all the arguments which had been adduced against the authenticity of the Pentateuch, and applied to the criticism of the sacred books the principles which Wolf had employed with reference to the Homeric poems. He divided the Pentateuch into fragments, to each of which he assigned its own period, but referred the whole generally to the age of the Assyrian or Babylonian exile. Since the days of Vater, a series of the most different hypotheses has been produced by German critics about the age of the Pentateuch, and that of its constituent sections. No one critic seems fully to agree with any other; and frequently it is quite evident that the opinions advanced are destitute of any sure foundation—that they are quite arbitrary, and produced by merely subjective motives. We will illustrate this by a few examples relative to the Pentateuch as a whole.

Schumann makes Ezra the author of the law. According to A. T. Hartmann the separate portions of the law sprang up gradually, some of them as late as the exile; but he does not show by what circumstances they were combined into a whole. According to Dr. Ammon, the Pentateuch was planned by Moses; was gradually continued down to the times of Solomon; was entirely forgotten during the period of idolatry; was rediscovered under the reign of Josiah; and was then retouched, and edited under the name of Moses. Von Bohlen urges the fact mentioned in the second Book of Kings (ch. xxii.), as if it were explanatory of the origin of Deuteronony; but he considers some portions to be of a much later origin. He asserts that the Pentateuch was partly written after the exile, that it was gradually developed, and was brought to a conclusion in the age of Christ. According to the latest statements of De Wette, in his *Einleitung in das alte Testament*, § 157, sq., the ELOHIM portions were written in the age of Samuel and Saul, the JEHOVAH portions nearly about the same period, but Deuteronomy much later, under Josiah. Ewald assigns seven authors to the Pentateuch, who, how-

ever, wrote in very different periods. The first, he supposes, wrote in the days of Samson; the second in the reign of Solomon; the third in the reign of Elijah, &c.

The critical doubts respecting the authenticity of the Pentateuch have produced in modern times several works in defence of its genuineness; such as Kanne's *Biblischer Untersuchungen*, 2 vols., 1820; the observations by Jahn, Rosenmüller, and Bleek; Ranke's *Untersuchungen über den Pentateuch*, 2 vols.; Hengstenberg's *Beiträge zur Einleitung*, vols. 2 and 3; Hävernick's *Einleitung in das alte Testament*, vol. 1; Drechsler, *Ueber die Einheit und Authentie der Genesis*; König's *Alt-testamentliche Studien*, 2d number; Sack's *Apologetik*, &c.

The most important commentaries and exegetical aids for the explanation of the whole Pentateuch, and its constituent parts, are the following:—Calvini Bonfrerii *Pentateuchus Commentario Illustratus*, 1625; Marckii *Commentarius in præcipuas quasdam Pentateuchi partes*, 1721; Clerici *Commentarius*, 1710; Gerhardi *Commentarius in Genesin*, 1693; Merceri *Commentarius in Genesin*, 1593; Vater, *Commentar über den Pentateuch*, 1802, sq., 3 vols.; Rosenmulleri *Scholia*, 3d ed., 1821, sq.: Schumann, *Pentateuchus Hebraice et Graece*, tom. 1, 1829; Von Bohlen, *Die Genesis übersetzt und erklärt*, Königsberg, 1825; Tiele, *Das erste Buch Mosis, &c.*, 1st vol., 1836; Tuch, *Commentar über die Genesis*, 1838, &c. The following are the principal English works on the Pentateuch:—Ainsworth, *Annotations on the Five Books of Moses*, 1699; Kidder, *Commentary on the Five Books of Moses*, 1713; Parker, *Bibliotheca Biblica*, 1720, 1735; Jamieson, *Critical and Practical Exposition of the Pentateuch*, 1748; Robertson, *Clavis Pentateuchi*, 1770; Graves, *Lectures on the Pentateuch*, 1815.

—H. A. C. H.

PENTECOST (Πεντηκοστή), the name (signifying fiftieth) given in the New Testament to the Feast of Weeks, or of Ingathering, which was celebrated on the *fiftieth* day from the festival of unleavened bread, or the Passover; or seven weeks from the 16th day of Nisan. It was a festival of thanks for the harvest, and commenced immediately after the Passover [Festivals]. It was one of the three great yearly festivals, in which all the males were required to appear before God at the place of his sanctuary. Josephus states that in his time great numbers of Jews resorted from every quarter to Jerusalem to keep this festival (*Antiq.* xiv. 13, 4; xvii. 10, 2; *De Bell. Jud.* ii. 3, 1). This testimony affords interesting corroboration of Acts ii. 1, 9-11; xx. 16; 1 Cor. xvi. 8, in which the same fact appears. The commencement of the Christian church on the day of Pentecost, preceded as it was by our Lord's ascension, attached a peculiar interest to this season, and eventually led to its being set apart for the commemoration of these great events. It was not, however, established as one of the great festivals until the fourth century. The combination of two events (the Ascension and the descent of the Holy Ghost) in one festival has a parallel in the original Jewish feast, which is held to have included the feast of first-fruits, and of the delivering of the law (Exod. xxiii. 16; Lev. xxiii. 14-21; Num. xxviii. 26). Indeed, this festival in some respects bears a close analogy to the Jewish one; and is evidently little more than a modification of it. The converts of that day, on which the Holy Ghost descended, were the *first fruits* of the Spirit. Jerome (*Ad Tabiol*, § 7) elegantly contrasts this with the giving of the law on Mount Sinai: 'Utraque facta est quinquagessimo die, a Paschate; illo, in Sina; hæc, in Sion. Ibi terræ motu contremuit mons; hic, domus apostolorum. Ibi, inter flammas ignium et micantia fulgura, turbo ventorum, et fragor tonitruorum personuit; hic, cum igneārum visione linguarum sonitus pariter de cœlo, tanquam spiritus vehementis adversit. Ibi, clangor buccinæ, legis verba perstrepuit; hic, tuba evangelica apostolorum ore intonuit.' This festival became one of the three baptismal seasons (Tertull. *De Baptis.* c. 19; Hieron., *in Zaeh.* xiv. 8); and it derives its name of Whitsunday, or white-Sunday, from so many being clad in white on this the day of their baptism.

1. PEOR (פְּעוֹר; Sept. Φογώρ), a mountain in the land of Moab (Num. xxiii. 28). Eusebius places it between Livias and Esbus, over against Jericho; which shows that it was not supposed to be east of the Dead Sea, as usually stated (*Onomast.* s. v. Ἀραβώθ Μωάβ). It has not in modern times been recognised.

2. PEOR, an idol [Baal-Peor].

PERES (פֶּרֶס, in our versions 'ossifrage' Lev. xi. 13; Deut. xiv. 12). Although *Neser* is unquestionably the Hebrew name of the eagle, a genus so conspicuous, and to this moment so common in Palestine, probably possessed more than one designation in the national dialects of the country, and under the term ossifrage it would indicate the great sea eagle. But *Peres* is by other translators referred to a hawk, which they denominate *Accipiter*, although before scientific ornithology had defined it to mark a particular species, it had, as in antiquity, been generalized and understood to mean any predaceous bird. Ælian notices *Accipitres* equal in size to eagles, and these included both the ospray and ossifrage. But these names have received specific determinations only since ornithologists have more strictly distinguished genera and species; for originally they were identical; our ospray being derived from the French *Orfrai*, which is itself a mere euphonious pronunciation of *ossifrage*, introduced during the polishing of Gallo-Frankish into the modern idiom. Their scientific application, however, has been referred to two birds; osprey being the *Pandion Haliaëtus*, 'the fishing hawk,' and ossifrage the *Aquila Ossifraga* of Brisson, or 'great sea eagle' of Pennant; authors having even pretended that fragments of bones have been found in the stomach of the last mentioned. If this fact were proved, it would justify the denomination of ossifrage, or 'bone-breaker;' but the dispensation of faculties in nature always indicates a purpose, which in the case of the *Pandion*, living as it does exclusively upon fish, appears inapplicable; for theirs are not the bones understood by the name, and such as the bird accidentally swallows are small and without nutriment. With regard to the sea eagle, which subsists mostly on the same diet, or on carrion, and only by chance on birds, whose bones in all genera are very hard, destitute of marrow, and likewise without nutritious matter, the

case is nearly the same. Finally, breaking the bones must be effected by the beak, which is strong indeed, but only formed to strike, tear, or hold, not to masticate; and if the bones are broken for that purpose, where are they to be found? in the crop, the succentorial ventricle, or in the gizzard?—organs in birds of prey far from vigorous, or so well defined as they are in other orders of the class, particularly in Gallinaceæ. Thus, there is in nature no such bird as one that breaks the bones of warm-blooded animals in order to swallow them; consequently, no identification can be made with any of the sea eagles. But when we place together *Peres*, a name derived from a root denoting 'to crush' or 'break,' and find that by the Greek name φήνη (*Phene*), the Hellenic nations called the Lämmer Geyer of the Swiss, which Savigny (*Oiseaux d'Egypte et de Syrie*) has proved to be the ossifrage of the Romans; then it becomes an immediate question, why such a denomination should have been bestowed. The answer is, we think, satisfactory; for constituting the largest flying bird of the old continent, and being a tenant of the highest ranges of mountains in Europe, western Asia, and Africa, though sometimes feeding on carrion, and not appearing to take up prey like eagles in the talons, it pursues the chamois, young ibex, mountain deer, or marmot, among precipices, until it drives, or by a rush of its wings, forces the game over the brink, to be dashed to pieces below, and thus deservedly obtained the name of bone-breaker.

The species in Europe is little if at all inferior in size to the *Condor* of South America, measuring from the point of the bill to the end of the tail four feet two or three inches, and sometimes ten feet in the expanse of wing; the head and neck are not, like those of vultures, naked, but covered with whitish narrow feathers; and there is a beard of bristly hair under the lower mandible: the rest of the plumage is nearly black and brown, with

450. [Gypaetos Barbatus.]

some whitish streaks on the shoulders, and an abundance of pale rust colour on the back of the neck, the thighs, vent, and legs; the toes are short, and bluish, and the claws strong. In the young the head and neck are black, and the species or variety of Abyssinia appears to be rusty and yellowish on the neck and stomach. It is the griffon of Cuvier, *Gypaëtos barbatus* of nomenclators, and γρύψ of the Seventy. The Arabs, according to Bruce, use the names Abou-Duch'n and Nisser-Werk, which is a proof that they consider it a kind of eagle, and perhaps confound this species with the great sea eagle, which has likewise a few bristles under the throat; and commentators, who have often represented *Peres* to be the black vulture, or a great vulture, were only viewing the *Gypaëtos* as forming one of the order *Accipitres*, according to the Linnæan arrangement, where *Vultur barbatus* (*Syst. Nat.*) is the last of that genus, although in the 13th edition (by Gmelin), we find the name changed to *Falco barbatus*, and located immediately before *F. Albicilla*, or the sea eagle, showing that until a still more accurate classification placed the species in a separate genus, ornithologists had no determined idea of the true place it should occupy, and consequently by what generical appellation it was to be distinguished.—C. H. S.

PEREZ-UZZAH, a place in the neighbourhood of Jerusalem, which obtained this name (meaning 'breach of Uzzah') from the judgment inflicted upon Uzzah for rashly handling the ark (2 Sam. vi. 8; 1 Chron. xiii. 11).

PERFUMES. In the article Anointing we have noticed the use of perfumes in Eastern countries; and in the botanical articles all the aromatic substances mentioned in Scripture are carefully examined. Here, therefore, we have only to add a few remarks, which the scope of those articles does not embrace.

The practice of producing an agreeable odour by fumigation, or burning incense, as well as that of anointing the person with odoriferous oils and ointments, and of sprinkling the dress with fragrant waters, originated in, and is confined to, warm climates. In such climates perspiration is profuse, and much care is needful to prevent the effects of it from being offensive. It is in this necessity we may find the reason for the use of perfumes, particularly at weddings and feasts, and on visits to persons of rank; and in fact on most of the occasions which bring people together with the intention of being agreeable to one another.

The ointments and oils used by the Israelites were rarely simple, but were compound of various ingredients (Job xli. 22; comp. Plin. *Hist. Nat.* xxix. 8). Olive oil, the valued product of Palestine (Deut. xxviii. 40; Mic. vi. 15), was combined with sundry aromatics, chiefly foreign (1 Kings x. 10; Ezek. xxvii. 22), particularly bosem, myrrh, and nard [see these words]. Such ointments were for the most part costly (Amos vi. 6), and formed a much-coveted luxury. The ingredients, and often the prepared oils and resins in a state fit for use, were obtained chiefly in traffic from the Phœnicians, who imported them in small alabaster boxes [Alabaster], in which the delicious aroma was best preserved. A description of the more costly unguents is given by Pliny (*Hist. Nat.* xiii. 2). The preparation of these required peculiar skill, and therefore formed a particular profession. The רקחים *rokechim* of Exod. xxx. 25, 35; Neh. iii. 8; Eccles. x. 1, called 'Apothecary' in the Auth. Vers., was no other than a maker of perfumes. So strong were the better kinds of ointments, and so perfectly were the different component substances amalgamated, that they have

been known to retain their scent several hundred years. One of the alabaster vases in the museum at Alnwick Castle contains some of the ancient Egyptian ointment, between two and three thousand years old, and yet its odour remains (Wilkinson, *Anc. Egyptians*, ii. 314).

The 'holy anointing oil,' employed in the sacerdotal unction, was composed of two parts 'myrrh' [Mur], two parts 'cassia' [Kiddah], one part 'cinnamon' [Kinnamon], one part 'sweet calamus' [Kaneh Bosem], compounded 'according to the art of the perfumer,' with a sufficient quantity of the purest olive oil to give it the proper consistence (Exod. xxx. 23, 25). It was strictly forbidden that any perfume like this, that is, composed of the same ingredients, should be used for common purposes, or indeed made at all (xxx. 32, 33); and we cannot but admire the course adopted in order to secure the object contemplated by the law. The composition was not preserved as a secret, but was publicly declared and described, with a plain prohibition to make any like it. Maimonides says that doubtless the cause of this prohibition was, that there might be no such perfume found elsewhere, and consequently that a greater attachment might be induced to the sanctuary; and also, to prevent the great evils which might arise from men esteeming themselves more excellent than others, if allowed to anoint themselves with a similar oil (*More Nevochim*, ch. xx.). The reasons for attaching such distinction to objects consecrated by their holy appropriations, are too obvious to need much elucidation.

The prodigious quantity of this holy ointment made on the occasion which the text describes, being no less than 750 ounces of solids compounded with five quarts of oil, may give some idea of the profuse use of perfumes among the Hebrews. We are, indeed, told by the Psalmist (cxxxiii. 2), that when the holy anointing oil was poured upon the head of Aaron, it flowed down over his beard and dress, even to the skirts of his garments. This circumstance may give some interest to the following anecdote, which we translate from Chardin (*Voyages*, iv. 43, edit. Langles). After remarking how prodigal the eastern females are of perfumes, he gives this instance: 'I remember that, at the solemnization of the nuptials of the three princesses royal of Golconda, whom the king, their father, who had no other children, married in one day, in the year 1679, perfumes were lavished on every invited guest as he arrived. They sprinkled them upon those who were clad in white; but gave them into the hands of those who wore coloured raiment, because their garments would have been spoiled by throwing it over them, which was done in the following manner. They threw over the body a bottle of rose-water, containing about half a pint, and then a larger bottle of water tinted with saffron, in such a manner that the clothes would have been stained with it. After this, they rubbed the arms and the body with a liquid perfume of ladanum and ambergris, and they put round the throat a thick cord of jasmine. I was thus perfumed with saffron in many great houses of this country, and in other places. This attention and honour is a universal custom among the women who have the means of obtaining this luxury.'

PERGA (Πέργη), a town of Pamphylia, in Asia Minor, situated upon the river Cestrus, sixty stades from its estuary. On a hill near the town stood a celebrated temple of Artemis, at which the inhabitants of the surrounding country held a yearly festival in honour of the goddess. Perga was originally the capital of Pamphylia; but when that province was divided into two, Side became the chief town of the first, and Perga of the second Pamphylia (Strabo, xiv. p. 667; Pliny, *Hist. Nat.* v. 26; Pomp. Mela, i. 14; Cic. *Verr.* i. 30). The apostle Paul was twice at this place (Acts xiii. 13; xiv. 25). In the first instance he seems to have *landed* at Perga, and the Cestrus was then, in fact, navigable to the town, although the entrance to the river is now impassable, having long been closed by a bar. The site has been established by Col. Leake, as that where extensive remains of vaulted and ruined buildings were observed by General Köhler on the Cestrus, west of Stavros. It is called by the Turks Eski-kalesi.

PERGAMOS (Πέργαμος), or Pergamum, a town of the Great Mysia, the capital of a kingdom of the same name, and afterwards of the Roman province of Asia Propria. The river Caicus, which is formed by the union of two branches meeting thirty or forty miles above its mouth, waters an extensive valley not exceeded in natural beauty and fertility by any in the world. In this valley, in N. lat. 39° 4′, E. long. 27° 12′, stood Pergamos, at the distance of about twenty miles from the sea. It lay on the north bank of the Caicus, at the base and on the declivity of two high and steep mountains, on one of which now stands a dilapidated castle. About two centuries before the Christian era, Pergamos became the residence of the celebrated kings of the family of Attalus, and a seat of literature and the arts. King Eumenes, the second of the name, greatly beautified the town, and increased the library of Pergamos so considerably that the number of volumes amounted to 200,000. As the papyrus shrub had not yet begun to be exported from Egypt, sheep and goat skins, cleaned and prepared for the purpose, were used for manuscripts; and as the art of preparing them was brought to perfection at Pergamos, they, from that circumstance, obtained the name of pergamena, or parchment. The library remained at Pergamos after the kingdom of the Attali had lost its independence, until Antony removed it to Egypt, and presented it to Queen Cleopatra. (Pliny, *Hist. Nat.* iii. 2; Plutarch, *Anton.*). The valuable tapestries, called in Latin aulæa, from having adorned the hall of King Attalus, were also wrought in this town. The last king of Pergamos bequeathed his treasures to the Romans, who took possession of the kingdom also, and erected it into a province under the name of Asia Propria (Martial, *Epig.* ix. 17). Pergamos retained under the Romans that authority over the cities of Asia, which it had acquired under the successors of Attalus, and it still preserves many vestiges of its ancient magnificence. Remains of the Asclepium and of some other temples, of the theatre, stadium, amphitheatre, and several other buildings, are still to be seen. Even now, Pergamos, under the name of Bergamo, is a place of considerable importance, containing a

population estimated at 14,000, of whom about 3000 are Greeks, 300 Armenians, and the rest Turks (Macfarlane's *Visit*). The writer just cited says, 'The approach to this ancient and decayed city was as impressive as well might be. After crossing the Caicus, I saw, looking over three vast tumuli, or sepulchral barrows, similar to those of the plains of Troy, the Turkish city of Pergamos, with its tall minarets and taller cypresses, situated on the lower declivities and at the foot of the Acropolis, whose bold gray brow was crowned by the rugged walls of a barbarous castle, the usurper of the site of a magnificent Greek temple.' The town consists for the most part of small and mean wooden houses, among which appear the remains of early Christian churches, showing 'like vast fortresses amid vast barracks of wood.' None of these churches have any Scriptural or Apocalyptic interest connected with them, having been erected 'several centuries after the ministry of the apostles, and when Christianity was not a humble and despised creed, but the adopted religion of a vast empire.' The Pagan temples have fared worse that these Christian churches. 'The fanes of Jupiter and Diana, of Æsculapius and Venus, are prostrate in the dust; and where they have not been carried away by the Turks, to cut up into tombstones or to pound into mortar, the Corinthian and Ionic columns, the splendid capitals, the cornices and pediments, all in the highest ornament, are thrown into unsightly heaps.'

451. [Pergamos.]

In Pergamos was one of 'the seven churches of Asia,' to which the Apocalypse is addressed. This church is commended for its fidelity and firmness in the midst of persecutions, and in a city so eminently addicted to idolatry. 'I know,' it is said, 'thy works, and *where thou dwellest, even where Satan's seat is*' (Rev. ii. 13). Now there was at Pergamos a celebrated and much frequented temple of Æsculapius, who probably there, as in other places, was worshipped in the form of a living serpent, fed in the temple, and considered as its divinity. Hence Æsculapius was called the god of Pergamos, and on the coins struck by the town, Æsculapius appears with a rod encircled by a serpent (Berger, *Thesaur.*, i. 492). As the sacred writer mentions (Rev. xii. 9) the great dragon and the old serpent, there is reason to conclude that when he says in the above passage, that the church of Pergamos dwelt 'where Satan's seat is,' he alludes to the worship of the serpent, which was there practised (Rosenmüller, *Bib. Geog.* iii. 13-17; Macfarlane, *Visit to the Seven Apocalyptic Churches*, 1832: Arundell's *Asia Minor*, ii. 302-7; Leake's *Geog. of Asia Minor*, pp. 265, 266; Richter, *Wallfahrten*, p. 488, sq.; Schubert, *Reise ins Morgenland; Missionary Herald* for 1839, pp. 228-30).

PERIZZITE (פְּרִזִּי; Sept. Φερεζαῖος), a Canaanitish tribe inhabiting the mountainous region which they eventually yielded to Ephraim and Judah (Josh. xi. 3; xvii. 15; Judg. i. 4, 5). They were kindred to the Canaanites strictly so called (Exod. xxiii. 23; Judg. i. 45): sometimes Canaanites and Perizzites are put for all the other tribes of Canaan (Gen. xiii. 7; xxxiv. 30); while in other places the Perizzites are enumerated with various other tribes of the same stock (Gen. xv. 20; Exod. iii. 8, 17; Deut. vii. 1, &c.). A residue of the Perizzites still remained in the time of Solomon, and were by him subjected to bond-service (1 Kings ix. 20).

PERSIANS, the name of a people and nation which occurs only in the later periods of the biblical history, and then for the most part in conjunction with the Medes [Medes]—a con-

junction which tends to confirm the truth of the sacred records, since the most respectable historical authorities have found reason to conclude that the Medes and Persians were in truth but one nation, only that at an earlier period the Medes, at a later period the Persians, gained the upper hand and bore sway. This ascendancy, in the case of the Persians, as generally in the ancient Asiatic governments, was owing to the corrupting and enervating influence of supreme and despotic power on the one side, and on the other to the retention on the part of mountaineers, or of tribes seated remotely from the centre of the empire, of primitive simplicity,—in laborious lives, hard fare, and constant exposure, which create patient endurance, athletic strength, manly courage, independence: qualities which in their turn refuse or throw off a yoke, and convert a subject into a conquering and ruling nation. At what precise time this great change was brought about in regard to the Medes and Persians, we are not in a condition to determine historically. With Cyrus the elder, however, begins (B.C. 558) the domination of the Persian dynasty which held rule over Media as well as Persia. Whether Cyrus came to the throne by inheritance, as the son-in-law of Cambyses II., according to Xenophon, or whether he won the throne by vanquishing Astyages, the last Median king, agreeably to the statements of Herodotus, is one of those many points connected with early eastern history, which, for want of documents, and in the midst of historical discrepancies, must remain probably for ever uncertain. Meanwhile the existence of Cyrus and the great tenor of his influence remain the same, though on this and on other points historians give irreconcilable statements;—a remark which we make the rather because a certain school of modern theology has attempted to destroy the general historical credibility of the Gospels, on the ground that the several narrators are found to disagree.

The most interesting event to the theologian in the history of Cyrus, is the permission which he gave (B.C. 536) to the captive Jews to return to their native land. After a prosperous reign of the unusual length in Asiatic monarchies of thirty years, Cyrus was gathered to his fathers (B.C. 529). He was succeeded by Cambyses (B.C. 529), who, according to Herodotus, reigned seven years and five months. Then came (B.C. 522) Smerdis, nominally brother of Cambyses, but in reality a Magian; and as the Magi were of Median blood, this circumstance shows that, though the Medes had lost the sovereignty, they were not without great power. Smerdis being assassinated (B.C. 521), Darius Hystaspis was elected king. He favoured the Jews, and permitted them to resume and complete the building of their temple, which had been broken off by reason of jealousy on the part of the heterogeneous populations of Samaria (Ezra iv. 2; 2 Kings xvii. 24), and the influence which they exerted at the Persian court (Ezra iv. 11). The last monarch had for successor Xerxes (B.C. 485), who is probably the Ahasuerus of Esther and Mordecai. After a reign of twenty years, Xerxes was murdered by Artabanus, who, however, enjoyed his booty only for the short period of seven months. The next in order was Artaxerxes (I.) Longimanus (B.C. 465), who enjoyed his power for the surprisingly long period of forty years, and then quietly handed the sceptre over to his son Xerxes II. (B.C. 424), who reigned but two months. He was followed by his step-brother Sogdianus (B.C. 424), whose rule came to an end in seven months; thus making way for Darius Nothus, whose reign lasted nineteen years. Artaxerxes (II.) Mnemon next took the throne (B.C. 404), and is reported to have reigned forty or forty-three years (Diod. Sicul. xiii. 108; xv. 93). His successor was Artaxerxes Ochus (B.C. 364), who occupied the throne for twenty-six years. Then came Arses (B.C. 338), reigning three years. At last Darius Codomannus (B.C. 335) ascended the throne. But the valour, hardihood, and discipline which had gained the dominion, and which, as the length of several reigns in the succession shows, had sustained it with a firm and effectual hand, were almost at an end, having been succeeded by the effeminacy, the luxuriousness, and the vices which had caused the dissolution of earlier Asiatic dynasties, and among them that of the Medes, which the Persians had set aside. When this relaxation of morals has once taken place, a dynasty or a nation only waits for a conqueror. In this case one soon appeared in the person of Alexander, misnamed the Great, who assailing Darius on several occasions, finally overcame him at Arbela (B.C. 330), and so put a period to the Persian monarchy after it had existed for 219 years. On this the country shared the fate that befell the other parts of the world which the Macedonian madman had overrun; but, more fortunate than that of other eastern nations, the name of Persia and of Persians has been preserved even to the present day, as the representative of a people and a government.

The events which transpired during this succession of Persian kings, so far as they are connected with the biblical history, may be thus briefly narrated:—Cyrus, having conquered Babylon, permitted the Jews to quit their captivity and return into Palestine, affording them aid for the reconstruction of their national house of worship. Under Cambyses, who invaded Egypt and became master of the land, adversaries of the Jews tried to render them objects of suspicion at the court; which intrigues, however, had full effect only in the reign of his successor, Smerdis, who issued a decree expressly commanding the building of the temple to cease (Ezra iv. 21); in which prohibition Smerdis, as he was of the Magian tribe, and therefore of the priestly caste, may have been influenced by religious considerations. A milder and more liberal policy ensued. Darius, having by search in the national records ascertained what Cyrus had done towards the Jews, took off the prohibition, and promoted the rebuilding of the temple. Darius Hystaspis was distinguished for great enterprises, as well as liberal ideas. He carried the renown of the Persian arms to India, Libya, and Europe, and began the Persian attempt to subjugate Greece. What Xerxes undertook, and what success he had in his warlike undertakings against Greece, is known to all. His conduct towards the Jews, as well as his own despotism and luxuriousness, are exhibited in the book of Esther with great force as well as truth. Artaxerxes Longimanus led an army into Egypt, which had rebelled against its Persian masters. He was compelled to make peace with the Greeks. Palestine must have suffered much by the passage of troops through its borders on their way from

Persia to Egypt; the new colony at Jerusalem began to sink, when the monarch permitted Nehemiah to proceed with full powers to the Jewish capital, in order to strengthen the hands of his brethren. Darius Nothus had to fight on all sides of his kingdom, and made Phœnicia the scene of a war against the combined forces of Egypt and Arabia. Even Artaxerxes Mnemon, though long busied with his arms in other parts, did not lose sight of Egypt, which had thrown off his yoke, and sent new Persian armies into the vicinity of Palestine. In consequence, the Jews had much to endure from the insolence of a Persian general, namely, Bagoses, who polluted the temple, and 'punished the Jews seven years' (Joseph. *Antiq.* xi. 7, 1). Ochus followed the plan of his father, subdued the revolted Phœnicians, and again fell upon Egypt. The remaining period of the Persian dominion over the Jews passed away peaceably (Winer, *Real-Wört.;* Joseph. *Antiq.*, lib. xi.; Jahn, *Archäol.* ii. 1, 231-312; Schlosser, *Alten Welt*, i. 242, sq.; J. G. Eichhorn, *Geschichte Der Alt. Welt*, i. 80, sq.).

452. [Ancient Persian king on throne.]

The biblical books, Daniel, Esther, Nehemiah, and Ezra, combine to present a true as well as high idea of the Persian court and government. We will give a few particulars from Esther, a book of deep and vivid interest, not only in its story, but also, and by no means less, in the indirect history (as it may be termed) which it contains regarding the (perhaps) most splendid dominion that ever existed upon earth. The extent of the government was from India to Ethiopia, including 127 provinces. The empire was under the control of vassal princes and nobles, 'the power of Persia and Media,' under whom were governors of various ranks, and officers for every species of duty. It was specially the duty of seven ministers of state ('chamberlains') to serve in the immediate presence of the monarch. Other officers, however high in rank, were admitted to the royal person only through the barriers of a strictly-observed ceremonial. Even the prime minister himself, and the favoured concubine who was honoured with the title of queen, durst come no nearer than the outer court, unless, on making their appearance, the king extended towards them his sceptre of gold. The gorgeousness of the court dazzles the mind, and surpasses imagination. When the king sat upon his throne, his chief vizier and his beloved queen on either side, with rows of princes and nobles, like lessening stars, running in a line of fire-points from the monarch, the sun in whose light they shone, and in whose warm smile they were happy, feasting a hundred and fourscore days with his great men, in a hall and a palace of which the praise is too little to say that they were not unworthy the grandeur of the monarch on an occasion when 'he shewed the riches of his glorious kingdom, and the honour of his excellent majesty;'—or when the stately autocrat, relaxing in a measure the rigour of his greatness, and descending from his god-like throne to a nearer level with ordinary mortals, 'made a feast unto the people, both unto great and small, seven days in the court of the garden of the palace,' where were white, green, and blue pavilions, fastened with cords of fine linen and purple to silver rings and pillars of marble; couches, gold and silver, upon a tesselated pavement of red and blue, white and black marble; and drink was served all around in golden vessels of curious fabric and divers shapes; and wine in abundance, whose worth had gained for it the name of Royal, of which each person by express ordinance drank what he pleased;—or when, at the end of these seven days of popular enjoyment, the king feasted with Vashti, the queen, at a banquet for the women in her own palace, when the monarch commanded his seven high officers of state to bring Vashti the queen before the king with the crown royal, to show the people and the princes her beauty, for she was fair to look on;—or, finally, when a favourite servant, being clothed in the royal apparel, and set upon the horse that the king rode upon, with the crown royal upon his head, was conducted by the hand of one of the king's most noble princes through the highways of the glittering city, while heralds proclaimed before the resplendent retinue, 'Thus shall it be done to the man whom the king delighteth to honour;'—then blazed forth the glory of the Persian greatness, in pomp and splendour correspondent with the brilliancy of the heavens and the luxuriance of the earth under which and on which these luminaries shone. Nor, in the midst of all this outward pomp, were there wanting internal regulations fitted to sustain and give effect to the will of the monarch and his council. A body of law was in existence, to which additions were constantly made by omnipotent decrees issued by the king. These rescripts were made out by officials, a body of men who are designated royal scribes or secretaries; and being drawn up in the prescribed form, were copied and translated for 'every people after their language.' Being then 'sealed with the king's ring,' the letters were sent 'by post,' 'on horseback and on mules, camels and young dromedaries,' to the king's lieutenants, and to the governors over every province, and to the rulers of every people of every one of the 127 provinces. History, as well as law, received diligent and systematic attention. 'A book of records of the chronicles' was kept, in which the events of each reign were entered, probably under the supervision of the learned caste, the Magi. This book the monarch used to consult on occasions of importance and perplexity, partly for instruction, partly for guidance; so that the present was modelled after the past, and the legislation and the conduct of the king formed one entire and, to some extent, consistent whole. Whence it appears that though the monarch was despotic, he was not strictly arbitrary. Aided by a council, controlled by a priesthood, guided by the past as well as influenced by the present, the king, much as he may have been given up to his personal pleasures, must yet have had a difficult office to fill, and heavy

duties to discharge. Rulers are generally insecure in proportion to the degree of their despotism; and so we find, from the plot against the life of Ahasuerus (Xerxes, B.C. 485-465), which Mordecai discovered and made known, that even the recesses of a palace did not protect the kings of Persia from the attempts of the assassin. In the punishment, however, which fell upon the wicked Haman, we see the summary means which the Persian monarchs employed for avenging or defending themselves, as well as the unshared and unqualified power which they held over the life of their subjects even in the highest grades. Indeed it is not possible to read the book of Esther without fancying more than once that you are in the midst of the court of the Grand Seignior. Not least among the causes of this illusion is what is narrated in regard to the harem of Xerxes. The women, it seems, had a palace of their own, and dwelt there apart from the king, who paid them visits of ceremony. This their abode, and they themselves, were under the care of a royal chamberlain, whose power in the harem was supreme, and who had abundance of resources for increasing the state and promoting the comfort of those who pleased him; nor may he have been without an influence in determining the king in his choice of his favourite mistress. To supply the harem, officers were appointed in the several provinces, whose duty it was to find out and procure for the monarch the fairest maidens in the world. Each of these, after she had been in the women's house a twelvemonth, and had gone through a certain course of preparation, visited the king for one night in turn; but she came in unto the king no more except the king delighted in her, and that she were called by name, in which case she became queen. 'And the king loved Esther above all the women, and she obtained grace and favour in his sight more than all the virgins; so that he set the royal crown upon her head, and made her queen instead of Vashti.'

453. [Ancient Persian guards.]

The greatness of the power of the chief viziers of the Persian monarchy is illustrated in the recorded acts of Haman and Mordecai. The mode of delegating power was by presenting to the entrusted person the royal signet, which appears to have licensed him to do what he would, by such means as he pleased.

The great influence which Esther and Mordecai possessed with Xerxes is attributable to the noble qualities, both of mind and body, for which the Hebrew race were, and still are, conspicuous. These qualities won the heart and gained the favour of the king, and thereby proved instrumental in saving the Jews scattered throughout the empire from the bloody slaughter which Haman had designed should take place every where on the same day. Nor is it improbable that to influences connected with the same high qualities the decree may have been owing by which Cyrus set the people of the captivity free, that they might return home and build again the walls of Jerusalem. Cyrus, it is true, may have had some regard to justice; he may have thought it prudent to send away from his country at least the best of these highly-endowed men; he may not have been unwilling to see Jerusalem rise again into power, and prove a friendly barrier against Egypt; but the munificent manner in which the Jews were dismissed seems to betoken the agency of some personal influence, if not of some personal affection. Nehemiah (xiii. 6; comp. ii. 1, sq.) speaks expressly of a favour which he obtained of Artaxerxes (Longimanus, B.C. 465), or Xerxes II. (B.C. 424), after an interview of several days. By no means inconsistent with this personal favour, nor improbable in themselves, are the religious considerations by which the Scriptural writers represent Cyrus as being actuated in setting the Jews at liberty. The religion of the Persians was in its essential and primitive form monotheistic, and must therefore have been anything but alien, in spirit at least, to that of the Hebrews. Nor is there anything extravagant in assuming that so great a prince as Cyrus, who could scarcely have yielded to the luxurious effeminacy in which his successors indulged, and whose mind must have been elevated as well as powerful, understood in a measure, and highly appreciated, the excellences of the Mosaic religion; while the same general feeling which directed the storm of the Persians against the polytheistic temples of Greece, may have prompted an earlier and better sovereign to liberate the Jews, and bring about the restoration of the monotheistic worship on Mount Zion. Certainly the terms are distinct and emphatic in which Cyrus is made to speak in our sacred books; nôr do we see any reason to suppose that a Jewish colouring has been given to these passages, or to question that we have in them a faithful translation of the original state documents (Ezra i. 1-4; i. 7-11; vii. 23; viii. 22). The two last passages here referred to would seem to justify the inference that the favour of the Persian government was owing not merely to general religious influences, but also to specific instances of good and ill connected with the will of the Almighty; probably national reverses, more or less directly and believingly ascribed to God, may have been in operation to aid the restoration of the temple worship.

A general impression prevails that, to use the words of Winer (*Real-Wörterb.* s. v. 'Persien'), 'no edict published bearing the king's signature could be revoked,' so that the 'laws of the Medes and Persians' altered not in the sense of being diminished or reformed. Winer refers, as an authority, to Esth. i. 19; yet this book contains a striking fact which proves the contrary; for the decree which Haman had got promulgated for the destruction of the Jews was superseded by another procured by the influence of Esther and Mordecai, and this other of so decided a character as to give the Jews in all the provinces of the empire

the power of assaulting and slaying their enemies. In truth, the words 'that it be not altered' seem, at least in the period to which the biblical records refer, to signify little more than the general stability of the law, and the certainty of its penalties.

The extraordinary power entrusted to the Jews serves to show that the social constitution of the Persian empire was open to the greatest abuses. What could be worse than for the government itself to let loose on society a scattered horde of people, trembling for their lives, yet united in the strong bonds of religious fellowship? They would want no encouragement, if only relieved of the penalties commanded by the decree of Haman, to do all they could privately 'to be ready to avenge themselves on their enemies' (Esth. viii. 13); but when couriers came riding post into all parts where they were, bearing the royal behests to the effect that, on the very day on which they themselves expected unsparing slaughter, they were allowed not only 'to stand for their life,' but 'to destroy, to slay, and to cause to perish all the power of the people and province that would assault them, both little ones and women, and to take the spoil of them for a prey' (Esth. viii. 11), then, we may well believe, a dreadful vengeance would be taken, and frightful disorder caused, the possibility of which in any social condition is a proof that the first principles of justice are not understood; and the actual existence of which shows that, whenever occasion required, they were recklessly set at nought.

On the religion of the ancient Persians we refer to the articles Medes and Magi, from whom the Persians received their religion, as well as the constitution of their social state. If, indeed, the Persians, as a separate tribe in the general government of the Medes, succeeded in getting the upper hand of their effeminate masters, and wresting the sceptre from their enfeebled hands, the Medes were not without a recompense in that they perpetuated, even by the instrumentality of their conquerors, most of the higher appliances and effects of civilization to which in the course of ages they had given birth, and which have in all ages constituted the true honour of men and the best treasure of states. In truth, in this matter the relation into which the Persians entered with the Medes is that which must exist where the rough, untamed energy of a half-barbarous race comes down on the cultivated plains of a high but decaying civilization; and that which, in its chief features, may be seen in the relation which the Romans bore to the Greeks, and which the Northmen in their turn bore to the Romans:

'Græcia capta ferum victorem cepit, et artes
Intulit agresti Latio.'

The oldest Persians were, however, fire-worshippers—a species of idolatry which is least removed from monotheism, and also least unpardonable in such a clime as that of Persia. That such a worship is not incompatible with the esoteric recognition of one intelligent Creator is obvious, for the fire may have been regarded, and doubtless by the wise and philosophic was regarded, as merely symbolical of the Great Power which, as imaged in the sun, quickens, vivifies, and blesses all things. But even so pure and lofty a form of symbolical worship tended to corruption; and though we are unable to trace the steps of the progress, yet we know that it did gradually, in the case of the Persians, lead first to dualism, and then to gross idolatry (Bauer, *Symbol. u. Mythol.* i. 323, sq.).

The name 'Persia' is not found in the older records of the Bible, but after the Babylonish period it (פָּרָס) occurs frequently (2 Chron. xxxvi. 20, 22; Ezra iv. 5, sq.; vi. 14, sq.; Esth. i. 3; viii. 10; 1 Macc. i. 1), meaning the great Persian kingdom founded by Cyrus, which in the period of its highest glory comprised all Asiatic countries from the Mediterranean to the Indus, from the Black and Caspian Sea to Arabia and the Indian Ocean. This vast empire was divided into many provinces or satrapies, one of which was Persia (properly so called), or Persis (Farsistan), which on the north was separated from Media by the range of mountains denominated Parchratras, on the west bordered on Susiana (Khusistan), on the south reached to the Persian Gulf, and on the east was bordered by Carmania (Kirman). The country that lies along the sea is a sandy plain, which the heat and poisonous winds render unfit for human abodes (Plin. *Hist. Nat.* xii. 20). The interior is crossed by rocky mountains, whose summits are covered with snow the greater part of the year. This mountain chain renders the north of the country rough and unfruitful, so that herdsmen and nomads alone dwell there. In the intermediate parts, however, are found many well-watered valleys and plains, which yield to few in fruitfulness and mildness of climate (Strabo, xv. p.727; Ptolem. vi. 4; Mannert, *Geog.* ii. 497). The inhabitants of this province of Persis were connected by blood with the Medes, and were divided into many tribes and clans (Herod. i. 125), three of which were noble, the Pasargadæ, the Maraphii, and the Maspii. The Pasargadæ held the pre-eminence; of which tribe was Cyrus, a circumstance to which he in part owed his power and influence.

The Persian language was diverse from the Shemitic, and connected with the Indo-Germanic tongues, of which the Sanscrit may be considered as the eldest branch (Adelung, *Mithridat.* i. 255, sq.; O. Frank, *De Persidis Lingua et Genio*, Norimb., 1809; Wahl, *Gesch. d. Morgenländ Sprache u. Literatur*, p. 129, sq.).

The residences of the monarchs of the immense country denominated Persia were various. Pasargada, with its royal tombs, was most ancient. Persepolis rose not very far from it, and became a treasure-city. After the overthrow of the Babylonian kingdom, Cyrus, while preserving a regard for the more ancient cities of the empire, seems to have thought Babylon a more suitable place for the metropolis of Asia; but as it might not be politic, if it were possible, to make a strange place the centre of his kingdom, he founded a new city, Susa, where he was still on Persian ground, and yet not far distant from Babylon. There was also Ecbatana, the Median capital. These several royal abodes seem to have been occupied by the later monarchs, according as the season of the year called for a colder, warmer, or milder climate.

We have before seen that the Persian monarchy had its chronicles. These may have been consulted by our classical authorities, but are wholly lost to us. We are therefore thrown on two foreign

sources of information regarding the Persian history: 1. The Jewish, to be elicited chiefly from the books of Ezra, Nehemiah, and Esther, of which something has been said. 2. Grecian writers. Of these, Ctesias availed himself of the Persian annals, but we have only extracts from his work in Photius. Herodotus appears also to have consulted the native sources of Persian history. Xenophon presents us with the fullest materials, namely, in his *Anabasis*, his *Hellenica*, and especially in his *Cyropædia*, which is an imaginary picture of a perfect prince, according to Oriental conceptions, drawn in the person of Cyrus the elder. Some of the points in which the classical authorities disagree may be found set forth in Eichhorn's *Gesch. der A. Welt*, i. 82, 83. A representation of the Persian history, according to Oriental authorities, may be found in the *Hallische Allgemeine Weltgeschichte*, th. iv. A very diligent compilation is that of Brissonius, *De Regno Persarum*, 1591. Consult especially Heeren's *Ideen*, i. 1; and his *Handbuch der G. d. S. Allerth.*, i. 102. A full and valuable list of the older authorities in Persian affairs may be seen in the *Bibliotheca Historica* of Meusellius, vol. i., pt. ii., p. 28, sq.—J. R. B.

PESTILENCE. The terms pestilence and plague are used with much laxity in our Auth. Version. The latter, however, which generally represents the Hebrew נֶגַע, is by far the wider term, as we read of 'plagues of leprosy,' 'of hail,' and of many other visitations. Pestilence is employed to denote a deadly epidemic, and is the word by which דֶּבֶר (Sept. *θάνατος*, and occasionally *λοιμός*) is translated. In our time, however, both these terms are nearly synonymous; but *plague* is, by medical writers at least, restricted to mean the glandular plague of the East. There is indeed no description of any pestilence in the Bible, which would enable us to form an adequate idea of its specific character. Severe epidemics are the common accompaniments of dense crowding in cities, and of famine; and we accordingly often find them mentioned in connection (Lev. xxvi. 25; Jer. xiv. 12; xxix. 18; Matt. xxiv. 7; Luke xxi. 11). But there is no better argument for believing that 'pestilence' in these instances means the glandular plague, than the fact of its being at present a prevalent epidemic of the East. It is also remarkable that the Mosaic law, which contains such strict rules for the seclusion of lepers, should have allowed a disease to pass unnoticed, which is above all others the most deadly, and, at the same time, the most easily checked by sanatory regulations of the same kind.* The destruction of Sennacherib's army (2 Kings xix. 35) has also been ascribed to the plague. But—not to insist on the circumstance that this awfully sudden annihilation of 185,000 men is not ascribed to any disease, but to the agency of an angel (since such passages as 2 Sam. xxiv. 15, 16, weaken this objection, and even Josephus understood the cause to be a pestilence, *Antiq.* x. 1. 5)—it is impossible that such a mortality could have been produced, in one night, by a disease which spread itself by contagion, like the Oriental plague; and the same remark applies, though in a less degree, to the three days' pestilence in the reign of David (2 Sam. xxiv. 13). Those who entertain the common opinion about the means by which the destruction of Sennacherib's army was effected, regard the illness of Hezekiah (2 Kings xx. 1-11) as connected, both as to time and cause, with that event; and consider his 'boil' especially to afford direct evidence that he suffered from the plague. The boil would have certainly been a most characteristic symptom, if we had the least indication that his disease was pestilential; but we have no evidence whatever that any epidemic prevailed at that time at Jerusalem.

The glandular plague, like the small-pox, is an eruptive fever, and is the most virulent and most contagious disease with which we are acquainted. The eruption consists of buboes, carbuncles, and petechiæ. Buboes are inflamed and swollen glands; and the glands so affected are generally those of the groin, axilla, neck, and the parotid glands. More frequently there are two, three, or even four, such tumours. They sometimes subside of themselves; or, what is more commonly the case, they suppurate: and as this process seldom commences before the disease has taken a favourable turn, it is regarded as the cause, but more correctly as a sign, of approaching recovery. A carbuncle is an inflammation of the skin, giving rise to a hard tumour, with pustules or vesicles upon it. It resembles a common boil, but differs from it in this important respect. The carbuncle becomes gangrenous throughout its whole extent, so that when the eschar separates a large deep ulcer is left. Under the term petechiæ are included evanescent spots and streaks of various hues, from a pale blue to a deep purple, which give a marbled appearance to the skin. When such livid streaks occur in the face, they disfigure the countenance so much that a patient can hardly be recognised by his friends. The disease varies so considerably in its symptoms and course, that it is impossible to give one description that will suit even the majority of cases. Sometimes the eruption does not appear at all, and even the general symptoms are not of that violence to lead an ignorant person to suspect the least danger. The patient is suddenly attacked with a loss of strength, a sense of confusion, weight in the head, oppression at the heart, and extreme dejection of spirits. Such cases sometimes terminate fatally within twenty-four hours, and occasionally on the second or third day. Generally, however, the patient is attacked with shivering or coldness, which is soon followed by fever, giddiness, pain in the head, occasionally also by vomiting. Buboes and carbuncles in most cases make their appearance on the first day; and successive eruptions of them are not unusually observed during the course of the disease. There is a peculiar and characteristic muddiness of the eye, which has been described by Dr. Russell as a muddiness and lustre strangely blended together. The fever remits every morning, and increases during the day and night. The vomiting then increases;

* Michaelis endeavours to explain why the Law contained no ordinances about the plague, by arguing that, on account of the sudden appearance and brief duration of the disease, no permanent enactments could have been efficient in moderating its ravages, but only such preventive measures as varied according to the ever-varying circumstances of the origin and course of its visitations (*Mos. Recht.* iv. 290).

the tumours become painful; and the patient wanders, and is inclined to stupor. On the morning of the third day, in favourable cases, a sweat breaks out, which produces great relief, and sometimes even proves critical. The exacerbation on the fourth day is more severe than on the preceding ones, and continues intense until it is terminated by the sweat on the morning of the fifth day, which leaves the patient weak, but in every respect relieved. After this, the exacerbations become slighter and slighter; and the buboes advancing favourably to suppuration, little or no fever remains after the beginning of the second week. In other cases, again, the symptoms are far more urgent. Besides vomiting, giddiness, and headache, there is also diarrhœa at the outbreak of the fever. During the night the patient becomes delirious or comatose. The pulse is full and strong; and though the tongue is not dry, the thirst is excessive. The fever abates somewhat on the succeeding morning, but the pulse is frequent, the skin hot and dry, and the patient dejected. As the second day advances, the vomiting and diarrhœa become urgent, the eyes are muddy, expression of countenance confused, the pulse quick, and sometimes low and fluttering, external heat moderately feverish, or occasionally intense in irregular flushings. There is pain at the heart, burning pain at the pit of the stomach, and incessant restlessness. When to these symptoms are joined faltering of the tongue, or loss of speech, and the surface of the body becomes cold or covered with clammy sweats, death is inevitable, although it may still be at some distance. When the patient has been much weakened by the vomiting, diarrhœa, or hæmorrhage, the third day proves fatal; but more commonly the disease is prolonged two or three days longer. In this form of plague, buboes appear on the second or third day, and sometimes later; but whether they advance towards suppuration, or not, they seem to have no effect in hastening or retarding the termination of the disease. Lastly, in some cases, the eruption of buboes and carbuncles constitute the principal symptoms of the disease; and patients are so little indisposed, that they are able to go about the streets, or attend to their usual avocations, if not prevented by the inflammation of inguinal tumours.

Respecting the causes and origin of plague nothing is known. There cannot be the slightest doubt that it is propagated by absolute contact with, or a very near approach to, the bodies or clothes of persons infected; but we are entirely at a loss to know how it is generated afresh. Extremes of temperature have a decided effect in putting a stop to it; but Dr. Russell observed that, in the year 1761, the plague at Aleppo was mild, in 1762 it was severer, and in 1763 it was very fatal; and yet there was no appreciable difference in the respective seasons of these years. In Egypt, the plague commences in autumn, and is regularly put an end to by the heats of summer; and it is even asserted that contaminated goods are also disinfected at this time.

In Europe, the plague disappeared during the winter. This was remarked in all the epidemics, except that from 1636 to 1648, called the Great Plague, on account of its long duration; but even in this instance it abated considerably during the winter. It was a common superstition that the plague abated on St. John's day.

The most fatal, and at the same time the most general epidemic, was that which ravaged Asia, Africa, and the whole of Europe, in the fourteenth century. It was called by the northern European nations 'the Black Death,' and by the Italians 'la Mortilega Grande,' or the great mortality. According to Dr. Hecker, not less than twenty-five millions perished by it in the short space of three years, from 1347 to 1350. Since the commencement of this century, Europe has been free from the plague, with the exception of two or three instances. It occurred at Noja, in the kingdom of Naples, in 1815 and 1816; at the Lazaretto of Venice, in 1818; in Greiffenberg, in Silesia, in 1819. It has not been seen in Great Britain since the great epidemic of 1665, which is stated to have carried off eight thousand in one week. Quarantine was first performed in one of the islands near Venice, in 1485. Persons who had been cured of plague in the Lazaretto on one of the adjoining islands were sent there, and all those with whom they had had intercourse, where they were detained forty days. This period was probably fixed upon on account of some medical hypothesis. The fortieth day was regarded as the last day of ardent diseases, and that which separated them from chronic. Forty days constituted the philosophical month of alchymists. Theological, and even legal derivations, have been also given. The forty days of the flood; Moses' sojourn on Mount Sinai; our Lord's fast; and, lastly, what is called the 'Saxon term' (Sächsische Frist), which also lasts forty days. Bills of health were probably first established in 1507, by a council of health established at Venice during a fatal plague that visited Italy for five years; but they were not generally used until 1665. It is to these great measures that Europe is indebted for its present immunity from this terrible scourge; and it cannot be doubted that, but for the callous indifference of the Orientals (which proceeds from their fatalism, love of gain, and ignorance), the same measures would be adopted in the East, with the same success. (Hecker's *Hist. of the Epidemics of the Middle Ages;* Dr. Brown, art. 'Plague,' in *Cyclop. of Pract. Med.;* Dr. Russell, *Hist. of Aleppo.*)—W. A. N.

PETER (Πέτρος; Aram., כֵּיפָא; originally SIMEON or SIMON, שִׁמְעוֹן, *heard*) was a native of Bethsaida, in Galilee, and was the son of a certain Jonas, or John; whence he is named on one occasion in the Gospel history Simon Barjona, that is, son of Jona (Matt. xvi. 17). Along with his brother Andrew, he followed the occupation of a fisherman on the sea of Galilee. It is probable that, before they became known to Christ, they were both disciples of John the Baptist. That Andrew was so we are expressly informed by the evangelist John; and as his brother seems to have been much of the same mind with him on religious matters, it is extremely likely that he was so likewise. Their becoming known to Christ was owing to John's pointing him out on the day after his baptism to Andrew and another disciple (probably the evangelist John), as 'the Lamb of God;' on which they immediately followed Christ, and spent some time in receiving his instructions. Shortly after this, Andrew find-

ing Simon, carried him to Christ, who, on receiving him as his disciple, bestowed upon him that surname by which he has since that time been most commonly designated: 'When Jesus beheld him he said, Thou art Simon the son of Jona; thou shalt be called Cephas, which is by interpretation a stone (πέτρος).' After this interview the two brothers seem to have returned to their usual occupation for a season, as we have an account in Matthew (iv. 18-20) of their being summoned from that occupation by Christ on a subsequent occasion, posterior to his temptation in the wilderness, and to the commencement of his public ministry as a religious teacher. From this time forward they were his devoted and admiring followers. In the course of the evangelical history several anecdotes of Peter are incidentally recorded, for the purpose, doubtless, principally of illustrating the character and teaching of our Lord, but which tend also to throw light upon the history and character of his attached disciple. Such are the accounts furnished by the evangelists of his walking upon the agitated waters of the sea of Galilee to meet his master (Matt. xiv. 22, ff.; Mark vi. 45, ff.); of his bold and intelligent avowals of the undoubted Messiahship of Jesus, notwithstanding the difficulties which he, along with the rest of the disciples, felt in reconciling what they saw in him with what they had fondly expected the Christ to be (Matt. xvi. 13-20); of his rash but affectionate rebuke of his Lord for speaking of suffering and death as in prospect for him, and as forming a necessary part of his mediatorial work (Matt. xvi. 21-23); of his conduct in first rejecting, with an earnestness bordering on horror, the offer of Christ to wash his feet, and then, when the symbolical nature of that act had been explained to him, his over-ardent zeal that not his feet only, but also his hands and his head, might be washed (John xiii. 4, ff.); of his bold and somewhat vaunting avowal of attachment to his Master, and his determination never to forsake him, followed by his disgraceful denial of Jesus in the hour of trial (John xiii. 36, 37; Mark xiv. 29, &c.); of his deep and poignant contrition for this sin (Matt. xxvi. 75); and of his Lord's ample forgiveness of his offence, after he had received from him a profession of attachment as strong and as frequently repeated as his former denial of him (John xxi. 15-18). From these notices it is easy to gather a tolerably correct conception of the predominating features of the apostle's character up to this period. He seems to have been a man of undoubted piety, of ardent attachment to his Master, and of great zeal for what he deemed his Master's honour; but, at the same time, with a mind rather quick than accurate in its apprehensions, and with feelings rather hasty in their impulse than determined and continuous in their exercise. Hence his readiness in avowing his opinions, and his rashness in forming them; and hence also the tendency which beset his honest openness to degenerate into bravado, and his determinations of valour to evaporate into cowardice at appalling forms of danger. His fall, however, and his subsequent restoration, connected as these were with the mysterious events of his Master's crucifixion and resurrection, and with the new light which had by them been cast around his character and work, produced a powerful change for the better upon the apostle's mind. From this time forward he comes before us under a new aspect. A sober dignity and firmness of purpose have displaced his former hasty zeal; sagacity and prudence characterize his conduct; and whilst his love to his Master shows no symptom of abatement, it displays itself rather in active labour and much-enduring patience in his service, than in loud protestations or extravagant exhibitions of attachment. In the subsequent Scripture history he is presented to us as the courageous herald of the kingdom of Christ, by whose mouth the first public declaration of salvation through the crucified Jesus was made to the people; by whose advice and counsel the early churches were planted and governed; and by whom the prejudices of Judaism were first fairly surmounted, and the Gospel preached in all its universal freeness to the Gentile world. The Acts of the Apostles contain recitals of many interesting incidents which befell him whilst engaged in those efforts. Of these, the chief are his imprisonment and trial before the Sanhedrim for preaching Christ, and his bold avowal of his determination to persist in that work (Acts iv. 1-22); his miraculously inflicting the punishment of death on the infatuated couple who had dared to try an experiment upon the omniscience of the Holy Ghost (v. 1-11); his visit to Samaria, and rebuke of Simon Magus, who deemed that the miracles of the apostle were the result of some deep magic spell of which he had not yet become possessed, and which, consequently, he was desirous of purchasing from Peter (viii. 14-24); the vision by which he was taught that the ancient ritual distinctions between clean and unclean had been abolished, and thereby prepared to attend on the summons of Cornelius, to whom he preached the Gospel (x. 1-48); his apprehension by Herod Agrippa, and his deliverance by the interposition of an angel, who opened for him the doors of his prison, and set him free (xii. 3-19); and his address to the council at Jerusalem, on the occasion of a request for advice and direction being sent to the church there by the church in Antioch, in which he advocated the exemption of Gentile converts from the ceremonial institutes of the law of Moses (xv. 6-11). In all these incidents we trace the evidences of his mind having undergone an entire change, both as to its views of truth and impressions of duty, from what is displayed by the earlier events of his history. On one occasion only do we detect something of his former weakness, and that, strangely enough, in regard to a matter in which he had been the first of the apostles to perceive, and the first to recommend and follow, a correct course of procedure. The occasion referred to was his withdrawing, through dread of the censures of his Jewish brethren, from the Gentiles at Antioch, after having lived in free and friendly intercourse with them, and his timidly dissembling his convictions as to the religious equality of Jew and Gentile. For this Paul withstood him to the face, and rebuked him sharply, because of the injury which his conduct was calculated to produce to the cause of Christianity. With this single exception, however, his conduct seems to have been in full accordance with the name which his Master had prophetically bestowed on him when he called him Simon the Rock, and with the position which Paul himself assigns to him, at the very time that he recounts his temporary

dereliction, as one of 'the Pillars of the Church' (Gal. ii. 9, 14).

Thus far we are enabled, from the inspired documents, to trace the history of this apostle; but for what remains we must be indebted to evidence of a less explicit and certain character. Ecclesiastical tradition asserts that he performed an extensive missionary tour throughout those districts, to the converts in which his epistles are addressed. 'Peter,' says Origen, 'appears to have preached to the Jews in the dispersion, in Pontus, Galatia, Bithynia, Cappadocia, and Asia' (*In Genesin*, tom. iii.; Euseb. *Hist. Eccles.* iii. 1, 4). This tradition, however, though deriving some countenance from 1 Pet. v. 13, is very uncertain; even Origen, in adducing it, speaks doubtingly (κεκηρυχέναι ἔοικεν). The fact that no allusion appears in his epistles to any personal acquaintance on the part of the apostle with those to whom they are addressed, militates strongly against its authenticity. Another tradition reports the apostle as having towards the close of his life visited Rome, become bishop of the church in that city, and suffered martyrdom in the persecution raised against the Christians by Nero. The importance of these points in connection with the claims urged by the Catholics on behalf of the supremacy of the pope, has led to a careful and sifting examination of the accuracy of this tradition; the result of which seems to be, that whilst it is admitted as *certain* that Peter suffered martyrdom, in all probability by crucifixion (Tertullian, *De Præscript.*, 38; Lactantius, *De Mortibus Persecutorum*, c. ii.), and as *probable* that this took place at Rome, it has, nevertheless, been made pretty clear that he never was for any length of time resident in that city, and morally certain that he never was bishop of the church there (Barrow, *On the Pope's Supremacy; Works*, vii. 207, ff., Lond. 1831; Cave's *Life of St. Peter*, § 11; Campbell, *Eccles. Hist.* lect. xii.; Neander, *Gesch. d. Pflanz. und Leit.* u. s. w., ii. 474; Winer, *Real-Wörterb.*, in 'Petrus,' &c.). By some an attempt has been made to obtain the support of the apostle's own testimony in favour of his having at one period resided at Rome, by interpreting the words, 'the church that is at *Babylon*,' the salutations of which he sends to those to whom he wrote his first epistle, as applying to the church at *Rome;* an attempt which Dr. Campbell justly stigmatizes as 'poor, not to call it ridiculous.' Even if we admit that at the time when this epistle was written it was understood amongst the Christians that Babylon was the prophetical name for Rome—an admission, however, which is entirely unsupported by evidence—it would remain unexplained why the apostle, in such a mere matter-of-fact affair as the communication of the friendly salutations of one church to another, should have employed the obscure and symbolical language of prophecy, when his meaning could have been so much more distinctly conveyed by a simple statement. This would be the more inexplicable, that the style of Peter is remarkably plain and perspicuous throughout the entire epistle. It seems much more consistent, therefore, with rational principles of interpretation, to understand the statement literally of the Assyrian Babylon, in which city, as we learn from Josephus, there was a great multitude of Jews (ἔνθα καὶ πλήθος ἦν Ἰουδαίων, *Antiq.* xv. 2. 2; see also c. 3. 1), and to which, consequently, it is probable that at some period of his life 'the apostle of the circumcision' (Gal. ii. 8) must have paid a visit. Some have suggested that Babylon in Egypt is probably intended; but this is set aside by the fact, that at this time the Egyptian Babylon was nothing more than a Roman fort (Strabo, xvii. 1).

The assertion that Peter was bishop of Rome is connected with another, by which the claims of the papacy are sought to be established, namely, that to him was conceded a right of supremacy over the other apostles. In support of this, an appeal is made to those passages in the Gospels, where declarations supposed to imply the bestowal of peculiar honour and distinction on Peter are recorded as having been addressed to him by our Lord. The most important of these are: 'Thou art Peter, and on this rock will I build my church' (Matt. xvi. 18); and, 'Unto thee will I give the keys of the kingdom of heaven,' &c. (Matt. xvi. 19). At first sight these passages would seem to bear out the assumption founded on them; but, upon a more careful investigation, it will be seen that this is rather in appearance than in reality. The force of both is greatly impaired for the purpose for which Catholics produce them, by the circumstance, that whatever of power or authority they may be supposed to confer upon Peter, must be regarded as shared by him with the other apostles, inasmuch as to them also are ascribed in other passages the same qualities and powers which are promised to Peter in those under consideration. If by the former of these passages we are to understand that the church is built upon Peter, the apostle Paul informs us that it is not on him *alone* that it is built, but upon *all* the apostles (Ephes. ii. 20); and in the book of Revelation we are told, that on the twelve foundations of the New Jerusalem (the Christian church) are inscribed 'the names of the *twelve apostles of the Lamb*' (xxi. 14). As for the declaration in the latter of these passages, it was in all its essential parts repeated by our Lord to the other disciples immediately before his passion, as announcing a privilege which, as his apostles, they were to possess in common (Matt. xviii. 18; John xx. 23). It is, moreover, uncertain in what sense our Lord used the language in question. In both cases his words are metaphorical; and nothing can be more unsafe than to build a theological dogma upon language of which the meaning is not clear, and to which, from the earliest ages, different interpretations have been affixed. And, finally, even granting the correctness of that interpretation which Catholics put upon these verses, it will not bear out the conclusion they would deduce from them, inasmuch as the judicial supremacy of Peter over the other apostles does not necessarily follow from his possessing authority over the church. On the other side, it is certain that there is no instance on record of the apostle's having ever claimed or exercised this supposed power; but, on the contrary, he is oftener than once represented as submitting to an exercise of power upon the part of others, as when, for instance, he went forth as a messenger from the apostles assembled in Jerusalem to the Christians in Samaria (Acts viii. 14), and when he received a rebuke from Paul, as already noticed. This circumstance is so fatal, indeed, to the pretensions which have

been urged in favour of his supremacy over the other apostles, that from a very early age attempts have been made to set aside its force, by the hypothesis that it is not of Peter the apostle, but of another person of the same name, that Paul speaks in the passage referred to (Euseb. *Hist. Eccles.* i. 13). This hypothesis, however, is so plainly contradicted by the words of Paul, who explicitly ascribes apostleship to the Peter of whom he writes, that it is astonishing how it could have been admitted even by the most blinded zealot (vers. 8, 9). Whilst, however, it is pretty well established that Peter enjoyed no judicial supremacy over the other apostles, it would, perhaps, be going too far to affirm that no dignity or primacy whatsoever was conceded to him on the part of his brethren. His superiority in point of age, his distinguished personal excellence, his reputation and success as a teacher of Christianity, and the prominent part which he had ever taken in his Master's affairs, both before his death and after his ascension, furnished sufficient grounds for his being raised to a position of respect and of moral influence in the church and amongst his brother apostles. To this some countenance is given by the circumstances that he is called 'the first' (*πρῶτος*) by Matthew (x. 2), and this apparently not merely as a numerical, but as an honorary distinction; that when the apostles are mentioned as a body, it is frequently by the phrase, 'Peter and the eleven,' or, 'Peter and the rest of the apostles,' or something similar; and that when Paul went up to Jerusalem by divine revelation, it was to Peter particularly that the visit was paid. These circumstances, taken in connection with the prevalent voice of Christian antiquity, would seem to authorize the opinion that Peter occupied some such position as that of *προεστὼς*, or president in the apostolical college, but without any power or authority of a judicial kind over his brother apostles (Campbell, *Eccles. Hist.*, lect. v. and xii.; Barrow, *ubi sup.*, &c.; Eichhorn, *Einleit.* iii. 599; Hug, *Introd.* p. 635, Fordick's tr.; Horne, *Introd.*, iv. 432; Lardner, *Works*, vols. iv. v. vi., ed. 1788; Cave, *Antiquitates Apostolicæ*, &c.).—W. L. A.

PETER, EPISTLES OF. Of the seven Catholic Epistles, there are two ascribed to St. Peter. The first of these is one of the *ὁμολογούμενα*, or those universally received in the early church. The second ranks among the *ἀντιλεγόμενα*, or controverted [ANTILEGOMENA].

Genuineness of the First Epistle.—The external evidence in favour of the genuineness of this Epistle is complete. 'One Epistle of Peter,' says Eusebius (*Hist. Eccles.* iii. 3), 'called the first, is universally received;' and Origen had before this time observed, that 'Peter . . . has left one Epistle acknowledged to be his.' It is cited by Irenæus (*Adv. Hær.* iv. 9, 2): 'Peter says in his Epistle, *In whom, though now ye see him not, yet believing, ye rejoice with joy unspeakable and full of glory*' (i. 8. And again he cites 1 Pet. ii. 16); also, by Clemens Alexandrinus (*Strom.* i. 3): 'Peter in *the Epistle* says,' &c.; and by Tertullian (*Scorp.* c. 12), 'Peter says to the inhabitants of Pontus' (comp. 1 Pet. ii. 20). Dr. Lardner observes (*Hist. Apost.* c. ix.) that 'it seems to be referred to by Clement of Rome in his first Epistle.' Eusebius notices its citation by Polycarp (comp. Polycarp. c. i. with 1 Pet. i. 8); and also by Papias; (*Hist. Eccles.* iii. 39). 'In fact,' says De Wette (*Einleitung*, § 173), 'if we except its omission in the ancient catalogue in Muratori, and its rejection by the Paulicians, it has been never called in question.' De Wette himself, who never omits an opportunity of raising a doubt, contents himself with observing that 'as its contents are really apostolic, any doubts arising from the absence of any known personal relationship between the author and those to whom the Epistle was addressed, or any peculiarity of doctrinal phraseology, find no favour or recognition.' He adds that the second Epistle, even though not genuine, bears testimony (iii. 1) to the genuineness of the first.

The internal evidence is equally complete. The author calls himself the Apostle Peter (ch. i. 1), and the whole character of the Epistle shows that it proceeds from a writer who possessed great authority among those whom he addresses, who were most probably composed chiefly of Jewish Christians. The writer describes himself as 'an elder,' and 'a witness of Christ's sufferings' (v. 1). The vehemence and energy of the style are altogether appropriate to the warmth and zeal of Peter's character, and every succeeding critic, who has entered into its spirit, has felt impressed with the truth of the observation of Erasmus, 'that this Epistle is full of apostolical dignity and authority, and worthy of the prince of the apostles.'

The only indication as to the place from whence this letter was addressed to the five provinces, is contained in ch. v. ver. 13: 'She in Babylon, elected with you (*ἡ ἐν Βαβυλῶνι συνεκλεκτή*), saluteth you.' For whether 'she in Babylon' refers to the church or to an individual (in which latter case Peter's wife is the person generally believed to be referred to), the letter must have been written in, or at least in the neighbourhood of, Babylon. But where Babylon was, or whether it was the celebrated city of that name on the Euphrates, as has been maintained by Beza, Lightfoot, Basnage, De Wette, Neander, and a host of learned men, is a question which has never been, and probably never will be, decided. It has been maintained, as an objection to the supposition that Babylon on the Euphrates was meant, that there were no Jews residing there at the date of this Epistle, inasmuch as they had all been expelled from that city in the latter part of the reign of Caligula, with the exception of such as were permitted to remain on account of connection, or other special reasons (Hug's *Introduction*); while those in Seleucia, or New Babylon, were soon after massacred, or fled to Ctesiphon, on the other side of the river. Hug, who still maintains that Babylon on the Euphrates is intended, conceives that the *σεβόμενοι*, or 'pious,' were the persons to whom the apostle's injunctions were addressed, and who were numerous in the East. There is certainly no authority from ecclesiastical history for supposing that Peter was ever at Babylon; but this silence proves nothing, for there are fourteen years of the apostle's life concerning which we have no information. But this mention of Babylon by St. Peter has led to the belief that he may have paid a visit to the Parthians (De Wette, *l. c.*), of which, however, there is no other indication among the ancients.

Babylon in Egypt, near Memphis, has been con-

jectured by Pearson, Le Clerc, and others, to have been the scene of Peter's labours; but neither for this is there any evidence, and it seems to have been a very insignificant place, for Strabo describes it only as a frontier garrison, occupied by one of the Roman legions quartered in Egypt.

Although the ancient Syrian writers conceived the Babylon mentioned by St. Peter to have been a city in the East, the Greek and Latin fathers held the name of Babylon here to have been, as in the Apocalypse, a metonymy for Rome. This was the prevailing opinion in the time of Eusebius, who observes (*Hist. Eccles.* ii. 15) that Peter 'is said to have composed his first Epistle at Rome, which he indicates in calling it figuratively Babylon.' This opinion is repeated by Jerome (*De Vir. Illustr.* cap. viii.), Œcumenius (ii. p. 256), and Bede (*Expos.* 1 Pet. v. 13). It has been, as is observed by Lardner and Michaelis, received by most members of the church of Rome, but certainly not, as Mr. Horne supposes (*Introd.* vol. ii. c. iv. § 3), after Macknight (*On the Epistles*), by *all* the learned of that communion; for, among others, Erasmus (*Comment.*), Du Pin (*Canon of Scripture*), and Hug (*Introd.*), contend against Rome in favour of Babylon in Mesopotamia. That Rome was meant has been maintained also by Grotius, Whitby, Macknight, and Lardner. Perhaps the strongest objection to this hypothesis arises from the consideration that the use of a mystical name is unsuited to the character of an epistolary writing, although adapted to the symbolical and poetical style of the apocalypse. It is, however, certain that *arcana nomina* were sometimes used by the early Christians. Louis Capell favours the idea of a mystical name, but he stands alone in considering Jerusalem to be the place indicated. It may be added that there is independent authority for believing that Peter was at Rome, but none that he was ever either in Assyria or Egypt.

Age of the Epistle.—The Epistle must have been written before A.D. 67-68, the year of St. Peter's martyrdom. Lardner places the date in A.D. 63 or 64, chiefly from the fact that an earlier date than A.D. 63 cannot be assigned for his arrival at Rome. Hug and De Wette (*Introductions*), and Neander (*Hist. of the Planting of the Christian Church*), find an indication of the true date in the Neronic persecution, to which the Epistle manifestly refers. The Christians were now suffering persecutions as *Christians*, and according to the popular belief, of which Tacitus informs us Nero took advantage, they were punished as evildoers (*malefici*, Tacitus; κακοποιοί, 1 Pet. ii. 12).

Hug fixes the date in the eleventh year of Nero's reign, or A.D. 65, a year after the conflagration of the city, and five before the destruction of Jerusalem. Lardner supposes that Peter's first Epistle could not have been written *from Rome* before the death of St. Paul, A.D. 66, as it is difficult to account for St. Paul's silence respecting him if Peter was at Rome at the date of any of his epistles from that city. Others, however, as Bishop Sherlock, consider that the first Epistle was written about A.D. 60. It is at the same time certain that Peter had read several of St. Paul's Epistles, as he adopts expressions, and sometimes whole phrases, from the Epistles to the Romans, Ephesians, Colossians, Galatians, Thessalonians, 1 Corinthians, and 1 Timothy (comp. especially, 1 Pet. ii. 13, with 1 Tim. ii. 2-4; ii. 18, with Eph. vi. 5; 1 Pet. i. 1, with Eph. i. 4-7; i. 3, with Eph. i. 3; i. 14, with Rom. xii. 2; ii. 1, with Col. iii. 8, and Rom. xii. 1; ii. 6-10, with Rom. ix. 32; ii. 13, with Rom. xiii. 1-4; ii. 16, with Gal. v. 13; ii. 18, with Eph. vi. 5; iii. 1, with Eph. v. 22; iii. 9, with Rom. xii. 17; iv. 9, with Philipp. ii. 14; iv. 10, with Rom. xii. 6, &c.; v. 1, with Rom. viii. 18; v. 5, with Eph. v. 21; v. 8, with 1 Thess. v. 6; v. 14, with 1 Cor. xvi. 20). There is, observes Hug (*Introd.*), evidence of more than accidental relationship even in the deviation of expression, in which, however, there is no essential difference. The similarity in thought and expression, and even in their very plan (Hug, *l. c.*), are indeed most striking, and this circumstance has been well accounted for by the fact that Peter had not himself visited the Asiatic provinces, and had, therefore, reference to the Epistles of his esteemed colleague for the general condition of the inhabitants, their manner of life, their virtues and their failings, and their civil and domestic relations. There are also some passages identical with those in the Epistle of St. James (comp. 1 Pet. i. 6, 7, with James i. 2, 3; i. 24, with James i. 10; ii. 1, with James i. 21; iv. 8, with James v. 20; and v. 5, with James iv. 6). This latter passage is, indeed, a citation from Prov. iii. 34; but the identity of the conclusions drawn by each renders it improbable that here was a merely accidental coincidence. It is also remarkable that in 1 Pet. iv. 8, and James v. 20, there occurs (in each) the same citation from Prov. x. 12. These resemblances, however, involve important consequences. If the Epistle of James was the first in order of time [JAMES], its right to a place in the canon is providentially confirmed by the high and unexceptionable authority of St. Peter.

Object and Contents of Peter's First Epistle.—To afford consolation to the persecuted appears to have been the main object of this Epistle. To this the moral instructions are subsidiary (Hug's *Introd.*). The exhortations to a pure conscience, to rebut the calumnies of the time by their innocence, to abstain from violent disputes, to pay respect to the existing authorities, to exercise increasing love and fidelity, were exhortations all given with a view to alleviate their fate, or enable them to bear it. The repeated references to the example of Jesus in his death and sufferings, are designed to strengthen them for the endurance of calamities. The exhortation to the slaves, too, has reference to the unhappy days, in which, for real or imaginary wrongs and hardships, they frequently became the accusers and betrayers of their masters. The following is a summary of the contents:—

The salutation and introduction, in which the inhabitants of the five provinces who were purchased by the sufferings of Christ, are exhorted to prepare themselves for a reward higher than the enjoyments of this fleeting life (i.1-13). They are, therefore, recommended to lay aside anything which could render them unworthy of Christ, the centre of their hopes, their pattern and their Saviour, and so to regulate their conduct to their superiors that none should be able to reproach them as 'evildoers.' These precepts were to extend to slaves, to whom the meek and suffering Jesus should be an example. Women, too, were

to render their submissive noiseless virtue their chiefest ornament, and men should cherish and honour them. All should be full of sympathy and love, and mutual indulgence. Their innocence should be so marked as to shame the calumniator, and they should make preparation for the approaching catastrophe, when they should have an opportunity of imitating Jesus in their sufferings: hoping for them all to have no other reproach than that of being his disciples. The presbyters are enjoined to watch over their flocks, and the subordinate to pay them respect, and all should be on the watch, and lay aside their worldly cares. All these exhortations are enforced by the example of Christ, and by the punishment of the disobedient in the days of Noah, those spirits in prison to whom Christ went and preached (iii. 19, 20).

The Second Epistle of St. Peter [Antilegomena] has been the subject of more discussion than any other book in the New Testament, and its genuineness has been contested by not a few of the ablest critics. Our space will not allow us to notice in detail all the objections which have been raised against it, but it will be our duty to state the most important. Its genuineness, the date of its composition, and its characteristics, are so intimately connected, that we shall pursue a different method in treating of this Epistle from that which we have adopted in regard to other books.

The author of the first epistle refers (1 Pet. v. 12) to a former letter, now no longer extant, which has been generally concluded to be a private communication, as the present is expressly called the *Second* Epistle (2 Pet. iii. 1). The first writer who has expressly named it is Origen (*Homily on Joshua*), who speaks of the *two* Epistles of Peter. He also cites the second epistle in his fourth *homily on Leviticus*, 'Petrus dicit, *consortes*, inquit, *facti estis divinæ naturæ*' (2 Pet. i. 4), and gives it the name of *Scripture* ('as the Scripture says in a certain place, *the dumb ass, replying with a human voice, reproved the madness of the Prophet*,' alluding to 2 Pet. ii. 16; *Opp.* ii. p. 321). At the same time he observes (*ap. Euseb.* vi. 25) that 'Peter has left one acknowledged Epistle, and perhaps a second, for this is contested.' Firmilian, Bishop of Cappadocia, also (*Ep. ad Cyprian.*) speaks of Peter's *epistles* in a passage referring evidently to the second. Earlier *allusions* have been supposed to exist in the Shepherd of Hermas (*Vision* iii. 7), 'reliquerunt viam suam veram' (2 Pet. ii. 15), and *Vision* iv. 3, 'effugistis sæculum hoc' (2 Pet. ii. 20). Clemens Romanus has also been thought by some to have referred to this epistle, in the passages, 'saved Noah, the eighth preacher of righteousness' (see 2 Pet. ii. 6), and 'by hospitality and piety Lot was delivered from Sodom, when the whole region was destroyed by fire and brimstone, the Lord thereby making it manifest that he does not forsake those who trust in him, but those that turn aside he appoints to punishment and torment' (2 Pet. ii. 6, 7, 9).

Irenæus (A.D. 178) is supposed by some to allude to 2 Pet. iii. 8, 'The day of the Lord is as a thousand years;' as is also Justin Martyr, who cites the same passage in an earlier part of the same century. But others have supposed that the allusion here is to Ps. xc. 4. Eusebius observes (*Hist. Eccles.* vi. 14) that 'Clement of Alexandria (A.D. 192-217) wrote, in his Ὑποτύπωσεις ('Adumbrations'), commentaries on the canonical epistles, and also on the antilegomena, that is, Jude and the other Catholic epistles, together with that of Barnabas, and the so-called Revelation of Peter.' Cassiodorus, however, who published a Latin translation of the Adumbrations (*De Instit. div. leg.* c. 8), seems to confine the explications of Clement to 1 Peter, 1 and 2 John, and James.

Although we do not know by whom the collection of *Catholic Epistles*, as distinct from the Pauline, was made, yet there can be no reasonable doubt that such collection, including all the *Antilegomena*, existed before the close of the second century. It was well known in the time of Origen, and is referred to by Eusebius as generally received in his time (*Hist. Eccles.* ii. 23), for he expressly calls St. James's 'the first of the *seven* Catholic epistles.' Eusebius at the same time informs us of the doubts which had been raised before his time in regard to our epistle:—'That called the Second Epistle of Peter, as we have been informed, has not been received as a part of the New Testament. Nevertheless, appearing to many to be useful, it has been carefully studied with the other Scriptures' (*Hist. Eccles.* iii. 3). The next writers who refer to the doubts respecting our epistle, are Didymus, the blind teacher of Alexandria, in the fourth century, and his pupil St. Jerome. The former acquaints us (*Comment.*) that 'it should not be concealed that the present epistle was *considered spurious* (*falsatam esse*), and that although published, it was not in the Canon.' And Jerome observes (*De vir. illustr.*), that 'Peter wrote two epistles called Catholic, the second of which had been denied by many (or most, *plerique*) to be his, because of the difference of style.' And again, 'Paul had for his interpreter Titus, and Peter had Mark, ... the two epistles attributed to Peter differ in both style and character, and the structure of their language; from which we must of necessity suppose that he made use of two different interpreters.' It may be here observed that the Fathers supposed that such of the sacred writers as did not understand Greek (among whom they reckoned St. Peter) dictated in their native language to an amanuensis, who wrote down in Greek what they had uttered in Hebrew. Silas, or Silvanus, has been conjectured to have acted in this capacity to St. Peter in the writing of his first epistle (1 Pet. v. 2). Finally, St. Gregory the Great observes, towards the close of the sixth century, that there were some who asserted that 'Peter's second epistle, in which Paul's epistles were commended, was not his.' 'Before the fourth century,' observes the Roman Catholic Professor Hug, 'Christian writers with perfect freedom advocated or denied the authority of certain writings of the New Testament according as their judgment dictated.' We find, however, that before the close of the fourth century the doubts had subsided, and this epistle was received as genuine by St. Athanasius, St. Cyril, St. Epiphanius, St. Jerome, and St. Augustine, and by Rufinus. Gregory Nazianzen alone considers it doubtful whether *three* or *seven* Catholic epistles ought to be used. The only

dissentient voices, after this period, were probably Theodore of Mopsuestia, and Cosmas Indicopleustes [ANTILEGOMENA], the latter on dogmatical rather than critical grounds, as the destruction of the world by fire clashed with his opinions. It is enumerated in the canon of Laodicea (A.D. 360 ?), and in the 85th apostolical canon, and was finally adopted by the councils of Hippo and Carthage, which included among the canonical books all those which are now commonly received, making no distinction, however, between the acknowledged and controverted books of the New Testament, or between the canonical and deuterocanonical of the Old.

Although before this period certain books were rejected from the defect of historical evidence, or from internal grounds of suspicion, an undeviating uniformity now took place, and no controversy was raised respecting any of the books of the New Testament until the inquiring age which ushered in the Reformation. We now find Erasmus denying the genuineness of our epistle. Although Luther does not appear to have had any doubts of its genuineness, he revived the ancient distinction in regard to the books both of the Old and New Testament,—separating the apocryphal books of the Old Testament from the canonical, and in the enumeration of the books leaving the antilegomena of the New without any numbers attached to them; and in the Lunenberg edition of Luther's Bible, published in 1614 (68 years after Luther's death), these books are headed by the words, 'Apocrypha of the New Testament' [ANTILEGOMENA]. Our epistle was called in question by Calvin (*Comm. in Ep. Cath.*), who observes, that 'notwithstanding some affinity in style, the discrepancies between it and the former are such as to indicate that they had not the same author.' It was, however, received by all the Reformed Confessions, as well as by the Council of Trent. It has been since that period rejected by Grotius (*Annot.*), Scaliger (*Scaligeriana*, ii. p. 22), Salmasius (*De Episc.* p. 145), Semler (*Præf.*), Eichhorn (*Einleit.*), Schmidt (*Einleit.*), Walker (*Clavis*), Schott (*Isag.*), Guericke (*Beitrage*, p. 176, note), Credner (*Einleit.*), De Wette (*Einleit.*), Ullmann, to some extent (*Der 2 Brief Pet.*), and Neander (*Hist. of the Planting, &c.*). Among its numerous defenders it will be sufficient to mention the names of Michaelis (Marsh's transl., vol. vi.), Lardner (*l.c.*) Pott. (*Proleg.*), Augusti (*Einleit.*), Flatt (*Progr.*), Dahl (*Dissert.*), Bertholdt (*Einleit.* vol. vi.), who, however, rejects the second chapter; Nietzche (*Dissert.*) and Olshausen (*Opusc. Academ.*), with the learned Roman Catholics Hug (*Introd.*) and Feilmoser: the latter, however, fluctuates in his opinion (*Einleit.* p. 527).

Before proceeding to consider the grounds for and against the rejection of this epistle, it may be useful to inquire into its internal structure and contents.

The writer designates himself here as the apostle Peter (Simon, or, according to some MSS., *Symeon* Peter, 2 Pet. i. 1; comp. Acts xv. 14; John's Gospel, *passim*) more clearly than in the first epistle; as personally known to Jesus (i. 14); as a beloved brother of Paul (iii. 15); and as the author of the first epistle (iii. 1). It is addressed to the same persons with the first, whom he presupposes to be acquainted with the writings of St. Paul (iii. 15; comp. Rom. ii. 4). Neander (*Planting of the Church*) asserts that the readers appear to have been personally instructed by the apostle, which implies a relationship in which the author did not stand to the readers of the first epistle. He refers to his approaching death (i. 14). The main object is the refutation of erroneous teachers. He, therefore, as an eye-witness of the acting and teaching of Jesus, is enabled to give them more accurate instruction than those who would mislead them. He exhorts them to advance in the knowledge and doctrine of Jesus, by adding to their faith fortitude (ἀρετήν), and every other excellent quality. He denounces (ch. ii.) punishment against false teachers, by examples drawn from the disobedient angels, the world before the flood, and Sodom and Gomorrah. He inveighs against those teachers for resigning themselves to impurity, and speaking evil of God and angels, whereas angels have not ventured to do this even of Satan. He compares them to the false prophet Balaam, and to clouds filled with wind. He rebukes those mockers who doubted of the coming of Christ, which was only delayed in mercy, but predicts the dissolution of the world by fire, and warns them to keep themselves in readiness for the new heavens and the new earth.

We have already seen that the main reasons which induced many of the ancients to reject this epistle arose from the difference in style and structure between the first and second epistle. The ancients have, however, not entered into detail in the examination of this subject, a task which has been left to their more critical successors. It is said, for instance, to be distinguished by a different *usus loquendi*, as by the word σωτῆρ, frequently applied to our Lord; παρουσία, day of the Lord, or of judgment; and instead of 'revelation,' knowledge (γνώσις and ἐπιγνώσις) is said to be enforced with peculiar prominence. The Christian religion is called 'the way of truth, and of righteousness' (ii. 2, 21). It contains a surprising multitude of ἅπαξ λεγομένα, instead of the very few found in the first epistle. A remarkable difference has been observed in respect to the appellations of our Saviour, who is in the first epistle generally called simply Christ or Jesus Christ; but the word κυρίος, which in the first epistle often occurs, and is always applied (with one exception only, i. 3) to God the Father, is applied in the second in almost every place to Christ. Its application in all other passages in the first epistle is confined also to citations from the Old Testament, except in ii. 13, where the Vulgate reads *Deum*. It is peculiar to the first epistle to subjoin to the terms God, Jesus Christ, and the Holy Spirit, epithets designed to exalt the glory of the divinity. The second epistle has no quotations from the Old Testament,—in which the first abounds, and is remarkable for clothing its sentiments in the language of the Old Testament. De Wette furnishes as instances of repetition, indicating a carelessness of style in the author of the second epistle, 2 Pet. i. 3, 4, where occur δεδωρημένος, and δεδώρηται, and διὰ is several times repeated; 2 Pet. ii. 1-3, in which ἀπωλεία occurs three times; 2 Pet. ii. 7, 8, in which δίκαιος occurs as many times; and 2 Pet. iii. 12-14, in which there is a similar repetition of προσδόκειν. The first epistle is also said to be remarkable for a frequent and peculiar use of the particle ὡς, of

which the second furnishes but one example (i. 19). Olshausen adds, that in the second epistle the subjects proceed in regular order, and uninterruptedly, while the first is remarkable for detached and independent sentences (see 1 Pet. i. 3-12).

But in compensation for these differences, the resemblances are remarkably striking. One of the most obvious of these is the reference in both to the deluge, and the number of persons saved, the first epistle mentioning *eight* persons (1 Pet. iii. 20), and the second speaking of Noah the *eighth*, ὄγδοον Νῶε δικαιοσύνης κήρυκα (2 Pet. ii. 5). Some, however, here connect Noah with the following words, viz., Noah, the *eighth preacher of righteousness*, comparing it with the parallel passage in Jude, 'Enoch, the seventh from Adam,' the Jews having various ways of enumerating the good men who lived before Abraham (Ullmann, *Der zweite Brief P.*).

There are some words used in a peculiar sense by the author of each epistle, as ἀπόθεσις (1 Pet. iii. 21; 2 Pet. i. 14); ἀρετή (1 Pet. ii. 9; 2 Pet. i. 3); ἀναστρέφεσθαι (1 Pet. i. 17); ἀναστροφή (1 Pet. i. 15; ii. 12; iii. 1, 17); ἀμώμος and ἄσπιλος (1 Pet. i. 19; 2 Pet. ii. 13); πορεύεσθαι (1 Pet. iv. 3; 2 Pet. ii. 10; iii. 3); ἐπιθυμία (1 Pet. i. 14; 2 Pet. ii. 10; iii. 3); ὁ καλέσας (1 Pet. i. 15; ii. 9, 21); and ἴδιος (1 Pet. iii. 1, 5; 2 Pet. i. 20; ii. 16, 22; iii. 16). Some critics have, indeed, vindicated the genuineness of the epistle principally on the ground of resemblance in both sentiment and diction. Of these it will be sufficient for our purpose to refer to Hug and Michaelis. The former of these observes that the resemblance between the two is 'so thorough as to denote an identity of authorship' (Fosdick's transl.); and Michaelis had before this asserted (*l. c.*) that the agreement between them appeared to him to be such, 'that if the second was not written by St. Peter, the person who forged it not only possessed the power of imitation in a very unusual degree, but understood likewise the design of the first epistle, with which the ancients do not appear to have been acquainted.' The principal difference of style, however, is found in the second chapter, the character of which is totally unlike anything contained in the first epistle. The resemblance, indeed, between this chapter and the short epistle of St. Jude is so striking, that it has been at all times perceived that one must have at least read, if not copied from the other.

All those theologians who have disputed the genuineness of Peter's second epistle, have maintained that its writer adopted the sentiments and language of Jude, and this opinion is favoured even by many of the modern advocates of its genuineness, including Olshausen and Hug. But which of the two wrote first is, notwithstanding, a question impossible to decide. 'St. Jude's Epistle is so like the second chapter of St. Peter's Second Epistle,' says Bishop Sherlock, 'the figures and images in both are so much the same, ... that it has been commonly thought that St. Jude copied after St. Peter's Epistle.' This was the more generally received opinion, and was held among the ancients by Œcumenius (ii. p. 633), and maintained at the time of the Reformation by Luther, who observes, in his *Preface*, that 'no one can deny that Jude's Epistle is an extract or copy from St. Peter's Second Epistle, as the very words are nearly the same . . . . and allegeth stories which have no place in Scripture' [Enoch; Jude]; see also *Edinburgh Review*, Oct. 1834, and the extract from it in Mr. Ward's *Ideal of a Christian Church*, 1844, p. 175, where Luther is reproached for maintaining this opinion. It was, however, adopted by Mill (*Proleg.*), Michaelis (*Introd.*), Storr (*Opusc.*), Haenlein (*Einleit.*), Dahl (*De αὐθεντία Ep. Petr. poster. et Jud.*), Wetstein (*Test. Nov.*), and among the Roman Catholics by Du Pin and Calmet. One set of critics have supposed that one of the writers of these epistles had intended to illustrate at large what the other had briefly stated; others, that one sought to abridge what the other had stated diffusely. The former of these views is maintained by Hug and Olshausen. The latter writer founds his view on the fact that Peter does not give the minute statements found in Jude, especially in regard to the history of angels; in which passages Jude alone goes into details, while Peter advances a general historical fact,—which he conceives to be characteristic of a later composition.

Dr. Sherlock, bishop of London, adopted a middle course. Perceiving that the argument from the style affected only the second chapter, which 'abounds in pompous words and expressions,' and that the style of this chapter differed as much from the rest of the second epistle as it does from the first, he conceived that neither writer borrowed from the other, but that each made use of a common document. The explanation of St. Jerome, that Peter used two different interpreters, the bishop entirely rejects, as, if this were the case, the difference of style would have appeared in the whole epistle, and not in the second chapter only. The bishop conceives that notwithstanding the remarkable resemblance between both, there is sufficient variation to prove that the one was not a mere transcriber of the other's thoughts or language. 'St. Peter has an instance not to be found in Jude; and St. Jude has an instance not to be found in Peter: St. Jude quotes the prophecy of Enoch, of which St. Peter says nothing; St. Peter refers to the preaching of Noah, of which St. Jude says nothing, although both relate to one and the same thing, the destruction of the old world.' The circumstance that each quotes from a common Hebrew document will, in his lordship's judgment, account not only for the difference in style between Peter's two epistles, but for that which exists between the second chapter and the first and third of Peter's second epistle. The bishop at the same time admits that there are some instances of agreement which cannot possibly be drawn from any Jewish book (as 2 Pet. ii. 1-13, comp. with Jude 4-12; and 2 Pet. iii. 2, 3, with Jude 17, 18). He therefore supposes that Jude had both the Second Epistle of Peter and the old Jewish book before him. Herder supposes this lost book to have been the Zendavesta of Zoroaster. The strongest objection to Bishop Sherlock's ingenious conjecture will be found in the fact that the resemblance to the epistle of St. Jude is not confined to the second chapter of Peter's Second Epistle, but will be found equally striking in the third chapter, amounting, in the originals, although not in the English authorized version, nearly to identity of expression (comp. 2 Pet. iii. 2, 3, μνησθῆναι τῶν προειρημένων ῥημάτων ὑπὸ τῶν ἁγίων προφητῶν,

καὶ τῆς τῶν ἀποστόλων ἡμῶν ἐντολῆς τοῦ κυρίου καὶ σωτῆρος· τοῦτο πρῶτον γινώσκοντες, ὅτι ἐλεύσονται ἐπ' ἐσχάτων τῶν ἡμερῶν ἐν ἐμπαιγμονῇ ἐμπαῖκται κατὰ τὰς ἰδίας ἐπιθυμίας αὐτῶν, &c., with Jude 17, 18, μνήσθητε τῶν ῥημάτων τῶν προειρημένων ὑπὸ τῶν ἀποστόλων τοῦ κυρίου ἡμῶν Ἰησοῦ Χριστοῦ, ὅτι ἔλεγον ὑμῖν ὅτι ἐπ' ἐσχάτου χρόνου ἐλεύσονται ἐμπαῖκται κατὰ τὰς ἑαυτῶν ἐπιθυμίας, &c. A late eminent critic, perceiving that the opponents of the epistle were induced by this resemblance of the second epistle to St. Jude to deny its genuineness, maintained that this resemblance was accidental, and has endeavoured to show that the second chapter is an interpolation, and that without it there is a closer connection between the first and third chapters (Bertholdt, *Einleitung in die Schriften des A. und N. Test.*). But it has been satisfactorily shown in reply, that though the second chapter has no necessary connection with either the first or third, yet there are references in the third chapter to matters propounded in the second. Bertholdt conceives that the argument against the epistle, founded on the difference of style, is met by adopting his view, as the first and third chapters agree in style with the first epistle. Olshausen maintains, in reply to this, that the circumstance of Peter's having appropriated a great part of Jude's epistle, will of itself account for the difference of style in the second chapter; and that there is no discrepancy between the style of the first and second epistles of Peter, which is not common to every part of the second epistle, or strikingly peculiar to the first and third chapters. The hypothesis of Bertholdt, even if true, would not remove the difficulties, as many of the circumstances which have been supposed to militate against the genuineness of the epistle are found in the first, and still more in the third chapter. It would be doing an unnecessary violence to our epistle, in direct opposition to all external testimony.

Ullmann proceeded one step farther. 'Not long since,' says Hug, 'the Second Epistle of Peter met with an opponent, who menaced its dismemberment, and maintained his right to do this violence with learning and acuteness.' He separates it into three distinct portions, which happen to correspond with the present division into chapters. The first chapter he ascribes to Peter, and considers it to be one of his epistles, the conclusion of which was early lost. To this precious relic some unknown person, to effect a well-meant purpose, has added the two next chapters, for which the Epistle of Jude afforded him materials. The object of this writer, as well as of Bertholdt, is to vindicate the genuineness of part of the epistle, by rejecting those parts which are beset with greatest difficulties.

But while Ullmann, the divine alluded to (*Der zweite Brief Pet. krit. untersucht*, 1821), clearly shows that Bertholdt's hypothesis merely lessens, without removing the difficulty, his own solution of the remaining objections, which consists simply in cutting the knot, has not been such as to satisfy any reasonable mind. He argues from a resemblance in style between St. Peter's first epistle, and the first chapter of the second, and particularly from the use in each of certain words in a peculiar sense, as ἀρετή, ἀπόθεσις, &c., that these portions emanated from the same writer, and further maintains that there is no coherence between the first chapter and the remaining portions of the epistle. But it has been shown that this incoherence exists only in the fancy of the learned German, as the first chapter (4, 16, 17) is but a preface to the refutation of erroneous opinions in the second (Hug's *Introd.*); and, further, from a comparison of the first with the third chapter, that there are sufficient resemblances of expression to show that the whole epistle had an identical origin (Olshausen, *De Integritate et authent. post. Pet. ep.*).

But although neither these resemblances between the Epistles of Peter and Jude, nor the difference in style between the First and Second Epistles of St. Peter, are of themselves sufficient to destroy the genuineness of St. Peter's epistle, yet they would doubtless have some weight in affecting it, if supported by other internal marks of spuriousness. We shall therefore now consider whether such marks actually exist, and shall mention the principal indications which have had weight in the minds of some learned men against the authority of our epistle. In the first place, anachronisms have been pretended to be discovered which remove the epistle from the apostolic age and place it in the second century. The first who imagined that he discovered an indication of this nature was the illustrious Grotius, who, conceiving that the errors of the Carpocratians, a sect which originated in the second century, were those against which the second and third chapters were directed, ascribed the authorship of the epistle, not to Simon or Simeon Peter, but to Simeon, bishop of Jerusalem, the successor of St. James. This opinion, however, which assumes upon mere conjecture that the name *Peter* (i. 1), the words *our beloved brother* (iii. 15), and the 16th, 17th, and 18th verses of the first chapter, were interpolated by those who wished to have the epistle pass for Peter's, has been long exploded (see especially Nietzch, *Epist. Petri posterior auctori suo imprimis cont. Grotium vindicata*, Leips. 1785), and Berthold, *Einleitung*, vol. vi. p. 310, sq.). Nietzch has shown that the representation of the heretics described by Peter does not accord with the Carpocratians. It is as probable that the Gnostics were the heretics aimed at, the seeds of whose heresies were doubtless sown in the apostolic age. 'This second Epistle' (iii. 1), in the opinion of Grotius, refers to the third chapter only, the two former chapters forming a distinct and previous letter.

The doubts respecting the coming of Christ, expressed in 2 Pet. iii. 4, have also been considered as indicating a later age than the apostolic, and it has been asserted by the opponents of the genuineness of our epistle, that sufficient time had not elapsed during St. Peter's lifetime for the application of the expression 'our fathers have slept.' This passage is also one of those adduced by Ullmann (*l. c.*) against the genuineness of the third chapter. Olshausen has replied to this objection by maintaining that the scoffers referred to were not believers, but gnostic heretics, who ridiculed the faith of true Christians in relation to the return of Christ.

But a still more remarkable anachronism has been pretended to be discovered in 2 Pet. iii. 15, 16, where Paul is said 'in *all his epistles* ..... which the unlearned and unstable do wrest as they

do the *other Scriptures*' (τὰς λοιπὰς γραφάς), &c. —thus both attributing a collection of the Pauline epistles to a period within the lifetime of their author, and applying the term Scriptures, which is exclusively applied by the New Testament writers to the Scriptures of the Old Testament, to the Epistles of St. Paul. Now it is well known that there was no collection of St. Paul's epistles completed before the second century, and that to no part of the New Testament was the term *Scriptures* applied until near its close [SCRIPTURE, HOLY]. In respect to the former part of this objection, however, it has been well shown by Augusti (*Commentar über die Cathol. Brief.*) that Peter does not here refer to *all* the epistles of St. Paul, but that the word *all* is to be taken relatively, and referred to the more important epistles, which were most probably widely diffused in the lifetime of the apostle. To the reasoning derived from the phrase 'the *other Scriptures*,' wherein the word λοιπάς with the article is said by Ullmann to indicate things of a like nature, more than one reply has been given. It has been shown that things of a different nature are sometimes referred to by this phrase (comp. Luke xviii. 9; Acts v. 13; Ephes. ii. 3; and iv. 17, if the reading be correct). Another interpretation of the words has therefore been proposed, viz., that the word 'scriptures' here has no reference to the sacred writings, but to books in general, or such writings as were used by the parties referred to. Olshausen, however, has given an interpretation, by which he conceives the serious difficulties by which this passage is beset may be wholly removed. He supposes that the words, 'in *which* are some things hard to be understood,' relate to the epistles which Paul had sent to the readers of Peter's epistle, and that the *other scriptures* are the other *epistles* of St. Paul, just before named, πάσαι ἐπιστολαὶ (all his epistles). This explanation seems much more satisfactory than that of Storr (*De Cath. Epist. Occas. et Consil.*), who conceives that 'other scriptures' mean other *passages* in the same epistles of St. Paul, as γραφή signifies a passage in Mark xv. 28, Luke iv. 21, where, however, it means a particular passage, but not any passage indiscriminately.

An objection of quite a different character has been derived from 2 Pet. iii. 2, already referred to; in our English Version, 'the commandment of us the apostles of the Lord.' But the order of the words in our Greek copies will not bear this rendering: to answer our Version, we must read ἡμῶν τῶν Ἀποστόλων. These words, therefore, 'our apostles,' as the words must be translated, would seem to separate the writers from the apostles. Bishop Sherlock proposes that the sentence be transposed, and that the word ἡμῶν be placed after κυρίου, as in the parallel passage in Jude 17, when the whole sentence would run thus, καὶ τῆς τῶν Ἀποστόλων ἐντολῆς τοῦ κυρίου ἡμῶν καὶ σωτῆρος, 'the commandment of the apostles of our Lord and Saviour;' a reading supported by the Æthiopic, and which Olshausen also favours, observing that 'there are as many genitives as there are words, and these not following each other in proper order.' But there is no necessity for having recourse to conjecture, if we adopt the reading of the Alexandrine, the Vatican, the Ephrem, and other manuscripts, which instead of ἡμῶν have ὑμῶν. According to this reading there is no further difficulty, and the sentence will stand thus: 'the word spoken by the holy prophets and *your* apostles, the commandment of the Lord and Saviour.' This reading is also confirmed by the Vulgate, which has 'et apostolorum vestrorum, præceptorum Domini et Salvatoris.' The Syriac also reads, 'the commandment of our Lord and Saviour, which through the apostles.'

On another alleged anachronism, brought forward by Neander (*Hist. of the Planting, &c.*), founded on the phrase 'the holy mount' (2 Pet. i. 18), we shall merely observe that this might with as much force be adduced as an argument against our epistle being a work of the second century.

An objection has been also taken from Peter's referring to the aqueous origin of the earth and its destruction by fire, which Ullmann and others consider mythical in their character. But so far from this being the case in regard to the origin of the earth, it completely coincides with the Mosaic cosmogony; and as to the destruction of the world by fire, although nowhere else alluded to in the New Testament, it is not only intimated by the prophets, but is in strict accordance with the physiological conclusions of the science of modern geology. If Wetstein's interpretation be well founded, and if the writer made use of these strong figures to indicate the Roman war, and the destruction of the Jewish state and city, instead of forming an objection, they will furnish an additional and powerful argument in favour of the early date, and consequently of the genuineness of our epistle.

It is fully conceded that there is no other book in the New Testament against whose authority so many arguments can be adduced as against this epistle. One of the most impartial as well as ablest critics of modern times, after weighing them all, comes to the conclusion that neither its genuineness nor its spuriousness can be demonstrated by undoubted arguments; but, while he admits that unfriendly critics will see occasion for doubt, yet, relying on subjective grounds, he is persuaded of the authenticity of the epistle, and that the arguments which go to disprove its genuineness are not of sufficient weight to establish its spuriousness, or cause it to be 'stricken from the number of inspired books.' This is in accordance with the decision which he has formed of the sacred books, and which consists (1) of those whose genuineness and authorship can be determined; (2) of those whose spuriousness can be shown, of *which there are none;* (3) of those whose author is uncertain, but whose authenticity is clear, viz., Hebrews, James, 2 and 3 John, and Jude; and (4), those whose authenticity or spuriousness cannot be positively ascertained. These are, in his estimation, 1 and 2 Timothy, Titus, and 2 Peter. To these he adds the Apocalypse, as being a work of a peculiar kind, but of whose genuineness he entertains no doubt (Olshausen, *ut supra*).

The authorship of other portions of the sacred writings may indeed be rendered uncertain, without throwing any doubts on their right to a place in the canon, as in the instance of the Epistle to the Hebrews. No one contests the right of the Epistles of Jude or of James to their present position in the canon, although it is uncertain whether their authors were the apostles of those names or the brethren of our Lord. But it is far otherwise with the

Epistle of St. Peter. As Calvin has observed, 'If it is to be received as canonical, Peter must have been its author . . . . .; for any other one to have personated the apostle would have been a deception unworthy the Christian name.' It has been indeed maintained that some well-meaning individual may have personated Peter, either to intimate that a reconciliation had taken place between him and St. Paul, to strengthen the minds of the Gentiles who doubted the coming of Christ, or the more easily to gain advantage over the heretics. But although it may be true that some writers have through modesty (see Lee's *Dissertation upon* 2 *Esdras;* Laurence's *Ascensio Vatis Isaiæ*, p. 178; and the Rev. W. Mascall's Preface to the *Ancient Liturgy of the Church of England*, 1844) used another's name and prefixed it to their work, we are convinced, with Olshausen, from the internal structure of our epistle, that it would not have been possible to have found a pious man the bold and unblushing inventor of a literary artifice so manifest as the author in question must have been if he had dishonestly assumed the character of Peter. We must also bear in mind how cautious and discriminating were the Fathers of the Church, who first admitted this book into the canon. Nor were they strangers to the application of the higher criticism, while they had opportunities of adducing external evidence, which is not within our reach. 'Higher criticism,' says Hug, 'is still open to us, and I even entertain the hope of drawing from it manifest proofs of the genuineness of some of these epistles, particularly those of James and Jude, and the Second of St. Peter.' Its apostolical character is confessed. 'In the two epistles of Peter,' says Priestley, 'many attentive readers have observed that . . . . . there is a peculiar dignity and energy, exceeding any thing in the writings of Paul, and worthy of the prince of the apostles' (*Hist. of Christian Church*, i. 141; see also Wright's *Seiler*, p. 513).

By those who acknowledge its genuineness its date is generally fixed about the year A.D. 65, or not long before Peter's death, which they deduce from 2 Pet. i. 14. Wetstein concludes from 2 Pet. iii. that it must have been written before the destruction of Jerusalem, in which case none will allege that any but Peter could have been its author. If it were proved that Peter had Jude's epistle before him, this must have been written not long before the same period, which agrees with the time assigned by Dr. Lardner, between 64 and 66 [JUDE]. But if Jude certainly quoted the book of Enoch, and if the result of the investigation of Lücke, who concludes that this book was written in the first century, at the time of the Jewish war, and probably after the destruction of Jerusalem, be correct, this circumstance would of itself, *cæteris paribus*, settle the question in favour of the priority of St. Peter's second epistle [JUDE]. Bishop Sherlock maintains that there are no less than five years intervening between the date of the two epistles of Peter (see *Dissertation on the Authority of the Second Epistle of St. Peter*).—W. W.

PETRA (called by the earlier Greek writers Πέτρα or ἡ Πέτρα, but by the later αἱ Πέτραι) was the capital of the Nabathæan Arabs in the land of Edom, and seems to have given name to the kingdom and region of *Arabia Petræa*. As there is mention in the Old Testament of a stronghold which successively belonged to the Amorites (Judg. i. 36), the Edomites (2 Kings xiv. 7) and the Moabites (Isa. xvi. 1, comp. in Heb. ch. xlii. 11), and bore in Hebrew the name of סֶלַע *Selah*, which has the same meaning as *Petra* in Greek, viz., 'a rock,' that circumstance has led to the conjecture that the Petra of the Nabathæans had been the Selah of Edom. But the consideration of that point in a work of this nature falls more naturally under the Bible head of SELAH, to which article accordingly the reader is referred; and there likewise the question will be disposed of as to whether (on the supposition of Petra being the Selah of Scripture) its site is to be identified with that of the modern *Kerek*, or with the locality of the far-famed *Wady Mûsa* [ARABIA; IDUMÆA; NEBAIOTH].—N.M.

PHARAOH (פַּרְעֹה; Sept. Φαραώ), the general title of the kings of Egypt in the Old Testament, and found only there and in the writers who have drawn from that source. It often stands simply like a proper name (Gen. xii. 15; xxxvii. 36; xl. 2, sq.; xliv. 1, sq.; and so generally throughout the Pentateuch, and also in Cant. i. 9; Isa. xix. 11; xxx. 2). 'King of Egypt' is sometimes subjoined to it (1 Kings iii. 1; 2 Kings xvii. 7; xviii. 21); and sometimes also the more specific designation, or real proper name of the monarch is indicated, as Pharaoh Necho (2 Kings xxiii. 33), Pharaoh Hophra (Jer. xliv. 30). Josephus intimates that the word signifies 'the king' in the Egyptian language (*Antiq.* viii. 6. 2). This is apparently confirmed by our finding the word 'king' written in the dialect of Memphis, ⲟⲩⲣⲟ *ouro*, and with the masculine article ⲡⲟⲩⲣⲟ *piouro* (Jablonsky, *Opusc.* i. 374; Peyron, *Lex. Copt.*, p. 150). The idea has, however, been more recently started that Pharaoh corresponds to the Egyptian 𓉔-𓂋𓇋 *phra*, 'the sun,' which is written as an hieroglyphic symbol over the titles of kings (Rosellini, *Monument. Storici*, i. 117; Lipsius, *Lettre à Rosellini*, p. 25; Wilkinson, *Anc. Egyptians*, iv. 287). It seems to us that this explanation might be admitted without contradicting the other, seeing that it is not only possible, but highly probable, that the Egyptians should make the name of the sun a royal title, and that at length custom rendered it equivalent to 'king.' The practice of ancient, and, indeed, modern Oriental kings, of associating the idea of their own dignity with the glory of the sun, is well-known.

PHARAOH-HOPHRA. [HOPHRA.]

PHARAOH-NECHO. [NECHO.]

PHARISEES (in the Talmud פרושין). The name denotes those who are separated, *i. e.* from ordinary persons, of course, by the correctness of their opinions and the holiness of their lives. They were a Jewish sect who had the dominant influence in the time of our Lord, to whose faults the overthrow of the state may be attributed, and who have to bear the awful burden of having crucified the Lord and giver of life.

A full and accurate knowledge of the Pharisees is even more important to the reader of the New Testament than of the two other leading philosophical schools, because our Lord's doctrine has an immediate reference to their several opinions,

because these opinions constituted the source of the power which was arrayed against him, and because, absurdly enough, it has been asserted (as what paradox has not?) that Jesus did but borrow from these schools what suited his purpose, so that his system is nothing more than an heterogeneous compound of old Jewish doctrines, dressed up anew in order to serve a new purpose (Hennell's *Enquiry concerning the Origin of Christianity;* London, 1838).

The force of character which Moses possessed, the wisdom he displayed, and the excellence of his institutions in general, are seen in the fact that for many centuries after his death no sect arose among the Jews. Such was the deep impression which he made on the Hebrew nation that they ever after retained it, and only under peculiar circumstances allowed any disturbing and effacing influences to affect it. So long as the culture of the nation flowed on in its own original and proper channel, the Jewish religion was free from even a trace of sectism. But when foreign influences came into immediate contact and entered into close union with Mosaism, then the grounds were laid for diversities of opinion, and ere long, as a natural consequence of diverse currents of impulse, there came into existence different parties, agreeing in scarcely more than one thing, namely, that they were all of a religious description.

The precise period when the Pharisees appeared as a sect, history does not supply us with the means of determining. That they, however, as well as their natural opponents, the Sadducees, existed in the priesthood of Jonathan, in the interval, that is, between 159 and 144 before Christ, is known from Josephus, who (*Antiq.* xiii. 5) makes mention of them as well as of the sect of the Essenes. The terms he employs warrant the conviction that they were then no novelties, but well known, well defined, and two established religious parties. But from the time of Jonathan to that of Ezra (about 460 B.C.), there had taken place no great formative event such as could of itself cause so great a change in the Hebrew system as was the rise of these sects; whereas the influences to which the Israelites had been subject in the Medo-Persian dominions, and the necessarily somewhat new direction which things took on the rebuilding of the Temple and the restoration of the civil and religious polity, could hardly fail, considering the distance from Moses at which these changes happened, and the great extent to which the people had lost even the knowledge of the institutions and language of their forefathers, to lead to diversities of views, interests, and aims, whence sects would spring as a natural if not inevitable result. There is, therefore, good reason to refer the origin of the Pharisees to the time of the return from the Babylonish captivity, a period which constitutes a marked epoch, as dividing the Hebraism of the older and purer age from the Judaism of the later and more corrupt times. Nor, did our space allow, should we find it difficult to trace the leading features of the Pharisaic character back to those peculiar opinions and usages with which the old Israelitish type of mind had been made familiar, and at the same time corrupt, in the Persian empire. Nor are we aware that any solid objection can be taken to this reference of the rise of the Pharisees, provided it is understood that we do not suppose that they sprang forth, as Minerva in the legend, complete at once. These sects lay in embryo among the Jews while scattered over the provinces of Persia, were brought forth at the rebuilding of the Temple, and grew continually in strength till the days of Christ and the overthrow of Jerusalem—division in this, as in all other cases, proving weakness, and issuing in ruin. The Mosaic institutions were in themselves sharply defined and strongly sanctioned, nor could there well originate in them any important differences, still less any sects. But in Persia the scattered Jews were subjected to new and impure currents of opinion, which would do something to overflow and overlay the primitive doctrines and usages. Here, then, was at once a soil for sectism. Puritans would spring up wishing to preserve or restore the original form of doctrine and worship. They naturally called forth defenders of things as they were. But in the disputes which would hence arise, appeal must be made to reason, for the voice of prophecy was extinct, the divine oracles were silent; there remained only the Scriptures and the interpretation of them by means of tradition—a questioned instrument—and reason, to which all were, in the nature of the case, compelled to appeal. But when there is a general appeal to reason in religious questions, then philosophy is born in the church, and may be expected to take the several directions into which the diversities of formation and complexion urge the mind of man to run. Accordingly it is the name philosophy which Josephus gives to the three leading sects—'the Jews had three sects of philosophy' (*Antiq.* xviii. 1, 2; *De Bell. Jud.* ii. 12). This philosophical tendency would, in process of time, be strengthened by the influence of the Western world, whose philosophy was cultivated and spread in the East, and particularly at Alexandria. Unlike the philosophy of the Greeks, however, which had scarcely anything but a human ground on which to stand and labour, the Jewish sects made a divine revelation the object of their philosophical research, and so were saved from the grosser errors and absurd wanderings into which the Greek schools were led while in pursuit of the airy visions of their own heated brain.

There is a tendency in all institutions to grow in process of time. Perhaps the tendency to grow corrupt is not less certain. In the rich and teeming soil of Persia, Hebraism could do no other than become rank. Accretions would also be made, and those in great number. But every accretion would, of course, have the sanction which belonged to the primitive form. There never could be any corruption of religion, did not each new opinion or practice contrive to get to its behalf the sanction of the old and recognised type. Corruptions do not come as corruptions. Accretions fasten themselves on to an ancient institution, and are then defended as old; or they spring out of the body of the institution itself, and then appear a natural offshoot. Any way the old sanctions and perpetuates the new.

Thus the very soil in which Hebraism lay during the captivity, was fitted to produce the philosophy of the Pharisees, which was essentially conservative and aggregative. It, in all times and cases, kept the old, howsoever abundant it became, and did not reject the new, provided its nature and tendency were to add and not to take away. Hence theirs was a system of positive beliefs, distinguished rather by its exuberance than

its purity, retentive of what was established, venerating past ages, decrying novelties though having its very essence in novelties, and excluding all reform as hostile alike to God and man. This tendency to aggregation on the part of the Pharisees is well described by Tertullian (*De Præscrip.* c. 45): 'Pharisæos qui additamenta quædam legi adstruendo a Judæis divisi sunt,'—making the very ground of their separation and the reason of their name to lie in the additions which they made to the ancient law. This same characteristic is found recognised by Josephus, when he ascribes to them the preservation, if not the invention, of tradition.

But as we think it more for the reader's instruction to lay before him the very words in which this sect is described, than to give a philosophical account of the rise and connection of their principles, to which of necessity our own views would impart a colouring, we shall proceed to transcribe a nearly literal translation of the most important passages in question.

'The Pharisees have delivered to the people a great many observances by succession from their fathers, which are not written in the law of Moses, and for that reason it is that the Sadducees reject them, and say that we are to esteem those observances to be obligatory which are in the written word, but are not to observe what are derived from the tradition of our forefathers. Hence great disputes. The Sadducees are able to persuade none but the rich, and have not the populace obsequious to them, but the Pharisees have the multitude on their side.' 'The Pharisees are not apt to be severe in punishments' (Joseph. *Antiq.* xiii. 10. 5 and 6; Epiphan. *Hær.* 15).

'The Pharisees live meanly and despise delicacies in diet; and they follow the conduct of reason, and what that prescribes to them as good they do. They also pay respect to such as are in years; nor are they so bold as to contradict them in anything which they have introduced; and when they determine that all things are done by fate, they do not take away from men the freedom of acting as they think fit, since their notion is that it hath pleased God to make a constitution of things whereby what he wills is done, but so that the will of man can act virtuously or viciously. They also believe that souls have an immortal vigour in them, and that under the earth there will be rewards or punishments, according as men have lived virtuously or viciously in this life. The latter are to be detained in an everlasting prison; but the former shall have power to revive and live again: on account of which doctrine they are able greatly to persuade the body of the people; and whatsoever is done about divine worship, prayers, and sacrifices, is performed according to their directions, insomuch that the cities gave great attestations to them on account of their entire virtuous conduct' (Joseph. *Antiq.* xviii. 1. 3).

'The Pharisees are those who are esteemed most skilful in the exact interpretation of the laws. They ascribe all to Fate (or Providence) and to God, and yet allow that to act what is right or the contrary is for the most part in the power of man. They say that all souls are incorruptible, but that the souls of good men only are removed into other bodies, and that the souls of bad men are subject to eternal punishment. Moreover, the Pharisees are friendly to one another, and are for the exercise of concord and regard for the public' (Joseph. *De Bell. Jud.* ii. 8. 14).

'The Pharisees are a sect of Jews which appear to be more pious than others, and to expound the laws more accurately. These Pharisees artfully insinuated themselves into her (Queen Alexandra's) favour by little and little, and became the real administrators of public affairs; they banished and restored whom they pleased; they bound and loosed at their pleasure; they had the enjoyment of the royal authority, whilst the expenses and the difficulties of it belonged to Alexandra. She was a sagacious woman in the management of great affairs, and became not only very powerful at home, but terrible also to foreign potentates; while she governed other people, the Pharisees governed her. She was so superstitious as to comply with their desires, and accordingly they slew whom they pleased' (Joseph. *De Bell. Jud.* i. 5. 2, 3).

'There was a certain sect that were Jews, who valued themselves highly upon the exact skill they had in the law of their fathers, and made men believe they were highly favoured by God, by whom this set of women were inveigled. These are those that are called the sect of the Pharisees, who were able to make great opposition to kings; a cunning sect they were, and soon elevated to a pitch of open fighting and doing mischief. Accordingly, when all the people of the Jews gave assurance of their good will to Cæsar and to the king's government, these men did not swear, being about 6000; and when the king imposed a fine upon them, Phreroras' wife paid it. In order to requite this kindness, since they were believed to have a foreknowledge of things to come by divine inspiration, they foretold how God had decreed that Herod's government should cease, and that the kingdom should come to her and Phreroras, and to their children; so the king Herod slew such of the Pharisees as were principally accused, and all who had consented to what the Pharisees had foretold' (Joseph. *Antiq.* xvii. 2. 4).

'The Pharisees say that some actions, but not all, are the work of fate (εἱμαρμένη); that some of them are in our own power, and that they are liable to fate, but are not caused by fate' (Joseph. *Antiq.* xiii. 5. 9).

'The sect of the Pharisees are supposed to excel others in the accurate knowledge of the laws of their country' (Joseph. *Vita*, § 38).

'The Pharisees have so great a power over the multitude that when they say anything against the king or against the high-priest, they are generally believed' (Joseph. *Antiq.* xiii. 10. 5).

'The bodies of all men are mortal, and are created out of corruptible matter; but the soul is ever immortal, and is a portion of the divinity that inhabits our bodies' (*De Bell. Jud.* iii. 8. 5).

'Being now nineteen years old, I began to conduct myself according to the rule of the sect of the Pharisees, which is of kin to the sect of Stoics, as the Greeks call them' (Joseph. *Vita*, § 2).

As Josephus himself was a Pharisee, many particulars respecting them may be gathered in his works on occasions when he is speaking in his own person or avowedly delivering an opinion. A remarkable instance presents itself in the *Jewish War* (iii. 8. 5), being an address delivered to his soldiers, when in extremities, against self-destruc-

tion. We shall transcribe only such parts as bear on our subject: 'He is equally a coward who will not die when he is obliged to die, and he who will die when he is not obliged so to do.' 'Self-murder is a crime most remote from the common nature of all animals, and an instance of impiety against God our Creator.' 'The bodies of all men are mortal, and are created out of corruptible matter; but the soul is ever immortal, and is a portion of the divinity that inhabits our bodies. If any one destroys or abuses a trust he hath received from a mere man, he is esteemed wicked and perfidious; but then if any one cast out of his body this divine depositum, can we imagine that He who is thereby affronted will not take cognizance of it?' 'Do not you know that those who depart out of this life according to the law of nature, and pay that debt when he that lent life is pleased to require it back again, enjoy eternal fame? that their souls are pure and obedient, and obtain a most holy place in heaven, from whence in the revolution of ages they are again sent into pure bodies, while the souls of those whose hands have acted madly against themselves are received by the darkest place in Hades?' In the third section of the same chapter Josephus claims for himself skill in the interpretation of dreams as being means by which God presignified events. This power, and his acquaintance with the prophecies contained in the sacred books, prompted and enabled him to address 'a secret prayer to God' for aid and support: he thus gives other reasons for so doing, 'as being a priest himself, and of the posterity of the priests; and just then was he in an ecstasy and set before himself the tremendous images of the dreams he had lately had.' His liability to, and belief in, dreams are exemplified by a passage in his life (§ 42): 'Wonderful it was what a dream I saw that very night; for when I had betaken myself to my bed, grieved and disturbed at the news that had been written to me, a certain person seemed to stand by me, who said,' &c.

Josephus held worthy opinions on religious liberty. Having prevented Jews from compelling some heathens to submit to be circumcised, he adds, 'Every one ought to worship God according to his own inclinations, and not to be constrained by force; and these men, who have fled to us for protection, must not be so treated as to repent of their coming hither' (*Vita*, § 23).

There is another source of our knowledge of the Pharisees—the books of the New Testament. The light in which they here appear varies, of course, with the circumstances to which its origin is due. The reader has just had before him the account of a friend and an adherent, an account which, therefore, we may believe, is conceived and set forth in the most favourable manner. The Gospels present the character of the Pharisees in a darker hue, inasmuch as here a higher standard is brought into use, a loftier morality is the judge. To pass on to the views given in the New Testament. The high repute in which the Pharisees were held, as expositors of the national laws, whether civil or religious, may be seen in John vii. 48; Acts xxii. 3; the casuistry which they employed in expounding the Scriptures, in Matt. ix. 34; xv. 5; xxiii. 16; Mark vii. 7, sq.; their excessive zeal in proselytism, Matt. xxiii. 15; yet their concealment of light and hindrance of progress, Matt. xxiii. 13; their inordinate regard for externals, and oppressive but self-sparing rule, Matt. xxiii. 3, sq., 25; their affectation of grandeur and distinction, Matt. xxiii. 5, sq.; their shocking hypocrisy, Matt. xxiii. 14, 27, sq.; their standing on inconsiderable points, while they neglected such as were of consequence, preferring ceremonial rites to justice and charity, Matt. xxiii. 24; xii. 2-7; Luke vi. 7; John ix. 16, sq.; Mark vii. 1; the display which they affected even in works of religion, Matt. vi. 1, sq.; xxiii. 5; their pride and self-gratulation as assuredly, and before others, religious men, Luke xviii. 9, sq.; their regard to tradition, Matt. xv. 2; Mark vii. 3; they formed schools, which had masters and disciples, Matt. xxii. 16; Luke v. 33; agreeably with their general doctrines, they regarded the act rather than the motive, Luke xi. 39; xviii. 11, sq.; and were given to fasts, prayers, washing, paying of tithes, alms, &c., Matt. ix. 14; xxiii. 15, 23; Luke xi. 39, sq.; xviii. 12; exhibiting themselves to the people, in order to gain their favour, as self-denying, holy men, zealous for God and the law, a kind of Jewish stoics, Matt. ix. 11; Luke v. 30; vi. 2; Matt. xxiii. 5, 15, 29; while in reality they were fond of the pleasures of sense, and were men of lax morals, Matt. v. 20; xv. 4, 8; xxiii. 3, 14, 23, 25; John viii. 7. At an early period they determined in the Sanhedrim to withstand and destroy Jesus, instigated doubtless by the boldness with which he taught the necessity of personal righteousness and pure worship (Matt. xii. 14).

In regard to the opinions of the Pharisees, the New Testament affords only fragments of information, which are, however, in accordance with the fuller particulars furnished by Josephus. From Acts xxiii. 6, 8, we learn that they believed in the existence of higher created beings than man, doubtless the good and bad spirits of the Chaldee philosophy. The same places also instruct us that they held a resurrection of the dead (comp. Matt. xxii. 24, sq.).

It thus appears that the Pharisees were in general a powerful religious party, or rather the predominant influence, in the Jewish state, who aspired to the control of the civil and religious institutions, affected popularity among the people, exerted influence in the councils of kings, queens, and people of rank; were the recognised teachers and guides of the national mind, proud of their orthodoxy, pluming themselves on their superior sanctity, practising austerities outwardly, but inwardly indulging their passions, and descending to unworthy and shameful acts; and withal of narrow spirit, contracted views, seeking rather their own aggrandisement than the public good, of which they used the name merely as a pretext and a cover.

In order to draw a full and complete picture we ought to combine and blend together the accounts contained in Josephus and those contained in the New Testament, which, it is important to observe, so entirely agree that they supplement and illustrate each other, these making up for the defects of those, or unfolding more fully features of which the first give a bare outline or only a single feature; so that, while there is no contradiction, no incompatibility between the two, they appear obviously to have been taken from the same subject and from actual life; whence, we conceive, arises a very strong corroboration of the

historic credibility of the New Testament narratives. A difference of colouring is indeed observable between the picture given in Josephus and that found in the Evangelists: yet the reader will hardly need any aid to enable him to see how the qualities spoken of by the first passed and degenerated into those, so many of which were strongly condemned by our Lord. 'Many circumstances concurred to bring about this corruption. The Pharisees held anxiously to the decisions of the holy writings and the older Jewish teachers. Thus their whole system was built upon authority, and their morality was changed into a casuistry, like that of the Jesuits. To every event that happened they knew how to apply either a passage of the sacred books or an explanation of the same, or a corollary, an inference, an arbitrary extension or restriction. On this account nothing is more pitiable or more ridiculous than their exegetical theology, whence their system of morality became uncertain and unconnected, without general principles, life, and spirit. Thus arbitrariness and ingenuity, instead of reason and solidity, were applied to morals; and to a party which assumed, and by its nature must assume, dominion over the minds of men, the temptation was often too great to accommodate their principles to the passions of men, and to use for the same purpose their casuistry, dependent on authority, which so easily lent itself to this end. The persecutions of Antiochus Epiphanes, the opposition of the Sadducees, bound them only the more to their old precepts and method of teaching, and filled them with an ever-living opposition to every Gentile doctrine and custom. They considered themselves the more as the only genuine and pure Israelitish teachers of religion; they preserved the reverence for the holy books, which had been of old widely spread among the people; and, aided by their principles, which were in fact very rigid, they could not fail to gain with the people a reputation for superior holiness. The greater this reputation became, the greater was the temptation to hypocrisy. The more rigorous were their principles, the more difficult was it to act entirely up to them, and the easier were they led to observe that with a holy *appearance* they could attain the power of imposing on the mass of the people and of ruling over them. This dominion of the Pharisees over the minds of the people was nourishment for their pride, and incentive enough to use it for selfish purposes. Like cunning priests and Jesuits, they played with forms and phrases, they seized a place in the hearts and consciences of men, corrupted them even by means of pious instruction, led them whither they would have them go, acquired many a fair prize, and became rulers of an earthly kingdom of darkness' (Stäudlin, *Sittenlehre*, i. 431).

Even were there discrepancies, however marked, on minor points between our Lord and Josephus, yet the general type and the leading features of the character are in so striking a manner the same, that it is impossible not to feel that if Josephus is true the Gospel-history cannot be false; a consideration which acquires strength, and reaches to a moral certainty, when the subject is considered to which their accounts relate, the admitted independence of the authorities, and especially the incidental and implicatory manner in which most of the information in the New Testament presents itself, and some of that which is found in Josephus. The line of argument might be still further extended did our space allow us to trace the development of the Pharisaic influence on through the primitive Christian age down to later periods, as it would appear that Rabbinism was but an unfolding of Pharisaism, the full and swelling stream of corrupt doctrines, views, and practices, of which the rivulets run up to the days of Christ, and stretch back to those of Ezra, till they are lost in the fountain-head—the religious philosophy of a debased Zoroasterism. And from the contrast which presents itself between this gross earthly system—a system imbued throughout with selfishness—and the pure, benign, heavenly doctrine and life of Christ, there arises (to our mind) an irresistible proof not only that our Lord did not and could not derive anything from the Pharisees, but that no less clearly is his spirit from above than is theirs from beneath—in all which no credit is taken for the bold, manly, noble, and self-forgetful manner in which he unmasked their hypocrisy, laid open their hollowness, condemned their pretensions, and withstood and strove to nullify their influence. It is to unite the hawk and the dove, to bring into one darkness and light, to expect figs from thistles, if we will persist in maintaining that Jesus and the Pharisees had any essential and peculiar features in common—we say essential and peculiar features, because such only are of any value in the argument, since even the Pharisees, as men and monotheists, doubtless had some good traits, and possessed some scattered rays of truth.

Indeed we are not to suppose that there were no individuals in the body free from its prevailing vices. There did not fail to be upright and pure-minded men, who united inward piety to outward correctness of conduct, and were indeed superior to the principles of their sect; such was Nicodemus (John iii. 1); such also Gamaliel may have been (Acts v. 34; comp. *Berach.* xiii. 2; *Sota*, xx. 3; *Babyl. Sota*, xxii. 2). Of men of this kind many were led to embrace the Gospel (Acts xv. 5).

In general, however, their power was all directed against Jesus and his work. With what force they must have acted appears obvious from the preceding remarks. Nor is the reader to imagine that they were merely a few learned men, congregated together in the capital, engaged in learned pursuits or religious practices, and in consequence leaving our Lord at liberty to pursue his ordinary duties up and down the land. The capital was doubtless their head-quarters, but they pervaded the entire country in considerable numbers (six thousand are referred to above), and were therefore present in all parts to withstand the publication of the Gospel of that kingdom every feature of which they hated (Luke v. 17); and as they constituted a large portion of the Sanhedrim (Acts v. 34; xxiii. 6, sq.), and had an almost unlimited influence with the people, great indeed was the power which they wielded in their conflict with the infant church. Perhaps there never was an instance in any social condition in which the elements of power supplied by religion, politics, high life, and humble condition were more thoroughly or more densely combined in order to oppose and destroy the

young power of new ideas and lofty aims. The victory, however, was for man, because it was also of God. Darkness, indeed, prevailed for three days, covering the land, and casting a thick shadow over the world. But the sun of righteousness arose, and still shines.

Pharisaism, how compact soever might be its appearance outwardly, and as against a common enemy, had its own internal dissensions. The question of more or less of moderate or extreme views, of what on one side would be called temporising and on the other consistency, agitated this school as it has agitated most others. In the age of our Lord there were two leading parties, that of Hillel and that of Schammai, the former representing a moderate Pharisaism, the latter 'the straitest sect,' to which Paul had probably belonged.

Those who may wish to prosecute the study of the subject now treated of with more minuteness and particularity, will do well to consult, *Trium Scriptorum Illust. de tribus Judæorum Sectis Syntagma, in quo R. Serarii, J. Drusii, J. Scaligeri opuscula cum aliis exhibentur;* J. Iriglandius, *Diatrib. de Secta Karæorum adj.*, Delphis, 1703; Buddei *Hist. Eccles.* ii. 974, sq.; Flatt, *Ueber die Lehre der Pharisaen in Paulus Memorab.* ii. 157, sq.; Paulus, *Meletemata De Rep. Mortuor.*, Jenæ, 1796. The valuable piece before referred to, namely, *Trium Scriptor.*, &c., may be found in Ugolini's *Thesaurus*, vol. xxii. In the same work (vol. xxii.) may also be found other sources of information, namely, Carpzov, *Appar.* p. 173, sq.; the treatises by J. Schmid, H. Opitz, and others. Much solid information may be found in Stäudlin's *Sittenlehre Jesu*, i. 417, sq. See also Beer, *Gesch. Lehren in Meinung. aller relig. Sect. der Juden*, Brünn, 1822. Some of the extracts from Josephus show clearly that the Greek philosophy had an influence on the doctrines of the Pharisees. Consult Tholuck, *Comm. de vi quam Græca Philosophia in Theologiam tum Muhamedanor. tum Judæor. exercuerit*, Hamb. 1835-7.—J. R. B.

PHARPAR, one of the rivers of Damascus [Abana and Pharpar].

PHEBE. [Phœbe.]

PHENICE (Φοίνιξ), a city on the south-east of Crete, with a harbour, in the attempt to reach which the ship in which Paul voyaged as a prisoner to Rome, was driven out of its course, and eventually wrecked (Acts xxvii. 12).

PHICOL (פִּיכֹל, *mouth of all*, i. e. *all-commanding*), the proper, or more probably, the titular name of the commander of the troops of Abimelech, the Philistine king of Gerar. If the Abimelech of the time of Isaac was the son of the Abimelech of the time of Abraham, we may conclude that the Phicol who attended on the second Abimelech was the successor of the one who was present with the first at the interview with Abraham (Gen. xxi. 22; xxvi. 26). But the whole subject of these interviews is beset with difficulties [Abimelech; Abraham; Isaac].

PHILADELPHIA (Φιλαδελφεία), a city of Lesser Asia, and one of the seven containing the Christian churches to which the Apocalyptic admonitions were addressed. The town stood about twenty-five miles south-east from Sardis, in N. lat. 32° 28′, E. long. 28° 30′, in the plain of Hermus, about midway between the river of that name and the termination of Mount Tmolus. It was the second in Lydia (Ptolem. v. 2; Plin. *Hist. Nat.* v. 30), and was built by King Attalus Philadelphus, from whom it took its name. In B.C. 133 the place passed, with the dominion in which it lay, to the Romans. The site is re-

454. [Philadelphia.]

puted by Strabo (xiii. p. 628) to have been very liable to earthquakes; but it continued a place of importance and of strength down to the Byzantine age; and of all the towns in Asia Minor it withstood the Turks the longest. It was taken by Bajazet I. in A.D. 1392.

Philadelphia still exists as a Turkish town, under the name of Allah Shehr, 'city of God,' *i. e.* High-town. It covers a considerable extent of ground, running up the slopes of four hills, or rather of one hill with four flat summits. The country, as viewed from these hills, is extremely magnificent—gardens and vineyards lying at the back and sides of the town, and before it one of the most extensive and beautiful plains of Asia. The town itself, although spacious, is miserably built and kept, the dwellings being remarkably mean, and the streets exceedingly filthy. Across the summits of the hill behind the town and the small valleys between them runs the town wall, strengthened by circular and square towers, and forming also an extensive and long quadrangle in the plain below. The missionaries Fisk and Parsons, in 1822, were informed by the Greek bishop that the town contained 3000 houses, of which he assigned 250 to the Greeks, and the rest to the Turks. On the same authority it is stated that there are five churches in the town, besides twenty others which were too old or too small for use. Six minarets, indicating as many mosques, are seen in the town; and one of these mosques is believed by the native Christians to have been the church in which assembled the primitive Christians addressed in the Apocalypse. There are few ruins; but in one part there are still found four strong marble pillars, which supported the dome of a church. The dome itself has fallen down, but its remains may be observed, and it is seen that the arch was of brick. On the sides of the pillars are inscriptions, and some architectural ornaments in the form of the figures of saints. One solitary pillar of high antiquity has been often noticed, as reminding beholders of the remarkable words in the Apocalyptic message to the Philadelphian church:—'Him that overcometh will I make a pillar in the temple of my God; and he shall go no more out' (Rev. iii. 12) (Smith, *Sept. Ecclesiarum Asiæ*, p. 138; Arundell, *Seven Churches;* Richter, *Wahlfahrten*, p. 518; Schubert, *Morgenlande*, i. 353-357; *Missionary Herald*, 1821, p. 253; 1839, pp. 210-212).

PHILEMON, EPISTLE TO. That this epistle was written by the apostle Paul is the constant tradition of the ancient Church. It is expressly cited as such by Origen (*Homil. XIX. in Jerem.*, tom. i. p. 185, ed. Huet.); it is referred to as such by Tertullian (*Nov. Marc.* v. 21); and both Eusebius (*Hist. Eccles.* iii. 25) and Jerome (*Proem. in Ep. ad Philem.* tom. iv. p. 442) attest its universal reception as such in the Christian world. The latter, indeed, informs us that some in his day deemed it unworthy of a place in the canon, in consequence of its being occupied with subjects which, in their estimation, it did not become an apostle to write about, save as a mere private individual; but this he, at the same time, shows to be a mistake, and repudiates the legitimacy of such a standard for estimating the genuineness or authority of any book. It was also admitted as canonical by Marcion (Hieronym. *l. c.*). That this epistle should not have been quoted by several of the Fathers who have quoted largely from the other Pauline epistles (*e. g.* Irenæus, Clement of Alexandria, and Cyprian), may be accounted for partly by the brevity of the epistle, and partly by their not having occasion to refer to the subjects of which it treats. Paley has adduced the undesigned coincidences between this epistle and that to the Colossians with great force, as evincing the authenticity of both (*Horæ Paulinæ*, c. 14); and Eichhorn has ingeniously shown how a person attempting, with the epistle to the Colossians before him, to forge such an epistle as this in the name of Paul, would have been naturally led to a very different arrangement of the historical circumstances and persons from what we find in the epistle which is extant (*Einleit. ins N. T.* iii. 302).

This epistle was evidently written during the apostle's imprisonment (ver. 9, 10), and, as we have already endeavoured to show [COLOSSIANS, EPISTLE TO THE], during his two years' imprisonment at Rome. It was occasioned by his sending back to Philemon his runaway slave Onesimus, who, having found his way to Rome, was there, through the instrumentality of the apostle, converted to Christianity; and, after serving Paul for a season, was by him restored to his former master, without whose consent the apostle did not feel at liberty to retain him. The epistle commences with the apostle's usual salutation to those to whom he wrote; after which he affectionately alludes to the good reputation which Philemon, as a Christian, enjoyed, and to the joy which the knowledge of this afforded him (ver. 1-7). He then gently and gracefully introduces the main subject of his epistle by a reference to the spiritual obligations under which Philemon lay to him, and on the ground of which he might utter as a command what he preferred urging as a request. Onesimus is then introduced; the change of mind and character he had experienced is stated; his offence in deserting his master is not palliated; his increased worth and usefulness are dwelt upon, and his former master is intreated to receive him back, not only without severity, but with the feeling due from one Christian to another (ver. 8-16). The apostle then delicately refers to the matter of compensation for any loss which Philemon might have sustained either through the dishonesty of Onesimus, or simply through the want of his service; and though he reminds his friend that he might justly hold the latter his debtor for a much larger amount (seeing he owed to the apostle his own self), he pledges himself, under his own hand, to make good that loss (ver. 17-19). The epistle concludes with some additional expressions of friendly solicitude; a request that Philemon would prepare the apostle a lodging, as he trusted soon to visit him; and the salutations of the apostle and some of the Christians by whom he was surrounded at the time (ver. 20-25).

This epistle has been universally admired as a model of graceful, delicate, and manly writing. 'It is a voucher,' says Eichhorn, 'for the apostle's urbanity, politeness, and knowledge of the world. His advocacy of Onesimus is of the most insinuating and persuasive character, and yet without the slightest perversion or concealment of any

fact. The errors of Onesimus are admitted, as was necessary, lest the just indignation of his master against him should be roused anew; but they are alluded to in the most admirable manner: the good side of Onesimus is brought to view, but in such a way as to facilitate the friendly reception of him by his master, as a consequence of Christianity, to which he had, during his absence, been converted; and his future fidelity is vouched for by the noble principles of Christianity to which he had been converted. The apostle addresses Philemon on the softest side: who would wilfully refuse to an aged, a suffering, and an unjustly imprisoned friend a request? And such was he who thus pleaded for Onesimus. The person recommended is a Christian, a dear friend of the apostle's, and one who had personally served him: if Philemon will receive him kindly, it will afford the apostle a proof of his love, and yield him joy. What need, then, for long urgency? The apostle is certain that Philemon will, of his own accord, do even more than he is asked. More cogently and more courteously no man could plead' (*Einleit. ins N. T.*, iii. 300).

Of separate commentaries on this Epistle, the following is nearly a complete list:—Henr. Hummel, *Explanatio Ep. Ap. Pauli ad Philem.*, Tiguri, 1670, fol.; Lebr. Ch. Gottlieb. Schmid, *Pauli Ap. ad Philem. Ep. Gr. et Lat. Illustr. et ut Exemplum Humanitatis Pauli Proposita*, Lips. 1786, 8vo.; Konrad Rudolf Hagenbach, *Pauli Ep. ad Philem. Interpretatus est*, Basil, 1829, 4to.; W. Attersol, *Commentary upon the Ep. to Philem.*, Lond. 1633, 4to.; Bp. Smalridge, *Saint Paul's Ep. to Philemon Explained* (*Sermons*, Oxf. 1724, fol., Serm. 39).—W. L. A.

PHILETUS, an apostate Christian, mentioned by Paul, in connection with Hymenæus, 2 Tim. ii. 17 [Hymenæus].

1. PHILIP (Φίλιππος), one of the twelve apostles. He was of Bethsaida, 'the city of Andrew and Peter' (John i. 44). He became one of the disciples of John the Baptist, and was in the neighbourhood where John was baptizing, at the time of our Lord's baptism. Andrew and John, who were also disciples of the Baptist, heard the testimony concerning Jesus which the latter gave, and thenceforth attached themselves to him as the promised Messiah. Through Andrew his brother, Simon (Peter) was brought to Christ; and as on the next day Philip unhesitatingly accompanied Jesus when called to follow him, it is probable that his townsmen had previously spoken to him of Jesus as the long-expected Saviour (John i. 35-44). Philip was thus the fourth of the apostles who attached themselves to the person of Jesus—of those 'who left all and followed him.' The first act of Philip was to bring to the Lord Nathanael, who is supposed to have also become an apostle under the name of Bartholomew (John i. 45-51). Little more is recorded of Philip in the Scriptures; but it is remarkable that when Christ beheld the five thousand people whom he afterwards fed with five loaves and two fishes, he singled out Philip for the question, 'Whence shall we buy bread that these may eat?' It is added, 'This he said to prove him, for he himself knew what he would do.' Bengel and others suppose that this was because the charge of providing food had been committed to Philip, while Chrysostom and Theodore of Mopsuestia rather suppose it was because this apostle was weak in faith. The answer of Philip agrees well enough with either supposition, 'Two hundred pennyworth of bread is not sufficient for them, that every one of them may take a little' (John vi. 1-7). But it is well to compare this with John xiv. 8, where the inappropriate remark of Philip, 'Lord, show us the Father, and it sufficeth us,' evinces that he experienced in a degree beyond his brother apostles, the difficulty which they generally felt in raising themselves above the things of sense.

Intermediately, we find recorded the application to Philip of certain 'Greeks' (proselytes of the gate) at Jerusalem, who wished to be introduced to Jesus, of whom they had heard so much. Knowing that his master was not forward to gratify mere curiosity, Philip was uncertain whether to comply with their wish or not, but first consulted Andrew, who went with him to mention the circumstance to Jesus (John xii. 21, 22). This incident, although slight, is indicative of character, as we feel sure that some of the other apostles, Peter for instance, would at once have complied with or declined this application on their own responsibility. The sacred history only adds to these facts, that Philip was present with the other apostles at the religious assembly following the Lord's resurrection (Acts i. 13).

The ancient commentators attribute to Philip the request of 'one of the disciples' to Christ, 'Suffer me first to go and bury my father' (Matt. viii. 21; Luke ix. 59); but there seems no warrant for this; and it is not likely that it would have been overlooked by John in his account of Philip's call to the apostleship.

The later traditions concerning this apostle are vague and uncertain; but there is nothing improbable in the statement that he preached the Gospel in Phrygia (Theodoret, *in Ps.* cxvi.; Niceph. *Hist. Eccles.* ii. 39), and that he met his death at Hierapolis in Syria (Euseb. *Hist. Eccles.* iii. 31; v. 24). The further statement, that Philip was married and had daughters (Euseb. *u. s.*; Clem. Alex. *Strom.* iii. 192; Niceph. ii. 44), very probably arose from confounding him with Philip the Evangelist (Acts xxi. 8).

2. PHILIP, one of the seven first deacons (Acts vi. 5); also called an 'Evangelist' (xxi. 8), which denotes one of those ministers of the primitive church, who, without being attached to any particular congregation, preached the Gospel from place to place (Eph. iv. 11; 2 Tim. iv. 5). Being compelled to leave Jerusalem by the persecution which ensued on Stephen's death, Philip was induced to take refuge in Samaria. He there came to a city where Simon Magus was held in high reverence through the wonders which he wrought. But the substantial and beneficent miracles which were performed by Philip in the name of Jesus, drew away their attention from the impostor, and prepared their minds for the reception of the Gospel. Simon himself seems to have regarded him as in league with some superhuman being, and looking upon baptism as the initiatory rite of a compact through which he might obtain the same powers, he solicited and obtained baptism from the Evangelist [Simon Magus]. After Peter and John had come to Samaria to complete and carry on the work which Philip had

been the means of commencing, the Evangelist himself was directed by a divine impulse to proceed towards Gaza, where he met the treasurer of Candace, queen of Ethiopia [CANDACE; ETHIOPIA], by whose conversion and baptism he became the instrument of planting the first seeds of the Gospel in Ethiopia (Acts viii. 1-39). Philip then retraced his steps, and after pausing at Azotus, preached the Gospel from town to town till he came to Cæsarea (ver. 40). At this place he seems to have settled; for when Paul was on his last journey to Jerusalem, he and his party were entertained in the house of Philip, on which occasion it is mentioned that he had 'four daughters, virgins, who did prophesy' (Acts xxi. 9), or, who were endued with the faculty of speaking under divine inspiration, and of predicting future events, together with other supernatural gifts vouchsafed to the primitive Christians, in accordance with the prophecy in Acts ii. 18. With this fact the Scriptural history of Philip closes, and the traditions which refer to his subsequent proceedings are uncertain and conflicting. The Greek martyrologies make him to have been bishop of Tralles, in Lydia; but the Latins make him end his days in Cæsarea (*Acta Sanct.* ad 6 Juni); but in all old accounts Philip the Apostle and Philip the Evangelist are much confounded.

3. PHILIP, son of Herod the Great, and tetrarch of Batanæa, Trachonitis, and Auranitis (Luke iii. 1) [HERODIAN FAMILY].

4. PHILIP, called by Josephus Herod, son of Herod the Great, and first husband of Herodias [HERODIAN FAMILY].

PHILIPPI (Φίλιπποι), a city of the proconsular Macedonia, situated eastward of Amphipolis, within the limits of ancient Thrace (Acts xvi. 12; xx. 6; Phil. i. 1). It was anciently called Κρηνίδες, from its many fountains; but having been taken and fortified by Philip of Macedon, he named it, after himself, Philippi. In the vicinity were mines of gold and silver; and the spot eventually became celebrated for the battle in which Brutus and Cassius were defeated. Paul made some stay in this place on his first arrival in Greece, and here founded the church to which he afterwards addressed one of his epistles. It was here that the interesting circumstances related in Acts xvi. occurred; and the city was again visited by the Apostle on his departure from Greece (Acts xx. 6). In the former passage (xvi. 12) Philippi is called a colony (κολωνία), and this character it had in fact acquired through many of the followers of Antony having been colonized thither by Augustus (Dion. Cass. xlvii. 432). The fact that Philippi was a colony was formerly disputed; but its complete verification has strongly attested the minute accuracy of the sacred narrative. It is there also said to have been πρώτη τῆς μερίδος τῆς Μακεδονίας πόλις, 'a chief city of this part of Macedonia'—not the capital, for that was Amphipolis (Livy, xlv. 29). Others explain the word πρώτη with reference to geographical position, *i. e.* the *first city* as one comes from the East; but it has been well objected that Paul had just landed at Neapolis, which is still further to the East (comp. Diod. Sic. xvi. 8; Strabo, vii. p. 511; also Rosenmüller, *Bibl. Geog.* iii. 393). The site has not been much visited by travellers; but an interesting account of it may be found in the *American Missionary Herald*, by the missionaries Dwight and Schauffler, who were there in 1834. The plain in which the ruins of Philippi stand is embraced by the parallel arms of mountains extended from the Necrokop, which pour into the plain many small streams, by which it is abundantly watered and fertilized. The acropolis is upon a mount standing out into the plain from the north-east, and the city seems to have extended from the base of it to the south and south-west. The remains of the fortress upon the top consist of three ruined towers and considerable portions of walls, of stone, brick, and very hard mortar. The plain below does not now exhibit anything but ruins—heaps of stone and rubbish, overgrown with thorns and briars; but nothing of the innumerable busts and statues, thousands of columns, and vast masses of classic ruins, of which the elder travellers speak. Ruins of private dwellings are still visible; also something of a semi-circular shape, probably a forum or market-place, 'perhaps the one where Paul and Silas received their undeserved stripes.' The most prominent of the existing remains is the remainder of a palatial edifice, the architecture of which is grand, and the materials costly. The pilasters, chapiters, &c., are of the finest white marble, and the walls were formerly encased with the same stone. These marble blocks are gradually knocked down by the Turks, and 'wrought into their silly grave-stones.' The travellers were informed that many of the ruins are now covered by stagnant water, at the bottom of which they may be seen; but they did not visit this spot.

PHILIPPIANS, EPISTLE TO THE. Of this part of the Apostle Paul's writings the authenticity has never been questioned. Professing to be written by that distinguished servant of Christ, it bears on every part of it the impress of his peculiar style, manner of thought, and form of doctrine; and the internal evidence of authenticity arising from the incidental allusions in it to persons and circumstances is very strong (*Horæ Paulinæ*, c. 7). It is referred to formally and expressly by Polycarp, in his *Epistle to the Philippians* (§ 3, § 11), besides being repeatedly quoted by him. It is quoted by the churches at Vienne and Lyons, in their letter to the churches in Asia and Phrygia, preserved by Eusebius (*Hist. Eccles.*, v. 2; by Irenæus (*Cont. Hær.*, iv. 18, § 4); by Clement of Alexandria (*Pædag.* lib. i. p. 107; *Strom.*, iv. p. 511; *Admon. ad Gentes*, p. 56); by Tertullian (*De Resur. Carnis*, c. 23); by Origen (*Cont. Cels.*, lib. iii. p. 122, ed. Spencer; *et sæpiss.*); by Cyprian (*Lib. Testim.*, iii. 39), and by many of the later Fathers.

From allusions in the epistle itself, it is evident that it was written at Rome during the period of the apostle's two years imprisonment in that city, and in all probability towards the close of that period (i. 13, 14, 23, 26; ii. 18, 25). It seems to have been composed on the occasion of the return to Philippi of Epaphroditus, a member of the church in that place, who had been deputed to Rome with a pecuniary contribution from the church in aid of the apostle. Full of gratitude for this work of friendly remembrance and regard, Paul addressed to the church in Philippi this epistle, in which, besides expressing

his thanks for their kindness, he pours out a flood of eloquence and pathetic exhortation, suggested partly by his own circumstances, and partly by what he had learned of their state as a church. That state appears to have been on the whole very prosperous, as there is much commendation of the Philippians in the epistle, and no censure is expressed in any part of it either of the church as a whole, or of any individuals connected with it. At the same time the apostle deemed it necessary to put them on their guard against the evil influences to which they were exposed from Judaizing teachers, and false professors of Christianity. These cautions he interposes between the exhortations suggested by his own state and by the news he had received concerning the Philippians, with which his epistle commences and with which it closes. We may thus divide the epistle into *three* parts. In the *first* of these (i., ii.), after the usual salutation and an outpouring of warm-hearted affection towards the Philippian church (i. 1-11), the apostle refers to his own condition as a prisoner at Rome; and lest they should be cast down at the thought of the unmerited indignities he had been called upon to suffer, he assures them that these had turned out rather to the furtherance of that great cause on which his heart was set and for which he was willing to live and labour, though, as respected his personal feelings, he would rather depart and be with Christ, which he deemed to be 'far better' (12-24). He then passes by an easy transition to a hortatory address to the Philippians, calling upon them to maintain steadfastly their profession, to cultivate humanity and brotherly love, to work out their own salvation with fear and trembling, and concluding by an appeal to their regard for his reputation as an apostle, which could not but be affected by their conduct, and a reference to his reason for sending to them Epaphroditus instead of Timothy, as he had originally designed (i. 25; ii. 30). In part *second* he strenuously cautions them, as already observed, against Judaizing teachers, whom he stigmatizes as 'dogs' (in reference probably to their impudent, snarling, and quarrelsome habits), 'evil-workers,' and 'the concision;' by which latter term he means to intimate, as Theophylact remarks (*in loc.*), that the circumcision in which the Jews so much gloried had now ceased to possess any spiritual significance, and was therefore no better than a useless mutilation of the person. On this theme he enlarges, making reference to his own standing as a Jew, and intimating, that if under the Christian dispensation Jewish descent and Jewish privileges were to go for anything, no one could have stronger claims on this ground than he; but at the same time declaring, that however he had once valued these, he now counted them 'all but lost for the excellency of the knowledge of Christ' (iii. 1-12). A reference to his own sanctified ambition to advance in the service of Christ leads him to exhort the Philippians to a similar spirit; from this he passes to caution them against unnecessary contention, and against those who walk disorderly, concluding by reminding them of the glorious hopes which, as Christians, they entertained (ver. 13-21). In the *third* part we have a series of admonitions to individual members of the church at Philippi (iv. 1-3), followed by some general exhortations to cheerfulness, moderation, prayer, and good conduct (ver. 4-9); after which come a series of allusions to the apostle's circumstances and feelings, his thanks to the Philippians for their seasonable aid, and his concluding benedictions and salutations (ver. 10-23).

Heinrichs has advanced the opinion, that of these three parts of this epistle the first belongs to a different composition from the other two (*Nov. Test. Koppan.* vol. vii. pt. ii. p. 31). It is not worth while to recapitulate his reasonings in support of this notion; they have been fully examined and sufficiently refuted by Krause (*An Epist. Pauli ad Phil. in duas Epistolas . . . . dispescenda sit? Dis. crit. exeget.* Regiom. 1811), and Schott (*Isagoge in N. T.* § 70).

This epistle is written throughout in a very animated and elevated style. It is full of the most sublime thoughts and the most affectionate exhortations. It resembles more the production of a father addressing his children, than that of an apostle laying down authoritatively what is to be received and followed. The whole of it shows, as Theophylact observes, how very much he loved and estimated those to whom it was addressed, ὧν ἕνεκεν ἁπάντων σφόδρα φιλῶν αὐτοὺς καὶ τιμῶν φαίνεται (*Proem. in Ep. ad Phil.*).

Of separate commentaries upon this epistle, a considerable number has appeared, especially on the continent. Of these the chief are the following: M. H. Schotanus, *Analys. et Comment. in Ep. Pauli ad Phil., cum observationibus et earum usibus*, Franc. 1637, 4to.; J. Gottfried Am Ende, *Pauli Ep. ad Phil. Gr. ex recens. Griesbachii; Nova vers. Lat. et annot. perpet. illust.*, Vitemb. 1798, 8vo.; G. F. H. Rheinwald, *Commentar. üb. d. Brief Pauli an die Philipp.*, Berlin, 1827, 8vo.; Konrad Steph. Matthies, *Erklärung d. Briefes Pauli an d. Phil.*, Greifswold, 1835, 8vo.; Hermann Gustav. Hölemann, *Comment. in Ep. ad Phil.*, Lips. 1839; Wessel Alb von Hengel, *Comment. perpetuus in ep. Pauli ad Phil.*, Amstel, 1839; A. Rilliet, *Commentaire sur l'Epitre de l'Apôtre Paul aux Phil.*, Geneva, 1841, 8vo. In English the works of Pearce and Ferguson may be mentioned.—

W. L. A.

PHILISTINES (פְּלִשְׁתִּים; Sept. Φυλιστιείμ, and Ἀλλόφυλοι; Joseph. Παλιστῖνοι, *Antiq.* v. 1. 18), a tribe which gave its name to the country known as Palestine, though it occupied only a portion of the southern coast, namely, that which was bounded on the west by the hill country of Ephraim and Judah, and on the south extended from Joppa to the borders of Egypt, thus touching on the Israelite tribes Dan, Simeon, and Judah. Indeed the portions of Simeon and Dan covered a large part of Philistia, but its possession by the Israelites was disputed, and was never entirely achieved. This country was originally held by the Avims, who were destroyed and their land seized by the Caphtorims, coming forth out of Caphtor (Deut. ii. 23). In Jer. xlvii. 4 the Philistines are denominated 'the remnant of the country (or isle) of Caphtor.' In Amos ix. 7, the Divine Being asks, 'Have I not brought the Philistines from Caphtor?' The Caphtorim and the Philistim are also associated together as kindred tribes in the genealogical list of nations

given in Gen. x. 14, both being descendants of Mizraim. This last passage would be more strictly in agreement with the others if the words 'out of whom came Philistim' were placed immediately after Caphtorim. Where then is Caphtor? Where are we to look for the Caphtorim? There, wherever it was, are the Philistines to be originally found. Caphtor has been thought to be Cappadocia; so is it rendered by the Targums, as well as by the Syriac and Vulgate translations ('Palæsthinos reliquias insulæ Cappadociæ'). Bertheau, however, decides that Caphtor is Crete, on several grounds (Bertheau, *Zur Geschichte der Israeliten*, 1842; see also *Die Phönizier*, von Movers, 1841; and *Kanáan*, von C. von Lengerke, 1844). In Jer. xlvii. 4, Caphtor is named אִי: the word may indicate a coast, but leads the mind most forcibly to think of an island. The Philistines, in 1 Sam. xxx. 14, 16, are termed Cherethites (Ezek. xxv. 16; Zeph. ii. 5), כרתי, an adjective, which itself might be put into the English letters Cretans, and is derived from the proper name כרת, or Crete. Since the appearance of Lakemacher's *Observat. Philol.* (ii. 11, sq.), and Calmet's *Biblical Researches*, the word Kreti has been considered to prove that the Philistines were wanderers from Crete, which recent scholars have confirmed. Thus Hitzig (*Die 12 Kleinen Propheten*) says, on Zeph. ii. 5, the Philistines were offsprings of Barbarians, who dwelt of old in Crete (Herod. i. 173), and thence passed to different parts of the continent (Amos ix. 7; comp. Tuch's *Commentar zur Genesis*, p. 243).

Greeks and Romans support this view. Tacitus (*Hist.* v. 2) relates that inhabitants of Palestine came thither from Crete. He uses indeed the name Jews; but as the Philistines gave their name to Palestine, the heathen historian was not likely to make any exact distinction in the case, and may be understood to mean the Philistines, as inhabitants of Palæstina or Philistia. Stephen of Byzantium, under the word Γάζα, states that this city, Gaza, was properly called Minoa, from Minos, king of Crete, who came to Gaza with his brothers Acakos and Rhadamanthus, and named the place after himself (comp. *Kreta*, von Karl Hoeck, ii. 368). Stephanus Byzant. adds that the Cretan Jupiter (Ζεὺς Κρηταγένης) was honoured in Gaza. From other writers it appears that the Cretan Jupiter bore the name of Marna in this Philistine city, where he was chief of eight principal gods, and had a splendid temple consecrated to his service. The authorities for this statement may be found in Movers' *Die Phönizier*, p. 662. Marna seems only another name for Malchan, Baalan, or Baalti, denoting the protecting deity of the city.

The Philistines are represented in the Old Testament as foreign immigrants. The ordinary translation of their name in the Septuagint is Ἀλλόφυλοι, men of another tribe. The root פלש, whence Philistine, denotes a wanderer, one from a foreign land, and was probably given by the Hebrews to the foreign immigrants who called themselves Cretans. If so, the Philistines did not belong to any of the aboriginal stems. That they were not a portion of the Hebrew race appears from the fact that they were uncircumcised. In 1 Sam. xvii. 26, Goliath of Gath is derisively denominated 'this uncircumcised Philistine' (comp. 2 Sam. i. 20). Yet the Philistines belonged to the Shemitic family. The names of their cities and their proper names are of Shemitic origin. In their intercourse with the Israelites there are many intimations that the two used a common language. How is this, if they were immigrants in Palestine? This difficulty is removed by supposing that originally they were in Palestine, being a part of the great Shemitic family, went westward, under pressure from the wave of population which came down from the higher country to the sea-coast, but afterwards returned eastward, back from Crete to Palestine; so that in Amos ix. 7 it is to be understood that God brought them up to Palestine, as he brought the Israelites out of Egypt—back to their home. This view the passage undoubtedly admits; but we cannot agree with Movers in holding that it gives direct evidence in its favour, though his general position is probably correct, that the Philistines first quitted the mainland for the neighbouring islands of the Mediterranean sea, and then, after a time, returned to their original home (Movers, pp. 19, 29, 35). Greek writers, however, give evidence of a wide diffusion of the Shemitic race over the islands of the Mediterranean. Thucydides says (i. 8) that most of the islands were inhabited by Carians and Phœnicians. Of Crete Herodotus (i. 173) declares that Barbarians had, before Minos, formed the population of the island. There is evidence in Homer to the same effect (*Od.* ix. 174; comp. Strabo, p. 475). Many proofs offer themselves that, before the spread of the Hellenes, these islands were inhabited by Shemitic races. The worship observed in them at this time shows a Shemitic origin. The Shemitics gave place to the Hellenics—a change which dates from the time of Minos, who drove them out of the islands, giving the dominion to his son. The expelled population settled on the Asiatic coast. This evidence, derived from heathen sources, gives a representation which agrees with the Scriptural account of the origin, the westerly wandering, and return eastwards of the Philistines. But chronology creates a difficulty. Minos lived probably about the year B.C. 1300. According to the Old Testament the Philistines were found in Palestine at an earlier period. In Gen. xx. 2; xxvi. 1; we find a Philistine king of Gerar. But this king (and others) may have been so termed, not because he was of Philistine blood, but because he dwelt in the land which was afterwards called Philistia. And there are other considerations which seem to show that Philistines did not occupy this country in the days of Abraham (consult Bertheau, p. 196). It is, however, certain that the Philistines existed in Palestine in the time of Moses, as a brave and warlike people (Exod. xiii. 17)—a fact which places them on the Asiatic continent long before Minos. This difficulty does not appear considerable to us. There may have been a return eastwards before the time of Minos, as well as one in his time; or he may have merely put the finishing stroke to a return commenced from some cause or other—war, overpopulation, &c.—at a much earlier period. The information found in the Bible is easily understood on the showing, that in the earliest ages tribes of the Shemitic race spread themselves over the west, and, becoming inhabitants of the

islands, gave themselves to navigation. To these tribes the Philistines appear to have belonged, who, for what reason we know not, left Crete, and settled on the coast of Palestine. But in Gen. x. 13, 14, the Philistines are derived from Mizraim, that is, from Egypt. How is this? Movers holds that Phœnician invaders were the Hyksos of Egyptian history, whence the Philistines would, in relation to their stay and dominion in Egypt, be spoken of as of Egyptian origin. Bertheau, however, condemns this view as too complicated, and states it as his opinion that the Philistines, as dwellers in Crete, were reckoned as belonging to Egypt (see also Ewald, *Geschichte*, i. 289; Lengerke, *Kanáan*, p. 195, sq.).

If now we follow the Biblical accounts we find the history of the Philistines to be in brief as follows. They had established themselves in their land as early as the time of Abraham, when they had founded a kingdom at Gerar (Gen. xxi. 32; xxvi. 1). When the Israelites left Egypt they were deterred by fear of the power of the Philistines from returning by the shortest road—that which the caravans still take—because it lay through the country of the Philistines (Exod. xiii. 17). In the time of Joshua (xiii. 3) the Philistines appear in a league of five princes (סרנים, which may be a Philistine corruption from שר), governors of so many tribes or petty states—'all the borders of the Philistines from Sihor which is before Egypt even unto the borders of Ekron northward counted to the Canaanites.' Joshua appears to have thought it prudent to attempt nothing for the dispossession of the Philistines, and he therefore had no hostile relations with them; for the division of Philistia among the tribes was nothing more than a prospective but unfulfilled arrangement (Josh. xv. 45; xix. 43). The days of the Judges, however, brought conflicts between the Israelites and the Philistines, who dwelt wide over the land, and even exercised dominion over their Hebrew neighbours (Judg. iii. 31; x. 7; xiii. 1; xiv. 2, 4, 5; xv. 11).

In the time of Eli the Philistines succeeded in getting the ark into their possession (1 Sam. iv.); but a defeat which they suffered under Samuel put an end to their dominion, after it had lasted forty years (1 Sam. vii.). This subjection of the Israelites began after the death of Jair, and continued to the termination of the period embraced in the book of Judges. Within this space of time fall the life and the heroic actions of Samson. Notwithstanding the total defeat which the Philistines had undergone, and the actual termination of their political supremacy, they continued to be troublesome neighbours. 'There was sore war against the Philistines all the days of Saul' (1 Sam. xiv. 52); a conflict which was carried on with various success, and in which the king found great support in the prudent bravery of his son Jonathan and the high courage of David (1 Sam. xiii. 4; xiv.; xvii. 18; xix. 8; xxiii. 28). Even after his separation from Saul David inflicted many blows on the Philistines (1 Sam. xxiii.), but soon saw himself obliged to seek refuge in Gath (1 Sam. xxvii.), and was in consequence near making common cause with them against Saul (1 Sam. xxix.), who met with his death at their hands while engaged in battle (1 Sam. xxxi.). They also raised their arms against David, when he had become king of all Israel, but were several times beaten by that brave monarch (2 Sam. v. 17, sq.; viii. 1). 'Mighty men,' performing valorous deeds in imitation of David's rencontre with Goliath, gave the king their support against this brave and persevering enemy (2 Sam. xxiii. 8, sq.). Solomon appears to have been undisturbed by the Philistines, but they had settlements in the land of Israel under the early Ephraimitic kings (1 Kings xv. 27; xvi. 15). To Jehoshaphat they became tributary (2 Chron. xvii. 11). Under Jehoram, however, they, in union with the Arabians, fell on Jerusalem, and carried off the king's substance, as well as his wives and children (2 Chron. xxi. 16). On the other hand, in the reign of king Jehoash, their city Gath was taken by Hazael, king of Syria, who also threatened Jerusalem (2 Kings xii. 17). But in the time of Ahaz they revolted, and carried with them a part of western Judah, having 'invaded the cities of the low country and of the south of Judah, and taken Beth-shemesh and Ajalon,' &c. (2 Chron. xxviii. 18; comp. Isa. xiv. 29). Hezekiah in the first years of his reign obtained some advantages over them (2 Kings xviii. 8). Soon, however, Assyrian armies went against Philistia, and, with a view to an invasion of Egypt, got into their power the strong frontier-fortress of Ashdod (Isa. xx. 1), which at a later time Psammetichus took from them, after a siege of twenty-nine years (Herod. ii. 157). In consequence of the hostile relations between Assyria and Egypt, Philistia suffered for a long period, as the troops of the former power took their way through that land, and Pharaoh-Necho captured the stronghold Gaza (Isa. xlvii. 1). The same was done by Alexander the Great in his expedition to Egypt. On the destruction of the Jewish state, the Philistines, like other neighbouring peoples, acted ill towards the Jews, having 'taken vengeance with a despiteful heart' (Ezek. xxv. 15). Many of those who returned from the captivity 'had married wives of Ashdod, and their speech spoke half in the speech of Ashdod' (Neh. xiii. 23, sq.). In the Maccabæan period the Philistines were Syrian subjects, and had at times to suffer at the hands of the Jews (1 Macc. x. 86; xi. 60, sq.). King Alexander (Balas) gave Jonathan a part of their territory, Accaron, with the borders thereof in possession (1 Macc. x. 89). The Jewish monarch Alexander Jannæus overcame and destroyed Gaza (Joseph. *Antiq.* xiii. 3. 3; *De Bell. Jud.* i. 4. 2). By Pompey Azotus, Jamnia, and Gaza were united to the Roman province of Syria (*Antiq.* xiv. 4. 4); but Gaza was given by Augustus to King Herod (*Antiq.* xv. 7. 3).

The Philistine cities were greatly distinguished. Along the whole coast from north to south there ran a line of towns—in the north the Phœnician, in the south the Philistine—which were powerful, rich, and well-peopled. The chief cities of the Philistines were five—Gaza, Ashdod, Askalon, Gath, and Ekron (Josh. xiii. 3; Judg. iii. 3). Several of these Palestinian cities flourished at the same time; and though now these, now those cities gained at different periods pre-eminence in power, wealth, and population, and though some did not rise till others had declined or perished, yet is it true that from the earliest times till the century after Christ a number of important towns existed

on the narrow strip of land which borders the Mediterranean sea, such as was never seen in any other part of the world, the Ionian coast of Asia Minor not excepted.

The greatness of these cities was mainly owing to commerce, for the coast of Palestine was in the earliest ages exclusively in possession of the trade which was carried on between Europe and Asia. Besides a great transit trade, they had internal sources of wealth, being given to agriculture (Judg. xv. 5). In the time of Saul they were evidently superior in the arts of life to the Israelites; for we read (1 Sam. xiii. 20) that the latter were indebted to the former for the utensils of ordinary life. Their religion was not essentially different from that of the Phœnicians. The idol which they most reverenced was Astarte, the Assyrian Semiramis, or Derketo, who was also honoured as Dagon, in a very ancient temple at Askalon and at Gaza, also at Ashdod (Movers, p. 589, sq.; Lengerke, *Kanaan*, p. 200; Herod. i. 105; Judg. xvi. 23; 1 Sam. v. 1, sq.; 1 Macc. x. 83). This was a species of fish-worship, a remnant of which may still be found in the special care taken of certain holy fish in some parts of Syria (Niebuhr, *Reise*, ii. 167; Burckhardt, i. 278, 521). In Ekron Baal-zebub had his chief seat. Priests and soothsayers were numerous (1 Sam. vi. 2). Their magicians were in repute (Isa. ii. 6), and the oracle of Baal-zebub was consulted by foreigners (2 Kings i. 2). They had the custom of carrying with them in war the images of their gods (2 Sam. v. 21). Tradition makes the Philistines the inventors of the bow and arrow.—J. R. B.

PHILOLOGUS (Φιλόλογος), one of the Christians at Rome to whom Paul sent his salutations (Rom. xvi. 15). Dorotheus makes him one of the seventy disciples, and alleges that he was placed by the apostle Andrew as bishop of Sinope, in Pontus. But this seems altogether improbable.

PHILOSOPHY, GREEK. It cannot be expected, that within the limits of a brief article, in a work of this nature, and of the size to which it is limited, we should enter into an historical, critical, or even popular account of Greek philosophy; nor that the subject, however interesting in itself, should be introduced at all, farther than will minister to the right understanding and reception of Scriptural truth. In the articles Gnosticism and Logos we have shown that a knowledge of Greek philosophy throws light on one of the most recondite doctrines of Christianity, bringing us acquainted with expressions and opinions current throughout the civilized world during the rise and progress of Christianity, and showing how these modes of expression came to be adopted by the first converts to Christianity, and afterwards to be employed by St. John in his Gospel. Indeed, if a knowledge of the sacrificial language of the Jews throws light upon Christ's mission, in so far as its object was to put an end to the numerous sacrifices and ceremonial ministrations of the Jewish priesthood, it is not less evident that a knowledge of the philosophical language of the Greeks will throw light upon the first use amongst the Christian converts, and upon the subsequent adoption by St. John into his Gospel, and by St. Paul into his Epistles, of the remarkable language employed to describe the mission and the nature of Christ. But not only may a knowledge of ancient learning, and more especially of ancient philosophy, supply valuable assistance for the better understanding of Christian doctrines; but we may derive from such knowledge the fullest and clearest proofs of the benefit conferred by Christianity on the progress of principle and civilization: and we may add, that we have a direct warrant from St. Paul to employ ancient learning, and more especially Greek philosophy, in rendering to the Christian religion the services we have specified.

Perhaps there does not occur in the Christian record a more striking and important passage than that which we shall quote from the Epistle to the Romans: that Epistle which, for its general and paramount interest (being equally addressed to Gentile, Jew, and Christian), has been placed first of the Epistles. Indeed, the Epistle to the Romans proves, by the plainest facts, that Christianity was absolutely necessary for the removal of the most intolerable evils that ever oppressed the world. The Apostle of the Gentiles, having in the opening chapter given a fearful picture of the vices and crimes of Rome, the truth of which is fully established by the writings of Tacitus and Suetonius, Martial and the Roman satirists (and in the next chapter, ii. 17, he charges the same neglect of moral duty, under pretence of a sounder faith, upon the Jews), proceeds to address Gentile and Jew in a strain of manly and noble eloquence, which, if we estimate the magnitude of the interests, individual and domestic, private and public, religious, moral, and political, which then depended and still depends on the understanding and reception of Christianity in its truth and power, must be allowed to leave every other example of reasoning and eloquence far behind it. The words of St. Paul, following his exposure of the wickedness of Rome (of heathen vices as the direct consequences of heathen superstitions) are contained in Rom. i. 21, 24-26, 28, 29, &c.

The Christian minister has in his spiritual armoury no weapon of keener edge or of finer temper, whether for laying bare the hidden secrets of the heart, or for unfolding the mystery of salvation in Jesus Christ. What man, however ignorant, careless, or vicious he may be, does not find his inmost conscience respond to the words, 'and thinkest thou this, O man, that judgest them which do such things and doest the same, that thou shalt escape the judgment of God?' What resister of the truth, whether by open scoffing or secret disobedience, does not find himself pricked to the heart by the words, 'them that are contentious, and do not obey the truth?' What sanctimonious hypocrite, rigid dogmatist, or fierce persecutor, does not find the hollowness and perilousness of his pretence in the words, 'not the hearers of the law are just before God, but the doers of the law shall be justified?' What catholic-minded, sincere-hearted, rightly-conducted Christian does not find comfort in the words, 'but glory, honour, and peace, to every man that worketh good.' What man fainting by the way will not take courage from the words, 'to those who by patient continuance in well-doing seek for glory, and honour, and immortality, eternal life.' What Antinomian professor of faith, as an excuse for disobedience, does not feel his hope fail him as he reads the words, 'not the hearers of the law are just before God

but the doers of the law shall be justified,'—or should he attempt to escape the plain meaning of the passage by the plea that he is neither Jew nor Gentile, how will he escape from words addressed in the same spirit of making obedience the test of faith—'What shall we say then? Shall *we* continue in sin that grace may abound? God forbid —Know ye not that to whom ye yield yourselves servants to obey, his servants ye are to whom ye obey, whether of sin unto death, or of obedience unto righteousness?' Lastly, who does not feel his faith, hope, and charity enlarged, as he reads the following catholic extension of justice, and mercy, and truth, published by the Apostle to the Gentiles—'Glory, and honour, and peace, to every man that worketh good, of the Jew first, and also of the Gentile.'

The Protestant will not fail to remark that the preaching of St. Paul exhibits a far more catholic spirit than the narrower and more sectarian views of St. Peter. Indeed, the word Catholic might with much greater fitness be applied to the teaching of the great Apostle to the Gentiles, than to the teaching of the apostle whose Judaizing spirit sought to narrow the grace of God, and to impose the yoke of the ceremonial law, and to keep up the power of the priesthood. And if any one of the apostles is to be selected as the patron saint of the whole catholic church, surely that apostle should be the great Apostle to the Gentiles. Or, if the Church of Rome claims to be the Catholic Church, there seems an especial reason for her adopting the really catholic views of Christianity which were addressed by St. Paul to the Romans.

We have found it impossible to refer to the above striking and important passage from St. Paul's Epistle to the Romans without being led into a few remarks upon its general scope and meaning. But the view on which we would especially insist, as the subject of our present article, is, that theologians have in this passage, as they have in many other passages closely connected with it, a warrant for bringing ancient history, literature, and philosophy, and especially the philosophy of Greece, to bear upon the rise and progress, the object and end of Christianity. For assuredly every passage in the New Testament which relates to the superstition of the Gentiles, the immoralities of the Gentiles, the opinions of the Gentiles, and the knowledge of the Gentiles, must derive evidence and explanation from Gentile history, literature, and philosophy; just as passages which have reference to the Jews must derive evidence and explanation from Jewish history, literature, and philosophy. The latter is more especially the case with passages in the New Testament, which relate to the termination of sacrifice and the priesthood; whilst the former applies more especially to passages which relate to the word of God and the Christian ministry. It might, indeed, be supposed from the opinions and conduct of some Christians in all ages (who have all but adduced their ignorance in proof of the soundness of their faith), that the oft-quoted words of the learned, as well as pious, Apostle to the Gentiles, 'after that, in the wisdom of God, the world by wisdom knew not God, it pleased God by the foolishness of preaching to save them that believe' (1 Cor. i. 12), contained a warrant, on the one hand, for preaching without knowledge, and on the other hand, for faith without obedience. If we inquire into the real meaning of those remarkable words, we shall find it closely connected with our present subject, and directly opposed to the unlearned and unwise meaning which has been deduced from it, by what may be called the pride of ignorance, as a warrant for presumption. Indeed, it is not a little remarkable, that few passages require more real learning and true wisdom for their sound interpretation, than that which has been so often and so hastily quoted as a warrant for a contempt of all learning. Let us endeavour to understand the real meaning of the passage: and, in order to do so, let us return to our former quotation.

In the first chapter of the Epistle to the Romans, the necessity of a great religious change, preparatory to a great moral change—a change of faith and worship, preparatory to a change in principles and conduct—is fully and plainly made out. The Apostle to the Gentiles was about to build upon the Jewish Scriptures, but for the edification of the whole world, a purer faith and a more reasonable service than Jew or Gentile had yet known. The moral ruin of the Jewish temple had already taken place—'Behold, thou art called a Jew, and restest in the law, and makest thy boast of God; and knowest his will, and approvest the things that are more excellent, being instructed out of the law; and art confident that thou thyself art a guide to the blind, a light of them which are in darkness, an instructor of the foolish, a teacher of babes; which hast the form of knowledge and of the truth in the law;—Thou, therefore, which teachest another, teachest thou not thyself? Thou that preachest, A man should not steal, dost thou steal? Thou that sayest, A man should not commit adultery, dost thou commit adultery? Thou that abhorrest idols, dost thou commit sacrilege? Thou that makest thy boast of the law, through breaking the law dishonourest thou God' (Rom. ii. 21)? On the other hand, the ruins of Gentile temples, Egyptian, Greek, and Roman, still witness the truth of St. Paul's words to the same effect—'When they knew God, they glorified him not as God, but became vain in their imaginations, and their foolish heart was darkened. Professing themselves to be wise, they became fools, and changed the glory of the incorruptible God into an image made like to corruptible man, and to birds, and four-footed beasts, and creeping things. Wherefore God also gave them up to uncleanness.'

It is impossible to over-estimate the importance of this lesson, or the plainness of the evidence; the *lesson*, that corruption of religion implies corruption of morals; the *evidence*, the phenomena of the civilized world at that great period of history. Respecting the religious and moral corruptions of the Jews at that period, our present argument does not require us to say more. Let us then turn to the corruptions of the heathens. Those who are acquainted with the progressively-increasing profligacy of the heathen world, as exhibited in Greek and Roman history and literature, are aware that the picture drawn by St. Paul is fully borne out by facts. The sanctity and purity of the domestic hearth were undermined; the roof-tree virtues, which are a nation's strength, had given way; and the vast edifice of Greek

science and Roman power was tottering to its fall. That this is no exaggerated statement, we appeal to Plato, Aristophanes, and Lucian, to Tacitus, Martial, Ovid, and the Roman satirists. Indeed, the summary given by the Roman Historian of a somewhat earlier period, points to the same conclusion :—'Labante deinde paulatim disciplinâ, velut desidentes, primo mores sequatur animo; deinde ut magis magisque lapsi sint, tum ire cœperint præcipites: donec ad hæc tempora, quibus nec vitia nostra nec remedia pati possumus, perventum est' (Liv. *Præf.*). In that state of unprinciple and indiscipline, Roman civilization was unable to resist the attacks which her vices had provoked. The close connection between licentiousness and blood-guiltiness was never so strikingly manifested as in the frightful exhibitions which formed 'a Roman holiday' in the amphitheatre. Woman must have lost all the best attributes of her nature and her character before she could sit and applaud at such a scene. If, casting from us every poor and petty jealousy, sexual, and sectarian, and philosophical, we contrast *that* scene of woman's debasement with those happier scenes where thousands of our countrywomen have met in hall and temple, and even in the open air, to give freedom to the slave, and remember that *these* are as certainly direct consequences of Christianity, as those were direct consequences of heathen superstition (unless, indeed, St. Paul's unanswerable argument, and the concurrent testimony of ancient and modern history, are false instead of true), assuredly we have before us proofs of a great religious and moral and political advance in the situation and character of women; and the cause, as well as the effect, is plainly before us.

We speak of a great and notorious fact, when we say that there was not a hope that sanctity, and purity, and love, would be restored to the character of woman, and by her means to the domestic hearth,—and by the domestic hearth to the councils of legislators, and the acts of nations,—that there was not a hope that woman would resume, or rather, would assume, her true position in society, till heathen superstitions and heathen rites were superseded by a holier faith and a purer worship. Nor is the fact less notorious or less important, that it was the religion of Christ which, by superseding those heathen superstitions and heathen rites by a holier faith and a purer worship, did, at the same time, and as a direct consequence, raise woman to her true position in society. It is, we repeat, matter of fact that the religion of Christ restored sanctity, and purity, and love to the domestic hearth, making those three Christian graces, if we may be allowed that expression, the best ornaments of the female character, and giving Christian love and Christian charity an influence which has at once softened and purified the heart. And, were it possible that the ill-directed ingenuity which has laboured for the downfall of religion on the continent, should get footing in this country, we persuade ourselves that it would be resisted effectually by our countrywomen, who might plead that the best graces of their character,—graces which have made them eminent amongst the women of Europe, need we add, of the world,—their sanctity, their purity, and their affection, have been inspired, and disciplined, and directed by the religion of Christ. Now, as there cannot be a greater evil to society than the corruption of women, nor a greater good than female virtue, so there cannot be a more important evidence respecting the value of Christianity in the progress of civilization, than this proof which ancient history and literature supply; first, of the moral degradation produced by heathen superstition; and, secondly, of the moral cure wrought by Christianity.

In the Epistle to the Romans, it is the object of St. Paul to prove, both to Jew and Gentile, that the moral world, though it had the law of Moses and the philosophy of Greece, was so sunk in superstition, sin, and crime, that the whole body of society was corrupt, and that there was not a hope of cure till the sources of corruption, whether in the pharisaical observances of the Jew, or in the profligate superstitions of the Gentile, were superseded by a purer faith and a sounder worship. St. Paul contends that neither the law of Moses, nor the philosophy of Greece, was able to raise Jew or Gentile from the bondage of sin and death; and he challenges the religious and the moral, and, we may add, the political facts of those times, to prove the truth of his assertion. His object was not to depreciate either the Mosaic law or the Greek philosophy, the authority of the one, or the morality of the other, but to show that so long as the pharisaical observances of the Jew, and the profligate superstitions of the Gentile, remained in force, neither religion nor philosophy could prevent the world from sinking deeper and deeper into pollution. The Apostle of the Gentiles allows that 'they knew God,' but he contends that 'they glorified Him not as God;' and, therefore, he asserts, 'God gave them up to lasciviousness;' he allows, 'that some amongst them, though they had not the law, did by nature the things contained in the law,' but he contends that the principles and conduct of such men were but an oasis in the midst of a howling wilderness, for that the mass of men were given up 'to vile affections.'

It is impossible to deny that in the Greek philosophy we find the rise and progress of a speculative knowledge of God of no common character or measure; but it is just as impossible to deny that though the nations, amongst which a few such burning and shining lights had arisen, might be said 'to know God,' it was notorious that 'they glorified Him not as God.' It is by following out St. Paul's argument, and by examining the truth of his statements, that we feel all the necessity of an abolition of heathen superstitions, and the establishing of a better faith, before sound principles and right conduct could be understood and practised by the mass of mankind, though they had been conceived by a few philosophers.

If to this evidence of the necessity of a change of faith and worship for the salvation of the ancient world, proving that without such change the religious, and moral, and political reformations which were required, were quite unattainable,—if, to this evidence, we add proofs of the religious, moral, and political reformation which Christianity actually introduced,—and if, to this two-fold evidence respecting the necessity of a change of faith, and the efficacy of the change to Christianity, we add the evidence of the actual effects of Christianity in our own times, freedom to the slave, knowledge to the ignorant, and civi-

lization to the heathen (for though these benefits have been wrought by politicians, it has been in compliance with a motive and a zeal which assuredly were not supplied by worldly wisdom or worldly justice),—and if, to this three-fold evidence, we add present indications, that still higher religious, and moral, and political effects will be wrought out by Christianity—we have in this four-fold evidence a body of proof respecting the usefulness of Christianity exactly fitted for the wants of the time.—J. P. P.

PHINEHAS (פִּינְחָס, *mouth of brass;* Sept. *Φινεές*), son of Eleazar and grandson of Aaron the high priest. An incident which illustrates the zealous and somewhat passionate character of Phinehas, occurred before the Israelites entered the Promised Land. The Israelites were encamped in the plains of Moab, and were lamenting the sin into which they had been seduced by the Midianites, when a prince of Judah named Zimri was beheld conducting a woman of Midian named Cozbi to his tent. The licentious effrontery of this act kindled the wrath of Phinehas, who hastened after them into the tent, and transfixed them both with his javelin (Num. xxv. 7, sq.) This bold act pointed out Phinehas to Moses as a proper person to accompany as priest the expedition which was immediately after sent forth, under the command of Joshua, against the Midianites, and by which the cause of the deluded Israelites was abundantly avenged (Num. xxxi. 6, sq.) After the conquest of the Promised Land, when the warriors of the two and half tribes beyond the Jordan were permitted to return to their homes, Phinehas was at the head of the deputation sent after them to inquire and remonstrate concerning the altar which, on their way, they had set up on the bank of the Jordan; and it was he doubtless who pronounced the forcible address to the supposed offenders. He was certainly the first to express his satisfaction and joy at the explanation which was given, and which, with a lightened heart, he bore back to the tribes assembled at Shiloh (Josh. xxii. 5, sq.).

It appears that while his father lived Phinehas filled the post of superintendent or chief of the Levites, probably after Eleazar became high priest (Num. iii. 32; 1 Chron. ix. 20). At the death of his father, he succeeded to the pontificate (Josh. xxiv. 33); but the only case in which he appears officially in the Bible, is in connection with the unhappy circumstances recorded at the end of the book of Judges, in which he comes forward as high priest to consult Jehovah. This mention of his name enables us to conclude that the chronological place of these occurrences would be rather towards the beginning than at the latter end of the book in which they are found [JUDGES; PRIEST].

2. PHINEHAS, son of Eli the high priest, and brother of Hophni [ELI; HOPHNI; SAMUEL].

PHLEGON (*Φλέγων*), one of the Christians of Rome to whom Paul sent his salutations (Rom. xvi. 14). The legend (*ap.* Dorotheus) makes him to have been one of the seventy disciples, and bishop of Marathon.

PHŒBE (*Φοίβη*), a deaconess of the church at Cenchreæ, recommended to the kind attention of the church of Rome by St. Paul, who had received hospitable treatment from her (Rom. xvi. 1). It is probable that she was the bearer of the Epistle to the Romans.

PHŒNICIA, and the PHŒNICIANS. The Greeks called those merchants who came from that coast of the Mediterranean Sea which runs parallel with Mount Lebanon, *Φοίνικες*. This name probably arose from the circumstance that the chief article of the commerce of these merchants was *φοινός, purple.* The word *φοινός* means *blood-red,* and is probably related to *φόνος, murder.* This derivation of the name is alluded to by Strabo (i. p. 42). Strabo, however, maintains that the Phœnicians were called *Φοίνικες*, because they resided originally on the coasts of the Red Sea. Reland, in his *Palæstina ex Monumentis Veteribus Illustrata*, derives the name from *φοίνιξ, palm-tree.* Bochart, in his *Canaan* (i. 1), derives it from the Hebrew בני ענק, *sons of Anak.*

The country inhabited by the Phœnicians was called by the Greeks *Φοινίκη*, and by the Romans Phœnice. In Cicero (*De Fin.* iv. 20) there occurs the doubtful reading Phœnicia. (Compare the Vulgate in Num. xxxiii. 51.) However, this latter form of the name has come into general use. (Compare Gesenii *Monumenta Phœnicia*, Lips. 1837, p. 338; Forbiger, *Handbuch der alten Geographie*, Lips. 1842-44, p. 659, sq.)

This name was used by the ancients sometimes in a wider, sometimes in a narrower sense. Phœnicia, in its widest signification, embraces the whole coast of the Mediterranean situated between the river Orontes and Pelusium. (Compare Strabo, xvi. p. 754, sq.) When Ptolemæus and Strabo speak of Phœnicia in a more restricted sense, they mention the river Eleutheros as its northern boundary; and Ptolemæus states also that Dora, situated to the south of the promontory Carmel, and north of the river Chorseus, was the most southern of the maritime towns of Phœnicia. The accounts contained in the Old Testament agree with these statements, since they mention the town of Aradus (ארוד), situated a short distance north of the river Eleutheros, as being the most northern town of those maritime colonies which had proceeded from Sidon, and Dor as being the most southern maritime town belonging to the Canaanites, which the Israelites had not been able to conquer. (Compare Gen. x. 18; Jos. xvii. 12, 13.) However, it appears that at a later period the tribe of Manasseh was in possession of this town. (Compare 1 Kings iv. 11; 1 Chron. vii. 29). The towns Dor and Acco (Ptolemais) were mercantile places of less importance than Tyre and Sidon, and are consequently not often mentioned. Hence arises the fact that the territory of Sidon is sometimes spoken of as if it were the most southern part of Phœnicia. For this reason we, also, in speaking of Phœnicia, mean only that slip of the coast which is bounded towards the east by Mount Lebanon, which is about twelve miles wide, and extends about one hundred miles from north to south, between the river Eleutheros and the promontory Carmel. The Israelites called this slip כנען, the *netherlands*, or *lowlands*, in contradistinction to the neighbouring mountains. (Compare Forbiger, *Handbuch der alten Geographie*, Lips. 1842-44, vol. ii. p. 659, sq.)

Phœnicia is situated between about lat. 33° and 35° N., and under long 33° E. The whole

of Phœnicia is situated at the western declivity of Mount Lebanon. Compare the article LIBANUS.

Phœnicia was distinguished by the variety of its vegetable productions. This variety was occasioned by the great diversity of climate produced by the diversity in the elevation of the soil. The Lebanon is said to bear winter on its head, spring on its shoulders, autumn in its lap, and to have summer at its feet. The fertility of Phœnicia is increased by the numerous streams whose springs are in Mount Lebanon. Even in the Song of Solomon we read the praises of the spring of living waters which flows down from Lebanon. The dense population assembled in the great mercantile towns greatly contributed to augment by artificial means the natural fertility of the soil. The population of the country is at present very much reduced, but there are still found aqueducts and artificial vineyards formed of mould carried up to the terraces of the naked rock. Ammianus Marcellinus says, Phœnice regio plena gratiarum et venustatis, urbibus decorata magnis et pulchris—Phœnicia is a charming and beautiful country, adorned with large and elegant cities. Even now this country is among the most fertile in Western Asia. It produces wheat, rye, and barley, and, besides the more ordinary fruits, also apricots, peaches, pomegranates, almonds, citrons, oranges, figs, dates, sugar-cane, and grapes, which furnish an excellent wine. In addition to these products, it yields cotton, silk, and tobacco. The country is also adorned by the variegated flowers of oleander and cactus. The higher regions are distinguished from the bare mountains of Palestine by being covered with oaks, pines, cypress-trees, acacias, and tamarisks; and above all by majestic cedars, of which there are still a few very old trees, whose stems measure from thirty to forty feet in circumference. The inhabitants of Sur still carry on a profitable traffic with the produce of Mount Lebanon, namely, wood and charcoal. Phœnicia produces also flocks of sheep and goats; and innumerable swarms of bees supply excellent honey. In the forests there are bears, wolves, panthers, and jackals. The sea furnishes great quantities of fish, so that Sidon, the most ancient among the Phœnician towns, derived its name from fishing. Concerning the natural geography of Phœnicia, compare especially the works of Forbiger, Raumer, and Robinson; also Winer, vol. ii. p. 30.

The inhabitants of Phœnicia might at the first view appear to have derived their origin from the same source (pre-Abrahamite) as the Hebrews; for they spoke the same language. The Phœnician proper names of persons and places occurring in the Old Testament may be explained from the Hebrew. For instance, מלכי צדק, Melchizedek, *king of righteousness* (Gen. xiv. 18); אבי מלך, Abimelech, *father of the king* (Gen. xx. 2); צר, *rock*, the Hebrew name for Tyre. The Phœnician inscriptions on monuments and coins exhibit also the characteristics of the Hebrew dialect in contradistinction to the Aramæan and Arabic. There are slight deviations from the ancient classical Hebrew, which may easily be explained from the circumstance that the most ancient Phœnician inscriptions now extant are not older than the fourth century before Christ. The most ancient Phœnician inscriptions are those on the Cilician coins. (Compare Gesenius, *Geschichte der Hebräischen Sprache und Schrift*, Leipz. 1815, p. 16, sq.; and Gesenii *Monumenta Phœnicia*, p. 335, sq.)

In the Old Testament the Phœnicians and Canaanites are, however, described as descending, not from Shem, but from Ham. Herodotus, also, on the authority of some Persian historians, states that the Phœnicians came as colonists to the Syrian coasts from the Erythræan Sea. He even appeals to the statement of the Phœnicians themselves (vii. 89), from which it appears that they resided originally on the shores of the Erythræan Sea; which sea, in its larger signification, extended from the eastern shores of Egypt to the western shores of India. Strabo relates in his sixteenth book (p. 766), that in the Persian Gulf were two islands; one of which was called Tyros or Tylos, and the other Aradus, on which were found temples similar to those of the Phœnicians, and inhabitants, who stated that the Phœnicians went out from them as colonists. An island, south of the Bahrein Islands, still bears the name of Arad. (Compare Niebuhr's *Beschreibung von Arabien*.) Justinus also (xvi. 3) furnishes a similar account of the origin of the Phœnicians. These are the authorities by which most antiquarians have been induced to consider the Phœnicians as colonists from the Persian Gulf. Hamaker, however, in his *Miscellanea Phœnicia* (Lugduni Batavorum, 1828, p. 172, sq.), asserts that the Phœnicians came from the Arabian Gulf; and Hengstenberg (*De Rebus Tyriorum*, Berolini, 1832, p. 93) maintains that the Phœnicians came into their country immediately after the dispersion of mankind. However, they are not mentioned in Genesis among the inhabitants of Palestine.

The first Phœnician colony was Sidon, which is therefore called in Genesis (x. 15) the first-born of Canaan. But soon other colonies arose, like Arka (Gen. x. 17), Aradus, and Smyrna (Gen. x. 18), &c., whose power extended beyond the Jordan, and who drove out before them the earlier inhabitants of Palestine. Hence it arose that the appellation, 'the land of Canaan,' was transferred to the whole of Palestine, although it is by no means a country of a low level, but is full of high elevations. However, the Canaanites, in a stricter sense, were the people who resided in the lower regions along the coast, and on the banks of the Jordan.

When the Israelites conquered the country, the Canaanites on the Phœnician coast, who resided in powerful maritime towns, preserved their independence, and were called Canaanites in particular. Thus we read, in Isa. xxiii. 11, כנען Canaan, in the signification of Phœnicia. The same word has also this meaning in the inscriptions on the Phœnician coins. In the Septuagint the Hebrew כנעני is frequently translated φοίνιξ. In Job xl. 30, A. V. xli. 6, the word כנעני means *a merchant*, because the Phœnicians were the most important of all mercantile nations.

The Carthaginians, as Phœnician colonists, maintained, even in the days of St. Augustine, that they were Canaanites. In Greek writers also occurs the name χνᾶ for Phœnicia (comp. Gesenii *Thesaurus Linguæ Hebraicæ*, Lipsiæ, 1839, tom. ii. p. 696, and Gesenii *Monumenta Phœnicia*, p. 270, sq.). The dialect of the Israelites perhaps resembled more the Aramæan, and that of the

Phœnicians more the Arabic; but this difference was nearly effaced when both nations resided in the same country, and had frequent intercourse with each other. Concerning the original country of the Phœnicians and their immigration into Canaan, compare especially Bertheau, *Zur Geschichte der Israeliten*, pp. 152-186, Göttingen, 1840; and Lengerke's *Kanaan, Volks und Religionsgeschichte Israels*, vol. i. p. 182, sq., Königsberg, 1844.

During the period of the conquest of Canaan by the Israelites, the Phœnicians possessed the following towns, which we will enumerate successively, in the direction from south to north:— Dora (דור, Josh. xi. 2; xvii. 11, sq.); Ptolemais (עכו, Judg. i. 33); Ecdippa (אכזיב, Josh. xix. 29); Tyre (צור, Josh. xix. 29); Sarepta (צרפת, 1 Kings xvii. 9, sq.; Luke iv. 26); Sidon (צידון, Gen. x. 15); Berytus (ברותה, Ezek. xlvii. 16; 2 Sam. viii. 8); Byblus (גבל, Josh. xiii. 5); Tripolis, Simyra (הצמרי, Gen. x. 18); Arka (הערקי, Gen. x. 17); Simna (הסיני, Gen. x. 16); Aradus (הארודי, Gen. x. 18). Compare the respective articles on these towns. Sidon is the only Phœnician town mentioned in Homer (see *Iliad*, vi. 239; xxiii. 743; *Odyss.* xv. 415; xvii. 421).

The Phœnicians in general are sometimes called Sidonians (comp. Gesenii *Monumenta Phœnicia*, ii. 267, sq.; *Thesaurus Linguæ Hebraicæ*, under the word צידון). Justinus (xviii. 3) alludes to the etymology of this name: 'Condita urbe quam a *piscium ubertate Sidona appellaverunt;* nam piscem Phœnices *Sidon* vocant,'—*a city being built which they called* Sidon, *from the abundance of fishes; for the Phœnicians call a fish* sidon. This statement is not quite correct. But the root צוד, which in Hebrew means only to catch beasts and birds, can also be employed in Arabic when the catching of fishes is spoken of. This root occurs also in the Aramaic, in the signification of both hunting and fishing (compare the article Zidon).

Heeren, in his work, *On the Commerce and Politics of the Ancients*, vol. i. part ii. p. 9, Göttingen, 1824, justly observes that the numerous towns which were crowded together in the narrow space of Phœnicia covered almost the entire coast, and, together with their harbours and fleets, must have presented an aspect which has scarcely ever been equalled, and which was calculated to impress every stranger on his arrival with the ideas of wealth, power, and enterprise.

We have no continuous history of the Phœnicians. The sources of such a history, as well as the works proceeding from them, have been lost. Josephus states that there were kept in various Phœnician towns, collections of public documents and annals. Menander of Ephesus derived his information from such annals when he wrote, in Greek, a history of Tyre (compare Josephus, *Contra Ap.* i. 17, 18). Dius, also, a native Phœnician, wrote, in Greek, a history of Tyre. Of these two works, only a few fragments have been preserved (compare Joseph. *Antiq.*, viii. 5. 3; xiii. 1, sq.; ix. 14. 2; *Cont. Ap.* i. 77, sq.; Theophil. *Ad Autol.* iii. 22; Sync. *Chron.* p. 182). Philo of Byblus translated and re-modelled, during the reign of Hadrian, a history of Phœnicia and Egypt, said to be composed by Sanchoniathon, B.C. 1250. From this work Porphyrius, in the fourth century after Christ, borrowed some cosmogonical arguments, which have been preserved in Eusebii *Præparatio Evangelica* (i. 10). The nature of these fragments is such, that they cannot throw much light upon Phœnician history. Theodotus, Hesycrates, and Moschos, are mentioned as authors on Phœnicia, by Tatianus (*Cont. Græcos*, § 37): their works are likewise lost. Gesenius mentions, in his *Monumenta Phœnicia* (p. 363, sq.), some later Phœnician authors, who do not touch upon historical subjects. Our knowledge of Phœnician history is consequently confined to occasional notices in the Hebrew and classical authors of antiquity. This deficiency of historical information arises also from the circumstance that the facts of Phœnician history were less connected than the events in the history of other nations. The Phœnicians never formed one compact body politic, and consequently did not always gradually advance in their political constitution and in the extent of their power. Every town endeavoured to advance its commerce in its own way. Thus there constantly entered into the life of the Phœnicians new elements, which disturbed a gradual historical progress. Phœnicia was a country favourable to the growth of maritime towns, but did not afford room for great political events. The history of the Phœnicians is that of their external commerce.

A mercantile nation cannot bear despotic government, because the greatest external liberty is requisite in order constantly to discover new sources of gain, and to enlarge the roads of commerce. The whole of Phœnicia consisted of the territories belonging to the various towns. Each of these territories had its own constitution, and in most of them a king exercised supreme power. We hear of kings of Sidon, Tyre, Aradus, and Byblus. It seems that after Nebuchadnezzar had besieged Tyre in vain, the royal dignity ceased for some time, and that there existed a kind of republican administration, under *suffetes* or judges. The regal power was always limited by the magistracy and the priesthood. The independent Phœnician states seem to have formed a confederation, at the head of which stood for some time Sidon, and at a later period Tyre. Tripolis was built conjointly by the various states in order to form the seat of their congress. The smaller states were sometimes so much oppressed by Tyre, that they preferred rather to submit to external enemies (compare Heeren's *Ideen*, &c., p. 15, sq.; Beck's *Anleitung zur genaueren Kenntniss der Welt- und Völker-Geschichte*, p. 252, sq., and 581, sq.).

The position of Phœnicia was most favourable for the exchange of the produce of the East and West. The Libanus furnished excellent timber for ships. Corn was imported from Palestine. Persians, Lydians, and Lycians, frequently served as mercenaries in the Phœnician armies (Ezek. xxvii. 10, 11). Phœnicia exported wine to Egypt (Herod. iii. 5, 6). Purple garments were best manufactured in Tyre (Amati, *De Restitutione Purpurarum*, 3d edit., Cassine, 1784). Glass was made in Sidon and Sarepta (compare Heeren, p. 86, sq.; Beck, p. 593, sq.). In Phœnicia was exchanged the produce of all known countries. After David had vanquished the Edomites and conquered the coasts of the Red

Sea, King Hiram of Tyre entered into a confederacy with Solomon, by which he ensured for his people the right of navigation to India. The combined fleet of the Israelites and Phœnicians sailed from the seaports of Ezion-geber and Elath. These ports were situated on the eastern branch of the Red Sea, the Sinus Ælaniticus, or Gulf of Akaba. Israelitish-Phœnician mercantile expeditions proceeded to Ophir, perhaps Abhira, situated at the mouth of the Indus (compare Lassen's *Indische Alterthumskunde*, i. 537, sq., Bonn, 1844). It seems, however, that the Indian coasts in general were also called Ophir. Three years were required in order to accomplish a mercantile expedition to Ophir and to return with cargoes of gold, algum-wood, ivory, silver, monkeys, peacocks, and other Indian produce. Some names of these products are Indian transferred into Hebrew, as אלמגים *almuggim;* Sanscrit *valgu*, or, according to the Decanic pronunciation, *valgum;* שן־הבים *shen-habbim* (ivory); Sanscrit *ibha;* קוף, *koph* (ape); Sanscrit *kapi;* תוכיים *tukkiyim* (peacock); Sanscrit *cikhi*, according to the Decanic pronunciation (compare 1 Kings ix. 27; x. 11, 22) [Commerce; Ophir].

It seems, however, that these mercantile expeditions to India were soon given up, probably on account of the great difficulty of navigating the Red Sea. King Jehoshaphat endeavoured to recommence these expeditions, but his fleet was wrecked at Ezion-geber (1 Kings xxii. 49). About B.C. 616 or 601, Phœnician seamen undertook, at the command of Pharaoh-Necho, a voyage of discovery, proceeding from the Red Sea round Africa, and returning after two years through the columns of Hercules to Egypt (Herod. iv. 42). The 27th chapter of Ezekiel mentions the commerce by land between India and Phœnicia. The names of mercantile establishments on the coasts of Arabia along the Persian Gulf have partly been preserved to the present day. In these places the Phœnicians exchanged the produce of the west for that of India, Arabia, and Ethiopia. Arabia especially furnished incense, gold, and precious stones. The Midianites (Gen. xxxvii. 28) and the Edomites (Ezek. xxvii. 16) effected the transit by their caravans. The fortified Idumæan town Petra contained probably the storehouses in which the produce of southern countries was collected. From Egypt the Phœnicians exported especially byssus (Ezek. xxvii. 7) for wine. According to an ancient tradition, the tyrant of Thebes, Busiris, having soiled his hands with the blood of all foreigners, was killed by the Tyrian Hercules. This indicates that Phœnician colonists established themselves and their civilization successfully in Upper Egypt, where all strangers usually had been persecuted.

At a later period Memphis was the place where most of the Phœnicians in Egypt were established. Phœnician inscriptions found in Egypt prove that even under the Ptolemies the intimate connection between Phœnicia and Egypt still existed (compare Gesenii *Monumenta Phœnicia*, xiii. 224, sq.).

From Palestine the Phœnicians imported, besides wheat, especially from Judæa, ivory, oil, and balm; also wool, principally from the neighbouring nomadic Arabs. Damascus furnished wine (Ezek. xxvii. 5, 6, 17, 18, 21), and the mountains of Syria wood. The tribes about the shores of the Caspian Sea furnished slaves and iron; for instance, the Tibaræans (תובל Tubal), and Moschi (משך Meshech). Horsemen, horses, and mules, came from the Armenians (תגרמה Togarmah). See Heeren, pp. 86-130.

The treasures of the East were exported from Phœnicia by ships which sailed first to Cyprus, the mountains of which are visible from the Phœnician coast. Citium was a Phœnician colony in Cyprus, the name of which was transferred to the whole of Cyprus, and even to some neighbouring islands and coasts called כתים (Gen. x. 4; Isa. xxiii. 1, 12). Hence also חתים, the name of a Canaanitish or Phœnician tribe (Gesen. *Mon. Phœn.*, p. 153). Cyprus was subject to Tyre up to the time of Alexander the Great. There are still found Phœnician inscriptions which prove the connection of Cyprus with Tyre. At Rhodes (רדנים) also are found vestiges of Phœnician influence. From Rhodes the mountains of Crete are visible. This was of great importance for the direction of navigators, before the discovery of the compass. In Crete, and also in the Cycladic and Sporadic Isles, are vestiges of Phœnician settlements. On the Isle of Thasos, on the southern coast of Thrace, the Phœnicians had gold mines; and even on the southern shores of the Black Sea, they had factories. However, when the Greeks became more powerful, the Phœnicians sailed more in other directions. They occupied also Sicily and the neighbouring islands, but were, after the Greek colonization, confined to a few towns, Motya, Soloes, Panormus (Thuc. vi. 2). The Phœnician mercantile establishments in Sardinia and the Balearic Isles could scarcely be called colonies.

Carthage was a Phœnician colony, which probably soon became important by commerce with the interior of Africa, and remained connected with Tyre by means of a common sanctuary. After Phœnicia had been vanquished by the Assyrians, Babylonians, and Persians, the settlements in Sicily, Sardinia, and Spain came into the power of Carthage. The Phœnicians had for a long period exported from Spain gold, silver, tin, iron, lead (Ezek. xxxviii. 13), fruit, wine, oil, wax, fish, and wool. Their chief settlement was Tarshish, תרשיש, *subjection*, from the root רשש, *he vanquished, subjected.* The Aramæans pronounced it תרתיש; hence the Greek *Tartessos.* Teis was probably only the name of a town situated to the west of the pillars of Hercules (Calpe and Abyla, now Gibraltar and Ceuta), and even more west than Gades, at the mouth of the Bætis (Herod. iv. 62; Scymnus Chius, v. 161, sq.). This river was also called Tartessus (Arist. *Meteor.* i. 13; Paus. vi. 19, 3; Strabo, iii. p. 148). At a later period the town of Tartessus obtained likewise the Phœnician name Carteja, from קרת, *town* (Strabo, iii. p. 151).

There are other names of towns in Spain which have a Phœnician derivation; Gades, גדר, *septum, fence* (comp. Gesen. *Mon. Phœn.* p. 304, sq. 349); Malaga, מלח, on account of much salt-fish thence exported; or, according to Gesenius (*Mon. Phœn.* p. 312, sq., and 353), from מלאכה־מלכה, *officina fabrorum*, iron-works, or manufactory of other metals, on account of the mines to be found there;

Belon, בעלה, *civitas*, city (Gesen. *Mon. Phœn.* p. 311, sq., and 348).

The voyage to Tarshish was the most important of those undertaken by the Phœnicians. Hence it was that their largest vessels were all called *ships of Tarshish*, although they sailed in other directions (1 Kings x. 22).

It appears, also, that the Phœnicians exported tin from the British Isles, and amber from the coasts of Prussia. Their voyages on the western coasts of Africa seem to have been merely voyages of discovery, without permanent results. The Spanish colonies were, probably, the principal sources of Phœnician wealth, and were founded at a very remote period. The migration of the Phœnician, Cadmus, into Bœotia, likewise belongs to the earlier period of Phœnician colonization. Homer seems to know little of the Sidonian commerce; which fact may be explained by supposing that the Phœnicians avoided all collision and competition with the increasing power of the Greeks, and preferred to direct their voyages into countries where such competition seemed to be improbable.

Phœnicia flourished most in the period from David to Cyrus, B.C. 1050-550. In this period were founded the African colonies, Carthage, Utica, and Leptis. These colonies kept up a frequent intercourse with the mother country, but were not politically dependent. This preserved Phœnicia from the usual stagnation of Oriental states. The civilization of the Phœnicians had a great influence upon other nations. Their voyages are described in Greek mythology as the expeditions of the Tyrian Hercules. The course of the Tyrian Hercules was not marked like that of other conquerors—viz. Medes and Assyrians—by ruined cities, and devastated countries, but by flourishing colonies, by agriculture, and the arts of peace (comp. Heeren, pp. 24-80, and Movers, *Die Phœnicier*, i. pp. 12-55.)

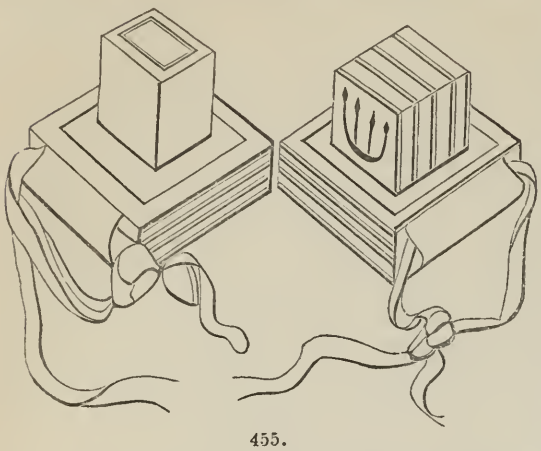
According to the Phœnician religion, the special object of worship was the vital power in nature, which is either producing or destroying. The productive power of nature, again, is either procreative, *masculine*, or receptive, *feminine*. These fundamental ideas are represented by the Phœnician gods, who appear under a great variety of names, because these leading ideas may be represented in many different ways. Compare Movers, *Untersuchungen über die Religion und die Gottheiten der Phœnicier*, Bonn, 1841; Stahr, *Die Religions systeme der Heidnischen Völker des Orients*, Berlin, 1836, pp. 376-448; Selden, *De Diis Syris*.

We need not here enter into details concerning the Phœnician gods, as the principal of them have been noticed under their names [Baal, Ashtoreth]. It suffices to state generally, that the procreative principle was worshipped as Baal, בעל, *lord*, and as the sun. The rays of the sun are, however, not only procreative, but destructive; and this destructive power is especially represented in the Ammonitish fire-god Moloch. Thus Baal represented both the generative and destructive principles of nature; in which latter capacity the Hebrews worshipped him by human sacrifice (1 Kings xviii. 28; Jer. xix. 5). He was the tutelary god of Tyre, and hence had the name of Melkar, מלקרת, equivalent to Melech-kereth מלך קרת, 'king of the city,' whom the Greeks called the Tyrian Hercules.

Of Baaltis, or Astarte, which are usually identified, although they seem to have been originally different, we shall here add nothing to what has been already stated under Ashtoreth.

Besides these principal deities, the Phœnicians worshipped seven *kabirim*, כבירים, *mighty ones*, whose numbers corresponded with the seven planets. These kabirim were considered as protectors of men in using the powers of nature, especially navigation. With these seven kabirim was associated Esmun (השמיני = אשמן, *the eighth*), representing the sky full of fixed stars, surrounding the seven planets, the refreshing air and the warmth of life. Esmun was called by the Greeks Ἀσκληπίος. Many Phœnician names are compounded with Esmun. Hence we infer that he was frequently worshipped (comp. Gesen. *Mon. Phœn.* p. 136, sq.).—G. B.

PHRAT. [Euphrates.]



PHRYGIA (Φρυγία), an inland province of Asia Minor, bounded on the north by Bithynia and Galatia, on the east by Cappadocia and Lycaonia, on the south by Lycia, Pisidia, and Isauria, and on the west by Caria, Lydia, and Mysia. In early times Phrygia seems to have comprehended the greater part of the peninsula of Asia Minor. It was subsequently divided into Phrygia Major on the south, and Phrygia Minor or Epictetus (*acquired*) on the north-west. The Romans divided the province into three districts: Phrygia Salutaris on the east, Phrygia Pacatiana on the west, and Phrygia Katakekaumene (*the burnt*) in the middle. The country, as defined by the specified limits, is for the most part level, and very abundant in corn, fruit, and wine. It had a peculiar and celebrated breed of cattle, and the fine raven black wool of the sheep around Laodicea on the Lycus was in high repute. The Mæander and the Hermus were its chief rivers. The Phrygians were a very ancient people, and are supposed to have formed, along with the Pelasgi, the aborigines of Asia Minor. Jews from Phrygia were present in Jerusalem at the Feast of Pentecost (Acts ii. 10), and the province was afterwards twice traversed by St. Paul in his missionary journeys (Acts xvi. 6; xviii. 23). The cities of Laodicea, Hierapolis, and Colossæ, mentioned in the New Testament, belonged to Phrygia, and Antioch in Pisidia was also within its limits (see the names). Rosenmüller, *Bibl. Geog.* iii. 43-45; Winer, *Real-worterbuch;* Leake, *Geog. of Asia Minor.*

PHUL. [Pul.]

PHUT (פוט; Sept. Φούδ), a son of Ham (Gen. x. 6), progenitor of an African people of the same name, sometimes rendered 'Libya' (Jer. xlvi. 9; Ezek. xxvii. 10; xxx. 5; xxxviii. 5; Nah. iii. 9) [Nations, Dispersion of].

PHYLACTERY (*φυλακτήρια*, called in Rabbinical Hebrew תפלין *tephelin*), strips of parchment inscribed with particular passages of Scripture (Deut. vi. 4-9; xi. 13-21; Exod. xiii. 1-10, 11-16). They were folded up and enclosed in a small leather box, and worn upon the forehead nearly between the eyes, or upon the left arm near to the heart, being attached by straps of leather (Joseph. *Antiq.* iv. 8, 13; Hieron. *in Ezek.* xxiv. 17). They were considered as thus

reminding the wearers to fulfil the law with the head and heart (comp. Rosenmüller *in Exod.*

455.

xiii. 9); and they were also regarded as amulets, protecting the wearer from the powers of evil, especially demons (Targ. *in Cant.* viii. 3). On this notion was founded the Greek name of φυλακτήριον, which means a 'safeguard.' These appendages were used during the stated prayers, and only by men. The whole observance is founded on the authority of the texts which are written on the strips of parchment, as Exod. xiii. 16: 'It shall be for a token upon thine hand, and for frontlets (טוטפות, bands, fillets) between thine eyes;' which, although in all probability only figurative expressions, have been literally understood, and acted upon by the Jews since the Exile. In existing usage the skin employed in making the phylacteries is prepared with much care, and the writing traced with minute accuracy and neatness. The Hebrew ritualists give very exact and numerous directions on this subject, which are required to be closely observed. The case itself is composed of several layers of parchment or of black calf-skin. The phylacteries for the head have four cavities, in each of which is put one of the four texts to which we have referred; but the phylacteries for the arm have only one cavity, containing the same texts all written on one slip of parchment. Lightfoot thinks it not unlikely that our Saviour himself wore the Jewish *tephelin* or phylacteries, as well as the *zizith* or fringes, according to the custom of his nation; and that in Matt. xxiii. 5, our Lord condemns not the wearing of them, but the pride and hypocrisy of the Pharisees in making them broad and visible, to obtain respect and reputation for wisdom and piety (*Hor. Heb.* ad Matt. xxiii. 5). Maimonides, *Yad Hacash.* pp. 2, 3; Carpzov, *Apparat.* p. 190, sq.; Beck, *Dissert. de usu Phylacterior.*; Ugolino, *De Phylacter. Hebræor.*, in *Thesaurus*, tom. xxi.; Buxtorf. *Synag.* p. 179, sq.; Townley, *Reasons for the Laws of Moses*, p. 350).

PHYSIC; PHYSICIANS. There can be no question that the Israelites brought some knowledge of medicine with them from Egypt, whose physicians were celebrated in all antiquity. To the state of medical knowledge in that country there are indeed some allusions in Scripture, as contained in the notice of the corps of physicians in the service of Joseph (Gen. l. 2); of the use of artificial help and practised midwives in childbirth (Exod. i. 16); and of the copious materia medica, the 'many medicines,' which their medical practice had brought into use (Jer. lxvi. 11). On the strength of these notices, and in the absence of equally detailed information respecting the state of medicine among the Hebrews, it has become usual to bring under the present head all that Wilkinson and others tell us respecting the medical service of the Egyptians: but, in truth, all this has little connection with the Hebrews, and tends nothing to the illustration of Scripture, except in the particular instances to which we have referred; for nothing can be more manifest than that the state of medicine was very different among the Egyptians from what it was among the Hebrews. It is, therefore, better to bring together the few facts which are really available, than to occupy our space with irrelevant matter. This will embrace so much of the Egyptian matter as is properly applicable to the subject.

In Gen. l. 2, it is said that Joseph 'commanded his servants, the physicians, to embalm his father; and the physicians embalmed Israel.' By this we are not to understand that all the physicians of Joseph took part in the operation. The command must be considered as addressed to those among them to whom this business belonged. It seems rather remarkable to find in the household of Joseph a considerable number of physicians. Warburton (*Divine Legation*, b. iv. 3-83) compares with this account what Herodotus (ii. 84) says of the Egyptian physician: 'The medicine practice is divided among them as follows: each physician is for one kind of sickness, and no more; and all places are crowded with physicians: for there are physicians for the eyes, physicians for the head, physicians for the teeth, physicians for the stomach, and for internal diseases.' Therefore, remarks Warburton, it ought not to appear strange that Joseph had a considerable number of family physicians. 'Every great family, as well as every city, must needs, as Herodotus expresses it, swarm with the faculty. A multitude of these domestics would now appear an extravagant piece of state even in a first minister, but we see it could not be otherwise, when each distemper had its proper physician.' The renown of the Egyptian physicians, in ancient times, may be sufficiently illustrated by the fact that Cyrus had a physician sent him from Egypt, and Darius always had Egyptian physicians at his court (Herodot. iii. 1. 129). On this subject see Plin. *Hist. Nat.* vii. 57; xxvi. 3; xxix. 30; Wilkinson, *Anc. Egyptians*, iii. 390-394; Hengstenberg, *D. Bücher Moses u. Aegypten*, pp. 70, 71; Sprengel, *Gescht. d. Alte Welt.*, i. 62

In the early stage of medical practice attention was confined among all nations to surgical aid and external applications: even down to a comparatively late period outward maladies appear to have been the chief subjects of medical treatment among the Hebrews (Isa. i. 6; Ezek. xxx. 21; 2 Kings viii. 29; ix. 15); and although they were not altogether without remedies for internal or even mental disorders (2 Chron. xvi. 12; 1 Sam. xvi. 16), they seem to have made but little progress in this branch of the healing art. The employment of the physician was, however, very general both before and after the

exile (2 Chron. xvi. 12; Jer. viii. 22; Sirach xxxviii. 1; Mark v. 26; comp. Luke iv. 23; v. 31; viii. 43).

The medicines most in use were salves, particularly balms (Jer. viii. 21; xlvi. 11; comp. Prosper Alpinus, *Med. Ægypt.*, p. 118), plasters or poultices (2 Kings xx. 7; comp. Plin. xxiii. 63), oil-baths (Joseph. *De Bell. Jud.* i. 33. 5; ii. 21. 6; *T. Bab.* tit. *Berachoth*, i. 2), mineral baths (Joseph. *Antiq.* xvii. 6. 5; *Vita*, 16; *De Bell. Jud.* i. 33. 5; ii. 21. 6; comp. John v. 2, sq.), river bathing (2 Kings v. 10). Of remedies for internal complaints, some notion may be formed from the Talmudical intimations of things lawful and unlawful to be done on the Sabbath day. They were mostly very simple, such as our old herbalists would have been disposed to recommend. For instance:—'It is unlawful to eat Greek hyssop on the Sabbath, because it is not food fit for healthy people; but man may eat wild rosemary, and drink אבום רועח ("bloom of the herbs;" some plant regarded as an antidote against pernicious liquids); a man may eat of any kind of food as medicine, and drink any kind of herbage, except water of דקלים *dekalim* (*i. e.* "water of trees," that is, from a spring between two trees, the first draught of which was believed to promote digestion, the second to be laxative, and the third an emetic); and of כום עקרים *cos ikkarim* (a mucilage or ointment of pulverized herbs and gum in wine), as these are only remedies for the jaundice; but a man may drink the water of *dekalim* for thirst, and may anoint himself with the oil of *ikkarim*, but not as a remedy. He who has the toothache must not rinse his teeth with vinegar, but he may wash them as usual (*i. e.* dip something in vinegar, and rub them), and if he gets cured, he does get cured. He who has pains in his loins must not rub them with wine or vinegar; he may, however, anoint them with any kind of oil, except rose-oil. Princes may anoint (dress) their wounds with rose-oil, as they are in the habit of anointing themselves on other days' (*T. Bab.* tit. *Sabbath*, fol. 110; comp. Lightfoot, *Hor. Hebr.* in Matt. v. 26).

Amulets were also much in use among the Jews; the character of which may be shown from the same source:—'It is permitted [even on the Sabbath] to go out with the egg of a grasshopper, or the tooth of a fox, or the nail of one who has been hanged, as medical remedies' (*T. Bab.* tit. *Sabbath*, fol. 4. 2). Strict persons, however, discountenanced such practices as belonging to 'the ways of the Amorites.' Enchantments were also employed by those who professed the healing art, especially in diseases of the mind; and they were much in the habit of laying their hands upon the patient (2 Kings v. 11; Joseph. *Antiq.* ii. 5).

The part taken by the priest in the judgment on leprosy, &c., has led to an impression that the medical art was in the hands of the Levitical body. This may in some degree be true; not because they were Levites, but because they, more than any other Hebrews, had leisure, and sometimes inclination for learned pursuits. The acts prescribed for the priest by the law do not, however, of themselves, prove anything on this point, as the inspection of leprosy belonged rather to sanitary police than to medicine—although it was certainly necessary that the inspecting priest should be able to discriminate, according to the rules laid down in the law, the diagnosis of the disease placed under his control (Lev. xii. 13; xiv. 15). The priests themselves were apt to take colds, &c., from being obliged to minister at all times of the year with naked feet; whence there was in latter times a medical inspector attached to the temple to attend to their complaints (Kall, *De Morbis Sacerdot. V. T.*; Lightfoot, p. 781).

Of anatomical knowledge some faint traces may be discerned in such passages as Job ix. 8, sq. It does not appear that the Hebrews were in the habit of opening dead bodies to ascertain the causes of death. We know that the Egyptians were so, and their practice of embalmment must have given them much anatomical knowledge (Wilkinson, *Anc. Egypt.* iii. 392). But to the acquisition of such knowledge there were great obstacles among a people to whom simple contact with a corpse conveyed pollution. Besides the authorities cited, see F. Börner, *Dissert. de Statu Medicinæ ap. Vett. Ebr.*, 1755; Sprengel, *De Medicina Ebræor.*, 1789; Mead, *Medica Sacra*, 1755; Schmidt, *Bibl. Medic.*; Norberg, *De Medicina Arabum*, in *Opusc. Acad.* iii, 404, sq.; see also Diseases of the Jews, and the names of diseases in the present work.

PI-BESETH (פִּי בֶסֶת; Sept. Βούβαστος), a city of Egypt, named with several others in Ezek. xxx. 17. According to the Septuagint, which is followed by the Vulgate, it is the same with Bubastus, which was the principal town of the Nomos Bubastites (Plin. *Hist. Nat.* v. 9; Ptol. iv. 5). Bubastus itself is evidently a corruption of Pi-bast, Pi being the Egyptian article; and Pi-beseth seems also to be manifestly no other than a corrupt reading of the same Egyptian name (Wilkinson's *Modern Egypt.* i. 427). That name was derived from the goddess Bubastis (Copt. *Pascht*), whom the Greeks identified with their Artemis. A great festive pilgrimage was yearly made to her temple in this place by great numbers of people (Herod. ii. 59). Bubastus is described with unusual minuteness by Herodotus (ii. 137, 138); and Wilkinson assures us that the outlines of his account may still be verified. The city was taken by the Persians, who destroyed the walls (Diod. Sic. xvi. 51); but it was still a place of some consideration under the Romans. It was near Bubastus that the canal leading to Arsinoe (Suez) opened to the Nile (Herod. ii. 158); and although the mouth was afterwards often changed and taken more southward, it has now returned to its first locality, as the present canal of Tel-el-Wadee commences in the vicinity of Tel Basta. This Tel Basta, which undoubtedly represents Bubastus, is in N. lat. 30° 36'; E. long. 31° 33. The site is occupied by mounds of great extent, which consist of the crude brick houses of the town, with the usual heaps of broken pottery. The temple, of which Herodotus states that, although others in Egypt were larger and more magnificent, none were more beautiful, is entirely destroyed; but the remaining stones, being of the finest red granite, confirm the historian's testimony (Wilkinson, *Modern Egypt.* i. 300, 427-429; Ritter, *Erdkunde*, i. 825).

PIGEON. [Dove; Turtle-Dove.]

PI-HAHIROTH (פִּי הַחִירֹת), a place near the northern end of the Gulf of Suez, east of Baal-zephon (Exod. xiv. 2, 9; Num. xxxiii. 7). The Hebrew signification of the words would be equivalent to 'mouth of the caverns;' but it is doubtless an Egyptian name, and as such would signify a 'place where grass or sedge grows.' Jablonsky, *Opusc.* i. 447; ii. 159, comp. Gesen. *Thesaur.* s. v. [Exodus].

PILATE, PONTIUS, was the sixth Roman Procurator of Judæa (Matt. xxvii. 2; Mark xv. 1; Luke iii. 1; John xviii.-xix.), under whom our Lord taught, suffered, and died (Acts iii. 13; iv. 27; xiii. 28; 1 Tim. vi. 13; Tacit. *Annal.* xv. 44). The testimony of Tacitus on this point is no less clear than it is important; for it fixes beyond a doubt the time when the foundations of our religion were laid. The words of the great historian are: Auctor nominis ejus Christus, Tiberio imperitante, per Procuratorem Pontium Pilatum supplicio affectus est.—'The author of that name (Christian) or sect was Christ, who was capitally punished in the reign of Tiberius by Pontius Pilate.'

Pilate was the successor of Valerius Gratus, and governed Judæa, as we have seen, in the reign of Tiberius. He held his office for a period of ten years. The agreement on this point between the accounts in the New Testament and those supplied by Josephus, is entire and satisfactory. It has been exhibited in detail by the learned, accurate, and candid Lardner (vol. i. 150-389, Lond. 1827).

Pilate's conduct in his office was in many respects highly culpable. Josephus has recorded two instances in which Pilate acted very tyrannically (*Antiq.* xviii. 3. 1; comp. *De Bell. Jud.* ii. 9. 2, sq.) in regard to the Jews. 'But now Pilate, the Procurator of Judæa, removed the army from Cæsarea to Jerusalem, to take their winter quarters there, in order to abolish the Jewish laws. So he introduced Cæsar's effigies, which were upon the ensigns, and brought them into the city; whereas our law forbids us the very making of images; on which account the former procurators were wont to make their entry into the city with such ensigns as had not those ornaments. Pilate was the first who brought those images to Jerusalem, and set them up there: which was done without the knowledge of the people, because it was done in the night-time; but, as soon as they knew it, they came in multitudes to Cæsarea, and interceded with Pilate many days, that he would remove the images; and when he would not grant their requests, because this would tend to the injury of Cæsar, while they yet persevered in their request, on the sixth day he ordered his soldiers to have their weapons privately, while he came and sat upon his judgment-seat; which seat was so prepared in the open place of the city, that it concealed the army that lay ready to oppress them: and, when the Jews petitioned him again, he gave a signal to the soldiers to encompass them round, and threatened that their punishment should be no less than immediate death, unless they would leave off disturbing him, and go their ways home. But they threw themselves on the ground, and laid their necks bare, and said they would take their death very willingly, rather than the wisdom of their laws should be transgressed; upon which Pilate was deeply affected with their resolution to keep their laws inviolable, and presently commanded the images to be carried back from Jerusalem to Cæsarea.'

'But Pilate undertook to bring a current of water to Jerusalem, and did it with the sacred money, and derived the origin of the stream from a distance of 200 furlongs. However, the Jews were not pleased with what had been done about this water; and many ten thousands of the people got together, and made a clamour against him, and insisted that he should leave off that design. Some of them also used reproaches, and abused the man, as crowds of such people usually do. So he habited a great number of his soldiers in their habit, who carried daggers under their garments, and sent them to a place where they might surround them. He bid the Jews himself go away; but they boldly casting reproaches upon him, he gave the soldiers that signal which had been beforehand agreed on, who laid upon them much greater blows than Pilate had commanded them, and equally punished those that were tumultuous and those that were not; nor did they spare them in the least; and since the people were unarmed, and were caught by men prepared for what they were about, there were a great number of them slain by this means, and others of them ran away wounded. And thus an end was put to this sedition.'

'We have,' says Lardner, 'another attempt of Pilate's of the same nature, mentioned in the letter which Agrippa the Elder sent to Caligula, as this letter is given us by Philo. In some particulars it has a great resemblance with the story Josephus has told of Pilate's bringing the ensigns into Jerusalem, and in others it is very different from it; which has given occasion to some learned men to suppose that Philo has been mistaken. For my own part, as I make no doubt but Josephus's account of the ensigns is true, so I think that Philo may also be relied on for the truth of a fact he has mentioned, as happening in his own time in Judæa, and, consequently, I judge them to be two different facts.'

Agrippa, reckoning up to Caligula the several favours conferred on the Jews by the Imperial family, says: 'Pilate was procurator of Judæa. He, not so much out of respect to Tiberius as a malicious intention to vex the people, dedicates gilt shields, and places them in Herod's palace within the holy city. There was no figure upon them, nor any thing else which is forbidden, except an inscription, which expressed these two things—the name of the person who dedicated them, and of him to whom they were dedicated. When the people perceived what had been done, they desired that this innovation of the shields might be rectified; that their ancient customs, which had been preserved through so many ages, and had hitherto been untouched by kings and emperors, might not now be violated. He refused their demands with roughness, such was his temper, fierce and untractable. They then cried out, Do not you raise a sedition yourself; do not you disturb the peace by your illegal practices. It is not Tiberius's pleasure that any of our laws should be broken in upon. If you have received any edict, or letter from the emperor to this purpose, produce it, that we may leave you, and depute an embassy to him, and entreat him to re-

voke his orders. This put him out of all temper; for he was afraid that if they should send an embassy, they might discover the many mal-administrations of his government, his extortions, his unjust decrees, his inhuman cruelties. This reduced him to the utmost perplexity. On the one hand he was afraid to remove things that had been once dedicated, and was also unwilling to do a favour to men that were his subjects; and, on the other hand, he knew very well the inflexible severity of Tiberius. The chief men of the nation observing this, and perceiving that he repented of what he had done, though he endeavoured to conceal it, wrote a most humble and submissive letter to Tiberius. It is needless to say how he was provoked when he read the account of Pilate's speeches and threatenings, the event showing it sufficiently. For he soon sent a letter to Pilate, reprimanding him for so audacious a proceeding; requiring, also, that the shields should be removed. And, accordingly, they were carried from the metropolis to Cæsarea by the seaside, called Sebaste, from your great grandfather, that they might be placed in the temple there consecrated to him, and there they were reposited.'

To the Samaritans, also, Pilate conducted himself unjustly and cruelly. His own misconduct led the Samaritans to take a step which in itself does not appear seditious or revolutionary, when Pilate seized the opportunity to slay many of the people, not only in the fight which ensued, but also in cold blood after they had given themselves up. 'But when this tumult was appeased, the Samaritan Senate sent an embassy to Vitellius, now President of Syria, and accused Pilate of the murder of those who had been slain. So Vitellius sent Marcellus, a friend of his, to take care of the affairs of Judæa, and ordered Pilate to go to Rome to answer before the emperor to the accusations of the Jews. Pilate, when he had tarried ten years in Judæa, made haste to Rome, and this in obedience to the orders of Vitellius, which he durst not contradict; but before he could get to Rome, Tiberius was dead' (Joseph. *Antiq.* xviii. 4. 2). This removal took place before the Passover, in A.D. 36, probably about September or October, A.D. 35; Pilate must, therefore, as he spent ten years in Judæa, have entered on his government about October, A.D. 25, or at least before the Passover, A.D. 26, in the twelfth year of Tiberius's sole empire (Compare Lardner, i. 391, sq.; Winer, *Real-wörterb.*).

To be put out of his government by Vitellius, on the complaints of the people of his province, must have been a very grievous mortification to Pilate; and though the emperor was dead before he reached Rome, he did not long enjoy such impunity as guilt permits; for, as Eusebius (*Chron.* p. 78) states, he shortly afterwards made away with himself out of vexation for his many misfortunes (ποικίλαις περιπέσων συμφόραις).

It is a matter of considerable importance in regard to the exposition of the New Testament, to define accurately what relation the Jews stood in during the ministry of Christ in particular to their Roman masters. Lardner has discussed the question with a learning and ability which have exhausted the subject, and he concludes that the Jews, while they retained for the most part their laws and customs, both civil and religious, untouched, did not possess the power of life and death, which was in the hands of the Roman Governor, and was specifically held by Pilate. Pilate, indeed, bore the title of Procurator, and the Procurator, as being a fiscal officer, had not generally the power of life and death. 'But,' says Lardner (i. comp. pp. 83-164), 'Pilate, though he had the title of Procurator, had the power of a President. The Evangelists usually give Pilate, Felix, and Festus, the title of Governor, a general word, and very proper, according to the usage of the best writers, and of Josephus in particular, in many places.' According to the Evangelists, the Jewish council having, as they pretended, convicted Jesus of blasphemy, and judged him guilty of death, led him away to Pilate, and seem to have expected that he should confirm their sentence, and sign an order that Jesus should be punished accordingly. Indeed, the accounts found in the Gospels and in other authorities, touching the civil condition of the Jews at this time, are in strict agreement. We proceed to mention another instance of accordance, which is still more forcible, as being on a very minute point.

From Matt. xxvii. 19, it appears that Pilate had his wife (named probably Procla, or Claudia Procula) with him. A partial knowledge of Roman history might lead the reader to question the historic credibility of Matthew in this particular. In the earlier periods, and, indeed, so long as the Commonwealth subsisted, it was very unusual for the governors of provinces to take their wives with them (Senec. *De Controv.* 25), and in the strict regulations which Augustus introduced he did not allow the favour, except in peculiar and specified circumstances (Sueton. *Aug.* 24). The practice, however, grew to be more and more prevalent, and was (says Winer, *Real-wört.* in 'Pilate') customary in Pilate's time. It is evident from Tacitus, that at the time of the death of Augustus, Germanicus had his wife Agrippina with him in Germany (*Annal.* i. 40, 41; comp. iii. 33-59; Joseph. *Antiq.* xx. 10. 1; Ulpian, iv. 2). Indeed, in the beginning of the reign of Tiberius, Germanicus took his wife with him into the East. Piso, the Prefect of Syria, took his wife also along with him at the same time (Tacit. *Annal.* ii. 54, 55). 'But,' says Lardner (i. 152), 'nothing can render this (the practice in question) more apparent than a motion made in the Roman Senate by Severus Cæsina, in the fourth consulship of Tiberius, and second of Drusus Cæsar (A.D. 21), that no magistrate to whom any province was assigned, should be accompanied by his wife, except the Senate's rejecting it, and that with some indignation' (Tacit. *Annal.* iii. 33, 34). The fact mentioned incidentally, or rather implied, in Matthew, being thus confirmed by full and unquestionable evidence, cannot fail to serve as a corroboration of the evangelical history.

Owing to the atrocity of the deed in which Pilate took a principal part, and to the wounded feelings of piety with which that deed has been naturally regarded by Christians, a very dark idea has been formed of the character of this Roman governor. That character was undoubtedly bad; but moral depravity has its degrees, and the cause of religion is too sacred to admit any spurious aid from exaggeration. It is therefore desirable to form a just conception of the character of Pilate, and to learn specifically what were the vices under which he laboured. For this purpose a

brief outline of the evangelical account seems necessary. The narratives on which the following statement is founded may be found in John xviii., xix.; Matt. xxvii.; Mark xv.; Luke xxiii.

Jesus having been betrayed, apprehended, and found guilty of blasphemy by the Jewish Sanhedrim, is delivered to Pilate in order to undergo the punishment of death, according to the law in that case provided. This tradition of Jesus to Pilate was rendered necessary by the fact that the Jews did not at that time possess on their own authority the power of life and death. Pilate could not have been ignorant of Jesus and his pretensions. He might, had he chosen, have immediately ordered Jesus to be executed, for he had been tried and condemned to death by the laws of the land; but he had an alternative. As the execution of the laws, in the case at least of capital punishments, was in the hands of the Roman Procurator, so without any violent straining might his tribunal be converted into a court of appeal in the last instance. At any rate, remonstrance against an unjust verdict was easy and proper on the part of a high officer, who, as having to inflict the punishment, was in a measure responsible for its character. And remonstrance might easily lead to a revision of the grounds on which the verdict had been given, and thus a cause might virtually be brought, *de novo*, before the Procurator: this took place in the case of our Lord. Pilate gave him the benefit of a new trial, and pronounced him innocent.

This review of the case was the alternative that lay before Pilate, the adoption of which speaks undoubtedly in his favour, and may justify us in declaring that his guilt was not of the deepest dye.

That the conduct of Pilate was, however, highly criminal cannot be denied. But his guilt was light in comparison of the criminal depravity of the Jews, especially the priests. His was the guilt of weakness and fear, theirs the guilt of settled and deliberate malice. His state of mind prompted him to attempt the release of an accused person in opposition to the clamours of a misguided mob; theirs urged them to compass the ruin of an acquitted person by instigating the populace, calumniating the prisoner, and terrifying the judge. If Pilate yielded against his judgment under the fear of personal danger, and so took part in an act of unparalleled injustice, the priests and their ready tools originated the false accusation, sustained it by subornation of perjury, and when it was declared invalid, enforced their own unfounded sentence by appealing to the lowest passions. Pilate, it is clear, was utterly destitute of principle. He was willing, indeed, to do right, if he could do right without personal disadvantage. Of gratuitous wickedness he was perhaps incapable, certainly in the condemnation of Jesus he has the merit of being for a time on the side of innocence. But he yielded to violence, and so committed an awful crime. In his hands was the life of the prisoner. Convinced of his innocence he ought to have set him at liberty, thus doing right regardless of consequences. But this is an act of high virtue which we hardly require at the hands of a Roman governor of Judæa; and though Pilate must bear the reproach of acting contrary to his own declared convictions, yet he may equally claim some credit for the apparently sincere efforts which he made in order to defeat the malice of the Jews and procure the liberation of Jesus.

If now we wish to form a judgment of Pilate's character, we easily see that he was one of that large class of men who aspire to public offices, not from a pure and lofty desire of benefiting the public and advancing the good of the world, but from selfish and personal considerations, from a love of distinction, from a love of power, from a love of self-indulgence; being destitute of any fixed principles, and having no aim but office and influence, they act right only by chance and when convenient, and are wholly incapable of pursuing a consistent course, or of acting with firmness and self-denial in cases in which the preservation of integrity requires the exercise of these qualities. Pilate was obviously a man of weak, and therefore, with his temptations, of corrupt character. The view given in the Apostolical Constitutions (v. 14), where unmanliness (ἀνανδρία) is ascribed to him, we take to be correct. This want of strength will readily account for his failing to rescue Jesus from the rage of his enemies, and also for the acts of injustice and cruelty which he practised in his government—acts which, considered in themselves, wear a deeper dye than does the conduct which he observed in surrendering Jesus to the malice of the Jews. And this same weakness may serve to explain to the reader how much influence would be exerted on this unjust judge, not only by the stern bigotry and persecuting wrath of the Jewish priesthood, but specially by the not concealed intimations which they threw out against Pilate, that, if he liberated Jesus, he was no friend of Tiberius, and must expect to have to give an account of his conduct at Rome. And that this was no idle threat, nothing beyond the limits of probability, Pilate's subsequent deposition by Vitellius shows very plainly; nor could the procurator have been ignorant either of the stern determination of the Jewish character, or of the offence he had by his acts given to the heads of the nation, or of the insecurity, at that very hour, when the contest between him and the priests was proceeding regarding the innocent victim whom they lusted to destroy, of his own position in the office which he held, and which, of course, he desired to retain. On the whole, then, viewing the entire conduct of Pilate, his previous iniquities as well as his bearing on the condemnation of Jesus—viewing his own actual position and the malignity of the Jews, we cannot, we confess, give our vote with those who have passed the severest condemnation on this weak and guilty governor.

That Pilate made an official report to Tiberius of the condemnation and punishment of Jesus Christ, is likely in itself; and becomes the more likely, if the view we have given of Pilate's character is substantially correct, for then the governor did not regard the case of Jesus as an ordinary, and therefore inconsiderable one, but must have felt its importance alike in connection with the administration of justice, the civil and religious character of the Jews, and therefore with the tenure of the Roman power. The voice of antiquity intimates that Pilate did make such a report; the words of Justin Martyr are: 'That these things were so done you may know from the *Acts* made in the time of Pontius Pilate' (*Apol.*

i. 76). A similar passage is found a little further on in the same work. Now, when it is considered that Justin's *Apology* was a set defence of Christianity, in the shape of an appeal to the heathen world through the persons of its highest functionaries, it must seem very unlikely that the words would have been used had no such documents existed; and nearly as improbable that those *Acts* would have been referred to had they not been genuine. Tertullian also uses language equally decisive (*Apol.* v. 21). Eusebius gives a still fuller account (*Hist. Eccles.* ii. 2). These important passages may be found in Lardner (vi. 606, seq.). See also Ord's *Acta Pilati*, or Pilate's report (vii. 4), long circulated in the early church, being received without a suspicion (Chrysost. *Hom. viii. in Pasch.*; Epiphan. *Hær.* l. 1; Euseb. i. 9 and 11; 9, 5, and 7). There can be little doubt that the documents were genuine (Hencke, *Opuse. Aead.* p. 201, sq.). Such is the opinion of Winer (*Real-wörterb.*). Lardner, who has fully discussed the subject, decides that 'it must be allowed by all that Pontius Pilate composed some memoirs concerning our Saviour, and sent them to the emperor' (vi. 610). Winer adds, 'What we now have in Greek under this title (*Pilate's Report*), see Fabricii *Apocr.* i. 237, 239; iii. 456, as well as the two letters of Pilate to Tiberius, are fabrications of a later age.' So Lardner: 'The *Acts* of Pontius Pilate, and his letter to Tiberius, which we now have, are not genuine, but manifestly spurious.' We have not space here to review the arguments which have been adduced in favour of and against these documents; but we must add that we attach some importance to them, thinking it by no means unlikely that, if they are fabrications, they are fabricated in some keeping with the genuine pieces, which were in some way lost, and the loss of which the composers of our actual pieces sought as well as they could to repair. If this view can be sustained, then the documents we have may serve to help us in the use of discretion to the substance of the original *Acts*. At all events, it seems certain that an official report was made by Pilate; and thus we gain another proof that 'these things were not done in a corner.' Those who wish to enter into this subject should first consult Lardner (*ut supra*), and the valuable references he gives. See also J. G. Altman, *De Epist. Pil. ad Tiber.* Bern. 1755; Van Dale, *De Orac.* p. 609, sq.; Schmidt, *Einleitung ins N. T.*, ii. 249, sq. Of especial value is Hermansson, *De Pontio Pilat.*, Upsal, 1624; also Burger, *De Pontio Pilat.*, Misen. 1782.

On the general subject of this article, the reader may refer to Germar, *Docetur ad loca P. Pilati facinora, eæt.*, Thorun, 1785; J. M. Müller, *De P. Christum servandi Studio*, Hamb. 1751; Niemeyer, *Charakt.* i. 129, sq.; Paulus, *Comment.* iii. 697, sq.; Lücke, *On John XIX.*; Gotter, *De Conjugis Pilati Somnio*, Jen. 1704; Kluge, *De Somnio Uxoris Pilati*, Hal. 1720; Herbart, *Examen Somnii Ux. Pil.*, Oldenb. 1735; Schuster's *Urtheil üb. Pilatus*, in Eichhorn's *Biblioth. d. Bibl. Liter.* x. 823, sq.; Olshausen, *Comment.* ii. 453, sq.; Mounier, *De Pilati in Causa Servat. agendi ratione*, 1825. Hase, in his *Leben Jesu*, p. 215, affords valuable literary references on this, as on so many other New Testament subjects.—J. R. B.

PINE TREE. [Oren.]

PINNACLE. In the account of our Lord's temptation (Matt. iv. 5), it is stated that the devil took him to Jerusalem, 'and set him on a pinnacle of the temple' (ἐπὶ τὸ πτερύγιον τοῦ ἱεροῦ). The part of the temple denoted by this term has been much questioned by different commentators, and the only certain conclusion seems to be that it cannot be understood in the sense usually attached to the word (*i. e.* the point of a spiral ornament), as in that case the article would not have been prefixed. Grotius, Hammond, Doddridge, and others, take it in the sense of balustrade or pinnated battlement. But it is now more generally supposed to denote what was called the king's portico, which is mentioned by Josephus (*Antiq.* xv. 11. 5), and is the same which is called in Scripture 'Solomon's porch.' Of this opinion are Wetstein, Kuinoel, Parkhurst, Rosenmüller, and others [Temple]. Krebs, Schleusner, and some others, however, fancy that the word signifies the ridge of the roof of the temple; and Josephus (*Antiq.* xv. 11. 5) is cited in proof of this notion. But we know that iron spikes were fixed all over the roof of the temple, to prevent the holy edifice from being defiled by birds; and the presence of these spikes creates an objection, although the difficulty is perhaps not insuperable, as we are told that the priests sometimes went to the top of the temple (*Middoth.* ch. 4; *T. Bab.* tit. *Taanith*, fol. 29). Dr. Bloomfield asks: 'May it not have been a lofty spiral turret, placed somewhere about the centre of the building, like the spire in some cathedrals, to the topmost look-out of which the devil might take Jesus?' (*Recens. Synopt.* in Matt. iv. 5). We answer, no: steeples do not belong to ancient or to Oriental architecture, and it is somewhat hazardous to provide one for the sole purpose of meeting the supposed occasion of this text.

Lightfoot, whose opinion on this point is entitled to much respect, declares his inability to judge, whether the part denoted should be considered as belonging to the holy fabric itself, or to some building within the holy circuit. If the former, he can find no place so fitting as the top of the אולם, or porch of the temple; but if the latter, the royal porch or gallery (στοὰ βασιλική) is the part he would prefer. He adds that above all other parts of the temple, the porch thereof, and indeed the whole pronaos, might not unfitly be called τὸ πτερύγιον τοῦ ἱεροῦ, *the wing* (for that is the literal meaning) *of the temple*, 'because like wings it extended itself in breadth on each side, far beyond the breadth of the temple. If therefore the devil had placed Christ on the very precipice of this part of the temple, he may well be said to have placed him "upon the wing of the temple;" both because this part was like a wing to the temple itself, and because that precipice was the wing of this part' (*Hor. Hebr.* ad Matt. iv. 5). With regard to the other alternative, it is only necessary to cite the description of Josephus to show that the situation was at least not inappropriate to Satan's object: 'On the south part (of the court of the Gentiles) was the στοὰ βασιλική, "the royal gallery," that may be mentioned among the most magnificent things under the sun; for above the profoundest depth of the valley, Herod constructed a gallery of a

vast height, from the top of which if any one looked down, σκοτοδινιᾷν οὐκ ἐξικουμένης τῆς ὄψεως εἰς ἀμέτρητον τὸν βυθόν, "he would become dizzy, his eyes being unable to reach so vast a depth." '

PINON. [Punon.]

PIPE. [Musical Instruments.]

PIRATHON (פִּרְעָתוֹן; Sept., Josephus, and 1 Macc. ix. 50, Φαραθών), a town in the land of Ephraim, to which Abdon, judge of Israel, belonged, and in which he was buried (Judg. xii. 13. 15). Josephus names it twice (*Antiq.* v. 7, 13; xiii. 1. 3); and in the last instance coincides with 1 Macc. ix. 50, in ranking it among the towns whose ruined fortifications were restored by Bacchides, in his campaign against the Jews.

PISGAH (פִּסְגָּה; Sept. Φασγά), a mountain ridge in the land of Moab, on the southern border of the kingdom of Sihon (Num. xxi. 20; xxiii. 14; Deut. iii. 27; Josh. xii. 3). In it was Mount Nebo, from which Moses viewed the Promised Land before he died (Deut. xxxiv. 1) [Nebo].

PISHTAH. Reference was made to this article from Flax; but, as it is desirable to consider it in connection with Shesh, both substances will be treated of under that head.

PISIDIA (Πισιδία), a district of Asia Minor, lying mostly on Mount Taurus, between Pamphylia, Phrygia, and Lycaonia. Its chief city was Antioch, usually called Antioch in Pisidia, to distinguish it from the metropolitan city of the same name [Antioch, 2].

PITCH. [Asphaltum.]

PITDAH (פִּטְדָה; Sept. τοπάζιον), a precious stone; one of those which were in the breastplate of the high-priest (Exod. xxviii. 17), and the origin of which is referred to Cush (Job xxviii. 19). It is, according to most ancient versions, the topaz (τοπάζιον; Joseph. τόπαζος), which most of the ancient Greek writers describe as being of a golden yellow colour (Strabo, xvi. p. 770); Diod. Sic. iii. 39), while Pliny (*Hist. Nat.* xxxvii. 32) states its colour to be green. Relying on this last authority, several modern authors have asserted that the ancient gem thus named was no other than the modern crysolite. But this notion has been confuted by Bellarmann (*Urim and Thummim*, p. 39), who shows that the hues ascribed by the ancients to the topaz, are found in the gem to which the moderns have applied that name. This is a precious stone, having a strong glass lustre. Its prevailing colonr is wine-yellow of every degree of shade. The dark shade of this colour passes over into carnation red, and sometimes, although rarely, into lilac; the pale shade of the wine-yellow passes into greyish; and from yellowish-white into greenish-white and pale green, tincal and celadon-green. It may thus be difficult to determine whether the pitdah in the high-priest's breastplate was the yellow topaz; but that it was a topaz there is little reason to doubt.

It is clear that the stone was highly prized by the Hebrews. Job declares that wisdom was more precious than the pitdah of Cush (Job xxviii. 19); and as the name Cush includes Southern Arabia, and the Arabian Gulf, the intimation coincides with the statement of Pliny and others. that the topazes known to them came from the Topaz Island in the Red Sea (Pliny, *Hist. Nat.* xxxvii. 8; comp. vi. 29; Diod. Sic. iii. 30; Strabo, xvi. p. 770), whence it was probably brought by the Phœnicians. In Ezek. xxviii. 13, the *pitdah* is named among the precious stones with which the king of Tyre was decked.

It may be added that Bohlen seeks the origin of the Hebrew word in the Sanscrit language, in which *pita* means 'yellowish,' 'pale;' and, as Gesenius remarks, the Greek τοπάζιον itself might seem to come from the Hebrew פטרה, by transposition into טפרה (see *Thesaurus*, p. 1101; Braunius, *De Vestitu*, p. 508; Hofmann, *Mineral.*, i. 337; Pareau, *Comment. on Job*, p. 333; Ritter, *Erdkunde*, ii. 675).

PITHOM (פִּתֹם; Sept. Πειθώμ), one of the 'treasure-cities' which the Israelites built in the land of Goshen 'for Pharaoh' (Exod. i. 11) [Egypt; Goshen]. The site is by general consent identified with that of the Patumos (Πάτουμος) of Herodotus (ii. 158). Speaking of the canal which connected the Nile with the Red Sea, this author says, 'The water was admitted into it from the Nile. It began a little above the city Bubastis [Pi-beseth], near the Arabian city Patumos, but it discharged itself into the Red Sea.' According to this, Patumos was situated on the east side of the Pelusiac arm of the Nile, not far from the canal which unites the Nile with the Red Sea, in the Arabian part of Egypt. The *Itinerarium* of Antoninus furnishes a further limitation. It cannot be doubted that the Thum (Θοῦμ) which is there mentioned is identical with Patumos and Pithom. The *Pi* is merely the Egyptian article. Now this Thum was twelve Roman miles distant from Heroopolis, the ruins of which are found in the region of the present Abu-Keisheid. All these designations are appropriate if, with the scholars who accompanied the French expedition, we place Pithom on the site of the present Abhaseh, at the entrance of the Wady Fumilat, where there was at all times a strong military post. (Hengstenberg, *Die Bücher Moses und Aegypten;* Du Bois Ayme, in *Descript. de l'Egypte*, xi. 377; xviii. 1, 372; Champollion, *L'Egypte sous les Pharaons*, i. 172; ii. 58).

PLANE-TREE. [Armon.]

PLAGUE. [Pestilence.]

PLEDGE. [Loan.]

PLOUGH. [Agriculture.]

POETRY, HEBREW; the poetry which is found in the Bible, and which, rich and multifarious as it is, appears to be only a remnant of a still wider and fuller sphere of Shemitic literature. The New Testament is intended to be comprised in our definition, for, besides scattered portions, disjecti membra poetæ, which, under a prosaic form, convey a poetic thought, the entire book of the Apocalypse abounds in poetry.

The term 'Biblical poetry' may find little acceptance in the ears of those who have identified poetry with fiction, fable, and profane delights, under the impression that as such things are of the earth earthy, so religion is too high in its character, and too truthful in its spirit, to admit into its province mere creations of the human

fancy. But whatever opinion may be entertained of the character and tendency of poetry in general, the poetry of the Hebrews is, as we shall presently remark more at length, both deeply truthful, and earnestly religious; nor are we without a hope, that by the time the reader has arrived at the end of this article, he will then, if he is not before, be of the opinion that the poetry which we are about to consider was, and is, an eminently worthy channel for expressing and conveying the loftiest and holiest feelings of the human heart. Meanwhile we direct attention to a fact—there is poetry in the Bible. In one sense the Bible is full of poetry; for very much of its contents which is merely prosaic in form, rises, by force of the noble sentiments which it enunciates, and the striking or splendid imagery with which these sentiments are adorned, into the sphere of real poetry. Independently of this poetic prose, there is in the Bible much writing which has all the ordinary characteristics of poetry. This statement the present article will abundantly establish. But even the unlearned reader, when once his mind has been turned to the subject, can hardly fail to recognise at once the essence, if not somewhat of the form, of poetry in various parts of the Bible. And it is no slight attestation to the essentially poetic character of Hebrew poetry that its poetical qualities shine through the distorting coverings of a prose translation. If, however, the reader would at once satisfy himself that there is poetry in the Bible, let him turn to the book of Job, and after having examined its prose introduction, begin to read the poetry itself, as it commences at the third verse of the third chapter.

Much of the Biblical poetry is, indeed, hidden from the ordinary reader by its prose accompaniments, standing, as it does, undistinguished in the midst of historical narrations. This is the case with some of the earliest specimens of Hebrew poetry. Snatches of poetry are discovered in the oldest prose compositions. Even in Gen. iv. 23, sq., are found a few lines of poetry, which Herder incorrectly terms 'the song of the sword,' thinking it commemorative of the first formation of that weapon. To us it appears to be a fragment of a longer poem, uttered in lamentation for a homicide committed by Lamech, probably in self-defence. It has been already cited in this work [Lamech]. Herder finds in this piece all the characteristics of Hebrew poetry. It is, he thinks, lyrical, has a proportion between its several lines, and even assonance; in the original the first four lines terminate with the same letter, making a single or semi-rhyme.

Another poetic scrap is found in Exod. xxxii. 18. Being told by Joshua, on occasion of descending from the mount, when the people had made the golden calf, and were tumultuously offering it their worship—

'The sound of war is in the camp;'

Moses said

'Not the sound of a shout for victory,
Nor the sound of a shout for falling;
The sound of a shout for rejoicing'

do I hear.

The correspondence in form in the original is here very exact and striking, so that it is difficult to deny that the piece is poetic. If so, are we to conclude that the temperament of the Israelites was so deeply poetic that Moses and Joshua should find the excitement of this occasion sufficient to strike improvisatore verses from their lips? Or have we here a quotation from some still older song, which occurred to the minds of the speakers by the force of resemblance? Other instances of scattered poetic pieces may be found in Num. xxi. 14, 15; also v. 18; and v. 27; in which passages evidence may be found that we are not in possession of the entire mass of Hebrew, or, at least, Shemitic literature. Further specimens of very early poetry are found in Num. xxiii. 7, sq.; xviii. sq.; xxiv. 3, 15.

The preceding will suffice to satisfy the reader that there is poetry in the Bible. With this as a fact it is the business of the theologian to deal, whether the fact be or be not in accordance with any preconceived ideas of fitness and propriety. We must take the Bible as we find it; and so taking it, endeavour to understand its claims, and form a just appreciation of its merits.

The ordinary train of thought and feeling presented in Hebrew poetry is entirely of a moral or religious kind; but there are occasions when other topics are introduced. The entire Song of Solomon the present writer is disposed to regard, on high authority, as purely an erotic idyll, and considered as such it possesses excellences of a very high description. In Amos vi. 3, sq. may be seen a fine passage of satire in a denunciation of the luxurious and oppressive aristocracy of Israel. Subjects of a similar secular kind may be found treated, yet never without a moral or religious aim, in Isa. ix. 3; Jer. xxv. 10; xlviii. 33; Rev. xviii. 22, sq. But, independently of the Song of Solomon, the most worldly ode is perhaps the forty-fifth Psalm, which Herder and Ewald consider an epithalamium. The latter critic, in the account which he gives of it, states that it was sung during the time when the new queen was led in pomp to take her seat in her husband's palace.

The literature of the Bible, as such, is by no means adequately appreciated in the minds of many. Owing, in part, to the higher claims of inspiration, its literary merits have not received generally the attention which they deserve, while the critical world, whose office it is to take cognizance of literary productions, have nearly confined their attention to works of profane authors, and left the Biblical writings to the exclusive possession of the religious public. This severance of interests is to be regretted as much for the sake of literature as of religion. The Bible is a book—a literary production—as well as a religious repository and charter; and ought, in consequence, to be regarded in its literary as well as in its religious bearings, alike by those who cultivate literature and by those who study religion. And when men regard and contemplate it as it is, rather than as fancy or ignorance makes it, then will it be found to present the loftiest and most precious truths enshrined in the noblest language. Its poetry is one continued illustration of this fact. Indeed, but for the vicious education which the first and most influential minds in this country receive, Biblical literature would long ere now have held the rank to which it is entitled. What is the course of reading through which our divines, our lawyers, our statesmen, our

philosophers, are conducted? From early youth up to manhood it is almost entirely of a heathen complexion. Greek and Latin, not Hebrew, engage the attention; Homer and Horace, not Moses and Isaiah, are our class-books, skill in understanding which is made the passport to wealth and distinction. Hence Hebrew literature is little known, and falls into a secondary position. Nor can a due appreciation of this priceless book become prevalent until, with a revival and general spread of Hebrew studies, the Bible shall become to us, what it was originally among the Israelites, a literary treasure, as well as a religious guide. Nor, in our belief, can a higher service be rendered either to literature or religion than to make the literary claims of the Bible understood at the same time that its religious worth is duly and impressively set forth. The union of literature and religion is found in the Bible, and has, therefore, a divine origin and sanction. Those who love the Bible as a source of religious truth, should manifest their regard both towards the book and towards Him whose name and impress it bears, by carefully preserving that union, and causing its nature, requirements, and applications to be generally understood. No better instrument can be chosen for this purpose than its rich, varied, and lofty poetry.

There is no poetic cyclus that can be put into comparison with that of the Hebrews but the cyclus of the two classic nations, Greece and Rome, and that of India. In form and variety we grant that the poetry of these nations surpasses that of the Hebrews. Epic poetry and the drama, the two highest styles so far as mere art is concerned, were cultivated successfully by them, whilst among the Israelites we find only their germs and first rudiments. So in execution we may also admit that, in the higher qualities of style, the Hebrew literature is somewhat inferior. But the thought is more than the expression; the kernel than the shell; and in substance, the Hebrew poetry far surpasses every other. In truth, it dwells in a region to which other ancient literatures did not, and could not, attain, a pure, serene, moral, and religious atmosphere—thus dealing with man in his highest relations, first anticipating, and then leading onwards, mere civilization. This, as we shall presently see more fully, is the great characteristic of Hebrew poetry; it is also the highest merit of any literature, a merit in which that of the Hebrews is unapproached. To this high quality it is owing that the poetry of the Bible has exerted on the loftiest interests and productions of the human mind, for now above two thousand years, the most decided and the most beneficial influence. Moral and religious truth is deathless and undecaying; and so the griefs and the joys of David, or the far-seeing warnings and brilliant pourtrayings of Isaiah, repeat themselves in the heart of each successive generation, and become coexistent with the race of man. Thus of all moral treasuries the Bible is incomparably the richest. Even for forms of poetry, in which it is defective, or altogether fails, it presents the richest materials. Moses has not, as some have dreamed, left us an epic poem, but he has supplied the materials out of which the *Paradise Lost* was created. The sternly sublime drama of *Samson Agonistes* is constructed from a few materials found in a chapter or two which relate to the least cultivated period of the Hebrew republic. Indeed, most of the great poets, even of modern days, from Tasso down to Byron, all the great musicians, and nearly all the great painters, have drawn their best and highest inspiration from the Bible. This is a fact as creditable to religion as it is important to literature, of which he who is fully aware, will not easily be turned aside from faith to infidelity by the shallow sarcasms of a Voltaire, or the low ribaldry of a Paine. That book which has led civilization, and formed the noblest minds of our race, is not destined to be disowned for a few real or apparent chronological inaccuracies; or because it presents states of society and modes of thought, the very existence of which, however half-witted unbelief may object, is the best pledge of its reality and truth. The complete establishment of the moral and spiritual pre-eminence of the Bible, considered merely as a book, would require a volume, so abundant are the materials.

It may have struck the reader as somewhat curious that the poetical pieces of which we spoke above should, in the common version of the Bible, be scarcely, if at all, distinguishable from prose. We do not know whether there is anything extraordinary in this. Much of classical poetry, if turned into English prose, would lose most of its poetic characteristics; but, in general, the Hebrew poetry suffers less than perhaps any other by transfusion into a prosaic element: to which fact it is owing that the Book of Psalms, in the English version, is, notwithstanding its form, eminently poetic. There are, however, cases in which only the experienced eye can trace the poetic in and under the prosaic attire in which it appears in the vulgar translation. Nor, until the subject of Hebrew poetry had been long and well studied, did the learned succeed in detecting many a poetic gem contained in the Bible. In truth, poetry and prose, from their very nature, stand near to each other, and, in the earlier stages of their existence, are discriminated only by faint and vanishing lines. If we regard the thought, prose sometimes even now rises to the loftiness of poetry. If we regard the clothing, the simpler form of poetry is scarcely more than prose; and rhetorical or measured prose passes into the domain of poetry. A sonnet of Wordsworth could be converted into prose with a very few changes; a fable of Krummacher requires only to be distributed into lines in order to make blank verse, which might be compared even with that of Milton. Now in translations, the form is for the most part lost; there remains only the substance, and poetic sentiment ranges from the humblest to the loftiest topics. So with the Hebrew poetry in its original and native state. Whether in its case poetry sprang from prose, or prose from poetry, they are both branches of one tree, and bear in their earlier stages a very close resemblance. The similarity is the greater in the literature of the Hebrews, because their poetic forms are less determinate than those of some other nations: they had, indeed, a rhythm; but so had their prose, and their poetic rhythm was more like that of our blank verse than of our rhymed metre. Of poetical feet they appear to have known nothing, and, in consequence, their verse must be less measured and less strict. Its melody was rather that of thought than of art and skill—spontaneous, like their religious feelings, and therefore deep and

impressive, but less subject to law, and escaping from the hard limits of exact definition. Rhyme, properly so called, is disowned as well as metre. Yet Hebrew verse, as it had a kind of measured tread, so had it a jingle in its feet, for several lines are sometimes found terminating with the same letter. In the main, however, its essential form was in the thought. Ideas are made to recur under such relations that the substance itself marks the form, and the two are so blended into one that their union is essential to constitute poetry. It is, indeed, incorrect to say that 'the Hebrew poetry is characterized by the recurrence of similar ideas' (Latham's *English Language*, p. 372), if by this it is intended to intimate that such a peculiarity is the sole characteristic of Hebrew poetry. One, and that the chief, characteristic of that poetry, such recurrence is; but there are also characteristics in form as well as in thought. Of these it may be sufficient to mention the following:—(1) There is a verbal rhythm, in which a harmony is found beyond what prose ordinarily presents; but as the true pronunciation of the Hebrew has been long lost, this quality can be only imperfectly appreciated. (2) There is a correspondence of words, *i. e.* the words in one verse, or member, answer to the words in another; for as the sense in the one echoes the sense in the other, so also form corresponds with form, and word with word. This correspondence in form will fully appear when we give instances of the parallelism in sentiment; meanwhile, an idea of it may be formed from these specimens:

'Why art thou cast down, O my soul?
And why art thou disquieted in me?'
Ps. xliii. 5.

'The memory of the just is a blessing;
But the name of the wicked shall rot.'
Prov. x. 7.

'He turneth rivers into a desert,
And water-springs into dry ground.'
Ps. cvii. 33.

In the original this similarity in construction is more exact and more apparent. At the same time it is a free, and not a strict correspondence that prevails; a correspondence to be caught and recognised by the ear in the general progress of the poem, or the general structure of a couplet or a triplet, but which is not of a nature to be exactly measured or set forth by such aids as counting with the fingers will afford. (3) Inversion holds a distinguished place in the structure of Hebrew poetry, as in that of every other; yet here again the remark already made holds good; it is only a modified inversion that prevails, by no means (in general) equalling that of the Greeks and Romans in boldness, decision, and prevalence. Every one will, however, recognise this inversion in the following instances, as distinguishing the passages from ordinary prose:

'Amid thought in visions of the night,
When deep sleep falleth upon men,
Fear and horror came upon me.' Job iv. 13.

'To me men gave ear and waited,
To my words they made no reply.'
Job xxix. 21.

'For three transgressions of Damascus,
And for four will I not turn away its punishment.' Amos i. 3.

'His grave was appointed with the wicked,
And with the rich man was his sepulchre.'
Isa. liii. 9.

(4) The last verbal peculiarity of Hebrew poetry which we notice is, that its language betrays an archaical character, a licence, and, in general, a poetic hue and colouring which cannot be confounded with the simple, lowly, and unrhythmical diction of prose. The formation of a poetic diction is, in any nation, dependent on the possession, by that nation, of a poetical temperament, as much as of a poetical history. Wherever these two elements are found, the birth of poetry and the formation of a poetical language are certain. Great events give rise to strong passions, and strong passions are the parents of noble truths; which, when they spring from and nestle in a poetic temperament, cannot fail to create for themselves an appropriate phraseology, in which the tame and quiet march of prose is avoided, and all the loftier figures of speech are put into requisition. For a time, indeed, the line of demarkation between the diction of prose and that of poetry will not be very strongly marked; for poetry will predominate, as in men's deeds so in their words, and, if they as yet have any, in their literature. Soon, however, the passions grow cool, enthusiasm wanes, a great gulf opens between the actual and the ideal—the ideal having ceased to be actual in ceasing to be possible,—and a separate style of language for prose and poetry becomes as inevitable as the diversity of attire in which holy and ordinary days have their respective duties discharged.

In no nation was the union of the two requisites of which we have spoken found in fuller measure than among the Hebrews. Theirs was eminently a poetic temperament; their earliest history was an heroic without ceasing to be an historic age, whilst the loftiest of all truths circulated in their souls, and glowed on and started from their lips. Hence their language, in its earliest stages, is surpassingly poetic. Let the reader peruse, even in our translation, the first chapters of Genesis, or parts of the Book of Job, and he cannot but perceive the poetic element in which these noble compositions have almost their essence. And hence the difficulty of determining, with accuracy, the time when a poetic diction, strictly so termed, began to make its appearance. Partially, such a diction must be recognised in the earliest specimens we have of Hebrew poetry, nor is it hard to trace, if not in words, yet in colouring and manner, signs of this imaginative dress; but the process was not completed, the diction was not thoroughly formed, until the Hebrew bard had produced his highest strains, and tried his powers on various species of composition. The period when this excellence was reached was the age of Solomon, when the rest, peace, opulence, and culture which were the fruits of the lofty mind and proud achievements of David, had had time to bring their best fruits to maturity—a ripeness to which the Israelite history had in various ways contributed during many successive generations.

The chief characteristics, however, of Hebrew poetry are found in the peculiar form in which it gives utterance to its ideas. This form has received the name of 'parallelism.' Ewald justly prefers the term 'thought-rhythm,' since the rhythm, the music, the peculiar flow and harmony of the

verse and of the poem, lie in the distribution of the sentiment in such a manner that the full import does not come out in less than a distich. It is to this peculiarity, which is obviously in the substance and not the mere form of the poetry, that the translation of the Psalms in our Bibles owes much of its remarkable character, and is distinguished from prose by terms clearly and decidedly poetic; and many though the imperfections are which attach, some almost necessarily, to that version, still it retains so much of the form and substance, of the simple beauty, and fine harmony of the original Hebrew, that we give it a preference over most poetic translations, and always feel disposed to warn away from this holy ground the rash hands that often attempt, with no fit preparation, to touch the sacred harp of Zion.

Those who wish to enter thoroughly into the subject of Hebrew rhythm, are referred to the most recent and best work on the subject, by the learned Hebrew scholar, Ewald, who has translated into German all the poetical books of the Old Testament (*Die Poet. Bücher des Alten Bundes*, 1835-9, 4 vols. 8vo., vol. i. pp. 57—92). A shorter and more simple account will better suit these pages; which we take in substance from Gesenius (*Hebräisches Lesebuch*, 17th edit. by De Wette, Leipzig, 1844). The leading principle is, that a simple verse or distich consists, both in regard to form and substance, of two corresponding members: this has been termed Hebrew rhythm or Parallelismus membrorum. Three kinds may be specified. There is first the *synonymous parallelism;* which consists in this, that the two members express the same thought in different words, so that sometimes word answers to word: for example—

'What is man that thou art mindful of him,
And the son of man that thou carest for him!'
Ps. viii. 4.

There is in some cases an inversion in the second line—

'The heavens relate the glory of God,
And the work of his hands the firmament declares.' Ps. xix. 2.

'He maketh his messengers the winds,
His ministers the flaming lightning.' Ps. civ. 4.

Very often the second member repeats only a part of the first—

'Woe to them that join house to house,
That field to field unite.' Is. v. 8.

Sometimes the verb which stands in the first member is omitted in the second—

'O God, thy justice give the king,
And thy righteousness to the king's son.'
Ps. lxxii. 1.

Or the verb may be in the second member—

'With the jawbone of an ass heaps upon heaps,
With the jawbone of an ass have I slain a thousand men.' Judg. xv. 16.

The second member may contain an expansion of the first—

'Give to Jehovah, ye sons of God,
Give to Jehovah glory and praise.' Ps. xxix. 1.

Indeed the varieties are numerous, since the synonymous parallelism is very frequent.

The second kind is the *antithetic*, in which the first member is illustrated by some opposition of thought contained in the second. This less customary kind of parallelism is found mostly in the Proverbs—

'The full man treadeth the honeycomb under foot,
To the hungry every bitter thing is sweet.'
Prov. xxvii. 7.

Under this head comes the following, with other similar examples—

'Day to day uttereth instruction,
And night to night sheweth knowledge.'

The third kind is denominated the *synthetic:* probably the term *epithetic* would be more appropriate, since the second member not being a mere echo of the first, subjoins something new to it, while the same structure of the verse is preserved; thus—

'He appointed the moon for seasons;
The sun knoweth his going down.' Ps. civ. 19.

'The law of Jehovah is perfect, reviving the soul;
The precepts of Jehovah are sure, instructing the simple.' Ps. xix. 7.

This correspondence of thought is occasionally found in Greek and Latin poetry, particularly in the interlocutions of the eclogues of Theocritus and Virgil. The two following distichs are specimens of the antithetic parallelism:

'*Dam.* Triste lupus stabulis, maturis frugibus imber,
Arboribus venti; nobis Amaryllidis iræ.

Men. Dulce satis humor, depulsis arbutus hædis,
Lenta salix fœto pecori; mihi solus Amyntas.'

Pope's writings present specimens which may be compared with the antithetical parallelism. In his *Rape of the Lock*, passages of the kind abound. We opened his *Essay on Criticism*, and the first lines our eye fell on were these—

'A little learning is a dang'rous thing:
Drink deep, or taste not the Pierian spring:
There shallow draughts intoxicate the brain,
And drinking largely sobers us again.'

So in his *Messiah*, where he was likely to copy the form in imitating the spirit of the original—

'The lambs with wolves shall graze the verdan t mead,
And boys in flow'ry bands the tiger lead;
The steer and lion at one crib shall meet,
And harmless serpents lick the pilgrim's feet.'

This correspondence in thought is not, however, of universal occurrence. We find a merely rhythmical parallelism in which the thought is not repeated, but goes forward, throughout the verse, which is divided midway into two halves or a distich—

'The word is not upon the tongue,
Jehovah thou knowest it altogether.'
Ps. cxxxviii. 4.

'Gird as a man thy loins,
I will ask thee; inform thou me.' Job xxxix. 3.

Here poetry distinguishes itself from prose chiefly by the division into two short equal parts. This

peculiarity of poetic diction is expressed by the word זמר, which properly denotes dividing the matter, and so speaking or singing in separated portions. Among the Arabians, who, however, have syllabic measure, each verse is divided into two hemistichs by a cæsura in the middle. What is termed 'service metre' in English versification, is not unlike this in the main: it is the 'common metre' of the Psalm-versions, and of ordinary hymn books, though in the latter it is arranged in four lines—

'But one request I make to him | that sits the skies above,
That I were fairly out of debt | as I were out of love.' *Suckling.*

The simple two-membered rhythm hitherto described prevails, especially in the book of Job, the Proverbs, and a portion of the Psalms; but in the last, and still more in the Prophets, there are numerous verses with three, four, or yet more members.

In verses consisting of three members (tristicha) sometimes all three are parallel—

'Happy the man who walketh not in the paths of the unrighteous,
Nor standeth in the way of sinners,
Nor sitteth in the seat of scoffers.' Ps. i. 1.

Sometimes two of the members stand opposed to the third—

'To all the world goes forth their sound,
To the end of the world their words;
For the sun he places a tabernacle in them.'
Ps. xix. 4.

Verses of four members contain either two simple parallels—

'With righteousness shall he judge the poor,
And decide with equity for the afflicted of the people;
He shall smite the earth with the rod of his mouth;
With the breath of his lips shall he slay the wicked.' Isa. xi. 4.

Or the first and third answer to each other; also the second and fourth—

'That smote the people in anger
With a continual stroke;
That lorded it over the nations in wrath
With unremitted oppression.' Isa. xiv. 6.

If the members are more numerous or disproportionate (Isa. xi. 11), or if the parallelism is imperfect or irregular, the diction of poetry is lost and prose ensues; as is the case in Isa. v. 1-6, and frequently in the later prophets, as Jeremiah and Ezekiel.

It is not to be supposed that each poem consists exclusively of one sort of verse; for though this feature does present itself, yet frequently several kinds are found together in one composition, so as to give great ease, freedom, and capability to the style. We select the following beautiful specimen, because a chorus is introduced—

DAVID'S LAMENT OVER SAUL AND JONATHAN.

The Gazelle, O Israel, has been cut down on thy heights!

Chorus. How are the mighty fallen!

Tell it not in Gath, publish it not in the streets of Ascalon,
Lest the daughters of the Philistines rejoice,
Lest the daughters of the uncircumcised exult.

Hills of Gilboa, no dew nor rain come upon you, devoted fields!
For there is stained the heroes' bow,
Saul's bow, never anointed with oil.

From the blood of the slain, from the fat of the mighty,
The bow of Jonathan turned not back,
And the sword of Saul came not idly home.

Saul and Jonathan! lovely and pleasant in life!
And in death ye were not divided;
Swifter than eagles, stronger than lions!

Ye daughters of Israel! Weep for Saul;
He clothed you delicately in purple,
He put ornaments of gold on your apparel.

Chorus. How are the mighty fallen in the midst of the battle!
O Jonathan, slain in thy high places!

I am distressed for thee, brother Jonathan,
Very pleasant wast thou to me,
Wonderful was thy love, more than the love of woman.

Chorus. How are the mighty fallen,
And the weapons of war perished!

We have chosen this ode not only for its singular beauty, but also because it presents another quality of Hebrew poetry—the strophe. In this poem there are three strophes marked by the recurrence three times of the dirge sung by the chorus. The chorus appears to have consisted of three parts, corresponding with the parties more immediately addressed in the three several portions of the poem. The first choral song is sung by the entire body of singers, representing Israel; the second is sung by a chorus of maidens; the third, by first a chorus of youths in a soft and mournful strain, and then by all the choir in full and swelling chorus. But in order to the reader's fully understanding with what noble effect these 'songs of Zion' came on the souls of their hearers, an accurate idea must be formed of the music of the Hebrews [MUSIC]. Referring to the articles which bear on the subject, we merely remark that both music and dancing were connected with sacred song in its earliest manifestations, though it was only at a comparatively late period, when David and Solomon had given their master-powers to the grand performances of the temple-service, that poetry came forth in all its excellence, and music lent its full aid to its solemn and sublime sentiments.

Lyrical poetry so abounds in the Bible, that we almost forget that it contains any other species. Doubtless lyrical poetry is the earliest, no less than the most varied and most abundant. Yet the lyrical poetry of the Israelites contains tokens of proceeding from an earlier kind. It is eminently sententious—brief, pithy, and striking in the forms of language, and invariably moral or religious in its tone. Whence we infer that it had its rise in a species of poetry analogous to that which we find in the book of Proverbs. Read the few lines addressed by Lamech to his wives: do they not bear a correspondence with the general tone of the Proverbs?

We do not by this intend to intimate that the book so called was the earliest poetic production of the Hebrew muse. In its actual form it is of a much later origin than many of the odes. Yet the elements out of which it was formed may have existed at a very early day. Indeed the Oriental genius turns naturally to proverbs and sententious speeches. In its earliest, its most purely native state, the poetry of the Easterns is a string of pearls. Every word has life; every proposition is condensed wisdom; every thought is striking and epigrammatic. The book of Proverbs argues the influence of philosophy. Early poetry is too spontaneous to speak in this long retinue of glittering thoughts. But Eastern imaginations may at first have poured forth their creations, not in a continued strain, but in showers of broken light, on which the lyrist would seize to be worked as sparkling gems into his odes. It is however certain that a general name for poetic language, משל, signifies also a saying, a proverb, a comparison, a similitude. The last is indeed the primary signification, showing that Hebrew poetry in its origin was a painting to the eye; in other words, a parable, a teaching by likenesses, discovered by the popular mind, expressed by the popular tongue, and adopted and polished by the national poet. And as a sententious form of speech may even by its very condensation become dark, so that the wisdom which it contains may have to be patiently and carefully sought for, what was משל may become hidden knowledge, and pass into חידה, a secret or a riddle; which, as being intended to baffle and so to deride, may in its turn be appropriately termed מליצה, derision, satire, or irony.

Lyrical poetry embraced a great variety of topics, from the shortest and most fleeting effusion, as found in specimens already given, and in Ps. xv., cxxxi., cxxxiii., to the loftiest subjects treated in a full and detailed manner; for instance, Deborah's song (Judg. v.), and Ps. xviii. and lxviii. It ran equally through all the moods of the human soul, nothing being too lowly, too deep, or too high for the Hebrew lyre. It told how the horse and his Egyptian rider were sunk in the depths of the sea; it softly and sweetly sang of the benign effects of brotherly love. It uttered its wail over the corpse of a friend, and threw its graceful imagery around the royal nuptial couch. Song was its essence. Whatever its subject, it forewent neither the lyre nor the voice. Indeed its most general name, שיר, signifies 'song;' song and poetry were the same. Another name for lyrical poetry is מזמור, which the Seventy render ψαλμός, 'psalm,' and which from its etymology seems to have a reference not so much to song as to the numbers into which the poet by his art wrought his thoughts and emotions. The latter word describes the making of an ode, the former its performance on the lyre. Another general name for lyrical poetry is משכיל, which is applied to poems of a certain kind (Ps. xxxii., xlii., xlv., lii., lv., lxxiv., lxxviii., lxxxviii., cxlii.), and appears to denote an ode lofty in its sentiments and exquisite in its execution. Under these general heads there were several species, whose specific differences it is not easy to determine.

1. תהלה, 'a hymn,' or 'psalm of praise.' The word is used as a title only to one psalm (cxlv.), but really describes the character of many, as may naturally be expected when we consider the origin of the ode as springing from victory, deliverance, the reception of bounties, and generally those events and occasions which excited joy and gladness in the soul, and were celebrated with music, often accompanied by dancing in the public assemblies of the people, or after a more sacred manner, in the solemn courts of the temple. To this class of joyous compositions belong the lofty hymns which commemorated great national events, such as the deliverance from Pharaoh (Exod. xv., Judg. v., Ps. xviii., lxviii.), which were appointed for set holyday seasons, and became a part at once of the national worship and of the best national property. Other songs of this kind were used on less distinguished occasions, and by individuals on presenting their thank-offerings, and were pitched at a lower key, being expressive rather of personal than general emotions (Ps. xxx., xxxii., xli., cxxxviii.; Isa. xxxviii.). There are occasionally briefer songs of victory, sung by the general congregation in the temple, as Ps. xlvi. and xlviii.

2. קינה, θρῆνος, 'a dirge,' or 'song of sorrow,' companied by exclamations of grief, as אוי, אוי, or very often by איכה, *O how!* and distinguished from songs of joy by mournful strains of music. The Hebrew heart was as much open to sorrow as to joy, tender and full as were its emotions, and simple as was the ordinary mode of life. Adversity and bereavement were therefore keenly felt, and as warmly and strikingly expressed. Indeed so great was the regard held due to the dead, that mourners did not consider their own sorrow sufficient, but used to engage others to mourn for their lost friends, so that in process of time there arose a profession whose business it was to bewail the departed. In Amos v. 16, these persons are named as ינרעי נהי, those who are skilful in wailing (Jer. ix. 17). Distinguished heroes, and persons who were tenderly beloved, found in the sorrowful accents of the Hebrew muse, the finest and most lasting memorial (2 Sam. i. 17-28; iii. 33, 34). From 1 Sam. i. 18, it appears that these dirges (*neniæ*) were taught to the children of Israel *ad perpetuam rei memoriam;* and so heroic deeds lived through successive generations on the lips of the people, whose hearts were thus warmed with emulation, while they were softened with gentleness and love. In this class of lamentations may be ranked the songs of sorrow over the misfortunes of Israel, such as Ps. xliv., lx., lxxiii., which seem to have borne the general name of 'a weeping and wailing' (Jer. vii. 29; ix. 9). In the same class stand lamentations poured forth on the desecration or destruction of the holy city (Jer. ix. xix.; Ezek. xxvii. xxxii.; Isa. i. xxi.). Jeremiah has put together and united in one book, executed with great skill and presenting an altogether unique specimen of writing, which indeed could have had its birth nowhere but in a Hebrew soul, all possible lamentations and wailings on the ruin and fall of Jerusalem.

3. שגיון is found only as the title of a poem (Ps. vii.), and once in the plural (Hab. iii. 1), as a description of this species of poetry in general. The word is not easy to understand. The Sep-

magint render it by ψαλμός, a general term which seems to betray their own ignorance. It had doubtless a specific meaning. The root שׁנה denotes bewilderment, so that the term may indicate a sort of dithyrambic poetry—poetry in which the emotions are put forth in wild confusion betokening an agitated, confused, and worried state of mind. This description corresponds with the character of the two compositions to which the epithet is applied in Ps. vii. and Hab. iii. That the melody employed in singing these pieces answered, in wild hurrying confusion, to the train of the thought may be conjectured naturally, and inferred with good reason, from the heading of Habakkuk iii.

4. תפלה, 'prayer,' is the name of certain odes in the titles given to Ps. xvii., lxxxvi., xc., cii., cxlii.; Hab. iii. In Psalm cii. and in Hab. iii. it seems not to denote the ode so much as the general tendency of the sentiment of the poet, and in the other headings it may import merely the use to which these compositions may be applied. It is not therefore so much a term of art as a term of religion. Yet may it be applied to compositions in general, designed for use in divine worship whatever their form or strain, inasmuch as it regards in a general way the religious element which constituted their essence; and accordingly it is found in Ps. lxxii. 20 applied as a general name to an entire collection of the poems of David—'the prayers of David, the son of Jesse, are ended.'

In these four classes we have not pretended to exhaust all the species and forms which lyric poetry took, but merely to present the chief facts. Respecting other kinds, little need be said, as the lyrical comprehends the greatest and best part of Hebrew poetry, nor are learned men so much of one mind regarding the compositions to which we allude.

Dramatic poetry in the sense in which the phrase is applicable to productions such as those of Euripides, Shakspeare, or Schiller, had no place in the literature of the Hebrews. This defect may be owing to a want of the requisite literary cultivation. Yet we are not willing to assign this as the cause, when we call to mind the high intellectual culture which the Hebrews evinced in lyric and didactic poetry, out of which the drama seems naturally to spring. We rather look for the cause of this in the earnest nature of the Hebrews, and in the solemnity of the subjects with which they had to do in their literary productions. Nor is it any objection to this hypothesis that the drama of modern times had its birth in the religious mysteries of the middle ages, since those ages were only secondary in regard to religious truth, stood at a distance from the great realities which they believed and dramatized; whereas the objects of faith with the Israelites were held in all the fresh vividness of primitive facts and newly-recognised truths. Elements however for dramatic poetry and first rudimental efforts are found in Hebrew; as in the Song of Solomon, in which several dramatis personæ will be discovered speaking and acting, by the diligent and unprejudiced reader. Ewald asserts that the poem is divisible into four acts. In the book of Job, however, the dramatic element of the Hebrew muse is developed in a more marked form, and a more decided degree. Here the machinery and contrivances of the drama, even to the plot and the *Deus Vindex*, lie patent to a reader of ordinary attention. For epic poetry the constituent elements do not appear to have existed during the classic period of the Hebrew muse, since epic poetry requires an heroic age, an age, that is, of fabulous wonders and falsely so called divine interpositions. But among the Israelites the patriarchal, which might have been the heroic age, was an age of truth and reality; and it much raises the religious and historical value of the biblical literature, that neither the singular events of the age of the patriarchs, nor the wonderful events of the age of Moses, nor the confused and somewhat legendary events of the age of the Judges, ever degenerated into mythology, nor passed from the reality which was their essence, into the noble fictions into which the imagination, if unchastened and unchecked by religion, might have wrought them; but they retained through all periods their own essential character of earnest, lofty, and impressive realities. At a later period, when the religion of Moses had, during the Babylonish captivity, been lowered by the corruptions of the religion of Zoroaster, and an entirely new world of thought introduced, based not on reality but fancy, emanating not from the pure light of heaven but from the mingled lights and shadows of primitive tradition and human speculation,—then there came into existence among the Jews the elements necessary for epic poetry; but the days were gone in which the mind of the nation had the requisite strength and culture to fashion them into a great, uniform, and noble structure; and if we can allow that the Hebrews possessed the rudimental outlines of the epic, we must seek for them not in the canonical but the apocryphal books; and while we deny with emphasis that the term Epos can be applied, as some German critics have applied it, to the Pentateuch; we can find only in the book of Judith, and with rather more reason in that of Tobit, anything which approaches to epic poetry. Indeed fiction, which if it is not the essence, enters for a very large share into both epic and dramatic poetry, was wholly alien from the genius of the Hebrew muse, whose high and noble function was not to invent but to celebrate the goodness of God, not to indulge the fancy but to express the deepest feelings of the soul, not to play with words and feign emotions, but to utter profound truth and commemorate real events, and pour forth living sentiments.

These remarks imply that art, though subordinate, was not neglected, as indeed is proved by the noble lyrics which have come down to us, and in which the art is only relatively small and low, that is, the art is inconsiderable and secondary, merely because the topics are so august, the sentiments so grand, the religious impression so profound and sacred. At later periods, when the first fresh gushing of the muse had ceased, art in Hebrew, as is the case in all other poetry, began to claim a larger share of attention, and stands in the poems for a greater portion of their merit. Then the play of the imagination grew predominant over the spontaneous outpourings of the soul, and among other creations of the fancy alphabetical poems were produced, in which the matter is artistically distributed sometimes under two-and-

twenty heads or divisions, corresponding with the number of the Hebrew letters. This is of course a peculiarity which cannot be preserved in any ordinary prose translation; but it is indicated in Psalm cxix., as found in the common bibles; and other specimens may be seen in Ps. ix., x., xxv., xxxiv., xxxvii., cxi., cxii.

If, now, from these details we consider for a moment what are the essential peculiarities of Hebrew poetry, we find we have to offer to the reader's attention the following observations.

The source of all true poetry is in the human mind. Even where there is a divine inspiration, this higher element must enter into the soul of man, and, blending with its workings, conform also to its laws. But every thought is not poetical. Thought and emotion become poetical only when they rise to the ideal. Poetry, in its source, is thought which ascends to a high if not perfect (relatively) conception of moral and spiritual realities. Mere intensity is not poetry, any more than strength of muscle is beauty. Still less is passion either poetry or eloquence, as Blair teaches. Passion is of a suspicious origin, and represents the soul as being mastered; whereas in all true poetry the soul is a sovereign. There may be intensity in poetry, however, and the soul, when in a poetic state, may be impassioned; but these are only accidents—results, not causes, ensuing (sometimes) from the ideal conceptions which for the time being constitute the soul, and make up consciousness. Hence all true poetry is religious; for religion is the contemplation of the highest perfection as at once holy, lovely, honourable, formative and guiding, the object of adoration, the fountain of law, the source of obligation. But in the Hebrew poetry, the religion which constituted its essence had attributes of truth and reality such as no other poetry ever did or could possess. The intimate relation in which the nation of Israel, and the still more intimate relation in which distinguished individuals of that nation, stood to the Deity, made the religious the predominant element, and gave to that element a living and quickening fire as from heaven, which burnt from the first with the true vestal purity, and on to the last with more than vestal constancy and duration. A divine and imperishable power was thus the chief constituent of Hebrew poetry: divine truth, divine energy, divine life, are all found in the earliest productions of Hebrew song. Its chief characteristic—that by which, more than any other thing, it is contradistinguished from the poetry of all other nations—is its pure and rich religious element.

But this divine power lay not merely in the truths conveyed nor in the facts commemorated by the songs of Zion, but equally in the strong, deep, and overflowing emotions with which the Hebrew harp thrilled sometimes to ecstasy. The origin of this religious sensibility is to be chiefly looked for in the Hebrew temperament, which was and is peculiarly rich in all the sentiments of the heart, so that devotion was as natural—as much a necessity of the character of the Israelites—as domestic affection. It is in the main owing to the religious and devotional qualities of Hebrew poetry that the Book of Psalms, still, after the lapse of so many centuries, and the rise and fall of so many modes of thought, and forms of social life, holds an empire over the heart of man, far wider, deeper, and more influential than what any other influence has possessed, save only that which is and will ever be exercised by 'David's greater son.'

Nor is the wonder at all diminished when we learn that the Hebrew was an essentially national muse. There is no poetry which bears a deeper or broader stamp of the peculiar influences under which it was produced. It never ceases to be Hebrew in order to become universal, and yet it is universal while it is Hebrew. The country, the clime, the institutions, the very peculiar religious institutions, rites and observances, the very singular religious history of the Israelites, are all faithfully and vividly reflected in the Hebrew muse, so that no one song can ever be mistaken for a poem of any other people. Still it remains true that the heart of man, at least the heart of all the most civilized nations of the earth, has been moved and swayed, and is still pleasingly and most beneficially moved and swayed by the strains of Biblical poesy. Others may, but we cannot, account for this indubitable fact, without admitting that some specially divine influence was in operation amidst the Jews.

Its originality is also a marked characteristic of Hebrew poetry. Homer had his teachers, but who taught Moses? Yet 'the divine song of Troy' is less divine than the ode of triumph over Pharaoh. The Hebrew poetry is original in this sense, that it is self-educed and self-developed. It is an indigenous plant in Palestine. Like Melchizedek, it is, in regard to an earlier culture, ἀπάτωρ, ἀμήτωρ, ἀγενεαλόγητος; and if we cannot say that it has strictly μήτε ἀρχὴν ἡμερῶν, there is no danger in predicting of it, μήτε ζωῆς τέλος ἔχων, μένει ἱερεὺς εἰς τὸ διηνεκές (Heb. vii. 3).

Connected with its originality, as, in part, its cause, is the fact that the Hebrew Muse stood nearer than any other to the first days and the earliest aspects of creation, 'when the morning stars sang together, and all the sons of God shouted for joy' (Job xxxviii. 7). Those stars that Muse saw in the maiden purity of their earliest radiance; that song the same Muse heard when first it struck the canopy of heaven and was reverberated to earth. The rose of Sharon blushed with its first loveliness on her glad sight, and the dews of Hermon were first disturbed by her unsandalled feet. Thus there is a freshness as of morn about all her imagery. In her best days there were no stock figures of speech, no *loci communes*, nor universal recipes for forming poetry. Not even at second hand did she receive her stores, but she took what she had out of the great treasure-house of nature, and out of the fulness of her own heart. To be a master, therefore, to other poesies is the divine right and peculiar function of the Hebrew muse. Other bards may borrow and imitate; the poetry of the Bible copies nature and creates.

Hence there is a spontaneousness in its poetry. Open the Psalter at any place; you find streams pouring forth like the brooks and waterfalls that trickle and gush down the hills of Palestine after the latter rain. Nature you behold at work. All therefore is ease, and, as ease, so grace. There is no constraint, no effort, no affectation. The heart itself speaks, and it speaks because it is full and overflowing.

If we add that simplicity is another marked character of Hebrew poetry, we do little more than

state that which is already implied. But such is its simplicity that it seems never to have known, in its age of purity, anything of the artificial distinctions by which critics and rhetoricians have mapped out the domain of poesy and endeavoured to supply the deficiencies of fancy by the laborious efforts of varied culture. Hebrew poetry was the voice of man communing with God, and thought as little of the one as of the other of the two purposes which Horace ascribes to artistic poets—

'Aut prodesse volunt aut delectare poëtæ.'

It was, indeed, wholly unconscious of anything but the satisfaction of a high and urgent want, which made worship a necessity, and devotion a delight. A striking confirmation of these facts is found in the circumstance that among the earliest of the 'sweet singers of Israel,' women are found. The great event which Moses, in his sublime triumphal ode, had celebrated, was forthwith taken up by Miriam, whose poetic skill could not be singular, as she is described by a general name, and was supported by other females; 'And Miriam the prophetess, the sister of Aaron' (a remarkable family was that of Amram, 'Aaron, and Moses, and Miriam their sister,' Num. xxvi. 59), 'took a timbrel in her hand; and all the women went out after her with timbrels, and with dances, and Miriam answered them, Sing ye to the Lord,' &c. (Exod. xv. 20, sq.; see also Judg. v. 1; xi. 34; xxi. 21; 1 Sam. xviii. 7; Ps. lxviii. 25).

Were it a matter to be determined by authority, we could easily prove that the Hebrew poetry is written in hexameters and pentameters. Josephus more than once asserts that the triumphal ode of Moses was written in hexameter verse (*Antiq.* ii. 16. 4.; iv. 8. 44); and in *Antiq.* vii. 12. 3, he expressly says, 'And now David, being freed from wars and dangers, composed songs and hymns to God, of several sorts of metre; some of those which he made were trimeters and some were pentameters;' in which statement he is as much in error in regard to the verse as he is in regard to his implication that David wrote his Psalms at some one set period of his life. Not improbably Josephus was influenced in this representation regarding the alleged metres by his Græcising propensities, by which he was led to assimilate the Hebrew laws and institutions to Grecian models, with a false view of thus gaining honour to his country, and by reflection, to himself as well. Even in his day the true pronunciation of the Hebrew was lost, so that it was easy to make this or that assertion on the subject of its versification. Certainly all the attempts to which these misstatements of Josephus (see also Euseb. *Præp. Ev.* xi; Hieron. *Præf. ad Chron.*; Euseb. p. 1; Isidor. *Orig.* i. 38) chiefly led, have utterly failed; and whatever the fact may be, whether or not these poems were written in stricter measure than the doctrine of this article supposes, we are little likely to form an exact idea of the Hebrew measures unless we could raise David from the sleep of centuries; and at a time when, like the present, it is beginning to be felt that there has been far too much dogmatizing about even the classical versification, and that speculation and fancy have outstripped knowledge, we do not expect to find old attempts to discover the Hebrew hexameters and pentameters revived. Those who may wish to pursue the subject in its details are referred to the following works: Carpzov, *Introd. in V. T.* ii. England has the credit of opening a new path in this branch by the publication of Bishop Lowth's elegant and learned *Prælectiones de Sacra Poesi Hebræorum*, Oxon. 1753; which may be found also in Ugolini, *Thesaur.* xxxi.; the editions having Michaelis's *Notæ et Epimetra* are to be preferred; that of Oxon. 1810, is good: the work was translated into English by Gregory. On the didactic poetry of the Hebrews the reader may consult Umbreit, *Sprüche Sal. Einleitung;* Rhode, *De Vet. Poetar. Sapientia Gnom. Hebræor. imp. et Græcor.* Havn. 1800; Unger, *De Parabolar. Jesu natura*, &c. Leips. 1828. Le Clerc, in his *Biblioth. Univers.* ix. 226, sq., has given what is worth attention; see also *Hist. Abrégée de la poésie chez les Hébr.* in the History of the Academy of Inscriptions, tom. xxiii. 92, sq. But the work which has, next to that of Lowth, exerted the greatest influence, is a posthumous and unfinished piece of the celebrated Herder, who has treated the subject with extraordinary eloquence and learning: *Von Geist der Ebräischen Poesie*, 1782, to be found in his collected writings; also Tübing. 1805; and Carlsruhe, 1826; see also Gügler, *Die Heil Kunst der Hebräer*, Landshut, 1814; and B. F. Guttenstein, *Die Poet. Literar. alten Israelit.*, Mainh. 1835. The subject of metre has been skilfully handled by Bellermann, *Versuch über d. Metrik der Hebräer.* Berl. 1813. Much useful information may be found in De Wette's *Einleitung in d. A. Test.*, Berlin, 1840, translated into English by Theodore Parker, Boston (U. S.), 1843. In Wellbeloved's Bible translations of the poetical portions may be found, in which regard is paid to rhythm and poetical form; a very valuable guide in Hebrew poetry, both for form and substance, may be found in Noyes's *Translation of Job*, Cambridge (U. S.), 1827; of the *Psalms*, Boston (U. S), 1831; and of the *Prophets*, Boston (U. S.), 1833; but the best, fullest, and most satisfactory work on the subject is by Ewald, *Die Poet. Bücher des Alten Bundes*, 4 vols. 8vo. Göttingen, 1835-9.—J. R. B.

POL (פּוֹל) occurs twice in Scripture, and no doubt signifies 'beans,' as translated in the Auth. Version. The first occasion is in 2 Sam. xvii. 28, where beans are described as being brought to David, as well as wheat, barley, lentils, &c., as is the custom at the present day in many parts of the East when a traveller arrives at a village. So in Ezekiel iv. 9, the prophet is directed to take wheat, barley, *beans*, lentils, &c., and make bread thereof. This meaning of *pol* is confirmed by the Arabic فول *fool*, which is the same word (there being no *pe* in Arabic), and is applied to the *bean* in modern times, as ascertained by Forskal in Egypt, and as we find in old Arabic works. The common bean, or at least one of its varieties, has been employed as an article of diet from the most ancient times, since, besides the mention of it in Scripture, we find it noticed by Hippocrates and Theophrastus, under the names of κύαμος ἑλληνικός, to distinguish it from κύαμος αἰγύπτιος, the Egyptian bean, or bean of Pythagoras, which was no doubt the large farinaceous seed of Nelumbium speciosum. Beans were employed as articles of diet by the ancients, as they are by the moderns; and are considered to give

rise to flatulence, but otherwise to be wholesome and nutritious. 'Mélangée à la quantité d'une livre sur dix à douze de farine de froment, elle fournit un assez bon pain, et donne de la consistance à la pâte lorsqu'elle est trop molle.' So Pliny: 'Inter legumina maximus honos fabæ: quippe ex qua tentatus etiam sit panis. Frumento etiam miscetur apud plerasque gentes.' Beans are cultivated over a great part of the old world, from the north of Europe to the south of India; in the latter, however, forming the cold-weather cultivation, with wheat, peas, &c. They are extensively cultivated in Egypt and Arabia. Mr. Kitto states that the extent of their cultivation in Palestine he had no means of knowing. In Egypt they are sown in November, and reaped in the middle of February (three and a half months in the ground); but that in Syria they may be had throughout the spring. The stalks are cut down with the scythe; and these are afterwards cut and crushed, to fit them for the food of camels, oxen, and goats. The beans themselves, when sent to a market, are often deprived of their skins. Basnage reports it as the sentiment of some of the Rabbins, that beans were not lawful to the priests, on account of their being considered the appropriate food of mourning and affliction; but he does not refer to the authority; and neither in the sacred books nor in the Mishna can be found any traces of the notion to which he alludes. So far from attaching any sort of impurity to this legume, it is described as among the first-fruit offerings; and several other articles in the latter collection prove that the Hebrews had beans largely in use, after they had passed them through the mill (*Phys. Hist. of Palestine*, cccxix.).—J. F. R.

POLLUX. [Castor and Pollux.]

POLYGAMY. [Marriage.]

POLYGLOTT. [Versions.]

POMEGRANATE. [Rimmon.]

PONTIUS PILATE. [Pilate.]

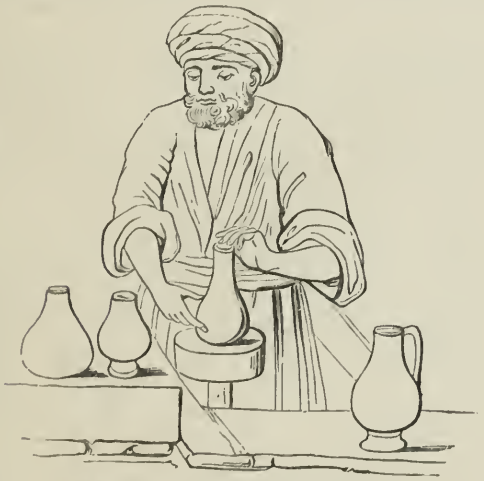
PONTUS (Πόντος), the north-eastern province of Asia Minor, which took its name from the sea [Pontus Euxinus] that formed its northern frontier. On the east it was bounded by Colchis, on the south by Cappadocia and part of Armenia, and on the west by Paphlagonia and Galatia. Ptolemy (*Geog.* v. 5) and Pliny (*Hist. Nat.* vi. 4) regard Pontus and Cappadocia as one province; but Strabo (*Geog.* xii. p. 541) rightly distinguishes them, seeing that each formed a distinct government with its own ruler or prince. The family of Mithridates reigned in Pontus, and that of Ariarathes in Cappadocia. The two countries were also separated naturally from each other by the Lithrus and Ophlimus mountains. The kingdom of Pontus became celebrated under Mithridates the Great, who waged a long war with the Romans, in which he was at length defeated, and his kingdom annexed to the Roman empire by Pompey (Appian, *Mithrid.* p. 121). That Jews had settled in Pontus, previous to the time of Christ, is evident from the fact, that strangers from Pontus were among those assembled at Jerusalem at the Feast of Pentecost (Acts ii. 9). Christianity also became early known in this country, as the strangers 'in Pontus' are among those to whom Peter addressed his first epistle (1 Pet. i. 1). Of this province Paul's friend, Aquila, was a native (Acts xviii. 2). The principal towns of Pontus were Amasia, the ancient metropolis, and the birth-place of the geographer Strabo, Themiscyra, Cerasus, and Trapezus; which last is still an important town under the name of Trebizond (Cellarius, *Notit.* ii. 287; Mannert. vi. 350; Rosenmüller, *Bibl. Geog.* iii. 5-9; *Encyclop. Method.* Sect. *Géog. Ancienne*, art. 'Pontos').

POPLAR. [Libneh.]

PORCIUS FESTUS. [Festus.]

POSSESSION. [Demoniacs.]

POTIPHAR (פּוֹטִי פֶרַע, contract. of פּוֹטִי פֶרַע, Potipherah, which see; Sept. Πετεφρής), an officer of Pharaoh, probably the chief of his body-guard (Gen. xxxix. 1). Of the Midianitish merchants he purchased Joseph, whose treatment by him is described under that head. The keeper of the prison into which the son of Jacob was eventually cast treated him with kindness, and confided to him the management of the prison; and this confidence was afterwards sanctioned by the 'captain of the guard' himself, as the officer responsible for the safe custody of prisoners of state. It is sometimes denied, but more usually maintained, that this 'captain of the guard' was the same with the Potiphar who is before designated by the same title. We believe that this 'captain of the guard' and Joseph's master were the same person. It would be in accordance with Oriental usage that offenders against the court, and the officers of the court, should be in custody of the captain of the guard; and that Potiphar should have treated Joseph well after having cast him into prison, is not irreconcilable with the facts of the case. After having imprisoned Joseph in the first transport of his choler, he might possibly discover circumstances which led him to doubt his guilt, if not to be convinced of his innocence. The mantle left in the hands of his mistress, and so triumphantly produced against him, would, when calmly considered, seem a stronger proof of guilt against her than against him: yet still, to avoid bringing dishonour upon his wife, and exposing her to new temptation, he may have deemed it more prudent to bestow upon his slave the command of the state prison, than to restore him to his former employment.



POTIPHERAH (פּוֹטִי פֶרַע), the priest of On, or Heliopolis, whose daughter Azenath became the wife of Joseph [Azenath]. The name is Egyptian, and is in the Septuagint accommodated to the analogy of the Egyptian language, being in the Cod. Vatican. Πετεφρῆ: Alex. Πετεφρῆ, al. Πεντεφρὴ, Πεντεφρί; which corresponds to the Egyptian ⲡⲉⲧⲉ-ϥⲣⲏ, qui Solis est, *i. e.* Soli proprius (Champollion, *Précis, Tabl. Général*, p. 23). The name is found written in various forms on the monuments, which are copied by Gesenius in his *Thesaurus*, p. 1094, from Rosellini, *Monum. Storici*, i. 117.

POTSHERD. Potsherd is figuratively used in Scripture to denote a thing worthless and insignificant (Ps. xxii. 15; Prov. xxvi. 23; Isa. xlv. 9). It may illustrate some of these allusions to remind the reader of the fact, that the sites of ancient towns are often covered at the surface with great quantities of broken pottery. The present writer has usually found this pottery to be of coarse texture, but coated and protected with a strong and bright-coloured glaze, mostly bluish-

green, and sometimes yellow. These fragments give to some of the most venerable sites in the world, the appearance of a deserted pottery rather than of a town. The fact is, however, that they occur only upon the sites of towns which were built with crude brick; and this suggests that the heaps of ruin into which these had fallen being disintegrated, and worn at the surface by the action of the weather, bring to view and leave exposed the broken pottery, which is not liable to be thus dissolved and washed away. This explanation was suggested by the actual survey of such ruins; and we know not that a better has yet been offered in any other quarter. It is certainly remarkable that of the more mighty cities of old time, nothing but potsherds now remains visible at the surface of the ground.

Towns built with stone, or kiln-burnt bricks, do not exhibit this form of ruin, which is, therefore, not usually met with in Palestine.

POTTER. The potter, and the produce of his labours, are often alluded to in the Scriptures. The fragility of his wares, and the ease with which they are destroyed, supply apt emblems of the facility with which human life and power may be broken and destroyed. It is in this figurative use that the potter's vessels are most frequently noticed in Scripture (Ps. ii. 9; Isa. xxx. 14; Jer. xix. 11; Rev. ii. 27). In one place, the

456. [Modern Egyptian Potter.]

power of the potter to form with his clay, by the impulse of his will and hand, vessels either for honourable or for mean uses, is employed with great force by the apostle to illustrate the absolute power of God in moulding the destinies of men according to his pleasure (Rom. ix. 21). The first distinct mention of earthenware vessels is in the case of the pitchers in which Gideon's men concealed their lamps, and which they broke in pieces when they withdrew their lamps from them (Judg. vii. 16, 19). Pitchers and bottles are indeed mentioned earlier; but the 'bottle' which contained Hagar's water (Gen. xxi. 14, 15) was undoubtedly of skin; and although Rebekah's pitcher was possibly of earthenware (Gen. xxiv. 14, 15), we cannot be certain that it was so.

The potter's wheel is mentioned only once in the Bible (Jer. xviii. 2); but it must have been in use among the Hebrews long before the time of that allusion; for we now know that it existed in Egypt before the Israelites took refuge in that country (Wilkinson, *Anc. Egypt.* iii. 165). The processes employed by the Hebrews were probably not in any way dissimilar to those of the Egyptians, from whom the use of the wheel may be supposed to have been adopted. There is the greater probability in this, as the materials, forms, and manufacture of earthenware vessels are still very similar throughout Western Asia—and are also the same which were anciently in use. This we know from the comparison of ancient paintings and sculptures with modern manufactures, as well as from the vast quantities of broken pottery which are found upon the sites of ancient cities. The ancient potters 'frequently kneaded the clay with their feet, and after it had been properly worked up, they formed it into a mass of convenient size with the hand, and placed it on the wheel, which, to judge from that represented in the paintings, was of very simple construction, and turned with the hand. The various forms of the vases were made out by the finger during the revolution; the handles, if they had any, were afterwards affixed to them; and the devices and other ornamental parts were traced with a wooden or metal instrument, previously to their being baked. They were then suffered to dry, and for this purpose were placed on planks of wood; they were afterwards arranged with great care on trays, and carried, by means of the usual yoke, borne on men's shoulders, to the oven' (Wilkinson, *Anc. Egyptians*, iii. 163-167).

POTTER'S-FIELD. [Aceldama.]

PRÆTORIUM (Πραιτώριον). This word denotes the general's tent in the field, and also the house or palace of the governor of a province, whether a prætor or not. In the Gospels it is applied to the palace built by Herod the Great, at Jerusalem, and which eventually became the residence of the Roman governors in that city (Matt. xxvii. 27; Mark xv. 16; John xviii. 28, 38; xix. 9). In the two first of these texts it may, however, denote the court in front of the palace, where the procurator's guards were stationed [Jerusalem]. Herod built another palace at Cæsarea, and this also is called the Prætorium in Acts xxiii. 35, probably because it had, in like manner, become the residence of the Roman governor, whose head-quarters were at Cæsarea. In Philipp. i. 13, the word denotes the Prætorian camp at Rome, *i. e.* the camp or quarters of the Prætorian cohort at Rome.

PRIEST, HIGH PRIEST, &c. (כֹּהֵן, *priest*; Sept. Ἱερεύς; Vulg. *sacerdos*). The English word is generally derived from the New Testament term presbyter [elder], the meaning of which, is, however, essentially different from that which was intended by the ancient terms. It would come nearer, if derived from προΐστημι or προΐσταμαι, 'to preside,' &c. It would then correspond to Aristotle's definition of a priest, τῶν πρὸς τοὺς θεοὺς κύριος, 'presiding over things relating to the gods' (*Polit.* iii. 14), and with the very similar one in Heb. v. 1; 'every high-priest taken from among men, is constituted on the behalf of men, with respect to their concerns with God (τὰ πρὸς τὸν Θεόν), that he may present both gifts and sacrifices for sins.' It would then adequately represent the ἱερεὺς (ὁ ἱερὰ ῥέζων) of

the Greeks, and the *sacerdos* (*a sacris faciundis*) of the Latins. The primitive meaning of the Hebrew word is not easily determined, because the verb, in its radical form, nowhere occurs. Gesenius observes: 'In Arabic it denotes to prophesy, to foretel as a soothsayer, and among the heathen Arabs the substantive bore the latter signification; also that of *a mediator* or *middle person*, who interposed in any business, which seems to be its radical meaning, as prophets and priests were regarded as mediators between men and the Deity. In the earliest families of the race of Shem, the offices of priest and prophet were undoubtedly united; so that the word originally denoted both, and at last the Hebrew idiom kept one part of the idea, and the Arabic another' (*Hebraisches und Chaldaisches Handwörterbuch*, Leipz., 1823). It is worthy of remark, that all the persons who are recorded in Scripture as having legally performed priestly acts, but who were not strictly sacerdotal, come under the definition of a prophet, viz., persons who received supernatural communications of knowledge generally, as Adam, Abraham (Gen. xx. 7), Isaac, Jacob, Moses, Job, Samuel, Elijah (comp. Luke i. 70). The primary meaning of the Hebrew word is regarded by Kimchi, Castell, Giggeius, Ernesti, Simonis, Tittmann, and Eichhorn, to be, the rendering of honourable and dignified service, like that of ministers of state to their sovereign. Nearly similar is the idea adopted by Cocceius and Schultens, viz., drawing near, as to a king or any supreme authority. The following definition of a priest may be found sufficiently comprehensive:—A man who officiates or transacts with God on behalf of others, statedly, or for the occasion.

It will now be attempted to trace the *Biblical origin and development* of the subject, for which purpose the inquiry will be pursued upon the plan of Townsend's *Historical and Chronological Arrangement of the Scriptures*, London, 1827, notwithstanding the doubts which may be entertained respecting the true chronological order of certain books and passages. We accede to the Jewish opinion, that *Adam was the first priest.* The divine institution of sacrifices, immediately after the fall, seems *connected* with the event, that 'the Lord God made coats of skins to Adam and his wife, and clothed them' (Gen. iii. 21), that is, with the skins of animals which had been offered in sacrifice (for the permission to eat animal food was not given till after the Deluge (comp. Gen. i. 29; ix. 3), expressive of their faith in the promise of the victorious yet suffering 'seed of the woman' (ver. 15): and judging from the known custom of his immediate descendants, we infer that Adam, now also become the head and ruler of the woman (ver. 16), officiated in offering the sacrifice as well on her behalf as his own. Judging from the same analogy, it seems further probable, that Adam acted in the same capacity on behalf of his sons, Cain and Abel (and possibly of their children), who are each said to have 'brought' his respective offering, but not to have personally presented it (iv. 3-5). The *place* evidently thus indicated, would seem to have been the situation of 'the cherubim,' at the east of the garden of Eden (iii. 24), called 'the face' (iv. 14), and 'the presence of the Lord' (ver. 16; comp. Hebrew of Exod. xxxiv. 24; Lev. ix. 5), and from which Jehovah conferred with Cain (ver. 9): circumstances which, together with the name of their offering, מנחה, which, sometimes at least, included bloody sacrifices in after times (1 Sam. ii. 17; xxvi. 19; Mal. i. 13, 14), and the appropriation of the skins to the offerer (comp. Lev. vii. 8), would seem like the rudiments of the future tabernacle and its services, and when viewed in connection with *many* circumstances incidentally disclosed in the brief fragmentary account of things before the Exodus, such as the Sabbath (Gen. ii. 2, 3), the distinction observed by Noah, and his burnt-offerings upon the altar of clean and unclean beasts (viii. 20), the prohibition of blood (ix. 4), tithes (xiv. 20), priestly blessing (ver. 19), consecration with oil, and vows (xxviii. 18-22), the Levirate law (xxxviii. 8), weeks (xxix. 27), distinction of the Hebrews by their families (Exod. ii. 1), the office of elder during the bondage in Egypt (iii. 16), and a place of meeting with Jehovah (v. 22; comp. xxv. 22)—would favour the supposition that the Mosaic dispensation, as it is called, was but an authoritative re-arrangement of a patriarchal church instituted at the fall. The fact that Noah officiated as the priest of his family, upon the cessation of the Deluge (B.C. 2347) is clearly recorded (Gen. viii. 20), where we have an altar built, the ceremonial distinctions in the offerings already mentioned, and their propitiatory effect, 'the sweet savour,' all described in the words of Leviticus (comp. i. 9; xi. 47). These acts of Noah, which seem like the resumption rather than the institution of an ordinance, were doubtless continued by his sons and their descendants, as *heads of their respective families.* Following our arrangement, the next glimpse of the subject is afforded by the instance of Job (B.C. 2130), who 'sent and sanctified his children' after a feast they had held, and offered burnt-offerings, עלות, 'according to the number of them all,' and 'who did this continually,' either constantly, or after every feast (i. 5). A direct reference, possibly to priests, is lost in our translation of xii. 19, 'he leadeth *princes* away spoiled,' כהנים; Sept. ἱερεῖς; Vulg. *sacerdotes;* a sense adopted in Dr. Lee's *Translation*, Lond. 1837. May not the difficult passage, xxxiii. 23, contain an allusion to priestly duties? A case is there supposed of a person divinely chastised in order to improve him (xix. 22): 'If then there be a messenger with him,' מלאך, which means priest (Eccles. v. 6; Mal. ii. 7), 'an interpreter,' מליץ, or mediator generally (2 Chron. xxxii. 31; Isa. xliii. 27); 'one among a thousand,' or of a family (Judg. vi. 15), 'my family,' literally 'my thousand' (comp. Num. i. 16), 'to show to man his uprightness,' or rather 'duty' (Prov. xiv. 2), part of the priest's office *in such a case* (Mal. ii. 7; comp. Deut. xxiv. 8), then, such an individual 'is gracious,' or rather will supplicate for him, and *saith*, 'Deliver him from going down into the pit,' or grave, for 'I have found a ransom,' a cause or ground in him for favourable treatment, namely, the penitence of the sufferer, who consequently recovers (xxv. 29). The case of Abraham and Abimelech is very similar (Gen. xx. 3-17), as also that of Job himself, and his three misjudging friends, whom the Lord commands to avert chastisement from themselves, by taking to him bullocks and rams, which he was to offer for

them as a burnt-offering, and to *pray* for them (xlii. 8). The instance of Abram occurs next in historical order, who, upon his first entrance into Canaan, attended by his family (B.C. 1921), 'built an altar, and called upon the name of the Lord' (Gen. xii. 7, 8). Upon returning victorious from the battle of the kings, he is congratulated by Melchizedek, the Canaanitish king of Salem, and 'priest of the most High God' (xiv. 18). For the ancient union of the royal and sacerdotal offices, in Egypt and other countries, see Wilkinson's *Manners and Customs of the Ancient Egyptians*, Lond. 1842, i. 245. Abram next appears entering into covenant with God as the head and representative of his seed; on which occasion those creatures only are slain which were appointed for sacrifice under the law (xv. 9-21). Isaac builds an altar (B.C. 1804), evidently as the head of his family (Gen. xxvi. 25); his *younger* son Jacob offers a sacrifice, זבח (xxxi. 54), and 'calls his brethren to eat of it' (comp. Lev. vii. 15); builds an altar at Shalem (xxxiii. 20), makes another by *divine command*, and evidently as the head of his household, at Bethel (xxxv. 1-7), and pours a drink-offering, נסך (comp. Num. xv. 7, &c.), upon a pillar (ver. 14). Such was the state of the institution we are considering during the patriarchal times. *It henceforth becomes connected with Egypt, and materially modified in consequence.* The marriage of Joseph (B.C. 1715) incidentally discloses the existence of priests in that country; for it is recorded that 'Pharaoh gave Joseph to wife a daughter of Potipherah, priest of On' (xli. 45). The priests of Egypt had evidently been endowed with lands by the Egyptian kings; for when the reigning Pharaoh, by the advice of Joseph, took all the land of the Egyptians in lieu of corn (xlvii. 20), the priests were not compelled to make the same sacrifice of theirs (ver. 22); nor was the tax of the fifth part of the produce entailed upon it (ver. 26), as on that of the other people (ver. 24). They seem also to have had a public maintenance besides (ver. 22; Herod. ii. 37). It may be serviceable, in the sequel, if we advert at this point to some of the numerous and truly important points of resemblance between the Egyptian and Jewish priests, viz., that the sacerdotal order constituted one of the four principal castes, of the highest rank, next to the king, and from whom were chosen his confidential and responsible advisers (comp. 2 Sam. viii. 18; 1 Chron. xviii. 17; Isa. xix. 11; Diodorus, i. 73); they associated with the monarch, whom they assisted in the performance of his public duties, to whom they explained from the sacred books those lessons which were laid down for his conduct. Each deity had *several priests*, and *a high-priest* (Herod. ii. 37); the latter, of whatever deity, held the first and most honourable station. The minor priests were divided into various grades, having distinct offices, as well as the scribes and priests of the kings. The same office usually descended from father to son, but was sometimes changed. They enjoyed important privileges, which extended to their whole family. They were exempt from taxes. Wine was allowed to them only in the strictest moderation, and entire abstinence from it was required during the fasts, which were frequent (Plut. *De Isid.* § 6). Each grade of the priests was distinguished by its peculiar costume. The high-priests, who, among other official duties, anointed the king, wore a mantle made of an entire leopard-skin; as did the king, when engaged in priestly duties. The underdresses of priests, of all orders, were made of linen, and they were not allowed to wear woollen in a temple (Herod. ii. 81). The undeniable similarity between the dresses of the Egyptian and Jewish priests will be hereafter illustrated. Besides their religious duties, the priests fulfilled the offices of judges, legislators, and counsellors of the king, and the laws forming part of their sacred books could only be administered by members of that order (Wilkinson, i. 237, 257-282).

In returning to the biblical history, we next find Jethro, priest of Midian, the father-in-law of Moses, possibly a priest of the true God (Exod. iii. 1), and probably his father in the same capacity (ii. 16). In Exod. v. 1, 3, the whole nation of the Israelites is represented as wishing to sacrifice and to hold a feast to the Lord. The first step, though *very* remote, towards the formation of the Mosaic system of priesthood, was the consecration of the first-born, in memory of the destruction of the first-born of Egypt (xiii. 2, 14-16); for, instead of these, God afterwards took the Levites to attend upon him (Num. iii. 12). As to the popular idea, both among Jews and Christians, that the right of priesthood was thus transferred from the first-born generally to the tribe of Levi, or rather to one family of that tribe, we consider, with Patrick, that it is utterly groundless (*Commentary on Exod.* xix. 22; Num. iii. 12; see Campeg. Vitringa, *Observ. Sacræ*, ii. 33; Outram, *De Sacrificiis*, i. 4). The substance of the objections is, that Aaron and his sons were consecrated *before* the exchange of the Levites for the first-born, that the Levites were *afterwards* given to minister unto them, but had nothing to do with the priesthood, and that the peculiar right of God in the first-born originated in the Exodus. The last altar, before the giving of the law, was built by Moses, probably for a memorial purpose only (xvii. 15; comp. Josh. xxii. 26, 27). At this period, the office of priest was so well understood, and so highly valued, that Jehovah promises as an inducement to the Israelites to keep his covenant, that they should be to him 'a kingdom of priests' (xix. 6), which, among other honourable appellations and distinctions originally belonging to the Jews, is transferred to Christians (1 Pet. ii. 9). The first introduction of the word *priests*, in this part of the history, is truly remarkable. It occurs just previous to the giving of the law (B.C. 1491), when, as part of the cautions against the too eager curiosity of the people, lest they should 'break through unto the Lord and gaze' (Exod. xix. 21), it is added, 'and let *the priests which come near unto the Lord* sanctify themselves, lest the Lord break through upon them' (ver. 22). Here, then, priests are incontestably spoken of as an already existing order, which was now about to be remodified. Nor is this the last reference to these ante-Sinaitic priests. Selden observes that the phrases 'the priests the Levites' (Deut. xvii. 9), and 'the priests the sons of Levi' (xxi. 5), and even the phrase, 'the Levites alone' (xviii. 6, comp. 1), are used to include all others who had been priests before God took the sons of Aaron peculiarly to serve him in this office (*De Synedr.* ii. 8, pp. 2, 3). Aaron is summoned at this junc-

ture to go up with Moses unto the Lord on Mount Sinai (Exod. xix. 24). Another remarkable circumstance is then recorded. Moses, now acting as 'mediator,' and endued with an extraordinary commission, builds an altar under the hill, and sends 'young men of the children of Israel, who offered burnt-offerings, and sacrificed peace-offerings of oxen unto the Lord' (xxiv. 5). Various interpretations are given to the phrase 'young men;' but, upon a view of all the circumstances, we incline to think that they were young *laymen*, purposely selected by Moses for this act, in order to form a complete break between the former priesthood and the new, and that the recommencement and re-arrangement of the priesthood under divine authority might be made more palpably distinct. In the same light we consider the many priestly acts performed by Moses himself, at this particular time, as in ch. xxix. 25; xl. 25, 27, 29; like those of Gideon, Judg. vi. 25-27; of Samuel, 1 Sam. vii. 9; of David, 1 Chron. xxi. 26. Yet these especial permissions, upon emergencies and extraordinary occasions, had their limits, as may be seen in the fate of 'the men of Bethshemesh,' 1 Sam. vi. 19; and of Uzzah, 2 Sam. vi. 7.

The designation and call of Aaron and his sons to the priesthood are commanded in Exod. xxviii. 1; and holy garments to be made for Aaron, 'for glory and for beauty' (ver. 2), and for his sons (ver. 40), by persons originally skilful, and now also inspired for the purpose (ver. 3), the chief of whom were Bezaleel and Aholiab (xxxi. 2-6). As there were some garments common both to the priests and the high-priest, we shall begin with those of the former, taking them in the order in which they would be put on. 1. The first was מכנסי־בד, 'linen-breeches,' or drawers (xxviii. 42; Sept. περισκελῆ λινᾶ; Vulg. *feminalia linea*). These were to be of fine twined linen, and to reach from the loins to the middle of the thighs. According to Josephus, whose testimony, however, of course, relates only to his own time, they reached only to the middle of the thigh, where they were tied fast (*Antiq.* iii. 7. 1). Such drawers were worn universally in Egypt. In the sculptures and

457. [Drawers and girdle.]

paintings of that country, the figures of workmen and servants have no other dress than a short kilt or apron, sometimes simply bound about the loins and lapping over in front: other figures have short loose drawers; while a third variety of this article, fitting closely and extending to the knees, appears in the figures of some idols, as in No. 457. This last sort of drawers seems to have been peculiar in Egypt to the gods, and to the priests, whose attire was often adapted to that of the idols on which they attended. The priests, in common with other persons of the upper classes, wore the drawers under other robes. No mention occurs of the use of drawers by any other class of persons in Israel except the priests, on whom it was enjoined for the sake of decency. 2. The coat of fine linen or cotton, כתנת שש (Exod. xxxix. 27). *tunica byssina*. This was worn by men in general (Gen. xxxvii. 3); also by women (2 Sam. xiii. 18; Cant. v. 3), next to the skin. It was to be of woven work. Josephus states that it reached down to the feet, and sat close to the body; and had sleeves, which were tied fast to the arms; and was girded to the breast a little above the elbows by a girdle. It had a narrow aperture about the neck, and was tied with certain strings hanging down from the edge over the breast and back, and was fastened above each shoulder (*Antiq.* iii. 7. 2). But this garment, in the case of the priests and high-priest, was to be broidered (xxviii. 4), כתנת תשבץ, 'a broidered coat,' by which Gesenius understands a coat of cloth worked in checkers or cells. Braunius compares it to the reticulum in the stomach of ruminant animals (*De Vestitu*, i. 17). The Sept. gives χίτων κοσυμβωτός, which seems to refer to the tassels or strings; Vulg. *linea stricta*, which seems to refer to its close fitting. 3. The girdle, אבנט (xxviii. 40); Sept. ζώνη; Vulg. *balteus*. This was also worn by magistrates (Isa. xxii. 21). The girdle for the priests was to be made of fine twined linen, and blue, and purple, and scarlet, of needlework (xxxix. 29). Josephus describes it as often going round, four fingers broad, but so loosely woven that it might be taken for the skin of a serpent; and that it was embroidered with flowers of scarlet, and purple, and blue, but that the warp was nothing but linen. The beginning of its circumvolution was at the breast; and when it had gone often round, it was there tied, and hung loosely down to the ancles while the priest was not engaged in any laborious service, for in that position it appeared in the most agreeable manner to the spectators; but when he was obliged to assist at the offering of sacrifices, and to do the appointed service, in order that he might not be hindered in his operations by its motion, he threw it to the left hand, and bore it on his right shoulder (*Antiq.* iii. 7. 2). The mode of its hanging down is illustrated by the cut No. 460, where the girdle is also richly embroidered; while the imbricated appearance of the girdle, רקם מעשה, may be seen very plainly in No. 457. The next cut, No. 458, of a priestly scribe of ancient Egypt, offers an interesting specimen of both tunic and girdle. Other Egyptian girdles may be seen under Abnet. 4. The bonnet, cap, or turban, מגבעה (xxviii. 40); Sept. κιδάρις; Vulg. *tiara*. The bonnet was to be of fine linen (xxxix. 28). In the time of Josephus it was circular, covering about half the head, something like a crown, made of thick linen swathes doubled round many times, and sewed together, surrounded by a linen cover to hide the seams of the swathes, and sat so

close that it would not fall off when the body was bent down (*Antiq.* iii. 7. 3). The dress of the high-priest was precisely the same with that of the common priests in all the foregoing particulars; in addition to which he had (1) a robe, מעיל (xxviii. 4), ποδήρη, *tunica*. This was not a mantle, but a second and larger coat without sleeves; a kind of surtout worn by the laity,

458. [Girdle and tunic.]

especially persons of distinction (Job i. 20; ii. 12, by kings; 1 Sam. xv. 27; xviii. 4; xxiv. 5, 12). This garment, when intended for the high-priest, and then called את מעיל האפד, 'the robe of the ephod,' was to be of one entire piece of woven work, all of blue, with an aperture for the neck in the middle of the upper part, having its rim strengthened and adorned with a border. The hem had a kind of fringe, composed of tassels, made of blue, purple, and scarlet, in the form of pomegranates; and between every two pomegranates there was a small golden bell, so

459. [Egyptian tunic.]

that there was a bell and a pomegranate alternately all round (xxviii. 31-35). The use of these bells may have partly been, that by the high-priest shaking his garment at the time of his offering incense on the great day of expiation, &c., the people without might be apprised of it, and unite their prayers with it (comp. Ecclus. xlv. 9; Luke i. 10; Acts x. 4; Rev. viii. 3, 4). Josephus describes this robe of the ephod as reaching to the feet, and consisting of one entire piece of woven-work, and parted where the hands came out (John xix. 23). He also states that it was tied round with a girdle, embroidered with the same colours as the former, with a mixture of gold interwoven (*Antiq.* iii. 7. 4). It is highly probable that this garment was also derived from Egyptian usage. There are instances at Thebes of priests wearing over the coat a loose sleeveless robe, and which exposes the sleeves of the inner tunic. The fringe of bells and pomegranates seems to have been the priestly substitute for the fringe bound with a blue riband, which all the Israelites were commanded to wear. Many traces of this fringe occur in the Egyptian remains. The use assigned to it, 'that looking on this fringe they should remember the Lord's commandments,' seems best explicable by the supposition that the Egyptians had connected some superstitious ideas with it (Num. xv. 37-40). (2.) The ephod, אפוד, ἐπωμίς, *superhumerale* (Exod. xxviii. 4). This was a short cloak covering the shoulders and breast. It is said to have been

460. [Ephod and girdle.]

worn by Samuel while a youth ministering before the Lord (1 Sam. ii. 18); by David, while engaged in religious service (2 Sam. vi. 14); and by inferior priests (1 Sam. xxii. 18). But in all these instances it is distinguished as a linen ephod, and was not a sacred but honorary vestment, as the Sept. understands it in 2 Sam. vi. 14, στολὴν ἑξάλλον; but the ephod of the high-priest was to be made of gold, of blue, of purple, of scarlet, and fine twined linen, with cunning work, חשב. Though it probably consisted of one piece, woven throughout, it had a back part and a front part, united by shoulder-pieces. It had also a girdle; or rather strings went out from each side and tied it to the body. On the top of each shoulder was to be an onyx stone, set in sockets of gold, each having engraven upon it six of the names of the children of Israel, according to the precedence of

birth, to memorialize the Lord of the promises made to them (Exod. xxviii. 6-12, 29). Josephus gives sleeves to the ephod (*Antiq.* iii. 7. 5). It may be considered as a substitute for the leopard-skin worn by the Egyptian high-priests in their most sacred duties, as in No. 460, where the ephod appears no less plainly. In other figures of Egyptian priests, the shoulder-pieces are equally apparent. They are even perceptible in No. 457. The Egyptian ephod is, however, highly charged with all sorts of idolatrous figures and emblems, and even with scenes of human sacrifices. The Sept. rendering of חשב, 'cunning work,' is ἔργον ὑφαντὸν ποικιλτοῦ, 'woven-work of the embroiderer,' a word which especially denotes a manufacturer of tissues adorned with figures of animals (Strabo, xvii. p. 574, Sieb.). Then came (3) the breastplate, חשן, περιστήθιον; Vulg. *rationale;* a gorget, ten inches square, made of the same sort of cloth as the ephod, and doubled so as to form a kind of pouch or bag (Exod. xxxix. 9), in which was to be put the Urim and Thummim, which are also mentioned as if already known (xxviii. 30). The external part of this gorget was set with four rows of precious stones; the first row, a sardius, a topaz, and a carbuncle; the second, an emerald, a sapphire, and a diamond; the third, a ligure, an agate, and an amethyst; and the fourth, a beryl, an onyx, and a jasper,—set in a golden socket. Upon each of these stones was to be engraven the name of one of the sons of Jacob. In the ephod, in which there was a space left open sufficiently large for the admission of this pectoral, were four rings of gold, to which four others at the four corners of the breastplate corresponded; the two lower rings of the latter being fixed inside. It was confined to the ephod by means of dark blue ribands, which passed through these rings; and it was also suspended from the onyx stones on the shoulder by chains of gold, or rather cords of twisted gold threads, which were fastened at one end to two other *larger* rings fixed in the upper corners of the pectoral, and by the other end going round the onyx stones on the shoulders, and returning and being fixed in the larger ring. The breastplate was further kept in its place by a girdle, made of the same stuff, which Josephus

461. [Breastplate.]

says was sewed to the breastplate, and which, when it had gone once round, was tied again upon the seam and hung down. It appears in No. 463. Here is another adaptation and correction of the costume of the higher Egyptian priests, who wore a large splendid ornament upon the breast, often a winged scarabæus, the emblem of the sun, as in the cut No. 461, which exhibits the connecting ring and chain to fasten it to the girdle. 4. The remaining portion of dress peculiar to the high-priest was the mitre, מצנפת, κίδαρις, *cidaris* (xxviii. 4). The Bible says nothing of the difference between this and the turban of the common priests. It is, however, called by a different name. It was to be of fine linen (ver. 39). Josephus says it was the same in construction and figure with that of the common priest, but that above it there was another, with swathes of blue, embroidered, and round it was a golden crown, polished, of three rows, one above another, out of which rose a cup of gold, which resembled the calyx of the herb called by Greek botanists, hyoscyamus. He ends a most laboured description by comparing the shape of it to a poppy (iii. 7. 6). Upon comparing his account of the bonnet of the priests with the mitre of the high-priests, it would appear that the latter was conical. The cut, No. 462, presents the principal forms of the mitres worn by the

462. [Egyptian mitres.]

ancient priests of Egypt, and affords a substantial resemblance of that prescribed to the Jews, divested of idolatrous symbols, but which were displaced to make way for a simple plate of gold, bearing the inscription, 'Holiness to Jehovah.' This ציץ, πέταλον, *lamina*, extended from one ear to the other, being bound to the forehead by strings tied behind, and further secured in its position by a blue riband attached to the mitre (Exod. xxviii. 36-39; xxxix. 30; Lev. viii. 9). Josephus says this plate was preserved to his own day (*Antiq.* viii. 3-8; see Reland, *De Spol. Templi*, p. 132). Such was the dress of the high-priest: see a description of its magnificence in corresponding terms in Eccles. l. 5-16. Josephus had an idea of the symbolical import of the several parts of it. He says, that being made of linen signified the earth; the blue denoted the sky, being like lightning in its pomegranates, and in the noise of its bells resembling thunder. The ephod showed that God had made the universe of four elements, the gold relating to the splendour by which all things are enlightened. The breast-plate in the middle of the ephod resembled the earth, which has the middle place

of the world. The girdle signified the sea, which goes round the world. The sardonyxes declare the sun and moon. The twelve stones are the twelve months or signs of the zodiac. The mitre is heaven, because blue (iii. 7. 7). He appears, however, to have had two explanations of some things, one for the Gentiles, and another for the Jews. Thus in this section, he tells his Gentile readers that the seven lamps upon the golden candlesticks referred to the seven planets; but to the Jews he represents them as an emblem of the seven days of the week (*De Bell. Jud.* vii. 5. 5; Whiston's notes *in loc.*). The magnificent dress of the high-priest was not always worn by him. It was exchanged for one wholly of linen, and therefore white, though of similar construction, when on the day of expiation he entered into the Holy of Holies (Lev. xvi. 4, 23); and neither he nor the common priests wore their appropriate dress, except when officiating. It was for this reason, according to some, that Paul, who had been long absent from Jerusalem, did not know that Ananias was the high-priest (Acts xxiii. 5). In Ezek. xlii. 14; xliv. 17-19, there are directions that the priests should take off their garments when they had ministered, and lay them up in the holy chambers, and put on other garments; but these directions occur in a visionary representation of a temple, which all agree has never been realized, the particulars of which, though sometimes derived from known customs, yet at other times differ from them widely. The garments of the inferior priests appear to have been kept in the sacred treasury (Ezra ii. 69; Neh. vii. 70).

The next incident in the *history* is, that Moses receives *a command to consecrate* Aaron and his sons to the priests' office (Exod. xxviii. 41), with the following ceremonies. They were to be washed at the door of the tabernacle of the congregation (xxix. 4), where the altar of burnt offering stood (xl. 6, 29). Aaron was then robed in his pontifical garments (vers. 4-6), and anointed with a profusion of oil (ver. 7); whence he was called 'the priest that is anointed' (Lev. iv. 3, &c.; Ps. cxxxiii. 2). This last act was the peculiar and only distinguishing part of Aaron's consecration; for the anointing of his sons (xxx. 30) relates only to the unction (xxix. 31), by a mixture made of the blood of the sacrifice and of the anointing oil, which was sprinkled upon both Aaron and his sons, and upon their garments, as part of their consecration. Hence then Aaron received two unctions. In after-times the high-priest took an oath (Heb. vii. 23) to bind him, as the Jews say, to a strict adherence to established customs (*Mishna*, tit. *Yoma*, i. 5). The other details of this ceremony of consecration are all contained in one chapter (Exod. xxix.), to which we must be content to refer the reader. The entire ceremony lasted seven days, on each of which, all the sacrifices were repeated (Lev. viii. 33), to which a promise was added, that God would sanctify Aaron and his sons, that is, declare them to be sanctified, which he did, by the appearance of his glory at their first sacrifice, and by the fire which descended and consumed their burnt-offerings (Lev. ix. 23, 24). Thus were Aaron and his sons and their descendants separated for ever, to the office of the priesthood, from all other Israelites. There was consequently no need of any further consecration for them or their descendants. The first-born son of Aaron succeeded him in the office, and the elder son among all his descendants; a rule which, though deviated from in after times, was ultimately resumed. The next successor was to be anointed and consecrated in his father's holy garments (ver. 29), which he must wear seven days when he went into the tabernacle of the

463 [High-priest]

congregation to minister (ver. 30; comp. Num. xx. 26-28; xxxv. 25), and make an atonement for all things and persons (Lev. xvi. 32-34), and for himself (comp. ver. 11), besides the offering (vi. 20-22). The common priests were required to prove their descent from Aaron. No age was prescribed for their entrance on their ministry, or retirement from it.

We shall now give a summary of the *duties and emoluments* of the high-priest and common priests respectively. Besides his lineal descent from Aaron, the high-priest was required to be free from every bodily blemish or defect (Lev. xxi. 16-23); but though thus incapacitated, yet, his other qualifications being sufficient, he might eat of the food appropriated to the priests (ver. 22). He must not marry a widow, nor a divorced woman, or profane, or that had been a harlot, but a virgin Israelitess (ver. 14). In Ezekiel's vision a general permission is given to the priests to marry a priest's widow (xliv. 22). The high-priest might not observe the external signs of mourning for any person, or leave the sanctuary upon receiving intelligence of the death of even father or mother (ver. 10-12; comp. x. 7). Public calamities seem to have been an exception, for Joacim the high-priest, and the priests, in such circumstances ministered in sackcloth with ashes on their mitres (Judith iv. 14, 15; comp. Joel i. 13). He must not eat anything that died of itself, or was torn of beasts (Lev. xxii. 8); must wash his hands and feet when he went into the tabernacle of the congregation, and when he came near to the altar to minister (Exod. xxx. 19-21).

At first Aaron was to burn incense on the golden altar every morning when he dressed the lamps, and every evening when he lighted them, but in later times the common priest performed this duty (Luke i. 8, 9); to offer, as the Jews understand it, daily, morning and evening, the peculiar meat-offering he offered on the day of his consecration (Exod. xxix.); to perform the ceremonies of the great day of expiation (Lev. xvi.); to arrange the shew-bread every Sabbath, and to eat it in the holy place (xxiv. 9); must abstain from the holy things during his uncleanness (xxii. 1-3); also if he became leprous, or contracted uncleanness (ver. 4-7). If he committed a sin of ignorance he must offer a sin-offering for it (iv. 3-13); and so for the people (ver. 12-22); was to eat the remainder of the people's meat-offerings with the inferior priests in the holy place (vi. 16); to judge of the leprosy in the human body or garments (xiii. 2-59); to adjudicate legal questions (Deut. xvii. 12). Indeed when there was no divinely inspired judge, the high-priest was the supreme ruler till the time of David, and again after the captivity. He must be present at the appointment of a new ruler or leader (Num. xxvii. 19), and ask counsel of the Lord for the ruler (ver. 21). Eleazar with others distributes the spoils taken from the Midianites (Num. xxxi. 21, 26). To the high-priest also belonged the appointment of a maintenance from the funds of the sanctuary to an incapacitated priest (1 Sam. ii. 36, margin). Besides these duties, peculiar to himself, he had others in common with the inferior priests. Thus, when the camp set forward, 'Aaron and his sons' were to take the tabernacle to pieces, to cover the various portions of it in cloths of various colours (iv. 5-15), and to appoint the Levites to their services in carrying them; to bless the people in the form prescribed (vi. 23-27), to be responsible for all official errors and negligences (xviii. 1), and to have the general charge of the sanctuary (ver. 5).

Emoluments of the High-Priest.—Neither the high-priest nor common priests received 'any inheritance' at the distribution of Canaan among the several tribes (Num. xviii. 20; Deut. xviii. 1, 2), but were maintained, with their families, upon certain fees, dues, perquisites, &c., arising from the public services, which they enjoyed as a common fund. Perhaps the only distinct prerogative of the high-priest was a tenth part of the tithes assigned to the Levites (Num. xviii. 28; comp. Neh. x. 38); but Josephus represents this also as a common fund (*Antiq.* iv. 4. 4).

Duties of the Priests.—Besides those duties already mentioned as common to them and the high-priests, they were required to prove their descent from Aaron, to be free from all bodily defect or blemish (Lev. xxi. 16-23); must not observe mourning, except for near relatives (xxi. 1-5); must not marry a woman that had been a harlot, or divorced, or profane. The priest's daughter who committed whoredom was to be burnt, as profaning her father (xxi. 9). The priests were to have the charge of the sanctuary and altar (Num. xviii. 5). The fire upon the altar, being once kindled (Lev. i. 7), the priests were always to keep it burning (vi. 13). In later times, and upon extraordinary occasions, at least, they flayed the burnt-offerings (2 Chron. xxix. 34), and killed the Passover (Ezra vi. 20). They were to receive the blood of the burnt-offerings in basins (Exod. xxiv. 6), and sprinkle it round about the altar, arrange the wood and the fire, and to burn the parts of the sacrifices (Lev. i. 5-10). If the burnt sacrifice were of doves, the priest was to nip off the head with his finger-nail, squeeze out the blood on the edge of the altar, pluck off the feathers, and throw them with the crop into the ash-pit, divide it down the wings, and then completely burn it (ver. 15-17). He was to offer a lamb every morning and evening (Num. xxviii. 3), and a double number on the Sabbath (ver. 9), the burnt-offerings ordered at the beginning of months (ver. 11), and the same on the Feast of Unleavened Bread (ver. 19), and on the day of the First Fruits (ver. 26); to receive the meat-offering of the offerer, bring it to the altar, take of it a memorial, and burn it upon the altar (Lev. ii.); to sprinkle the blood of the peace-offerings upon the altar round about, and then to offer of it a burnt-offering (iii.); to offer the sin-offering for a sin of ignorance in a ruler or any of the common people (iv. 22-25); to eat the sin-offering in the holy-place (vi. 26; comp. x. 16-18); to offer the trespass-offering (ver. 6-19; vi. 6, 7), to sprinkle its blood round about the altar (vii. 2), to eat of it, &c. (ver. 6); to eat of the shew-bread in the holy place (xxiv. 9); to offer for the purification of women after child-birth (xii. 6, 7); to judge of the leprosy in the human body or garments; to decide when the leper was cleansed, and to order a sacrifice for him (xiv. 3, 4); to administer the rites used at pronouncing him clean (ver. 6, 7); to present him and his offering before the Lord, and to make an atonement for him (ver. 10-32); to judge of the leprosy in a house (xiv. 33-47), to decide when it was clean (ver. 48), and to make an atonement for it (ver. 49-53); to make an atonement for men cleansed from an issue of uncleanness (xv. 14, 15), and for women (ver. 29, 30); to offer the sheaf of First Fruits (xxiii. 10, 11); to estimate the commutation in money for persons in cases of a singular or extraordinary vow (xxvii. 8), or for any devoted unclean beast (ver. 11, 12), or for a house (ver. 14), or field (xviii. 23); to conduct the ordeal of the bitter water (Num. v. 12-31) [JEALOUSY, WATER OF]; to make an atonement for a Nazarite who had accidentally contracted uncleanness (vi. 13); to offer his offering when the days of his separation were fulfilled (ver. 14, 16); to blow with the silver trumpets on all occasions appointed (vi. 13-17), and ultimately at morning and evening service (1 Chron. xvi. 6); to make an atonement for the people and individuals in case of erroneous worship (Num. xv. 15, 24, 25, 27) (see Outram, *De Sacrificiis*, c. xiv. 2); to make the ointment of spices (1 Chron. ix. 30); to prepare the water of separation (Num. xix. 1-11); to act as assessors in judicial proceedings (Deut. xvii. 9; xix. 7); to encourage the army when going to battle, and probably to furnish the officers with the speech (ver. 5-9); to superintend the expiation of an uncertain murder (xxi. 5), and to have charge of the law (xxxi. 9).

The emoluments of the priests were as follows:—1. Those which they might eat only at the sanctuary; viz., the flesh of the sin-offering (Lev. vi. 25, 26), and of the trespass-offering (vii. 1, 6); the peace-offerings of the congregation at Pentecost (xxiii. 19, 20); the remainder of

the omer or sheaf of the first-fruits of barley harvest (ver. 10), and the loaves offered at wheat harvest (ver. 17); the shew-bread (xxiv. 9); the remainder of the leper's log of oil (xiv. 10, &c.); the remnants of the meat-offerings (vi. 16). 2. Those which might be eaten only in the camp in the first instance, and afterwards in Jerusalem, viz., the breast and right shoulder of the peace-offerings (vii. 31, 34); the heave-offering of the sacrifice of thanksgiving (ver. 12-14); the heave-offering of the Nazarite's ram (Num. vi. 17, 20); the firstling of every clean beast (xviii. 15); whatsoever was first ripe in the land (ver. 13). 3. Those due to them only from inhabitants of the land; viz., the first-fruits of oil, wine, wheat (ver. 12); a cake of the first dough made of any kind of grain (xv. 20); the first fleece (Deut. xviii. 4). 4. Those due to them everywhere within and without the land; viz., the shoulder, two cheeks and maw, of an ox or sheep, offered in sacrifice (ver. 3); the redemption of man and of unclean beasts (Num. xviii. 15); of the firstling of an ass (Exod. xxxiv. 20); the restitution in cases of injury or fraud when it could not be made to the injured party or his kinsman (Num. v. 8); all devoted things. 5. The skins of the burnt offerings (Lev. vii. 8), which Philo calls a very rich perquisite (*De Sacerd. Honor.* p. 833, ed. 1640). Many of these dues were paid in money. The priests might also incidentally possess lands (1 Kings ii. 26; Jer. xxxii. 7, 8); and they most likely shared in occasional donations and dedications (Num. xxxi. 25-29, 50-54; 2 Sam. viii. 11, 12; 1 Chron. xxvi. 27, 28). Their revenues were probably more extensive than they appear, owing to the ambiguity with which the term Levite is often used. If the regular and ascertained incomes of the priests seem large, amounting, as it has been computed, to one-fifth of the income of a Jew (comp. Gen. xlvii. 24), it must be considered that their known duties were multifarious and often difficult. Michaelis calls them 'the literati of all the faculties.' The next *event* in the history of the subject is the *public consecration* of Aaron and his sons (B.C. 1490), according to the preceding regulations (Lev. viii.). At their first sacerdotal performances (ix.) the Divine approbation was intimated by a supernatural fire which consumed their burnt-offering (ver. 24). The general satisfaction of the people with these events was, however, soon dashed by the miraculous destruction of the two elder sons of Aaron, Nadab and Abihu, for offering strange fire (x. 1), probably under the influence of too much wine, since the prohibition of it to the priests when about to enter the tabernacle seems to have originated in this event (ver. 9). Moses forbade Aaron and his sons to uncover their heads, or to rend their clothes on this occasion; but the whole house of Israel were permitted to bewail the visitation (ver. 6). The inward grief, however, of Eleazar and Ithamar caused an irregularity in their sacerdotal duties, which was forgiven on account of the occasion (ver. 16-20). Aaron now appears associated with Moses, and the leading men of the several tribes, in taking the national census (Num. i. 3, &c.), and on other grand state occasions (xxvi. 2, 3; xxxi. 13-26; xxxii. 2; xxxiv. 17). The high-priest appears ever after as a person of the highest consequence. The dignity of the priesthood soon excited the emulation of the ambitious; hence the penalty of death was denounced against the assumption of it by any one not belonging to the Aaronic family (ver. 10), and which was soon after miraculously inflicted upon Korah, Dathan, and Abiram for this crime (xvi. 40). Its restriction to that family was further demonstrated by the blossoming of Aaron's rod (xvii. 5, 8; comp. xxviii. 5-7). The death of Aaron (B.C. 1452) introduces the installation of his successor, which appears to have simply consisted in arraying him in his father's pontifical garments (xx. 28). Thus also Jonathan the Asmonæan contented himself with putting on the high-priest's habit, in order to take possession of the dignity (1 Macc. x. 21; comp. Josephus, *Antiq.* xiii. 2. 3). The high esteem in which the priesthood was held may be gathered from the fact that it was promised in perpetuity to Phinehas and his family as a reward for his zeal (xxv. 13). At the entrance into Canaan the priests appear bearing the ark of the Lord, at the command of Joshua (iii. 6), though this was ordinarily the duty of the Levites. It was carried by the priests on other grand occasions (2 Chron. v. 4, 5, 7). At the distribution of the land the priests received thirteen cities out of the tribes of Judah, Simeon, and Benjamin (xxi. 4). The *first idolatrous priest in Israel* was a man consecrated by his own father to officiate in his own house (B.C. 1413); he also afterwards consecrated a Levite to the office (Judg. xvii. 5-13). This act seems like a return to the ancient rites of Syria (ver. 5; comp. x. 6; Gen. xxxi. 19, 30; Hosea iii. 4). This Levite became afterwards the idolatrous priest of the whole tribe of Dan (Judg. xviii. 19), and his successors long held the like office in that tribe (ver. 30). The abuse of the sacerdotal office in Shiloh is evinced by the history of Eli the high-priest, and his two sons, Hophni and Phinehas (B.C. 1156). According to Josephus Eli was not of the posterity of Eleazar, the first-born son of Aaron, but of the family of Ithamar; and Solomon took the office of high-priest away from Abiathar, a descendant of Ithamar, and conferred it upon Zadok, who descended from Eleazar (1 Kings ii. 26, 27; *Antiq.* v. 11. 5; viii. 1. 3). The sons of Eli introduced a new exaction from the peace-offering, of so much as a flesh-hook with three teeth brought up; for which and other rapacities (1 Sam. ii. 12-17) their death was threatened (ver. 34), and inflicted (iv. 11). The capture of the ark of God by the Philistines (B.C. 1116) affords us an insight into the state of sacerdotal things among that people (1 Sam. v.), viz., a temple (ver. 2), priests (ver. 5), who are consulted respecting the disposal of the ark (vi. 2, 3). Ahiah, the great-grandson of Eli, succeeded to the high priesthood (B.C. 1093) (1 Sam. xiv. 3); he asks counsel of God for Saul, but it is not answered (ver. 37); is succeeded in office by his brother Ahimelech (xxi. 1-9). Saul appears to have appointed Zadok, of the family of Eleazar, to the high priesthood, and who, with his brethren the priests, officiated before the tabernacle at Gibeon (1 Chron. xvi. 39). David, at his elevation to the throne, sent for all the priests and Levites to bring the ark of God to Jerusalem (B.C. 1051) (1 Chron. xiii. 2, 3; comp. the Psalm he wrote on the occasion, cxxxii. 9-16). At this period, therefore, there were two high-priests at Jerusalem (1 Chron. xv. 11; xviii. 16). A

peculiar use of the Hebrew word signifying priest occurs in 2 Sam. viii. 18, 'and David's sons were כהנים, chief rulers;' Sept. αὐλάρχαι, 'chamberlains;' Vulg: *sacerdotes*. The writer of the First book of Chronicles, however, did not choose to give the name to any but a priest, and renders it 'the sons of David were chief (or heads) on the side of the king' (xviii. 17). The word seems, however, certainly applied to some persons who were not priests (1 Kings iv. 5, 'principal officer;' Sept. ἑταῖρος; Alex. ἱερεὺς ἑταῖρος; Vulg. *sacerdos;* comp. 2 Sam. xx. 26; 1 Chron. xxvii. 5; Ps. xcix. 6). These 'sons of David' were, therefore, probably ecclesiastical counsellors, or chief church lawyers. During the reign of David, both Zadok and Abiathar steadily adhered to his interests, accompanied him out of Jerusalem when he fled before Absalom (2 Sam. xv. 24), and, after having at his desire returned to Jerusalem (ver. 29), still maintained private correspondence with him (ver. 35), and ultimately negotiated his restoration (xix. 11). David introduced *the division of the priests into twenty-four classes or courses* by lot (1 Chron. xxiv.), B.C. 1015. He appointed sixteen courses of the descendants of Eleazar, under as many heads of their families, and eight of those of Ithamar (ver. 4). This distribution took place in the presence of the king, the princes, Zadok, and the principal priests and Levites. The first of these courses was that which had Jehoiarib at the head of it (ver. 7). It was reckoned the most honourable. Josephus values himself on his descent from it (*Vita*, § 1). Mattathias, the father of the Maccabees, descended from it (1 Macc. ii. 1). Abijah was the head of the eighth course (ver. 10), to which Zacharias, the father of the Baptist, belonged (Luke i. 5). All these courses were placed under the jurisdiction of the high-priest, called Aaron, on this occasion (ver. 19). Each course served a week, alternately, under a subordinate prefect (2 Kings xi. 5, 7); and in the time of Zacharias, at least, the duties of each individual seem to have been determined by lot (Luke i. 9); but all attended at the great festivals (2 Chron. v. 11). This arrangement continued till the time of Josephus (*Antiq.* vii. 14. 7). At the close of David's life, Abiathar sided with Adonijah in his effort to gain the throne; but Zadok adhered to Solomon (1 Kings i. 7, 8), and anointed him king (ver. 39). Accordingly, when Solomon became established in the government, he deposed Abiathar (ii. 26), and put Zadok in his place; who appears to have been anointed to the office (1 Chron. xxix. 22), owing to the interruption already alluded to, which had taken place in the proper succession of the high-priesthood. Frequent references to the priests occur in the Psalms written upon the dedication of the temple (B.C. 1004) (see Ps. cxxxv. 1, 19, &c.). The priests were now installed in their offices (2 Chron. viii. 14, 15). At the revolt of the ten tribes from Rehoboam (B.C. 975), all the priests repaired to him to Jerusalem (2 Chron. xi. 13), and there continued their services in the legal manner (xiii. 11). On the other hand, Jeroboam, now become king of Israel, deposed them from their office in his dominions, and consecrated priests of his own idolatrous worship (xi. 15), persons of the lowest class, not of the sons of Levi (1 Kings xii. 31); 'whosoever would he consecrated him' (xiii. 33), provided that the candidate could only bring a young bullock and seven rams for the purpose (2 Chron. xiii. 9). It was during this depression of the true religion and worship that Jehoshaphat, king of Judah, made the celebrated attempt to restore and confirm it in his own dominions, recorded in 2 Chron. xvii. 7-9. For this purpose he sent priests and Levites, who 'took with them the book of the law,' under the convoy of certain princes, to teach its contents throughout all the cities of Judah. This, which seems the nearest approach of any on record to *teach* the people by the priests or Levites, really *amounts to no more* than the declaring the obligations of the law by the appointed expositors of its requirements (comp. Deut. xvi. 18; xvii. 9-13; xxiv. 8; xxxiii. 10; Ezek. xliv. 23, 24; Hagg. ii. 11-13; Hosea iv. 6; Micah iii. 11; Mal. ii. 6-9; and even Neh. viii. 7-9). It may be collected from this incident, that the Scriptures were not then in common circulation (for the deputation 'took the book of the law with them'), and that there was then no religious instruction in synagogues (Campegius Vitringa, *Synag. Vet.* pt. ii. lib. i. c. 9). Although the priests, by the ceremonies they performed, no doubt *incidentally* revived religious principles in the minds of the people, yet they were *never* public teachers of religion in the customary sense of the words. Those of the prophets who collected assemblies on the sabbaths and new moons, approached the nearest of any to religious teachers under the Gospel (comp. Ezek. xxxiii. 30, 31; Jahn, *Biblisches Archäol.* § 371, 372). Jehoshaphat shortly afterwards (B.C. 897) established a permanent court at Jerusalem, composed of priests and Levites, and of the chief of the Fathers of Israel, for the decision of all causes, with the high-priest presiding over them in regard to ecclesiastical concerns (2 Chron. xix. 8-11). About 120 years after, Jehu destroyed all the priests of Baal, and extirpated his worship from Israel (2 Kings x. 15-29). The account of this incident affords additional illustration of the general resemblance observable between idolatrous worship and that of the true God, viz., 'prophets of Baal,' 'priests,' 'servants' who waited on the latter in the capacity of Levites, 'a solemn assembly,' 'a temple' for the god, 'sacrifices,' 'burnt-offerings,' 'vestments for the priests.' About B.C. 884 the high-priest Jehoiada recovers the throne of Judah for its youthful heir Joash; and, after a long life of influence and usefulness, dies, aged 130 years, and is buried in the royal sepulchre at Jerusalem (2 Kings xi. 12; 2 Chron. xxiii.; xxiv. 15, 16). During this reign the priests were empowered, under royal authority, to raise money for the repair of the temple, but at last forfeited this commission by their negligent discharge of it (2 Kings xii. 4-12). At the public humiliation for the famine, ordered by the prophet Joel (B.C. 787), a form of prayer is delivered for the use of the priests (ii. 17; comp. Hosea xiv. 2).

Some time between B.C. 787 and 765, the attempt of Uzziah, king of Judah, to burn incense in the temple, calls forth the resistance of the high-priest Azariah and eighty of the priests, and ends with the king becoming leprous for life (2 Chron. xxvi. 16, 21). The ignorance and depravity of the idolatrous priests of Israel at this period are vividly described (Hosea iv. 6-8; vi. 9). These priests are called כמרים (2 Kings xxiii. 5; Hosea x. 5;

Zeph. i. 4), from the Syr. ܟܡܪ̈ܐ, the idolatrous priests of Palestine being, as might be expected, derived from Syria. The abandoned character of the priests of Judah nearly at the same period is described, Is. xxviii. 7, 8; Micah iii. 11. In the reign of Ahaz, king of Judah (B.C. 739), a flagrant violation of divine commands is permitted by Urijah the high-priest, by the introduction into the temple of an altar similar to one which the king had seen at Damascus (2 Kings xvi. 10-16; comp. Exod. xxvii. 1, 2). The prophecy of Hosea, addressed to the priests (v. 1, &c.), is referred to this period. Better things marked the reign of Hezekiah, who reinstated the priests in their office (2 Chron. xxix. 4); they restore the Passover (xxx.), and are reinstated in their revenues (xxxi. 4-10), are also properly provided for in their own cities (ver. 15), and have the care of their genealogies restored (ver. 16-21), B.C. 726. *During the captivity of the ten tribes*, at least one priest was sent back from Assyria to teach the Assyrian colonists in Samaria 'the manner of the God of the land' (2 Kings xvii. 27); but the colonists themselves also appointed priests for this purpose (ver. 32). Josiah, king of Judah, degrades idolatry by burning the bones of its priests upon their altars (2 Chron. xxxiv. 5), expels some of the survivors (2 Kings xxiii. 8), yet affords some of them an allowance (ver. 9), but puts others to death (ver. 20). Jeremiah, a sacerdotal prophet, flourishes B.C. 630; he is informed that his commission was partly directed against the priests of Judah (i. 18), whose degeneracy is adverted to (ii. 8), and even idolatry (ver. 26, 27). In his time the office of *second priest*, or *sagan*, as he is called by the Jews in later times, is referred to (Jer. lii. 24; 2 Kings xxv. 18). This was a sort of deputy, or *vice high-priest*, whose duty it was to officiate for his superior in case of sudden illness, &c. Many references to the depravity of the priests mark this period (2 Chron. xxxvi. 14; vi. 13; Ezek. xxii. 26), in which they were joined by the prophets (Jer. v. 31; viii. 10; xxvi. 8; Lam. iv. 13). Jeremiah records the attempt of a false prophet, Shemaiah, the Nehelamite, to induce *Zephaniah, the second priest*, to assume the office of high-priest at Jerusalem during the captivity of Judah (B.C. 597). He predicts the restoration of the sacerdotal office (xxxiii. 18, 21). About this time Seraiah, the high-priest, and his sagan Zephaniah, were carried to Babylon, and put to death (2 Kings xxv. 18, 20). Jeremiah describes the miseries of the priests at this period (Lam. i. 4, 19). At *the decree of Cyrus to rebuild Jerusalem* (B.C. 536), some of the priests in exile at Babylon, with the Fathers and Levites, avail themselves of the royal permission to return (Ezra i. 5). These belonged to *four of the courses* which retained the names of their original heads (comp. ii. 36-39; 1 Chron. xxiv. 7, 18, 14; 1 Chron. ix. 12), amounting in all to 4289 priests, besides others who could not produce their genealogy, and whom 'the governor' would not allow to eat the priests' portion till their claim should be verified by a priest with Urim and Thummim (ver. 61-64). These were followed by a second company (vii. 7). The proportion of the priests who returned seems large in comparison with the number of the people who returned, and who scarcely amounted to 50,000. Some of the Fathers who returned presented a hundred priests' garments (Ezra ii. 69). The priests were restored to their cities (ver. 70); the service was restored (iii. 3-5); and, under Joshua, the son of Josedech, the temple was rebuilt (Hagg. i. 1) and dedicated (B.C. 519). The priests who had married strange wives were compelled to separate from them (Ezra x. 18-22). Ezra the scribe publicly reads the law (Neh. viii. 4), and the priests translate the passages read into the Aramæan dialect (ver. 7). They revive the Feast of Tabernacles (ver. 13-18), and the chief of them sign the covenant of the Lord as representatives of the rest (ix. 38, &c.). At the distribution of the inhabitants, 1760 priests remained at Jerusalem (1 Chron. ix. 13). In Neh. xii. 10, 11, an account is given of the succession of the high-priests from the return of the captivity to Jaddua, or Jaddus, who held an interview with Alexander the Great. Thus, as Grotius observes, 'the Scripture history ends where the very light of times, viz., the affairs of Alexander, begin, from which time profane history becomes clear.' Then follows a list of all those chief of the priests who officiated in the lifetime of Jehoiakim, son of Joshua, either as assistants or successors of their fathers (ver. 12). Again, however, the negligence and wickedness of the restored priests are complained of by Malachi (i. 6-13). A heavy threatening is denounced against them (ii. 1-9). The fault of Eliashib, the high-priest, in the misappropriation of a sacred storehouse to the use of one of his relations (Neh. xiii. 4-10), and whose family was much corrupted (ver. 28, 29), closes the information furnished by the canonical books of the Old Testament. The high-priesthood and government of Judæa continued in the lineage of Eleazar, son of Aaron (subject, however, to the Persians), in the family of Josedech, by which it was transmitted down to Onias III. He was supplanted by Jason, his brother, as Jason was by his brother Menelaus; at whose death Alcimus, of a different family, was put into the office by the king of Syria. In the year B.C. 152, Alexander, king of Syria, bestowed it upon the heroic general Jonathan (1 Macc. x. 18-20), who belonged to the class Jehoiarib (ii. 1), and in whose family it became settled, and continued for several descents till the time of Herod, who took the liberty to change the incumbents of the office at his pleasure,—a liberty which the Romans exercised without restraint, so that at last the office was often little more than annual. At the entrance of the Christian history, we are met with the priest Zacharias, the father of the Baptist, of the course of Abia, and married to a daughter of Aaron (Luke i. 5). 'The chief priests,' mentioned in Matt. ii. 4, and elsewhere, so frequently, included, beside the high-priest properly so called and then in office, all that had already held it, who, for the reason just mentioned, were numerous, and the chiefs of the twenty-four courses, who also enjoyed this title. The acting high-priest also usually had for his coadjutor some influential senior who had previously filled the station. Hence the association of Annas and Caiaphas (Luke iii. 2). Josephus speaks of many contemporary high-priests (*Vita*, § 38); and alludes to the influence they possessed (*De Bell. Jud.* iv. 3, 6, 7, 9); and as even wearing the archieratical robe (10). By virtue of his office, the high-priest Caiaphas is

said to have prophesied (John xi. 51). He appears as chairman of the Sanhedrim at our Lord's trial (Matt. xxvi. 57). The chief priests appear as assessors in the court (ver. 59). The common priests still retain the exercise of their ancient functions, in judging of the leprosy, &c. (Mark i. 44). Christians are figuratively called priests (Rev. i. 6; xx. 6). The student will observe the important distinction, that the term ἱερεύς is never applied to the *pastor of the Christian church;* with which term the idea of a sacrifice was always connected in ancient times. Thus Hesychius, Ἱερεύει, σφάζει. Ἱερεύς, ὁ διὰ θυσιῶν μαντευόμενος. We submit the following inferences from the foregoing particulars to the judgment of the reader. The patriarchal form of the priesthood was of divine origin, and the purest. This was carried at the dispersion of the nations into every part of the globe, and became everywhere corrupted in some degree, and ultimately even among the ancient Canaanites. Hence the unquestionable resemblances to it traceable in the religions of all nations. The legation of Moses was directed to the revival of all the important truths comprised in the early revelations, and which were shrouded under the system of Egypt. Hence it was proper that he should become 'learned in all the wisdom' of that country. In the accomplishment of this mission, Moses retained also such innocent adaptations to the old system as were required by the fixed associations of the people whom he was destined to deliver. Among these adaptations we incline to consider the peculiar office of the high-priest, of which we find no rudiments in the patriarchal church. Nor does the *use and illustration* made of that office in the Epistle to the Hebrews disturb our view, because the same writer finds more points of resemblance between the performances of Christ and the priesthood of the patriarchal Melchizedek than between the office of Aaron and that of Christ (ch. vii.; see Jer. vii. 21-23). The resemblances between the religious customs of the ancient Egyptians and those of the Jews are numerous, decided, peculiar, and most important. Besides those laid before the reader in this article, we refer him to the articles Ark, Cherubim, &c., but especially to Kitto's *Pictorial History of Palestine*, London, 1844, which contains *all* the most valuable illustrations of this nature derived from the best and most modern works on Egypt. To this work the reader is indebted for the valuable cuts which have been now submitted to his consideration. For the similarity in the religion of ancient Greece, see Potter's *Archæologia*, vol. i. p. 202, Lond. 1775; of ancient Rome, Adam's *Antiquities*, p. 293, § *ministri sacrorum*, Edin. 1791. PRIMOGENITURE (בְּכֹרָה; Sept. Πρωτοτόκια, Gen. xxv. 31, 31; xxvii. 36; Deut. xxi. 17; 1 Chron. v. 1) [see Birthright]. It occurs in the New Testament only in Heb. xii. 16. Πρωτότοκος, always rendered 'first-born' in the English version, is found in the Sept. in Gen. iv. 4, Deut. xxi. 17, and several other passages of the Old Testament, as the representative of the Hebrew בכור, signifying 'one who openeth the womb,' whether an only child, or whether other children follow. 'Primogenitus est, non post quem alii, sed ante quem nullus alius genitus' (Pareus). Πρωτότοκος is found nine times in the New Testament—viz. Matt. i. 25 (if the passage be genuine, and not introduced from the parallel passage in Luke); Luke ii. 7; Rom. viii. 29; Col. i. 15, 18; Heb. i. 6; xi. 28; xii. 23; Rev. i. 5. Except in the Gospels, and Heb. xi. 28, the word always bears a metaphorical sense in the New Testament, being generally synonymous with *heir* or *lord*, and having, in Heb. i. 6, an especial reference to our Lord's Messianic dignity. In Heb. xii. 23, 'the assembly of the first-born,' it seems to be synonymous with 'elect,' or 'dearly beloved,' in which sense it is also used on one occasion in the Old Testament (Jer. xxxi. 9). In the fourth century, Helvidius, among the Latins, and Eunomius among the Greeks, wished to attach a signification to πρωτότοκος in Matt. i. and Luke ii., different from the Old Testament usage, maintaining, in order to support their novel hypothesis—(viz. that Joseph and Mary had children after the birth of our Lord)—[Jude], that the word πρωτότοκος, by reason of its etymology, could not be applied to an *only child.* Jerome replied to the former by appealing to the usage of the word in the Old Testament (*adv. Helvid. in Matt.* i. 9). The assertion of Eunomius was equally refuted by the Greek fathers, Basil (*Hom. in Nat.*), Theophylact (*in Luc.* ii.), and Damascenus (*De fid. Orthod.* l. iv.). In reference to this controversy, Drusius (*Ad difficiliora loca Num.* cap. 6) observes: 'Sic sane Christus vocatur Πρωτότοκος, licet mater ejus nullos alios postea liberos habuerit. Notet hoc juventus propter Helvidium, qui ex eâ voce inferebat Mariam ex Josepho post Christum natum plures filios suscepisse.' 'Those entitled to the prerogative' [viz. of birthright], observes Campbell (*On the Gospels*), 'were invariably denominated the first-born, whether the parents had issue afterwards or not.' Eunomius further maintains, from Col. i. 15, that our Lord was 'a creature;' but his arguments were replied to by Basil and Theophylact. Some of the Fathers referred this passage to Christ's pre-existence, others to his baptism. In Isa. xiv. 30, the 'first-born of the poor' signifies the poorest of all; and in Job xviii. 13, the 'first-born of death' means the most terrible of deaths. PRISCA. [Priscilla.]

PRISCILLA (Πρίσκιλλα), or Prisca (Πρίσκα), wife of Aquila, and probably, like Phœbe, a deaconess. She shared the travels, labours, and dangers of her husband, and is always named along with him (Rom. xvi. 3; 1 Cor. xvi. 19; 2 Tim. iv. 19) [Aquila].

PRISON. [Punishment.]

PRIZE. [Games.]

PROCHORUS (Πρόχορος), one of the seven first deacons of the Christian church (Acts vi. 5). Nothing is known of him.

PROCONSUL, a Roman officer appointed to the government of a province with consular authority. He was chosen out of the body of the senate; and it was customary, when any one's consulate expired, to send him as a proconsul into some province. He enjoyed the same honour with the consuls, but was allowed only six lictors with the fasces before him.

The proconsuls decided cases of equity and justice, either privately in their palaces, where they received petitions, heard complaints, and granted writs under their seals; or publicly in the common hall, with the formalities generally observed in the courts at Rome. These duties were, however, more frequently delegated to their assessors, or other judges of their own appointment. As the proconsuls had also the direction of justice, of war, and of the revenues, these departments were administered by their lieutenants, or *legati*, who were usually nominated by the senate. The office of the proconsuls lasted generally for one year only, and the expense of their journeys to and from their provinces was defrayed by the public. After the partition of the provinces between Augustus and the people, those who presided over the provinces of the latter were especially designated proconsuls, for whom it appears to have been customary to decree temples (Suet. *Aug.*). Livy (viii. and xxvi.) mentions two other classes of proconsuls: those who, being consuls, had their office continued beyond the time appointed by law; and those who, being previously in a private station, were invested with this honour, either for the government of provinces, or to command in war. Some were created proconsuls by the senate without being appointed to any province, merely to command in the army, and to take charge of the military discipline; others were allowed to enter upon their proconsular office before being admitted to the consulship, but having that honour in reserve.

When the Apostle Paul was at Corinth, he was brought before Gallio, the proconsul of Achaia, one of the provinces of Greece, of which Corinth was the chief city, and arraigned by the Jews as one who 'persuadeth men to worship God contrary to the law' (Acts xviii. 13); but Gallio refused to act as a judge of such matters, and 'drave them from the judgment-seat' (ver. 16).—G. M. B.

PROGNOSTICATORS. The phrase 'monthly prognosticators' occurs in the Authorized Version of Isa. xlvii. 13, where the prophet is enumerating the astrological superstitions of the Chaldæans. In the later Hebrew, חזה denotes a 'seer,' or 'prophet;' and to express the sense in which it is employed in this text, a better word than prognosticator could not well be chosen. The original, חזים בכוכבים, might perhaps be more exactly rendered, as by Dr. Henderson, 'prognosticators at the new moons.' It is known that the Chaldæan astrologers professed to divine future events by the positions, aspects, and appearances of the stars, which they regarded as having great influence on the affairs of men and kingdoms; and it would seem, from the present text, that they put forth accounts of the events which might be expected to occur from month to month, like our old almanac-makers. Some carry the analogy further, and suppose that they also gave monthly tables of the weather; but *such* prognostications are only cared for in climates where the weather is uncertain and variable; while in Chaldæa, where (as we know from actual experience) the seasons are remarkably regular in their duration and recurrence, and where variations of the usual course of the weather are all but unknown, no prognosticator would gain much honour by foretelling what every peasant knows.

PROPHECY. The principal considerations involved in this important subject may be arranged under the following heads:—

I. *The nature of Prophecy, and its position in the economy of the Old Testament.*—The view commonly taken of the prophets is, that they were mere predictors of future events; but this view is one-sided and too narrow, though, on the other hand, we must beware of expanding too much the acceptation of the term prophet. Not to mention those who, like Hendewerk, in the introduction to his *Commentary on the Prophet Isaiah*, identify the notion of a prophet with that of an honest and pious man, the conception of those is likewise too wide who place the essential feature of a prophet in his divine inspiration. That this does not meet the whole subject, appears from Num. xii. 6, sq., where Moses, who enjoyed divine inspiration in its highest grade, is represented as differing from those called prophets in a stricter sense, and as standing in contrast with them. Divine inspiration is only the general basis of the prophetic office, to which two more elements must be added:—

1. Inspiration was imparted to the prophets in a *peculiar form*. This appears decisively from the passage in Numbers above cited, which states it as characteristic of the prophet, that he obtained divine inspiration in *visions* and *dreams*, consequently in a state extraordinary and distinguished from the general one. This mode was different from that in which inspirations were conveyed to Moses and the apostles. The same thing is shown by the names usually given to the prophets, viz., ראים and חזים, *seers*, and from this that all prophecies which have come down to us have a poetical character, which points to an intimate affinity between prophecy and poetry; a subject further illustrated by Steinberk, in his work, *Der Dichter ein Seher*, Leipzig, 1836; though the materials which he gives are not sufficiently digested. The prophetical style differs from that of books properly called poetical, whose sublimity it all but outvies, only in being less restrained by those external forms which distinguish poetical language from prose, and in introducing more frequently than prose does plays upon words and thoughts. This peculiarity may be explained by the practical tendency of prophetical addresses, which avoid all that is unintelligible, and studiously introduce what is best calculated for the moment to strike the hearers. The same appears from many other circumstances, *e. g.* the union of *music* with prophesying, the demeanour of Saul when among the prophets (1 Sam. x. 5), Balaam's description of himself (Num. xxiv. 3) as a man whose eyes were opened, who saw the vision of the Almighty, and heard the words of God, the established phraseology to denote the inspiring impulse, viz., 'the hand of the Lord was strong

upon him' (Ezek. iii. 14, comp. Isa. viii. 11.; 2 Kings iii. 15), &c. All these facts prove that there essentially belonged to prophecy a state of mind worked up—a state of being beside one's self—an ecstatic transport, in which ideas were immediately imparted from Heaven. Acute remarks on the subject will be found in the works of Novalis (vol. ii. p. 472, sq.), from which we give the following passage: 'It is a most arbitrary prejudice to suppose that to man is denied the power of going out of himself, of being endued with a consciousness beyond the sphere of sense: he may at any moment place himself beyond the reach of sense (*ein übersinnliches Wesen seyn*), else he would be a mere brute, not a rational freeman of the universe. There are, indeed, degrees in the aptitude for revelations; one is more qualified for them than another, and certain dispositions are particularly capable of receiving such revelations; besides, on account of the pressure of sensible objects on the mind, it is in this state difficult to preserve self-possession. Nevertheless there are such states of mind, in which its powers are strengthened, and, so to speak, armed.' The state of ecstacy, though ranking high above the ordinary sensual existence, is still not the highest, as appears from Num. xii., and the example of Christ, whom we never find in an ecstatical state. To the prophets, however, it was indispensable, on account of the frailty of themselves and the people. The forcible working upon them by the Spirit of God would not have been required, if their general life had already been altogether holy; for which reason we also find ecstacy to manifest itself the stronger the more the general life was ungodly; as, for instance, in Balaam, when the Spirit of God came upon him (Num. xxiv. 4, 16), and in Saul, who throws himself on the ground, tearing his clothes from his body. With a prophet whose spiritual attainments were those of an Isaiah, such results are not to be expected. As regards the people, their spiritual obtuseness must be considered as very great, to have rendered necessary such vehement excitations as the addresses of the prophets caused. Thus it appears that prophecy has a predominant place in the Old Testament. Under the New Testament it could take only a subordinate place; although even then it could not be dispensed with, and hence we find it in the apostolic age. It had to prepare the soil on which the peculiar gifts of the New Testament might flourish, and the lower the church's state, the more it resembled that of the Old Testament, the greater the need of this. It had also to counteract the risk of barrenness and inefficiency to which the unexciting form of the New Testament system was exposed. To the church in the present day one could wish a copious supply of the prophetic gifts!

2. Generally speaking, every one was a prophet to whom God communicated his mind in this peculiar manner. Thus, *e. g.* Abraham is called a prophet (Gen. xx. 7), not, as is commonly thought, on account of general revelations granted him by God, but because such as he received were in the special form described; as indeed in chap. xv. it is expressly stated that divine communications were made to him in *visions* and *dreams*. The body of the patriarchs are in the same manner called prophets (Ps. cv. 15). When the Mosaic economy had been established, a new element was added; the prophetic gift was after that time regularly connected with the prophetic office, so that the latter came to form part of the idea of a prophet. Thus Daniel's work was not placed in the collection of prophetical books, because, though eminently endowed with prophetic gifts, he still had not filled the prophetic office. Speaking of office, we do not of course mean one conferred by men, but by God; the mission to Israel, with which the certainty of a continued, not temporary, grant of the *donum propheticum* was connected.

That the Lord would send such prophets was promised to the people by Moses, who by a special law (Deut. xviii. 1) secured them authority and safety. As his ordinary servants and teachers, God appointed the Priests: the characteristic mark which distinguished the prophets from them was inspiration; and this explains the circumstance that, in times of great moral and religious corruption, when the ordinary means no longer sufficed to reclaim the people, the number of prophets increased. The regular religious instruction of the people was no part of the business of the prophets; their proper duty was only to rouse and excite. The contrary, viz., that part of the regular duty of the prophets was to instruct the people, is often argued from 2 Kings iv. 23, where it is said that the Shunamite on the sabbaths and days of new moon used to go to the prophet Elisha; but this passage applies only to the kingdom of Israel, and admits of no inference with respect to the kingdom of Judah. As regards the latter, there is no proof that prophets held meetings for instruction and edification on sacred days. Their position was here quite different from that of the prophets in the kingdom of Israel. The agency of the prophets in the kingdom of Judah was only of a subsidiary kind; these extraordinary messengers of the Lord only filled there the gaps left by the regular servants of God, the priests and the Levites; the priesthood never became there utterly degenerate, and each lapse was followed by a revival of which the prophets were the vigorous agents; the divine election always vindicated itself, and in the purity of the origin of the priesthood lay the certainty of its continued renewal. On the contrary, the priesthood in the kingdom of Israel had no divine sanction, no promise; it was corrupt in its very source: to reform itself would have been to dissolve itself; the priests there were the mercenary servants of the king, and had a brand upon their own consciences. Hence in the kingdom of Israel the prophets were the regular ministers of God; with their office all stood or fell, and hence they were required to do many things besides what the original conception of the office of a prophet implied—a circumstance from the oversight of which many erroneous notions on the nature of prophecy have sprung. This led to another difference, to which we shall revert below, viz., that in the kingdom of Judah the prophetic office did not, as in Israel, possess a fixed organization and complete construction.

In their labours, as respected their own times, the prophets were strictly bound to the Mosaic law, and not allowed to add to it or to diminish ought from it; what was said in this respect to the whole people (Deut. iv. 2; xiii. 1) applied also to them. We find, therefore, prophecy always takes its ground on the Mosaic

law, to which it refers, from which it derives its sanction, and with which it is fully impressed and saturated. There is no chapter in the prophets in which there are not several references to the law. The business of the prophets was to explain it, to lay it to the hearts of the people, and to preserve vital its spirit. It was, indeed, also their duty to point to future reforms, when the ever-living spirit of the law would break its hitherto imperfect form, and make for itself another: thus Jeremiah (iii. 16) foretells days when the ark of the covenant shall be no more, and (ch. xxxi. 31) days when a new covenant will be made with the house of Israel and with the house of Judah. But for their own times they never once dreamt of altering any, even the minutest and least essential precept, even as to its form; how much less as to its spirit, which even the Lord himself declares (Matt. v. 18) to be immutable and eternal. The passages which some interpreters have alleged as opposed to sacrifices as instituted by the Mosaic law, have been misunderstood; they do not denounce sacrifices generally, but only those of the Canaanites, with whom sacrifice was not even a form of true worship, but opposed to the genuine and spiritual service of God.

As to prophecy in its circumscribed sense, or the foretelling of future events by the prophets, some expositors would explain all predictions of special events; while others assert that no prediction contains anything but general promises or threatenings, and that the prophets knew nothing of the particular manner in which their predictions might be realised. Both these classes deviate from the correct view of prophecy; the former resort often to the most arbitrary interpretations, and the latter are opposed by a mass of facts against which they are unable successfully to contend; *e. g.*, when Ezekiel foretells (ch. xii. 12) that Zedekiah would try to break through the walls of the city and to escape, but that he would be seized, blinded, and taken to Babylon. The frailty of the people, under the Old Testament, required external evidence of the real connection of the prophets with God, and the predictions of particular forthcoming events were to them σημεῖα, signs. These were the more indispensable to them, because the ancients generally, and the Orientals in particular, showed the greatest tendency towards the exploration of futurity, which tended to foster superstition and forward idolatry. All other methods of knowing future events by necromancy, conjuration, passing through the fire, &c., having been strictly forbidden (Deut. xviii. 10, 11), it might be expected that the deep-rooted craving for the knowledge of forthcoming events would be gratified in some other and nobler manner. The success of a prophet depended on the gift of special knowledge of futurity; this it is true was granted comparatively to only few, but in the authority thus obtained all those shared who were likewise invested with the prophetic character. It was the seal impressed on true prophecy, as opposed to the false. From 1 Sam. ix. 6, it appears that, to inspire uncultivated minds with the sense of divine truths, the prophets stooped occasionally to disclose things of common life, using this as the means to reach a higher mark. On the same footing with definite predictions stand miracles and tokens, which prophets of the highest rank, as Elijah and Isaiah, volunteered or granted. These also were requisite to confirm the feeble faith of the people; but Ewald justly remarks, that with the true prophets they never appear as the chief point; they only assist and accompany prophecy, but are not its object, not the truth itself, which supersedes them as soon as it gains sufficient strength and influence.

Some interpreters, misunderstanding passages like Jer. xviii. 8; xxvi. 13, have asserted, with Dr. Köster (p. 226, sq.), that all prophecies were conditional; and have even maintained that their revocability distinguished the true predictions (*Weissagung*) from soothsaying (*Wahrsagung*). But beyond all doubt, when the prophet denounces the divine judgments, he proceeds on the assumption that the people will not repent, an assumption which he knows from God to be true. Were the people to repent, the prediction would fail; but because they will not, it is uttered *absolutely*. It does not follow, however, that the prophet's warnings and exhortations are useless. These serve 'for a witness against them;' and besides, amid the ruin of the mass, individuals might be saved. Viewing prophecies as conditional predictions nullifies them. The Mosaic criterion (Deut. xviii. 22), that he was a false prophet who predicted 'things which followed not nor came to pass,' would then be of no value, since recourse might always be had to the excuse, that the case had been altered by the fulfilling of the condition. The fear of introducing fatalism, if the prophecies are not taken in a conditional sense, is unfounded; for God's omniscience, his foreknowledge, does not establish fatalism, and from divine omniscience simply is the prescience of the prophets to be derived. The prophets feel themselves so closely united to God, that the words of Jehovah are given as their own, and that to them is often ascribed what God does, as slaying and reviving (Hos. vi. 5), rooting out nations and restoring them (Jer. i. 10; xviii. 7; Ezek. xxxii. 18; xliii. 3); which proves their own consciousness to have been entirely absorbed into that of God.

The sphere of action of the prophets was absolutely limited to Israel, and there is only one case of a prophet going to the heathen to preach among them, that of Jonah sent to Nineveh. He goes, however, to Nineveh to shame the Hebrews by the reception which he meets with there, and acting upon his own nation was thus even in this case the prophet's ultimate object. Many predictions of the Old Testament concern, indeed, the events of foreign nations, but they are always uttered and written with reference to Israel, and the prophets thought not of publishing them among the heathens themselves. The conversion of the pagans to the worship of the true God was indeed a favourite idea of the prophets; but the Divine Spirit told them, that it was not to be effected by their exertions, as it was connected with extensive future changes, which they might not forestall.

It needs hardly to be mentioned that before a man could be a prophet he must be converted. This clearly appears in the case of Isaiah, 'whose iniquity was taken away, and his sin purged,' previous to his entering on his mission to the people of the covenant. For a single momentary inspiration, however, the mere beginning of spiritual life sufficed, as instanced in Balaam and Saul.

The most usual appellation of a prophet is נביא, and Exod. iv. 1-17 is the classical passage as to the meaning of this word. There God says to Moses, 'Aaron shall be thy נביא unto the people, and thou shalt be unto him instead of God.' The sense is: Aaron shall speak what thou shalt communicate to him. This appellation implies, then, the prophet's relation to God: he speaks not of his own accord, but what the Spirit puts into his mouth. This accords also with the etymology of the word, as נבא signifies in the Arabic *produxit*, and next, *protulit verba, nunciavit, indicavit.* Thus נביא is an adjective of passive signification; he who has been divinely inspired, who has received from God the revelations which he proclaims: it is of the form קטיל, which cannot be proved ever to have an active signification; and hence the common opinion that נביא signifies originally a *speaker*, which has recently been again set up by Dr. Ewald (p. 6), cannot be maintained. While this name refers to divine inspiration, the others are derived from the particular form in which this was communicated to the prophets. These names are חזה and ראה, differing only in the former being more poetical and solemn. From 1 Sam. ix. 9, some expositors have inferred that the name נביא sprang up after the age of Samuel, and that before this the name ראה had been exclusively in use. But that this view is wrong has been proved in Hengstenberg's 'Contributions towards an Introduction to the Old Testament' (*Beiträge zur Einleitung ins A. T.*, vol. iii. p. 335). Other names, as 'man of God,' &c., do not belong to the prophets as such, but only in so far as they are of the number of servants and instruments of God.

II. *Duration of the Prophetic office.*—Although we meet with cases of prophesying as early as the age of the patriarchs, still the roots of prophetism among Israel are properly fixed in the Mosaic economy. Moses instilled into the congregation of Israel those truths which form the foundation of prophecy, and thus prepared the ground from which it could spring up. In the time of Moses himself we find prophesying growing out of those things which through him were conveyed to the minds of the people. The main business of Moses was not that of a prophet; but sometimes he was in the state of prophetic elevation. In such a state originated his celebrated song (Deut. xxxii.), which Eichhorn justly calls the Magna Charta of prophecy; and his blessings (Deut. xxxiii.). Miriam, the sister of Aaron, is called a prophetess (Exod. xv. 20; comp. Num. xii. 2, 6), when she took a timbrel and sang to the Lord, who had overthrown the enemy of the children of Israel. The seventy elders are expressly stated to have been impelled by the spirit of God to prophesy. In the age of the Judges, prophecy, though existing only in scattered instances, exerted a powerful influence. Those who would deny this, in spite of the plain evidence of history, do not consider that the influential operation of prophets, flourishing in later times, requires preparatory steps. 'Now only,' says Ewald justly, 'we are able to perceive how full of strength and life was the ground in which prophecy, to attain such an eminence, must have sprung up.' The more conspicuous prophetic agency begins with Samuel, and the prophets' schools which he founded. From this time to the Babylonian exile, there happened hardly any important event in which the prophets did not appear as performing the leading part. But although the influential operation of the prophets begins with Samuel, none of the prophets up to the year B.C. 800 left any written prophecies. This was certainly not a mere accident. Only when the more important and extensive divine judgments approached, it became necessary, by their announcement, to arouse the impious from their slumber of listlessness, and to open to the faithful the stores of consolation and hope. Before this time, the living oral speech of the prophets was the most important thing; but now, when the Lord revealed to them more extensive prospects, when their calling was not restricted to present events merely, but forthcoming momentous changes were conveyed to their notice and consideration, their written words became equally important. About a hundred years after the return from the Babylonian exile, the prophetic profession ceased. The Jewish tradition uniformly states that Haggai, Zechariah, and Malachi were the last prophets. In the first book of the Maccabees (ch. ix. 17) the discontinuance of the prophetic calling is considered as forming an important era in Jewish history; while at the same time an expectation of the renewal in future ages of prophetic gifts is avowed (iv. 46; xiv. 41). After the Babylonian exile the sacred writings were collected, which enabled every one to find the way of salvation; but the immediate revelations to the people of Israel were to cease for awhile, in order to raise a stronger longing for the appearance of the Messiah, and to prepare for him a welcome reception. For the same reason the ark of the covenant had been taken away from the people. The danger of a complete apostacy, which in earlier times might have been incurred by this withdrawal, was not now to be apprehended. The external worship of the Lord was so firmly established, that no extraordinary helps were wanted. Taking also into consideration the altered character of the people, we may add that the time after the exile was more fit to produce men learned in the law than prophets. Before this period, the faithful and the unbelieving were strongly opposed to each other, which excited the former to great exertions. These relaxed when the opposition ceased, and pious priests now took the place of prophets. The time after the exile is characterized by weakness and dependance; the people looked up to the past as to a height which they could not gain; the earlier writings obtained unconditional authority, and the disposition for receiving prophetic gifts was lost.

III. *Manner of Life of the Prophets.*—The prophets went about poorly and coarsely dressed (2 Kings i. 8), not as a mere piece of asceticism, but that their very apparel might teach what the people ought to do; it was a 'sermo propheticus realis.' Compare 1 Kings xxi. 27, where Ahab does penance in the manner figured by the prophet: 'And it came to pass, when Ahab heard these words, that he rent his clothes, and put sackcloth upon his flesh, and fasted.' Generally the prophets were not anxious of attracting notice by ostentatious display; nor did they seek worldly wealth, most of them living in poverty and even want (1 Kings xiv. 3; 2 Kings iv. 1,

38, 42; vi. 5). The decay of the congregation of God deeply chagrined them (comp. Micah vii. 1, and many passages in Jeremiah). Insult, persecution, imprisonment, and death, were often the reward of their godly life. The author of the Epistle to the Hebrews says (ch. xi. 37): 'They were stoned, they were sawn asunder, were tempted, were slain with the sword: they wandered about in sheep-skins and goat-skins, being destitute, afflicted, tormented' (comp. Christ's speech, Matt. xxiii. 29, sq.; 2 Chron. xxiv. 17, sq.). The condition of the prophets, in their temporal humiliation, is vividly represented in the lives of Elijah and Elisha in the books of the Kings; and Jeremiah concludes the description of his sufferings in the 20th chapter, by cursing the day of his birth. Repudiated by the world in which they were aliens, they typified the life of Him whose appearance they announced, and whose spirit dwelt in them. They figured him, however, not only in his lowness, but in his elevation. The Lord stood by them, gave evidence in their favour by fulfilling their predictions, frequently proved by miracles that they were his own messengers, or retaliated on their enemies the injury done them. The prophets addressed the people of both kingdoms: they were not confined to particular places, but prophesied where it was required. For this reason they were most numerous in capital towns, especially in Jerusalem, where they generally spoke in the temple. Sometimes their advice was asked, and then their prophecies take the form of answers to questions submitted to them (Isa. xxxvii., Ez. xx., Zech. vii.). But much more frequently they felt themselves inwardly moved to address the people without their advice having been asked, and they were not afraid to stand forward in places where their appearance, perhaps, produced indignation and terror. Whatever lay within or around the sphere of religion and morals, formed the object of their care. They strenuously opposed the worship of false gods (Isa. i. 10, sq.), as well as the finery of women (Isa. iii. 16, sq.). Priests, princes, kings, all must hear them—must, however reluctantly, allow them to perform their calling as long as they spoke in the name of the true God, and as long as the result did not disprove their pretensions to be the servants of the invisible King of Israel. (Jer. xxxvii. 15-21). There were institutions for training prophets; the senior members instructed a number of pupils and directed them. These schools had been first established by Samuel (1 Sam. x. 8; xix. 19); and at a later time there were such institutions in different places, as Bethel and Gilgal (2 Kings ii. 3; iv. 38; vi. 1). The pupils of the prophets lived in fellowship united, and were called 'sons of the prophets;' whilst the senior or experienced prophets were considered as their spiritual parents, and were styled fathers (comp. 2 Kings ii. 12; vi. 21). Samuel, Elijah, and Elisha, are mentioned as principals of such institutions. From them the Lord generally chose his instruments. Amos relates of himself (vii. 14, 15), as a thing uncommon, that he had been trained in no school of prophets, but was a herdsman, when the Lord took him to prophesy unto the people of Israel. At the same time, this example shows that the bestowal of prophetic gifts was not limited to the schools of the prophets. Women also might come forward as prophetesses, as instanced in Miriam, Deborah, and Huldah, though such cases are of comparatively rare occurrence. We should also observe, that only as regards the kingdom of Israel we have express accounts of the continuance of the schools of prophets. What is recorded of them is not directly applicable to the kingdom of Judah, especially since, as stated above, prophecy had in it an essentially different position. We cannot assume that the organization and regulations of the schools of the prophets in the kingdom of Judah should have been as settled and established as in the kingdom of Israel. In the latter, the schools of the prophets had a kind of monastic constitution: they were not institutions of general education, but missionary stations; which explains the circumstance that they were established exactly in places which were the chief seats of superstition. The spiritual fathers travelled about to visit the training schools; the pupils had their common board and dwelling, and those who married and left, ceased not on that account to be connected with their colleges, but remained members of them. The widow of such a pupil of the schools of prophets, who is mentioned in 2 Kings iv. 1, sq., considered Elisha as the person bound to care for her. The offerings which, by the Mosaic law, were to be given to the Levites, were by the pious of the kingdom of Israel brought to the schools of the prophets (2 Kings iv. 42). The prophets of the kingdom of Israel stood in a hostile position to the priests. These points of difference in the situation of the prophets of the two kingdoms must not be lost sight of; and we further add, that prophecy in the kingdom of Israel was much more connected with extraordinary events than in the kingdom of Judah: the history of the latter offers no prophetical deeds equalling those of Elijah and Elisha. Prophecy in the kingdom of Israel not being grounded on a hierarchy venerable for its antiquity, consecrated by divine miracles, and constantly favoured with divine protection, it needed to be supported more powerfully, and to be legitimized more evidently. In conclusion, it may be observed, that the expression 'schools of the prophets' is not exactly suited to their nature, as general instruction was not their object. The so-called prophets' schools were associations of men endowed with the spirit of God, for the purpose of carrying on their work, the feeble powers of junior members being directed and strengthened by those of a higher class. To those who entered these unions the Divine Spirit had been already imparted, which was the imperative condition of their reception.

IV. *Symbolic Actions of the Prophets.*—In the midst of the prophetic declarations symbolic actions are often mentioned, which the prophets had to perform. The opinions of interpreters on these are divided. Some assert that they always, at least generally, were really done; others assert that they had existence only in the mind of the prophets, and formed part of their visions. The latter view, which was espoused by Calvin, is proved to be correct by a considerable number of such symbolic actions as are either impossible, or inconsistent with decorum. Thus Hosea relates (i. 2-11) of himself 'that the Lord had ordered him to take a wife of whoredoms, for the land had committed great whoredom, de-

parting from the Lord;' and that he then had taken Gomer, by whom he had several children. That this is not to be taken as a real fact, is proved by Hengstenberg's (*Christologie*, vol. iii.); where it is shown that the prophet intended only symbolically to depict the idolatrous disposition of his nation. Another symbolic action of Jeremiah prefigures the people's destruction. He says (xiii. 1-10) he had been by the Lord directed to get a linen girdle, to put it on his loins, to undertake a long tour to the Euphrates, and to hide the girdle there in a hole of the rock. He does so, returns, and after many days the Lord again orders him to take the girdle from the place where it was hidden, but 'the girdle was marred and good for nothing.' In predicting the destruction of Babylon and a general war (xxv. 12-38), he receives from the Lord a wine-cup, to cause a number of kings of various nations, among whom the sword would be sent, to drink from it till they should be overcome. He then goes with this cup to the kings of Egypt, Arabia, Persia, Media, and many other countries. When the prophet Ezekiel receives his commission and instructions to prophesy against the rebellious people of Israel, a roll of a book is presented to him, which he eats by the direction of the Lord (Ezek. ii. 9; iii. 2, 3). He is next ordered to lie before the city of Jerusalem on his left side three hundred and ninety days; and when he had accomplished them, on his right side forty days. He must not turn from one side to the other, and he is ordered to bake with dung of man the bread which he eats during this time (Ezek. iv. 4, 8, 12). Isaiah is ordered to walk naked and barefoot, for a sign upon Egypt and Ethiopia (Isa. xx. 2, 3). Many other passages of this kind might be adduced from the books of the prophets, which compel us to admit that they state internal, not external facts. This may also further be supported by other reasons. In the records of the prophets, their seeing the Lord, hearing him speak, and addressing him, are, no doubt, inward acts. Why, then, not likewise their symbolic representations? The world in which the prophets moved was quite different from the ordinary one; it was not the sensible, but the spiritual world. Vision and symbolic action are not opposed; the former is the general class, comprehending the latter as a species. We must, however, not refer all symbolic actions to internal intuition; at least, of a false prophet we have a sure example of an externally performed symbolic action (1 Kings xxii. 11), and the false prophets always aped the true ones (comp. Jer. xix. 1, sq.). Inward actions were sometimes, when it was possible and proper, materialized by external performance; they are always at the bottom, and form the regular, natural explanation of the symbolic actions of the prophets. To attain the intended object, external performance was not always required; the internal action was narrated, and committed to writing. It made a naked statement more intuitive and impressive, and by presenting the subject in a concentrated form, it was preferable to external performance, which could only take place when the sphere of internal action was circumscribed, and did not extend over long periods of time.

V. *Criteria by which True and False Prophets were distinguished.*—As Moses had foretold, a host of false prophets arose in later times among the people, who promised prosperity without repentance, and preached the Gospel without the law. The writings of the prophets are full of complaints of the mischief done by these impostors. Jeremiah significantly calls them 'prophets of the deceit of their own heart;' *i. e.* men who followed the suggestions of their own fancy in prophesying (Jer. xxiii. 26; comp. ver. 16, and ch. xiv. 14). All their practices prove the great influence which true prophetism had acquired among the people of Israel. But how were the people to distinguish true and false prophets? In the law concerning prophets (Deut. xviii. 20; comp. xiii. 7-9), the following enactments are contained.

1. The prophet *who speaks in the name of other Gods—i. e.* professes to have his revelations from a God different from Jehovah—is to be considered as false, and to be punished capitally; and this even though his predictions should come to pass.

2. The same punishment is to be inflicted on him who speaks in the name of the true God, but *whose predictions are not accomplished.*

These enactments established a peculiar right of the prophets. He who prophesied in the name of the true God, was, even when he foretold calamity, entitled to be tolerated, until it happened that a prediction of his failed of accomplishment. He might then be imprisoned, but could not be put to death, as instanced in Jeremiah (xxvi. 8-16), who is apprehended and arraigned, but acquitted: 'Then said the princes and the people unto the priests and the prophets, This man is not worthy to die, for he has spoken to us in the name of the Lord our God.' Ahab is by false prophets encouraged to attack Ramoth-gilead, but Micaiah prophesied him no good; on which the king becomes angry, and orders the prophet to be confined (1 Kings xxii. 1-27): 'Take Micaiah and put him in prison, and feed him with bread of affliction, and with water of affliction, until I come in peace.' Micaiah answers (ver. 28), 'If thou return at all in peace, the Lord has not spoken by me.' Until the safe return of the king, Micaiah is to remain in prison; after that, he shall be put to death. The prophet agrees to it, and the king goes up to Ramoth-gilead, but is slain in the battle.

3. From the above two criteria of a true prophet, flows the third, that *his addresses must be in strict accordance with the law.* Whoever departs from it cannot be a true prophet, for it is impossible that the Lord should contradict himself.

4. In the above is also founded the fourth criterion, that *a true prophet must not promise prosperity without repentance;* and that he is a false prophet, 'of the deceit of his own heart,' who does not reprove the sins of the people, and who does not inculcate on them the doctrines of divine justice and retribution.

In addition to these negative criteria, there were positive ones to procure authority to true prophets. First of all, it must be assumed that the prophets themselves received, along with the divine revelations, assurance that these were really divine. Any true communion with the Holy Spirit affords the assurance of its divine nature; and the prophets could, therefore, satisfy *themselves* of their divine mission. There was nothing

to mislead and delude them in this respect, for temporal goods were not bestowed upon them with the gift of prophesying. Their own native disposition was often much averse to this calling, and could be only conquered by the Lord forcibly impelling them, as appears from Jer. xx. 8, 9: 'Since I spake, the word of the Lord was made a reproach unto me, and a derision daily. Then I said, I will not make mention of him, nor speak any more in his name: but his word was in mine heart as a burning fire shut up in my bones, and I was weary with forbearing, and I could not stay.' Now, when the prophets themselves were convinced of their divine mission, they could in various ways prove it to others, whom they were called on to enlighten.

(*a.*) To those who had any sense of truth, the Spirit of God gave evidence that the prophecies were divinely inspired. This *testimonium spiritus sancti* is the chief argument for the reality of a divine revelation, and he who is susceptible of it does not, indeed, disregard the other proofs suiting the wants of unimproved minds, but lays less stress on them.

(*b.*) The prophets themselves utter their firm conviction that they act and speak by divine authority, not of their own accord; (comp. the often recurring phrase נאם יהוה, Jer. xxvi. 12, &c.) Their pious life bore testimony to their being worthy of a nearer communion with God, and defended them from the suspicion of intentional deception; their sobriety of mind distinguished them from all fanatics, and defended them from the suspicion of self-delusion; their fortitude in suffering for truth proved that they had their commission from no human authority.

(*c.*) Part of the predictions of the prophets referred to proximate events, and their accomplishment was divine evidence of their divine origin. Whoever had been once favoured with such a testimonial, his authority was established for his whole life, as instanced in *Samuel*. Of him it is said (1 Sam. iii. 19): 'The Lord was with him, and let none of his words fall to the ground (*i.e.* fulfilled them); and all Israel knew (from this) that Samuel was established to be a prophet of the Lord.' Of the divine mission of Isaiah no doubt could be entertained after, for instance, his prophecies of the overthrow of Sennacherib before Jerusalem had been fulfilled. The credentials of the divine mission of Ezekiel were certified when his prediction was accomplished, that Zedekiah should be brought to Babylon, but should not see it, for the king was made prisoner and blinded (Ezek. xii. 12, 13); they were further confirmed by the fulfilment of his prediction concerning the destruction of the city (Ezek. xxiv.). Jeremiah's claims were authenticated by the fulfilment of his prediction that Shallum, the son of Josiah king of Judah, should die in his prison, and see his native country no more (Jer. xxii. 11, 12).

(*d.*) Sometimes the divine mission of the prophets was also proved by miracles, but this occurred only at important crises, when the existence of the kingdom of Israel was in jeopardy, as in the age of Elijah and Elisha. Miracles are mentioned as criteria of true prophets (Deut. xiii. 2), still with this caution, that they should not be trusted alone, but that the people should inquire whether the negative criteria were extant.

(*e.*) Those prophets whose divine commission had been sufficiently proved, bore testimony to the divine mission of others. It has been observed above, that there was a certain gradation among the prophets; the principals of the colleges of prophets procured authority to the 'sons' of prophets. Thus the deeds of Elijah and Elisha at the same time authenticated the hundreds of prophets whose superiors they were. Concerning the relation of the true prophets to each other, the passage 2 Kings ii. 9 is remarkable; Elisha says to Elijah, 'I pray thee, let a double portion of thy spirit be upon me.' Here Elisha, as the first-born of Elijah in a spiritual sense, and standing to him in the same relation as Joshua to Moses, asks for a double portion of his spiritual inheritance, alluding to the law concerning the hereditary right of the lawfully-begotten first-born son (Deut. xxi. 17). This case supposes that other prophets also of the kingdom of Israel took portions of the fulness of the spirit of Elijah. It is plain, then, that only a few prophets stood in immediate communion with God, while that of the remaining was formed by mediation. The latter were spiritually incorporated in the former, and on the ground of this relation, actions performed by Elisha, or through the instrumentality of one of his pupils, are at once ascribed to Elijah, *e. g.* the anointing of Hazael to be king over Syria (1 Kings xix. 15; comp. 2 Kings viii. 13); the anointing of Jehu to be king over Israel (1 Kings xix. 16, comp. 2 Kings ix. 1, sq.); the writing of the letter to Joram, &c. Thus in a certain sense it may be affirmed, that Elijah was in his time the only prophet of the kingdom of Israel. Similarly of Moses it is recorded, during his passage through the desert, that a portion of his spirit was conveyed to the seventy elders. The history of the Christian church itself offers analogies; look, *e. g.* at the relation of the second class reformers to Luther and Calvin.

VI. *Promulgation of the Prophetic Declarations.*—Usually the prophets promulgated their visions in public places before the congregated people. Still some portions of the prophetic books, as the entire second part of Isaiah and the description of the new temple (Ezek. xl.-xlviii.), probably were never communicated orally. In other cases the prophetic addresses first delivered orally were next, when committed to writing, revised and improved. Especially the books of the lesser prophets consist, for the greater part, not of separate predictions, independent of each other, but form, as they now are, a whole, that is, give the quintessence of the prophetic labours of their authors. In this case it is certain that the authors themselves caused the collection to be made. But it is so likewise in some cases where their books really consist of single declarations, and in others it is at least highly probable. Further particulars concerning the manner in which prophetic rolls were collected and published, we have only respecting Jeremiah, who, being in prison, called Baruch, 'to write from his mouth his predictions, and to read them in the ears of the people' (Jer. xxxviii. 4-14). There is evidence to prove that the later prophets sedulously read the writings of the earlier, and that a prophetic canon existed before the present was formed. The predictions of Jeremiah throughout rest on the writings of earlier prophets, as Kuper has established in his *Jeremias librorum sacrorum interpres atque vindex*, Ber-

lin, 1837. Zechariah explicitly alludes to writings of former prophets; 'to the words which the Lord has spoken to earlier prophets, when Jerusalem was inhabited and in prosperity' (Zech. i. 4; vii. 7, 12). In all probability we have complete those predictions which were committed to writing; at least the proofs which Dr. Ewald gives (p. 43, sq.) for his opinion, of prophecies having been lost, do not stand trial. The words 'as the Lord hath said,' in Joel ii. 32, refer to the predictions of Joel himself. In Isa. ii. and Micah iv. nothing is introduced from a lost prophetic roll, but Isaiah borrows from Micah. Hosea alludes (ch. viii. 12), not to some unknown work, but to the Pentateuch. In Isa. xv. and xvi. the prophet repeats, not another's prediction, but his own, previously delivered, to which he adds a supplement. Obadiah and Jeremiah do not avail themselves of the written address of a former prophet, but Jeremiah makes the prophecy of Obadiah the groundwork of his own. The opinion that in Isa. lvi. 10; lvii. 11, there was inserted, unaltered, a long remnant of an older roll, is founded on erroneous views respecting the time of its composition. The same holds good of Isa. xxiv., where Ewald would find remnants of several older rolls. The very circumstance, that in the prophets there nowhere occurs a tenable ground for maintaining that they referred to rolls lost and unknown to us, but that they often allude to writings which we know and possess, clearly proves that there is no reason for supposing, with Ewald, that a *great number* of prophetic compositions has been lost, 'and that of a large tree, only a few blossoms have reached our time.' In consequence of the prophets being considered as organs of God, much care was bestowed on the preservation of their publications. Ewald himself cannot refrain from observing (p. 56), 'We have in Jer. xxvi. 1-19 a clear proof of the exact knowledge which the better classes of the people had of all that had, a hundred years before, happened to a prophet, of his words, misfortunes, and accidents.'

The collectors of the Canon arranged the prophets chronologically, but considered the whole of the twelve lesser prophets as one work, which they placed after Jeremiah and Ezekiel, inasmuch as the three last lesser prophets lived later than they. Daniel was placed in the Hagiographa, because he had not filled the prophetic office. The collection of the lesser prophets themselves was again chronologically disposed; still Hosea is, on account of the extent of his work, allowed precedence before those lesser prophets, who, generally, were his contemporaries, and also before those who flourished at a somewhat earlier period.

On the general subject of prophecy no comprehensive or altogether satisfactory treatise has yet been produced. Some good remarks will be found in the essay of John Smith, *On Prophecy* (*Select Discourses*, disc. vi. p. 181, 8vo. ed. Lond. 1821), which was translated into Latin and reprinted at the end of Le Clerc's *Commentary on the Prophets*, Amsterdam, 1731. It contains interesting passages on the nature of the predictions in the Old Testament, extracted from Jewish authors, of whom Maimonides is the most distinguished. Of less importance is the essay of Hermann Witsius, *De Prophetia et Prophetis*, in vol. i. of his *Miscellan. Sacra*, Utrecht, 1692, pp. 1-392: he digresses too much and needlessly from the main question, and says little applicable to the point; but he still supplies some useful materials. The same remark also applies in substance to Knibbe's *History of the Prophets*. Some valuable remarks, but much more that is arbitrary and untenable, will be found in Crusius's *Hypomnemata ad Theologiam Prophet.*, 3 vols. Lips. 1764. In the *Treatise on Prophecy*, inserted by Jahn in his *Introduction to the Old Testament*, he endeavours to refute the views of the Rationalists, but does not sift the subject to the bottom. Kleuker's work *De Nexu Proph. inter utrumque Fœdus*, possesses more of a genuine theological character. The leader of the Rationalists is Eichhorn, in his *Introduction to the Old Testament*, and in his dissertation, *De Prophet. Poes. Hebr.* Their views on this subject are most fully explained by Knobel, in his *Prophetismus der Hebræer vollständig dargestellt*, Breslau, 1837, 2 vols.: the work contains, however, little original research, and is valuable only as a compilation of what the Rationalists assert concerning prophecy. The work of Köster, *Die Propheten des A. und N. T.*, Leipzig, 1838, bears a higher character: on many points he approaches to sounder views; but he is inconsistent and wavering, and therefore cannot be said to have essentially advanced the knowledge of this subject. Of considerable eminence is the treatise by Ewald on prophecy, which precedes his work on the prophets, published in 1840 at Stuttgart. But to the important question, whether the prophets enjoyed supernatural assistance or not? an explicit answer will here be sought for in vain. His view of the subject is in the main that of the Rationalists, though he endeavours to veil it: the Spirit of God influencing the prophets is in fact only their own mind worked up by circumstances; their enthusiasm and ecstacy are made to explain all. Finally, the work of Hoffmann, *Weissagung und Erfüllung im A. und N. T.*, Nördlingen, 1841, vol. i., is chargeable with spurious and affected originality: his views are often in their very details forced and strained; and it is to be regretted that the subject has by this work gained less than from the author's talent might have been expected.

English works on Prophecy, besides those of Smith and Knibbe above mentioned:—Sherlock, *Discourses on the Use and Intent of Prophecy*, 8vo. 1755; Hurd, *Introd. to the Study of the Prophecies*, &c. 8vo. 1772; Apthorp, *Discourses on Prophecy*, 2 vols. 8vo. 1786; Davison, *Discourses on Prophecy, in which are considered its Structure, Use, and Inspiration*, 8vo. 1824; Smith (J. Pye), *Principles of Interpretation as applied to the Prophecies of Holy Scripture*, 8vo. 1829; Brooks, *Elements of Prophetical Interpretation*, 12mo. 1837; Horne, *Introduction*, vol. ii. p. 534; iv. p. 140; Alexander, *Connection of the Old and New Testaments*, Lect. iv.-vii. pp. 168-382, 8vo. 1841.—E. W. H.

PROSELYTE (προσήλυτος), the name applied in the New Testament and the Septuagint to converts from heathenism to Judaism (προσήλυτος· οἱ ἐξ ἐθνῶν προσεληλυθότες καὶ κατὰ τοὺς θείους πολιτευόμενοι νόμους, Suidas, *in voc.*). In the Old Testament such persons are called גרים, *strangers*, *advenæ*, and תשבים, *settlers*, *incolæ*. For the reception and treatment of these, provision was made in the law of Moses (Exod. xii. 48; Lev.

xvii. 8; Num. xv. 15, &c.); and the whole Jewish state was considered as composed of the two classes, Jews, and strangers within their gates, or proselytes. In later years this distinction was observed even to the second generation; a child of pure Jewish descent on both sides being designated עברי בן עברי, Ἑβραῖος ἐξ Ἑβραίων (Phil. iii. 5), whilst the son of a proselyte was denominated בן־גר; and if both parents were proselytes he was styled by the Rabbins, בגבן, a contraction for בן־גר ובן־גרה (*Pirke Avoth*, cap. 5).

It has been customary to make a distinction between two classes of Jewish proselytes, the one denominated proselytes of the gate, and the other proselytes of the covenant, or of righteousness. Under the former have been included those converts from heathenism who had so far renounced idolatry as to become worshippers of the one God, and to observe, generally, what have been called the seven Noachic precepts, viz., against idolatry, profanity, incest, murder, dishonesty, eating blood, or things strangled, and allowing a murderer to live, but had not formally enrolled themselves in the Jewish state. The latter is composed of those who had submitted to circumcision, and in all respects become converts to Judaism. The accuracy of this distinction, however, has been called in question by several, especially by Lardner, whose arguments appear decisive of the question (*Works*, vol. vi. pp. 522-533; vol. xi. pp. 313-324, 8vo. edit. 1788). That there were, in later times especially, many among the Jews who had renounced the grosser parts of heathenism without having come over entirely to Judaism, is beyond all doubt; but that these were ever counted *proselytes* admits of question. Certain it is that the proselytes mentioned in the New Testament were all persons who had received circumcision, and entered the pale of the Jewish community; they were persons who, according to the phraseology of the Old Testament, had become Jews (מתיהדים, Esth. viii. 17; Lardner, *loc. cit.*). It is probable that the distinction above mentioned was introduced by the later Rabbins for the sake of including among the conquests of their religion those who, though indebted probably to the Jewish Scriptures for their improved faith, were yet not inclined to submit to the ritual of Judaism, or to become incorporated with the Jewish nation. That this, however, was not the ancient view is clearly apparent from a passage in the Babylonian Gemara, quoted by Lightfoot (*Hor. Heb. et Talm. in Matt.* iii. 6), where it is said expressly that 'No one is a proselyte until such time as he has been circumcised.' Fürst, himself a Jew, confirms our suggestion; for in a note upon the word גר, in his *Concordantiæ Libb. V. T.*, he says: 'Judæi, interpretatione magis *dogmatica* quam *historica*, de eo interpretantur qui superstitiones barbaras repudiavit.'

The rites by which a proselyte was initiated are declared by the Rabbins to have been, in the case of a man, three, viz., *circumcision*, *baptism*, and a *free-will sacrifice* (במילה ובטבילה ובהוצאת דמים של קרבן); in the case of a woman the first was of necessity omitted. As to the first and last of these, their claim to be regarded as accordant with the ancient practice of the Jews has been on all hands admitted without scruple; but it has been matter of keen question whether the second can be admitted to have been practised before the Christian era. The substance of much learned discussion on this head we shall attempt summarily to state.

There is no *direct* evidence that this rite was practised by the Jews before the second or third century of the Christian era; but the fact that it was practised by them then necessitates the inquiry: when and how did such a custom arise among them? That they borrowed it from the Christians is an opinion which, though supported by De Wette (in his Treatise *De Morte Christi expiatoriâ*), cannot be for a moment admitted by any who reflect on the implacable hatred with which the Jews for many centuries regarded Christianity, its ordinances, and its professors. Laying aside this view, there are only two others which have been suggested. The one is that proselyte baptism was practised among the Jews from a period long anterior to the birth of Christ; the other is that the custom of baptizing proselytes arose gradually out of the habit which the Jews had of purifying by ablution whatever they deemed unclean, and came to be raised for the first time to the importance of an initiatory ordinance after the destruction of the temple service, and when, in consequence of imperial edicts, it became difficult to circumcise converts. This latter opinion is that of Schneckenburger (*Ueb. das Alter d. Jüd. Proselytentaufe*, Berlin, 1828), and has been espoused by several eminent German scholars. To us, however, it appears exceedingly unsatisfactory. The single fact adduced in support of it, viz., the difficulty of circumcising converts in consequence of the imperial edicts against proselytism is a singularly infelicitous piece of evidence; for, as the question to be solved is: how came the later Rabbins to prescribe *both* baptism and circumcision as initiatory rites for proselytes?—it is manifestly absurd to reply that it was, because they could only baptize and could not circumcise: such an answer is a contradiction, not a solution of the question. Besides, this hypothesis suggests a source of proselyte baptism which is equally available for that which it is designed to supersede; for, if the practice of baptizing proselytes on their introduction into Judaism had its rise in the Jewish habit of ablution, why might not this have operated in the way suggested, two hundred years before Christ, as well as two hundred years after Christ? And in fine, this hypothesis still leaves unremoved the master difficulty of that side of the question which it is designed to support, viz., the great improbability of the Jews adopting for the first time subsequently to the death of Christ, a religious rite which was well known to be the initiatory rite of Christianity. Assuming that they practised that rite before, we can account for their not giving it up simply because the Christians had adopted it; but, trace it as we please to Jewish customs and rites, it seems utterly incredible that *after* it had become the symbol and badge of the religious party which of all others, perhaps, the Jews most bitterly hated, any consideration whatever should have induced them to *begin* to practise it. On the other hand we have, in favour of the hypothesis that proselyte baptism was practised anterior to the time of our Lord, some strongly corroborative evidence. We have, in the first place, the unanimous tradition of the Jewish Rabbins, who impute

to the practice an antiquity commensurate almost with that of their nation. 2dly. We have the fact that the baptism of John the Baptist was not regarded by the people as aught of a novelty, nor was represented by him as resting for its authority upon any special divine revelation. 3dly. We have the fact that the Pharisees looked upon the baptism both of John and Jesus as a mode of proselyting men to their religious views (John iv. 1-3), and that the dispute between the Jews and some of John's disciples about purifying was apparently a dispute as to the competing claims of John and Jesus to make proselytes (John iii. 25 sq.). 4thly. We have the fact, that on the day of Pentecost Peter addressed to a multitude of persons collected from several different and distant countries, Jews and proselytes, an exhortation to 'Repent and be baptized' (Acts ii. 38), from which it may be fairly inferred that they all knew what baptism meant, and also its connection with repentance or a change of religious views. 5thly. We have the fact, that according to Josephus, the Essenes were in the habit, before admitting a new convert into their society, solemnly and ritually to purify him with waters of cleansing (*De Bell. Jud.* ii. 8. 7), a statement which cannot be understood of their ordinary ablutions before meals (as Mr. Stuart proposes in his *Essay on the Mode of Baptism*, p. 67); for Josephus expressly adds, that even after this lustration two years had to elapse before the neophyte enjoyed the privilege of living with the Proficients. And, 6thly. We have the mode in which Josephus speaks of the baptism of John, when, after referring to John's having exhorted the people to virtue, righteousness, and godliness, as preparatory to baptism, he adds, 'For it appeared to him that baptism was admissible not when they used it for obtaining forgiveness of some sins, but for the purification of the body when the soul had been already cleansed by righteousness' (*Antiq.* xviii. 5. 2); which seems to indicate the conviction of the historian that John did not *introduce* this rite, but only gave to it a peculiar meaning. A passage has also been cited from Arrian's *Discourses of Epictetus* (ii. 9), in which, after stating that some who called themselves Jews yet played a double part, he adds, 'But if any one assume the condition (or endure the suffering, ἀναλάβῃ τὸ πάθος) of one who has been baptized and convicted (ᾑρημένου, instead of which some have conjectured that περιῃρημένου, *circumcised*, is the true reading), then is he indeed a Jew, and is called such.' Were one sure that in this passage Arrian did not confound Jews with Christians, his testimony would be of great value in regard to the antiquity of Jewish baptism; but the doubt attaching to this point, and the general obscurity of the passage (which we have translated somewhat differently from the usual rendering, but as the words seem to us to require), make it unsafe to lay much stress upon it.

On these grounds we adhere to the opinion that proselyte baptism was known as a Jewish rite anterior to the birth of Christ. The reader will find the whole subject amply discussed in the following works: Selden, *De Jure Nat. et Gent.* ii. 2; Otho, *Lex. Rab.* p. 65; Lightfoot, *Hor. Heb. et Talm. in Matt.* iii. 6; Danz in Meuschenii *Nov. Test. ex Talm. Illust.* p. 233 sq., 287 sq.; Witsius, *Oecon. Foed.* iv. 15; Kuinoel, *Comm. in Libros N. T. Histor. ap. Matt.* iii. 6; and Dr. Halley's recent volume on the *Sacraments*, Lond. 1844, p. 114 ff., all of whom contend for the antiquity of Jewish proselyte baptism, whilst the following take the opposite side: Wernsdorff, *Controv. de Bapt. Recent.* § 18; Carpzov, *Apparat.* p. 47 sq.; Paulus, *Comment.* i. 279; Bauer, *Gottesdienst. Verfassung der Alten Heb.* ii. 392; Schneckenburger, *Lib. sup. cit.*; and Moses Stuart, *do.* (*American Bib. Rep.* No. X.).

From the time of the Maccabees the desire to make proselytes prevailed among the Jews to a very great extent, especially on the part of the Pharisees, whose intemperate zeal for this object our Lord pointedly rebuked (Matt. xxiii. 15). The greater part of their converts were females, which has been ascribed to the dislike of the males to submit to circumcision. Josephus tells us that the Jews at Antioch were continually converting great numbers of the Greeks (*De Bell. Jud.* vii. 3. 3), and that nearly all the women at Damascus were attached to Judaism (*Ibid.* ii. 20. 2; comp. *Antiq.* xvii. 11; xx. 2; *De Bell. Jud.* 2. 18, &c.; Tacit. *Hist.* 5. 5; Dion Cass. 37. p. 21).

On the subject of this article generally, besides the works of Carpzov, Bauer, and Otho, already referred to, the reader may consult Jahn, *Archaeologie*, iii. 215 ff.; Leusden, *Phil. Hebr. Mixt.* p. 142 sq.; Alting, *Diss. de Proselytis*, Thes. 27 sq.; Horne's *Introduction*, vol. iii. p. 265 ff.—W. L. A.

PROSEUCHA (προσευχή), a word signifying 'prayer,' and always so translated in the Auth. Version. It is, however, applied, *per meton.*, to a place of prayer,—a place where assemblies for prayer were held, whether a building or not. In this sense it seems also to be mentioned in Luke vi. 12, where it is said that our Saviour went up into a mountain to pray, and continued all night ἐν τῇ προσευχῇ τοῦ Θεοῦ, which can hardly bear the sense our translators have put upon it, 'in prayer to God.' This is admitted by Whitby and others, who infer, from the use of parallel phrases, such as 'the mount of God,' 'the bread of God,' 'the altar of God,' 'the lamp of God,' &c., which were all things consecrated or appropriated to the service of God, that the phrase προσευχῇ τοῦ Θεοῦ might here signify 'an oratory of God,' or a place that was devoted to his service, especially for prayer. In the same sense the phrase must, still more certainly, be understood in Acts xvi. 13, where we are informed that Paul and his companions, on the sabbath day, went out of the city, by the river side, οὗ ἐνομίζετο προσευχὴ εἶναι, which the Auth. Vers. renders 'where prayer was wont to be made.' But the Syriac here has, 'because there was perceived to be *a house of prayer*;' and the Arabic, 'a certain place which was supposed to be *a place of prayer*.' In both these versions due stress is laid upon οὗ ἐνομίζετο, where there was taken, or supposed to be; or where, according to received custom, there was; or where there was allowed by law,—a proseucha, or oratory; and where, therefore, they expected to meet an assembly of people. Bos contends (*Exercit. Philol.* in loc.), however, that the word ἐνομίζετο is redundant, and that the passage ought

simply to be, 'where there was a proseucha;' but in this he is ably opposed by Elsner (*Observ. Sacr.* in loc.).

That there really were such places of devotion among the Jews is unquestionable. They were mostly outside those towns in which there were no synagogues, because the laws or their administrators would not admit any. This was, perhaps, particularly the case in Roman cities and colonies (and Philippi, where this circumstance occurred, was a colony); for Juvenal (*Sat.* iii. 296) speaks of proseuchæ, not synagogues, at Rome:

'Ede, ubi consistas; in qua te quæro prosucha!'

They appear to have been usually situated near a river, or the sea-shore, for the convenience of ablution (Joseph. *Antiq.* xiv. 10, 23). Josephus repeatedly mentions proseuchæ in his Life, and speaks of the people being gathered εἰς τὴν προσευχήν (*Vita*, § 44, 46). Sometimes the proseucha was a large building, as that at Tiberias (*l. c.* § 54), so that the name was sometimes applied even to synagogues (Vitringa, *Synag. Vet.* p. 119). Proseuchæ are frequently mentioned as buildings by Philo, particularly in his oration against Flaccus, where he complains that the προσευχαί of the Jews were pulled down, and that no place was left them in which to worship God and pray for Cæsar (Philo, *in Flacc. Opera*, p. 752). But, for the most part, the proseuchæ appear to have been places in the open air, in a grove, or in shrubberies, or even under a tree, although always, as we may presume, near water, for the convenience of those ablutions which with the Jews always preceded prayer, as, indeed, they did among the pagans, and as they do among the Moslems at the present day. The usages of the latter exhibit something answering to the Jewish proseuchæ, in the shape of small oratories, with a niche indicating the direction of Mecca, which is often seen in Moslem countries by the side of a spring, a reservoir, or a large water-jar, which is daily replenished for the use of travellers (Whitby, De Dieu, Wetstein, Kuinoel, on Acts xvi. 13; Jennings's *Jewish Antiquities*, pp. 379-382; Prideaux's *Connection*, ii. 556).

PROVERBS, THE BOOK OF. That Solomon was the author of the Book of Proverbs has never been questioned. Some have indeed thought that he composed a part only of the Proverbs included in that book, and collected the others from various sources. It is probable, indeed, that he availed himself of any sayings already current which he regarded as useful and important. Whether he ever made any *collection* of his proverbs in writing is, however, doubtful. From the twenty-fifth chapter to the end, we are expressly informed, was written out and added to the previous portion, by order of King Hezekiah. The divine authority of the book is sufficiently proved by the quotations made from it in the New Testament (Rom. xii. 16; Heb. xii. 5, 6; 1 Pet. iv. 8; 1 Thess. v. 15). Each of the books attributed to Solomon is *sui generis*, both as to matter and manner. In reference to the remarkable poem called 'The Song of Solomon,' this is evident at a glance. Ecclesiastes, abounding in seeming contradictions, proposing the most startling paradoxes, and holding alternately the language of the Epicurean and the Stoic, has proved scarcely less a stone of stumbling to the commentators. The book of Proverbs, if less obscure than these two, is not less strikingly marked by peculiarities of form and diction, and not less worthy of attentive study.

It has in all ages, indeed, been regarded as a great storehouse of practical wisdom. The early fathers were accustomed to call it παν̀άρκετος σοφία. Modern writers have been equally filled with admiration of the profound knowledge of human nature displayed in it, its accurate delineations of character, and the wonderful richness and appropriateness of its instructions. 'Truly,' says one of the most eminent men of our age, 'in all points of prudence, public and private, we may accommodate to the Royal Preacher his own words (Eccles. ii. 12), *What can the man say that cometh after the king? Even that which hath been said already.*'

The Hebrew word rendered *proverb*, מֹשָׁל *maushal*, is derived from a root which means, 1. *to resemble, to compare;* 2. *to rule;* and signifies primarily *a similitude* or *comparison* of two objects. Many of the proverbs of Solomon are of this nature, *e. g.* x. 26; xxv. 11, 12, 13, 14, 18, 19, 20, 25, 26, 28. Hence the meaning of the word may have been gradually extended so as to embrace any apophthegm or brief pithy saying. Or we may consider this meaning to have been derived from the other signification of מֹשָׁל, viz., *to rule;* whence *authoritative maxims.* The idea of *resemblance*, however, seems to be the prominent one, and may refer to the figurative style common in proverbs, even when no direct comparison is instituted. And as highly figurative language belongs to poetry, it came to pass that *maushal* was used to indicate any composition expressed in a highly ornamented and poetic style. Thus the prophecy of Balaam is called *maushal* (Num. xxiii. 7).

The characteristics of the proverbial style (in the more restricted sense of the word) are, according to Bishop Lowth, 1. Brevity; 2. Obscurity; 3. Elegance. The first of these is, however, the only one that can be considered at all universal. Many of the Proverbs of Solomon can hardly lay claim to elegance, according to the most liberal application of the term, and comparatively few of them are at all obscure as to meaning. The same remark applies with even greater force to the proverbs of every day life, *e. g. Time and tide wait for no man. Haste makes waste. We must make hay while the sun shines. A fool and his money are soon parted.* We should be rather inclined to name, as a characteristic of the proverb, a *pointed* and sometimes *antithetical* form of expression; and this, in addition to *brevity* or *sententiousness*, constitutes perhaps the only universal distinction of this species of composition. Conciseness indeed enters into the very essence of the proverb; and this fact is probably indicated by the word itself; *proverbia, for*, or *instead of words, i. e.* one word for many.

We were about to adduce examples from the book of Proverbs, of these two excellencies—sententiousness and point—but it is impossible to select, where almost every verse is an illustration. Nor should it be forgotten that the structure of the Hebrew language admits of a much higher degree of excellence in this particular than is

possible in the English tongue. We give two examples taken at random. '*A man's heart deviseth his way: but the Lord directeth his steps.*' Here are twelve words; in the original seven only are employed. '*When a man's ways please the Lord, he maketh even his enemies to be at peace with him.*' Eighteen words; in the Hebrew eight.

From what has been said of the characteristics of the proverbial or parabolic style, it is obvious that it possesses peculiar advantages as a medium of communicating truth. The proverb once heard remains fixed in the memory. Its brevity, its appositeness, its epigrammatic point, often aided by antithesis or paronomasia, not only ensure its remembrance, but very probably its recurrence to the mind at the very time when its warning voice may be needed. It utters in a tone of friendly admonition, of gentle remonstrance, of stern reproof, or of vehement denunciation, its wholesome lesson in the ear of the tried, the tempted, and the guilty. Such words are emphatically 'as goods and as nails fastened in a sure place.'

Another reason why the mode of conveying truth by apophthegms is peculiarly fitted to impress the mind, is the same which explains the fact, that mere outline sketches, executed with grace and spirit (Retzsch's for instance), please more than finished and elaborate drawings, viz., they leave more to the imagination. No man likes to have everything done for him. The exercise of the imagination, kindled by the lips or the pencil of genius, creates a far higher pleasure than arises from merely beholding what another has wrought. It is because the proverb exerts this awakening effect on the mind, because it suggests more than it expresses, that it pleases.

The same effect is produced by the obscurity observable in some proverbs; an obscurity consequent in part on their sententiousness, and in part on their figurative dress. It is true that obscurity may become a source of annoyance instead of pleasure; but this is only when it exists in such a degree as to baffle the efforts made to dispel it. When the difficulty is one which a slight exertion of thought and ingenuity is sufficient to surmount, it attracts rather than repels.

The advantages above specified apply to the proverbial mode of writing in any age and among any people. But Solomon must have had other reasons for selecting it, peculiar to the age and country in which he lived. The Hebrews have been called a nation of children. The mode of teaching by aphorisms is especially adapted to men in an early stage of culture, who have not yet learned to arrange and connect their various *knowledges* into a system. The deductions of their experience lie in their minds in the form of detached and disconnected maxims. Not being able to trace the philosophical connection between different facts, and caring not to investigate causes, they are more impressed by the bold assertion, the energetic command, or the brief warning, than by amplified and elaborate discourses. Accordingly we find this mode of writing employed in the most remote ages; and *wise sayings*, maxims, apophthegms, constitute a large part of the early literature of most nations. Especially is this true of the Oriental nations. The fondness of the people of the East for parables, enigmas, allegories, and pithy sayings, has itself become a proverb. It is recorded as a proof of the wisdom of Solomon, that 'he spoke three thousand proverbs' (1 Kings iv. 32); and Solomon himself says, that in his time, such sayings formed the chief study of the learned. A wise man will seek

'To understand a proverb and the interpretation;
The words of the wise and their dark sayings.'

Recent travellers in the East assure us that this reverence for proverbs still exists there; and that nothing gives a man so much advantage in an argument as the ability to quote one of them on his side. We may therefore conclude that the wise king could have found no better mode of impressing truth on the minds of his countrymen than the one he has here chosen.

Let us examine more particularly the style and contents of the book. As to its style we find it to be marked by those characteristics which distinguish the *poetry* of the Hebrews from their prose compositions. Of these, one of the most obvious and important is what, since Bishop Lowth's day, has been termed *Parallelism*. This consists in a certain resemblance or correspondence, either as to thought or form, or both, between the members of a period. The two most simple kinds of parallelism, and the only two we shall notice here, are when the period contains but two members, and the last either repeats the thought contained in the first, or presents an antithetical assertion, beginning generally with the adversative *but*. The first kind of parallelism is called by Lowth *synonymous*, the second *antithetic*. The following passage is a beautiful example of Synonymous Parallelism:—

'My son, if thou wilt receive my words,
And hide my commandments with thee;
So that thou incline thine ear to wisdom,
And apply thy heart to understanding;
Yea, if thou criest after knowledge,
And liftest up the voice for understanding;
If thou seekest her as silver,
And searchest for her as for hid treasures;
Then shalt thou understand the fear of the Lord,
And find the knowledge of God.'
Prov. ii. 1-5.

As an instance of Antithetic Parallelism, take these verses.

'The fear of the Lord prolongeth days;
But the years of the wicked shall be shortened.
The hope of the righteous shall be gladness;
But the expectation of the wicked shall perish.
The way of the Lord is strength to the upright;
But destruction shall be to the workers of iniquity.' Prov. x. 27-29.

It will be perceived that there is a continuity in the former of these passages, which does not belong to the latter. In fact the first nine chapters of the book of Proverbs are remarkably distinguished from the remainder, and constitute a sort of proem or exordium to the work. This portion was probably committed to writing, while the disconnected aphorisms which compose the greater part of the remaining portion were only *uttered*. It is a continuous discourse, written in the highest style of poetry, adorned with apt and beautiful illustrations, and with various and striking figures. The personification of Wisdom

in these chapters is universally regarded as one of the most beautiful examples of Prosopopeia to be found in the Bible, and possesses an indescribable grace and majesty. What can be finer than the passage (ch. viii. 22-31), where many eminent critics are of opinion that the Son of God is to be understood as speaking. In the next chapter the word Wisdom has a feminine termination; and Wisdom and Folly are personified as females. The contrast between their respective pretensions and invitations may be made more evident than it is in our version by arranging the passages in apposition to each other.

Wisdom hath builded her house,
She hath hewn out her seven pillars,
She hath killed her beasts,
She hath mingled her wine,
She hath also furnished her table,
She hath sent forth her maidens,
She crieth upon the highest places of the city;
'Whoso is simple let him turn in hither.'

To him who wanteth understanding she saith:

'Come, eat of my bread;
And drink of the wine I have mingled.
Forsake the foolish and live;
And go in the way of understanding;
For by me thy days shall be multiplied,
And the years of thy life shall be increased.'
Folly is clamorous;
She is simple and knoweth nothing.
She sitteth at the door of her house,
On a seat in the high places of the city,
To call passengers who go right on their ways;
'Whoso is simple let him turn in hither.'

To him who wanteth understanding she saith:

'Stolen waters are sweet,
And bread eaten in secret is pleasant.'
But he knoweth not that the dead are there,
And that her guests are in the depths of the grave.

At the tenth chapter a different style commences. From ch. x. to ch. xxii. 17. is a series of pithy disconnected maxims, on various subjects, and applicable to the most diverse situation. From ch. xxii. 17 to ch. xxv. a style resembling that of the exordium, though inferior in elegance and sublimity, prevails; and at the twenty-fifth chapter the separate maxims recommence. These compose the remainder of the book, with the exception of the thirtieth chapter, which is ascribed to Agur, and the thirty-first, which is said to be the advice given to king Lemuel by his mother. Who these persons are is not known. The supposition that Lemuel is another name of Solomon does not appear to be supported by proof.

The thirtieth chapter affords an example of another species of writing, closely allied to the proverb, and equally in favour among the Orientals. It is that of riddles or enigmas, designed to exercise the wit and ingenuity of the hearer, and to impart instruction through the medium of amusement. Of this kind is the riddle proposed by Samson (Judg. xiv. 12-18). The seventeenth chapter of Ezekiel contains a very beautiful riddle or parable, in which the king of Babylon is spoken of under the figure of a great eagle with spreading wings. Many of the symbolical acts enjoined by God upon the prophets, which perhaps appear to modern readers of Scripture extremely childish and ridiculous, are of the same nature; and thus, however unsuited to our times, were perfectly well adapted to impress and interest the Hebrews (*e. g.* Jer. xiii. 1-11; xviii. 1-6; xxiv. 1-10). Sometimes these riddles assumed the form of a brief narration, and were called fables or parables. See the beautiful fable related by Jotham to the men of Shechem; and the touching story of the one ewe-lamb of the poor man, by which Nathan reproved David.

But to return to Agur and his riddles. The introductory verses at first view appear obscure, from the absence of any apparent connection with what follows. But the explanation given by Herder appears satisfactory. 'The sage Agur,' he says, 'is to discourse lofty sentiments to his pupils; but he begins with modesty, that too exalted wisdom may not be expected from him.' How shall he who confesses that he is not versed in human wisdom, be supposed to possess that knowledge which belongs to the holy? Wisdom for man consists in obeying 'every word of God' (ver. 5). We subjoin Herder's version of one of these riddles, with the accompanying remarks.

FOUR SMALL BUT VERY ACTIVE THINGS.

Four things are little on the earth,
But wiser than the wisest.
The ant race are a people without strength,
Yet they prepare their meat in summer;
The conies are a feeble race,
Yet build their houses in the rocks;
The locusts have no king to rule them,
Yet all of them go forth by bands;
The lizard,—one may seize it with his hand,
And yet it dwells in royal palaces.

The whole comparison was perhaps made on account of the last, where an animal of that sort (which, in warm climates, lives in the walls, and is very annoying) made its appearance; for the Orientals are fond of such conceits and involved propositions, especially in company, and they often, indeed, assemble for the purpose of enjoying them.

The concluding chapter, containing the counsels addressed to King Lemuel by his mother, needs no elucidation. It presents a beautiful picture of female excellence in an age and country where modesty, industry, submission, and the domestic and matronly virtues, were esteemed the only appropriate ornaments of woman.

If we turn our attention to the maxims which compose the greater part of the book of Proverbs, we shall find enough to excite our wonder and admiration. Here are not only the results of the profoundest human sagacity, the counsels and admonitions of the man who excelled in wisdom all who went before, and all who came after him, but of such a man writing under divine inspiration. And how numerous, how various, how profound, how important are his instructions!

These directions are adapted to the wants of every class and rank of men, and to every relation of life. The rich and the poor, the learned and the ignorant, the master and the servant, the monarch and the subject, may here find the counsels they need. 'Apples of gold in baskets of silver' are fit emblems of such prudent and wholesome counsels, clothed in such an attractive garb.

[The boundless variety of these instructions

has indeed led some authors (such as De Wette, *Introduction*, § 281), who look too much to the human sources of the Sacred Scriptures, to allege that there is much in this book too remote from the experience of Solomon for him to have been the author. The writer just cited says: 'These proverbs, judging from their number and variety, seem rather the productions of a whole nation than of a single man. Many of them relate to private and rustic life; with one of which Solomon was not sufficiently acquainted, and in the other he could not participate.' So again with reference to the introduction contained in the nine first chapters, the same writer says:—'Their didactic and admonitory tone, and their strict injunction of chastity, agree better with the character of a teacher of youth, a prophet, or priest, than a king like Solomon.' This is surely precarious reasoning; for a state life is often better described by a keen observer than by one who is actually subject to its conditions. It is, however, not necessary to contend that the whole of the Proverbs were by Solomon; and De Wette himself is constrained to admit that a large share in the composition of the Proverbs must be ascribed to the wise king, 'especially in the first part,' *i. e.* ch. i.—xxii. 16. There is, in fact, no person historically known to us from Scripture to whom, taken as a whole, they could with equal reason be ascribed, even apart from the express declarations of the book itself (ch. i. 1; x. 1; xxv. 1). In one remarkable passage of Scripture, Solomon is said to have 'uttered three thousand proverbs' (1 Kings iv. 32), a large proportion of which may be presumed to have been preserved in the present book. Indeed, it has been often supposed that this very statement has express reference to the proverbs contained in it. On the authority of this conclusion, Jerome (*Præfat. in Prov.*) erroneously states the number of the proverbs to be three thousand.

The literature of the book of Proverbs is contained chiefly in the following works (besides the preliminary dissertations in the various Commentaries): — Melanchthon, *Explicatio Provv.* 1555; Mercer, *Comment. in Provv. Salom.*; Geiero, *Provv. Salom.* 1669; Schultens, *Proverbia Salom.* 1748; Hirtz, *Vollst. Erklär. der Sprüche Salom.* 1768; Hunt, *Observations on the Book of Proverbs*, 1775; Hodgson, *On the Book of Proverbs*, 1778; Jager, *Observatt. in Provv. Salom. Versionem Alexand.* 1788; Lawson, *Exposition of Proverbs*, 1821; Umbreit, *Philol. Krit. u. Philosoph. Comm. ü. d. Sprüche Salom.* 1826. There are also translations, mostly with notes, by J. D. Michaelis, 1778; Doederlein, 1786; Streunsee, 1783; Kleuker, 1786; Reichard, 1790; Ziegler, 1791; Muntinghe, 1800, 1802; Dahler, 1810; Holden, 1819; Gramberg, 1828; Böckel, 1829; and Ewald, in his *Poetischen Bücher*, vol. iv.]—L. P. H.

PROVIDENCE. The word Providence is derived from the Latin (*providentia*, *pro-videre*), and originally meant *foresight*. The corresponding Greek word (*πρόνοια*) means *forethought*. By a well-known figure of speech, called metonymy, we use a word denoting the means by which we accomplish anything to denote the end accomplished; we exercise care over anything by means of foresight, and indicate that care by the word foresight. On the same principle the word Providence is used to signify the *care* God takes of the universe. As to its inherent nature, *it is the power which God exerts, without intermission, in and upon all the works of his hands.* In the language of the schoolmen, it is a continual creation (*creatio continua*). But defined as to its visible manifestations, it is God's preservation and government of all things. As a thing is known by its opposites, the meaning of Providence is elucidated by considering that it is opposed to fortune and fortuitous accidents.

Providence, considered in reference to all things existing, is termed by Knapp *universal;* in reference to moral beings, *special;* and in reference to holy or converted beings, *particular*. Everything is an object of Providence in proportion to its capacity. The disciples, being of more value than many sparrows, were assured of greater providential care. By Providence being universal is intended, not merely that it embraces classes of objects or greater matters, but that nothing is too minute or insignificant for its inspection. To Providence considered in this relation the term *particular* is also commonly applied.

Providence is usually divided into three divine acts, preservation, co-operation, and government. 1. By preservation is signified the causing of *existence* to continue. 2. Co-operation is the act of God which causes the *powers* of created things to remain in being. It is not pretended that the existence and the powers of things are ever separated, but only that they are distinguishable in mental analysis. Co-operation varies with the nature of the objects towards which it is exercised. 3. Government, as a branch of Providence, is God's controlling all created things so as to promote the highest good of the whole. To this end every species of being is acted upon in a way conformable to its nature; for instance, inanimate things by the laws of physical influence, brutes according to the laws of instinct, and free agents according to the laws of free agency. Moreover, as Providence has respect to the nature which God has been pleased to assign to its various objects, so, in common with every other divine act, it is characterized by divine perfections. It displays omnipresence, omniscience, omnipotence, holiness, justice, and benevolence.

It has been sometimes contended that Providence does not extend to all things, or to unimportant events, and chiefly for four reasons. Such an all-embracing Providence, it is said, would (1.) be distracting to the mind of God; or (2.) would be beneath his dignity; or (3.) would interfere with human freedom; or (4.) would render God unjust in permitting evil to exist. In reply to these objections against a Providence controlling all things without exception, it may be observed that the third and fourth suggest difficulties which press equally, in fact, upon all hypotheses, not only as to Providence, but as to creation, and which shall be more fully explained in the sequel.

As to the first objection, that the minutiæ of the creation are so multifarious as to confuse the mind of God, we are content to let it refute itself in every mind which has any just sense of the divine knowledge and wisdom. The second objection, that some things are beneath God's notice, if it be not a captious cavil, must result from pushing too far the analogy between earthly

kings and the King of kings. It is an imperfection in human potentates that they need vicegerents; let us not then attribute such a weakness to God, fancying him altogether such a one as ourselves. Again, it is to this day doubtful whether the microscope does not display the divine perfections as illustriously as the telescope; there is therefore no reason to deny a Providence over animalcula which we admit over the constellated heavens. What is it that we dare call insignificant? The least of all things may be as a seed cast into the seed-field of time, to grow there and bear fruits, which shall be multiplying when time shall be no more. We cannot always trace the connections of things—we do not ponder those we can trace—or we should tremble to call anything beneath the notice of God. It has been eloquently said that, where we see a trifle hovering unconnected in space, higher spirits can discern its fibres stretching through the whole expanse of the system of the world, and hanging on the remotest limits of the future and the past.

In reference to the third and fourth objections before mentioned, namely, that an all-embracing Providence is incompatible with divine justice and human freedom, it should be considered that, in contemplating God's Providence, the question will often arise, why was moral evil allowed to exist? But as this question meets us at every turn, and, under different forms, may be termed the one and the only difficulty in theology, it must often be considered in the progress of this work, and may therefore require the less notice in the present article. We should in all humility preface whatever we say on the permission of evil with a confession that it is an inscrutable mystery, which our faith receives, but which our reason could not prove either to be or not to be demanded by the perfections of God. But, in addition to the vindication of God's ways which may be found in the overruling of evil for good, the following theories deserve notice:—

1. *Occasionalism*, or the doctrine that God is the *immediate* cause of all men's actions. It is so called, because it maintains that men only furnish God an *occasion* for what he does. It degrades all second causes to mere occasions, and turns men into passive instruments.

2. *Mechanism*. Many, alarmed at the consequences which occasionalism would seem to involve, have embraced an opposite scheme. They criticise the definition of the laws of nature on which Emmons builds, and contend that occasionalism derives all its plausibility from adroitly availing itself of the ambiguities of language. They would have us view the creation as a species of clock, or other machine, which, being once made and wound up, will for a time perform its movements without the assistance or even presence of its maker. But such reasoners press too far the analogy between the Creator and an artisan. So excellent a man as Baxter was misled by this hypothesis, which evidently is as derogatory to God as occasionalism is fatal to the moral agency of man.

3. The authors of the third scheme respecting the mode in which Providence permits sin sought to be 'eclectics,' or to find a path intermediate between mechanism and occasionalism. In their judgment man is actuated by God, and yet is at the same time active himself. God gives men the *powers* of action, and preserves these powers every moment, but he is not the efficient cause of free actions themselves. This, they say, is involved in the very idea of a moral being, which would cease to be *moral* if it were subjected to the control of necessity, and not suffered to choose and to do what it saw to be best according to the laws of freedom. But it is asked, why did God create men free, and therefore *fallible?* It were presumption to think of answering this question adequately. It belongs to the deep things of God. But, among the possible reasons, we may mention, that if no fallible beings had been created, there could have been no virtue in the universe; for virtue implies probation, and probation a liability to temptation and sin. Again, if some beings had not become sinful, the most glorious attributes of God would never have been so fully exerted and displayed. How could his wisdom and mercy and grace have been adequately manifested, except by suffering a portion of his creatures to become such as to demand the exercise of those attributes? How else could he have wrought the miracle of educing good from evil? In this connection we may allude to the 3rd chapter of Romans, where, as in other passages, it is declared, that the good which evil may be overruled to produce, cannot palliate, much less excuse, the guilt of sinners, or of those who say, 'let us do evil that good may come.'

Among the *proofs* of divine *Providence* may be reckoned the following:—

One argument in proof of Providence is analogous to one mode of proving a *creation*. If we cannot account for the existence of the world without supposing its coming into existence, or beginning to be; no more can we account for the world *continuing* to exist, without supposing it to be *preserved;* for it is as evidently absurd to suppose any creature *prolonging* as *producing* its own being.

A *second* proof of Providence results from the admitted fact of *creation*. Whoever has made any piece of mechanism, therefore takes pains to preserve it. Parental affection moves those who have given birth to children to provide for their sustentation and education. It is both reasonable and Scriptural to contemplate God as sustaining the universe because he made it. Thus David, having premised that the world was made by God, immediately descends to the course of his Providence (Ps. xxiii. 6; comp. ver. 13). The creation also evinces a Providence by proving God's right to rule, on the admitted principle that every one may do what he will with his own.

A *third* proof of Providence is found in the *divine perfections*. Since, among the divine perfections, are all power and all knowledge, the non-existence of Providence, if there be none, must result from a want of will in God. But no want of will to exercise a Providence can exist, for God wills whatever is for the good of the universe, and for his own glory; to either of which a Providence is clearly indispensable. God therefore has resolved to exercise his power and knowledge so as to subserve the best ends with his creation. 'He that denies Providence,' says Charnock, 'denies most of God's attributes; he denies at least the exercise of them; he denies his omniscience, which is the eye of Providence;

mercy and justice, which are the arms of it; power, which is its life and motion; wisdom, which is the rudder whereby Providence is steered; and holiness, which is the compass and rule of its motion.' This argument for a Providence might be made much more impressive, did our limits allow us to expand it, so as to show, step by step, how almost every attribute, if not directly, yet by implication, demands that God put forth an unceasing sovereignty over all his works.

A *fourth* proof of God's Providence appears in the *order* which *prevails* in the universe. We say the order which *prevails*, aware of the occasional apparent disorder that exists, which we have already noticed, and shall soon treat of again. That summer and winter, seed-time and harvest, cold and heat, day and night, are fixed by a law, was obvious even to men who never heard of God's covenant with Noah. Accordingly the ancient Greeks designated the creation by a word which means *order* (κόσμος). But our sense of order is keenest where we discern it in apparent confusion. The motions of the heavenly bodies are eccentric and intervolved, yet are most regular when they seem most lawless. They were therefore compared by the earliest astronomers to the discords which blend in a harmony, and to the wild starts which often heighten the graces of a dance. Modern astronomy has revealed to us so much miraculous symmetry in celestial phenomena, that it shows us far more decisive proofs of a Ruler seated on the circle of the heavens, than were vouchsafed to the ancients. Moreover, many discover proofs of a Providence in such facts as the proportion between the two sexes, the diversities of the countenance, as well as human nature and the nature of all things continuing always the same; since such facts show that all things are controlled by an unchanging power.

An objection to proofs of Providence, derived from the order of the universe, is thought to spring from the seeming disorders to which we cannot shut our eyes. Much is said of plagues and earthquakes, of drought, flood, frost, and famine, with a thousand more natural evils. But it deserves consideration whether, if there were no Providence, these anomalies would not be the rule instead of the exception;—whether they do not feelingly persuade us that the course of nature is upheld by a power above nature, and without which it would fall to nothing;—whether they may not be otherwise necessary for more important ends than fall within the scope of our knowledge.

A *fifth* proof of a Providence is furnished by the fact that so many men are here rewarded and punished according to a righteous law. The wicked often feel compunctious visitings in the midst of their sins, or smart under the rod of civil justice, or are tortured with natural evils. With the righteous all things are in general reversed. The miser and envious are punished as soon as they begin to commit their respective sins; and some virtues are their own present reward. But we would not dissemble that we are here met with important objections, although infinitely less, even though they were unanswerable, than beset such as would reject the doctrine of Providence. It is said, and we grant, that the righteous are trodden under foot, and the vilest men exalted; that the race is not to the swift, nor the battle to the strong; that virtue starves, while vice is fed; and that schemes for doing good are frustrated, while evil plots succeed. But we may reply, 1. The prosperity of the wicked is often apparent, and well styled *a shining misery*. Who believes that Nero enthroned was happier than Paul in chains? 2. We are often mistaken in calling such or such an afflicted man good, and such or such a prosperous man bad. 3. The miseries of good men are generally occasioned by their own fault, since they have been so fool-hardy as to run counter to the laws by which God acts, or have aimed at certain ends while neglecting the appropriate means. 4. Many virtues are proved and augmented by trials, and not only proved, but produced, so that they would have had no existence without them. Many of David's noblest qualities would never have been developed but for the impious attempts of Saul. Job's integrity was not only tested, but strengthened, by Satan's being permitted to sift him as wheat. Patience, experience, and hope were brought as ministering angels to men, of whom the world was not worthy, through trials of cruel mockings and scourgings. 5. The unequal distribution of good and evil, so far as it exists, carries our thoughts forward to the last judgment, and a retribution according to the deeds done in the body, and can hardly fail of throwing round the idea of eternity a stronger air of reality than it might otherwise wear. All perplexity vanishes as we reflect that, 'He cometh to judge the earth.' 6. Even if we limit our views to this world, but extend them to all our acquaintance, we cannot doubt that the *tendencies*, though not always the effects, of vice are to misery, and those of virtue to happiness. These tendencies are especially clear if our view embraces a whole lifetime, and the clearer the longer the period we embrace. The Psalmist (Ps. lxxiii.) was at first envious at the foolish, when he saw the prosperity of the wicked; but as his views became more comprehensive, and he understood their end, his language was, 'How are they brought into desolation as in a moment! they are utterly consumed with terrors!' The progressive tendency of vice and virtue to reap each its appropriate harvest is finely illustrated by Bishop Butler—best of all perhaps in his picture of an imaginary kingdom of the good, which would peacefully subvert all others, and fill the earth. Indeed, as soon as we leave what is immediately before our eyes, and glance at the annals of the world, we behold so many manifestations of God, that we may adduce as

A *sixth* proof of Providence the *facts of history*. The giving and transmission of a revelation, it has been justly said,—the founding of religious institutions, as the Mosaic and the Christian,—the raising up of prophets, apostles, and defenders of the faith,—the ordering of particular events, such as the Reformation,—the more remarkable deliverances noticed in the lives of those devoted to the good of the world, &c.—all indicate the wise and benevolent care of God over the human family. But the historical proof of a Providence is perhaps strongest where the wrath of man has been made to praise God, or where efforts to dishonour God have been con-

strained to do him honour. Testimony in favour of piety has fallen from the impious, and has had a double value, as coming from the unwilling. They who have fought against the truth have been used by God as instruments of spreading the knowledge of it, awakening an interest in it, or stimulating Christians to purify it from human additions, and to exhibit its power. The scientific researches also with which infidels have wearied themselves to overthrow a revelation have proved at last fatal to their darling scepticism. Too many histories, like Gibbon's, have been written as if there were no God in the heavens, swaying the sceptre of the earth. But a better day is approaching; and it is exhilarating to observe that Alison, the first British historian of the age, writes in the spirit which breathes in the historical books of the Bible, where the free actions of man are represented as inseparably connected with the agency of God. If we may judge of the future by the past, as the scroll of time unrolls, we, or our posterity, and some think glorified spirits in a yet higher degree, shall see more and more plainly the hand of God operating, till every knee shall bow. Judgments, now a great deep, shall become as the light that goeth forth. The tides of ambition and avarice will all be seen to roll in subserviency to the designs of God. To borrow the illustration of another, 'We shall behold the bow of God encircling the darkest storms of wickedness, and forcing them to manifest his glory to the universe.'

As a *seventh* ground for believing in Providence, it may be said that Providence is the necessary basis of all religion. For what is religion? One of the best definitions calls it the belief in a superhuman Power, which has great influence in human affairs, and ought therefore to be worshipped. But take away this *influence in human affairs*, and you cut off all motive to worship. To the same purpose is the text in Hebrews: 'He that cometh to God must believe that he is, and that he is a rewarder of such as diligently seek him.' If then the religious sentiments thrill us not in vain,—if all attempts of all men to commune with God have not always and everywhere been idle,—there must be a Providence.

In the *eighth* place, we may advert for a moment to the proof of Providence from the common consent of mankind, with the single exception of atheists. The Epicureans may be classed with atheists, as they are generally thought to have been atheists in disguise, and a god after their imaginations would be, to all intents and purposes, no god. The Stoics were also atheists, believing only in a blind fate arising from a perpetual concatenation of causes contained in nature. The passages acknowledging a Providence in Cicero, Seneca, Plutarch, and all the ancient moralists, are numerous and decisive, but too accessible or well known to need being quoted.

In the *last* place, the doctrine of Providence is abundantly proved by the Scriptures. Sometimes it is declared that the Most High ruleth in the kingdom of men, and giveth it to whomsoever he will; as much as to say that nothing can withstand his power. Again, lest we may think some things beneath his notice, we read that *he numbereth the hairs of our heads, careth for lilies, and disposeth all the lots which are cast*. The care of God for man is generally argued, *a fortiori*, from his care for inferior creatures. One Psalm (xci.) is devoted to show the providential security of the godly: another (xciii.) shows the frailty of man; and a third (civ.) the dependence of all orders in creation on God's Providence for food and breath. In him, it is elsewhere added, we live, and move, and have our being. He, in the person of Christ, sustaineth all things by the word of his power, and from him cometh down every good and perfect gift. But nowhere perhaps is a Providence so pointedly asserted and so sublimely set forth as in some of the last chapters of Job; and nowhere so variously, winningly, and admirably exhibited as in the history of Joseph.

The principal writers on this important subject are:—Gomarus, *Explicatio Doct. Orthod. de Providentia*, 1597; Sander, *Ueber die Vorsehung*, 1780; Bormann, *Die Christl. Lehre d. Vorsehung*, 1820; Feldmann, *Moira, oder ü. d. Gottl. Vorsehung*, 1830; Leibnitz, *Essais de Theodicée*, 1840; Rougemont, *Du Monde dans ses Rapports avec Dieu*, 1841; and the *Treatises* and *Discourses* on Providence by Charnock, Flavel, Hopkins, Hunter, Sherlock, and Fawcett. —J. D. B.

PRUNING-HOOK. [Vine.]

PSALMS, BOOK OF. This collection of sacred poetry received its name, Ψαλμοί, in consequence of the *lyrical* character of the pieces of which it consists, as intended to be sung to stringed and other instruments of music. The word (from ψάλλω, to *touch* or *strike* a chord) is thus aptly defined by Gregory of Nyssa (*Tract.* ii. *in Psalmos*, cap. 3): ψαλμός ἐστιν ἡ διὰ τοῦ ὀργάνου τοῦ μουσικοῦ μελῳδία. Another name, *Psalter*, was given to this book from the Greek ψαλτήριον, the *stringed instrument* to which its contents were originally sung. The Hebrew title תְּהִלִּים (Rabbinic form, with ה elided, תלים or תלין) signifies *hymns* or *praises*, and was probably adopted on account of the use made of the collection in divine service, though only a part can be strictly called songs of praise, not a few being lamentations and prayers. There is evidently no proper correspondence between the titles in the two languages, though each is suitable. The word answering to תהלים is ὕμνοι, and not ψαλμοί, which rather corresponds to מִזְמוֹרִים, *lyrical odes*,—a name which, though so plainly appropriate, does not appear to have been generally given to the book, at least so far as the Hebrew usage can now be ascertained. This is the more singular, inasmuch as no fewer than sixty-five of the songs distinctly bear the title of מזמור, while only one (Ps. cxlv. 1) is styled תהלה. That the name מזמורים did, however, obtain in ancient times, rather than the present title תהלים, may be presumed from the use of ψαλμοί in the Septuagint and the New Testament, and of ܡܙܡܘܪ̈ in the Peshito.

In Ps. lxxii. 20 we find all the preceding compositions (Ps. i.-lxxii.) styled *Prayers of David*, because many of them are strictly prayers, and all are pervaded by the spirit and tone of supplication.

All the best judges, as Lowth, Herder, De Wette, Ewald, Tholuck, and others, pronounce the poetry

of the Psalms to be of the *lyric* order. 'They are,' says De Wette (*Einleitung in die Psalmen*,* p. 2), 'lyric in the proper sense; for among the Hebrews, as among the ancients generally, poetry, singing, and music were united, and the inscriptions to most of the Psalms determine their connection with music, though in a way not always intelligible to us. Also as works of taste these compositions deserve to be called lyric. The essence of lyric poetry is the immediate expression of feeling; and feeling is the sphere in which most of the Psalms move. Pain, grief, fear, hope, joy, trust, gratitude, submission to God, everything that moves and elevates the heart, is expressed in these songs. Most of them are the lively effusions of the excited susceptible heart, the fresh offspring of inspiration and elevation of thought; while only a few are spiritless imitations and compilations, or unpoetic forms of prayer, temple hymns, and collections of proverbs.' For fuller information on this subject see POETRY.

TITLES. All the Psalms, except thirty-four, bear superscriptions. According to some there are only twenty-five exceptions, as they reckon הללויה a title in all the Psalms which commence with it. To each of these exceptions the Talmud (*Babyl. Cod. Avoda Sarah*, fol. 24, col. 2) gives the name מזמורא יתומא, *Orphan Psalm.*

The *authority* of the titles is a matter of doubt. By most of the ancient critics they were considered genuine, and of equal authority with the Psalms themselves, while most of the moderns reject them wholly or in part. They were wholly rejected at the close of the fourth century by Theodore of Mopsuestia, one of the ablest and most judicious of ancient interpreters (Rosenmüller, *Hist. Interpretationis Librorum Sacrorum*, P. iii., p. 256). On the other hand it deserves to be noticed that they are received by Tholuck and Hengstenberg in their works on the Psalms. Of the *antiquity* of the inscriptions there can be no question, for they are found in the Sept. They are supposed to be even much older than this version, since they were no longer intelligible to the translator, who often makes no sense of them. Their obscurity might, however, have been owing not so much to their antiquity as to the translator's residence in Egypt, and consequent ignorance of the Psalmody of the Temple service in Jerusalem. At any rate the appearance of the titles in the Sept. can only prove them to be about as ancient as the days of Ezra. Then it is argued by many that they must be as old as the Psalms themselves, since it is customary for Oriental poets to prefix titles to their songs. Instances are found in Arabic poems, but these are very unlike the Hebrew inscriptions. Much more important traces of the custom appear in Isa. xxxviii. 9, in Hab. iii. 1, and in 2 Sam. i. 17, 18 (Tholuck's *Psalmen*, p. xxiv.). The other instances commonly appealed to in Exod. xv. 1, Deut. xxxi. 30, Judg. v. 1, 2 Sam xxii. 1, furnish no evidence, since they are not proper titles of the songs so much as brief statements connecting them with the narrative. But in 2 Sam. xxiii. 1, and Num. xxiv. 3, there is strong proof of the usage, if, with Tholuck, we take the verses as inscriptions, and not as integral parts of the songs, which most hold them justly to be from their poetical form.

The following considerations militate against the authority of the titles. 1. The analogy between them and the *subscriptions* to the Apostolical Epistles. The latter are now universally rejected: why not the former? 2. The Greek and Syriac versions exhibit them with great and numerous variations, often altering the Hebrew (as in Ps. xxvii.), and sometimes giving a heading where the Hebrew has none (as in Ps. xciii.-xcvii.). Would the ancient translators have taken such liberties, or could such variations have arisen, if the titles had been considered sacred like the Psalms themselves? At any rate the existence of these glaring variations is sufficient to induce a distrust of the titles in their present form, even though they had been once sanctioned by inspired authority. If ever Ezra settled them, the variations in versions and manuscripts (Eichhorn's *Einleitung*, iii., pp. 490, 495) have tended since to make them doubtful. 3. The inscriptions are occasionally at variance with the contents of the Psalms. Sometimes the author is incorrectly given, as when David is named over Psalms referring to the captivity, as in Ps. xiv. 7; xxv. 22; li. 20, 21; lxix. 36. It is not unlikely, however, as Tholuck thinks, that these references to the exile were added during that period to the genuine text of the royal singer. Others, as Calvin and Hengstenberg, with far less probability take these passages in a figurative or spiritual sense. Also Ps. cxxxix. cannot well be David's, for its style is not free from Chaldaisms. Then sometimes the occasion is incorrectly specified, as in Ps. xxx., unless indeed this refers to the dedication of the *site of the Temple* (1 Chron. xxii. 1), as Rosenmüller, Tholuck, and Hengstenberg, think after Venema.

On the whole, as the result of this investigation, it seems the part of sober criticism to receive the titles as historically valid, except when we find strong internal evidence against them.

The *design* of these inscriptions is to specify either the author, or the chief singer (never the latter by name, except in Ps. xxxix.), or the historical subject or occasion, or the use, or the style of poetry, or the instrument and style of music. Some titles simply designate the author, as in Ps. xxv., while others specify several of the above particulars, as in Ps. li. The longest and fullest title of all is prefixed to Ps. lx., where we have the author, the chief musician (not by name), the historical occasion (comp. 2 Sam. viii.), the use or design, the style of poetry, and the instrument or style of music. It is confessedly very difficult, if not impossible, to explain all the terms employed in the inscriptions; and hence critics have differed exceedingly in their conjectures. The difficulty, arising no doubt from ignorance of the Temple music, was felt, it would seem, as early as the age of the Sept.; and it was felt so much by the translators of our Authorized Version, that they generally retained the Hebrew words, even though Luther had set the example of translating them to the best of his ability. It is worth observing that the difficulty appears to have determined Coverdale, 1535, to

* Of this valuable *Einleitung* a translation, rather too free to be faithful, is given in the American *Biblical Repository*, vol. iii.

omit nearly all except names of authors; thus, in Ps. lx., which is lix. in his version, he gives only—*a Psalme of David.*

Of the terms left *untranslated* or *obscure* in our Bible, it may be well to offer some explanation in this place, taking them in alphabetical order for the sake of convenience. On this subject most commentators offer instruction, but the reader may especially consult Rosenmüller, *Scholia in Comp. Redacta*, vol. iii. 14-22; De Wette, *Commentar über die Psalmen*, pp. 27-37, and Ewald, *Poet. Bücher*, i. 169-180, 195.

Aijeleth shahar, אילת השחר, *hind of the morning*, *i. e.* the sun, or the dawn of day. This occurs only in Ps. xxii., where we may best take it to designate a song, perhaps commencing with these words, or bearing this name, to the melody of which the psalm was to be sung. So most of the ablest critics after Aben-Ezra. Yet Tholuck and Hengstenberg, after Luther, suppose it to denote the subject of the psalm, meaning David himself, or typically the Messiah.

Alamoth, עלמות, Ps. xlvi., probably signifies *virgins*, and hence denotes music for female voices, or the *treble*. So Gesenius, Tholuck, and Hengstenberg, after Gusset, who, in *Comment. Ling. Hebr.* sub voce עלם, explains it—*vox clara et acuta, quasi virginum* (see below under *Sheminith*).

Al-tasehith, אל-תשחת, *destroy thou not*, is found over Ps. lvii., lviii., lix., lxxv., and signifies, by general consent, some well-known ode beginning with the expression, to the tune of which these compositions were to be sung.

Degrees, המעלות, appears over fifteen Psalms (cxx.-cxxxiv.), called *Songs of Degrees*, and has been explained in various ways, of which the following are the chief. 1. The ancients understood by it *stairs* or *steps*, as appears from the Sept. version of the title, ᾠδὴ τῶν ἀναβαθμῶν, and the Vulgate, *carmen graduum, song of the steps;* and in accordance with this, Jewish writers relate (Mishna, *Sueah*, cap. v. 4), that these Psalms were *sung on fifteen steps*, leading from the court of Israel to the court of the women. This explanation is now exploded, though Fürst, in his *Concordance*, sanctions it. 2. Luther, whom Tholuck is inclined to follow, renders the title *a song in the higher choir*, supposing the Psalms to have been sung from an elevated place or ascent, or with elevated voice. 3. Gesenius and De Wette think the name refers to a peculiar rhythm in these songs, by which the sense advances by *degrees*, and so *ascends* from clause to clause. Thus in Ps. cxxi. :—

1. I will lift up my eyes to the hills,
   From whence *cometh my help.*
2. *My help cometh* from the Lord,
   The maker of heaven and earth.
3. He will not suffer thy foot to be moved,
   Thy *keeper* will not *slumber:*
4. Behold, he will neither *slumber* nor sleep,
   The *keeper* of Israel.
5. *Jehovah* is thy *keeper*,
   Jehovah, thy shade on thy right hand.

* * * *

7. Jehovah will *keep* thee from all evil,
   He will *keep* thy soul:
8. Jehovah will *keep* thy going out and thy coming in,
   From this time even for evermore.

To this very ingenious and not improbable explanation it is objected, that this *rhythm by gradation* (as De Wette calls it) is not obvious in the structure of all these songs, and therefore could hardly suggest the name. 4. According to the most prevalent and probable opinion, the title signifies *song of the ascents*, or *pilgrim song*, meaning a song composed for, or sung during the journeyings of the people up to Jerusalem, whether as they returned from Babylon, or as they statedly repaired to the national solemnities. So Herder (*Geist der Ebr. Poesie*, ii. 353-357) and Ewald (*Poet. Bücher*, i. 195). Journeys to Jerusalem are generally spoken of as *ascents*, on account of the elevated situation of the city and temple (see Ezra vii. 9, and especially Ps. cxxii. 4). This explanation of the name is favoured by the brevity and the contents of these songs, and by the versions of Aquila, Symmachus, and Theodotion, who render מעלות by ἀναβάσεις.

Gittith, הגתית, appears over Ps. viii., lxxxi., lxxxiv., and is of very uncertain meaning, though not improbably it signifies an instrument or tune brought from the city of *Gath*. So Rosenmüller, De Wette, Ewald, Hengstenberg, and Tholuck. In the opinion of not a few the word comes from גת, *wine-press*, and denotes either an instrument or a melody used in the vintage. So the Sept. renders it ὑπὲρ τῶν ληνῶν. The new Lexicons of Gesenius and Fürst give other explanations [Musical Instruments].

Higgaion, הגיון, is found over Ps. ix. 16, and probably means either *musical sound*, according to the opinion of most, and the Sept. ᾠδή; or *meditation* according to Tholuck and Hengstenberg (see more below under *Selah*).

Jeduthun, ידותון, is found over Ps. xxxix., lxii., lxxvii., and is generally taken for the name of choristers descended from Jeduthun, of whom we read in 1 Chron. xxv. 1, 3, as one of David's three chief musicians or leaders of the Temple music. This use of the name Jeduthun for Jeduthunites is just like the well-known use of Israel for the Israelites. It is most probable that in Ps. xxxix. Jeduthun himself is meant, and not his family. So Rosenmüller and Hengstenberg [Jeduthun].

Jonath-elem-reehokim, יונת אלם רחקים, *the mute dove among strangers*, found only over Ps. lvi., may well denote the subject of the song, viz., David himself, 'when the Philistines took him in Gath;' or it is the name or commencement of an ode to the air of which this psalm was sung.

Leannoth, לענות, in the title of Ps. lxxxviii. means *to sing*, denoting that it was to be sung in the way described.

Mahaluth, מחלת, occurs in Ps. liii. and lxxxviii., and denotes, according to some, a sort of *flute*, according to Gesenius in his last edition of his *Thesaurus*, a *lute*, but in the opinion of Fürst, a *tune*, named from the first word of some popular song. *Upon Mahalath Leannoth*, Ps. lxxxviii., is accordingly a direction to chaunt it to the instrument or tune called *mahalath*.

Maschil, משכיל, is found in the title of thirteen

psalms. According to Gesenius, De Wette, and others, it means a *poem*, so called either for its *skilful* composition or for its *wise and pious* strain. The common interpretation, which Tholuck and Hengstenberg follow, makes it a *didactic poem*, from השכיל, *to teach* or *make wise*. There seems very little to choose between the two opinions.

Michtam, מכתם, is prefixed to Ps. xvi., lvi.-lx., and is subject to many conjectures. Many, after Aben-Ezra, derive it from כתם, *gold*, and understand *a golden psalm*, so called either on account of its *excellence*, or because written in *golden letters*. Hengstenberg understands *mystery*, and supposes that these Psalms, more than others, have a deep or *occult* sense. Others, after the Sept., which gives στηλογραφία, fancy that the word means *a poem engraved on a pillar* or monument. But the true explanation is most likely that offered by Gesenius, De Wette, Rosenmüller, and Tholuck, who hold מכתם to be only another form of מכתב, by the familiar interchange of the kindred letters ם and ב, and to signify a *writing* or *poem*. It is actually found in this form over Hezekiah's song in Isa. xxxviii. 9.

Muth-labben (Ps. ix.) presents a perfect riddle, owing to the various readings of MSS., and the contradictory conjectures of the learned. Besides the common reading על-מות לבן, *upon death to the son*, we have עַלְמוּת and עֲלָמוֹת, the same word that is used in Ps. xlvi. (see above *Alamoth*). Some explain it as the *subject* or *occasion* of the song, but most refer it to the music. Gesenius, in his last edition, renders it—*with virgins' voice for the boys, i. e.* to be sung by a choir of boys in the *treble*.

Neginoth, נגינות, Ps. iv. and four others; over Ps. lxi. *neginah* in the singular, though some MSS. give *neginoth* here also. This name, from נגן, *to strike* a chord, like ψάλλω, clearly denotes *stringed instruments* in general.

Nehiloth, נחילות (Ps. v.), comes most likely from חלל, *to perforate*, and denotes *pipes* or *flutes*. Hengstenberg, however, fancies it means *lots* or *heritages*, from נחל, *to possess*, and points out the subject of the Psalm.

Selah, סלה, is found seventy-three times in the Psalms, generally at the end of a sentence or paragraph; but in Ps. lv. 19 and lvii. 3 it stands in the middle of the verse. While most authors have agreed in considering this word as somehow relating to the *music*, their conjectures about its precise meaning have varied greatly. But at present these two opinions chiefly obtain. Some, including Herder, De Wette, and Ewald (*Poet. Bücher*, i. 179), derive it from סלה or סלל, *to raise*, and understand a *raising* of the voice or music; others, after Gesenius, in *Thesaurus*, derive it from סלה, *to be still* or *silent*, and understand a *pause* in the singing. So Rosenmüller, Hengstenberg, and Tholuck. Probably *selah* was used to direct the singer to be silent, or to pause a little, while the instruments played an interlude or symphony. In Ps. ix. 16 it occurs in the expression *higgaion selah*, which Gesenius, with much probability, renders *instrumental music, pause, i. e.* let the instruments strike up a symphony, and let the singer pause. By Tholuck and Hengstenberg, however, the two words are rendered *meditation, pause*, i. e. let the singer meditate or reflect while the music stops.

Sheminith, שמינית (Ps. vi. and xii.), means properly *eighth*, and denotes either, as some think, an instrument with *eight* chords, or, more likely, music in the lower notes, or *bass*. So Gesenius, De Wette, Tholuck, and Hengstenberg. This is strongly favoured by 1 Chron. xv. 20, 21, where the terms *alamoth* and *sheminith* clearly denote different *parts* of music: the former answering to our *treble*, and the latter to the *bass*, an *octave* below.

Shiggaion, שגיון (Ps. vii.), denotes, according to Gesenius and Fürst, a *song* or *hymn;* but Ewald and Hengstenberg derive it from שגה, *to err* or *wander;* and hence the former understands *a song uttered in the greatest excitement*, but the latter, *error* or *wandering*, supposing that the *aberrations* of the wicked are the subject of the Psalm. According to Rosenmüller, De Wette, and Tholuck, it means a *plaintive song* or *elegy*.

Shushan, שושן (Ps. lx.), and in plural *shoshannim* (Ps. xlv., lxix., lxxx.). This word commonly signifies *lily*, and probably denotes either an instrument bearing some resemblance to a lily (perhaps *cymbal*), or a melody named lily for its pleasantness. Hengstenberg contends that it expresses the subject, *i. e.* some delightful theme. *Eduth*, עדות, is joined to it in Ps. lx. and lxxx., giving the sense *lily of testimony*, the name of a tune, according to Tholuck; or *lily of song*, according to Gesenius, who understands a *lyric pipe*.

Authors.—Many of the ancients, both Jews and Christians, maintained that all the Psalms were written by David: which is one of the most striking proofs of their *uncritical* judgment. So the Talmudists (*Cod. Pesachim*, c. x. p. 117); Augustine, who is never a good critic (*De Civ. Dei*, xvii. 14); and Chrysostom (*Prol. ad Psalmos*). But Jerome, as might be expected, held the opinion which now universally prevails (*Epist. ad Sophronium*). The titles and the contents of the Psalms most clearly show that they were composed at different and remote periods, by several poets, of whom David was only the largest and most eminent contributor. In the titles the author is indicated by ל, *to*, i. e. 'belonging to,' prefixed to his name, hence called *lamed auctoris*. Some suppose, without good reason, that ל prefixed to a musician's name, *e. g.* Asaph, indicates, not the author, but simply the head singer. According to the inscriptions we have the following list of authors:—

1. *David*, 'the sweet Psalmist of Israel' (2 Sam. xxiii. 1). To him are ascribed seventy-three Psalms in the Hebrew text (not seventy-four, as De Wette and Tholuck state; nor seventy-one, as most others have counted); and at least eleven others in the Sept., namely, xxxiii., xliii., xci., xciv.-xcix., civ., cxxxvii.; to which may be added Ps. x., as it forms part of Ps. ix. in that version. From what has been advanced above respecting the authority of the titles, it is obviously injudicious to maintain that David composed all that have his name prefixed in the Hebrew, or to suppose that he did not compose some of the eleven ascribed to him in the Sept., and of the others which stand without any author's name at all.

We cannot feel sure that Ps. cxxxix. is David's, for its Chaldaisms (ver. 2, 8, 16, 17) betray a later age; and Ps. cxxii. can scarcely be his, for its style resembles the later Hebrew, and its description of Jerusalem can hardly apply to David's time. Besides, it is worthy of notice that the Sept. gives this and the other Songs of Degrees without specifying the author. Of those which the Sept. ascribes to David, it is not improbable that Ps. xcix. and civ. are really his; and of those which bear no name in either text, at least Ps. ii. appears to be David's.

When we consider David's eminence as a poet, and the delight he took in sacred song, we cannot wonder that he should be the author of so many of the Psalms,—no fewer, in all likelihood, than half the collection: the wonder rather should be, that we do not find more of his fine odes, for it is certain he wrote some which are not in this book; see, in 2 Sam. i. 19-27, his lament over Saul and Jonathan, and in 2 Sam. xxiii. 1-7, his last inspired effusion.

His character and merit as the father of Hebrew melody and music—for it was in his hands and under his auspices that these flourished most*—are thus set forth by the Son of Sirach (ch. xlvii. 8-10), 'In all his work he gave thanks. To the Holy and Most High he sang songs with all his heart, in words of praise (ῥήματι δόξης), and he loved his Maker. He set singers also before the altar, and from their music (ἤχου) sweet melody resounded. He gave splendour to the feasts, and adorned the solemn times unto perfection (μέχρι συντελείας), in that they praised His holy name, and the sanctuary pealed with music from early morn.'

David's compositions are generally distinguished by sweetness, softness, and grace; but sometimes, as in Ps. xviii., they exhibit the sublime. His prevailing strain is plaintive, owing to his multiplied and sore trials, both before and after his occupation of the throne. How often was he beset with dangers, harassed by foes, and chastised of God! And, under these circumstances, how was his spirit bowed down, and gave vent to its plaints and sorrows on the saddened chords of the lyre! But in the midst of all he generally found relief, and his sorrow gave place to calm confidence and joy in God. What wonder, that a soul so susceptible and devout as his should manifest emotions so strong, so changeful, and so various, seeing that he passed through the greatest vicissitudes of life. God took him from the sheepfolds to feed Jacob his people, and Israel his inheritance (Ps. lxxviii. 70, 71). See Herder's *Geist der Ebr. Poesie*, ii. 297-301; and especially Tholuck (*Psalmen, Einleitung*, § 3), who gives a most admirable exhibition of the Psalmist's history and services.

The example and countenance of the king naturally led others to cultivate poetry and music. It appears from Amos vi. 5, that lovers of pleasure took David's compositions as a model for their worldly songs: how much more would the lovers of piety be induced to follow him by producing sacred songs and hymns! The fine psalm in Hab. iii. is an exact imitation of his style as seen in Ps. xviii. And the celebrated singers of his day were men, like himself, moved by the divine afflatus not only to excel in music but also to indite hallowed poetry. Of these Psalmists the names of several are preserved in the titles.

2. *Asaph* is named as the author of twelve Psalms, viz. l., lxxiii.-lxxxiii. He was one of David's chief musicians [ASAPH]. All the poems bearing his name cannot be his; for in Ps. lxxiv., lxxix., and lxxx. there are manifest allusions to very late events in the history of Israel. Either, then, the titles of these three Psalms must be wholly rejected, or the name must be here taken for the 'sons of Asaph;' which is not improbable, as the family continued for many generations in the choral service of the Temple. Asaph appears from Ps. l., lxxiii., and lxxviii., to have been the greatest master of didactic poetry, excelling alike in sentiment and in diction.

3. *The sons of Korah* was another family of choristers (see KORAH, at the end), to whom eleven of the most beautiful Psalms are ascribed. The authorship is assigned to the Korahites in general, not because many of them could have been engaged in composing one and the same song, but because the name of the particular writer was unknown or omitted. However, in Ps. lxxxviii. we find, besides the family designation, the name of the individual who wrote it, viz.—

4. *Heman* was another of David's chief singers (1 Chron. xv. 19): he is called the Ezrahite, as being descended from some Ezrah, who appears to have been a descendant of Korah; at least Heman is reckoned a Kohathite (1 Chron. vi. 33-38), and was therefore probably a Korahite; for the Kohathites were continued and counted in the line of Korah; see 1 Chron. vi. 22, 37, 38 [HEMAN]. Thus Heman was both an Ezrahite and of the sons of Korah. That Ps. lxxxviii. was written by him is not unlikely, though many question it.

5. *Ethan* is reputed the author of Ps. lxxxix. He also is called the Ezrahite, but this is either a mistake, or he as well as Heman had an ancestor named Ezrah, of whom nothing is known. The Ethan intended in the title is doubtless the Levite of Merari's family whom David made chief musician along with Asaph and Heman (1 Chron. vi. 44; xxv. 1, 6). The Psalm could not, however, be composed by him, for it plainly alludes (ver. 38-44) to the downfall of the kingdom.

6. *Solomon* is given as the author of Ps. lxxii. and cxxvii., and there is no decided internal evidence to the contrary, though most consider him to be the subject, and not the author, of Ps. lxxii.

7. *Moses* is reputed the writer of Ps. xc., and there is no strong reason to doubt the tradition. But the Talmudists, whom Origen, and even Jerome, follow, ascribe to him also the ten succeeding Psalms (xci.-c.), on the principle that the anonymous productions belonged to the last-named author. This principle is manifestly false, since in several of these Psalms we find evidence that Moses was not the author. In Ps. xcv. the forty years' wandering in the wilderness is referred to as past; in Ps. xcvii. 8, mention is made of Zion and Judah, which proves that it cannot be dated earlier than the time of David; and in Ps. xcix. 6, the prophet Samuel is named, which also proves that Moses could not be the writer.

Jeduthun is sometimes, without just ground,

* It was he, as Herder observes, that collected the scattered wild field-flowers and planted them as a royal parterre on Mount Zion.

held to be named as the author of Ps. xxxix. (see above, under that head). Many conjectures have been formed respecting other writers, especially of the anonymous psalms. The Sept. seemingly gives, as authors, Jeremiah (Ps. cxxxvii.), and Haggai and Zechariah (Ps. cxxxviii.).* But these conjectures are too uncertain to call for further notice in this place.

The *dates* of the Psalms, as must be obvious from what has been stated respecting the authors, are very various, ranging from the time of Moses to that of the Captivity—a period of nearly 1000 years. In the time of king Jehoshaphat (about B.C. 896) Ps. lxxxiii.; setting forth the dangers of the nation, as we read in 2 Chron. xx. 1-25, was composed either by himself, as some suppose, or most likely, according to the title, by Jahaziel, 'a Levite of the sons of Asaph,' who was then an inspired teacher (see 2 Chron. xx. 14). In the days of Hezekiah, who was himself a poet (Isa. xxxviii. 9-20), we may date, with great probability, the Korahitic Psalms xlvi. and xlviii., which seem to celebrate the deliverance from Sennacherib (2 Kings xix. 35). In the period of the Captivity were evidently written such laments as Ps. xliv., lxxix., cii., and cxxxvii.; and after its close, when the captives returned, we must manifestly date Ps. lxxxv. and cxxvi. Some have maintained that several psalms, especially lxxiv., were written even in the days of the Maccabees; but this is contrary to every probability, for, according to all accounts, the Canon had been closed before that time [CANON].

COLLECTION AND ARRANGEMENT.—As the Psalms are productions of different authors in different ages, we are led to inquire *how* and *when* they were collected. The book has been styled by some moderns *the Anthology of Hebrew lyric poetry*, as if it consisted of a selection of the most admired productions of the sacred muse; but the name is not altogether appropriate, since several pieces of the highest poetic merit are, to our knowledge, not included, namely, the songs of Moses in Exod. xv. and Deut. xxxii.; the song of Deborah in Judg. v.; the prayer of Hannah in 1 Sam. ii. 1-10; and even David's lament over Saul and Jonathan in 2 Sam. i. 18-27. To these may be added the song of Hezekiah in Isa. xxxviii. 9-20; and the prayer of Habakkuk in Hab. iii. The truth seems to be, as Ewald and Tholuck maintain, *that the collection was made not so much with reference to the beauty of the pieces as to their adaptation for devotional use in public worship.* This view sufficiently accounts for omitting most of the above pieces, and many others, as being either too individual or too secular in their application. It may account for not including the lament over Jonathan, and for the fact that only two of Solomon's compositions (Ps. lxxii. and cxxvii.) are professedly given, though 'his songs were a thousand and five' (1 Kings iv. 32, 33). His themes were secular, and therefore not suitable for this collection.

When the Psalms were collected and *by whom*, are questions that cannot be confidently answered. The Talmudists most absurdly considered David the collector (*Cod. Beracoth*, c. i. p. 9). It is certain that the book, as it now stands, could not have been formed before the building of the second temple, for Ps. cxxvi. was evidently composed at that period. In all probability it was formed by Ezra and his contemporaries, about B.C. 450 (Ewald's *Poet. Bücher*, ii. 205). But in the arrangement of the book there is manifest proof of its gradual formation out of several smaller collections, each ending with a kind of doxology.

The Psalter is divided in the Hebrew into five books, and also in the Sept. version, which proves the division to be older than B.C. 200. Some have fancied that this five-fold division did not originally exist, but that it arose simply from a desire to have as many parts in the Psalms as there are in the law of Moses. But strong reasons demand the rejection of such a fancy. Why should this conformity to the Pentateuch be desired and effected in the Psalms, and not also in Proverbs or in the Prophets? The five books bear decided marks of being not arbitrary divisions, but distinct and independent collections by various hands.

The *first book* (i.-xli.) consists wholly of David's songs, his name being prefixed to all except i., ii., x., and xxxiii.; and it is evidently the first collection, having been possibly made in the time of Hezekiah, who is known to have ordered a collection of Solomon's proverbs (Prov. xxv. 1), and to have commanded the Levites to sing the words of David (2 Chron. xxix. 30).

The *second book* (xlii.-lxxii.) consists mainly of pieces by the sons of Korah (xlii.-xlix.), and by David (li.-lxv.), which may have been separate minor collections. At the end of this book is found the notice—'The prayers of David the son of Jesse are ended;' and hence some have thought that this was originally the close of a large collection comprising Ps. i.-lxxii. (Carpzov, *Introductio*, &c. ii. 107). But that the second was *originally* distinct from the first book, is proved by the repetition of one or two pieces; thus Ps. liii. is plainly the same as Ps. xiv., with only a notable variation in the Divine name, *God*, אלהים, being used in the former wherever *Lord*, יהוה, is found in the latter. So also Ps. lxx. is but a repetition of Ps. xl. 13-17, with the same singular variation in the Divine name. It is not likely that this collection was made till the period of the Captivity, if interpreters are right in referring Ps. xliv. to the days of Jeremiah.

The *third book* (lxxiii.-lxxxix.) consists chiefly of Asaph's psalms, but comprises apparently two smaller collections, the one Asaphitic (lxxiii.-lxxxiii.), the other mostly Korahitic (lxxxiv.-lxxxix.). The collector of this book had no intention to bring together songs written by David, and therefore he put the above notice at the end of the second book (see De Wette's *Psalmen, Einleitung*, p. 21). The date of this collection must be as late as the return from Babylon, for Ps. lxxxv. implies as much.

The *fourth book* (xc.-cvi.) and the *fifth* (cvii.-cl.) are made up chiefly of anonymous liturgic pieces, many of which were composed for the service of the second temple. In the last book we have the Songs of Degrees (cxx.-cxxxiv.), which seem to have been originally a separate collection. The five books may, with some propriety, be thus distinguished: the first *Davidic*, the second *Ko-*

* Hitzig (*Comment. über die Psalmen*) ascribes to Jeremiah a large number of the elegiac or plaintive psalms.

rahitic, the third *Asaphitic*, and the two remaining *Liturgic*.

In the mode of dividing and numbering the Psalms, some Hebrew MSS. vary from the printed text. In some, Ps. i. and ii. are given as one, the first being reckoned as only introductory; which accounts for the various reading in Acts xiii. 33. So also Ps. xlii. and xliii. are sometimes joined into one, as they evidently ought to be. In the Septuagint also, which the Vulgate follows, the arrangement varies from the common order, for it joins Ps. ix. and x. together, and thus its numbering falls one behind the Hebrew as far as Ps. cxlvii., which it cuts into two at ver. 12, and thus returns to the common enumeration. There is also in the Sept. an apocryphal Psalm, numbered cli., on David's victory over Goliath.

Various *classifications* of the Psalms have been proposed (Carpzov, *Introductio*, &c., ii. 132-134). Tholuck would divide them, according to the matter, into songs of *praise*, of *thanksgiving*, of *complaint*, and of *instruction*. De Wette suggests another method of sorting them (*Einleitung*, p. 3), into—1. *Hymns* (תהלים in the proper sense), as viii. xviii.; 2. *National Psalms*, as lxxviii. cv.; 3. *Psalms of Zion and the Temple*, as xv. xxiv.; 4. *Psalms respecting the King*, as ii. cx.; 5. *Psalms of complaint*, as vii. xxii.; and 6. *Religious Psalms*, as xxiii., xci. It is obvious, however, that no very accurate classification can be made, since many are of diversified contents and uncertain tenor.

Canonicity and Use.—The inspiration and canonical authority of the Psalms are established by the most abundant and convincing evidence. They never were, and never can be, rejected, except by impious impugners of all divine revelation. Not to mention other ancient testimonies [Canon], we find complete evidence in the New Testament, where the book is quoted or referred to as divine by Christ and his apostles *at least seventy times*. No other writing is so frequently cited; Isaiah, the next in the scale of quotation, being cited only about fifty-five times. Twice (Luke xx. 42 and Acts i. 20) we find distinct mention of the *Book of Psalms* (*βίβλος ψαλμῶν*). Once, however (Luke xxiv. 44), the name *Psalms* is used not simply for this book, but for the Hagiographa, or the whole of the third division of the Hebrew Scriptures [Hagiographa], because in it the Psalms are the first and chief part; or possibly, as Hävernick suggests (*Einleitung*, § xiv. p. 78), because the division consists mainly of *poetry*. It deserves notice that in Heb. iv. 7, where the quotation is taken from the anonymous Ps. xcv., the book is indicated by *David*, most likely because he was the largest and most eminent contributor, and also the patron and model of the other Psalmists. For the same reasons many ancient and modern authors often speak of the book as the *Psalms of David* (Carpzov, *Introd.* ii. 98), without intending to ascribe all the productions to him.

In every age of the church the Psalms have been extolled for their excellence and their use for godly edifying (Carpzov, *l. c.* pp. 109-116). Indeed, if Paul's estimate of ancient inspired Scripture (2 Tim. iii. 15-17) can be justly applied to any single book, that book must be the Psalms. Even in the New Testament there is scarcely a work of equal practical utility. Basil the Great and Chrysostom, in their homilies (see Suiceri *Thes. Eccles.* sub *ψαλμός*), expatiate most eloquently, and yet judiciously, on its excellence. The close of Basil's eulogy is to this effect: 'In it is found a perfect theology (*ἐνταῦθα ἔνι θεολογία τελεία*); prophecy of Christ's sojourn in the flesh, threatening of judgment, hope of resurrection, fear of retribution, promises of glory, revelations of mysteries,—all things are treasured in the book of Psalms, as in some great and common storehouse.' Among the early Christians it was customary to learn the book by heart, that psalmody might enliven their social hours, and soften the fatigues and soothe the sorrows of life. They employed the Psalms not only in their religious assemblies, of which use we find probable mention in 1 Cor. xiv. 26, but also at their meals and before retiring to rest, as Clement of Alexandria testifies: *θυσία τῷ θεῷ ψαλμοὶ καὶ ὕμνοι παρὰ τὴν ἑστίασιν, πρό τε τῆς κοίτης*. Of their use at meals we find an example also in the institution of the Lord's supper (Matt. xxvi. 30).

The great doctrines and precepts embodied in the Psalms, what views they give of God and his government, of man and his sinfulness, of piety and morals, of a future state, and of the Messiah, are most ably set forth by Tholuck in his *Einleitung*, § 4.

It may be well here to notice what are called the vindictive Psalms, namely, those which contain expressions of wrath and imprecations against the enemies of God and his people, such as Ps. lix., lxix., lxxix., and which in consequence are apt to shock the feelings of some Christian readers. In order to obviate this offence, most of our pious commentators insist that the expressions are not maledictions or imprecations, but simple declarations of what will or may take place. But this is utterly inadmissible; for in several of the most startling passages the language in the original is plainly imperative, and not indicative (see Ps. lix. 14; lxix. 25, 28; lxxix. 6). The truth is, that only a morbid benevolence, a mistaken philanthropy, takes offence at these Psalms; for in reality they are not opposed to the spirit of the Gospel, or to that love of enemies which Christ enjoined. Resentment against evil-doers is so far from being sinful, that we find it exemplified in the meek and spotless Redeemer himself (see Mark iii. 5). If the emotion and its utterance were essentially sinful, how could Paul (1 Cor. xvi. 22) wish the enemy of Christ to be accursed (*ἀνάθεμα*), or say of his own enemy, Alexander the coppersmith, 'the Lord reward him according to his works' (2 Tim. iv. 14); and, especially, how could the spirits of the just in heaven call on God for vengeance (Rev. vi. 10)? See a good article on this subject (*The Imprecations in the Scriptures*) in the American *Bibliotheca Sacra* for February, 1844.

The following are among the chief and best exegetical helps for explaining this book:—Poli *Synopsis*; Venema, *Comment. in Psalmos*; De Wette's *Commentar über die Psalmen*, 1836; Rosenmülleri *Scholia in Epit. Redacta*, vol. iii.; Maureri *Comment. Crit. Grammaticus*, vol. iii.; Hitzig's *Comment. und Uebersetzung*; Ewald's *Poet. Bücher*, vol. ii.; Tholuck's *Uebersetzung und Auslegung der Psalmen*; and Hengsten-

berg's *Commentar ueber die Psalmen.* The works of Tholuck and Hengstenberg form *together* the very best helps, leaving nothing to be desired by the critical and devout student of the Psalms.

The principal English works on the Book of Psalms are the translations (mostly with notes) of Mudge, 1744; Edwards, 1755; Fenwick, 1759; Green, 1762; Street, 1790; Wake, 1793; Geddes, 1807; Horsley, 1815; Fry, 1819; French and Skinner, 1830; Noyes, 1831 (Boston, U.S.); Walford, 1837; Bush, 1838 (New York): and the Commentaries of Ainsworth, 1639; Hammond, 1659; Merrick, 1768; Horne, 1771; and Dimock, 1791.—B. D.

PSALTERY. [Musical Instruments.]

PTOLEMAIS. [Accho.]

PTOLEMY. This common name of the Greek kings of Egypt does not occur in the canonical Scripture, but is frequent in the books of Maccabees and in Josephus (see the article Egypt).

PUBLICAN (Gr. τελώνης; among the Romans *publicanus*), a person who farmed the taxes and public revenues. This office was usually held by Roman knights, an order instituted as early as the time of Romulus, and composed of men of great consideration with the government, 'the principal men of dignity in their several countries,' who occupied a kind of middle rank between the senators and the people (Joseph. *Antiq.* xii. 4). Although these officers were, according to Cicero, the ornament of the city and the strength of the commonwealth, they did not attain to great offices, nor enter the senate, so long as they continued in the order of knights. They were thus more capable of devoting their attention to the collection of the public revenue.

The publicans were distributed into three classes: the farmers of the revenue, their partners, and their securities, corresponding to the Mancipes, Socii, and Prædes. They were all under the Quæstores Ærarii, who presided over the finances at Rome. Strictly speaking, there were only two sorts of publicans, the Mancipes and the Socii. The former, who were generally of the equestrian order, and much superior to the latter in rank and character, are mentioned by Cicero with great honour and respect (*Orat. pro Plancio*, 9); but the common publicans, the collectors or receivers of the tribute, as many of the Socii were, are covered both by heathens and Jews with opprobrium and contempt.

The name and profession of a publican were, indeed, extremely odious among the Jews, who submitted with much reluctance to the taxes levied by the Romans. The Galileans or Herodians, the disciples of Judas the Gaulonite, were the most turbulent and rebellious (Acts v. 37). They thought it unlawful to pay tribute, and founded their refusal to do so on their being the people of the Lord, because a true Israelite was not permitted to acknowledge any other sovereign than God (Joseph. *Antiq.* xviii. 2). The publicans were hated as the instruments by which the subjection of the Jews to the Roman emperor was perpetuated; and the paying of tribute was regarded as a virtual acknowledgment of his sovereignty. They were also noted for their imposition, rapine, and extortion, to which they were, perhaps, more especially prompted by having a share in the farm of the tribute, as they were thus tempted to oppress the people with illegal exactions, that they might the more speedily enrich themselves. Theocritus considered the bear and the lion the most cruel among the beasts of the wilderness; and among the beasts of the city the publican and the parasite. Those Jews who accepted the office of publican were execrated by their own nation equally with heathens: 'Let him be unto thee as an heathen man and a publican' (Matt. xviii. 17). It is said they were not allowed to enter the temple or synagogues, to engage in the public prayers, fill offices of judicature, or even give testimony in courts of justice. According to the Rabbins, it was a maxim that a religious man who became a publican was to be driven out of the religious society (Grotius, *ad Matt.* xviii.; Lightfoot, *Hor. Heb. ad Matt.* xviii.). They would not receive their presents at the temple any more than the price of prostitution, of blood, or of anything wicked and offensive.

There were many publicans in Judæa in the time of our Saviour, of whom Zacchæus was probably one of the principal, as he is called 'chief among the publicans' (Luke xix. 2), a phrase supposed to be equivalent to our Commissioner of the Customs. Matthew appears to have been an inferior publican, and is described as 'sitting at the receipt of custom' (Luke v. 27). Jesus was reproached by the Jews as the friend of publicans and sinners, and for eating with them (Luke vii. 34); but such was his opinion of the unbelieving and self-righteous chief-priests and elders who brought these accusations, that he replied unto them, 'The publicans and the harlots go into the kingdom of God before you' (Matt. xxi. 31). The parable of the Pharisee and the Publican who went up in to the temple to pray (Luke xviii. 10) is a beautiful illustration of the distinction between hypocrisy and true piety. When Jesus visited the house of Zacchæus, who appears to have been eminently honest and upright, he was assured by him that he was ready to give one half of his goods to the poor; and if he had taken anything from any man by false accusation, to 'restore him fourfold' (Luke xix. 8). This was in reference to the Roman law, which required that when any farmer was convicted of extortion, he should return four times the value of what he had fraudulently obtained. There is no reason to suppose that either Zacchæus or Matthew had been guilty of unjust practices, or that there was any exception to their characters beyond that of being engaged in an odious employment. Some other examples of this occur. Suetonius (*Vesp.*) mentions the case of Sabinus, a collector of the fortieth penny in Asia, who had several statues erected to him by the cities of the province, with this inscription, 'To the honest tax-farmer.'

It has been imagined by some commentators that, by the Jewish laws, it was forbidden to pay tribute to foreigners, or to be employed as publicans under them (Deut. xvii. 15); but publicans that were Jews are so often mentioned in the New Testament, that Dr. Lardner inclines to think the Roman tribute was collected chiefly by Jews. He conceives that in most provinces the natives were employed in the towns as under-collectors, and that the receivers-general, or superior officers, only were Romans. As the office was so ex-

tremely odious, the Romans might deem it prudent to employ some natives in collecting the taxes; and there is little doubt that in every district they would find Jews willing to profit by the subjection of their country, and to accept appointments from their conquerors.—G. M. B.

PUBLIUS (Πόπλιος), governor of Melita at the time of Paul's shipwreck on that island (Acts xxviii. 7, 8). Paul having healed his father, probably enjoyed his hospitality during the three months of his stay in the island. An inscription found in Malta designates the governor of the island by the same title (πρῶτος, 'first' or 'chief'), which Luke gives to Publius [Melita].

PUDENS (Πούδης), one of the persons whose salutations Paul, writing from Rome, sends to Timothy (2 Tim. iv. 21). Nothing is really known of him; but the martyrologies make him to have been a person of figure at Rome, of the senatorial order, and father of two pious virgins, Praxis and Pudentia. Yet, by a strange incongruity, he is also deemed to have been one of the seventy disciples. A female disciple, of the name of Claudia (Κλαυδία), is mentioned in the same verse; and as a poet of the time, Martial, speaks of the marriage of a Pudens and Claudia, the same persons are supposed to be intended. But this sort of identification requires little notice; and if Pudens and Claudia were husband and wife, it is unlikely that the apostle would have interposed another name between theirs.

PUL, king of Assyria [Assyria].

PULSE. [Pol.]

PUNISHMENTS. This subject is properly restricted to the penalty imposed on the commission of some crime or offence against law. It is thus distinguished from private retaliation or revenge, cruelty, torture, popular violence, certain customs of war, &c. Human punishments are such as are inflicted immediately on the person of the offender, or indirectly upon his goods, &c. For the leading points in the literature of the question concerning future and divine punishment see Soul. *Capital punishment* is usually supposed to have been instituted at the deluge (Gen. ix. 5, 6): 'At the hand of every man's brother will I require the life of man: whoso sheddeth man's blood, by man shall his blood be shed; for in the image of God made he man.' Arnheim, however, contends that the, words איש אחיו, must be rendered *his kinsman*, or near relative (compare xiii. 8, אנשים אחים, or margin), and thus explains the precept: if האדם, one stranger slay another, the kinsmen of the murdered man are the avengers of blood; but if he be slain by איש אחיו, one of his own kindred, the other kinsmen must not spare the murderer, for if they do, then divine providence will require the blood—that is, will avenge it. Certainly capital punishment for murder was not inflicted on Cain, who was purposely preserved from death by divine interposition (iv. 14, 15), and was simply doomed to banishment from the scene of his crime to a distant country, to a total disappointment in agricultural labour, and to the life of a fugitive and a vagabond, far from the manifested presence of the Lord (11, 14); although the same reason existed in equal force in his case, namely, the creation of man in the image of God. We are inclined to regard the whole of the 'blessing' pronounced upon the *Noachidæ*, including this precept, as intended to encourage them to re-people the earth, by promises, &c., corresponding to the misgivings which were naturally created by the catastrophe they had just escaped; such as a *continuation* of the dread of man in the inferior creatures, a reinstatement of man in dominion over them (comp. i. 28), an assurance of God's high regard for human life, notwithstanding his late destruction of all but themselves, and the institution of the most natural and efficient mode of preserving it, by assigning the punishment of homicide to the nearest of kin, no doubt, however, under the superintendence of the head of every family, who appears to have been the legislator till the reconstitution of things, spiritual and civil, at Sinai, when this among other ancient laws was retained, perhaps unavoidably, but at the same time regulated (Num. xxxv. 9-34). This interpretation would account for the custom of blood-revenge among all the ancient and Asiatic nations. Certainly those who *generalize* this precept into an authority for capital punishment by courts of law in *Christian* nations, ought, by parity of reason, to regard the prohibition of blood (Gen. ix. 4) of equal obligation. The punishment of death appears among the legal powers of Judah, as the head of his family, and he ordered his daughter-in-law, Tamar, to be burnt (xxxviii. 24). It is denounced by the king of the Philistines, Abimelech, against those of his people who should injure or insult Isaac or his wife (xxvi. 11, 29). Similar power seems to have been possessed by the reigning Pharaoh in the time of Joseph (xli. 13).

In proceeding to consider the punishments enacted by Moses, reference will be made to the Scriptures only, because, as Michaelis observes, the explanation of the laws of Moses is not to be sought in the Jewish commentators. Nor will it be necessary to specify the punishments ordered by him for different offences, which will be found under their respective names [Adultery, Idolatry, &c.]. The extensive prescription of capital punishment by the Mosaic law, which we cannot consider as a dead letter, may be accounted for by the peculiar circumstances of the people. They were a nation of newly-emancipated slaves, and were by nature perhaps more than commonly intractable; and if we may judge by the laws enjoined on them, which Mr. Hume well remarks are a safe index to the manners and disposition of any people, we must infer that they had imbibed all the degenerating influences of slavery among heathens. Their wanderings and isolation did not admit of penal settlements or remedial punishments. They were placed under immediate divine government and surveillance. Hence, wilful offences evinced an incorrigibleness, which rendered death the only means of ridding the community of such transgressors; and which was ultimately resorted to in regard to all individuals above a certain age, in order that a better class might enter Canaan (Num. xiv. 29, 32, 35). If capital punishment in Christian nations be defended from the Mosaic law, it ought in fairness to be extended to all the cases sanctioned by that law, and among the rest, as Paley argues, to the doing of any work on the Sabbath-day (*Mor. Phil.*, b. v. ch. 7). We have the highest authority for saying, that the Mosaic law of divorce

was a condescension to circumstances (Matt. xix. 8)—a condescension which may have extended somewhat further.

The *mode of capital punishment*, which constitutes a material element in the character of any law, was probably as humane as the circumstances of Moses admitted. It was probably restricted to lapidation or stoning, which, by skilful management, might produce instantaneous death. It was an Egyptian custom (Exod. viii. 26). The public effusion of blood by decapitation cannot be proved to have been a Mosaic punishment, nor even an Egyptian; for, in the instance of Pharaoh's chief baker (Gen. xl. 19), 'Pharaoh shall lift up thine head from off thee,' the marginal rendering seems preferable, 'shall reckon thee and take thine office from thee.' He is said to have been 'hanged' (xli. 13); which may possibly mean posthumous exposure, though no independent evidence appears of this custom in ancient Egypt (Wilkinson's *Manners and Customs*, vol. ii. p. 45). The appearance of decapitation, 'slaying by the sword,' in later times (2 Sam. iv. 8, 20, 21, 22; 2 Kings x. 6-8) has no more relation to the Mosaic law than the decapitation of John the Baptist by Herod (Matt. xiv. 8-12); or than the hewing to pieces of Agag before the Lord by Samuel, as a punishment *in kind* (1 Sam. xv. 33); or than the office of the Chereth-ites, כרתי (2 Sam. viii. 18; xv. 18; xx. 7, 23), or headsmen, as Gesenius understands by the word, from כרת, 'to chop off' or 'hew down' (executioners belonging to the body-guard of the king); whereas execution was ordered by Moses, probably adopting an ancient custom, to be begun first by the witnesses, a regulation which constituted a tremendous appeal to their moral feelings, and afterwards to be completed by the people (Deut. xiii. 10; xvii. 7; Josh. vii. 25; John viii. 7). It was a later innovation that immediate execution should be done by some personal attendant, by whom the office was probably considered as an honour (2 Sam. i. 15; iv. 12). Stoning therefore was, probably, the only capital punishment ordered by Moses. It is observable that neither this nor any other punishment was, according to his law, attended with insult or torture (comp. 2 Macc. vii.). Nor did his laws admit of those horrible mutilations practised by other nations. For instance, he prescribed stoning for adulterers (comp. Lev. xx. 10; Ezek. xxiii. 25; xvi. 38, 40; John viii. 5); but the Chaldæans cut off the noses of such offenders (Ezek. xxiii. 25). According to Diodorus, the Egyptian monarch, Actisanes, punished robbers in like manner, and banished them to the confines of the desert, where a town was built called Rhinocolura, from the peculiar nature of their punishment, and where they were compelled to live by their industry in a barren and inhospitable region (i. 60). Mutilation of such a nature amounts to a perpetual condemnation to infamy and crime. It will shortly be seen that the *lex talionis*, 'an eye for an eye,' &c., was adopted by Moses as the *principle*, but not the mode of punishment. He seems also to have understood the true end of punishment, which is not to gratify the antipathy of society against crime, nor moral vengeance, which belongs to God alone, but prevention. 'All the people shall hear and fear, and do no more so presumptuously' (Deut. xvii. 13; xxix. 20). His laws are equally free from the characteristic of savage legislation, that of involving the family of the offender in his punishment. He did not allow parents to be put to death for their children, nor children for their parents (Deut. xxiv. 16), as did the Chaldæans (Dan. vi. 24), and the kings of Israel (comp. 1 Kings xxi.; 2 Kings ix. 26). Various punishments were introduced among the Jews, or became known to them by their intercourse with other nations,—viz., *precipitation*, or throwing, or causing to leap, from the top of a rock: to which ten thousand Idumæans were condemned by Amaziah, king of Judah (2 Chron. xxv. 12). The inhabitants of Nazareth intended a similar fate for our Lord (Luke iv. 29). This punishment resembles that of the Tarpeian rock among the Romans. *Dichotomy*, or *cutting asunder*, appears to have been a Babylonian custom (Dan. ii. 5; iii. 29; Luke xii. 46; Matt. xxiv. 51); but the passages in the Gospels admit of the milder interpretation of scourging with severity, discarding from office, &c. *Beating to death*, τυμπανισμός, was a Greek punishment for slaves. It was inflicted on a wooden frame, which probably derived its name from resembling a drum or timbrel in form, on which the criminal was bound and beaten to death (2 Macc. vi. 19, 28; comp. v. 30). In Josephus (*de Macc.*) the same instrument is called τροχός, or 'wheel' (§§ 5, 9). Hence to beat upon the tympanum, to drum to death, is similar to 'breaking on the wheel' (Heb. xi. 35). David inflicted this among other cruelties upon the inhabitants of Rabbath-ammon (1 Chron. xx. 3). *Fighting with wild beasts* was a Roman punishment, to which criminals and captives in war were sometimes condemned (Adam, *Roman Antiq.*, p. 344; 2 Tim. iv. 17; comp. 1 Cor. xv. 32). *Drowning* with a heavy weight around the neck, was a Syrian, Greek, and Roman punishment. This, therefore, being the custom of the enemies of the Jews, was introduced by our Lord to heighten his admonitions (Matt. xviii. 6). Josephus records that the Galileans, revolting from their commanders, drowned the partizans of Herod (*Antiq.* xiv. 15. 20). The Persians had a singular punishment for great criminals. A high tower was filled a great way up with ashes, the criminal was thrown into it, and the ashes by means of a wheel were continually stirred up and raised about him till he was suffocated (2 Macc. xiii. 4-6. *The lion's den* was a Babylonian punishment (Dan. vi.), and is still customary in Fez and Morocco (see accounts of by Hoest. c. ii. p. 77). *Bruising and pounding to death in a mortar* is alluded to in Prov. xxvii. 22. For crucifixion, see the Article.

Posthumous insults offered to the dead bodies of criminals, though common in other nations, were very sparingly allowed by Moses. He *permitted* only hanging on a tree or gibbet; but the exposure was limited to a day, and burial of the body at night was commanded (Deut. xxi. 22). Such persons were esteemed 'cursed of God' (comp. Josh. viii. 29; x. 26; 2 Sam. iv. 12)—a law which the later Jews extended to crucifixion (John xix. 31, &c.; Gal. iii. 13). *Hanging alive* may have been a Canaanitish punishment, since it was practised by the *Gibeonites* on the sons of Saul (2 Sam. xxi. 9). Another posthumous insult in later times consisted in heaping stones on the body or grave

of the executed criminal (Josh. vii. 25, 26). To 'make heaps' of houses or cities is a phrase denoting complete and ignominious destruction (Isa. xxv. 2; Jer. ix. 11). *Burning the dead body* seems to have been a very ancient posthumous insult: it was denounced by Judah against his daughter-in-law, Tamar, when informed that she was with child (Gen. xxxviii. 24). Selden thinks that this means merely branding on the forehead (*De Jure N. et G.*, vii. 5). Moses retained this ancient ignominy for two offences only, which from the nature of things must have been comparatively rare, viz., for *bigamy* with a mother and her daughter (Lev. xx. 4), and for the case of a priest's daughter who committed whoredom (xxi. 9). Though 'burning' only be specified in these cases, it may be safely inferred that the previous death of the criminals, probably by lapidation, is to be understood (comp. Josh. vii. 25). Among the heathens this merciful preliminary was not always observed, as for instance in the case of Shadrach, Meshach, and Abednego (Dan. iii.).

Among the *minor corporal punishments* ordered by Moses, was scourging; or the infliction of blows on the back of an offender with a rod. It was limited by him to forty stripes, a number which the Jews in later times were so careful not to exceed, that they inflicted but thirty-nine (2 Cor. xi. 24). It was to be inflicted on the offender lying on the ground, in the presence of a judge (Lev. xix. 20; Deut. xxii. 18; xxv. 2, 3). We have abundant evidence that it was an ancient Egyptian punishment. Nor was it unusual for Egyptian superintendents to stimulate labourers to their work by the persuasive powers of the stick. Women received the stripes on the back, while sitting, from the hand of a man; and boys also, sometimes with their hands tied behind them. The modern inhabitants of the valley of the Nile retain the predilection of their forefathers for this punishment. The Moslem say 'Nezel min e'semma e'nebóot báraka min Allah:' 'The stick came down from heaven a blessing from God.' Corporal punishment of this kind was allowed by Moses, by masters to servants or slaves of both sexes (Exod. xxi. 20). Scourging was common in after times among the Jews, who associated with it no disgrace or inconvenience beyond the physical pain it occasioned, and from which no station was exempt (Prov. xvii. 26; comp. x. 13; Jer. xxxvii. 15-20). Hence it became the symbol for correction in general (Ps. lxxxix. 32). Solomon is a zealous advocate for its use in education (Prov. xiii. 24; xxiii. 13, 14; comp. Eccles. xxx. 1). In his opinion 'the blueness of a wound cleanseth away evil, and stripes the inward parts of the belly' (Prov. xx. 30). It was inflicted for ecclesiastical offences in the synagogue (Matt. x. 17; Acts xxvi. 11). The Mosaic law, however, respecting it, affords a pleasing contrast to the extreme and unlimited scourging known among the Romans, but which, according to the Porcian law, could not be inflicted upon a Roman citizen (Cicero, *Pro Rabirio*, 3; *ad Famil.* x. 32; *in Verrem*, v. 53; comp. Acts xvi. 22-37; xxii. 25). Reference to the scourge with scorpions, *i. e.* a whip or scourge armed with knots or thorns, occurs in 1 Kings xii. 11. So in Latin, scorpio means 'virga nodosa vel aculeata.'

Retaliation, the lex talionis of the Latins, and the ἀντιπεπονθὸς of the Greeks, is doubtless the most natural of all kinds of punishment, and would be the most just of all, if it could be instantaneously and universally inflicted. But when delayed it is apt to degenerate into revenge. Hence the desirableness that it should be regulated and modified by law. The one-eyed man, mentioned by Diodorus Siculus (xii.), complained that if he lost his remaining eye, he would then suffer more than his victim, who would still have one left. Phavorinus argues against this law, which was one of the twelve tables, as not admitting literal execution, because the same member was more valuable to one man than another; for instance, the right hand of a scribe or painter could not be so well spared as that of a singer. Hence that law, in later times, was administered with the modification, 'Ni cum eo pacet,' except the aggressor came to an agreement with the mutilated person, *de talione redimenda*, redeem the punishment by making compensation. Moses accordingly adopted the principle, but lodged the application of it in the judge. 'If a man blemish his neighbour, as he hath done, so shall it be done to him. Life for life, eye for eye, tooth for tooth, wound for wound, stripe for stripe, breach for breach' (Exod. xxi. 23-25; Lev. xxiv. 19-22). His system of compensations, &c., occurs in Exod. xxi. He, however, makes wilful murder, even of a slave, always capital, as did the Egyptians. Roman masters had an absolute right over the life of their slaves (Juvenal, vi. 219). The Egyptians doomed the false accuser to the same punishment which he endeavoured to bring on his victim, as did Moses (Deut. xix. 19). Imprisonment, not as a punishment, but custody, till the royal pleasure was known, appears among the Egyptians (Gen. xxxix. 20, 21). Moses adopted it for like purposes (Lev. xxvi. 12). In later times, it appears as a punishment inflicted by the kings of Judah and Israel (2 Chron. xvi. 10; 1 Kings xxii. 27; Jer. xxxvii. 21); and during the Christian era, as in the instance of John (Matt. iv. 12), and Peter (Acts xii. 4). Murderers and debtors were also committed to prison; and the latter 'tormented' till they paid (Matt. xviii. 30; Luke xxiii. 19). A common prison is mentioned (Acts v. 18); and also an inner prison or dungeon, which was sometimes a pit (Jer. xxxviii. 6), in which were 'stocks' (Jer. xx. 2; xxix. 26; Acts xvi. 24). Prisoners are alluded to (Job iii. 18), and stocks (xiii. 27). Banishment was impracticable among the Jews. It was inflicted by the Romans on John (Rev. i. 9). *Cutting or plucking off the hair* is alluded to (Isa. l. 6; Nehem. xiii. 25). *Excision*, or 'cutting off from his people,' is denounced against the uncircumcised as early as the covenant with Abraham (Gen. xvii. 14). This punishment is expressed in the Mosaic law by the formulæ—'that soul shall be destroyed from its people' (Lev. xvii. 20, 21); 'from Israel' (Exod. xii. 15); 'from the midst of the congregation' (Num. xix. 20); 'it shall be destroyed' (Lev. xvii. 14; xx. 17); which terms sometimes denote capital punishment (Exod. xxxi. 14; comp. xxxv. 2; Num. xv. 32, &c.) [ANATHEMA].

Ecclesiastical punishments are prescribed, as might be expected, under a theocracy, but these were moderate. Involuntary transgressions of the

Levitical law, whether of omission or commission, were atoned for by a sin-offering (Lev. iv. 2, &c.; v. 1, 4-7). This head embraced a rash or neglected oath, keeping back evidence in court (Lev. iv. 2, &c.; v. 1; iv. 7), breach of trust, concealment of property when found, or theft, even when the offender had already cleared himself by oath, but was now moved by conscience to make restitution. By these means, and by the payment of twenty per cent. beyond the amount of his trespass, the offender might cancel the crime as far as the church was concerned (Lev. vi. 1-7; Num. v. 6-10). Adultery with a slave was commuted from death to stripes and a trespass-offering (Lev. xix. 20-22). All these cases involved public confession, and the expenses of the offering.

Future punishment.—Though the doctrine of a future state was known to the ancient Hebrews, yet temporal punishment and reward were the immediate motives held out to obedience. Hence the references in the Old Testament to punishment in a future state are obscure and scanty. See HADES; HEAVEN; HELL.—J. F. D.

PUNON, one of the stations of the Israelites in the desert [WANDERING].

PURIFICATIONS [ABLUTIONS, UNCLEANNESS].

PURIM (פּוּרִים, Esther iii. 7; ix. 24, sq., from פּוּר, supposed to be the Persic for a 'lot'), a celebrated Jewish festival instituted by Mordecai, at the suggestion of Esther, in the reign of Ahasuerus, king of Persia, to commemorate the deliverance of the Jews from the designs of Haman [ESTHER; HAMAN; MORDECAI]. It derived its name from the *lots* cast every day for twelve months in presence of Haman, with the view of discovering an auspicious day for the destruction of all the Jews in the Persian dominions; when the lot fell on the 13th day of Adar (February and part of March) [FESTIVALS].

The celebration of this festival is next referred to in 2 Macc. xv. 36, where it is denominated Mordecai's day (ἡ Μαρδοχαϊκὴ ἡμέρα) [MACCABEES]. It is also mentioned by Josephus (*Antiq.* xi. 6), who, having observed that the Jews in Shushan feasted on the fourteenth day (of Adar), and that which followed it, says, 'Even now all the Jews in the habitable world keep these days festival, and send portions one to another;' and after referring to the deliverance of the Jews by Divine protection, he adds, 'for which cause the Jews keep the forementioned days, calling them Phruræan days (ἡμέραι φρουραίαι).' It is disputed whether the word employed by Josephus (φρουραίαι) arose from an error of transcription, or whether the historian may not have confounded the name Purim with פְּרוּרִים, which, according to some, implies *protection*. The Talmud makes frequent mention of this feast. In the *Jerusalem Megillah* (p. 704) it is observed that 'there were seventy-five elders, above thirty of whom were prophets, who made exceptions against the feast of Purim ordained by Esther and Mordecai, as some kind of innovation against the law' (see Lightfoot, on John x. 22). Maimonides remarks that it is forbidden to weep or fast on this day.

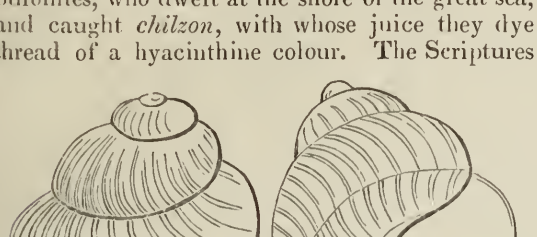
It has been sharply contested whether there is any reference in the New Testament to this feast. It is recorded in St. John's Gospel (v. 1), that 'after these things was the feast of the Jews (ἡ ἑορτὴ τῶν Ἰουδαίων)', or rather, perhaps, *a* feast, as the article is wanting in several manuscripts. It has been held by Outrein, Lamy, and Hug, and still more recently by Tholuck and Lücke, that the feast of Purim is here meant. The reasons on which this opinion is grounded will be found fully detailed in Hug's *Introd.* (part ii. § 64), and in Lücke's *Comment. on St. John's Gospel* (see the English translation of Lücke's *Dissertation* in the appendix to Tittmann's *Meletemata Sacra, or a Commentary on St. John's Gospel*, in *Bib. Cabinet*, vol. xlv. Hengstenberg, on the other hand (*Christology*, vol. ii., 'On the Seventy Weeks of Daniel,' pp. 408-414, Engl. transl., Washington (U. S.), 1839), opposes this hypothesis by many ingenious arguments, and holds it to be inconceivable that our Lord, 'who never mentions the book of Esther, whose apostles nowhere appeal to it, should have sought this feast consecrated to the remembrance of an event described in this book.' Not that he wishes to 'impugn the authority of the book of Esther, but because, in regard to the true standard, its reference to Christ, it undoubtedly holds the lowest place among all the books in the Old Testament.' It would appear from this, that Professor Hengstenberg follows Luther's 'touchstone' of canonicity [DEUTEROCANONICAL]. Those who do not consider Purim to be the feast referred to in John v. 1, are divided between the Passover, the Feast of Dedication, and that of Pentecost: Hengstenberg, with the majority of commentators, supports the last. Lücke concludes his able dissertation by observing that all sure grounds of deciding between Purim and the Passover are wanting.

The particulars of the mode in which the Jews observe this festival will be found detailed by Buxtorf (*Synag. Jud.*) and Schikford (*De Synagoga*, in the *Critici Sacri*, vol. ii. p. 1185). We shall select a few of the most striking. The book of Esther, written on a separate roll of parchment, called on this account Megillah Esther, or simply Megillah, is read from beginning to end; and even the reading of the law is on this day postponed to it. It may be also read in any language which the reader understands. When Mordecai's name occurs, the whole congregation exclaim, *Blessed be Mordecai!* and, on mention of that of Haman, they say, *May his name perish!* and it is usual for the children to hiss, spring rattles, strike the walls with hammers, and make all sorts of noises. These noisy portions of the ceremony have, however, been long discontinued in England, except in the synagogues of some foreign Jews. The remainder of the day is spent in festivity, in commemoration of Esther's feast; upon which occasion the Jews send presents to each other, the men to the men, and the women to the women. They also bestow alms on the poor, from the benefit of which Christians and other Gentiles are not excluded. Plays and masquerades follow; nor is it considered a breach of the law of Moses on this occasion, for men and women to assume the garb of the other sex. It is even written in the Talmud (*Tract. Megill.* vii. 2), that a man should drink until he cannot discern the words 'Cursed be Haman' from 'Blessed be Mordecai.' But these injunctions are certainly not considered as binding; and the modern Jews, both at the feast of Purim and in their general habits, are remarkable for their temperance and sobriety. Hatach (Esther iv.

and v.) is considered by the Jews to be the same with Daniel. Purim is the last festival in the Jewish ecclesiastical year, being succeeded by the next Passover.—W. W.

PURPLE, BLUE, CRIMSON, SCARLET. 1. *Purple* (ארגמן) occurs in Exod. xxv. 4; xxvi. 1, 31, 36; xxvii. 16; xxviii. 5, 6, 8, 15, 33; xxxv. 6, 23, 25, 35; xxxvi. 8, 35, 37; xxxviii. 18, 23; xxxix. 1, 2, 3, 5, 8, 24, 29; Num. iv. 13; Judg. viii. 26; 2 Chron. ii. 7, 14; iii. 14; Est. i. 6; viii. 15; Prov. xxxi. 22; Cant. iii. 10; vii. 5; Jer. x. 9; Ezek. xxvii. 7, 16; Ecclus. xlv. 10; Bar. vi. 12, 72; 1 Macc. iv. 23; viii. 14; x. 20, 62; 2 Macc. iv. 38; Mark xv. 17, 20; Luke xvi. 19; John xix. 2, 5; Acts xvi. 14; Rev. xvii. 4; xviii. 12, 16. Chald. ארגון, occurs in 2 Chron. ii. 7; ארגונא, Dan. v. 7, 16, 29; Sept. and Greek Test., πορφύρα; Vulg. *purpura*. In many of these passages, the word translated 'purple' means 'purple cloth,' or some other material dyed purple, as wool, thread, &c.; but no reference occurs to the means by which the dye was obtained, except in 1 Macc. iv. 23, where we have πορφύρα θαλλασσία, 'purple of the sea' (comp. Diod. Sic. iii. 68; Joseph. *De Bell. Jud.* v. 5. 4). There is, however, no reason to doubt that it was obtained, like the far-famed Tyrian purple, from the juice of certain species of shell-fish. Different accounts are given by the ancients respecting the date and origin of this invention. Some place it in the reign of Phœnix, second king of Tyre, B.C. 500. Others at the time that Minos the First reigned in Crete, B.C. 1439, and consequently before the Exodus (Suidas, *s. v.* Ἡρακλῆς, tom. ii. p. 73). But the person to whom the majority ascribe it, is the Tyrian Hercules, whose dog, it is said, instigated by hunger, broke a certain kind of shell-fish on the coast of Tyre, and his mouth becoming stained of a beautiful colour, his master was induced to try its properties on wool, and gave his first specimens to the king of Tyre, who admired the colour so much that he restricted the use of it by law to the royal garments (Pollux, *Onom.* i. 4; Achilles Tatius, *De Clitoph.*; Palæphat. in *Chron. Paschal.*, p. 43). It is remarkable, that though the Israelites, as early as the first construction of the tabernacle in the wilderness, appear to have had purple stuff in profusion (Exod. xxv. 1-4), which they had most likely brought with them out of Egypt, yet no instance occurs in the pictorial language of the Egyptians, nor in Wilkinson's *Ancient Manners and Customs*, of the actual manufacture of dyeing either linen or woollen, although dyes similar to the Tyrian were found among them. These facts agree, at least, with the accounts which ascribe the invention to the earliest of these two periods, and the pre-eminent trade in it to the Tyrians. The Greeks attributed its first introduction among themselves to the Phœnicians (Eurip. *Phœn.* 1497). Their word φοίνιξ means both a 'Phœnician' and 'purple.' The word πορφύρα is, according to Martinius, of Tyrian origin. Though purple dyes were by no means confined to the Phœnicians (comp. Ezek. xxvii. 7, 'purple from the isles of Elisha,' supposed to mean Elis, 'and from Syria,' ver. 16), yet violet purples and scarlet were nowhere dyed so well as at Tyre, whose shores abounded with the best kind of purples (Pliny, *Hist. Nat.* ix. 60, p. 524, ed. Harduin), and who were supplied with the best wool by the neighbouring nomads. The dye called purple by the ancients, and its various shades, were obtained from many kinds of shell-fish, all of which are, however, ranged by Pliny under two classes: one called 'buccinum,' because shaped like a horn, found, he says, in cliffs and rocks, and yielding a sullen blue dye, which he compares to the colour of the angry raging sea in a tempest; the other called 'purpura,' or 'pelagia,' the proper purple shell, taken by fishing in the sea, and yielding the deep red colour which he compares to the rich, fresh, and bright colour of deep-red purple roses—'nigrantis rosæ colore sublucens'—and to coagulated blood, and which was chiefly valued. 'Laus ei summa in colore sanguinis concreti' (*Ibid.* cap. 61, 62). It is the *Murex trunculus* of Linnæus and Lamarck (see *Syst. Nat.* p. 1215, and *Animaux sans Vertebres*, Paris, 1822, t. vii. p. 170). Both sorts

464. [Murex trunculus.]



were supposed to be as many years old as they had spirals round. Michaelis thinks that Solomon alludes to their shape, when he says (Cant. vii. 5), 'The hair of thine head is like purple;' meaning that the tresses (πλόκιον κεφαλῆς, Sept.; *comæ capitis*, Vulg.) were tied up in a spiral or pyramidal form on the top. Others say that the word 'purple' is here used like the Latin *purpureus*, for beautiful, &c., and instance the 'purpurei olores,' 'beautiful swans' of Horace (*Carm.* iv. 1. 10), and the 'purpureus capillus' of Virgil (*Georg.* i. 405); but these phrases are not parallel. The juice of the whole shell-fish was not used, but only a little thin liquor called the flower, contained in a white vein or vessel in the neck. The larger purples were broken at the top to get at this vein without injuring it, but the smaller were pressed in mills (Aristot. *Hist. An.*, v. 13. 75; Pliny, *Hist. Nat.* ix. 60). The *Murex trunculus* has been demonstrated to be the species used by the ancient Tyrians, by Wilde, who found a concrete mass of the shells in some of the ancient dye-pots sunk in the rocks of Tyre (*Narrative*, Dublin, 1840, vol. ii. p. 482). It is of common occurrence now on the same coasts (Kitto's *Physical History of Palestine*, p. 418), and throughout the whole of the Mediterranean, and even of the Atlantic. In the Mediterranean, the countries most celebrated for purples were the shores of Peloponnesus and Sicily, and in the Atlantic, the coasts of Britain, Ireland, and France. Horace alludes to the African (*Carm.* ii. 16. 35). There is, indeed, an essential difference in the colour obtained from the purples of different coasts. Thus the shells

from the Atlantic are said to give the darkest juice; those of the Italian and Sicilian coasts, a violet or purple; and those of the Phœnician, a crimson. It appears from the experiments of Reaumur and Duhamel, that the tinging juice is perfectly white while in the vein; but upon being laid on linen, it soon appears first of a light green colour, and if exposed to the air and sun, soon after changes into a deep green, in a few minutes into a sea green, and in a few more into a blue: thence it speedily becomes of a purple red, and in an hour more of a deep purple red, which, upon being washed in scalding water and soap, ripens into a most bright and beautiful crimson, which is permanent. The ancients applied the word translated 'purple,' not to one colour only, but to the whole class of dyes manufactured from the juices of shell-fish, as distinguished from the vegetable dyes (*colores herbacei*), and comprehending not only what is commonly called purple, but also light and dark purple, and almost every shade between. Various methods were adopted to produce these different colours.

Thus, a sullen blue was obtained from the juice of the buccinum alone; a plain red, yet too deep and brown, from the pelagia; a dark red by dipping the wool, &c., first in the juice of the purpura, and then in that of the buccinum; a violet (which was the amethyst colour so much valued by the Romans) by reversing the process; and another, the most valued and admired of all, the Tyriamethystus, by again dipping the amethyst in the juice of the pelagia. This Pliny calls *dibapha Tyria;* so named he says, because 'bis tincta' (*Hist. Nat.* ix. 39). No reference to this process occurs in the Scriptures, but it is often alluded to in Roman authors. Thus Horace (*Epod.* xii. 21): Muricibus Tyriis iteratæ vellera lanæ. 'The wools with Tyrian purple double dyed.' Other varieties of colour may have been produced by the use of various species of mollusca, and of those from different coasts. The Phœnicians also understood the art of throwing a peculiar lustre into this colour, by making other tints play over it, and producing what we call a shot colour, which seems to have been wonderfully attractive (Pliny, ix. 41). Purple was employed in religious worship both among Jews and Gentiles. It was one of the colours of the curtains of the tabernacle (Exod. xxvi. 1); of the vail (31); of the curtain over the grand entrance (36); of the ephod of the high priest (xxviii. 5, 6), and of its girdle (8); of the breast-plate (15); of the hem of the robe of the ephod (33); (comp. Ecclus. xlv. 10); of cloths for divine service (Exod. xxxix. 1; comp. Num. iv. 13); resumed when the temple was built (2 Chron. ii. 7, 14; iii. 14). Pliny records a similar use of it among the Romans: 'Diis advocatur placandis' (*Hist. Nat.* ix. 60; Cicero, *Epist. ad Atticum*, ii. 9). The Babylonians arrayed their idols in it (Jer. x. 9; Baruch xii. 72). It was at an early period worn by kings (Judg. viii. 26). Homer speaks as if it were almost peculiar to them (*Il.* iv. 144; 1 Macc. viii. 14). Pliny says it was worn by Romulus and the succeeding kings of Rome, and by the consuls and first magistrates under the republic. Suetonius relates that Julius Cæsar prohibited its use by Roman subjects, except on certain days; and that Nero forbade it altogether, upon pain of death. The use of it was bestowed by kings upon favorites, &c.; Josephus says by Pharaoh on Joseph (*Antiq.* ii. 5. 7). It was given by Ahasuerus to Mordecai (Esth. viii. 15); to Daniel by Belshazzar (Dan. v. 7, 16, 29). It was the dress of an ethnarch or prince, and as such given by Alexander to Jonathan (1 Macc. x. 20, 62, 64, 65; comp. 2 Macc. iv. 38). In the last chapter of the Proverbs it is represented as the dress of a matron (ver. 22). It was at one time worn by Roman ladies and rich men (Livy, xxxiv. 7, and Valerius Max. ii. 1). See also the parable of the rich man and Lazarus (Luke xvi. 19). In Esther i. 6, it appears as part of the royal furniture of Ahasuerus; and in Cant. iii. 10, as the covering of the royal chariot; and Pliny refers to its general use, not only for clothes, but carpets, cushions, &c. (39). The robe in which the Prætorian guard arrayed the Saviour, called χλαμὺς κοκκίνη by Matthew (xxvii. 28), and πορφύρα by Mark (xv. 17, 20), and ἱμάτιον πορφυροῦν by John (xix. 2), and which appears to have been the cast-off sagum of one of their officers, was no doubt scarlet—that is, proper *crimson*, as will hereafter appear—of a deeper hue and finer texture than the sagum or chlamys of the common soldier, but inferior in both respects to that of the emperor, which was also of this colour in the time of war, though purple during peace. The adjectives used by the Evangelists are, however, often interchanged. Thus a vest, which Horace (*Sat.* ii. 6. 102) calls 'rubro cocco tincta,' in l. 106, he styles 'purpurea.' Braunius shows that the Romans gave this name to any colour that had a mixture of red (*De Vestitu Sacerdotum*, i. 14, Ludg. Bat. 1680). Ovid applies the term purpureus to the cheeks and lips (*Amor.* i. 3). In Acts x. 14, reference is found to Lydia, of the city of Thyatira, a seller of purple cloth. The manufacture seems to have decayed with its native city. A colony of Jews, which was established at Thebes in Greece in the twelfth century, carried on an extensive manufactory for dyeing purple. It ultimately became superseded by the use of indigo, cochineal, &c., whence a cheaper and finer purple was obtained, and free from the disagreeable odour which attended that derived from shell-fish (Martial, i. 50. 32). The method of the ancients in preparing and applying it, and other particulars respecting its history, uses, and estimation, are most fully given by Pliny (*Hist.Nat.* ix. 36-42). The best modern books are Amati, *De Restitutione Purpurarum*, 3rd ed., Cesena, 1784; the treatise by Capelli, *De Antiqua et Nupera Purpura*, with notes; and Don Michaele Rosa, *Dissertazione delle porpore*, &c. 1768. See also *Dictionnaire des Sciences Naturelles*, tom. xliii. p. 219, &c.; Bochart, edit. Rosenmüller, tom. iii. p. 675, &c.; Heeren's *Historical Researches*, translated, Oxford, 1833, vol. ii. p. 85, &c.

2. *Blue* (תכלת), almost constantly associated with purple, occurs in Exod. xxv. 4; xxvi. 1, 4, 31, 36; xxvii. 16; xxviii. 5-8, 15, 33, 37; xxxv. 25; xxxvi. 11; xxxix. 1-5, 22, 31; Num. iv. 6, 7, 9, 11, 12; xv. 38; 2 Chron. ii. 7, 14; Esth. i. 6; viii. 15; Jer. x. 9; Ezek. xxiii. 6; xxvii. 7, 24; Sept. generally ὑάκινθος, ὑακινθίνος; and in Ecclus. xl. 4; xlv. 10; 1 Macc. iv. 23; and so Josephus, Philo, Aquila, Symmachus,

Theodotion, Vulgate, and Jerome. This colour is supposed to have been obtained from another purple shell-fish of the Mediterranean, the *conchylium* of the ancients, the *Helix ianthina* of Linnæus (*Syst. Nat.* tom. i. part 7, p. 3645; and see Forskal's *Descriptio Animal.* p. 127), called חלזון by the ancient Jews. Thus the pseudo-Jonathan, in Deut. xxxiii. 19, speaks of the Zebulonites, who dwelt at the shore of the great sea, and caught *chilzon*, with whose juice they dye thread of a hyacinthine colour. The Scriptures

465. [Helix ianthina.]

afford no clue to this colour; for the only passages in which it seems, in the English version, to be applied to something that might assist our conceptions, are mistranslated, namely, 'The blueness of a wound' (Prov. xx. 30), and 'A blue mark upon him that is beaten' (Ecclus. xxiii. 10), there being no reference to colour in the original of either. The word in the Sept. and Apocrypha refers to the hyacinth; but both the flower and stone, so named by the ancients, are disputed, especially the former. Yet it is used to denote dark-coloured and deep purple. Virgil speaks of *ferrugineos hyacinthos*, and Columella compares the colour of the flower to that of clotted blood, or deep, dusky red, like rust (*De Re Rust.* x. 305). Hesychius defines *ὑακίνθινον· ὑπομελανίζον, πορφυρίζον.* It is plainly used in the Greek of Ecclus. xl. 4 for the royal purple. Josephus evidently takes the Hebrew word to mean 'sky-colour;' for in explaining the colours of the vail of the temple, and referring to the blue (Exod. xxvi. 31), he says that it represented the air or sky (*De Bell. Jud.* v. 4): he similarly explains the vestment of the high-priest (*Antiq.* iii. 7. 7; and see Philo, *Vita Mosis*, iii. p. 148, tom ii. ed. Mangey). These statements may be reconciled by the fact, that in proportion as the sky is clear and serene, it assumes a dark appearance, which is still more observable in an eastern climate. The chief references to this colour in Scripture are as follows:—The robe of the high-priest's *ephod* was to be all of blue (Exod. xxviii. 31); so the loops of the curtains to the tabernacle (xxvi. 4); the riband for the breastplate (xxviii. 28), and for the plate for the mitre (ver. 37; comp. Ecclus. xlv. 10); blue cloths for various sacred uses (Num. iv. 6, 7, 9, 11, 12); the people commanded to wear a riband of blue above the fringe of their garments (Num. xv. 38); it appears as a colour of furniture in the palace of Ahasuerus (Esth. i. 6), and part of the royal apparel (viii. 15); array of the idols of Babylon (Jer. x. 9); of the Assyrian nobles, &c. (Ezra xxiii. 6; see Braunius, *De Vestitu*, &c., i. 9 and 13; Bochart, tom. iii. p. 670).

3. *Crimson*, ברמיל, occurs in 2 Chron. ii. 7-14; iii. 14; Sept. *κόκκινος*; Vulg. *coccinum.* This word is by some supposed to signify another kind of shell-fish, yielding a crimson dye, so called because found on the shore near Mount Carmel. If so, those words (Cant. vii. 5), 'thine head upon thee is like Carmel,' may contain another reference to the shape of some sort of *purpura* (Bochart, vol. iii. p. 661, &c.). Gesenius says it is a word belonging to later Hebrew, and most probably of Persian or Armenian origin.

4. *Scarlet*, often associated with purple and blue. The words so translated occur in the following forms:—1. שני and שנים, alone, Gen. xxxviii. 28-30; Josh. ii. 18-21; 2 Sam. i. 24; Prov. xxxi. 21; Cant. iv. 3; Jer. iv. 30; Sept. *κόκκινον*; Vulg. *coccinum*; Isa. i. 18, *φοινικοῦν*, *coccinum.* 2. שני תולעת, Exod. xxv. 4; xxvi. 1, 31, 36; xxvii. 16; xxviii. 5, 6, 8, 15; xxxv. 6, 23, 25; xxxviii. 18, 23; xxix. 3; Num. iv. 8; *κόκκινον* and *κόκκινον* with *διπλοῦν, κεκλωσμένον, κλώτον, διανενησμένον*; Vulg. *bis tinctus*, *coccus bis tinctus*, and *vermiculus.* 3. תולעת שני, Lev. xiv. 4, 6, 49, 51, 52; Num. xix. 6; Sept. *κοκκίνον*, with *κεκλωσμένον*, and *κλωστόν*; *vermiculus*, *coccus*, and with *bis tinctus.* 4. תולע, alone, Isa. i. 8, *κόκκινον*, *vermiculus*; Lam. iv. 5; Vulg. *croccis*; Nah. ii. 3, *coccineis.* In the New Testament, Matt. xxvii. 28; Heb. ix. 19; Rev. xvii. 3, 4; xviii. 12, 16; *κόκκινος*, *coccineus.* The first of these words, שני, is by some derived from שנה, 'to repeat,' and is thus interpreted to mean 'double dyed,' *δίβαφον*, but which Gesenius observes is applicable only to the Tyrian purple (see Braunius, *De Vest.* i. 15, § 214, p. 237; Bochart, *Hieroz.* i. 3, p. 525-7). Gesenius prefers the Arabic root سنى *splenduit*, because scarlet garments were admired for their brightness: but Jerome asserts that the word means *coccinum* (*Epist. ad Fabiolam*). It is certain that תולע denotes a worm, grub, or insect, and the Sept. and Vulg. plainly understood by it the *coccus*, from which the ancients procured a blood red crimson dye, the *coccus ilicis* of Linnæus, class iv., tetragynia, the قرمز *kermez* of the Arabians, whence used to be derived the French word *cramoisi*, and our *crimson*; but Kilian gives *carmensinum*, because made from a worm, which, in the Phœnician tongue, is called *carmen.* Hesychius defines *κόκκος· ἐξ οὗ φοινικοῦν βάπτεται τὸ χρωμα.* It was the female of this remarkable insect that was employed; and though supplanted by the cochineal (*coccus cacti*), it is still used for the purpose in India and Persia. It attains the size and form of a pea, is of a violet black colour, covered with a whitish powder, adhering to plants, chiefly various species of oak, and so closely resembling grains, that its insect nature was not generally known for many centuries. According to Beckman, the epithet *vermiculatus* was applied to it during the middle ages, when this fact became generally understood, and that hence is derived the word *vermilion.* Hence the Hebrew words mean both the *coccus* itself, and the deep red or bright rich *crimson* which was derived from it (as in Cant. iv. 3, 'thy lips are like a thread of scarlet'); and so the word '*scarlet*' *signified in the time of our translators*, rather than the colour now called by that name, and which *was*

unknown in the time of James I. This insect is widely distributed over many of the south-eastern countries of the ancient world. It occurs abundantly in Spain (Kirby and Spence, *Introduction to Entomology*, 1828, vol. i. pp. 319-20). It is found on the *quercus coccifera*, or *kermes* oak, in Palestine (Kitto's *Physical History*, p. 219). Pliny speaks of the *coccus* as a red colour much esteemed, which he distinguishes from purple (*Hist. Nat.* ix. 65), and describes as a gay, red,

466. [Coccus ilicis, on a branch.]

lively bright, approaching the colour of fire (*ibid.* and xxi. 22). All the ancients concur in saying that this dye was made from a sort of little grains which were gathered from the holm-oak (Theophrast. *Hist. Plant.* iii. 16; Pliny, xvi. 12; Dioscorides, iv. 48; Pausan. x. 36). They not only call them grains, but speak of them as the vegetable productions of the oak itself, πρίνου καρπόν (Plut. *Thes.* p. 7); and Pliny (*Hist. Nat.* xvi. 12) calls them *cusculia*, from the Greek κοσκύλλειν, which signifies 'to cut little excrescences,' because they cut or scrape off these *small grains of the oak.* Yet he was not entirely ignorant of their insect character, for he says, 'coccum ilicis celerrime in vermiculum se mutans' (xxiv. 4). It seems, however, that the colour, thus obtained, was not durable (xxii. 3). It was known at a very early period in Canaan (Gen. xxxviii. 28); it was one of the colours of the high-priest's *ephod* (Exod. xxviii. 6), and of its girdle (ver. 8), of the breastplate (ver. 15), and of cloths for sacred uses (Num. iv. 8); it was used in cleansing the leper (Lev. xiv. 4), to indicate, as Abarbanel thinks, that a healthy complexion was restored to him. It was the dress of females in the time of Saul (2 Sam. i. 24); of opulent persons in later times (Lam. iv. 5); of the Babylonian and Median soldiers, who also wore red shields (Nahum ii. 4; comp. *Scuta lectissimis coloribus distinguunt*, Tacit. *De Mor. Germ.* c. 6; and Philostratus, *Epist. de Laccdæmoniis.* Three mistranslations of the word occur in our version, 'She is not afraid of the snow for her household; for all her household are clothed with scarlet' (Prov. xxxi. 21). Since there is no connection between the colour and a defence from the cold, it would be better rendered, as in the margin, 'double garments;' Sept. ἐνδεδυμένοι; Vulg. *vestiti duplicibus.* The next verse of the Sept. begins δισσὰς χλαίνας ἐποίησε τῷ ἀνδρὶ αὐτῆς. In Isa. i. 18, and Jer. iv. 30, the word should be rendered 'scarlet' and not 'crimson.' The final reference to scarlet, is in regard to *Pagan* Rome, which, like all cities, is represented as a female; and since everybody wore scarlet in Rome, and especially during war, she is described as being arrayed in that colour. In Exod. xxxix. 3, it is said, 'they did beat gold into their plates, and cut into wires, to work in the blue, and in the purple, and in the scarlet, and in the fine linen;' which is explained to mean that these five kinds, blue, purple, scarlet, fine linen, and gold, were twisted into one thread; thus, a thread of gold with six threads of blue, and so with the rest, after which they twisted all these threads into one (Braunius, i. 17. 26). It seems plain from Exod. xxxv. 25, that the blue, and purple, and scarlet, and fine linen were spun by hand from wool already dyed of these colours. Wilkinson remarks that the colour was in like manner imparted by the Egyptians to the thread, &c., that is, cloth was not dyed after being wove (*Manners and Customs*, vol. iii. p. 125). It will have been perceived that great difficulty attends the attempt to determine the precise distinctions of colours known to the ancients by the various preceding names. The only possible method whereby they could have conveyed them to our minds, would have been by comparing them to the colours of natural objects, whose appearance was immutable, and whose identity was beyond question. Such an attempt has been made by Bishop Wilkins in his *Real Character.* We may illustrate the utility of these requisites by the colour blue, which is defined to mean 'the colour produced or exposed to the view by the *blowing* away, or clearing away or dispersing of the clouds' (*Enc. Metropolitana*). But, as is well known, the shades of ethereal blue vary in different countries, and even in different altitudes of the same country. Hence the word blue, if illustrated by this standard, would convey a different idea to the inhabitants of different regions. It is most likely that all our ideas of sensible impressions are liable to errors of association. It is, however, satisfactory to know, that like all other dubious matters, these are of minor importance. We add a further reference to Goguet's *Origin of Laws, Arts, and Sciences*, vol. ii. p. 95, &c. Edin. 1764.—J. F. D.

PUTEOLI (Ποτίολοι), a maritime town of Campania, in Italy, on the north shore of the bay of Naples, and about eight miles north-west from the city of that name, where it still exists under the name of Pozzuoli. It derived its name from its tepid baths, whence the district in which it exists is now called Terra di Lavoro. The ancient Greek name of the place was Δικαιάρχεια. It was a favourite watering-place of the Romans, as its numerous hot-springs were judged efficacious for the cure of various diseases. It was also the port where ships usually discharged their passengers and cargoes, partly to avoid doubling the promontory of Circeium, and partly because

there was no commodious harbour nearer to Rome. Hence the ship in which Paul was conveyed from Melita, landed the prisoners at this place, where the apostle staid for a week (Acts xxviii. 13). The harbour was protected by a celebrated mole, the remains of which are still to be seen.

Q.

QUAIL (שְׂלָו *selav;* Sept. ὀρτυγομήτρα; Vulg., *coturnix*) occurs in Exod. xvi. 13; Num. xi. 31, 32; Ps. cv. 40. Quails form a subdivision of the *Tetraonidæ*, or grouse family, being distinguished from partridges by their smaller size, finer bill, shorter tail, and the want of a red naked eyebrow and of spurs on the legs. There are several species, whereof the common, now distinguished by the name of *Coturnix dactylisonans*, is abundant in all the temperate regions of Europe and Western Asia, migrating to and from Africa in the proper season. Thus it crosses the Mediterranean and Black Seas twice a-year in vast multitudes; but being by nature a bird of heavy flight, the passage is partially conducted by way of intermediate islands, or through Spain; and in the East, in still greater numbers, along the Syrian desert into Arabia, forming, especially at the spring season, innumerable flocks. They alight exhausted with fatigue, and are then easily caught. Guided by these facts, commentators have been led to identify the Hebrew שלו with the quail; although other species of partridges, and still more of *Pterocles* ('sand grouse'), abound in Western Asia; in particular *Pterocles Alchata*, or *Attagen*, which is found, if possible, in still greater numbers on the deserts, and has been claimed by Hasselquist as the *selav* of Exodus. But the present Arabic name of the quail is *selwa;* and the circumstances connected with the bird in question—found on two occasions by the people of Israel in and around the camp so abundantly as to feed the whole population in the desert (Exod. xvi. 3-13), and at Kibroth-Hattaavah, both times in the spring—are much more applicable to flights of quail alighting in an exhausted state during their periodical migration, than to the pterocles, which does not proceed to so great a distance, has very powerful wings, is never seen fatigued by migration, is at all times a tenant of the wilderness far from water, and which, strictly taken, is perhaps not a clean bird, all the species subsisting for the most part on larvæ, beetles, and insects. We regard these considerations as sufficient to establish the accuracy of the Authorized Version.

Of a bird so well known no figure or further particular description appears to be necessary, beyond mentioning the enormous flights which, after crossing an immense surface of sea, are annually observed at the spring and fall to take a brief repose in the islands of Malta, Sicily, Sardinia, Crete, in the kingdom of Naples, and about Constantinople, where on those occasions there is a general shooting-match, which lasts two or three days. This occurs always in the autumn. The birds, starting from the Crimea about seven at night, and with a northerly wind, before dawn accomplish a passage of above sixty leagues in breadth, and alight on the southern shore to feed and repose. In the vernal season the direction of the flight is reversed, and they arrive in similar condition on the Russian coast. The same phenomena occur at Malta, &c.; and as gregarious birds of passage are known to guide their course by given landmarks, which they distinguish with unerring precision, and which, unless they have been driven out of their usual direction by storms of wind, they invariably arrive at or over, before they take a new flight, so also quails congregate in Arabia in numbers proportionate to the surface of Western Asia, whither they are proceeding. The providential nature of their arrival within and around the camp of the Israelites, in order that they might furnish meat to a murmuring people, appears from the fact of its taking place where it was not to be expected: the localities, we presume, being out of the direction of the ordinary passage; for, had this not been the case, the dwellers in that region, and the Israelites themselves, accustomed to tend their flocks at no great distance from the spot, would have regarded the phenomenon as a well-known periodical occurrence.—C. H. S.

QUARTUS (Κούαρτος), a Christian, resident at Corinth, and, from his name, apparently a Roman, whose salutations Paul communicated to the Church of Rome in his epistle thereto (Rom. xvi. 23). In the old church books he is alleged to have been one of the seventy disciples, which is altogether unlikely; and it is on the same authority stated that he was eventually bishop of the church at Berytus.

QUATERNION (τετράδιον), 'a quaternion of soldiers' (Acts xii. 4), was a detachment of four men, which was the usual number of a Roman night-watch. Peter, therefore, was guarded by four soldiers, two within the prison, and two outside the doors; and as the watch was usually changed every three hours, it was necessary that the 'four quaternions' mentioned in the text should be appointed for the purpose (Veget. *De Re Milit.* iii. 8; Philo, *In Flacc.*, p. 98).

QUEEN. The Hebrews had no word properly answering to our term 'queen,' which is the feminine of 'king;' neither had they the dignity which that word denotes. The Hebrew word usually translated 'queen' is גְּבִירָה *gebirah*, which means 'mistress,' or 'lady,' being the feminine of גְּבִיר *gebir*, 'master,' or 'lord.' The feminine is to be understood by its relation to the masculine; which is not applied to kingly power, or to kings, but to general authority and dominion. It is in fact the word which occurs twice with reference to Isaac's blessing of Jacob:—'Be *lord* over thy brethren;' and, 'I have made him thy *lord*' (Gen. xxvii. 29—37).

The limited use which is made even of the restricted term *gebirah*, is somewhat remarkable. It is only employed twice with reference to *the wife* of a king: in one of these two cases it is applied to the wife of the king of Egypt, where the condition of the royal consort was more *queenly* than in Palestine (1 Kings xi. 19; comp. Wilkinson, *A. Egypt.* ii. 59; iii. 64; v. 28); and in the other to Jezebel, the wife of Ahab, who, as the daughter of a powerful king, appears to have enjoyed peculiar privileges in her matrimonial state (2 Kings x. 13). In two other places, it is

not clear whether the king's wife or mother is intended (Jer. xiii. 18; xxix. 2); and in the remaining passages it is pointedly referred to the king's mother, in such terms as clearly show that the state which *she* held was one of positive dignity and rank (1 Kings xv. 13; 2 Chron. xv. 16).

There is another word, שֵׁגַל *shegol*, also translated 'queen,' which simply denotes the king's wife or (in the plural) his wives, as distinguished from his concubines. It occurs in Ps. xlv. 9; Neh. ii. 6; Dan. v. 2; iii. 23.

The result of all inquiry into the subject seems to show that among the Jewish kings the usages bearing on this point were not different from those which are still exhibited in Western Asiatic courts. Where woman never becomes the head of the state, there can be no queen regnant; and where polygamy is allowed or practised, there can be no queen consort. There will, however, be a chief wife in the harem; and this is no doubt the rank indicated in the Bible by the words which we render 'queen.' This rank may be variously acquired. The *first* wife of the king, or the first whom he took *after his accession*, usually obtained it; and if she is both of high birth and becomes the mother of the first son, her position is tolerably secure: but if she possesses neither of these advantages, she may be superseded in her position as head of the harem by a wife of higher birth and connections, subsequently espoused; or by one who becomes the mother of the heir apparent. The king, however, will sometimes act according to his own pleasure in this matter, promote any favourite lady to this dignity, and also remove her from it at his pleasure; but more generally he finds it convenient to follow the established routine. The king of Egypt's daughter was, doubtless, from her high rank, the chief wife of Solomon; as was Jezebel, for the same reason, the chief wife of Ahab. In like manner the high-born mother of Absalom was probably the chief wife of David, although it is possible that the mother of the eldest son Amnon at first enjoyed that distinction, which, we may safely presume, eventually devolved on Bathsheba, after her son Solomon had been recognised as the heir.

In one of Mr. Morier's amusing books (*Hajji Baba in England*) there is a passage which strikingly illustrates this matter. The court of Persia is there represented as being perplexed how to answer a letter which, in ignorance of Eastern customs, had been addressed by the queen consort of England 'to the queen of Persia.' The cause of the dilemma thus created was that —'Although the shah's principal wife is called the banou harem, or head of the seraglio, yet her situation in the state bears as little affinity to that of the queen of England as one may say the she buffalo kept in the enclosure for food and milk has to the cow fed and worshipped by the Hindoo as his god. Our shah can kill and create banous at pleasure, whereas the queen of England maintains her post till the hand of fate lays her in the grave' (Comp. Chardin, *Voyages*, edit. Langles, vi. ch. xii.; Thornton's *Turkey*, ii. 264-286.)

Very different was, and is to this day, in Western Asia, the position of the king's mother, whose state is much the nearest to that of an European queen of any with which the East is acquainted. It is founded on that essential principle of Oriental manners which in all cases considers the mother of the husband as a far superior person to his wife, and as entitled to more respect and attention. This principle should be clearly understood; for it extends throughout the Bible, and is yet entirely different from our own social arrangements, under which the mother, as soon as she becomes widowed, abandons her place as head of the family to the daughter-in-law. Mr. Urquhart has admirably illustrated and developed this principle in his *Spirit of the East* (ii. 387, sq.), and his remarks, although primarily illustrative of Turkish manners, are, with some unessential limitations, applicable to the ancient and modern East. In p. 389 there is an anecdote of the present Ibrahim Pasha, who is represented as staying a whole week in the harem of his mother, waiting to find a favourable opportunity of pressing a request upon her; and when admitted, kissing her feet, refusing to be seated, and standing an hour and a half before her with his arms crossed, without after all succeeding in the suit which he—the conqueror of Syria and the victor of Konieh — preferred to an aged woman.

The arrangement in the seraglios of the more magnificent Hebrew monarchs was probably similar to that of Turkey, with this difference, that the chief women in the harems of the Jewish sovereigns entered it as wives, and not as slaves. The grand signior, from an indeterminate number of female slaves, selects his favourites, who are distinguished by the title of *cadun*, which, as it means 'lady of the house,' seems nearly equivalent to the Hebrew *gebirah*. The number of these is said to be limited to seven, and their rank seems to correspond to that of the 'wives' of the Hebrew seraglio, whose number was unlimited. The mother of a boy is called *hasseky*, unless the boy die, in which case she descends to her former rank. The caduns or wives of a deceased or deposed sultan are all removed from the imperial harem to a separate palace, with the single exception of the validé sultan, the mother of the reigning sultan, who has her liberty, a palace, and revenues to support a suitable establishment. But the hassekies, or those who have a son living, are treated with marked respect, as in the natural course of events they may become *validé*. The title of *sultan* (for the Turkish has no distinction of gender), though from courtesy it may be given to the hassekies, is, strictly speaking, appropriate only to the sovereign's mother, and to the sons and daughters of the imperial family (Thornton, ii. 276; Urquhart, ii. 433). This statement, especially the last point of it, strikingly illustrates the view we have taken as to the more *queenly* position of the king's mother than of his wife in the Jewish and other Asiatic courts. It must be clearly understood that this position is by no means peculiar to the modern east, or to the Jews among the ancient Orientals. Heeren, indeed, thinks that the power of 'the queen-mother' was even more considerable among the ancient Persians than among the modern Turks (*Hist. Researches*, i. 400); and the narratives of Herodotus and Ctesias respecting the tyrannical influence exercised by Parysatis, Amestris, and others, bear

ample testimony to this fact. The careful reader of Scripture will easily be able to trace the same ideas respecting the position of the king's mother among the Israelites. In how marked a manner does the mother of Solomon come forward at the end of her husband's and the beginning of her son's reign! She takes an active part in securing her son's succession; it is in the conviction of her commanding influence that Adonijah engages her to promote his suit, alleging 'he will not say thee nay;' and then, when Bathsheba appears before her son, the monarch rises from his place, advances to meet her, bows himself before her, and seats her on the right hand of his throne (1 Kings i., ii.). That the king's mother possessed high dignity is further evinced by the fact that Asa found it necessary to remove his mother Maachah 'from being queen,' on account of her abuse of the power which that character conferred (1 Kings xv. 13). Jezebel was, as already stated, very powerful in the life-time of her husband; but it is only under her son that she is called 'the queen' (*gebirah*); and the whole history of his reign evinces the important part which she took in public affairs (2 Kings ix. 22, 30, 37; x. 13). Still more marked was the influence which her daughter Athaliah exercised in Judah during the reign of her son Ahaziah, which was indeed such as enabled her at his death to set the crown on her own head, and to present the anomaly in Jewish history of a regnant queen (2 Kings xi.).

QUEEN OF HEAVEN. [Ashtoreth.]

QUEEN OF SHEBA. [Sheba.]

QUICKSAND (*σύρτις*). In Acts xxvii. 17, it is mentioned that when the ship in which Paul was embarked was driven past the Isle of Clauda on the south, the mariners, as would now be said, struck the sails and scudded under bare poles, lest they 'should fall into the quicksands.' The original word *syrtis* denotes a sandbank or shoal, dangerous to navigation, *drawn*, or supposed to be *drawn* (from *σύρω*, 'to draw') together by the currents of the sea. Two syrtes, or gulfs with quicksands, were particularly famous among the ancients; one called Syrtis Major, between Cyrene and Leptis, and the other, Syrtis Minor, near Carthage. Both then lay nearly to the south-west of the west end of Cyprus, adjoining which, on the south, lay the isle of Clauda. These Syrtes were the great dread of those who navigated the seas in which the vessel was driven, and one of them was probably in this case the object of alarm to the mariners. The danger was not so imaginary in this case, we apprehend, as Dr. Falconer (*Dissert. on St. Paul's Voyage*, p. 13) conceives. For the apprehension does not appear to have been entertained till the ship had been driven *past* the isle of Clauda; which, as we take it, is mentioned merely as the last point of land which had been seen till the ship was wrecked on the isle of Melita. The position of that island must be regarded as indicating the course in which they were driven; and if that were Malta, it is clear that, had that course not been arrested by the intermediate shipwreck, they would in all probability have been driven upon the Syrtis Minor, which we may therefore conclude to have been the subject of their apprehension. That apprehension only becomes 'imaginary' when Meleda in the Adriatic is taken, as Dr. Falconer himself takes it, for the Melita of Scripture. It may therefore be added to the arguments in favour of Malta, that its identification with Melita gives reality to the fear entertained by the mariners, which under the other alternative must be supposed to have been imaginary [Malta].

QUIVER. [Armour, Arms.]

QUIRINUS. [Cyrenius.]

R.

RAAMAH (רַעְמָה; Sept. Ῥέγμα), a city of the Cushites, or of Cushite origin (Gen. x. 7; 1 Chron. i. 9; Ezek. xxvii. 22). Its situation is not clearly known, but the Ῥέγμα with which the Sept. identifies it was a city on the Persian Gulf, mentioned by Ptolemy (*Geog.* vi. 7), and Stephan. Byzant. (See Bochart, *Phaleg.* iv. 5.)

RAAMSES. [Rameses.]

RABBAH (רַבָּה; Sept. Ῥαββάθ). This name, which properly denotes a great city or metropolis, is given in Scripture to the capital of the Ammonites (Josh. xiii. 25; 2 Sam. xi. 1; xii. 27; 1 Chron. xx. 1; Jer. xlix. 3); the full name of which, however, as given in Deut. iii. 11, appears to have been Rabbath-beni-Ammon. It was in this place that the great iron bedstead of Og king of Bashan was preserved (Deut. iii. 11). Here also, during the siege of the place by Joab, the unsuspecting Uriah was slain, through the contrivance of David, that he might possess himself of his wife Bathsheba; after which the king went in person and took the city, the importance of which is shown by the solicitude of the monarch thus to appropriate to himself the glory of its subjugation (2 Sam. xi., xii.). After this Rabbah was included in the tribe of Gad. After the separation of the ten tribes, Rabbah, with the whole territory beyond the Jordan, adhered to the kingdom of Israel, till it was ravaged by the Assyrians under Tiglath-pileser, and the inhabitants expatriated to Media. The Ammonites then recovered possession of Rabbah and the other cities and territories which had in former times been taken from them by the Israelites (Jer. xlix. 3; Ezek. xxv. 2-5) [Ammonites]. Some centuries later, when these parts were subject to Egypt, Rabbah was restored or rebuilt by Ptolemy Philadelphus, and called by him Philadelphia (Euseb. *Onomast.* s. v. Ῥαμάθ and Ἀμμάν), and under this name it is often mentioned by Greek and Roman writers (Plin. *Hist. Nat.* v. 16; Ptol. *Geog.* v. 15), by Josephus (*De Bell. Jud.* i. 6. 3; i. 19. 5; ii. 18. 1), and upon Roman coins (Eckhel, iii. 351; Mionnet, v. 335), as a city of Arabia, Cœlesyria, or Decapolis. The old name was not, however, altogether superseded, for Polybius (*Hist.* v. 7, 4) calls it Ῥαββατάμανα.

Rabbah appears to have consisted, like Aroer, of two parts; the city itself, and 'the city of waters,' or royal city, which was probably a detached portion of the city itself, insulated by the stream on which it was situated. The 'city of waters' was taken by Joab; but against

the city itself he was obliged to call for the assistance of David with a reinforcement (2 Sam. xii. 29).

The ancient name has been preserved among the natives of the country. Abulfeda calls it *Amman*, and by that name it is still known. It was in ruins in his time (*Tab. Syr.* p. 19). The ruins stand about 19 miles south-east of Szalt, in a long valley traversed by a stream, the Moiet Amman, which at this place is arched over, the bed as well as the banks being paved. The ruins are extensive, but there remains nothing of much interest, excepting the theatre, which is very large and perfect, and a small odeum close to it. There are also an ancient castle and some vestiges of Roman buildings and of Christian churches. The Prophet Ezekiel foretold that Rabbah should become 'a stable for camels,' and the country 'a couching place for flocks' (Ezek. xxv. 5). This has been literally fulfilled, and Burckhardt actually found that a party of Arabs had stabled their camels among the ruins of Rabbah. Too much stress has however been laid upon this minute point by Dr. Keith and others (*Evidence from Prophecy*, p. 150). What the prophet meant to say was that Ammon and its chief city should be desolate; and he expressed it by reference to facts which would certainly occur in any forsaken site in the borders of Arabia; and which are now constantly occuring not in Rabbah only, but in many other places. Seetzen, *in Zach's Monat. Corresp.* xviii. p. 428; Burckhardt's *Syria*, p. 356, sq.; Irby and Mangles, *Travels*, p. 474.

The Rabbah of Josh. xv. 60 was in the tribe of Judah.

RABBATH-AMMON. [Rabbah.]

RABBATH-MOAB. [Ar.]

RABBI ('Ραββί), a title of honour given to the teachers of the law in the time of Christ, and for which there is no exact equivalent in our language, though perhaps in purport and usage it comes near to 'doctor' or 'master:' a word combining *both* these significations would fairly represent it. In Matt. xxiii. 8, 'Ραββί is explained by καθηγητής, a leader, or guide (in the sense of a teacher or master), and in John i. 39, by διδάσκαλος, a teacher, or master. This, however, seems to have been the acquired or conventional usage of the term. The actual signification of רב *rab* in Hebrew is 'a great one,' *i. e.* a chief, a master; and would as a title be probably represented by the 'Excellenza' of southern Europe, which is perhaps as common as Rabbi was among the Jews. It was there employed as a title in the Jewish schools in a threefold form, indicating as many degrees, which might without much impropriety be compared, in the stricter sense, to the progressive academical degrees of Bachelor, Master, and Doctor. The lowest of these degrees of honour was רב *rab*. This with the relative suffix became רבי, 'Ραββί, *Rabbi*, 'my master,' which was of higher dignity; and beyond that was רבן *Raban*, 'great master;' or with the suffix 'Ραββονί, *Rabboni*, 'my great master,' which was the highest of all. It is not certain, however, that this graduation of terms existed in the time of Christ. The teachers and professors of the law were distinguished by the title of Rabbi both by the people and by their own disciples (Matt. xxiii. 7). Jesus was so called by his disciples (Matt. xxvi. 25-49; Mark ix. 5; xi. 2; John i. 38; iv. 31) as well as by the people (Matt. x. 51; John xx. 16).

RABBINICAL LITERATURE. [Kabbalah, Talmud.]

RABBONI ('Ραββονί or 'Ραββωνί), the title of highest honour applied by the Jews to the teachers of the law [Rabbi]. In Mark x. 51 (translated 'Lord'), John xx. 16, it is applied to Christ; but, as it seems to us, rather in its literal acceptation, than with reference to the conventional distinction which it implied (if such distinction *then* existed) in the Jewish schools. There were but seven great professors, all of the school of Hillel, to whom the title was publicly given. There is some difference as to their names, and even the Talmud varies in its statements. But the only one there whose name occurs in Scripture is Gamaliel, unless, indeed, as some suppose, the aged Simeon, who blessed the infant Saviour (Luke ii. 25), was the same as the Rabban Simeon of the Talmud [Simeon].

RAB SARIS (רַב־סָרִיס; Sept. 'Ραφίς), one of the three Assyrian generals in command of the army which appeared before Jerusalem (2 Kings xviii. 17) [Rab-shakeh]. The word means 'chief of the eunuchs;' which could scarcely have been a proper name; but whether his office was really that which the title imports, or some other great court office, must be determined by the considerations which have been offered under the article Eunuch. The chief of the eunuchs is an officer of high rank and dignity in the Oriental courts: and his cares are not confined to the harem, but many high public functions devolve upon him. In the Ottoman Porte the Kislar Aga, or chief of the black eunuchs, is one of the principal personages in the empire, and in an official paper of great solemnity is styled by the sultan, the most illustrious of the officers who approach his august person, and worthy of the confidence of monarchs and of sovereigns' (D'Ohsson, *Tab. Gén.* iii. 308). It is, therefore, by no means improbable that such an office should be associated with a military commission; perhaps not for directly military duties, but to take charge of the treasure, and to select from the female captives such as might seem worthy of the royal harem.

RAB-SHAKEH (רַבְשָׁקֵה; Sept. 'Ραψάκης). This name is Aramaic, and signifies *chief-cupbearer*. Notwithstanding its seemingly official significance, it appears to have been used as a proper name, as Butler with us; for the person who bore it was a military chief in high command, under Sennacherib king of Assyria. Yet it is not impossible, according to Oriental usages, that a royal cup-bearer should hold a military command; and the office itself was one of high distinction. He is the last named of three Assyrian generals who appeared before Jerusalem; and was the utterer of the insulting speeches addressed to the besieged. 'He stood and cried with a loud voice in the Jews' language;' perhaps because he was the only one of the three who could speak that language freely. 2 Kings xviii. 17, 19, 26, 28, 37; xix. 4, 8; Isa. xxxvi. 2, 4, 12, 13, 22; xxxvii. 4, 8.

RACA (Ῥακά), a word which occurs in Matt. v. 22, and which remains untranslated in the Authorized Version. It is expressive of contempt, from the Chaldee רֵיקָא, and means an empty, worthless fellow. Jesus, contrasting the law of Moses, which could only take notice of overt acts, with his own, which renders man amenable for his motives and feelings, says in effect; 'Whosoever is rashly angry with his brother is liable to the judgment of God; whosoever calls his brother Raca, is liable to the judgment of the Sanhedrim; but whosoever calls him fool (Μωρέ) becomes liable to the judgment of Gehenna.' To apprehend the higher criminality here attached to the term fool, which may not at first seem very obvious, it is necessary to observe that while 'raca' denotes a certain looseness of life and manners, 'fool' denotes a wicked and reprobate person: foolishness being in Scripture opposed to spiritual wisdom.

RACE. [Games.]

RACHAM (רָחָם; Sept. κύκνον; Vulg. *porphyrio;* Lev. xi. 18; Deut. xiv. 17) is now admitted to be the white carrion vulture of Egypt, *Percnopterus Neophron Ægyptiacus.* It would lead us beyond the limits prescribed to this article to enter into a disquisition on the manners of cranes, storks, swans, and pelicans, all in some degree confounded in the mind of Orientals when they describe the marvellous love, parental affection, and filial gratitude of birds: consequently they have names for certain species which are claimed as derivatives from roots expressive of the affections. For although the incessant warfare of man upon brute animals in their native haunts has, at least in the populous west, well nigh obliterated all their more generous instincts, and we are consequently not well acquainted with the natural attributes of their character, the swan alone can claim pretension to an ultra-maternal feeling, from her practice of supporting her young brood between her wings when she gives them their first lesson in swimming. All other tales of that nature recorded in the poets and historians of antiquity may be regarded as absolute fictions; and among the rest, that in Horus Apollo, representing the Racham tearing the flesh of her thighs to feed her young, is evidently an invention of the Egyptian priesthood, fabricated in order to enhance the character of a useful bird, which, notwithstanding that it was sanctified in their mystical superstitions, and protected by the king as 'Pharaoh's fowl' (an ancient appellation), is perhaps the most revoltingly filthy bird in existence. With respect to the original imposition of the name Racham, as connected with any unusual affection for its young, there is no modern ornithologist who assigns such a quality to Percnopteri more than to other birds, although it is likely that as the pelican empties its bag of fish, so this bird may void the crop to feed her brood. Gesner had already figured (*De Aquila quem Percnopterum vocant,* p. 199) the Barbary variety, and pointed out the Racham of Scripture as the identical species, but Bruce first clearly established the fact. The Rachama of that writer is apparently the Akbobha ('white father') of the Turks, and forms one of a small group of Vulturidæ, subgenerically distinguished by the name of *Percnopterus* and *Neophron,* differing from the other vultures in the bill being longer, straight, more attenuated, and then uncinated, and in the back of the head and neck being furnished with longish, narrow, suberectile feathers, but, like true vultures, having the pouch on the breast exposed, and the sides of the head and throat bare and livid. The great wing-coverts are partly, and the quill-feathers entirely, of a black and blackish ash-colour; those of the head, nape, smaller wing-coverts, body, and tail, in general white, with tinges of buff and rufous; the legs are flesh-colour, and rather long; and the toes are armed with sharp claws. The females are brownish. In size the species is little bulkier than a raven, but it stands high on the legs. Always soiled with blood and garbage, offensive to the eye and nose, it yet is protected in Egypt both by law and public opinion, for the services it renders in clearing the soil of dead carcases putrefying in the sun, and the cultivated fields of innumerable rats, mice, and other vermin. Pious Moslems at Cairo and other places, bestow a daily portion of food upon them, and upon their associates the kites, who are seen hovering conjointly in great numbers about the city. The Racham extends to Palestine in the summer season, but becomes scarce towards the north, where it is not specially protected; and it accompanies caravans, feasting on their leavings and on dead camels, &c.

467. [Vultur percnopterus.]

Gesner's figure represents the Barbary variety; but there are two other species besides, viz., the *Percnopterus Angolensis,* and *Percnopterus Hypoleucus,* both similarly characterized by their white livery, and distinguished from the Egyptian by a different arrangement of colour, a shorter bill, and more cleanly habits.

In our version the name of Gier-eagle is certainly most improper, as such a denomination can apply only to a large species, and is most appropriate to the bearded vulture of the Alps. The Lämmer-geyer of the Swiss (*Gypaetus Barbatus*), which in the shape of varieties, or distinct species, frequents also the high snowy ranges of Spain, Macedonia, Asia Minor, Crete, Abyssinia, Caffraria, Barbary, and most likely of Libanus, was no doubt the bird intended by our

translators to represent the Racham; nor was the application unreasonable, as will be shown in Vulture. The *Percnopterus* is somewhat singularly classed both in Lev. and Deut., along with aquatic birds; and it may be questioned whether any animal will eat it, since, in the parallel case of *Vultur aura*, the turkey-buzzard or carrion-crow of America, we have found even the ants abstaining from its carcase, and leaving it to dry up in the sun, though swarming around and greedy of every other animal substance [Vulture].—C. H. S.

RACHEL (רָחֵל, *a ewe;* Sept. Ῥαχήλ), one and the most beloved of the two daughters of Laban, whom Jacob married (Gen. xxix. 16, seq.), and who became the mother of Joseph and Benjamin, in giving birth to the latter of whom she died near Bethlehem, where her sepulchre is shown to this day (Gen. xxx. 22; xxxv. 16). For more minute particulars see Jacob, with whose history Rachel's is closely involved.

RAGUEL, or Reuel (רְעוּאֵל, *friend of God;* Sept. Ῥαγουήλ). 1. A son of Esau (Gen. xxxvi. 4, 10). 2. The father of Jethro (Exod. ii. 18; Num. x. 29). Some confound him with Jethro; but in the text last cited, he is called the father of Hobab, who seems to have been the same as Jethro. In the same passage, indeed, the daughters of the 'priest of Midian' relate to 'Reuel their father' their adventure with Moses: which might seem to support his identity with Jethro; but it is quite a Scriptural usage to call a grandfather 'father,' and a granddaughter, 'daughter' (Gen. xxxi. 43; 2 Sam. xix. 25; 1 Kings xiv. 3; xvi. 2; xviii. 3). The Targum in this place reads, 'They came to Reuel their father's father.' [Hobab.] 3. Another person of this name occurs in 1 Chron. ix. 8.

1. RAHAB (רַהַב; Sept. Ῥαάβ), a name, signifying 'sea-monster,' which is applied as an appellation to Egypt in Ps. lxxiv. 13, 14; lxxxvii. 4; lxxxix. 10; Isa. li. 9 (and sometimes to its king, Ezek. xxix. 3; xxxiii. 3, comp. Ps. lxviii. 31); which metaphorical designation probably involves an allusion to the crocodiles, hippopotami, and other aquatic creatures of the Nile.

2. RAHAB, properly Rachab (רָחָב, *large;* Sept. Ῥαχάβ), a woman of Jericho who received into her house the two spies who were sent by Joshua into that city; concealed them under the flax laid out upon the house-top, when they were sought after; and, having given them important information, which showed that the inhabitants were much disheartened at the miracles which had attended the march of the Israelites, enabled them to escape over the wall of the town, upon which her dwelling was situated. For this important service Rahab and her kindred were saved by the Hebrews from the general massacre which followed the taking of Jericho (Josh. ii. 1-21; vi. 17; comp. Heb. xi. 31).

In the narrative of these transactions Rahab is called זוֹנָה *zonah*, which our own, after the ancient versions, renders 'harlot.' The Jewish writers, however, being unwilling to entertain the idea of their ancestors being involved in a disreputable association at the commencement of their great undertaking, chose to interpret the word 'hostess,' one who keeps a public house, as if from זוּן, 'to nourish' (Joseph. *Antiq.* v. 1; ii. and vii.; comp. the Targum, and Kimchi and Jarchi on the text). Christian interpreters also are inclined to adopt this interpretation for the sake of the character of a woman of whom the Apostle speaks well, and who would appear from Matt. i. 4 to have become by a subsequent marriage with Salmon prince of Judah, an ancestress of Jesus. But we must be content to take facts as they stand, and not strain them to meet difficulties; and it is now universally admitted by every sound Hebrew scholar that זוֹנָה means 'harlot,' and not 'hostess.' It signifies harlot in every other text where it occurs, the idea of 'hostess' not being represented by this or any other word in Hebrew, as the function represented by it did not exist. There were no inns; and when certain substitutes for inns eventually came into use, they were never, in any Eastern country, kept by women. On the other hand, strangers from beyond the river might have repaired to the house of a harlot without suspicion or remark. The Bedouins from the desert constantly do so at this day in their visits to Cairo and Baghdad. The house of such a woman was also the only one to which they, as perfect strangers, could have had access, and certainly the only one in which they could calculate on obtaining the information they required without danger from male inmates. This concurrence of analogies in the word, in the thing, and in the probability of circumstances, ought to settle the question. If we are concerned for the morality of Rahab, the best proof of her reformation is found in the fact of her subsequent marriage to Salmon: this implies her previous conversion to Judaism, for which indeed her discourse with the spies evinces that she was prepared. The Jewish writers abound in praises of Rahab, on account of the great service she rendered their ancestors. Even those who do not deny that she was a harlot, admit that she eventually became the wife of a prince of Israel, and that many great persons of their nation sprang from this union. The general statement is, that she was ten years of age at the time the Hebrews quitted Egypt, that she played the harlot during all the forty years they were in the wilderness, that she became a proselyte when the spies were received by her, and that after the fall of Jericho no less a personage than Joshua himself made her his wife. She is also counted as an ancestress of Jeremiah, Maaseiah, Hanameel, Shallum, Baruch, Ezekiel, Neriah, Seriah, and Huldah the prophetess. (See *T. Babyl.* tit. *Megilla*, fol. 14, col. 2; *Juchasin*, x. 1; *Shalshalet Hakabala*, vii. 2; Abarbanel, Kimchi, &c., on Josh. vi. 25; *Mitzvoth Toreh.* p. 112; Lightfoot, *Hor. Heb.* ad Matt. i. 4; Meuschen, *N. T. Talmud.* p. 40.)

RAIN. See under the head *Climate*, in art. Palestine.

RAM. [Sheep.]

RAMAH (רָמָה, *a high place, height;* Sept. Ῥαμά), the name of several towns and villages in Palestine, which it is not in all cases easy to distinguish from one another.

1. RAMAH, a town of Benjamin (Josh. xviii. 25), in the vicinity of Gibeah and Geba (Judg.

xix. 13; Isa. x. 29; Hos. v. 8; Ezra ii. 26; Neh. vii. 30, xi. 33); on the way from Jerusalem to Bethel (Judg. iv. 5), and not far from the confines of the two kingdoms (1 Kings xv. 17; xxi. 22). It is also mentioned in Jer. xxxi. 15; xl. 1. Jerome places it six Roman miles north of Jerusalem, and Josephus, who calls it 'Ραμαθών, places it forty stadia from Jerusalem (*Antiq.* viii. 12. 3). In accordance with all these intimations, at the distance of two hours' journey north of Jerusalem, upon a hill a little to the east of the great northern road, a village still exists under the name of *Er-Ram*, in which we cannot hesitate to recognise the representative of the ancient Ramah. This is one of the valuable identifications for which Biblical geography is indebted to Dr. Robinson (*Researches*, ii. 315-317). The difficult text (Jer. xxxi. 15), 'A voice was heard in Ramah ... Rachel weeping for her children,' which the Evangelist (Matt. ii. 8) transfers to the massacre at Bethlehem, has been thought to require a southern Ramah not far from that place, near which indeed is Rachel's sepulchre. But no such Ramah has been found; and Dr. Robinson thinks that the allusion of the prophet was originally applicable to *this* Ramah. The context refers to the exiles carried away captive by Nebuzar-adan to Babylon, who passed by way of Ramah, which was perhaps their rendezvous (Jer. xl. 1). As Ramah was in Benjamin, the prophet introduces Rachel, the mother of that tribe, bewailing the captivity of her descendants.

2. RAMAH, of Samuel, so called, where the prophet lived and was buried (1 Sam. i. 19; ii. 11; vii. 17; viii. 4; xv. 34; xvi. 13, 19; xviii. 19, 22, 23; xxv. 1; xxviii. 3). It is probably the same with the Ramathaim-Zophim to which his father Elkanah belonged (1 Sam. i. 1, 19). The position of this Ramah was early lost sight of by tradition, and a variety of opinions have prevailed since the time of Eusebius and Jerome, who regard it as the Arimathea of the New Testament, and place it near Lydda, where a Ramah anciently existed. Hence some have held the site to be that of the present Ramleh, which is itself a modern town [ARIMATHEA]. Many writers have, however, been disposed to seek Samuel's Ramah in the Ramah of Benjamin (Pococke, ii. 71, 72; Bachiene, i. 155; Raumer, *Paläst.* p. 146; Winer, s. v.); but this was only half an hour distant from the Gibeah where Saul resided, which does not agree with the historical intimation (comp. 1 Sam. ix. 10). Again, general opinion has pointed to a place called Neby Samuêl, a village upon a high point two hours north-west of Jerusalem, and which was, indeed, also usually supposed to be the Ramah of Benjamin, till Dr. Robinson established the separate claims of er-Ram to that distinction. But this appropriation does not agree with the mention of Rachel's sepulchre in 1 Sam. x. 2, for that is about as far to the south of Jerusalem as Neby Samuêl is to the north-west. The like objection applies, though in a somewhat less degree, to the modern Sôba, west of Jerusalem, which Robinson points out as possibly the site of Ramathaim-*Zoph*im and Ramah (*Researches*, ii. 330-334). The chief difficulties in connection with this matter arise of course out of the account given of Saul's journey after his father's asses. The city in which Saul found Samuel is not named, but is said to have been 'in the land of Zuph' (1 Sam. ix. 5), and is assumed to have been Ramah-*Zoph*im. In dismissing him from this place, Samuel foretells an adventure that should befal him near Rachel's sepulchre. Now, as this sepulchre was near Bethlehem, and as Saul's abode was in Benjamin, the southern border of which is several miles to the north thereof, it is manifest that if Saul in going home was to pass near Rachel's sepulchre, the place where Samuel was must have been to the south of it. Gesenius contends that if we allow weight to the mention of Rachel, we can only seek for this Ramah in the neighbourhood of Bethlehem; where also Eusebius speaks of a Ramah. Not far south-east of Bethlehem is the Jebel Fureidis, or Frank Mount, which Robinson has identified as the site of the ancient city and fortress of Herod, called Herodium; and Gesenius contends that if we fix here the site of Ramah, all the circumstances mentioned in 1 Sam. ix. 10 are sufficiently explained. But then the Ramah-Zophim of 1 Sam. i. 1 must have been a different place (*Thesaurus*, p. 1276). To this Dr. Robinson himself, in his edition of Gesenius, objects that the difference assumed in the last sentence is inadmissible. 'Besides, no one who had seen the Frank mountain would suppose for a moment that a city ever lay upon it. It was indeed occupied by Herod's fortress; but the city Herodium lay at its foot.' He adds that Eusebius, in the passage referred to, obviously places Ramah *of Benjamin* near Bethlehem, for the purpose of helping out a wrong interpretation of Matt. ii. 18. Another, and the most recent hypothesis in this vexed question, would place this Ramah at a site of ruins now called er-Rameh, two miles north of Hebron (*Biblioth. Sacra*, No. I. pp. 46-51). But this also assumes that the Ramathaim-Zophim, the place of the prophet's birth, was different from the place of his residence and burial, contrary to the testimony of Josephus (*Antiq.* vi. 4, 6; vi. 13, 5), and to the conclusion deducible from a comparison of 1 Sam. i. 1 with verses 3, 19. In the midst of all this uncertainty, Dr. Robinson thinks that interpreters may yet be driven to the conclusion that the city where Saul found Samuel (1 Sam. ix. 10), was *not* Ramah his home.

3. RAMAH, a city of Naphtali (Josh. xix. 36).

4. RAMAH, a town of Gilead (2 Kings viii. 29), the name of which is given more fully in Josh. xiii. 26, as Ramoth-Mizpeh.

RAMESES (רַעַמְסֵס; Sept. 'Ραμεσσῆ), an Egyptian city in the land of Goshen, built, or at least fortified, by the labour of the Israelites (Gen. xlvii. 11; Exod. i. 11; xii. 37; Num. xxxiii. 3-5). The name of the city seems to have been sometimes given to the whole province (Gen. xlvii. 11), by which it would appear to have been the chief city of the district. It was probably situated on the water-shed between the Bitter Lakes and the Valley of the Seven Wells, not far from Heroöpolis, but not identical with that city (See Robinson's *Bibl. Researches*, i. 70, 547-550). In Exod. i. 11, the name is by a difference in the points spelt Raamses. The name means 'son of the sun,' and was borne by

several of the ancient kings of Egypt, one of whom was probably the founder of the city.

RAMOTH (רָמוֹת or רָאמוֹת; *heights*, pl. of Ramah). There were several places of this name, usually with some addition to distinguish them from one another.

1. RAMOTH-GILEAD, called also Ramoth-Mizpeh, or simply Ramoth, a town in Gilead, within the borders of Gad (Josh. xiii. 26), which belonged to the Levites (Josh. xxi. 38; 1 Chron. vi. 65, 80). It was one of the cities of refuge (Deut. iv. 43; Josh. xx. 8), and one of the towns in which an intendant was stationed by Solomon (1 Kings iv. 13). It was the last of their conquests which the Syrians held; and Ahab was killed (1 Kings xxii. 1-37; 2 Chron. xviii.), and fourteen years after, his son Joram was wounded (2 Kings viii. 28), in the attempt to recover it. The strength of the place is attested by the length of time the Syrians were enabled to hold it, and by Ahab and Joram having both been solicitous to obtain the aid of the kings of Judah when about to attack it; these being two of the only three expeditions in which the kings of Judah and Israel ever co-operated. It was here also that Jehu was proclaimed and anointed king (2 Kings ix. 1-6); but it is not very clear whether the army was then still before the town, or in actual possession of it. Eusebius (*Onomast.* s. v.) places Ramoth-Gilead on the river Jabbok, fifteen Roman miles west of Philadelphia (Rabbah). At about this distance, W.N.W. from Philadelphia, and about eight miles south of the Jabbok, are the ruins of a town, bearing the name of Jelaad, which is merely a different orthography of the Hebrew גִּלְעָד Gilead (Burckhardt, *Syria*, p. 348). Buckingham is, however, more disposed to seek the site of Ramoth-Gilead in a place now called Ramtha, or Rameza, which is about twenty-three miles N.W.N. from Philadelphia, and about four miles *north* of the Jabbok, where he noticed some ruins which he could not examine. As Ramoth in Gilead is called sometimes Ramoth alone, but never Gilead alone, the analogy of name is perhaps in favour of the latter conclusion; but the bearing and distance from Philadelphia are both in favour of the other. We are not disposed to rely upon either of these alternatives, although nothing better has yet been offered.

RAMATH-LEHI. This name, which means *height of the jawbone*, belonged to a place on the borders of Philistia, and is referred by the sacred writer to the jaw-bone with which Samson slaughtered the Philistines (Judg. xv. 17).

RAMOTH-NEGEB (*Ramoth of the south*), a city in the tribe of Simeon (Josh. xix. 8; 1 Sam. xxx. 27).

RAMS' HORNS. [Musical Instruments.]

RAMS' SKINS, RED, as Dr. M. Harris quotes it (עֹרֹת אֵילִם מְאָדָּמִים, *oroth eylim meaddamim*), occurs in Exod. xxv. 5, and xxxv. 7. There is little doubt that the red rams' skins here noticed are to be understood as the produce of the African Aoudad, the *Ovis tragelaphus* of naturalists, whereof the bearded sheep are a domesticated race. The tragelaphus is a distinct species of sheep, having a shorter form than the common species, and incipient tear-pits. Its normal colour is *red*, from bright chestnut to rufous chocolate; which last is the cause of the epithet *purple* being given to it by the poets. Far to the south, or within the tropics, the species is densely clothed with coarse short hair, but longer on the neck, and pendant in great abundance beneath the throat. From a specimen now living in our possession, it has been observed that on the first approach of autumn a very fine grey wool crops out everywhere from beneath the hair. In Spain, and in the islands of Sardinia, Corsica, Sicily, and Crete, the most ancient zoology seems to have had greater affinity to that of Africa than of Europe. Hence the Homeric purple sheep, and the *Musmon* and *Cervus Barbarus* of the two first-mentioned islands. We agree with Dr. Mason Harris, that the skins in question were most likely tanned and coloured crimson; for it is well known that what is now termed red morocco was manufactured in the remotest ages in Libya, especially about the Tritonian Lake, where the original ægis, or goat-skin breastplate of Jupiter and Minerva, was dyed bright red; and the Egyptians had most certainly red leather in use, for their antique paintings show harnessmakers cutting it into slips for the collars of horses and furniture of chariots.—C. H. S.

RAVEN (עֹרֵב *oreb*; Chald. עוֹרְבָא; Syr. ܥܘܪܒܐ; Latin, *corvus*; Sept. κόραξ; also Luke xii. 24, only). The Hebrew word occurs in Gen. viii. 7; Lev. xi. 15; Deut. xiv. 14; 1 Kings xvii. 4-6; Job xxxviii. 41, &c. The raven is so generally confounded with the carrion crow, that even in the works of naturalists the figure of the latter has been sometimes substituted for that of the former, and the manners of both have been mixed up together. They are, it is true, very similar, belonging to the same Linnæan genus, *Corvus*, and having the same intensely black colour; but the raven is the larger, weighing about three pounds; has proportionably a smaller head, and a bill fuller and stouter at the point. Its black colour is more iridescent, with gleams of purple passing into green, while that of the crow is more steel-blue; the raven is also gifted with greater sagacity; may be taught to articulate words; is naturally observant and solitary; lives in pairs; has a most acute scent; and flies to a great height. Unlike the crow, which is gregarious in its habits, the raven will not even suffer its young, from the moment they can shift for themselves, to remain within its haunt; and therefore, though a bird found nearly in all countries, it is nowhere abundant.

Whether the raven of Palestine is the common species, or the *Corvus Montanus* of Temminck, is not quite determined; for there is of the ravens, or greater form of crows, a smaller group including two or three others, all similar in manners, and unlike the carrion crows (*Corvus Corone*, Linn.), which are gregarious, and seemingly identical in both hemispheres. Sometimes a pair of ravens will descend without fear among a flight of crows, take possession of the carrion that may have attracted them, and keep the crows at a distance till they themselves are gorged. The habits of the whole genus, typified by the name *oreb*, render it unclean in the Hebrew law; and the malignant, ominous expression of the raven,

together with the colour of its plumage, powers of voice, and solitary habits, are the causes of that universal and often superstitious attention with which mankind have ever regarded it. This bird is the first mentioned in the Bible, as being sent forth by Noah out of the ark on the subsiding of the waters; and in 1 Kings xvii. 4, ravens bring flesh and bread at morning and eve to the prophet Elijah. Here the *orebim* are manifestly true ravens, whereof a pair would be sufficient to carry the scanty meal of an Oriental abstemious man; for, independently of the different mode of writing the name, if the word had implied persons residing at a village called Aorabi or Orbo, as presumed by some critics, there would have been no miraculous interposition of the Lord to feed the concealed prophet, but a common, and on this occasion merely a secret resolution on the part of a few pious men, to give food to a proscribed person.

In the mythological history of the Gentiles, we find the appellation of Ravens bestowed upon an oracular order of priesthood. In Egypt, it seems, the temples of Ammon were served by such—perhaps those priests that occur in the catacombs playing on harps, and clothed in black. More than one temple in Greece had similar raven priests. It was the usual symbol of slaughter among the Scandinavians; and a raven banner belonged to the Danes, and also to the Saxons: one occurs among the ensigns of the Normans in the Bayeux tapestry; and it was formerly a custom in the Benedictine abbeys on the continent to maintain in a very large cage a couple of ravens, where several are recorded to have lived above fifty years. The Raven of the Sea, that ominous bird in northern mythology, is properly the cormorant—the *morvran* of the Celtæ.—C. H. S.

REBEKAH (רִבְקָה, *a noosed cord;* Sept. Ῥεβέκκα), daughter of Bethuel, and sister of Laban, who became the wife of Isaac, and the mother of Jacob and Esau. The particulars of her history and conduct, as given in Scripture, chiefly illustrate her preference of Jacob over Esau, and have been related in the article Jacob: see also Isaac.

RECENSION. After the critical materials lying at the basis of the New Testament text had accumulated in the hands of Mill and Wetstein, they began to be surveyed with philosophic eye. Important readings in different documents were seen to possess resemblances more or less striking. Passages were found to present the same form, though the testimonies from which they were singled out belonged to various times and countries. The thought suggested itself to Bengel, that the mass of materials might be divided and classified in conformity with such peculiarities. The same idea also occurred to Semler. Both, however, had but a feeble and dim apprehension of the entire subject as it was afterwards disposed. But, by the consummate learning and skill of Griesbach, it was highly elaborated, so as to exhibit a new topic for the philosophical acumen and the historic researches of the erudite inquirer. To the different phases of the text existing in the MSS., quotations made by the fathers, and in the ancient versions, the name *recension* was given by Griesbach and Semler. Yet the appellation was not happily chosen. *Family* (which Bengel used), *class*, or *order*, would have been much more appropriate. *Recension* ordinarily suggests the idea of an actual revision of the text; but this is inapplicable to the greater part of Griesbach's own system. If, however, it be remembered that recension simply denotes a certain class of critical testimonies characterized by distinctive peculiarities, it matters little what designation be employed; though *family* is less likely to originate misconception.

We shall first state the recension-systems of Griesbach, Hug, Eichhorn, and Scholz; then the chief objections to which they are exposed; concluding with some observations on the real state of the question. As to the systems of Michaelis and Nolan, it is unnecessary to allude to them, since they are obviously incorrect. The latter, indeed, never attracted notice in this or any other country, having soon fallen into merited neglect.

In Griesbach's system there are *three* recensions: 1. The Occidental; 2. The Alexandrine, or Oriental; 3. The Constantinopolitan, or Byzantine. The first two are the most ancient, and are assigned by him to the time in which the two collections —εὐαγγέλιον and ὁ ἀπόστολος, were made. The Oriental, springing from the edition, as we should say in regard to a printed book, of the ὁ ἀπόστολος, selected readings most conformable to pure Greek, and made slight alterations in the text where the language did not appear to be classical. The Occidental, based on the most ancient MSS., viz. such as were made before the epistles had been collected together, preserved with greater care than the Oriental the Hebraisms of the New Testament, but made explanatory additions, and frequently preferred a more perspicuous and easy reading to another less facile. The Constantinopolitan arose from the intermingling of the other two. A senior and a junior Constantinopolitan are distinguished. The former belongs to the fourth century, and is marked, to a still greater extent than the Alexandrine, by its rejection of readings that seemed less classical, as well as by its reception of glosses; the latter originated in the fifth and sixth centuries, in consequence of the labours of the learned men belonging to the Syrian church. According to this system, the leading characteristic of the Occidental recension is its *exegetical*, that of the Oriental its *grammatical* tendency; while the Constantinopolitan bears a *glossarial* aspect.

The Occidental recension is exhibited by eight Greek MSS. of the Gospels, D. E. F. G. of the Pauline epistles, the Latin versions made before Jerome, the Sahidic and Jerusalem-Syriac versions, and by the quotations of Tertullian, of Irenæus as translated into Latin, of Cyprian, Ambrose, and Augustine.

The Alexandrine recension is found in the documents B. C. L. in the Gospels, with three others, in A. B. C. in the epistles, with three codices besides; in the Memphitic, Harclean or Philoxenian, Ethiopic and Armenian versions; and in the writings of the fathers belonging to the Alexandrian school, especially those of Clement, Origen, Eusebius, Athanasius, Cyril of Alexandria, and Isidore of Pelusium.

The senior Constantinopolitan is found in A. E. F. G. H. S. of the Gospels, and in the Moscow codices of Paul's epistles, in the Gothic

and Sclavonic versions, in the quotations of the fathers that lived during the fourth, fifth, and sixth centuries in Greece, Asia Minor, and the neighbouring countries; while the junior Constantinopolitan is exhibited by the greater number of those MSS. which were written since the seventh century.

Somewhat different from Griesbach's system is that of Hug, first proposed in his Introduction to the New Testament.

1. The κοινὴ ἔκδοσις, *i. e.* the most ancient text, unrevised, conformed to no recension, exhibiting diversities of readings of mixed origin, but containing particular glosses and interpolations intended to explain the sense. This text is found in five MSS. of the Gospels, in four of Paul's epistles, in the most ancient Latin versions and in the Sahidic, in the oldest of the fathers down to the time of Origen, and in Origen himself. Such a phase of the text is seen till the middle of the third century, and agrees with the Occidental recension of Griesbach. In reference to the old Syriac, Griesbach afterwards conceded to Hug that it approached nearer the Occidental than the Alexandrian.

2. About the middle of the third century, Hesychius, an Egyptian bishop, undertook a revision of the κοινὴ ἔκδοσις. But he was too fond of such readings as contained purer and more elegant Greek. To this Hesychian revision, which obtained ecclesiastical authority only in Egypt, belong B. C. L. of the Gospels, and A. B. C. of the Epistles, the Memphitic version, with the quotations of Athanasius, Macarius, and Cyril of Alexandria. Thus the Hesychian recension of Hug coincides with the Alexandrian of Griesbach.

3. About the same time, Lucian, a presbyter of Antioch in Syria, revised the κοινὴ ἔκδοσις as it appeared in the Peshito, comparing different MSS. current in Syria. In this way he produced a text that did not wholly harmonize with the Hesychian, because he was less studious of elegant Latinity. This third form of the text is found in codd. E. F. G. H. S. V. of the Gospels, in G. of Paul's epistles, in the Moscow MSS., the Sclavonic and Gothic versions, and the ecclesiastical writers of those countries that adopted it, from the middle of the third century.

4. A fourth form of the text he attributes to Origen during his residence at Tyre. This revision was based on the Vulgate edition current in Palestine, and in many places differs both from the Hesychian and Lucianian. It is found in the codd. A. K. M. of the Gospels, in the Philoxenian or Harclean Syriac, and in the writings of Chrysostom and Theodoret. Here Hug and Griesbach are at variance, the latter believing the alleged Origenian recension to be nothing more than a branch of the Constantinopolitan or Lucianian.

Eichhorn's system is substantially the same as that of Hug, with one important exception. That distinguished critic admitted a twofold form of the text before it had received any revision; the one peculiar to Asia, the other to Africa. This unrevised text may be traced in its two forms as early as the second century. Hesychius revised the first; Lucian, the second. Accordingly, from the conclusion of the third century, there was a threefold phase of the text; the African or Alexandrian; the Asiatic or Constantinopolitan; and a mixed form composed of the other two. Eichhorn denies that Origen made a new recension.

Scholz makes only two classes or families of documents, the Alexandrian, which he also absurdly calls *the Occidental*, and the Constantinopolitan, which, with equal perversity, he designates *the Oriental*. The Occidental class of Griesbach is thus merged into the Alexandrian. The Alexandrian embraces the MSS. that were made in Egypt and Western Europe, most of the Coptic and Latin versions, the Ethiopic, and the ecclesiastical writers belonging to Egypt and Western Europe. To the Constantinopolitan he refers the codices belonging to Asia Minor, Syria, Palestine, Eastern Europe, especially Constantinople, with the Harclean or Philoxenian, the Gothic, Georgian, and Sclavonic versions; as also the ecclesiastical fathers of these regions. To the latter documents he gives a decided preference, because of their mutual agreement, and because they were written with great care agreeably to the most ancient exemplars; whereas the Alexandrian were arbitrarily altered by officious grammarians. Indeed, he traces the Constantinopolitan codices directly to the autographs of the original writers of the New Testament.

Rinck agrees with Scholz in assuming two classes of MSS., the Occidental and the Oriental; the former exhibited by A. B. C. D. E. F. G. in the epistles; the latter, by MSS. written in the cursive character. The occidental he subdivides into two families, the African (A. B. C.) and the Latin codices (D. E. F. G.).

Matthæi, as is well known, rejected the entire theory of recensions; and Lachmann, the latest editor of the Greek Testament, has no regard to such a basis for his new text.

It remains for us to make a few remarks on the systems thus briefly stated. To Griesbach all concede the praise of ingenuity and acuteness. His system was built up with great tact and ability. However rigidly scrutinized, it exhibits evidences of a most sagacious mind. But it was assailed by a host of writers, whose combined attacks it could not sustain. In this country, Dr. Laurence shook its credit. In Germany, Michaelis, Matthæi, Eichhorn, Bertholdt, Hug, Schulz, Scholz, Gabler, Schott, and others, have more or less made objection to it. The venerable scholar in his old age himself modified it to some extent, chiefly in consequence of Hug's investigations. By far the ablest opponent of it is Mr. Norton, who, after it had been assailed by others, finally stepped forth to demolish it beyond the possibility of revival. Bold indeed must be the man who shall undertake to defend it after such a refutation. The great point in which it fails is, that the line of distinction between the Alexandrian and Western classes cannot be proved. Origen and Clement of Alexandria are the principal evidences for the Alexandrian form of the text, yet they coincide with the Western recension. Griesbach's allegations as to the origin of the Eastern and Western recensions are also visionary; while it is not difficult to see that the text followed by the old Syriac presents a formidable objection to the whole scheme.

The system of Hug, in so far as it materially differs from its predecessor, is as faulty as that of Griesbach. It puts Clement and Origen in the κοινὴ ἔκδοσις. But Origen employed an Occi-

dental MS. only in his commentary on Matthew; in his commentary on Mark he uniformly quotes an Alexandrian codex; and his usual text certainly agrees with the Alexandrian recension. As to Clement, he frequently agrees with the Alexandrian in opposition to the Western recension, and therefore he cannot be properly reckoned as belonging to the latter, in a system where there are two distinct recensions agreeing with the Occidental and the Alexandrian. The Hesychian revision does not seem to have had much authority, or to have been widely circulated even in the country where it was made. Besides, the form of the text ascribed to Hesychius appears to be older, even as old as Clement's time. Hesychius, therefore, probably did nothing more than revise the Alexandrian recension. The historical basis on which Lucian's recension of the text rests is also insecure. The MSS. which he revised were not numerous; neither did they obtain authority. The testimony of Jerome, so far from supporting Hug's view, goes indirectly to refute it. Again, it is very improbable that Origen undertook to revise the *κοινὴ ἔκδοσις*. The passage in Jerome on which Hug founds this opinion does not really support it. The Alexandrian father used copies of the New Testament selected with care and purged from errors; but he did not attempt in his old age the laborious task of making a peculiar revision. Such are the chief objections that may be urged against the recension-system of this learned critic. Unsustained by historical data, subsequent critics have refused to yield it their approbation. Griesbach, De Wette, Schott, and Rinck, especially the last, have assailed it with more or less ability; while, in America, Mr. Norton has also opposed it with great plausibility. In short, it cannot stand the test of an enlightened, impartial examination.

With regard to Scholz's system, it commends itself to our approbation only in so far as it insists upon two families of documents, the Alexandrine and the Constantinopolitan. There is no definite line of demarcation between the Alexandrian and the Western, as was long since shown by Laurence; although Tischendorf has recently re-asserted it. Egypt and the Western world were supplied with Biblical MSS. from Alexandria, some of them revised, others untouched and unpurged by the hand of a corrector. Thus the Alexandrian and Occidental MSS. of Griesbach were the productions of one country and one age; differing, indeed, from one another in many respects, but that discrepancy owing to the caprice of transcribers, and to the varying tastes which they found it advantageous to please. But although we look upon Scholz's system as simpler and better supported than any other, in so far as it asserts no more than two families, yet it is otherwise pressed by fatal objections. It is based on *assertions*, instead of *arguments* solid and sufficient. The framer of it has failed to prove that the particular form of the text current during the first three centuries in Asia Minor and Greece was the same as that exhibited by the Constantinopolitan manuscripts of a much later date. He has failed to show that the Byzantine family was derived in a very pure state from the autographs of the inspired writers. Besides, he is obliged to admit, that the text which obtained at Constantinople in the reigns of Constantine and Constans, was collated with the Alexandrian, which would naturally give rise to a commingling of readings belonging to both. Eusebius states that, at the request of Constantine, he made out fifty copies of the New Testament for the use of the churches at Constantinople; and as we know that he gave a decided preference to Alexandrian copies, it cannot be doubted that he followed those sanctioned by Origen's authority. On the whole, it can never be made out on historic grounds, that the Constantinopolitan codices have descended from the autographs in a pure state. They differ, indeed, in characteristic readings from the Alexandrian, but that the preference should be given to the former is a most questionable position. Why should junior be set in value above much older documents? What good reason can be assigned for the predilection of Matthæi and Scholz? None truly. Antiquity may be outweighed by other considerations, and certainly the Alexandrine MSS. are neither faultless nor perfect; but in the case of the Byzantine family there is *no sufficient ground* for arbitrarily placing it above the other. In the present day, numbers will not be considered as decisive of genuine readings, in opposition to weighty considerations founded on antiquity; and yet it is possible that numbers may have had an undue influence on the mind of Scholz. Such as desire to see a thorough refutation of the system may read Rinck's *Lucubratio Critica*, &c., but especially Tischendorf's Preface to his edition of the Greek Testament, where it is dissected with great ability, and the foundation on which it professedly rests demonstrated to be feeble and futile. In fact, the historical proofs of the industrious Scholz are no better than fictions, which genuine ecclesiastical history will never sanction.

Perhaps the data are not sufficient to warrant or support any one system of recensions. Our knowledge of the manner in which the text was early corrupted, of the innumerable influences to which it was exposed, the revisions it underwent in different countries at different times, the modes in which transcribers dealt with it, and of the principles, if any such there were, on which they proceeded, is too scanty to allow of any definite superstructure. The subject must, therefore, be necessarily involved in obscurity. Its genius is such as to give rise to endless speculation, without affording solid satisfaction. It is vague and undefined, awakening curiosity, but not appeasing it with conviction. Yet we are not disposed to reject the entire system of classification as visionary and fanciful. It is highly useful thus to arrange the materials; it saves a world of labour after the distribution has once been made. The existence of certain characteristic readings may be clearly traced as pervading various memorials of the text, however much we may speculate on their causes. It is quite true, that in several cases it is very difficult to distinguish the family to which a particular reading belongs, because its characteristics may be almost equally divided between two classes. Or, they may be so slightly marked, that it is almost impossible to detect the family with which it should be united. The evidences of its relationship may be so obscure as to render the determination of its appropriate recension a subtle problem. It is also unquestionable, that no one MS., version, or father, exhibits a recension

in a pure state; but that each form of the text appears more or less corrupted. Add to these circumstances the frequent commixture of readings from causes accidental or designed. Hence the various attempts that have been made to rear up systems have been unsatisfactory and unsuccessful; so much so, that we should not be surprised to find the majority of the learned, at no great distance of time, regarding them as airy and unsubstantial speculations 'signifying nothing.' The intricacy of the subject may hereafter induce critics to say in their haste that it is unworthy of their serious attention. We have seen that Matthæi cast aside the whole thing as a useless and silly speculation. Professor Lee has employed language equally strong, though not equally scurrilous as that of Matthæi—language of the same import, and tending to the same result. So too, Granville Penn. We doubt, however, if the learning or the sagacity of these English scholars is of such a kind as to warrant in them the employment of terms so vehement. It is more ominous for the fate of the recension-system to find it discarded in practice by Lachmann; yet when we consider that he has gone to the extreme of resting on *mere antiquity*, sometimes on a *single testimony*, he will not be thought competent to do away with the labours of so many eminent critics who have preceded. In short, the theme is such as to disallow a *rigid division* of the critical materials into peculiar families, or even a geographical distribution of them. The MSS., numerous though they be, are not sufficiently so to warrant safe results, with the exception of a single class. As regards versions, their testimony is rather *indirect;* and in the Scripture quotations made by the fathers there is a fragmentary aspect. Both these circumstances counterbalance most of the advantages resulting from our ability to identify versions and quotations, *à priori*, with some local text.

The preceding observations may serve to account for the varying, and, in some cases, contradictory schemes of different critics. Some are inclined to look for greater nicety and distinctness than others; and it may be presumed that they will find more families in consequence of their mental bias; others, with less delicate perceptibility, will be disposed to rest satisfied with classes more strongly marked by the number of single documents they embrace, or by the breadth of territory over which they circulated. Thus there is no possibility of arriving at mathematical precision or demonstrative evidence, because the historic furniture is so meagre as to afford room for almost boundless speculation; while the commingling of *all* readings in the progress of time has obliterated many well-defined landmarks.'

The term *recension* is sometimes applied to the Old Testament as well as the New. There, all the materials hitherto collated belong to one recension or family, viz., the Masoretic. Some, indeed, have divided them into Masoretic and Ante-Masoretic; but the existence of the latter is fictitious. At present we know of no more than one great family, though it is probable that partial recensions of several portions of the Old Testament preceded the labours of the Masoretic doctors. (Bengel's *Introductio in Crisin N. T.*, prefixed to his edition of the Greek Testament, Tübingen, 1734, 4to.; Semler's *Vorbereitungen zur Hermeneutik*, Halle, 1760-69, 8vo.; Griesbach's *Opuscula*, as edited by Gabler, with the Preface of the latter, Jena, 1824, 2 vols. 8vo.; Griesbach's *Commentarius Criticus in Textum Græcum*, &c. RECHAB (רֵכָב, *rider;* Sept. Ῥηχάβ), son of Hemath the Kenite, and probably a descendant of Jethro [KENITES]: he is only known as the father of Jonadab, the founder of the sect of Rechabites, which took from him its name (2 Kings x. 15; 1 Chron. ii. 55; Jer. xxxv. 6).

RECHABITES. The tribe or family of Kenites, whom Jonadab, the son of Rechab, subjected to a new rule of life; or rather bound to the continued observance of ancient usages which were essential to their separate existence, but which the progress of their intercourse with towns seemed likely soon to extinguish. By thus maintaining their independent existence as a pastoral people, they would keep themselves from being involved in the distractions and internal wars of the country, would be in no danger of becoming objects of jealousy and suspicion to the Israelites, and would be able at all times to remove from a country in which they were strangers. The Rechabites found so much advantage in these rules, that they observed them with great strictness for about 300 years, when we first become aware of their existence. Jeremiah brings some Rechabites into one of the chambers of the Temple, and sets before them pots full of wine, and cups, saying, 'Drink ye wine;' on which it is well observed by Gataker and others that the prophet omits the usual formula, 'Thus saith the Lord,' which would have constrained obedience in men so pious as the Rechabites, even at the expense of infringing their rule of life. But now they answer, 'We will drink no wine; for Jonadab, the son of Rechab, our father, commanded us, saying, Ye shall drink no wine, neither ye nor your sons for ever. Neither shall ye build house, nor sow seed, nor plant vineyard, nor have any: but all your days ye shall dwell in tents, that ye may live many days in the land where ye be strangers' (Jer. xxxv. 6, 7). They added that to the present time they had observed

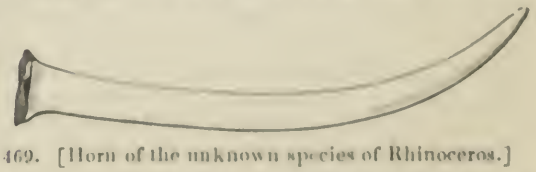
these injunctions, although they had been constrained to take refuge in Jerusalem when the Chaldæan armies swept the face of the land. The Vulgate, by *translating* all the proper names in 1 Chron. ii. 55, has given currency to an impression that the Rechabites were employed in some of the inferior offices of the temple; and has led to the inference that they were taken as captives to Babylon, from which they returned, and resumed their duties under the second temple, Jabesh in Gilead being the chief place of their residence. There is no shade of authority, beyond this assumption of proper names as appellatives, for a statement every point in which is contrary to the probabilities of the case. The Septuagint, though prone to regard Hebrew proper names as appellatives, does not do so in this text, with the exception of Sopherites, which it renders by 'scribes,' in which it is followed by the Auth. Version. But there is no apparent ground for thus taking one only as an appellative in a list of proper names, unless an intelligible sense could not be otherwise obtained. But the sense is better with this also as a proper name than as an appellative. We may then read, much as in Geddes' version, 'But the Sopherite families who inhabited Jabesh, the Tirathites, the Shimathites, and the Suchathites, were Kenites who came from Hemath Abi-Beth-Rechab.' The translator remarks on the last words, 'I do not translate these words, because I do not understand them.' There is probably some corruption of the text. The literal version would be, 'Hemath, father of the house of Rechab.' *This* Rechab was doubtless the same from whom the Rechabites took their name; and it appears to us that the text is far from meaning to say that the families at Jabesh (whether 'scribes' or not) were Rechabites in the limited sense; their residence at Jabesh being indeed conclusive against that notion: but that these families were Kenites descended from the Hemath who was *also* the progenitor of that Rechab from whom the Rechabites took their name. We doubt if a clearer explanation of this difficult text can be obtained: and if so, it conveys no other information concerning the Rechabites than that their progenitor was a descendant of Hemath, who was likewise the founder of other Kenite families.

What eventually became of the Rechabites is not known. The probability is that, when they found themselves no longer safe among the Hebrews, they withdrew into the desert from which they at first came, and which was peopled by men of similar habits of life, among whom, in the course of time, they lost their separate existence. The various attempts to identify them with the Assideans, mentioned in the books of Maccabees (1 Macc. ii. 42; vii. 17; 2 Macc. xiv. 6), and with the later Jewish sect of Essenes, will not bear examination. We can as little recognise as Rechabites the body of people in Arabia of whom Benjamin of Tudela (*Itinerary*, i. 112-114, ed. Asher), Niebuhr, Wolf (*Journals*, ii. 276, 331-334; iii. 17), and others, have given hearsay accounts. The details, however, whether correct or not, apply to Talmudical Jews more than to Rechabites. They are described as living in caverns and low houses, not in tents—and this in Arabia, where Bedouin habits would cease to be singular; nor are any of the Rechabite rules observable in them except that of refraining from wine—an abstinence which ceases to be remarkable in Arabia, where no one does drink wine, and where, among the strongholds of Islam, it could probably not be obtained without danger and difficulty. There were large numbers of Talmudical Jews in Arabia in the time of Mohammed, and these supposed Rechabites are probably descended from a body of them. It is to be hoped that some competent traveller will penetrate to the spot which they are said to inhabit, and bring back some more satisfactory accounts than we yet possess. (See Witsius, *Dissert. de Rechabitis*, in *Miscell. Sacra*, ii. 176, sqq.; Carpzov, *Apparat.*, p. 148; Calmet, *Dissert. sur les Réchabites*, in *Commentaire Littéral*, vi. 18-21.)

RECORDER (מַזְכִּיר; Sept. ἀναμιμήσκων or ὑπομνηματογράφος), the title of a high officer in the court of the kings of Judah (2 Sam. viii. 16; 1 Kings iv. 3; 2 Kings xviii. 18). As the idea of memory, memorials, is prevalent in the etymology of the word, 'remembrancer' would perhaps be a more exact translation of it. We have no office with which it can be compared; for the functions of the Master of the Rolls do not sufficiently correspond with the title to warrant the parallel which it might suggest. The Hebrew *mazkir* seems to have been not only the grand custodier of the public records, but to have kept the responsible registry of the current transactions of the government. This was an employment of the very first rank and dignity in the courts of the ancient East.

RED SEA. [Sea.]

RED SEA, PASSAGE OF. [Exodus.]



REED. [Kaneh.]

REEM (רְאֵם; Sept. μονοκέρως; Vulg. *rhinoceros*; and in several versions of the Bible, *unicorn*. The radical meaning of the Hebrew word

468. [Bibos cavifrons.]

furnishes no evidence that an animal such as is now understood by 'unicorn' was known to exist, or that a rhinoceros is thereby absolutely indicated;

469. [Horn of the unknown species of Rhinoceros.]

and there is no authority whatever for the inference that either was at any time resident in Western Asia. The general structure and figurative and symbolical character of the Hebrew, in

common with all the Semitic languages, seem more naturally to suggest that the word *reem* conveys an image of loftiness, exaltation, power, and pre-eminence—a form of expression of which there are many parallel instances; nor is the root confined to the Hebrew, but is found in the Sanscrit, Etrusco-Latin, Erse, and Teothisc dialects. It can be traced in the names Abram, Abraham, and Ramah, in Rom and Roma: all bearing the meaning of Robur, Valentia, &c. Ram, in Indian mythology, one of the titles of Mahadeo, appears in the compounds Rama-deva, Rama-Chandra, and numerous other titles. It is found again in the Teothistic Ram; the Ram being the opener of the solar year, or first sign of the zodiac. These figures, metaphorical and pictorial, while phonetic writing was as yet unknown or imperfect, were abundantly used in early antiquity, and often represented very definite ideas in both cases; but more particularly when they were embodied in sculptural forms, and were embellished with colours; for then a complex definition was attainable by the assemblage of heterogeneous members and tints to form one body; such as serpents with wings, with four legs, a row of teats, winged quadrupeds, beasts with human heads, winged globes entwined by serpents, &c., constituting by their unnatural juxta-position complex, yet perfectly intelligible, abstractions. The ruins of Persepolis, Nineveh, and the so-called Babylonian cylinders, as well as the figures published by Sir J. G. Wilkinson in his works on Egypt offer numerous examples. So deeply rooted were these notions in the Oriental mind, that we find them spoken of as visible bodies in the prophetic, and other parts of Scripture; and they even occur among other symbols of the Evangelists. In the poetical language of the Bible some of these images stand at one time as typical of realities in nature, at others as symbolical of abstractions, and ראם may be found in both characters. Although the medallic history of the kings of Macedon (Havercampius, *Gen. Hist.* in the Dutch language) furnishes no coins bearing a single-horned goat, it is still asserted by Maillot and others that such was to be found among their ensigns: but this was most probably after the Macedonian conquest; for a single-horned ibex appears on the bas-reliefs of Che-el-Minar; another occurs on a cylinder; and one cast in brass, supposed to have been the head of a Macedonian standard, was found in Asia Minor, and presented to the Antiquarian Society of London. If mysterious names were resolvable by the canons of pictorial definition, the practice of imagining horns to be affixed to the most sublime and sacred objects would be most evident from the radical meaning of the word cherub, where the notion of horns is everywhere blended with that of 'power and greatness' [Cherubim]. There were also horns at the corners of altars—the beast with ten horns in Daniel, &c. (chap. vii.). In profane history we have the goat-head ornament on the helmet of the kings of Persia, according to Ammianus, more probably Ammon horns: such Alexander the Great had assumed; and his successors in Egypt and in Persia continued a custom, even now observed by the chief cabossiers of Ashantee, who have a similar ram-head of solid gold on the front of their plumy war-caps. Indeed, from early antiquity, Greek and Ionian helmets were often adorned with two horns; among others the head of Seleucus I. (Nicator) appears thus on his coins: the practice extended to metal horns being affixed to the masks or chaffrons of war-horses (see coin of Seleucus Nicator), and of elephants (Antiochus Soter); and they form still, or did lately, a part of the barbed horse-armour in Rajahstan. Triple-horned and bicorned helmets are found on early Gallic and Iberian coins; they were again in use during the chivalrous ages; but the most remarkable, the horn of strength and dominion, is seen elevated on the front of the helmet, impressed on the reverse of the coins of the tyrant Tryphon, who, in his endeavours to obtain Syria, was at war with Antiochus Sidetes, during the æra of the Maccabees, and was not likely to omit any attribute that once belonged to its ancient kings [Horn]. These examples, together with the cornuted crown of Abyssinian chiefs, and the horned female head-attire prized by the present generation in Libanus and Palestine, are sufficient to show the extent and duration of a symbol, which, it is evident, is implied in the word *reem*, in several places of the Bible, notwithstanding that literally it signifies also a real or fictitious creature, at one time alluded to as possessed of a single horn, while in other instances this characteristic is scarcely, or not at all, admissible.

Now this may be regarded as the natural consequence of assuming as a typical form an animal of a remote country, or a generic term for several more or less different in their characters. In profane history, from the time of Ctesias (B.C. 400) to the present day, India, the Himalayas, and Tibet, are reported to have produced unicorns; whereof the most recently pointed out was the *Chiru* of Bootan, a species of antelope with two horns: and anciently Ælian's Cartazon was similarly designated, though with a slight change of letters, *carcand*, *carcaddan* (in Bochart); *kargadan*, *kargazan* (in Wilson); *al-chercheden* (in Belunensis); and all related to the Sanskrit *kharga*, 'a horn' (?), being the Persian and Arabic names for the true *Monoceros*, or Indian rhinoceros, which, like the rest of the genus, is essentially a tropical animal. For the Asiatic *Rhinocerotes*, constituting three species, belong all to the south-eastern states of the continent and the Great Austral Islands; and there is no indication extant that in a wild state they ever extended to the west of the Indus. Early colonies and caravans from the East most probably brought rumours of the power and obstinacy of these animals to Western Asia, and it might have been remarked that under excitement the rhinoceros raises its head and horn on high, as it were in exultation, though it is most likely because the sense of smelling is more potent in it than that of sight, which is only lateral, and confined by the thickness of the folds of skin projecting beyond the eye-balls. The rhinoceros is not absolutely untameable—a fact implied even in Job. Thus we take this species as the original type of the unicorn; but the active invention of Arabic minds, accidentally, perhaps, in the first instance, discovered a species of *Oryx* (generically bold and pugnacious ruminants), with the loss of one of its long, slender, and destructive horns. In this animal the ראם of the Hebrews and the far East became personified; ريم *rim*, being most probably an *Oryx Leucoryx*,

since individuals of that species have been repeatedly exhibited in subsequent ages as unicorns, when accident or artifice had deprived them of one of their frontal weapons, notwithstanding that the *rim* is well known to Arabian hunters as a two-horned animal. The spirit of appropriation in Persia and Macedonia, as we have before noticed, was similarly engaged, and for the same purpose an *Ibex*, *Bouquetin*, or mountain goat was taken, but showing only one horn [Goat]. In Africa, however, among three or four known species of rhinoceros, and vague rumours of a *Bisulcate* species of unicorn, probably only the repetition of Arabian reports, there appears to exist between Congo, Abyssinia, and the Cape, precisely the *terra incognita* of Africa, a real pachydermous animal, which seems to possess the characteristics of the poetical unicorn. It is known in Congo, according to Cavassi, quoted by Labat, by the name of *Abada;* it is the *Nillekma* and *Arase*, that is, *unicorn*, in Kordofan, mentioned by Rüppell; and appears again to be the South African *Ndzoo-dzoo*, a one-horned horse-like beast of considerable speed, and very destructive propensities, which Mr. Freeman was informed is by no means rare about Makova. In the narratives of the natives of the different regions in question there is certainly both exaggeration and error; but they all incline to a description which would make the animal indicated a pachyderm of the rhinoceros group, with a long and slender horn proceeding from the forehead, perhaps with another incipient behind it, and in general structure so much lighter than other rhinocerotes, that it may possibly be the link or intermediate form between these and the *Equine genera*. Sir J. Barrow, in his *Travels*, has figured the head of such an animal, copied by the artist Daniell from a Caffre drawing, sketched with coal on the surface of a rock within a cave. Similar drawings are not unfrequent, and we remember to have seen among the papers of the same artist, in the hands of his late brother, another drawing, likewise copied from a cave in the interior of South Africa, and representing, with exceedingly characteristic fidelity, a group of Elands, *Boselaphus Oreas*, Hartebeest, *Acronotus Caama*, and Spring Bock, *Antilope Euchore;* among which was placed, with head and shoulders towering above the rest, a *Rhinocerotine* animal, in form lighter than a wild bull, having an arched neck and a long nasal horn protruding in the form of a sabre. This drawing is no doubt still extant, and should be published; but in confirmation of the opinion that truth exists to a certain extent in the foregoing remarks, it may be observed that we have seen, we believe in the British Museum, a horn brought from Africa, unlike those of any known species of rhinoceros: it is perfectly smooth and hard, about thirty inches in length, almost equally thick throughout, not three inches in its greatest diameter, nor less than two in its smaller, and rather sharp-pointed at top: from the narrowness of the base, its great length and weight, the horn must evidently stand moveably on the nasal bones, until excitement renders the muscular action more rigid, and the coriaceous sole which sustains it more firm—circumstances which may explain the repeated assertion of natives, that the horn, or rather the agglutinated hair which forms that instrument, is flexible.

This short review of the present state of our knowledge respecting a physical unicorn, together with the symbols that have emanated from one or more of the foregoing sources, we trust are sufficient to explain the poetical bearings of most of the Scriptural texts where the word ראם is introduced: it shows when the texts clearly point to a single-horned species; indicates when by a poetical figure human power and violence may be personified under the character of an unicorn; and, lastly, when the same word appears to denote huge horned animals, as in the case of the bulls of Bashan, where it is fair to presume that not only *feral* species of great fierceness would exist, but that most likely an *urus* or a *bison* still resided in the forests bordering on Libanus, while the lion was abundant in the same locality; for, notwithstanding assertions to the contrary, the *urus* and the *bison* were spread anciently from the Rhine to China, and existed in Thrace and in Asia Minor; while they, or allied species, are still found in Siberia, and the forests both of northern and southern Persia. Finally, though the buffalo was not found anciently farther west than Arachosia, the gigantic *gaur*, and several congeners, are spread over all the mountain wildernesses of India, and the Sheriff-al-Wady; and a further colossal species roams with other wild bulls in the valleys of Atlas. We figure *Bibos cavifrons*, a species which is believed to be still found southwest of the Indus, and is not remote from that of the Atlas valleys.—C. H. S.

REFINER. [Metals.]

REFUGE, CITIES OF. [Cities of Refuge.]

REHOB (רְחוֹב; Sept. Ῥοόβ, Ῥαάβ), called also Beth-Rehob, a town on the northern border of Palestine (Num. xiii. 22), not far from Dan (Judg. xviii. 27-29). It was assigned to the tribe of Asher (Josh. xix. 28), and was a Levitical city (Josh. xxi. 31; 1 Chron. vi. 73). It does not, however, appear that the Israelites ever had it in actual possession (comp. Judg. i. 31; 2 Sam. x. 6, 8).

REHOB, the father of Hadadezer, king of Zobah, in Syria (2 Sam. viii. 3).

REHOBOAM (רְחַבְעָם, *he enlarges the people;* Sept. Ῥοβοάμ), only son of Solomon, born of an Ammonitess, called Naamah (1 Kings xiv. 21, 31). His reign commenced B.C. 975, when he was at the age of forty-one, and lasted seventeen years. This reign was chiefly remarkable for the political crisis which gave rise to it, and which resulted in the separation of the previously single monarchy into two kingdoms, of which the smaller, which took the name of Judah, adhered to the house of David. All the points involved in this important event, and its immediate results, have been considered in the articles Israel, Jeroboam, Judah, and little remains to be added in this place. It is highly probable, from the considerations adduced in those articles, that the imprudent and imperious answer of the misguided son of Solomon to the public cry for redress of grievances, only precipitated a separation which would in any case have occurred, and could not have been long delayed. The envy of Ephraim at the sceptre being in the house of Judah naturally led to this result; and the popular voice was, moreover, represented by

a man whose presence was an insult to Rehoboam, and whose interest and safety lay in widening the difference, and in producing the separation. Although this consideration may relieve Rehoboam from the sole responsibility of the separation, it cannot excuse the unwise and foolish answer which threatened a heavier yoke to those who sought to have their existing burdens lightened (1 Kings xii. 1-16). Rehoboam at first thought of nothing less than of bringing back the revolted tribes to their obedience by force of arms; but the disastrous war thus impending was arrested by the interference of a prophet (1 Kings xii. 21-24); and the ample occupation which Jeroboam found in settling his own power, left the king of Judah some years of peace, which he employed in fortifying his weakened kingdom. Concerning this, and the invasion of the land in the fifth year of Rehoboam's reign, by Shishak, king of Egypt, see JUDAH, KINGDOM OF. Jeroboam, king of Israel, being in alliance with Egypt, not only escaped this storm, but may possibly have instigated the invasion as the most effectual means of weakening his adversary. The treasures which David and Solomon had laid up in, or lavished on, the temple of God and the royal palaces, offered an adequate temptation to the Egyptian king, and they became his prey. The brass with which Rehoboam replaced the plundered gold of Solomon, furnished no inapt emblem of the difference between his own power and that of his glorious predecessors (1 Kings xiv. 27). Idolatry, and the worshipping in high places, which had grown up in the last years of Solomon, gained strength in the early years of his son's reign, and were not discouraged by the example or measures of the king (1 Kings xiv. 22-24); and it is probably for the sake of indicating the influence of early education, in producing this culpable indifference, that it is so pointedly recorded in connection with these circumstances, that his mother was Naamah, an Ammonitess (2 Chron. xii. 13). The invasion of the land by Shishak seems to have been intended as a punishment for these offences, and to have operated for their correction; which may account for the peace in which the subsequent years of this king's reign appear to have been passed.

REHOBOTH (רְחֹבוֹת; Sept. Εὐρυχωρία), a name meaning 'wide places,' or 'ample room,' as is indicated by Isaac in giving it to some of the wells which he dug in the south of Palestine (Gen. xxvi. 22).

REHOBOTH-IR (רְחֹבוֹת עִיר; Sept. Ῥωβὼθ πόλις, *Rehoboth-city*), a town of ancient Assyria (Gen. x. 11), the site of which has not been ascertained.

REHOBOTH-HANNAHAR (רְחֹבוֹת הַנָּהָר; Sept. Ῥωβὼθ τῆς παρὰ ποταμόν), or, *Rehoboth of the river*, the birth-place of one of the Edomitish kings, named Saul (Gen. xxxvi. 37). The river is, doubtless, the Euphrates, and the place is probably represented by the modern er-Rahabeh, upon the west bank of that river, between Rakkah and Anah (Rosenmüller, *Geog.* ii. 365; Winer, *B. Real-wörterb.*, s.v.).

REMPHAN, or REPHAN (Ῥεμφάν, Ῥεφάν), a name quoted in Acts vii. 43, from Amos v. 26, where the Septuagint has Ῥαιφάν, for the Hebrew כִּיּוּן *Chiun*. It is clear that, although thus changing the letter כ into ר, the Sept. held the original to be a proper name, in which interpretation our own and most other versions have concurred. But this is by no means clear; for, according to the received pointing, it would better read, 'Ye bore the tabernacle of your king (idol), and *the statue* (or statues) of your idols, the star of your god, which ye make to yourselves;' and so the Vulgate, which has 'Imaginem idolorum vestrorum.' According to this reading, the name of the idol so worshipped by the Israelites is, in fact, not given, although the mention of a star still suggests that some planet is intended. Jerome supposes it may be Lucifer or Venus. But the Syriac renders the Hebrew by حلم لمحمم, '*Saturn your idol*,' who was worshipped by the Semitic nations along with Mars as an evil demon to be propitiated with sacrifices. This now seems to be the general conclusion, and Winer, indeed, treats the subject under the head Saturn. It has been alleged, but not satisfactorily proved, that Remphan and Rephan were Egyptian names of the planet Saturn. They, indeed, occur as such in the Coptic-Arabic Lexicon of Kircher (*Ling. Ægypt. Restit.*, p. 49; *Œdip. Ægypti*, i. 386); but Jablonsky has long since shown that this and other names of planets in these lexicons are of Greek origin, and drawn from the Coptic versions of Amos and the Acts (Jablonsky, *Remphan Ægyptior.*, in *Opusc.*, ii. 1, sq.; Schrœder, *De Tabernac. Molochi et Stella Dei Remph.*, 1745; Maius, *Dissert. de Kium et Remphan*, 1763; Harenberg, *De Idolis Chium et Remphan*, 1723; Wolf, *Dissert. de Chium et Remph.*, 1741; Gesenius, *Thesaurus*, pp. 669, 670).

REPHAIM (רְפָאִים; Sept. γίγαντες), an ancient people of unusual stature, who, in the time of Abraham, dwelt in the country beyond the Jordan, in and about Ashtoreth-Karnaim (Gen. xiv. 5). Subsequently, however, two of their southern tribes, the Emim and Zamzummim, were repressed and nearly annihilated by the Moabites and Ammonites; so that at the time of the ingress of the Israelites under Joshua, none of the Rephaim were left save in the dominion of Og, king of Bashan, who was himself of this race (Deut. iii. 11; Josh. xii. 4; xiii. 12). There seems reason to think that the Rephaim were the most ancient or aboriginal inhabitants of Palestine prior to the Canaanites, by whom they were gradually dispossessed of the regions west of the Jordan, and driven beyond that river. Some of the race remained in Palestine Proper so late as the invasion of the land by the Hebrews, and are repeatedly mentioned as 'the sons of Anak,' and 'the remnant of the Rephaim' (Num. xiii. 28; Deut. ix. 2; Josh. xv. 14), and a few families existed in the land so late as the time of David (2 Sam. xxi. 16). [GIANTS.]

REPHAIM, VALLEY OF, a valley beginning adjacent to the valley of Hinnom, southwest of Jerusalem, and stretching away southwest on the right of the road to Bethlehem (Josh. xv. 8; xvii. 5; xviii. 6; 2 Sam. v. 18, 22). This name corroborates the presumption that the Rephaim were originally west of the Jordan.

REPHIDIM, a station of the Israelites in proceeding to Sinai. [SINAI.]

RESEN (רֶסֶן; Sept. Δασή), an ancient town of Assyria, described as a great city lying between Nineveh and Calah (Gen. x. 12). Biblical geographers have been disposed to follow Bochart (*Phaleg.* iv. 23) in finding a trace of the Hebrew name in Larissa, which is mentioned by Xenophon (*Anab.* iii. 4. 9) as a desolate city on the Tigris, several miles north of the Lycus. The resemblance of the names is too faint to support the inference of identity; but the situation is not irreconcilable with the Scriptural intimation. Ephrem Syrus (*Comment. in loc.*) says that ܪܣܥ Rassa, which he substitutes for Resen (the Peshito has ܪܣܝ Ressin), was the same as ܪܫ ܥܝܢ Rish-Ain (*fountain-head*); by which Assemanni understands him to mean, not the place in Mesopotamia so called, but another Rish-Ain in Assyria, near Saphsaphre, in the province of Marga, which he finds noticed in a Syrian monastic history of the middle age (Assemanni, *Biblioth. Orient.* iii. 2. p. 709). It is, however, still uncertain if Rassa is the same with Rish-Ain; and whether it is so or not, a name so exceedingly common (corresponding to the Arabic Ras-el-Ain) affords a precarious basis for the identification of a site so ancient.

RESURRECTION OF CHRIST. After our Lord had completed the work of redemption by his death upon the cross, he rose victorious from the grave, and to those who through faith in him should become members of his body, he became ἀρχηγὸς τῆς ζωῆς, 'the prince of life.' Since this event, however, independently of its importance in respect to the internal connection of the Christian doctrine, was manifestly a miraculous occurrence, the credibility of the narrative has from the earliest times been brought into question (Celsus, apud Origen. *cont. Cels.* i. 2; Woolston, *Discourses on the Miracles*, disc. vi.; Chubb, *Posth. Works*, i. 330; Morgan, *The Resurrection Considered*, 1744). Others who have admitted the facts as recorded to be beyond dispute, yet have attempted to show that Christ was not really dead; but that, being stunned and palsied, he wore for a time the appearance of death, and was afterwards restored to consciousness by the cool grave and the spices. The refutation of these views may be seen in detail in such works as Less, *Ueber die Religion*, ii. 372; Less, *Auferstehungsgeschichte, nebst Anhang*, 1799; Döderlein, *Fragmente und Antifragmente*, 1782. The chief advocates of these views are Paulus (*Hist. Resurrect. Jes.* 1795), and, more recently, Henneberg (*Philol. Histor. Krit. Commentar. üb. d. Gesch. d. Begrabn. d. Auferstehung u. Himmelfahrt Jesu*, 1826).

Objections of this nature do not require notice here; but a few words upon the apparent discrepancies of the Gospel narratives will not be misplaced. These discrepancies were early perceived; and a view of what the fathers have done in the attempt to reconcile them has been given by Niemeyer (*De Evangelistarum in Narrando Christi in Vitam reditu dissensione*, 1824). They were first collocated with much acuteness by Morgan, in the work already cited; and at a later date, by an anonymous writer, whose fragments were edited and supported by Lessing; the object of which seems to have been to throw uncertainty and doubt over the whole of this portion of Gospel history. A numerous host of theologians, however, rose to combat and refute this writer's positions; among whom we find the names of Döderlein, Less, Semler, Teller, Maschius, Michaelis, Plessing, Eichhorn, Herder, and others. Among those who have more recently attempted to reconcile the different accounts is Griesbach, who, in his excellent *Prolusio de Fontibus unde Evangelistæ suas de Resurrectione Domini narrationes hauserunt*, 1793, remarks that all the discrepancies are trifling, and not of such moment as to render the narrative uncertain and suspected, or to destroy or even diminish the credibility of the Evangelists; but rather serve to show how extremely studious they were of truth, 'and how closely and even scrupulously they followed their documents.' Griesbach then attempts to show how these discrepancies may have arisen; and admits that, although unimportant, they are hard to reconcile, as is indeed evinced by the amount of controversy they have excited.

Lately, Professor Bush has ingeniously maintained the opinion, that the body of Christ which was raised was not the identical body which was crucified, but another and spiritual body. This view was forced upon him by the general argument of his book (*Anastasis; or, the Doctrine of the Resurrection of the Body rationally and scripturally considered*, 1845); but it will not be readily admitted by those who remember the fresh prints of the nails, and the wound in the side of the risen Saviour, coupled with his manifest anxiety to impress the fact of his *personal* identity upon the minds of his disciples. It may indeed be asked, 'In what does personal identity consist?' but that is a question we cannot here argue.

The three first Gospels agree in this, that the women who went to the grave saw angels, by whom they were informed that Jesus had risen, and who commanded them to give the apostles immediate information of the fact. But as Mary Magdalene was among those women according to these Gospels, there seems a striking contradiction to John's narrative, which speaks of her alone. The writers above named, however, harmonise these accounts by supposing that Mary did indeed set out for the sepulchre with the other women; but that running before them, and finding the stone rolled away, she was overcome by a sudden impulse of feeling, and hastened back to communicate the intelligence to the apostles, as related by John. In the meantime the other women had arrived at the sepulchre, and there witnessed what is recorded by the other evangelists. Mary Magdalene returns to the grave with Peter and John; and after they had gone away hopeless, she continued to stand weeping in the same place; and while thus engaged, perceived the angels, and immediately after our Lord himself. From Him she receives the same commission which the angels had previously given to the other women, namely, to inform the apostles of his resurrection. Matthew (xxviii. 9, 10) seems to relate of all the women what strictly belongs to Mary alone; while Mark (xvi. 9) is more precise in his account. According to this mode of reconciling the Gospel narratives, we are to suppose that the other women were prevented from communicating to the apostles what the angels had given them in

charge; and Hess renders it probable, on topographical grounds, that those who were returning from the grave may have missed the apostles, who were hastily approaching it.

If this explanation be admitted, the only remaining difficulty is that which arises from the Gospel of Luke, which appears to state that the apostles did not visit the sepulchre till all the intelligence had been communicated to them by the women (Luke xxiv. 9-12). We will not attempt to get over this difficulty by rejecting the verse which creates it (xxiv. 12), on the ground of its being wanting in one Greek and some ancient Latin manuscripts; but would rather suppose that in this, as in some other passages, Luke has neglected the order of time, and inserted the incident somewhat out of place. Besides the works already referred to, see Sherlock, *Trial of the Witnesses of the Resurrection of Jesus*, 1729; Benson's *Life of Christ*, p. 520, sq.; West, *On the Resurrection;* Macknight's *Harmony of the Gospels;* Lardner, *Observations on Dr. Macknight's Harmony*, 1764; Newcome's *Harmony of the Gospels*, 1778; Tholuck, *Comment. zu Johan*, xx.; Neander, *Das Leben Jesu*, 1839; Hase, *Das Leben Jesu*, 1840. Since the above was in type we have seen an excellent paper by Professor Robinson, in the *Bibliotheca Sacra* for Feb. 1845, in which the writer, with his usual perspicuity, discusses the alleged discrepancies in the Gospel narratives of 'The Resurrection and Ascension of our Lord.'

RESURRECTION OF THE BODY. This expression is used to denote the revivification of the human body after it has been forsaken by the soul, or the re-union of the soul hereafter to the body which it had occupied in the present world. It is admitted that there are no traces of such a doctrine in the earlier Hebrew Scripture. It is not to be found in the Pentateuch, in the historical books, or in the Psalms; for Ps. xlix. 15, does not relate to this subject; neither does Ps. civ. 29, 30, although so cited by Theodoret and others. The celebrated passage of Job xix. 25, sq., has, indeed, been strongly insisted upon in proof of the early belief in this doctrine; but the most learned commentators are agreed, and scarcely any one at the present day disputes, that such a view of the text arises either from mistranslation or misapprehension, and that Job means no more than to express a confident conviction that his then diseased and dreadfully corrupted body should be restored to its former soundness; that he should rise from the depressed state in which he lay to his former prosperity; and that God would manifestly appear (as was the case) to vindicate his uprightness. That no meaning more recondite is to be found in the text, is agreed by Calvin, Mercier, Grotius, Le Clerc, Patrick, Warburton, Durell, Heath, Kennicott, Döderlein, Dathe, Eichhorn, Jahn, De Wette, and a host of others. That it alludes to a resurrection is disproved thus:—1. The supposition is inconsistent with the design of the poem and the course of the argument, since the belief which it has been supposed to express, as connected with a future state of retribution, would in a great degree have solved the difficulty on which the whole dispute turns, and could not but have been often alluded to by the speakers. 2. It is inconsistent with the connection of the discourse; the reply of Zophar agreeing, not with the popular interpretation, but with the other. 3. It is inconsistent with many passages in which the same person (Job) longs for death as the end of his miseries, and not as the introduction to a better life (iii.; vii. 7, 8; x. 20-22; xiv.; xvii. 11-16). 4. It is not proposed as a topic of consolation by any of the friends of Job; nor by Elihu, who acts as a sort of umpire; nor by the Almighty himself in the decision of the controversy. 5. The later Jews, who eagerly sought for every intimation bearing on a future life which their Scriptures might contain, never regarded this as such; nor is it once referred to by Christ or his apostles.

Isaiah may be regarded as the first Scripture writer in whom such an allusion can be traced. He compares the restoration of the Jewish people and state to a resurrection from the dead (ch. xxvi. 19, 20); and in this he is followed by Ezekiel at the time of the exile (ch. xxxvii.). From these passages, which are, however, not very clear in their intimations, it may seem that in this, as in other matters, the twilight of spiritual manifestations brightened as the day-spring from on high approached; and in Dan. xii. 2, we at length arrive at a clear and unequivocal declaration, that 'Those who lie sleeping under the earth shall awake, some to eternal life, and others to everlasting shame and contempt.'

In the time of Christ, the belief of a resurrection, in connection with a state of future retribution, was held by the Pharisees and the great body of the Jewish people, and was only disputed by the Sadducees. Indeed, they seem to have regarded the future life as incomplete without the body; and so intimately were the two things—the future existence of the soul and the resurrection of the body—connected in their minds, that any argument which proved the former, they considered as proving the latter also (see Matt. xxii. 31; 1 Cor. xv. 32). This belief, however, led their coarse minds into gross and sensuous conceptions of the future state, although there were many among the Pharisees who taught that the future body would be so refined as not to need the indulgences which were necessary in the present life; and they assented to our Lord's assertion, that the risen saints would not marry, but would be as the angels of God (Matt. xxii. 30; comp. Luke xx, 39). So Paul, in 1 Cor. vi. 13, is conceived to intimate that the necessity of food for subsistence will be abolished in the world to come.

In further proof of the commonness of a belief in the resurrection among the Jews of the time of Christ, see Matt. xxii., Luke xx., John xi. 24, Acts xxiii. 6-8. Josephus is not to be relied upon in the account which he gives of the belief of his countrymen (*Antiq.* xviii. 2; *De Bell. Jud.*, ii. 7), as he appears to use terms which might suggest one thing to his Jewish readers, and another to the Greeks and Romans, who scouted the idea of a resurrection. Many Jews believed that the wicked would not be raised from the dead; but the contrary was the more prevailing opinion, in which St. Paul once took occasion to express his concurrence with the Pharisees (Acts xxiv. 15).

But although the doctrine of the resurrection was thus prevalent among the Jews in the time of Christ, it might still have been doubtful and obscure to us, had not Christ given to it the sanc-

tion of his authority, and declared it a constituent part of his religion (*e. g.*, Matt. xxii.; John v., viii., xi.). He and his apostles also were careful to correct the erroneous notions which the Jews entertained on this head, and to make the subject more obvious and intelligible than it had ever been before. A special interest is also imparted to the subject from the manner in which the New Testament represents Christ as the person to whom we are indebted for this benefit, which, by every variety of argument and illustration, the apostles connect with him, and make to rest upon him (Acts iv. 2; xxvi. 3; 1 Cor. xv.; 1 Thess. iv. 14, &c.).

The principal points which can be collected from the New Testament on this subject are the following:—1. The raising of the dead is every where ascribed to Christ, and is represented as the last work to be undertaken by him for the salvation of man (John v. 21; xi. 25; 1 Cor. xv. 22, sq.; 1 Thess. iv. 15; Rev. i. 18). All the dead will be raised, without respect to age, rank, or character in this world (John v. 28, 29; Acts xxiv. 15; 1 Cor. xv. 22). 3. This event is to take place not before the end of the world, or the general judgment (John v. 21; vi. 39, 40; xi. 24; 1 Cor. xv. 22-28; 1 Thess. iv. 15; Rev. xx. 11). 4. The manner in which this marvellous change shall be accomplished is necessarily beyond our present comprehension; and, therefore, the Scripture is content to illustrate it by figurative representations, or by proving the possibility and intelligibility of the leading facts. Some of the figurative descriptions occur in John v.; Matt. xxiv.; 1 Cor. 15. 52; 1 Thess. iv. 16; Phil. iii. 21. The image of a trumpet-call, which is repeated in some of these texts, is derived from the Jewish custom of convening assemblies by sound of trumpet. 5. The possibility of a resurrection is powerfully argued by Paul in 1 Cor. xv. 32, sq., by comparing it with events of common occurrence in the natural world. (See also ver. 12-14, and compare Acts iv. 2.)

But although this body shall be so raised as to preserve its identity, it must yet undergo certain purifying changes to fit it for the kingdom of heaven, and to render it capable of immortality (1 Cor. xv. 35, sq.), so that it shall become a glorified body like that of Christ (ver. 49; Rom. vi. 9; Phil. iii. 21); and the bodies of those whom the last day finds alive, will undergo a similar change without tasting death (1 Cor. xv. 51, 53; 2 Cor. v. 4; 1 Thess. iv. 15, sq.; Phil. iii. 21).

The extent of change consistent with personal identity is so great, that its limits have been variously estimated, and can never be in this life clearly defined. We are, therefore, not disposed to enter into the subject here. The plain language of Scripture seems to suggest that it will be so great, that the old body will have little more relation to the new one than the seed has to the plant. But that there is *no* analogy—that the new body will have no connection with, and no relation to the old; and that, in fact, the resurrection of the *body* is not a doctrine of Scripture,—does not appear to us to have been satisfactorily proved by the latest writer on the subject (Bush, *Anastasis*, 1845); and we think so highly of his ingenuity and talent, as to believe that no one else is likely to succeed in an argument in which he has failed (Knapp, *Christian Theology*, translated by Leonard Woods, D.D., § 151-153; Hody, *On the Resurrection;* Drew, *Essay on the Resurrection of the Human Body;* Burnet, *State of the Dead;* Schott, *Dissert. de Resurrect. Corporis, adv. S. Burnetum*, 1763; Teller, *Fides Dogmat. de Resurr. Carnis*, 1766; Mosheim, *De Christ. Resurr. Mort.*, &c. in *Dissertatt.*, ii. 526, sq.; Dassov., *Diatr. qua Judæor. de Resurr. Mort. sentent. ex plur. Rabbinis*, 1675; Neander, *All. K. Geschichte*, i. 3, pp. 1088, 1096; ii. 3, pp. 1404-1410; Zehrt, *Ueber d. Auferstehung d. Todten*, 1835).

REUBEN (רְאוּבֵן, *behold a son;* Sept. Ῥουβήν), eldest son of Jacob by Leah (Gen. xxix. 32; xxxv. 23; xlvi. 8). His improper intercourse with Bilhah, his father's concubine wife, was an enormity too great for Jacob ever to forget, and he spoke of it with abhorrence even on his dying bed (Gen. xxxii. 22; xlix. 4). Yet the part taken by him in the case of Joseph, whom he intended to rescue from the hands of his brothers and restore to his father, and whose supposed death he so sincerely lamented, exhibits his character in an amiable point of view (Gen. xxxvii. 21, 22, 29, 30). We are, however, to remember, that he, as the eldest son, was more responsible for the safety of Joseph than were the others; and it would seem that he eventually acquiesced in the deception practised upon his father. Subsequently, Reuben offered to make the lives of his own sons responsible for that of Benjamin, when it was necessary to prevail on Jacob to let him go down to Egypt (Gen. xlii. 37, 38). The fine conduct of Judah in afterwards undertaking the same responsibility, is in advantageous contrast with this coarse, although well-meant, proposal. For his conduct in the matter of Bilhah, Jacob, in his last blessing, deprived him of the pre-eminence and double portion which belonged to his birthright, assigning the former to Judah, and the latter to Joseph (Gen. xlix. 3, 4; comp. ver. 8-10; xlviii. 5). The doom, 'Thou shalt not excel,' was exactly fulfilled in the destinies of the tribe descended from Reuben, which makes no figure in the Hebrew history, and never produced any eminent person. At the time of the Exodus, this tribe numbered 46,500 adult males, which ranked it as the seventh in population; but at the later census before entering Canaan, its numbers had decreased to 43,730, which rendered it the ninth in population (Num. i. 21; xxvi. 5). The Reubenites received for their inheritance the fine pasture land (the present Belka) on the east of the Jordan, which to a cattle-breeding people, as they were, must have been very desirable (Num. xxxii. 1 sq.; xxxiv. 14; Josh. i. 14; xv. 17). This lay south of the territories of Gad (Deut. iii. 12, 16), and north of the river Arnon. Although thus settled earlier than the other tribes, excepting Gad and half Manasseh, who shared with them the territory beyond the Jordan, the Reubenites willingly assisted their brethren in the wars of Canaan (Num. xxxii. 27, 29; Josh. iv. 12); after which they returned to their own lands (Josh. xxii. 15); and we hear little more of them till the time of Hazael, king of Syria, who ravaged and for a time held possession of their country (2 Kings x. 33). The Reubenites,

and the other tribes beyond the river, were naturally the first to give way before the invaders from the East, and were the first of all the Israelites sent into exile by Tiglath-pileser, king of Assyria, B.C. 773 (1 Chron. v. 26).

REVELATION, BOOK OF. The following topics in relation to this book demand examination :—

I. The person by whom it was written.

II. Its canonical authority, genuineness, and authenticity.

III. The time and place at which it was written.

IV. Its unity.

V. The class of writings to which it belongs.

VI. The object for which it was originally written.

VII. Its contents.

VIII. Some errors into which the interpreters of it have fallen.

I. The author styles himself John, but not an apostle (i. 4, 9; xxii. 8). Hence some have attributed the book to another John, usually designated the presbyter. Formerly, indeed, the existence of such a person was unknown or doubted, the historic grounds adduced in proof of his separate individuality being impugned or otherwise explained. (So Guerike in his *Beiträge zur Historisch-kritischen Einleit.*, 1831, 8vo.) But this writer has recently revoked his doubts, contented with affirming that the historic basis on which the existence of the Ephesian presbyter rests, is assuredly feeble. The chief argument for believing that there was another John besides the apostle, exists in a passage from Papias of Hierapolis, preserved in Eusebius (*Hist. Eccles.* iii. 39). In this fragment, several of the apostles, among whom is John, are mentioned; while, immediately after, the presbyter John is specified along with Aristion. Thus the presbyter is clearly distinguished from the apostle (see Wieseler, in the *Theol. Mitarbeiten*, iii. 4. 113, *sq.*). In addition to Papias, Dionysius of Alexandria (Euseb. *Hist. Eccles.* vii. 25), Eusebius himself (*Hist. Eccles.* iii. 39), and Jerome (*Catal. Scriptor. Ecclesiast.*), allude to the presbyter. We must therefore believe, with Lücke, Bleek, Credner, Neander, Hitzig, and, indeed, all the ablest critics who have had occasion to speak of this point, that there were two Johns: one the apostle, the other the presbyter.

It has been much debated which of the two wrote the book before us. On the continent the prevailing current of opinion, if not in favour of the presbyter, is at least against the apostle. In England the latter is still regarded as the writer, more perhaps by a kind of traditional belief, than as the result of enlightened examination.

The arguments against assigning the authorship to the apostle John are the following.

1. The Apocalyptic writer calls himself John, while the Evangelist never does so. So Dionysius of Alexandria, as related by Eusebius (*Hist. Eccles.* vii. 25). De Wette repeats the observation as deserving at least of attention. In addition to this circumstance, it has been affirmed by Ewald, Credner, and Hitzig, that in chaps. xviii. 20, and xxi. 14, the apostle expressly excludes himself from the number of the apostles.

2. The language of the book is entirely different from that of the fourth Gospel and the three epistles of John the Apostle. It is characterized by strong Hebraisms and ruggednesses, by negligences of expression and grammatical inaccuracies; while it exhibits the absence of pure Greek words, and of the apostle's favourite expressions. So De Wette.

3. The style is unlike that which appears in the Gospel and epistles. In the latter, there is calm, deep feeling; in the Apocalypse, a lively, creative power of fancy. In connection with this it has been asserted, that the mode of representing objects and images is artificial and Jewish. On the contrary, John the son of Zebedee was an *illiterate* man in the Jewish sense of that epithet; a man whose mental habits and education were Greek rather than Jewish, and who, in consequence of this character, makes little or no use of the Old Testament or of Hebrew learning. So De Wette.

4. It is alleged that the doctrinal aspect of the Apocalypse is different from that of the apostle's acknowledged writings. In the latter we find nothing of the sensuous expectations of the Messiah and the establishment of his kingdom on earth, which are so prominent in the former. Besides, the views inculcated or implied respecting spirits, demons, and angels, are foreign to John. A certain spirit of revenge, too, flows and burns throughout the Apocalypse, a spirit inconsistent with the mild and amiable disposition of the beloved disciple.

Such are the arguments advanced by De Wette. They are chiefly based on the investigations of Ewald and Lücke. Credner, who speaks with the same confidence respecting the non-apostolic origin of the book, has repeated, enlarged, and confirmed them. It will be observed, however, that they are all *internal*, and do no more than prepare the way for proving that John the Presbyter was the writer. Let us glance at the *external* evidence adduced for the same purpose.

In the third century, Dionysius of Alexandria ascribed the book to John the Presbyter, not to John the Apostle (Euseb. *Hist. Eccles.* vii. 25). The testimony of this writer has been so often and so much insisted on, that it is necessary to adduce it at length. 'Some who were before us have utterly rejected and confuted this book, criticising every chapter, showing it to be throughout unintelligible and inconsistent; adding, moreover, that the inscription is false, forasmuch as it is not John's; nor is it a revelation which is hidden under so obscure and thick a veil of ignorance; and that not only no apostle, but not so much as any holy or ecclesiastical man was the author of this writing; but that Cerinthus, founder of the heresy called after him Cerinthian, the better to recommend his own forgery, prefixed to it an honourable name. For this (they say) was one of his particular notions, that the kingdom of Christ should be earthly; consisting of those things which he himself, a carnal and sensual man, most admired,—the pleasures of the belly and of concupiscence; that is, eating and drinking and marriage; and for the more decent procurement of these, feastings and sacrifices, and slaughters of victims. But for my part, I dare not reject the book, since many of the brethren have it in high esteem: but allowing it to be above my understanding, I suppose it to contain throughout some latent and wonderful meaning; for though

I do not understand it, I suspect there must be some profound sense in the words; not measuring and judging these things by my own reason, but ascribing more to faith, I esteem them too sublime to be comprehended by me. Nor do I condemn what I have not been able to understand; but I admire the more, because they are above my reach. . . . . And having finished in a manner his prophecy, the prophet pronounceth those blessed that keep it, and also himself. For "blessed is every one," says he, "that keepeth the words of the prophecy of this book; and I John, who saw and heard these things" (Rev. xxii. 7, 8). I do not deny then that his name is John, and that this is John's book, for I acknowledge it to be the work of some holy and divinely inspired person. Nevertheless I cannot easily grant him to be the apostle the son of Zebedee, brother of James, whose is the Gospel inscribed according to John and the Catholic epistle; for I conclude, from the manner of each, and the turn of expression, and from the conduct (or disposition) of the book, as we call it, that he is not the same person. For the Evangelist nowhere puts down his name, nor does he speak of himself either in the Gospel or in the epistle.' Then a little after he says again, 'John nowhere speaks as concerning himself nor as concerning another. But he who wrote the Revelation, immediately at the very beginning prefixeth his name: "the Revelation of Jesus Christ, which God gave unto him to show unto his servants things which must shortly come to pass. And he sent and signified it by his angel unto his servant John, who bare record of the word of God, and his testimony, the things which he saw" (Rev. i. 1, 2). And then he writes an epistle, "John unto the seven churches in Asia. Grace be unto you and peace" (ver. 4). But the Evangelist has not prefixed his name, no, not to his Catholic epistle; but without any circumlocution begins with the mystery itself of the divine revelation, "that which was from the beginning, which we have heard, which we have seen with our eyes" (1 John i. 1). And for the like revelation the Lord pronounced Peter blessed, saying, "Blessed art thou, Simon Bar-jona; for flesh and blood has not revealed it unto thee, but my Father which is in heaven" (Matt. xvi. 17). Nor yet in the second or third epistle ascribed to John, though, indeed, they are but short epistles, is the name of John prefixed; for without any name he is called the elder. But this other person thought it not sufficient to name himself once and then proceed, but he repeats it again, "I, John, who am your brother and companion in tribulation, and in the kingdom and patience of Jesus Christ, was in the isle called Patmos for the testimony of Jesus" (Rev. i. 9). And at the end he says, "Blessed is he that keepeth the sayings of the prophecy of this book; and I, John, who saw and heard these things" (ch. xxii. 7, 8). Therefore, that it was John who wrote these things, ought to be believed because he says so. But who he was is uncertain; for he has not said, as in the Gospel often, that he is "the disciple whom the Lord loved;" nor that he is he "who leaned on his breast;" nor the brother of James; nor that he is one of them who saw and heard the Lord: whereas he would have mentioned some of these things if he had intended plainly to discover himself. Of these things he says not a word: but he calls himself our "brother and companion, and witness of Jesus," and "blessed," because he saw and heard those revelations. And I suppose there were many of the same name with John the apostle, who for the love they bore to him, and because they admired and emulated him, and were ambitious of being beloved of the Lord like him, were desirous of having the same name: even as many also of the children of the faithful are called by the names of Paul and Peter. There is another John in the Acts of the Apostles, surnamed Mark, whom Paul and Barnabas took for their companion: concerning whom it is again said, "and they had John for their minister" (Acts xiii. 5). But that he is the person who wrote this book, I would not affirm. But I think that he is another, one of them that belong to Asia; since it is said that there are two tombs at Ephesus, each of them called John's tomb. And from the sentiments and words, and disposition of them, it is likely that he is different (from him that wrote the Gospel and Epistle). For the Gospel and Epistle have a mutual agreement, and begin alike. The one says, "In the beginning was the word;" the other, "That which was from the beginning." The former says, "And the word was made flesh, and dwelt among us, and we beheld his glory, the glory as of the only-begotten of the Father." The latter has the same with a slight variation: "That which we have heard, which we have seen with our eyes, which we have looked upon, and our hands have handled, of the word of life. For the life was manifested." He is uniform throughout, and wanders not in the least from the points he proposed to himself, but prosecutes them in the same chapters and words, some of which we shall briefly observe: for whoever reads with attention will often find in both "life;" frequently "light," the "avoiding of darkness;" oftentimes "truth, grace, joy, the flesh and the blood of the Lord; judgment, forgiveness of sins, the love of God toward us, the commandment of love one toward another; the judgment of this world, of the devil, of anti-christ; the promise of the Holy Spirit, the adoption of the sons of God, the faith constantly required of us, the Father and the Son," everywhere. And, in short, throughout the Gospel and Epistle it is easy to observe one and the same character. But the Revelation is quite different and foreign from these, without any affinity or resemblance, not having so much as a syllable in common with them. Nor does the Epistle (for I do not here insist on the Gospel) mention or give any hint of the Revelation, nor the Revelation of the Epistle. And yet Paul, in his Epistles, has made some mention of his Revelations, though he never wrote them in a separate book. Besides, it is easy to observe the difference of the style of the Gospel and the Epistle from that of the Revelation; for they are not only written correctly, according to the propriety of the Greek tongue, but with great elegance of phrase and argument, and the whole contexture of the discourse. So far are they from all barbarism or solecism, or idiotism of language, that nothing of the kind is to be found in them; for he, as it seems, had each of those gifts, the Lord having bestowed upon him both these, knowledge and eloquence. As to the other, I will not deny that he saw the Revelation, or that he had received the gift of knowledge and prophecy. But I do

not perceive in him an accurate acquaintance with the Greek language: on the contrary, he uses barbarous idioms, and some solecisms, which it is necessary that I should now show particularly, for I do not write by way of ridicule; let none think so. I simply intend to represent in a critical manner the difference of these pieces.'

Here are critical arguments which the moderns have not failed to adduce and enlarge. Eusebius expresses himself in an undecided way respecting the Apocalypse (*Hist. Eccles.* iii. 24, 25), for which it is difficult to account, on the supposition that prevalent tradition attributed it to the Apostle John.

Thus all the external evidence *directly* in favour of John the Presbyter resolves itself into the authority of Dionysius, who rested his proofs not on the testimony of his predecessors, but on internal argument. Eusebius speaks so hesitatingly, that nothing can be determined with respect to his real opinion.

On the whole, there is no *direct* evidence in favour of the opinion that John the Presbyter wrote the Apocalypse. Many internal considerations have been adduced to show that *John the Apostle was not* the author; but no *direct* argument has been advanced to prove that John the Presbyter was the writer. Indeed, our existing accounts of the presbyter are so brief, as to afford no data for associating the writing of this book with his name. All that we know from antiquity is, that both Johns were contemporary, that they are called disciples of the Lord, that they resided in Asia Minor, and that their tombs were shown at Ephesus. It is vain to appeal to the second and third epistles of John for comparing the Apocalypse with them, with Credner and Jachmann (Pelt's *Mitarbeiten*, 1839), who think that they proceeded from the presbyter; since, to say the least, the hypothesis that these epistles were written by John the Presbyter has not yet been established. Still, however, notwithstanding this deficiency of evidence, Bleek, Credner, and Jachmann, following Dionysius, attribute the book to John the Presbyter.

Others think that a disciple of John undertook to write on a subject which he had received from the apostle; and that he thought himself justified in introducing his instructor as the speaker, because he wrote in his manner. So Ewald, Lücke, Schott, and Neander.

Hitzig has lately written a treatise to prove that the writer is John Mark, the same from whom the second Gospel proceeded. His arguments are mainly based on parallelisms of language and construction (*Ueber Johannes Marcus und seine Schriften, oder welcher Johannes hat die Offenbarung verfasst?* Zurich, 8vo. 1843).

In stating the evidence in favour of the apostle as the writer, we begin with the external.

Justin Martyr is the earliest writer who attributes it to John the Apostle (*Dial. cum Tryph.*). Rettig, indeed, has endeavoured to impugn the genuineness of the passage containing this testimony, but he has been well answered by Lücke, and by Guerike (Tholuck's *Literarischer Anzeiger*, 1830). Tertullian, Clement of Alexandria, and Origen, ascribe it to the apostle; and, as De Wette candidly remarks, the testimony of the last two is the more important, as they were not millennarians. When Irenæus says that it was written by John *the disciple* of the Lord, it is uncertain whether he meant the apostle or the presbyter, although the former is far more probable.

Let us now consider the internal evidence in favour of John the Apostle, beginning with an examination of the arguments adduced on the other side by De Wette. These do not possess all the weight that many assign to them. We shall follow the order in which they have been already stated.

1. We attach no importance to this circumstance. Why should not a writer be at liberty to name himself or not as he pleases; above all, why should not a writer, under the immediate inspiration of the Almighty, omit the particulars which he was not prompted to record? How could he refrain from doing so? The Holy Spirit must have had some good reason for leading the writer to set forth his name, although curiosity is not gratified by assigning the reason. The Old Testament prophets usually prefixed their names to the visions and predictions which they were prompted to record; and John does the same. But instead of styling himself an apostle, which carries with it an idea of dignity and official authority, he modestly takes to himself the appellation of a *servant of Christ, the brother and companion of the faithful in tribulation.* This corresponds with the relation which he sustained to Christ in the receiving of such visions, as also with the condition of the Redeemer himself. In the Gospel, John is mentioned as *the disciple whom Jesus loved*, for then he stood in an intimate relation to Christ, as the *Son of man* appearing in the form of a servant; but in the book before us, Christ is announced as the glorified Redeemer who should quickly come to judgment, and John is *his servant*, entrusted with the secrets of his house. Well did it become the apostle to forget all the honour of his apostolic office, and to be abased before the Lord of glory. The resplendent vision of the Saviour had such an effect upon the seer, that he fell at his feet as dead; and therefore it was quite natural for him to be clothed with profound humility, to designate himself the servant of Jesus Christ, the brother and companion of the faithful in tribulation. Again, in ch. xviii. 20, the prophets are said to be represented as already in heaven in their glorified condition, and therefore the writer could not have belonged to their number. But this passage neither affirms nor necessarily implies that the saints and apostles and prophets were at that time in heaven. Neither is it stated that *all* the apostles had then been glorified. Chapter xxi. 14 is alleged to be inconsistent with the modesty and humility of John. This is a questionable assumption. The official honour inseparable from the person of an apostle was surely compatible with profound humility. It was so with Paul; and we may safely draw the same conclusion in regard to John. In describing the heavenly Jerusalem it was necessary to introduce the twelve apostles. The writer could not exclude himself (see Lücke, p. 389; and Guerike's *Beiträge*, p. 37, sq.).

2. To enter fully into this argument would require a lengthened treatise. Let us briefly notice the particular words, phrases, and expressions, to which Ewald, Lücke, De Wette, and Credner specially allude. Much has been written by

Ewald concerning the Hebraistic character of the language. The writer, it is alleged, strongly imbued with Hebrew modes of thought, frequently inserts Hebrew words, as in iii. 14; ix. 11; xii. 9, 10; xix. 1, 3, 4, 6; xx. 2; xxii. 20; while the influence of *cabbalistic artificiality* is obvious throughout the entire book, and particularly in i. 4, 5; iv. 2; xiii. 18; xvi. 14. The mode of employing the tenses is foreign to the Greek language, and moulded after the Hebrew (i. 7; ii. 5, 16, 22, 23, 27; iii. 9; iv. 9-11; xii. 2-4; xvi. 15, 21; xvii. 13, 14; xviii. 11, 15; xxii. 7, 12). So also the use of the participle (i. 16; iv. 1, 5, 8; v. 6, 13; vi. 2, 5; vii. 9, 10; ix. 11; x. 2; xiv. 1, 14; xix. 12, 13; xxi. 14); and of the infinitive (xii. 7). The awkward disposition of words is also said to be Hebraistic; such as a genitive appended like the construct state; the stringing together of several genitives (xiv. 8, 10, 19; xvi. 19; xviii. 3, 14; xix. 15; xxi. 6; xxii. 18, 19); and the use of the Greek cases, which are frequently changed for prepositions (ii. 10; iii. 9; vi. 1, 8; viii. 7; ix. 19; xi. 6, 9; xii. 5; xiv. 2, 7); incorrectness in appositions (i. 5; ii. 20; iii. 12; iv. 2-4; vi. 1; vii. 9; viii. 9; ix. 14; xiii. 1-3; xiv. 2, 12, 14, 20, &c.); a construction formed of an *αὐτός* put after the relative pronoun (iii. 8; vii. 2, 9; xiii. 12; xx. 8); frequent anomalies in regard to number and gender (ii. 27; iii. 4, 5; iv. 8; vi. 9, 10; ix. 13, 14; xi. 15; xiv. 1, 3; xvii. 16; xix. 14; and viii. 11; xi. 18; xv. 4; xvii. 12, 15; xviii. 14; xix. 21; xx. 12; xxi. 4, 24; also xvi. 10; xix. 1, 8, 9. In addition to this it is alleged by Credner, that the use made of the Old Testament betrays an acquaintance on the part of the writer with the Hebrew text (comp. vi. 13, 14 with Isa. xxxiv. 4; xviii. 2 with Isa. xiii. 21, xxi. 9, xxxiv. 14, Jer. l. 39; xviii. 4, 5 with Jer. li. 6, 9, 45; xviii. 7 with Isa. xlvii. 7, 8; xviii. 21-23 with Jer. xxv. 10, li. 63, 64). In contrast with all this, we are reminded of the fact that, according to Acts iv. 13, John was an unlearned and ignorant man.

The book is deficient in words and turns of expression purely Greek, such as *πάντοτε*, *πώποτε*, *οὐδέποτε*; compound verbs, as *ἀναγγέλλειν*, *παραλαμβάνειν*, *ἐπιβάλλειν*; the double negation; the genitive absolute; the attraction of the relative pronoun; the regular construction of the neuter plural with the verb singular (except viii. 3; ix. 20; xiv. 13; xviii. 24; xix. 14; xxi. 12); *ἀκούειν* with the genitive. Favourite expressions, such as occur in the Gospel and epistles, are seldom found, as *θεάομαι*, *θεωρέω*, *ἐργάζομαι*, *ῥήματα*, *πάλιν*, *φωνεῖν*, *μένειν*, *καθώς*, *ὡς* (an adverb of time), *οὖν*, *μέν*, *μέντοι*, *κόσμος*, *φῶς*, *σκοτία*, *δοξάζεσθαι*, *ὑψοῦσθαι*, *ζωὴ αἰώνιος*, *ἀπόλλυσθαι*, *οὗτος* (*τοῦτο*) *ἵνα*; the historic present. There are also favourite expressions of the writer of this book, such as do not occur in John's authentic writings: *οἰκουμένη*, *ὑπομονή*, *κρατεῖν τὸ ὄνομα*, *τὴν διδαχήν*, *παντοκράτωρ*, *θεὸς καὶ πατήρ*, *δύναμις*, *κράτος*, *ἰσχύς*, *τιμή*, *πρωτότοκος τῶν νεκρῶν*, *ἡ ἀρχὴ τῆς κτίσεως τοῦ θεοῦ*, *ὁ ἄρχων τῶν βασιλέων τῆς γῆς*, *ὧδε* in the beginning of a sentence. The conjunction *εἰ*, so common in the Gospel, does not occur in the Apocalypse; but only *εἰ μή*, *εἰ δὲ μή*, and *εἴ τις*. The frequent joining of a substantive with *μέγας*, as *φωνὴ μεγάλη*, *θλῖψις μεγάλη*, *φόβος μέγας*, *σεισμὸς μέγας*, rather reminds one of Luke than John; *μείζων*, so frequent in the Gospel, is not found in the Revelation; and, on the contrary, *ἰσχυρός*, which occurs seven times in the Apocalypse, is foreign to the Gospel.

The following discrepancies between the language of the Gospel and that of the epistles have been noticed: *ἀληθινός* is used of God both in the Gospel and Apocalypse, but in different senses; so also *κύριος*, and *ἐργάζομαι*; instead of *ἴδε* the Apocalypse has only *ἰδού*; instead of *Ἱεροσόλυμα* only *Ἱερουσαλήμ*; instead of *ἐάν τις*, as in the Gospel, *εἴ τις*; *περί*, so often used by John, occurs only once in the Apocalypse, and that too in relation to place; *ὄχλος* is used in the plural. Words denoting *seeing* are differently used in the Gospel and Apocalypse; thus, for the present we find in the latter *βλέπειν*, *θεωρεῖν*, *ὁρᾶν*; for the aorist of the active *εἶδον*, *βλέπειν*, and *θεωρεῖν*; for the future *ὄπτεσθαι*, and for the aorist of the passive also *ὄπτεσθαι*; *μένειν* has a different meaning from that which it bears in the Gospel; instead of *ὁ ἄρχων τοῦ κόσμου*, and *ὁ πονηρός*, we find *ὁ σατανᾶς*, *ὁ διάβολος*, *ὁ δράκων ὁ μέγας*.

Such is a summary statement of an argument drawn out at great length by Lücke, De Wette, Ewald, and Credner.

Some have attempted to turn aside its force by resorting to the hypothesis that the book was originally written in Hebrew, and then translated into Greek. This, however, is contradicted by the most decisive internal evidence, and is in itself highly improbable. The Apocalyse was written in the Greek language, as all antiquity attests. How then are we to account for its Hebraistic idioms and solecisms of language, its negligences of diction, and ungrammatical constructions? One circumstance to be taken into account is, that the nature of the Gospel is widely different from that of the Apocalypse. The latter is a prophetic book—a poetical composition—while the former is a simple record in prose, of the discourses of Jesus in the days of his flesh. It is apparent, too, that John in the Apocalypse imitates the manner of Ezekiel and Daniel. The New Testament prophet conforms to the diction and symbolic features of the former seers. 'If the question should be urged, why John chose these models? the obvious answer is, that he conformed to the taste of the times in which he lived. The numerous apocryphal works of an Apocalyptic nature, which were composed nearly at the same time with the Apocalypse, such as the book of Enoch, the ascension of Isaiah, the Testament of the twelve patriarchs, many of the sibylline oracles, the fourth book of Ezra, the Pastor of Hermas, and many others which are lost—all testify to the taste and feelings of the times when, or near which, the Apocalyse was written. If this method of writing was more grateful to the time in which John lived, it is a good reason for his preferring it.'* In consequence of such imitation, the diction has an Oriental character; and the figures are in the highest style of imagery peculiar to the East. But it is said that John was an illiterate man. Illiterate, doubtless, he was as compared with Paul, who was brought up at the feet of Gamaliel; yet he may have been capable of reading the Old Testament books; and he was certainly inspired. Rapt in ecstasy, he saw wondrous

* Stuart, in the *Bibliotheca Sacra*, pp. 353, 354.

visions. He was *in the Spirit*. And when writing the things he beheld, his language was to be conformed to the nature of such marvellous revelations. It was to be adapted to the mysterious disclosures, the vivid pictures, the moving scenes, the celestial beings and scenery of which he was privileged to tell. Hence it was to be lifted up far above the level of simple prose or biographic history, so as to correspond with the sublime visions of the seer. Nor should it be forgotten that he was not in the circumstances of an ordinary writer. He was *inspired*. How often is this fact lost sight of by the German critics! It is therefore needless to inquire into his education in the Hebrew language, or his mental culture while residing in Asia Minor, or the smoothness of the Greek language as current in the place where he lived, before and after he wrote the Apocalypse. The Holy Spirit qualified him beyond and irrespective of ordinary means, for the work of writing. However elevated the theme he undertook, he was assisted in employing diction as elevated as the nature of the subject demanded. We place, therefore, little reliance upon the argument derived from *the time of life* at which the Apocalypse was composed, though Olshausen and Guerike insist upon it. Written, as they think, twenty years before the Gospel or epistles, the Apocalypse exhibits marks of inexperience in writing, of youthful fire, and of an ardent temperament. It exhibits the first essays of one expressing his ideas in a language to which he was unaccustomed. This may be true; but we lay far less stress upon it than these authors seem inclined to do. The strong Hebraized diction of the book we account for on the ground that the writer was a Jew; and, as such, expressed his Jewish conceptions in Greek; that he imitated the later Old Testament prophets, especially the manner of Daniel; and that the only prophetic writing in the New Testament naturally approaches nearer the Old Testament, if not in subject, at least in colouring and linguistic features.

These considerations may serve to throw light upon the language of the book, after all the extravagances of assertion in regard to anomalies, solecisms, and ruggednesses, have been fairly estimated. For it cannot be denied that many rash and unwarrantable assumptions have been made by De Wette and others relative to the impure Greek said to be contained in the Apocalypse. Winer has done much to check such bold assertions, but with little success in the case of those who are resolved to abide by a strong and prevalent current of opinion. We venture to affirm, without fear of contradiction, that there are books of the New Testament almost as Hebraizing as the Apocalypse; and that the anomalies charged to the account of the Hebrew language may be paralleled in other parts of the New Testament or in classical Greek. What shall be said, for instance, to the attempt of Hitzig to demonstrate from the language of Mark's Gospel, as compared with that of the Apocalypse, that both proceeded from one author, viz., John Mark? This author has conducted a lengthened investigation with the view of showing that all the peculiarities of language found in the Apocalypse are equally presented in the second Gospel, particularly that the Hebraisms of the one correspond with those of the other. Surely this must lead to new investigations of the Apocalyptic diction, and possibly to a renunciation of those extravagant assertions so often made in regard to the harsh, rugged, Hebraized Greek of the Apocalypse. Who ever dreamed before of the numerous solecisms of Mark's language? and yet Hitzig has demonstrated its similarity to the Apocalyptic as plausibly as Ewald, Lücke, and others have proved the total dissimilarity between the diction of the Apocalypse and that of John's Gospel.

The length allotted to this article will not allow the writer to notice every term and phrase supposed to be peculiar. This can only be done with success by him who takes a concordance to the Greek Testament in his hand, with the determination to test each example; along with a good syntax of classical Greek, such as Bernhardy's. In this way he may see whether the alleged Hebraisms and anomalies have not their parallels in classical Greek. Some of the allegations already quoted are manifestly incorrect, *e. g.* that ἀκούω with the genitive is not found in the Apocalypse. On the contrary, it occurs eight times with the genitive. Other words are adduced on the principle of their not occurring so frequently in the book before us as in the Gospel and epistles. But by this mode of reasoning it might be shown, that the other acknowledged writings of the Apostle John, for instance his first epistle, are not authentic. Thus ῥήματα, one of the words quoted, though frequently found in the Gospel, is not in any of the three epistles; therefore, these epistles were not written by John. It is found *once* in the Apocalypse. Again, ἐργάζομαι, which is found seven times in the Gospel, and once in the Apocalypse, as also once in each of the second and third epistles, is not in the first epistle; therefore the first epistle proceeded from another writer than the author of the second and third. The same reasoning may be applied to θεωρέω. Again, it is alleged that the regular construction of neuters plural with singular verbs is not found, with the exception of six instances. To say nothing of the large list of exceptions, let it be considered, that the plural verb is joined with plural nouns where animate beings, especially persons, are designated. Apply now this principle, which regularly holds good in classical Greek, to the Apocalypse, and nothing peculiar will appear in the latter. Should there still remain examples of neuters plural designating things without life, we shall find similar ones in the Greek writers. Another mode in which the reasoning founded upon the use of peculiar terms and expressions may be tested, is the following. It is admitted that there are words which occur in the Gospel and epistles, but not in the Apocalypse. The adverb πάντοτε is an example. On the same principle and by virtue of the same reasoning, it may be denied, *as far as language is concerned*, that 1 Timothy was written by Paul, because πάντοτε, which is found in his other epistles, does not occur in it. In this manner we might individually take up each word and every syntactical peculiarity on which the charge of harshness, or solecism, or Hebraizing has been fastened. It is sufficient to state, that there are very few *real* solecisms in the Apocalypse. *Almost all* that have been adduced may be paralleled in Greek writers, or in those of the New

Testament. The words of Winer, a master in this department, are worthy of attention: 'The solecisms that appear in the Apocalypse give the diction the impress of great harshness, but they are *capable of explanation*, partly from anacoluthon and the mingling of two constructions, partly in another manner. Such explanation should have been always adopted, instead of ascribing these irregularities to the ignorance of the author, who, in other constructions of a much more difficult nature in this very book, shows that he was exceedingly well acquainted with the rules of grammar. For most of these anomalies too, analogous examples in the Greek writers may be found, with this difference alone, that they do not follow one another so frequently as in the Apocalypse' (*Grammatik*, fünfte Auflage, pp. 273, 4). Should the reader not be satisfied with this brief statement of Winer, he is referred to his *Exeget. Studien*, i. 154, sq., where the Professor enters into details with great ability.

The following linguistic similarities between John's Gospel and the Apocalypse deserve to be cited: μετὰ ταῦτα, Apoc. i. 19; iv. 1; vii. 1, 9; ix. 12; xv. 5; xviii. 1; xix. 1; xx. 3; Gosp. iii. 22; v. 1, 14; vi. 1; vii. 1; xix. 38; xxi. 1; μαρτυρία, Apoc. i. 2, 9; vi. 9; xi. 7; xii. 11, 17; xix. 10; xx. 4. Gosp. μαρτυρέω or μαρτυρία, i. 7, 8, 15, 19, 32, 34; ii. 25; iii. 11, 26, 28, 32, 33; iv. 3, 9, 44; v. 31, 32, 33, 34, 36, 37, 39; 1 Epist. i. 2; iv. 14; v. 6-11. ἵνα, Apoc. ii. 10, 21; iii. 9, 11, 18; vi. 2, 4, 11; vii. 1, &c. &c. Gosp. vi. 5, 7, 12, 15, 28, 29, 30, 38, 39, 40, 50; xi. 4, 11, 15, 16, 19, 31, 37, 42, 50, 52, 53, 55, 57; xii. 9, 10, 20, 23, 35, &c. 1 Epist. of John, i. 3, 4, 9; ii. 1, 19, 27, 28. ὄψις, Gosp. vii. 24; xi. 44. Apoc. i. 16. πιάζειν, Apoc. xix. 20. Gosp. vii. 30, 32, 44; viii. 20; x. 39; xi. 57; xxi. 3, 10. τηρεῖν τὸν λόγον, τὰς ἐντολάς, or some similar expression, Apoc. iii. 8, 10; xii. 17; xiv. 12; xxii. 7, 9. Gosp. viii. 51, 55; xiv. 15; xxiii. 24, &c. ὁ νικῶν, Apoc. ii. 7, 11, 17, 26; iii. 5, 12, 21; xv. 2; xxi. 7. This verb is quite common in the first epistle, ii. 13, 14; iv. 4; v. 4, 5. Gosp. xvi. 33. ὕδωρ ζωῆς. Apoc. xxi. 6; xxii. 17; comp. Gosp. vii. 38. Compare also the joining together of the present and the future in Apoc. ii. 5 and Gosp. xiv. 3. The assertion of the same thing positively and negatively, Apoc. ii. 2, 6, 8, 13; iii. 8, 17, 21; Gosp. i. 3, 6, 7, 20, 48; iii. 15, 17, 20; iv. 42; v. 19, 24; viii. 35, 45; x. 28; xv. 5, 6, 7. 1 Epist. ii. 27, &c. In several places in the Apocalypse Christ is called the Lamb; so also in the Gospel, i. 29, 36. Christ is called ὁ λόγος τοῦ Θεοῦ, Apoc. xix. 3, and in the Gospel of John only has he the same epithet. τηρεῖν ἐκ τινός, Apoc. iii. 10. Gosp. xvii. 15. σφάττειν, Apoc. v. 6, 9, 12; vi. 4, 9; xiii. 3, 8; xviii. 24; only in the 1st Epist. of John, iii. 12. ἔχειν μέρος, Apoc. xx. 6. Gosp. xiii. 8. περιπατεῖν μετά τινος, Apoc. iii. 4. Gosp. vi 66. σκηνόω, Apoc. vii. 15; xii. 12; xiii. 6; xxi. 3. Gosp. i. 14. The expulsion of Satan from heaven is expressed thus in the Apoc. xii. 9: ἐβλήθη εἰς τὴν γῆν; in the Gosp. it is said, νῦν ὁ ἄρχων τοῦ κόσμου τούτου ἐκβληθήσεται ἔξω, xii. 31. (See Scholz, *Die Apokalypse des heilig. Johannes übersetzt, erklärt*, u. s. w. Frankfort am Main, 1828, 8vo.; Schulz, *Ueber den Schriftsteller, Character und Werth des Johannes*, Leipzig, 1803, 8vo.; Donker Curtius, *Specimen hermeneutico-theologicum de Apocalypsi ab indole, doctrina, et scribendi genere Johannis Apostoli non abhorrente*, Trajecti Batav. 1799, 8vo.; Kolthoff, *Apocalypsis Joanni Apostolo vindicata*, Hafniæ, 1834, 8vo.; Stein (in Winer and Engelhardt's *Kritisch. Journal*, v. i.), and the *Jena Literatur-Zeitung* for April, 1833, No. 61). It is true, that some of these expressions are said by Lücke, De Wette, and Credner, to be used in a different sense in the Apocalypse; others not to be *characteristic*, but rather accidental and casual; others not *original*, but borrowed. Such assertions, however, proceed more from *à priori* assumption than from any inherent truth they possess. In regard to the charge of *cabbalism*, especially in the use of numbers, it is easily disposed of. The cabbala of the Jews was widely different from the instances in the Apocalypse that have been quoted. Perhaps John's use of the number 666 comes the nearest to one kind of the cabbala; but still it is so unlike as to warrant the conclusion that the apostle did not employ the cabbalistic art. His mysterious indications of certain facts, and the reasons of their being in some measure involved in darkness, are explicable on other than Jewish grounds. There is no real cause for believing that the apostle had recourse to the artificial and trifling conceits of the Rabbins. In short, this argument is by no means conclusive. As far as the language is concerned nothing militates against the opinion that the Apocalypse proceeded from John, who wrote the Gospel. The contrary evidence is not of such a nature as to demand assent. When rigidly scrutinized, it does not sustain the conclusion so confidently built upon it.

But it is also affirmed, that the doctrinal views and sentiments inculcated in the Apocalypse are quite different from those found in the Gospel. This may be freely allowed without any detriment to their identity of authorship. How slow the Germans are in learning that a difference in the exhibition of truths substantially the same, is far from being a contradiction! A difference of subject in connection with a different plan, demands correspondent dissimilarity of treatment. Besides, there must be a gradual development of the things pertaining to the kingdom of God on earth. Sensuous expectations of the Messiah, such as are alleged to abound in the Apocalypse, may be perfectly consistent with the spirituality of his reign, though it appears to us that the representations so designated are figurative, shadowing forth spiritual realities by means of outward objects.

But what is to be said of the pneumatological, demonological, and angelogical doctrines of the book? The object for which John's Gospel was primarily written did not lead the apostle to introduce so many particulars regarding angels and evil spirits. The intervention of good and the malignant influence of evil spirits are clearly implied in the Old Testament prophets, particularly in Zechariah and Daniel. It is therefore quite accordant with the prophetic, Hebraistic character of the Apocalypse, to make angelic agency a prominent feature in the book. And that such agency is recognised in the Gospels, is apparent to the most cursory reader. The special object with which the fourth Gospel was written

was different from that which prompted the composition of the Apocalypse, and therefore the subject-matter of both is exceedingly diverse. But still there is no opposition in doctrine. The same doctrinal views lie at the foundation of all the representations contained in them. In the one, the Redeemer is depicted in his humble career on earth; in the other, in his triumphs as a king—or rather, in the victorious progress of his truth in the world, notwithstanding all the efforts of Satan and wicked men to suppress it. As to a spirit of revenge in the Apocalyptic writer, it is not found. The inspired prophet was commissioned to pronounce woes and judgments as soon to befal the enemies of Christ, in consequence of their persevering, malignant efforts. As well might an evil disposition be attributed to the blessed Saviour himself, in consequence of his denunciation of the Scribes and Pharisees. The same John who wrote the Apocalypse says, in the second epistle, ver. 10, 'if there come any unto you and bring not this doctrine, receive him not into your house, neither bid him God speed.' It must ever strike the simple reader of the Apocalypse as a positive ground for attributing the authorship to John the Apostle, that he styles himself THE *servant* of God by way of eminence, which none other at that time would have ventured to do; and that he employs the expression, *I John*, after the manner of Daniel, as if he were the only prophet and person of the name. Nor can it be well believed that a disciple of the apostle, or any other individual, should have presumed to introduce John as the speaker, thus deceiving the readers. The apostle was well known to the Christians of his time, and especially to the Asiatic churches. He did not therefore think it necessary to say John the Apostle for the sake of distinguishing himself from any other. (See Züllig's *Die Offenbarung Johannis*, Stuttgart, 1834, 8vo. p. 136.)

To enter further into the allegations of such critics as deny, on the ground of internal diversities between this writing and John's acknowledged productions, that the apostle was the author, would be a work of supererogation. Even Eichhorn and Bertholdt made many good remarks in reply, although they did not take the position which they were warranted to assume.

In view of the whole question, we are disposed to abide by the ancient opinion, that John the Apostle wrote the Apocalypse. Ecclesiastical tradition clearly favours this view; while the internal grounds so carefully drawn out and earnestly urged by recent German critics, do not appear sufficiently strong to overturn it. When such grounds are soberly examined, after being divested of all the extravagance with which they are associated; when the nature of the subjects discussed is seen to be such as the fourth Gospel does not present; an impartial critic will probably rest in the opinion that both writings proceeded from the same author. And yet there are phenomena in the Apocalypse, as compared with John's gospel, which strike the reader's attention and induce suspicions of a different origin. It exhibits peculiarities of language and of symbols, such as no other book exemplifies. In some respects it is unique. Hence an air of plausibility attaches to the arguments of recent German writers; although it is preposterous to look for a stereotyped uniformity in the writings of the same author. How different are the language and representations that characterize some of Paul's epistles, as compared with others! Place, for example, the epistle to the Ephesians by the side of that addressed to the Romans, and how dissimilar are their features!

But the entire question of authorship so much debated in Germany, is more curious than profitable. The book may not have been written by an apostle, and yet be equal in authority to any acknowledged production of an apostle. Luke was only an Evangelist; and yet his writings are infallibly true and correct in every particular, because they proceeded from the Holy Spirit. The question whether the Apocalypse was written by an apostle or not, is of trifling importance as long as its inspiration is maintained. It will not diminish the credit due to the work, though it be assigned to the Presbyter John, or to a disciple of the apostle, or to John Mark. If any imagine that, in attempting to destroy the *directly apostolic* authorship, they lessen the value or disturb the canonical credit of the book, they are mistaken. We are glad to perceive that this view, obvious as it is to the English mind, has not escaped the perception of *all* Germans, though it seems not to have been apprehended by many. Tinius says: 'There has been a needless strife of argument. Do we not plainly see from the Gospels of Mark and Luke, and from the apostolic history of the latter, that a biblical book may be esteemed canonical without having been written by one of the twelve apostles? The name of no writer is associated with the epistle to the Hebrews, and yet it is justly held to be a Christian production. Even Paul was only an extraordinary apostle. In all, says he, works one and the same spirit; and he that is not against us, said Jesus, is for us. Now the Apocalypse is not against, but for Him, and for Christianity, to preserve it. This indeed is its chief object; consequently, it is a Christian book, and has proceeded from the Spirit of God. Whoever was the John of our book, he was certainly a man of God, with a serious and honest intention in regard to the cause of Jesus.' (*Die Offenbarung Johannis*, Leipzig, 1839, 8vo., Einleit. p. 37.)

The external evidence certainly preponderates in favour of the apostle, since it may be fairly presumed that the fathers who speak of it as *the writing of John*, and as a *divine writing*, generally meant John the Apostle. But we attach little weight to the testimonies of the fathers, discordant as these writers frequently are on topics that came before them. In many cases they adopted vague traditions, without inquiring whether such reports rested on any good foundation. They were for the most part incapable or undesirous of critical investigations—investigations demanding acuteness and discrimination. Hence they commonly followed their immediate predecessors, contented in ecclesiastical matters to glide down the stream of popular belief, without diligently inquiring whether such belief were correct and scriptural. A few noble exceptions there are; but how few, in comparison of the undiscerning number who appear to have possessed feeble abilities, while they exercised small discernment in theological matters!

II. *Its canonical authority, authenticity, and*

genuineness.—(*a.*) External testimonies adverse to its canonicity. (*b.*) Such as are favourable.

(*a*). The Alogi or Antimontanists in the second century, ascribed all John's writings, including the Apocalypse, to Cerinthus, as Epiphanius relates. It is obvious that no weight can be attached to these assertions. Caius of Rome, from opposition to Montanism, ventured to make the same statement, as we learn from Eusebius (*Hist. Eccles.* iii. 28): Ἀλλὰ καὶ Κήρινθος ὁ δ' ἀποκαλύψεων ὡς ὑπὸ ἀποστόλου μεγάλου γεγραμμένων, τετραλογίας ἡμῖν ὡς ὁ ἀγγέλων αὐτῷ δεδειγμένας ψευδόμενος, ἐπεισάγει λέγων, κ. τ. λ. This passage has given rise to much discussion, some affirming that the revelations spoken of do not mean the present Apocalypse of John, but *invented revelations* bearing some resemblance to it. We agree with Lücke and De Wette in their view of the meaning, in opposition to Twells, Paulus, Hartwig, and Hug. They refer it rightly to our present book. The 85th of the 'Apostolic Canons,' which are supposed to belong to the fourth century, does not mention the Apocalypse among the apostolic writings. In the 'Constitutions' also, which probably originated in Syria and the adjacent regions, there is no notice of the book. It has been inferred, from the circumstance of the Apocalypse being wanting in the Peshito, that it did not belong to the canon of the Syrian church. It has also been thought that the theologians of the Antiochenian school, among whom are Chrysostom, Theodoret, and Theodore of Mopsuestia, omitted it out of the catalogue of canonical writings. But in regard to the first, if we rely on the testimony of Suidas, he received the Apocalypse as divine; and as to Theodoret, there is no reason for assuming that he rejected it (Lücke, p. 348). Probably Theodore of Mopsuestia did not acknowledge it as divine. It appears also to have been rejected by the theological school at Nisibis, which may be regarded as a continuation of the Antiochenian. Junilius does not mention it in his list of prophetic writings. Cyril of Jerusalem has omitted it in his *Catecheses;* as also Gregory of Nazianzen, and the 60th canon of the Laodicean Synod. Amphilochius of Iconium says that some regarded it as a divine production, but that others rejected it. Eusebius' testimony respecting the Asiatics is, that some rejected the Apocalypse, while others placed it among the *acknowledged* (ὁμολογούμενα) books. Euthalius, when dividing parts of the New Testament stichometrically, says nothing whatever of the book; and Cosmas Indicopleustes excludes it from the list of the canonical. In like manner Nicephorus, patriarch of Constantinople in the ninth century, appears to have placed it among the Antilegomena. The witnesses already quoted to remove the authorship from John the Apostle do not belong here, although many seem to have entertained the opinion of their present appropriateness.

At the time of the Reformation, the controversy respecting the Apocalypse was revived. Erasmus speaks suspiciously concerning it, while Luther expresses himself very vehemently against it. 'There are various and abundant reasons,' says he, 'why I regard this book as neither apostolical nor prophetic. First, the apostles do not make use of visions, but prophesy in clear and plain language (as do Peter, Paul, and Christ also, in the Gospel); for it is becoming the apostolic office to speak plainly, and without figure or vision, respecting Christ and his acts. Moreover, it seems to me far too arrogant for him to enjoin it upon his readers to regard this his own work as of more importance than any other sacred book, and to threaten that if any one shall take aught away from it, God will take away from him his part in the book of life (Rev. xxii. 19). Besides, even were it a blessed thing to believe what is contained in it, no man knows what that is. The book is believed in (and is really just the same to us) as though we had it not; and many more valuable books exist for us to believe in. But let every man think of it as his spirit prompts him. My spirit cannot adapt itself to the production, and this is reason enough for me why I should not esteem it very highly.' This reasoning is manifestly so inconsequential, and the style of criticism so bold, as to render animadversion unnecessary. The names of Haffenreffer, Heerbrand, and John Schröder, are obscure, but they are all ranged against the book. With Semler a new opposition to it began. That distinguished critic was unfavourable to its authenticity. He was followed by Oeder, Merkel, Michaelis, Heinrichs, Bretschneider, Ewald, De Wette, Schott, Bleek, Lücke, Neander, Credner, E. Reuss, Hitzig, Tinius, &c. It should, however, be distinctly observed, that most of these recent critics go no farther than to deny that John the Apostle was the writer; which may certainly be done without impugning its *indirectly apostolic* authority. They do not exclude it from the canon as a divinely inspired writing; although in attacking its *direct apostolicity*, some may imagine that they ruin its canonical credit.

(*b.*) We shall now allude to the evidence in favour of its canonicity. The earliest witness for it is Papias, as we learn from Andreas and Arethas of Cappadocia, in their preface to Commentaries on the Apocalypse. According to these writers, Papias regarded it as an inspired book. It is true that Rettig (*Studien und Kritiken*, 1831), followed by Lücke, has endeavoured to weaken their testimony; but since the publication, by Cramer, of an old scholion relating to the words of Andreas, it is indubitable that Papias's language refers to the present Apocalypse of John (Hävernick's *Lucubrationes Criticæ ad Apoc. spectantes*, Regiom. 1842, 8vo., No. 1, p. 4, sq.). Melito, Bishop of Sardis, one of the seven apocalyptic churches, wrote a work exclusively on this book. Eusebius thus speaks of his production (*Hist. Eccles.* iv. 26): καὶ τὰ περὶ τοῦ διαβόλου καὶ τῆς ἀποκαλύψεως Ἰωάννου. From these words Semler endeavours to show that the books concerning the devil and the Apocalypse were one and the same, a conclusion which, if it were valid, would go to weaken the testimony. But Melito calls it the Apocalypse of John, implying that he regarded it as such; for had he suspected the book, Eusebius would hardly have omitted that circumstance. Jerome, in his catalogue of illustrious men, explicitly distinguishes two works, one respecting the devil, the other relative to the Apocalypse. Theophilus, Bishop of Antioch (Euseb. iv. 24), in his book against Hermogenes, drew many proofs and arguments from the Revelation; so also Apollonius of Ephesus, according to the same ecclesiastical

historian (v. 18). The testimony of Irenæus is most important, because he was in early life acquainted with Polycarp, who was John's disciple, and because he resided in Asia Minor, where John himself abode during the latter part of his life. In one place he says, 'It was seen no long time ago, but almost in our age, towards the end of Domitian's reign;' while he frequently quotes it elsewhere as the *Revelation of John, the disciple of the Lord.* It is true that De Wette and Credner seek to cast suspicion on this father's testimony, because he states that it was written under Domitian, which they regard as incorrect; but this point shall be noticed hereafter. To these may be added the testimony of the martyrs at Lyons, of Nepos (Euseb. vii. 23), Methodius of Tyre, Didymus of Alexandria, Cyprian, Lactantius, Augustine, Athanasius, Basil the Great, Epiphanius of Cyprus, Jerome, Ephrem the Syrian, Rufinus the presbyter, Isidore of Pelusium, Hilary of Poictou, Cyril of Alexandria, Arethas and Andreas of Cappadocia, the Synod of Hippo, A.D. 393, canon 36, the Synod of Toledo, A.D. 633, the third council of Carthage, A.D. 397, Victorin of Pettaw in Pannonia, Dionysius the Areopagite, Sulpicius Severus, Joh. Damascenus, Œcumenius, Amphilochius, Novatus and his followers, the Manichees, the Donatists, the Arians, the latter Arnobius, Rhaban Maurus, Isidore of Spain, Commodian, and others.

It has been disputed whether Chrysostom rejected the book or not. The presumption is in favour of the latter, as Lücke candidly allows. A similar presumption may be admitted in the case of Theodoret, although nothing very decisive can be affirmed in relation to his opinion. Perhaps some may be inclined to dispute the testimony of Jerome in favour of the canonical authority, because he says in his annotations on the 149th Psalm, 'The Apocalypse which is read and received in the churches is not numbered among the apocryphal books, but the *ecclesiastical.*' 'In the strict sense of the term,' says Hug, 'an *ecclesiastica scriptura* is a book of only secondary rank. It is well known that a contemporary of Jerome divides the books of the Old and New Testament, together with those which make any pretensions to be such, into *canonici, ecclesiastici, et apocryphi.* Now if Jerome affixed the same meaning as this writer to the expression *liber ecclesiasticus*, we have here a very singular fact. The Latins then placed this book in the second class among the disputed books. Thus it will have been assigned to each of the three classes. But Jerome does not attach to this word the strict signification which it bears with his contemporary; for, in his Epistle to Dardanus, he says, "If the Latins do not receive the Epistle to the Hebrews among the canonical Scriptures, so, with equal freedom, the Greek churches do not receive John's Apocalypse. I, however, acknowledge both, for I do not follow the custom of the times, but the authority of older writers, who draw arguments from both, *as being canonical and ecclesiastical* writings, and not merely as apocryphal books are sometimes used." Here Jerome has so expressed himself, that we must believe he made no difference between canonical and ecclesiastical, and affixed no stronger signification to the one than to the other' (Hug's *Introd.*, translated by Fosdick, pp. 661-2).

It is also necessary to attend to the testimony of Ephrem definitely ascribing the Revelation to *John the Theologian*, in connection with the fact of the book's absence from the Peshito, and from Ebedjesu's catalogue of the books of Scripture received by the Syrians. Certainly its absence from this ancient version does not prove its want of canonicity; else the same might be affirmed of John's two epistles, and that of Jude, none of which is found in the same version. Probably the Peshito was made, not, as Lücke and others affirm, at the conclusion of the second or commencement of the third century, but *in the first*, before the Apocalypse was written. The words of Assemanni, in relation to one of the passages in which Ephrem attributes the Revelation to John, are striking: 'In hoc sermone citat s. doctor Apocalypsin Johannis tanquam canonicam Scripturam—quod ideo notavi, ut constaret Syrorum antiquissimorum de illius libri auctoritate judicium' (see Hävernick, p. 8, sq.). That the Syrian church did not reject the book, may be inferred from the fact that the inscription of the current Syriac version assigns it to John the Evangelist. The witnesses already adduced for ascribing the authorship to John the Apostle also belong to the present place, since in attesting the *apostolic*, they equally uphold the *divine* origin of the book.

At the period of the Reformation, Flacius strenuously upheld the authority of the Apocalypse, and since his day able defenders of it have not been wanting. Twells, C. F. Schmid, J. F. Reuss, Knittel, Storr, Lüderwald, Hartwig, Kleuker, Herder, Donker Curtius, Hänlein, Bertholdt, Eichhorn, Hug, Feilmoser, Kolthoff, Olshausen, J. P. Lange (Tholuck's *Lit. Anzeig.* 1838), Dannemann, Hävernick (*Evangel. Kirchenzeit*, 1834, and *Lucub. Criticæ*), Guerike, Schnitzer (*Allgem. Literaturzeit.* 1841), Zeller (*Deutsche Jahrb.*, 1841), and others. Most of these writers seem to rest all the credit and authority of the book on the fact of its being written by John the Apostle, while one or two of the later critics attribute it to the apostle, for the sake of invalidating and ruining the fourth Gospel. The external evidence in favour of its authenticity and genuineness is overwhelming. This is particularly the case in regard to the Latin church. In the Greek, doubts were more prevalent, until they were lost in the dark night of the middle ages. Montanism first aroused and drew attention to the question, for the adherents of that false system based their tenets almost exclusively on the Revelation. Hence we may account in some degree for the sentiments of Dionysius of Alexandria, who contended against the millennarian Nepos.

Thus the general tenor of the external evidence is clearly in favour of the canonical authority, while internal circumstances amply confirm it. The style, language, and manner of the book, cannot be mistaken. In dignity and sublimity it is equal to any of the New Testament writings, if not superior to them all. The variety and force of the images impress the mind of every reader with conceptions of a divine origin. Surely no uninspired man could have written in such a strain.

III. *The time and place at which it was written.*—In ascertaining these points there is

considerable difficulty. The prevalent opinion is, that the book was written A.D. 96 or 97, at Patmos or Ephesus, after Domitian's death, *i. e.* under Nerva. So Mill, Le Clerc, Basnage, Lardner, Woodhouse, and others. This is supposed to be in accordance with the tradition, that John was sent into Patmos towards the end of Domitian's reign, and that he there received the Revelation, agreeably to the statement in ch. i. 9. The fact that John was banished to Patmos is attested by antiquity, and seems to be hinted at in ver. 9, in which we must believe, in opposition to Neander, that there is a necessary reference to sufferings on account of the Gospel. It is mentioned by Irenæus, Clement of Alexandria, Tertullian, Origen, Eusebius, and Jerome. *The time*, however, is very differently stated. Eusebius and Jerome attribute the exile to Domitian; the Syriac version of the Apocalypse, Theophylact, and the younger Hippolytus, assign it to Nero; Epiphanius to Claudius; while Tertullian, Clement, and Origen, give it no name. It has been conjectured that Domitius (Nero) and Domitian were early interchanged, and that even the testimony of Irenæus refers rather to Domitius (Nero) than to Domitian. The following is the passage in question; οὐδὲ γὰρ πρὸ πολλοῦ χρόνου ἑωράθη, ἀλλὰ σχεδὸν ἐπὶ τῆς ἡμετέρας γενεᾶς, πρὸς τῷ τέλει τῆς Δομετιανοῦ ἀρχῆς (*Advers. Hær.* lib. v. p. 449, ed. Grabe). If Δομετιανοῦ be an adjective formed from the substantive Δομέτιος, it will mean 'belonging to Domitius' (see Guerike, *Historisch-Krit. Einleit.* pp. 285, 6). But whatever plausibility there be in this conjecture (and there seems to be none), the language of Tertullian, Clement, and Origen, is more appropriate to Nero than to Domitian. Besides, if Peter and Paul suffered from the cruel tyrant, it is difficult to conceive how John could have eluded notice or persecution. Indeed early ecclesiastical tradition is as favourable to the assumption that John was sent into banishment by Nero, as it is to the opinion that he was exiled by Domitian. Thus Eusebius, who in his *Chronicon* and *Ecclesiastical History* follows Irenæus, in his *Demon. Evangel.*, associates the Patmos-exile with the death of Peter and Paul who suffered under Nero. But we are not left to external grounds on the question before us, else the decision might be uncertain; for the tradition of the early church in regard to the banishment of John is neither consistent nor valuable: it will not stand the test of modern criticism. Hence the view of those who think that it was manufactured solely from chap. i. 9, is exceedingly probable. Taken from such an origin, it was shaped in various ways. The passage in question certainly implies that John had been a sufferer for the Gospel's sake, and that he either withdrew to Patmos before the fury of persecution burst upon him, or that he *was compelled* to betake himself to that lonely island in consequence of positive opposition. The language of the fathers in recording this tradition also shows, that they did not carefully distinguish between the time of *writing* the visions and the time when *they were received*. Sometimes it is said that the Apocalypse was *written* in Patmos, but much more frequently it is simply stated that *revelations were there made* to the seer.

In the absence of definite *external* evidence, *internal* circumstances come to our aid. These show that Jerusalem had not been destroyed. Had such a catastrophe already happened, it would scarcely have been left unnoticed. An event pregnant with momentous consequences to the cause of truth and the fortunes of the early church, would most probably have been mentioned or referred to. But there are distinct references to the impending destruction of the city. In chap. xi. 1, it is commanded to measure the temple, obviously pre-supposing that it still stood. In verse 2, the holy city is about to be trodden by the Gentiles forty-two months; and in the 13th verse of the same chapter, the same event is also noticed. Besides, the sixth emperor was still sitting on the throne when the writer was favoured with the visions (xvii. 10). Five kings or emperors had already fallen, one was then reigning, and the other had not come. The most natural interpretation of the sixth king is that which, beginning the series with Julius Cæsar, fixes upon Nero: so Bertholdt and Koehler. Galba is of course the seventh, and agreeably to the prophecy he reigned but seven months. That such was the usual mode of computation, Koehler has attempted successfully to show from the fourth book of Ezra and Josephus's *Antiquities;* which is confirmed by Suetonius's *Twelve Cæsars*, and by the *Sibylline oracles*, fifth book.* We are aware that Eichhorn reckons from Augustus, and makes the sixth Vespasian—Otho, Galba, and Vitellius being passed over; and that Ewald, Lücke, and others, beginning also with Augustus, make Galba the sixth, the emperor 'that is;' but it was contrary to the usual method of reckoning among the Jews and Romans to commence with that emperor. Yet the opinion that the sixth emperor was Nero, is liable to objection. The 8th and 11th verses appear to contradict it, for they state that 'he *was, and is not.*' It will be observed that in these verses an explanation respecting the beast is given, couched in the language of current report. The words amount to this—'The beast which thou sawest is the emperor, of whom it is commonly believed that he shall be assassinated, recover from the wound, go to the East, and return from it to desolate the church and inflict terrible punishments on his enemies.' Nero is described, according to the common belief—a belief *that prevailed before his death.*' In chap. xiii. 3, it is not implied that Nero *was then dead*, for the holy seer beheld things ἃ μέλλει γενέσθαι as well as things ἃ εἰσι; and the passage is descriptive of *a vision, not explanatory of one previously pourtrayed.* We conclude, therefore, that the apostle saw the visions during the reign of the bloody and cruel Nero. Still, however, he may have written the book not at Patmos, but immediately after his return to Ephesus, if so be that he *did* return thither before Nero ceased to live. It has been inferred that the book was written *after he had been* in Patmos, because ἐγενόμην is used in chap. i. 9, 10. The use of this tense, however, by no means militates against the view of those who assert that he *wrote* as well as *saw* the visions in Patmos, and consequently does not prove that

* See Lücke's objections to this view, which cannot be refuted here, at p. 251, notes 1 and 2.

the book was written at Ephesus. The verb in ver. 10 may aptly refer to *the commencement of that ecstatic state* into which he was thrown for the purpose of receiving mysterious disclosures—to the time when he first began to be ἐν πνεύματι; and in ver. 9 it may in like manner allude to *the commencement* of his exile. In view of all circumstances we are inclined to assume that the Apocalypse was written during the reign of Nero, *when persecution had commenced*, as many passages imply, and, therefore, at Patmos. It weighs nothing with us that Eichhorn, Bleek, and De Wette conjecturally assume that the place mentioned in i. 9 may be a poetical fiction: even Ewald opposes such a thought.

Before leaving this subject it is necessary to glance at the circumstances supposed to show that the book was not written till after Nero's death. The general expectation of his return (xvii. 11), and the allusions to the persecutions of Christians under him (vi. 9; xvii. 6), as also the pre-supposed fact of most of the apostles being dead (xviii. 20), are stated by De Wette. But in xvii. 11, the apostle merely describes Nero according to the common report—a report current *before* his death, the substance of which was, that after reigning a while he should appear again, and make an eighth, though one of the seven. The passages, vi. 9, and xvii. 6, allude to different events, the former to the souls of the martyrs that had been slain by *the Jews*, the latter to the persecutions of imperial Rome generically. According to the right reading of xviii. 20, it does not imply that most of the apostles were already dead.

In conformity with the testimony of Irenæus, understood in the ordinary acceptation, it has been very generally believed that the book was written under Domitian, A.D. 96 or 97. But the vague report of the apostle's banishment, current among early writers in different and varying forms, must not be allowed to set aside internal evidence, especially the clearly-defined chronological elements of the xi. and xvii. chapters.

The arguments adduced in favour of Domitian's reign are the following:—

1. Nero's persecution did not reach the provinces. 2. The Nicolaitans did not form a sect when the book was written, although they are spoken of as such. 3. The condition of the seven churches, as pourtrayed in the Apocalypse, shows that they had been planted a considerable time. 4. Mention is made of the martyr Antipas at Pergamos, who could not have suffered death in Nero's reign, because the persecution did not reach the provinces (Lenfant and Beausobre's *Preface sur l'Apoc. de S. Jean*, pp. 613-14; and Vitringa, *in Apoc.*, cap. i. v. 2, p. 9-11).

1. In order to account for John's banishment to Patmos, it is not needful to believe that the spirit of persecution raged at Ephesus. While it was so active at Rome, we may fairly infer that the Christians in the provinces trembled for their safety. Whatever affected the capital so fearfully, would naturally affect the distant parts of the empire to a greater or less extent; and John's retirement to Patmos does not necessarily pre-suppose the horrors of fire and sword. The storm was seen to lower; the heathen magistrates, as well as the Jews, put forth their enmity in various forms, even when the edicts of emperors forbade violence to the persons of Christians, and the apostle in consequence withdrew for a time from the scene of his labours.

2. The most probable interpretation is, that Nicolaitans is a symbolic name signifying *corrupters of the people*, equivalent to Balaam in Hebrew. It is true that Irenæus speaks of such a sect in his time, deriving the appellation from the deacon Nicolaus (Acts ii.), and representing the allusion in the Apocalypse as belonging to it. The sect called the Nicolaitans, spoken of by Clement, is probably not the same as that mentioned in the Apocalypse (Neander, *Kirchengesch.* i. 2, p. 775, sq.).

3. A close examination of the language addressed to each of the seven churches will show that it may have been appropriate in the year of our Lord 68. It does not by any means imply that there had been an open persecution in the provinces. About A.D. 61 the church of Ephesus is commended by Paul for their faith and love (Eph. i. 15), which is quite consistent with Rev. ii. 2, 3; while both are in agreement with the censure that the members had left their first love. In the lapse of a very few years, and especially in trying circumstances, the ardour of their love had cooled. The *patience* for which they are commended refers, as the context shows, to the temptations which they suffered from wicked and corrupting teachers, and the difficulties attendant upon the faithful exercise of discipline in the church. Similar was the case with the church at Smyrna, *their tribulation* having chief reference to the blasphemy of Satan's synagogue.

4. In regard to Antipas nothing is known. He suffered at Pergamos, but under what emperor, or in what circumstances, is uncertain. It is not at all necessary to our hypothesis to assume that he was put to death during Nero's persecution. Individual Christians were put to death even in the provinces before the time of Nero. On the whole, we see no good ground for believing that the book was written in the time of Claudius, or Galba, or Vespasian, or Domitian, or Trajan, or Adrian, though all these have been advocated; nor is there sufficient reason for separating the time of the writing from that of the receiving of the visions. In view of all circumstances we assign it to the time of Nero, and the locality of Patmos, A.D. 67 or 68. Sir Isaac Newton long ago fixed upon the same date.

IV. *Unity of the book.*—A few writers have thought that the Apocalypse was written at different times by the same author, as Grotius, Hammond, and Bleek; or by different authors, as Vogel. Such dismemberment is now abandoned. Even De Wette allows that no reasonable doubts can be entertained of its unity. The entire book is so regular in its structure, so intimately connected is one paragraph with another, that all must have proceeded from the same writer. If the nature of prophetic perspective be rightly understood, all will appear to be natural and easy. John saw things past, present, and future at once. He did not need to wait for the progress of events—for events were presented to his vision just as the Spirit willed. Hence the present tense is so much used in place of the future. The hypotheses of Grotius, Vogel, and Bleek, have been refuted by Lücke; and that of Hammond requires not now the like examination.

V. *The class of writings to which it belongs.*—Pareus seems to have been the first who started the idea of its being a *dramatic* poem. The same opinion was also expressed by Hartwig. But the genius of Eichhorn wrought out the suggestion into a theory pervaded by great symmetry and beauty. Hence the opinion that it forms a regular dramatic poem is associated with his name alone. According to him the divisions are: 1. The title, chap. i. 1-3. 2. The prologue, i. 4—iii. 22. 3. The drama, iv. 1—xxii. 5. Act 1. The capture of Jerusalem, or the triumph of Christianity over Judaism, vii. 6—xii. 17. Act 2. The capture of Rome, or the triumph of Christianity over Paganism, xii. 18—xx. 10. Act 3. The new Jerusalem descends from heaven, or the felicity which is to endure for ever, xx. 11—xxii. 5. 4. The epilogue, xxii. 6-21; (a) of the angel, xxii. 6; (b) of Jesus, xxii. 7-16; (c) of John, xxii. 16-20. The apostolical benediction, xxii. 21.
